TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1-Nature of Business and Principles of Consolidation

Nature of business—Transocean Ltd. (together with its subsidiaries and predecessors, unless the context requires otherwise, "Transocean," the "Company," "we," "us" or "our") is a leading international provider of offshore contract drilling services for oil and gas wells. Our mobile offshore drilling fleet is considered one of the most modern and versatile fleets in the world. Specializing in technically demanding sectors of the offshore drilling business with a particular focus on deepwater and harsh environment drilling services, we contract our drilling rigs, related equipment and work crews primarily on a dayrate basis to drill oil and gas wells. At March 31, 2009, we owned, had partial ownership interests in or operated 136 mobile offshore drilling units. As of this date, our fleet consisted of 39 High-Specification Floaters (Ultra-Deepwater, Deepwater and Harsh Environment semisubmersibles and drillships), 28 Midwater Floaters, 10 High-Specification Jackups, 55 Standard Jackups and four Other Rigs. We also have 10 Ultra-Deepwater Floaters under construction or contracted for construction (see Note 6—Drilling Fleet Expansion and Dispositions).

We also provide oil and gas drilling management services, drilling engineering and drilling project management services, and we participate in oil and gas exploration and production activities. Drilling management services are provided through Applied Drilling Technology Inc., our wholly owned subsidiary, and through ADT International, a division of one of our U.K. subsidiaries (together, "ADTI"). ADTI conducts drilling management services primarily on either a dayrate or a completed-project, fixed-price (or "turnkey") basis. Oil and gas properties consist of exploration, development and production activities performed by Challenger Minerals Inc. and Challenger Minerals (North Sea) Limited (together, "CMI"), our oil and gas subsidiaries.

In December 2008, Transocean Ltd. completed a transaction pursuant to an Agreement and Plan of Merger among Transocean Ltd., Transocean Inc., which was our former parent holding company, and Transocean Cayman Ltd., a company organized under the laws of the Cayman Islands that was a wholly owned subsidiary of Transocean Ltd., pursuant to which Transocean Inc. merged by way of schemes of arrangement under Cayman Islands law with Transocean Cayman Ltd., with Transocean Inc. as the surviving company (the "Redomestication Transaction"). In the Redomestication Transaction, Transocean Ltd. issued one of its shares in exchange for each ordinary share of Transocean Inc. In addition, Transocean Ltd. issued 16 million of its shares to Transocean Inc. for future use to satisfy Transocean Ltd.'s obligations to deliver shares in connection with awards granted under our incentive plans, warrants or other rights to acquire shares of Transocean Ltd. The Redomestication Transaction effectively changed the place of incorporation of our parent holding company from the Cayman Islands to Switzerland. As a result of the Redomestication Transaction, Transocean Inc. became a direct, wholly owned subsidiary of Transocean Ltd. In connection with the Redomestication Transaction, we relocated our principal executive offices to Vernier, Switzerland. We refer to the Redomestication Transaction and the relocation of our principal executive offices together as the "Redomestication."

Principles of consolidation—We consolidate those investments that meet the criteria of a variable interest entity where we are deemed to be the primary beneficiary for accounting purposes and for entities in which we have a majority voting interest. Intercompany transactions and accounts are eliminated in consolidation. For investments in joint ventures and other entities that do not meet the criteria of a variable interest entity or where we are not deemed to be the primary beneficiary for accounting purposes of those entities that meet the variable interest entity criteria, we use the equity method of accounting if we have the ability to exercise significant influence over the unconsolidated affiliate. We use the cost method of accounting for investments in joint ventures and other entities if we do not have the ability to exercise significant influence over the unconsolidated affiliate.

Note 2—Summary of Significant Accounting Policies and New Accounting Pronouncements

Summary of Significant Accounting Policies

Basis of presentation—Our accompanying condensed consolidated financial statements have been prepared without audit in accordance with accounting principles generally accepted in the United States ("U.S.") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the U.S. Securities and Exchange Commission ("SEC"). Pursuant to such rules and regulations, these financial statements do not include all disclosures required by accounting principles generally accepted in the U.S. for complete financial statements. The condensed consolidated financial statements reflect all adjustments, which are, in the opinion of management, necessary for a fair presentation of financial position, results of operations and cash flows for the interim periods. Such adjustments are considered to be of a normal recurring nature unless otherwise identified. Operating results for the three months ended March 31, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009 or for any future period. The accompanying condensed consolidated financial

statements and notes thereto should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2008.

Accounting estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and disclosures of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and assumptions, including those related to bad debts, materials and supplies obsolescence, investments, intangible assets and goodwill and other

- 5 -

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

intangible assets, property and equipment and other long-lived assets, income taxes, share-based compensation, pensions and other postretirement benefits, other employment benefits and contingent liabilities. We base our estimates and assumptions on historical experience and on various other factors we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from such estimates.

Capitalized interest—We capitalize interest costs for qualifying construction and upgrade projects. We capitalized interest costs on construction work in progress of \$46 million for the three months ended March 31, 2009 and \$36 million for the three months ended March 31, 2008, as adjusted for the adoption of Financial Accounting Standards Board ("FASB") Staff Position ("FSP") No. Accounting Principles Board ("APB") 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement) ("FSP APB 14-1"). See "New Accounting Pronouncements" and Note 7—Debt.

Share-based compensation—Share-based compensation expense was \$19 million (\$17 million, or \$0.05 per diluted share, net of tax) and \$22 million (\$18 million, or \$0.06 per diluted share, net of tax) for the three months ended March 31, 2009 and March 31, 2008, respectively.

Reclassifications—Certain reclassifications have been made to prior period amounts to conform with the current period's presentation. Except for certain reclassifications associated with our adoption of FSP APB 14-1, as described below and in Note 7—Debt, these reclassifications did not have a material effect on our consolidated statement of financial position, results of operations or cash flows.

New Accounting Pronouncements

SFAS 157—In September 2006, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 15th: Value Measurements ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements about fair value measurements. SFAS 157 eliminates inconsistencies by providing a single source of guidance for the application of fair value measurements required in other accounting pronouncements and establishes a three level hierarchy for the inputs to valuation techniques used to measure fair value. The three levels are as follows: (1) unadjusted quoted prices in active markets for identical assets or liabilities ("Level 1"), (2) observable inputs other than quoted prices in active markets for identical assets and liabilities ("Level 2"), and (3) unobservable inputs for which there is little or no market data ("Level 3"). SFAS 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued FSP No. FAS 157-2, Effective Date of FASB Statement No. 157, which delayed the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. Effective January 1, 2008, we adopted those provisions of SFAS 157 that were unaffected by the delay, and our adoption did not have a material effect on our consolidated statement of financial position, results of operations or cash flows. Effective January 1, 2009, we adopted the remaining provisions of SFAS 157, which we have applied in estimating the fair value of our assets held for sale (see Note 3—Impairment Loss), and our adoption did not have a material effect on our condensed consolidated statement of financial position, results of operations or cash flows. In April 2009, the FASB issued FSP No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly ("FSP FAS 157-4"), which provides additional guidance for estimating fair value when there is no active market or where the activity represents distressed sales. FSP FAS 157-4 is effective for interim and annual reporting periods ending after June 15, 2009. We will be required to adopt the principles of FSP FAS 157-4 in the second quarter of 2009. We do not expect the adoption to have a material effect on our condensed consolidated statement of financial position, results of operations or cash flows.

SFAS 160—In December 2007, the FASB issued SFAS No. 160 controlling Interests in Consolidated Financial Statements ("SFAS 160"). SFAS 160 establishes accounting and reporting standards for noncontrolling interests, formerly known as minority interests, in a subsidiary and for the deconsolidation of a subsidiary. It requires that noncontrolling interests be reported as equity in the consolidated balance sheet and requires that net income attributable to controlling interest and to noncontrolling interests be shown separately on the face of the statement of operations. SFAS 160 is effective for fiscal years beginning after December 15, 2008, and we have adopted SFAS 160 as of January 1, 2009. As a result of our adoption, we modified our condensed consolidated statements of operations to separately present net income attributable to controlling interest of \$942 million and \$1,149 million for the three months ended March 31, 2009 and March 31, 2008, respectively, and net income (loss) attributable to noncontrolling interests of \$(3) million and \$1 million for the three months ended March 31, 2009 and March 31, 2008, we reclassified to equity noncontrolling interests of \$3 million. As of March 31, 2009, there was no balance for equity noncontrolling interest.

SFAS 141R—In December 2007, the FASB issued SFAS No. 141 (revised 2007) (in requires Combinations ("SFAS 141R")). SFAS 141R replaces SFAS No. 141, Business Combinations and, among other things, (1) requires that primarily all acquired assets, liabilities, noncontrolling interest and certain contingencies be measured at fair value, (2) broadens the scope of business combinations to include all transactions in which one entity gains control over one or more other businesses and (3) requires acquisition-related costs and anticipated restructuring costs of the acquired company to be recognized separately from the acquisition. SFAS 141R applies prospectively to business combinations for which the acquisition date occurs in fiscal years beginning after December 15, 2008. In

- 6 -

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

April 2009, the FASB issued FSP FAS 141(R)-1, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination that Arise from Contingencies ("FSP FAS 141R-1"), which requires that assets acquired and liabilities assumed in a business combination that arise from contingencies be recognized at fair value, in accordance with SFAS 157, if the fair value can be determined during the measurement period. If the fair value of such contingencies cannot be determined during the measurement period, FSP FAS 141R-1 requires that the contingencies be recognized at the acquisition date in accordance with SFAS No. 5, Accounting for Contingencies. We adopted the principles of SFAS 141R and FSP FAS 141R-1 as of January 1, 2009, and will apply such principles with respect to any business combinations occurring on or after January 1, 2009 and with respect to certain income tax matters related to previous business combinations. Because of the prospective application requirement, our adoption did not have an effect on our historical condensed consolidated statement of financial position, results of operations or cash flows for either period presented.

SFAS 161—In March 2008, the FASB issued SFAS No. 16*Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133* ("SFAS 161"). SFAS 161 changes the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about (1) how and why an entity uses derivative instruments, (2) how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* ("SFAS 133"), and its related interpretations, and (3) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for fiscal years beginning after November 15, 2008. We adopted SFAS 161 as of January 1, 2009. Because of our limited use of derivative instruments, the adoption of SFAS 161 did not have a significant impact on the disclosures contained in our notes to condensed consolidated financial statements.

FSP FAS 142-3—In April 2008, the FASB issued FSP FAS No. 142-Determination of the Useful Life of Intangible Assets ("FSP FAS 142-3"). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008 and interim periods within those fiscal years, requiring prospective application to intangible assets acquired after the effective date. We have adopted FSP FAS 142-3 and will apply the new standards with respect to intangible assets acquired on or after January 1, 2009. Because of the prospective application requirement, our adoption of FSP FAS 142-3 did not have an effect on our condensed consolidated statement of financial position, results of operations or cash flows for either period presented.

FSP APB 14-1—In May 2008, the FASB also issued FSP No. APB 14-1, which requires the issuer of certain convertible debt instruments to separately account for the liability and equity components of the instrument and reflect interest expense at the issuer's market rate of borrowing for non-convertible debt instruments. FSP APB 14-1 requires retrospective restatement of all periods presented with the cumulative effect of the change in accounting principles on prior periods being recognized in retained earnings as of the beginning of the first period presented. We adopted the provisions of FSP APB 14-1, effective January 1, 2009, and have applied those provisions in accounting and reporting for our convertible senior notes. In addition to the reduction of debt balances and increase of shareholders' equity on our condensed consolidated balance sheets for each period presented, the retrospective application of FSP APB 14-1 resulted in a non-cash increase to our annual historical interest expense, net of amounts capitalized, of \$171 million and \$9 million for the years ended December 31, 2008 and 2007, respectively. See Note 7—Debt.

EITF 07-5—In June 2008, the FASB ratified the consensus on Emerging Issues Task Force ("EITF") Issue No. 07-5, "Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock" ("EITF 07-5"). An instrument or embedded feature that is both indexed to an entity's own stock and potentially settled in shares may be exempt, if certain other criteria are met, from mark-to-market accounting of derivative financial instruments. EITF 07-5 addresses instruments with contingent and other adjustment features that may change the exercise price or notional amount or otherwise alter the payoff at settlement. We have both warrants and convertible notes outstanding that are exercisable or convertible into our shares. We adopted EITF 07-5 as of January 1, 2009, and our adoption did not have a material effect on our consolidated statement of financial position, results of operations or cash flows.

FSP EITF 03-6-1—In June 2008, the FASB issued FSP EITF 03-6-*Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* ("FSP EITF 03-6-1"). FSP EITF 03-6-1 clarifies that all outstanding unvested share-based payment

awards containing rights to nonforfeitable dividends are considered participating securities and the holders of the unvested awards, therefore, participate in undistributed earnings with common shareholders. Accordingly, the two-class method of computing basic and diluted earnings per share must be applied to the unvested awards. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008, and for interim periods within those years. We adopted FSP EITF 03-6-1 as of January 1, 2009, and we have adjusted earnings per share for all periods presented. As a result of our adoption, for each period presented, we have deducted the proportionate amount of our undistributed earnings allocable to the participating securities from net income to arrive at net income attributable to shareholders. Our adoption did not have a material effect on basic or diluted earnings per share for the three months ended March 31, 2008. See Note 5—Earnings per Share.

FSP FAS 132R-1—In December 2008, the FASB issued FSP No. FAS 132(R)-*Employers' Disclosures about Postretirement Benefit Plan Assets* ("FSP FAS 132R-1"), which provides additional guidance regarding required disclosures for plan assets of a defined benefit pension or other postretirement plan. FSP FAS 132R-1 is effective for fiscal years ending after December 15, 2009. We will be

- 7 -

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

required to adopt the principles of FSP FAS 132R-1 in the fourth quarter of 2009 and intend to include the additional disclosures in the notes to our financial statements for the year ending December 31, 2009. We do not expect the adoption to have a material effect on the disclosures contained in our notes to consolidated financial statements.

FSP FAS 107-1 and **APB 28-1**—In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, *Interim Disclosures About Fair Value of Financial Instruments* ("FSP FAS 107-1 and APB 28-1"). FSP FAS 107-1 and APB 28-1 amends SFAS No. 10*Tpisclosures about Fair Value of Financial Instruments*, and APB Opinion No. 28, *Interim Financial Reporting*, to require disclosures about fair value of financial instruments for interim and annual reporting periods of publicly traded companies. FSP FAS 107-1 and APB 28-1 is effective for interim reporting periods ending after June 15, 2009. We will be required to adopt the principles of FSP FAS 107-1 and APB 28-1 in the second quarter of 2009 and intend to include the additional disclosures in our notes to condensed consolidated financial statements for the quarter ending June 30, 2009.

FSP FAS 115-2 and FAS 124-2—In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-Recognition and Presentation of Other-Than-Temporary Impairments ("FSP FAS 115-2 and FAS 124-2"). FSP FAS 115-2 and FAS 124-2 amends the other-than-temporary impairment guidance for debt securities to modify the recognition requirements for and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. FSP FAS 115-2 and FAS 124-2 is effective for interim and annual reporting periods ending after June 15, 2009. We will be required to adopt the principles of FSP FAS 115-2 and FAS 124-2 in the second quarter of 2009. We do not expect the adoption to have a material effect on our consolidated statement of financial position, results of operations or cash flows.

Note 3—Impairment Loss

During the three months ended March 31, 2009, we determined that *GSF Arctic II* and *GSF Arctic IV*, both assets held for sale, were impaired due to the continued global credit crisis and continued pressure on commodity prices, both of which have had an adverse effect on our industry. We estimated the fair values of these rigs in accordance with SFAS 157 (see Note 2?Summary of Significant Accounting Policies and New Accounting Pronouncements), which defines fair value as the exchange price that would be received for an asset in the principal or most advantageous market for the asset in an orderly transaction between market participants at the measurement date. We based our estimates on non-binding price quotes from unaffiliated parties with consideration of the current market conditions and restrictions imposed by the Office of Fair Trading in the U.K. ("OFT"). We consider the estimates to be based on unobservable inputs that require significant judgment, for which there is little or no market data. As a result of our evaluation, and considering our undertakings to the OFT that require the sale of the rigs with certain limitations and in a limited amount of time, we recognized an impairment loss of \$221 million, which had no tax effect, for the three months ended March 31, 2009.

Note 4—Income Taxes

Overview—Transocean Ltd., a holding company and Swiss resident, is exempt from cantonal and communal income tax in Switzerland, but is subject to Swiss federal income tax. At the federal level, qualifying net dividend income and net capital gains on the sale of qualifying investments in subsidiaries are exempt from Swiss federal income tax. Consequently, Transocean Ltd. expects dividends from its subsidiaries and capital gains from sales of investments in its subsidiaries to be exempt from Swiss federal income tax.

Our operations are conducted through our various subsidiaries in a number of countries throughout the world. We have provided for income taxes based upon the tax laws and rates in the countries in which operations are conducted and income is earned. The countries in which we operate have taxation regimes with varying nominal rates, deductions, credits and other tax attributes. Consequently, there is little to no expected relationship between the provision for or benefit from income taxes and income or loss before income taxes.

Tax provision—The estimated annual effective tax rates for the three months ended March 31, 2009 and March 31, 2008 were 15.2 percent and 14.0 percent, respectively. These rates were based on estimated annual income before income taxes for each period after adjusting for certain items, such as the 2008 net tax gains on rig sales, the impairment loss and various other discrete items.

During the quarter ended March 31, 2009, our liability for unrecognized tax benefits increased by \$40 million to a total of \$561 million, including \$163 million of interest and penalties and net of foreign exchange rate fluctuations. We accrue interest and penalties related to our liabilities for unrecognized tax benefits as a component of income tax expense. For the three months ended March 31, 2009, we increased the liability related to interest and penalties on our unrecognized tax benefits by \$14 million.

A valuation allowance for deferred tax assets is recorded when it is more likely than not that some or all of the benefit from the deferred tax asset will not be realized. We provide a valuation allowance to offset deferred tax assets for net operating losses incurred during the year in certain jurisdictions and for other deferred tax assets where, in the opinion of management, it is more likely than not that the financial statement benefit of these losses will not be realized. As of March 31, 2009, the valuation allowance for non-current deferred tax assets was \$42 million.

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

Tax returns—We file federal and local tax returns in several jurisdictions throughout the world. With few exceptions, we are no longer subject to examinations of our U.S. and non-U.S. tax matters for years prior to 1999. The amount of current tax benefit recognized in the three months ended March 31, 2009 from the settlement of disputes with tax authorities and the expiration of statutes of limitations was insignificant.

Our tax returns in the other major jurisdictions in which we operate are generally subject to examination for periods ranging from three to six years. We have agreed to extensions beyond the statute of limitations in two jurisdictions for up to 12 years. Tax authorities in certain jurisdictions are examining our tax returns and in some cases have issued assessments. We are defending our tax positions in those jurisdictions. While we cannot predict or provide assurance as to the final outcome of these proceedings, we do not expect the ultimate liability to have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Tax positions—With respect to our 2004 and 2005 U.S. federal income tax returns, U.S. taxing authorities previously proposed certain adjustments. In 2008, the tax authorities withdrew one of these proposed adjustments, which reduces the proposed assessment to approximately \$79 million, exclusive of interest. One of the remaining adjustments relates to a dispute over the transfer pricing for certain charters of drilling rigs between our subsidiaries. An unfavorable outcome on this assessment with respect to 2004 and 2005 activities would not result in a material adverse effect on our consolidated financial position, results of operations or cash flows. We believe the transfer pricing for these charters is materially correct as filed and intend to defend against such claims vigorously.

The U.S. tax authorities' original assessment also asserted that one of our key subsidiaries maintains a permanent establishment in the U.S. and is, therefore, subject to U.S. taxation on certain earnings effectively connected to such U.S. business. In March 2009, we received verbal indications that this position may be withdrawn by the authorities. We believe the tax treatment asserted in the original assessment with respect to the 2004 and 2005 activity would not result in a material tax liability. We believe our returns are materially correct as filed, and we will continue to vigorously defend against any such claim.

Norwegian civil tax and criminal authorities are investigating various transactions undertaken by our subsidiaries in 2001 and 2002. The authorities issued tax assessments of approximately \$233 million, plus interest, related to certain restructuring transactions, approximately \$62 million, plus interest, related to a 2001 dividend payment, approximately \$4 million, plus interest, related to foreign exchange deductions and approximately \$2 million, plus interest, related to dividend withholding tax. We plan to appeal these tax assessments. We may be required to provide some form of financial security, in an amount up to \$628 million, including interest and penalties, for these assessed amounts as this dispute is appealed and addressed by the Norwegian courts. Furthermore, the authorities have also issued notification of their intent to issue a tax assessment of approximately \$149 million, plus interest, related to the migration of a subsidiary that was previously subject to tax in Norway. The authorities have indicated that they plan to seek penalties of 60 percent on all matters. We have and will continue to respond to all information requests from the Norwegian authorities. We plan to vigorously contest any assertions by the Norwegian authorities in connection with the various transactions being investigated.

During the three months ended March 31, 2009, our long-term liability for unrecognized tax benefits related to these Norwegian tax issues increased by \$11 million to \$157 million due to the accrual of interest and exchange rate fluctuations. While we cannot predict or provide assurance as to the final outcome of these proceedings, we do not expect the ultimate resolution of these matters to have a material adverse effect on our consolidated financial position or results of operations, although it may have a material adverse effect on our consolidated cash flows.

Certain of our Brazilian income tax returns for the years 2000 through 2004 are currently under examination. The Brazil tax authorities have issued tax assessments totaling \$85 million, plus a 75 percent penalty and \$67 million of interest through March 31, 2009. We believe our returns are materially correct as filed, and we are vigorously contesting these assessments. We filed a protest letter with the Brazilian tax authorities on January 25, 2008, and we are currently engaged in the appeals process.

Note 6—Drilling Fleet Expansion and Dispositions

Drilling fleet expansion—Construction work in progress, recorded in property and equipment, was \$5.0 billion and \$4.5 billion at March 31, 2009 and December 31, 2008, respectively. The following table summarizes actual capital expenditures, including capitalized interest, for our major construction and conversion projects (in millions):

	Three months		
	ended	Through	TD - 4 - 1
	March 31,	December 31,	Total
	2009	2008	costs
		(As adjusted)	
Discoverer Clear Leader	\$113	\$ 516	\$ 629
Discoverer Luanda (a)	90	315	405
Dhirubhai Deepwater KG2 (c)	86	270	356
Sedco 700-series upgrades	64	520	584
Discoverer Inspiration	62	443	505
Development Driller III (b)	24	483	507
Dhirubhai Deepwater KG1 (c)	23	384	407
Discoverer Americas	12	478	490
Discoverer India	8	250	258
Deepwater Champion(b)	3	264	267
Petrobras 10000 (d)	<u> </u>	_	_
Capitalized Interest	46	240	286
Total	\$531	\$ 4,163	\$ 4,694

⁽a) The costs for *Discoverer Luanda* represent 100 percent of expenditures incurred since inception. Angola Deepwater Drilling Company Limited ("ADDCL") is responsible for these costs. We hold a 65 percent interest in ADDCL and Angco Cayman Limited holds the remaining 35 percent interest.

⁽b) These costs include our initial investments in *Development Driller III* and *Deepwater Champion* of \$356 million and \$109 million, respectively, representing the estimated fair values of the rigs at the time of the merger with GlobalSantaFe Corporation ("GlobalSantaFe").

⁽c) The costs for *Dhirubhai Deepwater KG1* and *Dhirubhai Deepwater KG2* represent 100 percent of expenditures incurred prior to our investment in the joint venture (\$277 million and \$178 million, respectively) and 100 percent of expenditures incurred since our investment in the joint venture. Transocean Pacific Drilling Inc. ("TPDI") is responsible for these costs. We hold a 50 percent interest in TPDI and Pacific Drilling Limited holds the remaining 50 percent interest.

⁽d) In June 2008, we reached an agreement with subsidiaries of Petrobras and Mitsui to acquire *Petrobras 10000* under a capital lease contract. The capital lease contract, which is expected to commence in the third quarter of 2009, has a 20-year term, after which we will have the right and obligation to acquire the drillship for one dollar. Total capital costs to be incurred by Petrobras and Mitsui for the construction of the drillship are estimated to be \$750 million, including \$65 million of capitalized interest. Upon delivery of the rig, we will record a liability for the capital lease obligation and a corresponding addition to property and equipment based on the fair value at that date. We are offering assistance and advisory services for the construction of *Petrobras 10000* and have agreed to provide operating management services once the drillship begins operations.

Dispositions—During the three months ended March 31, 2008, we completed the sale of two of our Standard Jackups (*GSEdriatic III* and *GSF High Island I*). We received cash proceeds of \$220 million associated with the sales, which had no effect on earnings.

5% Notes due February 2013	248	248
5.25% Senior Notes due March 2013 (b)	499	499
TPDI Credit Facilities due June 2015	292	288
ADDCL Secondary Loan Facility due December 2015	25	25
TPDI Notes due October 2017	111	111
ADDCL Primary Loan Facility due December 2017	339	255
6.00% Senior Notes due March 2018 (b)	997	997
7.375% Senior Notes due April 2018 (b)	247	247
Capital lease obligation due July 2026 (c)	16	16
8% Debentures due April 2027 (b)	57	57
7.45% Notes due April 2027 (b)	96	96
7% Senior Notes due June 2028	313	313
7.5% Notes due April 2031 (b)	598	598
1.625% Series A Convertible Senior Notes due December 2037 (b)	1,981	2,070
1.50% Series B Convertible Senior Notes due December 2037 (b)	2,006	1,990
1.50% Series C Convertible Senior Notes due December 2037 (b)	1,928	1,911
6.80% Senior Notes due March 2038 (b)	999	999
Total debt	12,964	13,557
Less debt due within one year (a)(c)	2,040	664
Total long-term debt	\$ 10,924	\$ 12,893

⁽a) The commercial paper program is classified as debt due within one year. The Term Loan is classified as debt due within one year as of March 31, 2009.

⁽b) Transocean Inc., a wholly owned subsidiary and the principal asset of Transocean Ltd., is the issuer of the notes and debentures, which have been guaranteed by Transocean Ltd. Transocean Ltd. has also guaranteed borrowings under the commercial paper program, the Term Loan, the 364-Day Revolving Credit Facility and the Five-Year Revolving Credit Facility. Transocean Ltd. has no independent assets or operations, its guarantee of debt securities of Transocean Inc. is full and unconditional and its only other subsidiaries not owned indirectly through Transocean Inc. are minor. Transocean Ltd. is not subject to any significant restrictions on its ability to obtain funds from its consolidated subsidiaries or entities accounted for under the equity method by dividends, loans or return of capital distributions.

⁽c) The capital lease obligation had less than \$1 million classified as debt due within one year at both March 31, 2009 and December 31, 2008.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

The scheduled maturities of our debt are as follows (in millions):

Twelve months ending March 31,		
2010	\$ 2,040	
2011	2,225	
2012	2,391	
2013	2,978	
2014	30	
Thereafter	3,865	
Total debt, excluding unamortized discounts, premiums and fair value adjustments	13,529	
Total unamortized discounts, premiums and fair value adjustments	(565)
Total debt	\$ 12,964	

The scheduled maturities of our debt assumes the bondholders exercise their options to require us to repurchase the 1.625% Series A, 1.50% Series B and 1.50% Series C Convertible Senior Notes in December 2010, 2011 and 2012, respectively. These scheduled maturities exclude maturities associated with our future indebtedness in connection with *Petrobras 10000*, which will be held under a capital lease upon completion.

Commercial paper program—We maintain a commercial paper program (the "Program") under which we may issue unsecured commercial paper notes on a private placement basis from time to time up to a maximum aggregate amount outstanding of \$1.5 billion. The 364-Day Revolving Credit Facility and the Five-Year Revolving Credit Facility provide liquidity for the Program. The proceeds from the commercial paper issuance may be used for general corporate purposes. At March 31, 2009, \$639 million in commercial paper was outstanding at a weighted-average interest rate of 1.2 percent.

364-Day Revolving Credit Facility—We have a 364-day, \$1.08 billion revolving credit facility under the 364-Day Revolving Credit Agreement dated November 25, 2008 (the "364-Day Revolving Credit Facility"). At March 31, 2009, no amounts were outstanding under the 364-Day Revolving Credit Facility.

Term Loan—We have a \$2.0 billion term credit facility under the Term Credit Agreement dated March 13, 2008, as amended (the "Term Loan"). We repaid \$600 million of borrowings under the Term Loan during the three months ended March 31, 2009. At March 31, 2009, \$1.4 billion was outstanding at a weighted-average interest rate of 2.0 percent. See Note 8—Derivative Instruments and Hedging Activities.

Five-Year Revolving Credit Facility—We have a \$2.0 billion, five-year revolving credit facility under the Five-Year Revolving Credit Facility Agreement dated November 27, 2007, as amended (the "Five-Year Revolving Credit Facility"). Throughout the term of the Five-Year Revolving Credit Facility, we pay a facility fee on the daily amount of the underlying commitment, whether used or unused, which ranges from 0.10 percent to 0.30 percent and was 0.15 percent at March 31, 2009. At March 31, 2009, we had no amounts outstanding under the Five-Year Revolving Credit Facility.

TPDI Credit Facilities—In October 2008, TPDI entered into a credit agreement for a \$1.265 billion secured credit facility (the "TPDI Term Loan Facility"), comprised of a \$1.0 billion senior tranche, a \$190 million junior tranche and a \$75 million revolving credit facility (the "TPDI Revolving Credit Facility", and together with the TPDI Term Loan Facility, the "TPDI Credit Facilities"). The TPDI Credit Facilities will finance the construction of *Dhirubhai Deepwater KG1* and *Dhirubhai Deepwater KG2*. One of our subsidiaries participates in the senior and junior tranches with a 50 percent commitment totaling \$595 million in the aggregate. At March 31, 2009, \$582 million was outstanding, of which \$290 million was due to one of our subsidiaries and was eliminated in consolidation. The weighted-average interest rate on March 31, 2009 was 3.85 percent. See Note 8—Derivative Instruments and Hedging Activities.

ADDCL Secondary Loan Facility—ADDCL has a secondary loan agreement for a \$90 million credit facility (the "ADDCL Secondary Loan Facility"), for which one of our subsidiaries provides 65 percent of the total commitment and an external lender provides the remaining 35 percent. At March 31, 2009, the weighted-average interest rate was 4.4 percent on the \$72 million outstanding balance, of which \$47 million was provided by one of our subsidiaries and has been eliminated in consolidation.

TPDI Notes—As of March 31, 2009, the TPDI Notes due October 2017 were outstanding in the principal amount of \$221 million, \$111 million of which was due to one of our subsidiaries and has been eliminated in consolidation. The debt bears interest at the adjusted London Interbank Offered Rate ("LIBOR") plus an applicable spread, and the weighted-average interest rate was 3.9 percent at March 31, 2009.

ADDCL Primary Loan Facility—ADDCL has a senior credit agreement for a credit facility comprised of Tranche A, Tranche B and Tranche C for \$215 million, \$270 million and \$399 million, respectively (collectively, the "ADDCL Primary Loan Facility"). Tranche A and Tranche B are provided by external lenders. One of our subsidiaries is the lender for Tranche C and has agreed to provide financial

- 13 -

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

security for borrowings under Tranche A and Tranche B until customer acceptance of *Discoverer Luanda*, the newbuild for which the facility was established. At March 31, 2009, the borrowings under Tranche A and Tranche B were \$153 million and \$186 million, respectively, at a weighted-average interest rate of 1.7 percent. At March 31, 2009, there were no borrowings outstanding under Tranche C.

1.625% Series A, 1.50% Series B and 1.50% Series C Convertible Senior Notes—Holders may convert their notes under certain circumstances at a rate of 5.9310 shares per \$1,000 note, subject to adjustment upon the occurrence of certain events and increase upon the occurrence of certain fundamental changes. Upon conversion, we are required to deliver, in lieu of shares, cash up to the aggregate principal amount of notes to be converted and shares in respect of the remainder, if any, of our conversion obligation in excess of the aggregate principal amount of the notes being converted. The Redomestication Transaction triggered the right of holders to convert the convertible notes at any time beginning on December 3, 2008 and ending on February 3, 2009. During the conversion period, we received conversion notices with respect to \$490,000 principal amount of convertible notes. During the three months ended March 31, 2009, as a result of these conversions, we paid an aggregate amount of \$150,000 and recognized a gain on the retirement of debt of \$247,000.

During the three months ended March 31, 2009, we repurchased an aggregate principal amount of \$111 million of the 1.625% Series A Convertible Senior Notes in open market transactions for an aggregate cash payment of \$102 million. Subject to our adoption of FSP APB 14-1, we recognized a loss of \$2 million and recorded additional paid-in capital of \$6 million. See Note 11—Subsequent Events.

Adoption of FSP APB 14-1—Effective January 1, 2009, we adopted FSP APB 14-1. The incremental effect of our adoption of FSP APB 14-1 on our condensed consolidated statement of operations for the three months ended March 31, 2008 was as follows (in millions, except per share data):

	Three months ended March 31, 2008				
	Prior to adoption	Effect of adoption		As adjusted	
Interest expense, net of amounts capitalized	\$ (137) \$(40)	\$ (177)
Income before income tax expense	1,408	(40)	1,368	
Net income	1,190	(40)	1,150	
Net income attributable to controlling interest	\$ 1,189	\$(40)	\$ 1,149	
Earnings per share					
Basic	\$ 3.75	\$(0.13)	\$ 3.62	
Diluted	\$ 3.71	\$(0.13)	\$ 3.58	

- 14 -

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

The incremental effect of our adoption of FSP APB 14-1 on our condensed consolidated balance sheet as of December 31, 2008 is presented as follows (in millions):

	December 31, 2008 Prior to adoption	Effect of adoption		As adjusted
Property and equipment	\$ 25,802	\$ 34		\$ 25,836
Property and equipment, net	20,827	34		20,861
Other assets	867	(23)	844
Total assets	\$ 35,171	\$ 11		\$35,182
Long-term debt Total long-term liabilities	\$ 13,522 15,943	\$ (629 (629)	\$ 12,893 15,314
Additional paid-in capital	6,492	821		7,313
Retained earnings	6,008	(181)	5,827
Total controlling interest shareholders' equity	16,524	640		17,164
Total equity	16,527	640		17,167
Total liabilities and equity	\$ 35,171	\$ 11		\$35,182

Property and equipment increased \$34 million due to increased capitalization of interest related to our construction in progress, which resulted from the higher effective interest rates on the Convertible Senior Notes following our adoption of FSP APB 14-1.

Debt issue costs, recorded in other assets, decreased \$23 million, representing the cumulative adjustment caused by increased amortization recognized in interest expense for the two years ended December 31, 2008 due to the reduced recognition period required by FSP APB 14-1 and the portion of debt issue costs reclassified to additional paid-in capital. The remaining period over which the discount will be amortized is 1.7 years for the Series A Convertible Senior Notes, 2.7 years for the Series B Convertible Senior Notes and 3.7 years for the Series C Convertible Senior Notes.

The cumulative effect of the change in accounting principles was \$9 million, recorded as an adjustment to retained earnings as of January 1, 2008, from the retrospective increase in interest expense for the year ended December 31, 2007.

The carrying amounts of the liability components of the Convertible Senior Notes were as follows (in millions):

	March 31, 20 Principal amount	009 Unamortize discount	d	Carrying amount	December 3: Principal amount	,	ized	Carrying amount
Carrying amount of liability component								
Series A Convertible Senior Notes due 2037	\$ 2,089	\$ (108)	\$1,981	\$ 2,200	\$ (130)	\$2,070
Series B Convertible Senior Notes due 2037	2,200	(194)	2,006	2,200	(210)	1,990
Series C Convertible Senior Notes due 2037	2,200	(272)	1,928	2,200	(289)	1,911

Upon adoption, we reclassified to additional paid-in capital \$193 million for the Series A Convertible Senior Notes, \$275 million for the Series B Convertible Senior Notes and \$352 million for the Series C Convertible Senior Notes, representing the carrying amounts of the equity components.

As of March 31, 2009, no shares were issuable upon conversion of any series of the Convertible Senior Notes since the conversion price of \$168.61 was greater than \$58.84, the closing sale price of our shares on such date. We have no outstanding derivative transactions associated with the Convertible Senior Notes.

- 15 -

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

Following our adoption of FSP APB 14-1, the effective interest rates were 4.88% for the Series A Convertible Senior Notes, 5.08% for the Series B Convertible Senior Notes, and 5.28% for the Series C Convertible Senior Notes. Interest expense, excluding amortization of debt issue costs, was as follows (in millions):

	Three months ended March 31,		
	2009	2008	
Interest expense			
Series A Convertible Senior Notes due 2037	\$ 25	\$ 23	
Series B Convertible Senior Notes due 2037	25	23	
Series C Convertible Senior Notes due 2037	25	23	

Note 8—Derivative Instruments and Hedging Activities

In January 2009, TPDI entered into interest rate swaps, which are designated as a cash flow hedge, to reduce the variability of cash interest payments associated with the variable rate borrowings under the TPDI Credit Facilities. As of March 31, 2009, the notional value of these swaps was \$478 million, \$239 million of which was attributed to one of our subsidiaries and the related balances for this intercompany portion have been eliminated in consolidation. The notional value increases proportionately with the forecasted borrowings under the TPDI Credit Facilities to a maximum amount of \$892 million, of which \$446 million will be attributable to one of our subsidiaries. Under the interest rate swaps, TPDI receives interest at three-month LIBOR and pays interest at a fixed rate of 2.24 percent over the expected term of the TPDI Credit Facilities. At March 31, 2009, the interest rate swaps represented a liability of less than \$1 million, recorded in other current liabilities on our condensed consolidated balance sheet, with a corresponding increase of less than \$1 million to other comprehensive loss.

In February 2009, we entered into interest rate swaps with an aggregate notional value of \$1 billion, which are designated as a cash flow hedge, to reduce the variability of our cash interest payments on a portion of our outstanding borrowings under the Term Loan. Under the interest rate swaps, we receive interest at one-month LIBOR and pay interest at a fixed rate of 0.768 percent over the six-month period ending August 6, 2009. At March 31, 2009, the interest rate swaps represented a liability of less than \$1 million, recorded in other current liabilities on our condensed consolidated balance sheet, with a corresponding increase of less than \$1 million to other comprehensive loss.

Note 9—Retirement Plans and Other Postemployment Benefits

Defined benefit pension plans—We have several defined benefit pension plans, both funded and unfunded, covering substantially all of our U.S. employees. We also have various defined benefit plans in the U.K., Norway, Nigeria, Egypt and Indonesia that cover our employees in those areas, and we have certain frozen plans assumed in connection with our mergers that cover certain of our current employees and former employees and directors of our predecessors. Net periodic benefit cost for these defined benefit pension plans includes the following components (in millions):

	Three months ended March 31,			
	2009		2008	
Components of net periodic benefit cost (a)				
Service cost	\$ 15		\$ 12	
Interest cost	16		16	
Expected return on plan assets	(16)	(18)
Recognized net actuarial losses	4		_	
Settlements and curtailments	2		_	

Benefit cost	\$ 21	\$ 10
(a) Amounts are before income tax effect.		
We expect to contribute approximately \$71 million to our defined benefit operations. We contributed approximately \$3 million to the defined benefit		
Postretirement benefits other than pensions —We have several unfund benefits ("OPEB") plans covering substantially all of our U.S. employees	•	
- 16 -		

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

cost for the OPEB plans, including service cost, interest cost, amortization of prior service cost and recognized net actuarial losses, were less than \$1 million for each of the three months ended March 31, 2009 and 2008.

We expect to contribute approximately \$3 million to the OPEB plans to cover benefits expected to be paid in 2009, which we intend to fund from cash flow from operations. We contributed less than \$1 million to the OPEB plans during the three months ended March 31, 2009.

Severance plan—Following our merger with GlobalSantaFe in 2007, we established a plan to consolidate operations and administrative functions. As of March 31, 2009, we had identified 267 employees who have been or will be involuntarily terminated pursuant to this plan. We recognized \$6 million and \$2 million of severance expense for the three months ended March 31, 2009 and March 31, 2008, respectively, recognized in either operating and maintenance expense or general and administrative expense. The liability associated with the severance plan, recorded in accrued liabilities, was \$23 million and \$21 million at March 31, 2009 and December 31, 2008, respectively. Through March 31, 2009, we have paid \$39 million in termination benefits under the plan, including \$4 million and \$3 million paid during the three months ended March 31, 2009 and March 31, 2008, respectively. We expect to accrue substantially all of the remaining amounts by the end of the third quarter of 2009.

Note 10—Contingencies

Legal proceedings—In 2004, several of our subsidiaries were named, along with numerous unaffiliated defendants, in 21 complaints that were filed in the Circuit Courts of the State of Mississippi involving approximately 750 plaintiffs that alleged personal injury arising out of asbestos exposure in the course of their employment by some of these defendants between 1965 and 1986. The complaints also named as defendants certain subsidiaries of TODCO and certain subsidiaries of Sedco, Inc. to whom we may owe indemnity. Further, the complaints named other unaffiliated defendant companies, including companies that allegedly manufactured drilling related products containing asbestos. The complaints alleged that the defendants used asbestos-containing products in connection with drilling operations and included allegations of negligence, strict liability, and claims allowed under the Jones Act and general maritime law. The plaintiffs generally sought awards of unspecified compensatory and punitive damages. The Special Master who was appointed to oversee these cases required that each plaintiff file a separate amended complaint for each individual plaintiff and then he dismissed the original 21 complaints. We believe that we may have a direct or indirect interest in 44 of the resulting complaints. We have not been provided with sufficient information in all claims to determine the period of the claimants' exposure to asbestos, their medical condition or, in some cases, the vessels potentially involved in the claims. We historically have maintained broad liability insurance, but we are not certain whether our insurance will cover all liabilities arising out of the 44 claims. We intend to defend these lawsuits vigorously, but there can be no assurance as to their ultimate outcome. We do not expect the liability, if any, resulting from this matter to have a material adverse effect on our consolidated statement of financial position, results of operations or cash flows.

One of our subsidiaries is involved in an action with respect to a customs matter relating to the *Sedco 710* semisubmersible drilling rig. Prior to our merger with Sedco Forex, this drilling rig, which was working for Petrobras in Brazil at the time, had been admitted into the country on a temporary basis under authority granted to a Schlumberger entity. When the drilling contract with Petrobras was transferred from Schlumberger to us in the merger, the temporary import permit was not transferred. When the temporary import permit granted to Schlumberger expired in 2000, renewal filings were not immediately made and the Brazilian customs authorities threatened to cancel the temporary import permit and to collect customs duties as if the rig had been nationalized in Brazil. Together with Schlumberger, we jointly filed an action for the purpose of avoiding cancellation of, and extending, the temporary import permit and to avoid collection of any customs duty. Other proceedings were also initiated to secure the transfer of the temporary import permit to us. The court initially permitted the transfer of the temporary import permit but did not rule on whether the temporary admission could be extended without the payment of a financial penalty in the form of Brazilian customs duties. In 2004, the Brazilian customs authorities issued an assessment totaling approximately \$118 million against our subsidiary based on the expiration of the temporary import permit.

In April 2007, the trial court ruled that the temporary admission granted to Schlumberger and then us had expired. This ruling allowed the Brazilian customs authorities to execute on their assessment. Following this ruling, the Brazilian customs authorities issued a revised assessment against our subsidiary and, as of March 31, 2009, the U.S. dollar equivalent of this assessment was approximately \$190 million in aggregate. In September 2007, we received a temporary ruling in our favor from a Brazilian federal court that the valuation method used by the Brazilian customs authorities was incorrect. This temporary ruling was confirmed in January 2008 by the same Brazilian federal court, but it is

still subject to review at the appellate levels in Brazil. We intend to continue to aggressively contest this valuation and the assessment. We have appealed the trial court's ruling and have also filed for a renewed stay, which has been granted. We expect that either the stay or another order will prevent enforcement of the whole amount in dispute, and it is possible that further judicial or administrative proceedings may result from this matter. While the court has granted us the right to continue our appeal without the posting of a bond, it remains possible that we may be required to post a bond for up to the full amount of the assessment in connection with these proceedings. We have also put Schlumberger on notice that we consider any assessment to be solely the responsibility of Schlumberger, and we have initiated proceedings against Schlumberger seeking a declaratory judgment in this respect. Nevertheless, we expect that the Brazilian customs authorities will continue to seek to recover the assessment solely from us. Schlumberger has denied any responsibility for this matter, but remains a party to the proceedings. We do not expect the liability, if any,

- 17 -

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

resulting from this matter to have a material adverse effect on our consolidated statement of financial position, results of operations or cash flows.

In the third quarter of 2006, we received tax assessments of approximately \$115 million from the state tax authorities of Rio de Janeiro in Brazil against one of our Brazilian subsidiaries for customs taxes on equipment imported into the state in connection with our operations. The assessments resulted from a preliminary finding by these authorities that our subsidiary's record keeping practices were deficient. We currently believe that the substantial majority of these assessments are without merit. We filed an initial response with the Rio de Janeiro tax authorities on September 9, 2006 refuting these additional tax assessments. In September 2007, we received confirmation from the state tax authorities that they believe the additional tax assessments are valid, and as a result, we filed an appeal on September 27, 2007 to the state Taxpayer's Council contesting these assessments. While we cannot predict or provide assurance as to the final outcome of these proceedings, we do not expect it to have a material adverse effect on our consolidated statement of financial position, results of operations or cash flows.

One of our subsidiaries is involved in lawsuits arising out of the subsidiary's involvement in the design, construction and refurbishment of major industrial complexes. The operating assets of the subsidiary were sold and its operations discontinued in 1989, and the subsidiary has no remaining assets other than the insurance policies involved in its litigation, fundings from settlements with the primary insurers and funds received from the cancellation of certain insurance policies. The subsidiary has been named as a defendant, along with numerous other companies, in lawsuits alleging personal injury as a result of exposure to asbestos. As of March 31, 2009, the subsidiary was a defendant in approximately 1,065 lawsuits. Some of these lawsuits include multiple plaintiffs and we estimate that there are approximately 2,821 plaintiffs in these lawsuits. For many of these lawsuits, we have not been provided with sufficient information from the plaintiffs to determine whether all or some of the plaintiffs have claims against the subsidiary, the basis of any such claims, or the nature of their alleged injuries. The first of the asbestos-related lawsuits was filed against this subsidiary in 1990. Through March 31, 2009, the amounts expended to resolve claims (including both attorneys' fees and expenses, and settlement costs) have not been material, and all deductibles with respect to the primary insurance have been satisfied. The subsidiary continues to be named as a defendant in additional lawsuits and we cannot predict the number of additional cases in which it may be named a defendant nor can we predict the potential costs to resolve such additional cases or to resolve the pending cases. However, the subsidiary has in excess of \$1 billion in insurance limits. Although not all of the policies may be fully available due to the insolvency of certain insurers, we believe that the subsidiary will have sufficient insurance and funds from the settlements of litigation with insurance carriers available to respond to these claims. While we cannot predict or provide assurance as to the final outcome of these matters, we do not believe that the current value of the claims where we have been identified will have a material impact on our consolidated statement of financial position, results of operations or cash flows.

We are involved in various tax matters and various regulatory matters. We are involved in lawsuits relating to damage claims arising out of hurricanes Katrina and Rita, all of which are insured and which are not material to us. We are also involved in a number of other lawsuits, including a dispute for municipal tax payments in Brazil and a dispute involving customs procedures in India, neither of which is material to us, and all of which have arisen in the ordinary course of our business. We do not expect the liability, if any, resulting from these other matters to have a material adverse effect on our consolidated statement of financial position, results of operations or cash flows. We cannot predict with certainty the outcome or effect of any of the litigation matters specifically described above or of any such other pending or threatened litigation. There can be no assurance that our beliefs or expectations as to the outcome or effect of any lawsuit or other litigation matter will prove correct and the eventual outcome of these matters could materially differ from management's current estimates.

Environmental matters—We have certain potential liabilities under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and similar state acts regulating cleanup of various hazardous waste disposal sites, including those described below. CERCLA is intended to expedite the remediation of hazardous substances without regard to fault. Potentially responsible parties ("PRPs") for each site include present and former owners and operators of, transporters to and generators of the substances at the site. Liability is strict and can be joint and several

We have been named as a PRP in connection with a site located in Santa Fe Springs, California, known as the Waste Disposal, Inc. site. We and other PRPs have agreed with the U.S. Environmental Protection Agency ("EPA") and the U.S. Department of Justice ("DOJ") to settle our potential liabilities for this site by agreeing to perform the remaining remediation required by the EPA. The form of the agreement is a consent decree, which has been entered by the court. The parties to the settlement have entered into a participation agreement, which makes us liable for

approximately eight percent of the remediation and related costs. The remediation is complete, and we believe our share of the future operation and maintenance costs of the site is not material. There are additional potential liabilities related to the site, but these cannot be quantified, and we have no reason at this time to believe that they will be material.

We have also been named as a PRP in connection with a site in California known as the Casmalia Resources Site. We and other PRPs have entered into an agreement with the EPA and the DOJ to resolve potential liabilities. Under the settlement, we are not likely to owe any substantial additional amounts for this site beyond what we have already paid. There are additional potential liabilities related to this site, but these cannot be quantified at this time, and we have no reason at this time to believe that they will be material.

- 18 -

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

We have been named as one of many PRPs in connection with a site located in Carson, California, formerly maintained by Cal Compact Landfill. On February 15, 2002, we were served with a required 90-day notification that eight California cities, on behalf of themselves and other PRPs, intend to commence an action against us under the Resource Conservation and Recovery Act ("RCRA"). On April 1, 2002, a complaint was filed by the cities against us and others alleging that we have liabilities in connection with the site. However, the complaint has not been served. The site was closed in or around 1965, and we do not have sufficient information to enable us to assess our potential liability, if any, for this site.

One of our subsidiaries has recently been ordered by the California Regional Water Quality Control Board to develop a testing plan for a site known as Campus 1000 Fremont in Alhambra, California. This site was formerly owned and operated by certain of our subsidiaries. It is presently owned by an unrelated party, which has received an order to test the property, the cost of which is expected to be in the range of \$200,000. We have also been advised that one or more of our subsidiaries is likely to be named by the EPA as a PRP for the San Gabriel Valley, Area 3, Superfund site, which includes this property. We have no knowledge at this time of the potential cost of any remediation, who else will be named as PRPs, and whether in fact any of our subsidiaries is a responsible party. The subsidiaries in question do not own any operating assets and have limited ability to respond to any liabilities.

Resolutions of other claims by the EPA, the involved state agency or PRPs are at various stages of investigation. These investigations involve determinations of:

- the actual responsibility attributed to us and the other PRPs at the site;
- § appropriate investigatory and/or remedial actions; and
- δ allocation of the costs of such activities among the PRPs and other site users.

Our ultimate financial responsibility in connection with those sites may depend on many factors, including:

- the volume and nature of material, if any, contributed to the site for which we are responsible;
- the numbers of other PRPs and their financial viability; and
- 8 the remediation methods and technology to be used.

It is difficult to quantify with certainty the potential cost of these environmental matters, particularly in respect of remediation obligations. Nevertheless, based upon the information currently available, we believe that our ultimate liability arising from all environmental matters, including the liability for all other related pending legal proceedings, asserted legal claims and known potential legal claims which are likely to be asserted, is adequately accrued and should not have a material effect on our financial position or ongoing results of operations. Estimated costs of future expenditures for environmental remediation obligations are not discounted to their present value.

Contamination litigation—On July 11, 2005, one of our subsidiaries was served with a lawsuit filed on behalf of three landowners in Louisiana in the 12th Judicial District Court for the Parish of Avoyelles, State of Louisiana. The lawsuit named nineteen other defendants, all of which were alleged to have contaminated the plaintiffs' property with naturally occurring radioactive material, produced water, drilling fluids, chlorides, hydrocarbons, heavy metals and other contaminants as a result of oil and gas exploration activities. Experts retained by the plaintiffs issued a report suggesting significant contamination in the area operated by the subsidiary and another codefendant, and claimed that over \$300 million would be required to properly remediate the contamination. The experts retained by the defendants conducted their own investigation and concluded that the remediation costs would amount to no more than \$2.5 million.

The plaintiffs and the codefendant threatened to add GlobalSantaFe as a defendant in the lawsuit under the "single business enterprise" doctrine contained in Louisiana law. The single business enterprise doctrine is similar to corporate veil piercing doctrines. On August 16, 2006, our subsidiary and its immediate parent company, each of which is an entity that no longer conducts operations or holds assets, filed voluntary petitions for relief under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the District of Delaware. Later that day, the plaintiffs dismissed our subsidiary from the lawsuit. Subsequently, the codefendant filed various motions in the lawsuit and in the Delaware bankruptcies attempting to assert alter ego and single business enterprise claims against GlobalSantaFe and two other subsidiaries in the lawsuit. The efforts to assert alter ego and single business enterprise theory claims against GlobalSantaFe were rejected by the Court in Avoyelles Parish, and the lawsuit against the other defendant went to trial on February 19, 2007. This lawsuit was resolved at trial with a settlement by the

codefendant that included a \$20 million payment and certain cleanup activities to be conducted by the codefendant.

The codefendant sought to dismiss the bankruptcies. In addition, the codefendant filed proofs of claim against both our subsidiary and its parent with regard to its claims arising out of the settlement of the lawsuit. On February 15, 2008, the Bankruptcy Court denied the codefendant's request to dismiss the bankruptcy case but modified the automatic stay to allow the codefendant to proceed on its claims against the debtors, our subsidiary and its parent, and their insurance companies. The codefendant subsequently filed suit against the debtors and certain of its insurers in the Court of Avoyelles Parish to determine their liability for the settlement.

The codefendant filed a Notice of Appeal of the rulings of the Bankruptcy Court. GlobalSantaFe and its two subsidiaries also filed Notices of Appeal to the U.S. District Court for the District of Delaware. On January 27, 2009, the codefendant's appeal was granted

- 19 -

TRANSOCEAN LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

by the District Court and the bankruptcy case was remanded to the Bankruptcy Court with instructions to have the case dismissed. On February 10, 2009, the Bankruptcy Court entered an order dismissing the bankruptcy case. The debtors, GlobalSantaFe and the two subsidiaries have filed Notices of Appeal of the District Court's ruling with the U.S. Court of Appeals for the Third Circuit. On February 18, 2009, the District Court stayed its ruling which instructed the Bankruptcy Court to dismiss the case.

We believe that these legal theories should not be applied against GlobalSantaFe or these other two subsidiaries, and that in any event the manner in which the parent and its subsidiaries conducted their businesses does not meet the requirements of these theories for imposition of liability. Our subsidiary, its parent and GlobalSantaFe intend to continue to vigorously defend against any action taken in an attempt to impose liability against them under the theories discussed above or otherwise and believe they have good and valid defenses thereto. We are unable to determine the value of these claims as of the date of the merger with GlobalSantaFe. We do not believe that these claims will have a material impact on our consolidated statement of financial position, results of operations or cash flows.

Retained risk—Our insurance program is a 12-month policy period beginning May 1, 2008. Under the program, we generally maintain a \$125 million per occurrence deductible on our hull and machinery, which is subject to an aggregate deductible of \$250 million. However, in the event of a total loss or a constructive total loss of a drilling unit, such loss would be subject to a deductible ranging from \$500,000 to \$1.5 million. Additionally, we maintain a \$10 million per occurrence deductible on crew personal injury liability and \$5 million per occurrence deductible on third-party property claims, which together are subject to an aggregate deductible of \$50 million that is applied to any occurrence in excess of the per occurrence deductible until the aggregate deductible is exhausted. We also carry \$950 million of third-party liability coverage exclusive of the personal injury liability deductibles, third-party property liability deductibles and retention amounts described above. We retain the risk for any liability losses in excess of the \$950 million limit. We have elected to self-insure operators extra expense coverage for our subsidiaries ADTI and CMI. This coverage provides protection against expenses related to well control and redrill liability associated with blowouts. Generally, ADTI's clients assume, and indemnify ADTI for, liability associated with blowouts in excess of \$50 million.

At present, the insured value of our drilling rig fleet is approximately \$35 billion in aggregate. We do not generally have commercial market insurance coverage for physical damage losses to our fleet due to hurricanes in the U.S. Gulf of Mexico and war perils worldwide. We do not carry insurance for loss of revenue. In the opinion of management, adequate accruals have been made based on known and estimable losses related to such exposures.

Letters of credit and surety bonds—We had letters of credit outstanding totaling \$629 million and \$751 million at March 31, 2009 and December 31, 2008, respectively. These letters of credit guarantee various contract bidding and performance activities under various committed and uncommitted lines provided by several banks.

As is customary in the contract drilling business, we also have various surety bonds in place that secure customs obligations relating to the importation of our rigs and certain performance and other obligations. Surety bonds outstanding totaled \$38 million and \$37 million at March 31, 2009 and December 31, 2008, respectively.

Note 11—Subsequent Events

Term Loan—In the second quarter of 2009, we repaid \$200 million of borrowings under the Term Loan. As of April 30, 2009, the outstanding borrowings under the Term Loan were \$1.2 billion.

1.625% Series A Convertible Senior Notes—In April 2009, we repurchased \$150 million aggregate principal amount of the 1.625% Series A Convertible Senior Notes in open market transactions for an aggregate cash payment of \$141 million.

Stock warrants—Subsequent to March 31, 2009, we issued 651,570 shares and paid an aggregate of \$13 million cash, net of an aggregate \$18 million exercise price, upon the exercise of 53,220 warrants. No warrants remained outstanding as of the stated expiration date of May 1, 2009.

- 20 -

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Information

The statements included in this quarterly report regarding future financial performance and results of operations and other statements that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements in this quarterly report include, but are not limited to, statements about the following subjects:

- the offshore drilling market, including supply and demand, utilization rates, dayrates, customer drilling programs, commodity prices, stacking of rigs, effects of new rigs on the market and effects of declines in commodity prices and the downturn in the global economy on market outlook for our various geographical operating sectors and classes of rigs,
- § customer contracts, including contract backlog, contract commencements, contract terminations, contract option exercises, contract revenues, contract awards and rig mobilizations,
- § newbuild, upgrade, shipyard and other capital projects, including completion, delivery and commencement of operations dates, expected downtime and lost revenue, the level of expected capital expenditures and the timing and cost of completion of capital projects,
- § liquidity and adequacy of cash flow for our obligations, including our ability and the expected timing to access certain investments in highly liquid instruments,
- § our results of operations and cash flow from operations, including revenues and expenses,
- \S uses of excess cash, including debt retirement and share repurchases under our share repurchase program,
- $\boldsymbol{\xi}$ acquisitions, dispositions and the timing and proceeds of asset or share sales,
- § tax matters, including our effective tax rate, changes in tax laws, treaties and regulations, tax assessments and liabilities for tax issues, including those associated with our activities in Brazil, Norway and the United States ("U.S."),
- § legal and regulatory matters, including results and effects of legal proceedings and governmental audits and assessments, outcome and effects of internal and governmental investigations, customs and environmental matters,
- § insurance matters, including adequacy of insurance, insurance proceeds and cash investments of our wholly owned captive insurance company.
- § the possible benefits, effects or results of the redomestication transaction,
- § debt levels, including impacts of the financial and credit crisis,
- § effects of accounting changes and adoption of accounting policies, and
- § investments in recruitment, retention and personnel development initiatives, pension plan and other postretirement benefit plan contributions, the timing of severance payments and benefit payments.

Forward-looking statements in this quarterly report are identifiable by use of the following words and other similar expressions among others:

§	"anticipates"	§	"may"
§	"believes"	§	"might"
§	"budgets"	§	"plans"
§	"could"	§	"predicts"
§	"estimates"	§	"projects"
§	"expects"	§	"scheduled"
§	"forecasts"	§	"should"
§	"intends"		

Such statements are subject to numerous risks, uncertainties and assumptions, including, but not limited to:

- § those described under "Item 1A. Risk Factors" included herein and in our Annual Report on Form 10-K for the year ended December 31, 2008,
- 8 the adequacy of sources of liquidity,
- δ our inability to obtain contracts for our rigs that do not have contracts,

- the cancellation of contracts currently included in our reported contract backlog,
- \S the effect and results of litigation, tax audits and contingencies, and
- § other factors discussed in this quarterly report and in our other filings with the U.S. Securities and Exchange Commission ("SEC"), which are available free of charge on the SEC's website at<u>www.sec.gov</u>.

Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those indicated.

- 21 -

All subsequent written and oral forward-looking statements attributable to us or to persons acting on our behalf are expressly qualified in their entirety by reference to these risks and uncertainties. You should not place undue reliance on forward-looking statements. Each forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements, except as required by law.

Overview

Transocean Ltd. (together with its subsidiaries and predecessors, unless the context requires otherwise, "Transocean," the "Company," "we," "us" or "our" is a leading international provider of offshore contract drilling services for oil and gas wells. As of April 30, 2009, we owned, had partial ownership interests in or operated 136 mobile offshore drilling units. As of this date, our fleet consisted of 39 High-Specification Floaters (Ultra-Deepwater, Deepwater and Harsh Environment semisubmersibles and drillships), 28 Midwater Floaters, 10 High-Specification Jackups, 55 Standard Jackups and four Other Rigs. In addition, we had 10 Ultra-Deepwater Floaters under construction or contracted for construction.

We believe our mobile offshore drilling fleet is one of the most modern and versatile fleets in the world. Our primary business is to contract these drilling rigs, related equipment and work crews primarily on a dayrate basis to drill oil and gas wells. We specialize in technically demanding segments of the offshore drilling business with a particular focus on deepwater and harsh environment drilling services. We also provide oil and gas drilling management services on either a dayrate basis or a completed-project, fixed-price (or "turnkey") basis, as well as drilling engineering and drilling project management services, and we participate in oil and gas exploration and production activities.

We have established two reportable segments: (1) contract drilling services and (2) other operations. The contract drilling services segment consists of floaters, jackups and other rigs used in support of offshore drilling activities and offshore support services on a worldwide basis. Our fleet operates in a single, global market for the provision of contract drilling services. The location of our rigs and the allocation of resources to build or upgrade rigs are determined by the activities and needs of our customers.

The other operations segment includes drilling management services and oil and gas properties. Drilling management services are provided through Applied Drilling Technology Inc., our wholly owned subsidiary, and through ADT International, a division of one of our U.K. subsidiaries (together, "ADTI"). Oil and gas properties consist of exploration, development and production activities carried out through Challenger Minerals Inc. and Challenger Minerals (North Sea) Limited (together, "CMI"), our oil and gas subsidiaries.

In December 2008, Transocean Ltd. completed a transaction pursuant to an Agreement and Plan of Merger among Transocean Ltd., Transocean Inc., which was our former parent holding company, and Transocean Cayman Ltd., a company organized under the laws of the Cayman Islands that was a wholly owned subsidiary of Transocean Ltd., pursuant to which Transocean Inc. merged by way of schemes of arrangement under Cayman Islands law with Transocean Cayman Ltd., with Transocean Inc. as the surviving company (the "Redomestication Transaction"). In the Redomestication Transaction, Transocean Ltd. issued one of its shares in exchange for each ordinary share of Transocean Inc. In addition, Transocean Ltd. issued 16 million of its shares to Transocean Inc. for future use to satisfy Transocean Ltd.'s obligations to deliver shares in connection with awards granted under our incentive plans, warrants or other rights to acquire shares of Transocean Ltd. The Redomestication Transaction effectively changed the place of incorporation of our parent holding company from the Cayman Islands to Switzerland. As a result of the Redomestication Transaction, Transocean Inc. became a direct, wholly owned subsidiary of Transocean Ltd. In connection with the Redomestication Transaction, we relocated our principal executive offices to Vernier, Switzerland. We refer to the Redomestication Transaction and the relocation of our principal executive offices together as the "Redomestication."

- 22 -

Key measures of our total company results of operations and financial condition are as follows (in millions, except average daily revenue and percentages):

	Three months ended March 31,									
	2009 2008)08			hange				
				(As adjusted)						
Average daily revenue (a)(b)	\$ 256,500		\$	228,400		\$	28,100			
Utilization (b)(c)	91	%		91	%		n/a			
Statement of operations data										
Operating revenues	\$ 3,118		\$	3,110		\$	8

[&]quot;n/a" means not applicable

- (a) Average daily revenue is defined as contract drilling revenue earned per revenue earning day. A revenue earning day is defined as a day for which a rig earns dayrate after commencement of operations.
- (b) Excludes *Joides Resolution*, a drillship engaged in scientific geological coring activities, that is owned by a joint venture in which we have a 50 percent interest and is accounted for under the equity method of accounting.
- (c) Utilization is the total actual number of revenue earning days as a percentage of the total number of calendar days in the period.

Although we are currently experiencing historically high dayrates across our fleet, the downturn in the global economy and the depressed levels of commodity prices have had and are expected to continue to have an adverse effect on our operations. High-specification units continue to attract interest from customers; however, Midwater Floaters and Jackups have experienced diminished demand. We currently have three Midwater Floaters, including one that is held for sale, and nine Jackups that are idle, and we expect to idle more rigs as they come off contracts. See "Item 1A. Risk Factors" in our most recent Annual Report on Form 10-K for a discussion of some of the risks associated with continued depressed levels of commodity prices and an extended worldwide economic downturn.

Over the last few years, a shortage of qualified personnel in our industry caused an increase in compensation costs and suppliers increased prices as their backlogs grew. We expect increasing unemployment, a stronger U.S. dollar and a continued decline in commodity prices to slow the rate of escalation in these costs or cause these costs to decrease over time.

Our revenues for the three months ended March 31, 2009 increased from the prior year period primarily as a result of higher dayrates, partially offset by a decrease in activity. Our operating and maintenance expenses for the same period increased from the prior year period primarily as a result of inflationary cost increases, partially offset by lower labor and rig maintenance costs in connection with such decreased activity (see "—Outlook"). Total debt as of March 31, 2009 decreased compared to December 31, 2008, as a result of repayment of borrowings under the Term Loan during the first quarter of 2009. See "—Liquidity and Capital Resources—Sources and Uses of Liquidity."

Outlook

Drilling market—The decline in commodity prices and the difficult conditions in the credit markets, which are reflective of the global economic crisis, have had a negative impact on our business. As we have only signed a few new contracts during the last several months, our contract backlog has declined to \$35.8 billion at May 5, 2009 compared to \$38.7 billion as of February 3, 2009. Lower commodity prices may lead to decreases in demand across all rig classes in the near term and, as a result, lower dayrates and utilization for our rigs or further idling of rigs in

our fleet. However, we have not seen and do not expect to see as significant an impact on our High-Specification Floater fleet due to the limited availability of rigs in this class during the near term.

- 23 -

We also expect an increase in sublet activity across all rig classes, which could have an adverse impact on the availability of opportunities for our fleet. We expect contracting opportunities for the remainder of 2009 to remain at the current low level unless commodity prices stabilize or improve.

The economic crisis resulted in one of our clients being placed into administration (a form of bankruptcy proceeding in the U.K.), and another was unable to post the required escrow leading us to terminate the contract. A few additional clients are experiencing liquidity issues and may be similarly at risk of being unable to perform their obligations.

As of May 5, 2009, the percentage of contract days in our uncommitted fleet for the remainder of 2009, 2010, 2011 and 2012 is as follows:

Uncommitted fleet percentage	2009		2010		2011		2012	
High-Specification Floaters	3	%	10	%	30	%	47	%
Midwater Floaters	21	%	44	%	79	%	87	%
High-Specification Jackups	30	%	74	%	83	%	99	%
Standard Jackups	33	%	66	%	84	%	97	%

The decline in commodity prices and the downturn in the global economy have contributed to the absence of new High-Specification Floater contracts executed within the last several months and may have a near-term negative effect on dayrates in the High-Specification Floater fleet. The lack of contracting has, in turn, contributed to a decline in our High-Specification Floater contract backlog to \$27.9 billion as of May 5, 2009, from \$29.2 billion as of February 3, 2009. We only have one High-Specification Floater coming off contract in 2009. Any inability to obtain new contracts for these rigs may result in a continued decline in our backlog. While we are seeing more subletting of our High-Specification Floater fleet, we expect the impact to be minimal for 2009, with potentially increasing exposure in 2010 and later years.

Longer term, the deepwater market benefits from the limited supply of deepwater capable rigs available for contract. As of May 5, 2009, we had 47 of our 49 current and future High-Specification Floaters contracted through the end of 2009, with 39, including all of our newbuilds, contracted into or beyond 2011. These 39 units also include 25 of our 28 current and future Ultra-Deepwater Floaters. We believe the continued exploration successes in the deepwater offshore provinces of Brazil, Angola, India and the U.S. Gulf of Mexico will sustain the significant demand for the Ultra-Deepwater Floaters and support our long-term positive outlook for our High-Specification Floater fleet. We are currently in discussions with several clients showing interest in our High-Specification rigs that are coming available in 2009 and 2010.

For our Midwater Floater fleet, which includes 28 semisubmersible rigs, near-term customer demand has declined significantly, resulting in the absence of tendering opportunities and the stacking of three of our midwater floaters, including one that is classified as held for sale. Weakness in several midwater floater markets, including the U.K, coupled with subletting of the existing rigs under contract and cancellations of and delays in customer programs in other Midwater Floater markets, is resulting in the near-term reduction in dayrates and the anticipated stacking of additional rigs in this fleet. The impact of the expected reduction in dayrates and activity on us is partially mitigated by the fact that 61 percent of our Midwater Floater fleet is committed to contracts that extend into 2010.

We continue to experience weakness in the jackup market. Considering the number of jackups that are under construction without customer contracts and the lack of customer demand, we expect dayrates and utilization to continue to decrease in our Jackup fleet. We believe the delivery of the uncontracted units currently under construction will further adversely impact the market for jackups through 2009, and potentially beyond. As of May 5, 2009, we had stacked nine jackups. With 22 of our 65 jackups completing their current contracts in 2009, continued or additional weakening of the Jackup market may result in the stacking of additional rigs.

We expect our total revenues to be lower in 2009 than in 2008. The commencement of new contracts with higher dayrates and the commencement of operations of five of our newbuilds and *Sedco 706* are expected to increase contract drilling revenues, partially offset by the sale of three jackups in 2008, the anticipated sale of *GSF Arctic II* in 2009 and lost revenue associated with idle rigs. Additionally, contract drilling intangible revenues and other revenues are expected to collectively decline by a greater amount than the increase in contract drilling revenue, primarily due to the expected impact of reduced activity and lower commodity prices on our non-drilling operations.

We expect our total operating and maintenance costs in 2009 to decrease compared to 2008 due to lower operating costs associated with a number of jackups and midwater floaters that have been and may be stacked during 2009, exchange rate changes resulting from a stronger U.S. dollar, the anticipated sale of *GSF Arctic II* in 2009 and the sale of three jackups during 2008. In addition, we expect support costs to decline due to various overhead cost-reduction initiatives and decreased non-drilling activity. These reductions in 2009 are expected to be partially offset by an increase in operating and maintenance costs as a result of the commencement of operations of five of our deepwater newbuilds and *Sedco 706* and the expected bareboat charter costs for *GSF Arctic IV* after its anticipated sale in 2009. Our projected operating and maintenance costs for 2009 remain uncertain given current economic and market conditions and could be significantly impacted by the actual level of activity and other factors.

- 24 -

We have eight existing contracts with fixed-price or capped options, and we expect that a number of these options will not be exercised by our customers in 2009 in light of the current market environment. Well-in-progress or similar provisions of our existing contracts may delay the start of higher dayrates in subsequent contracts, and some of the delays have been and could be significant.

Our operations are geographically dispersed in oil and gas exploration and development areas throughout the world. Rigs can be moved from one region to another, but the cost of moving rigs and the availability of rig-moving vessels may cause the supply and demand balance to vary somewhat between regions. Still, significant variations between regions do not tend to persist long-term because of rig mobility. Consequently, we operate in a single, global offshore drilling market.

Insurance matters—We periodically evaluate our hull and machinery and third-party liability insurance limits and self-insured retentions. Effective May 1, 2009, we renewed our hull and machinery and third-party liability insurance coverages with provisions similar to the existing policies. Subject to large self-insured retentions, we carry hull and machinery insurance covering physical damage to the rigs for operational risks worldwide, and we carry liability insurance covering damage to third parties. However, we do not generally have commercial market insurance coverage for physical damage losses, including liability for removal of wreck expenses, to our rigs due to hurricanes in the U.S. Gulf of Mexico and war perils worldwide. Additionally, we do not carry insurance for loss of revenue. Also, for our subsidiaries ADTI and CMI, we generally self-insure operators' extra expense coverage. This coverage provides protection against expenses related to well control and redrill liability associated with blowouts. Generally, ADTI's clients assume, and indemnify ADTI for, liability associated with blowouts in excess of \$50 million. In the opinion of management, adequate accruals have been made based on known and estimated losses related to such exposures.

Tax matters—We are a Swiss corporation, and we operate through our various subsidiaries in a number of countries throughout the world. Our tax provision is based upon the tax laws, regulations and treaties in effect in and between the countries in which our operations are conducted and income is earned. Our effective tax rate for financial reporting purposes will fluctuate from year to year, as our operations are conducted in different taxing jurisdictions. We are subject to changes in tax laws, treaties and regulations in and between the countries in which we operate and earn income. A change in the tax laws, treaties or regulations in any of the countries in which we operate could result in a higher or lower effective tax rate on our worldwide earnings and, as a result, could have a material effect on our financial results.

Our income tax return filings in the major jurisdictions in which we operate worldwide are generally subject to examination for periods ranging from three to six years. We have agreed to extensions beyond the statute of limitations in two jurisdictions for up to 12 years. Tax authorities in certain jurisdictions are examining our tax returns and in some cases have issued assessments. We are defending our tax positions in those jurisdictions. While we cannot predict or provide assurance as to the final outcome of these proceedings, we do not expect the ultimate liability to have a material adverse effect on our consolidated statement of financial position or results of operations although it may have a material adverse effect on our consolidated cash flows.

With respect to our 2004 and 2005 U.S. federal income tax returns, U.S. taxing authorities previously proposed certain adjustments. In 2008, the tax authorities withdrew one of these proposed adjustments, which reduces the proposed assessment to approximately \$79 million, exclusive of interest. One of the remaining adjustments relates to a dispute over the transfer pricing for certain charters of drilling rigs between our subsidiaries. An unfavorable outcome on this assessment with respect to 2004 and 2005 activities would not result in a material adverse effect on our condensed consolidated statement of financial position, results of operations or cash flows. If the authorities were to continue to pursue this position with respect to subsequent years and were successful in such assertion, our effective tax rate on worldwide earnings with respect to years following 2005 could increase substantially, and our earnings and cash flows from operations could be materially and adversely affected. We believe the transfer pricing for these charters is materially correct as filed and intend to defend against such claims vigorously.

The U.S. tax authorities' original assessment also asserted that one of our key subsidiaries maintains a permanent establishment in the U.S. and is, therefore, subject to U.S. taxation on certain earnings effectively connected to such U.S. business. In March 2009, we received verbal indication that this position may be withdrawn by the authorities. We believe the tax treatment asserted in the original assessment with respect to the 2004 or 2005 activity would not result in a material tax liability. If the authorities were to continue to pursue this position with respect to subsequent years and were successful in such assertion, our effective tax rate on worldwide earnings with respect to years following 2005 could increase substantially, and our earnings and cash flows from operations could be materially and adversely affected. We believe our returns are materially correct as filed, and we will continue to vigorously defend against any such claim.

Norwegian civil tax and criminal authorities are investigating various transactions undertaken by our subsidiaries in 2001 and 2002. The authorities issued tax assessments of approximately \$233 million, plus interest, related to certain restructuring transactions, approximately \$62 million, plus interest, related to a 2001 dividend payment, approximately \$4 million, plus interest, related to foreign exchange deductions and approximately \$2 million, plus interest, related to dividend withholding tax. We plan to appeal these tax assessments. We may be required to provide some form of financial security, in an amount up to \$628 million, including interest and penalties, for these assessed amounts as this dispute is appealed and addressed by the Norwegian courts. Furthermore, the authorities have also issued notification of their intent to issue a tax assessment of approximately \$149 million, plus interest, related to the migration of a subsidiary that was previously subject to tax in Norway. The authorities have indicated that they plan to seek penalties of 60 percent on

all matters. We have and will continue to respond to all information requests from the Norwegian authorities. We plan to vigorously contest any assertions by the Norwegian authorities in connection with the various transactions being investigated.

During the three months ended March 31, 2009, our long-term liability for unrecognized tax benefits related to these Norwegian tax issues increased by \$11 million to \$157 million due to the accrual of interest and exchange rate fluctuations. While we cannot predict or provide assurance as to the final outcome of these proceedings, we do not expect the ultimate resolution of these matters to have a material adverse effect on our consolidated statement of financial position or results of operations although it may have a material adverse effect on our consolidated cash flows.

Certain of our Brazilian income tax returns for the years 2000 through 2004 are currently under examination. The Brazil tax authorities have issued tax assessments totaling \$85 million, plus a 75 percent penalty and \$67 million of interest through March 31, 2009. The U.S. dollar amount of the assessments decreased during 2008 due to foreign currency exchange rate fluctuations. We believe our returns are materially correct as filed, and we are vigorously contesting these assessments. We filed a protest letter with the Brazilian tax authorities on January 25, 2008, and we are currently engaged in the appeals process.

See Notes to Condensed Consolidated Financial Statements—Note 4—Income Taxes.

Regulatory matters—In June 2007, GlobalSantaFe Corporation's ("GlobalSantaFe") management retained outside counsel to conduct an internal investigation of its Nigerian and West African operations, focusing on brokers who handled customs matters with respect to its affiliates operating in those jurisdictions and whether those brokers have fully complied with the U.S. Foreign Corrupt Practices Act ("FCPA") and local laws. GlobalSantaFe commenced its investigation following announcements by other oilfield service companies that they were independently investigating the FCPA implications of certain actions taken by third parties in respect of customs matters in connection with their operations in Nigeria, as well as another company's announced settlement implicating a third party handling customs matters in Nigeria. In each case, the customs broker was reported to be Panalpina Inc., which GlobalSantaFe used to obtain temporary import permits for its rigs operating offshore Nigeria. GlobalSantaFe voluntarily disclosed its internal investigation to the U.S. Department of Justice (the "DOJ") and the SEC and, at their request, expanded its investigation to include the activities of its customs brokers in other West African countries and the activities of Panalpina Inc. worldwide. The investigation is focusing on whether the brokers have fully complied with the requirements of their contracts, local laws and the FCPA. In late November 2007, GlobalSantaFe received a subpoena from the SEC for documents related to its investigation. In this connection, the SEC advised GlobalSantaFe that it had issued a formal order of investigation. After the completion of the merger with GlobalSantaFe, outside counsel began formally reporting directly to the audit committee of our board of directors. Our legal representatives are keeping the DOJ and SEC apprised of the scope and details of their investigation and producing relevant information in response to their requests.

On July 25, 2007, our legal representatives met with the DOJ in response to a notice we received requesting such a meeting regarding our engagement of Panalpina Inc. for freight forwarding and other services in the U.S. and abroad. The DOJ informed us that it is conducting an investigation of alleged FCPA violations by oil service companies who used Panalpina Inc. and other brokers in Nigeria and other parts of the world. We developed an investigative plan which has continued to be amended and which would allow us to review and produce relevant and responsive information requested by the DOJ and SEC. The investigation was expanded to include one of our agents for Nigeria. This investigation and the legacy GlobalSantaFe investigation are being conducted by outside counsel who reports directly to the audit committee of our board of directors. The investigation has focused on whether the agent and the customs brokers have fully complied with the terms of their respective agreements, the FCPA and local laws. Our outside counsel has coordinated their efforts with the DOJ and the SEC with respect to the implementation of our investigative plan, including keeping the DOJ and SEC apprised of the scope and details of the investigation and producing relevant information in response to their requests. We cannot predict the ultimate outcome of these investigations, the total costs to be incurred in completing the investigations, the potential impact on personnel, the effect of implementing any further measures that may be necessary to ensure full compliance with applicable laws or to what extent, if at all, we could be subject to fines, sanctions or other penalties.

Our internal compliance program has detected a potential violation of U.S. sanctions regulations in connection with the shipment of goods to our operations in Turkmenistan. Goods bound for our rig in Turkmenistan were shipped through Iran by a freight forwarder. Iran is subject to a number of economic regulations, including sanctions administered by the U.S. Treasury Department's Office of Foreign Assets Control ("OFAC"), and comprehensive restrictions on the export and re-export of U.S.-origin items to Iran. Iran has been designated as a state sponsor of terrorism by the U.S. State Department. Failure to comply with applicable laws and regulations relating to sanctions and export restrictions may subject us to criminal sanctions and civil remedies, including fines, denial of export privileges, injunctions or seizures of our assets. We have self-reported the potential violation to OFAC and retained outside counsel who is conducting an investigation of the matter.

Performance and Other Key Indicators

Contract backlog—The following table presents our contract backlog, including firm commitments only, for our contract drilling services segment as of March 31, 2009, December 31, 2008 and March 31, 2008. Firm commitments are represented by signed drilling contracts or, in some cases, by other definitive agreements awaiting contract execution. Our contract backlog is calculated by multiplying the full contractual operating dayrate by the number of days remaining in the firm contract period, excluding revenues for mobilization,

- 26 -

demobilization and contract preparation or other incentive provisions, which are not expected to be significant to our contract drilling revenues. The amount of actual revenue earned will be different than the amounts shown in the table below due to various factors, including shipyard and maintenance projects, unplanned downtime and other factors that result in lower applicable dayrates than the full contractual operating dayrate, as well as customer liquidity issues and the ability of our customers to terminate contracts under certain circumstances.

	March 31, 2009	December 31, 2008		arch 31, 08			
	(In millions)	(In millions)					
Contract backlog							
High-Specification Floaters (a)	\$ 28,267	\$29,770	\$	21,373

Liquidity and Capital Resources

Sources and Uses of Cash

Our primary sources of cash during the first three months of 2009 were our cash flows from operating activities, proceeds from maturities of short-term investments and borrowings under our credit facilities. Our primary uses of cash were capital expenditures (including for newbuild construction), repayments of borrowings under our credit facilities and repurchases of our convertible senior notes. At March 31, 2009, we had \$1.3 billion in cash and cash equivalents.

	Three months ended March 31,									
	2009	2008	Change							
	(As adjusted)									
Net cash from operating activities	(In millions)									
Net income	\$ 939	\$ 1,150	\$ (211)						
Amortization of drilling contract intangibles	(104)	(224) 120							
Depreciation, depletion and amortization	355	367	(12)						
Impairment loss	221	_	221							
Other non-cash items	80	70	10							
Changes in operating assets and liabilities	(50)	119	(169)						
	\$ 1,441	\$ 1,482	\$ (41)						

Net cash provided by operating activities decreased primarily due to less cash generated from changes in operating assets and liabilities.

	Three months ended March 31,							
	2009		2008		Change			
Net cash from investing activities	(In millions)							
Capital expenditures	\$ (708)	\$ (769)	\$ 61			
Proceeds from disposal of assets, net	8		254		(246)		
Proceeds from distributions from short-term investments	221		_		221			
Joint ventures and other investments, net	_		(3)	3			
	\$ (479)	\$ (518)	\$ 39			

Net cash used in investing activities for the three months ended March 31, 2009 decreased primarily due to cash received from our investments in The Reserve International Liquidity Fund and The Reserve Primary Fund during the first quarter of 2009 of \$216 million and \$5 million, respectively. In addition, capital expenditures primarily for the construction of five of our ten Ultra-Deepwater Floaters decreased during the three months ended March 31, 2009 compared to the same period in 2008. Partially offsetting the decrease in net cash used in investing activities were decreased proceeds from asset sales due to the sale of two rigs during the first quarter of 2008 with no comparable activity in the first quarter of 2009.

We include investments in highly liquid debt instruments with an original maturity of three months or less in cash and cash equivalents. In September 2008, The Reserve announced that certain funds, including The Reserve Primary Fund and The Reserve International Liquidity Fund Ltd., had lost the ability to maintain a net asset value of \$1.00 per share due to losses in connection with the bankruptcy of Lehman Brothers Holdings, Inc. ("Lehman Holdings"). According to public disclosures by The Reserve, The Reserve stopped processing redemption requests in order to develop an orderly plan of liquidation that would protect all of the funds' shareholders. Based on statements made by the funds, we recorded an impairment charge in the third quarter of 2008 in the amount of \$16 million associated with our proportional interest in the debt instruments of Lehman Holdings held by the funds until such time as we receive our liquidated portion of the assets. Through March 31, 2009, we received \$216 million invested in The Reserve International Liquidity Fund and another \$64 million invested in The Reserve Primary Fund. As of March 31, 2009, the carrying values of our investments in The Reserve Primary Fund and The Reserve International Liquidity Fund were \$10 million, respectively. The timing of our ability to access the remaining funds is uncertain but is expected to be during 2009. Potential rulings or decisions by courts or regulators may impact further distributions by the funds.
