August 07, 2015
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-35654

NATIONAL BANK HOLDINGS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware 27-0563799
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)
7800 East Orchard, Suite 300, Greenwood Village, Colorado 80111
(Address of principal executive offices) (Zip Code)
Registrant's telephone, including area code: (720) 529-3336

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "accelerated filer," and "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

As of August 6, 2015, the registrant had outstanding 35,055,362 shares of Class A voting common stock, each with \$0.01 par value per share, excluding 1,037,564 shares of restricted Class A common stock issued but not yet vested. Additionally, the registrant expects to repurchase approximately 4,651,162 shares pursuant to its previously announced self-tender offer that expired on July 31, 2015. Immediately following the repurchase, the registrant

expects to have approximately 30,404,200 shares of Class A common stock outstanding, excluding 1,037,564 shares of restricted Class A common stock issued but not yet vested.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, notwithstanding that such statements are not specifically identified. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as “anticipate,” “believe,” “can,” “would,” “should,” “could,” “may,” “predict,” “seek,” “potential,” “will,” “estimate,” “continue,” “ongoing,” “expect,” “intend” and similar words or phrases. These statements are only predictions and involve estimates, known and unknown risks, assumptions and uncertainties. We have based these statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, liquidity, results of operations, business strategy and growth prospects.

Forward-looking statements involve certain important risks, uncertainties and other factors, any of which could cause actual results to differ materially from those in such statements and, therefore, you are cautioned not to place undue reliance on such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

- our ability to execute our business strategy, as well as changes in our business strategy or development plans;
- business and economic conditions generally and in the financial services industry;
- economic, market, operational, liquidity, credit and interest rate risks associated with our business;
- effects of any changes in trade, monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve Board;
- changes imposed by regulatory agencies to increase our capital to a level greater than the current level required for well-capitalized financial institutions (including the impact of the joint final rules promulgated by the Federal Reserve Board, Office of the Comptroller of the Currency and the FDIC revising certain regulatory capital requirements to align with the Basel III capital standards and meet certain requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act);
- effects of inflation, as well as, interest rate, securities market and monetary supply fluctuations;
- changes in the economy or supply-demand imbalances affecting local real estate values;
- changes in consumer spending, borrowings and savings habits;
- our ability to identify potential candidates for, obtain regulatory approval for, and consummate, acquisitions of financial institutions on attractive terms, or at all;
- our ability to integrate acquisitions and to achieve synergies, operating efficiencies and/or other expected benefits within expected time-frames, or at all, or within expected cost projections, and to preserve the goodwill of acquired financial institutions;
- our ability to successfully convert core operating systems, at the estimated cost, without significant business interruption and to realize the anticipated benefits;
- our ability to achieve organic loan and deposit growth and the composition of such growth;
- changes in sources and uses of funds, including loans, deposits and borrowings;
- increased competition in the financial services industry, nationally, regionally or locally, resulting in, among other things, lower returns;
- the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters;
- the trading price of shares of the Company's stock;
- our ability to realize deferred tax assets or the need for a valuation allowance;
- continued consolidation in the financial services industry;
- our ability to maintain or increase market share and control expenses;
- costs and effects of changes in laws and regulations and of other legal and regulatory developments, including, but not limited to, changes in regulation that affect the fees that we charge, the resolution of legal proceedings or regulatory or other governmental inquiries, and the results of regulatory examinations, reviews or other inquiries;
- technological changes;
-

the timely development and acceptance of new products and services and perceived overall value of these products and services by our clients;

- changes in our management personnel and our continued ability to hire and retain qualified personnel;
- ability to implement and/or improve operational management and other internal risk controls and processes and our reporting system and procedures;
- regulatory limitations on dividends from our bank subsidiary;
- changes in estimates of future loan reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements;

widespread natural and other disasters, dislocations, political instability, acts of war or terrorist activities, cyberattacks or international hostilities through impacts on the economy and financial markets generally or on us or our counterparties specifically;

- impact of reputational risk on such matters as business generation and retention;
- other risks and uncertainties listed from time to time in the Company's reports and documents filed with the Securities and Exchange Commission; and
- our success at managing the risks involved in the foregoing items.

Any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events or circumstances, except as required by applicable law.

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2015

Note 1 Basis of Presentation

National Bank Holdings Corporation ("NBHC" or the "Company") is a bank holding company that was incorporated in the State of Delaware in June 2009 with the intent to acquire and operate financial services franchises and other complementary businesses in targeted markets. The Company is headquartered immediately south of Denver, in Greenwood Village, Colorado, and its primary operations are conducted through its wholly owned subsidiary, NBH Bank, N.A. (the "Bank"). The Company provides a variety of banking products to both commercial and consumer clients through a network of 97 banking centers located in Colorado, the greater Kansas City area and Texas, and through on-line and mobile banking products.

The accompanying interim unaudited consolidated financial statements serve to update the National Bank Holdings Corporation Annual Report on Form 10-K for the year ended December 31, 2014 and include the accounts of the Company and the Bank. The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and where applicable, with general practices in the banking industry or guidelines prescribed by bank regulatory agencies. However, they may not include all information and notes necessary to constitute a complete set of financial statements under GAAP applicable to annual periods and accordingly should be read in conjunction with the financial information contained in the Company's most recent Form 10-K. The unaudited consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the results presented. All such adjustments are of a normal recurring nature. All significant intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications of prior years' amounts are made whenever necessary to conform to current period presentation. The results of operations for the interim period is not necessarily indicative of the results that may be expected for the full year or any other interim period. All amounts are in thousands, except share data, or as otherwise noted.

GAAP requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosures of contingent assets and liabilities. By their nature, estimates are based on judgment and available information. Management has made significant estimates in certain areas, such as the amount and timing of expected cash flows from assets, the valuation of the FDIC indemnification asset and clawback liability, the valuation of other real estate owned ("OREO"), the fair value adjustments on assets acquired and liabilities assumed, the valuation of core deposit intangible assets, the evaluation of investment securities for other-than-temporary impairment ("OTTI"), the valuation of stock-based compensation, the fair values of financial instruments, the allowance for loan losses ("ALL"), and contingent liabilities. Because of the inherent uncertainties associated with any estimation process and future changes in market and economic conditions, it is possible that actual results could differ significantly from those estimates.

The Company's significant accounting policies followed in the preparation of the unaudited consolidated financial statements are disclosed in note 2 of the audited financial statements and notes for the year ended December 31, 2014 and are contained in the Company's Annual Report on Form 10-K. There have not been any significant changes to the application of significant accounting policies since December 31, 2014, with the exception of the following: Income taxes - For the three and six months ended June 30, 2015, the Company has utilized the discrete effective tax rate method, as allowed by Accounting Standards Codification ("ASC") 740-270-30-18, "Income Taxes-Interim Reporting," to calculate its interim income tax provision. The discrete method is applied when the application of the estimated annual effective tax rate is impractical because it is not possible to reliably estimate the annual effective tax rate. The discrete method treats the year to date period as if it was the annual period and determines the income tax expense or benefit on that basis. The Company believes that, at this time, the use of this discrete method is more appropriate than the annual effective tax rate method as the estimated annual effective tax rate method is not reliable due to (1) the levels of tax-exempt income in relation to pre-tax income, (2) the impact of the warrant liability which is non-taxable and (3) the impact and variability of FDIC Indemnification amortization on our pre-tax income.

Edgar Filing: National Bank Holdings Corp - Form 10-Q

The income tax rate for the three and six months ended June 30, 2015 was 106.6% and 154.6%, respectively, based on application of the discrete approach. The quarterly tax rate differs from the federal statutory rate primarily due to interest income from tax-exempt lending, tax-exempt bank-owned life insurance income, non-taxable warrant liability fair value adjustment and the relationship of each of these items to our pre-tax income (loss). Furthermore, we recorded \$1.7 million tax expense related to the write-off of deferred tax assets on certain stock-based compensation awards granted to former executives which expired in the quarter. We are currently in an open IRS examination for the tax year 2012.

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

Note 2 Recent Accounting Pronouncements

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure - In January 2014, the FASB issued Accounting Standards Update ("ASU") 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. This update amends ASC Topic 310-40 and clarifies that an "in substance repossession or foreclosure" has occurred upon the creditor obtaining either legal title to the property upon completion of foreclosure, or the borrower conveying all interest in the property through completion of a deed in lieu of foreclosure. Upon occurrence, the creditor derecognizes the loan receivable and recognizes the collateralized real estate property. The amendments in the ASU became effective for the Company for interim and annual periods beginning after December 15, 2014. Early adoption was permitted. The adoption of this standard did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

Revenue from Contracts with Customers - In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers." This update supersedes revenue recognition requirements in Topic 605, Revenue Recognition, including most industry-specific revenue recognition guidance in the FASB Accounting Standards Codification. The new guidance stipulates that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance provides specific steps that entities should apply in order to achieve this principle. In July 2015, the FASB voted to approve deferring the effective date by one year (i.e., interim and annual reporting periods beginning after December 15, 2017). Early adoption is permitted, but not before the original effective date (i.e., interim and annual reporting periods beginning after December 15, 2016). The Company is in the process of evaluating the impact of the ASU's adoption on the Company's consolidated financial statements.

Note 3 Investment Securities

The Company's investment securities portfolio is comprised of available-for-sale and held-to-maturity investment securities. These investment securities totaled \$1.8 billion at June 30, 2015 and were comprised of \$1.3 billion of available-for-sale securities and \$0.5 billion of held-to-maturity securities. At December 31, 2014, investment securities totaled \$2.0 billion and were comprised of \$1.5 billion of available-for-sale securities and \$0.5 billion of held-to-maturity securities.

Available-for-sale

Available-for-sale investment securities are summarized as follows as of the dates indicated:

| | June 30, 2015 | | | |
|--|-------------------|------------------------------|-------------------------------|---------------|
| | Amortized cost | Gross unrealized gains | Gross unrealized losses | Fair value |
| Mortgage-backed securities ("MBS"): | | | | |
| Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises | \$349,760 | \$8,279 | \$(206) |) \$357,833 |
| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | 971,933 | 6,471 | (19,827) |) 958,577 |
| Other securities | 419 | — | — | 419 |
| Total | \$1,322,112 | \$14,750 | \$(20,033) |) \$1,316,829 |

| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | 1,088,834 | 7,464 | (21,718) | 1,074,580 |
| Other securities | 419 | — | — | 419 |
| Total | \$1,484,497 | \$16,478 | \$(21,761) | \$1,479,214 |

At June 30, 2015 and December 31, 2014, mortgage-backed securities represented primarily all of the Company’s available-for-sale investment portfolio and all mortgage-backed securities were backed by government sponsored enterprises (“GSE”) collateral such as Federal Home Loan Mortgage Corporation (“FHLMC”) and Federal National Mortgage Association (“FNMA”), and the government sponsored agency Government National Mortgage Association (“GNMA”).

The table below summarizes the unrealized losses as of the dates shown, along with the length of the impairment period:

| | June 30, 2015 | | | | | |

| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | 88,854 | (2,053) | 667,368 | (19,665) | 756,222 | (21,718) |

Edgar Filing: National Bank Holdings Corp - Form 10-Q

Total \$88,871 \$(2,053) \$757,117 \$(19,708) \$845,988 \$(21,761)

Management evaluated all of the available-for-sale securities in an unrealized loss position and concluded that no other-than-temporary impairment existed at June 30, 2015 or December 31, 2014. The unrealized losses in the Company's investments issued or guaranteed by U.S. government agencies or sponsored enterprises at June 30, 2015 were caused by changes in interest rates. The portfolio included 57 securities, having an aggregate fair value of \$0.8 billion, which were in an unrealized loss position at June 30, 2015, compared to 62 securities, with a fair value of \$0.8 billion, at December 31, 2014.

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2015

The Company had no intention to sell these securities before recovery of their amortized cost and believes it will not be required to sell the securities before the recovery of their amortized cost.

Certain securities are pledged as collateral for public deposits, securities sold under agreements to repurchase and to secure borrowing capacity at the Federal Reserve Bank, if needed. The fair value of available-for-sale investment securities pledged as collateral totaled \$344.8 million at June 30, 2015 and \$274.4 million December 31, 2014. The increase in pledged available-for-sale investment securities was primarily attributable to an increase in average deposit account balances and client repurchase account balances during the six months ended June 30, 2015. Certain investment securities may also be pledged as collateral for the line of credit at the Federal Home Loan Bank ("FHLB") of Des Moines; however, no investment securities were pledged for this purpose at June 30, 2015 or December 31, 2014.

Mortgage-backed securities do not have a single maturity date and actual maturities may differ from contractual maturities depending on the repayment characteristics and experience of the underlying financial instruments. The estimated weighted average life of the available-for-sale mortgage-backed securities portfolio was 3.7 years as of June 30, 2015 and 3.5 years as of December 31, 2014. This estimate is based on assumptions and actual results may differ. Other securities of \$0.4 million have no stated contractual maturity date as of June 30, 2015.

 June 30, 2015

Held-to-maturity

At June 30, 2015 and December 31, 2014, the Company held \$472.6 million and \$530.6 million of held-to-maturity investment securities, respectively. Held-to-maturity investment securities are summarized as follows as of the dates indicated:

| | June 30, 2015 | | | |
|--|----------------|------------------------|-------------------------|-------------|
| | Amortized cost | Gross unrealized gains | Gross unrealized losses | Fair value |
| Mortgage-backed securities ("MBS"): | | | | |
| Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises | \$374,915 | \$5,287 | \$(148) |) \$380,054 |
| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | 97,690 | 346 | (1,571) |) 96,465 |
| Total investment securities held-to-maturity | \$472,605 | \$5,633 | \$(1,719) |) \$476,519 |

| | December 31, 2014 | | | |
|--|-------------------|------------------------|-------------------------|-------------|
| | Amortized cost | Gross unrealized gains | Gross unrealized losses | Fair value |
| Mortgage-backed securities ("MBS"): | | | | |
| Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises | \$422,622 | \$5,773 | \$(72) |) \$428,323 |
| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | 107,968 | 217 | (1,871) |) 106,314 |
| Total investment securities held-to-maturity | \$530,590 | \$5,990 | \$(1,943) |) \$534,637 |

The table below summarizes the unrealized losses as of the dates shown, along with the length of the impairment period:

| | June 30, 2015 | | | | | |
|--|---------------------|-------------------|-------------------|-------------------|-------------|-------------------|
| | Less than 12 months | | 12 months or more | | Total | |

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

| | December 31, 2014 | | 12 months or more | | Total | |
|--|-------------------|-------------------|-------------------|-------------------|------------|-------------------|
| | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses |
| Mortgage-backed securities ("MBS"): | | | | | | |
| Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises | \$— | \$— | \$35,139 | \$(72) | \$35,139 | \$(72) |
| Other residential MBS issued or guaranteed by U.S. Government agencies or sponsored enterprises | — | — | 75,139 | (1,871) | 75,139 | (1,871) |
| Total | \$— | \$— | \$110,278 | \$(1,943) | \$110,278 | \$(1,943) |

The portfolio included 13 securities, having an aggregate fair value of \$0.1 billion, which were in an unrealized loss position at June 30, 2015, compared to 12 securities, with a fair value of \$0.1 billion, at December 31, 2014.

Management evaluated all of the held-to-maturity securities in an unrealized loss position and concluded that no other-than-temporary impairment existed at June 30, 2015 or December 31, 2014. The unrealized losses in the Company's investments issued or guaranteed by U.S. government agencies or sponsored enterprises at June 30, 2015 were caused by changes in interest rates. The Company had no intention to sell these securities before recovery of their amortized cost and believes it will not be required to sell the securities before the recovery of their amortized cost.

The carrying value of held-to-maturity investment securities pledged as collateral totaled \$92.2 million and \$88.3 million at June 30, 2015 and December 31, 2014, respectively.

Actual maturities of mortgage-backed securities may differ from scheduled maturities depending on the repayment characteristics and experience of the underlying financial instruments. The estimated weighted average expected life of the held-to-maturity mortgage-backed securities portfolio as of June 30, 2015 and December 31, 2014 was 3.7 years and 3.4 years, respectively. This estimate is based on assumptions and actual results may differ.

Note 4 Loans

The loan portfolio is comprised of loans originated by the Company and loans that were acquired in connection with the Company's acquisitions of Bank of Choice and Community Banks of Colorado in 2011, and Hillcrest Bank and Bank Midwest in 2010. The majority of the loans acquired in the Hillcrest Bank and Community Banks of Colorado transactions are covered by loss sharing agreements with the FDIC, and covered loans are presented separately from non-covered loans due to the FDIC loss sharing agreements associated with these loans. Covered loans comprised 7.2% of the total loan portfolio at June 30, 2015, compared to 9.0% of the total loan portfolio at December 31, 2014. The table below shows the loan portfolio composition including carrying value by segment of loans accounted for under ASC Topic 310-30 Receivables—Loans and Debt Securities Acquired with Deteriorated Credit Quality and loans not accounted for under this guidance, which includes our originated loans. The table also shows the amounts covered by the FDIC loss sharing agreements as of June 30, 2015 and December 31, 2014. The carrying value of loans are net of discounts, fees and costs on loans excluded from ASC 310-30 of \$8.3 million and \$10.5 million as of June 30, 2015 and December 31, 2014, respectively:

| Non-covered | 118,769 | 1,849,943 | 1,968,712 | 91.0 | % |
| Total | \$279,645 | \$1,882,764 | \$2,162,409 | 100.0 | % |

Included in commercial loans are \$144.2 million and \$161.8 million of energy-related loans at June 30, 2015 and December 31, 2014, respectively. Energy prices declined significantly during 2014 and prolonged or further pricing pressure could increase stress on energy clients and ultimately the credit quality of this portfolio. However, loans have been structured to mitigate credit loss under a variety of circumstances, including the impact on energy loans as a result of depressed oil prices for a sustained period. Also included in the commercial segment are tax exempt loans totaling \$256.4 million and \$112.6 million at June 30, 2015 and December 31, 2014, respectively.

Loans are considered past due or delinquent when the contractual principal or interest due in accordance with the terms of the loan agreement remains unpaid after the due date of the scheduled payment. Pooled loans accounted for under ASC 310-30 that are 90 days or more past due and still accruing are generally considered to be performing and are included in loans 90 days or more past due and still accruing. Non-accrual loans include troubled debt restructurings on non-accrual status. Total non-accrual loans excluded from the scope of ASC 310-30 totaled \$15.1 million and \$10.8 million at June 30, 2015 and December 31, 2014, respectively. Loan delinquency for all loans is shown in the following tables at June 30, 2015 and December 31, 2014, respectively:

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

The Company's commercial substandard loans excluded from ASC 310-30 totaled \$45.2 million and \$19.3 million at June 30, 2015 and December 31, 2014, respectively. The increase was primarily due to four loan relationships totaling \$28.0 million at June 30, 2015. Three of these substandard loans were energy related and totaled \$21.3 million at June 30, 2015. Credit exposure for all loans as determined by the Company's internal risk rating system was as follows as of June 30, 2015 and December 31, 2014, respectively:

| | Total Loans June 30, 2015 | | | | |

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2015

Impaired Loans

Loans are considered to be impaired when it is probable that the Company will not be able to collect all amounts due in accordance with the contractual terms of the loan agreement. Impaired loans are comprised of loans excluded from ASC 310-30 on non-accrual status, accruing troubled debt restructurings (“TDRs”), loans in the process of bankruptcy, and restructured loans that are in compliance with their modified terms for one year or longer and are current as to principal and interest payments. If a specific allowance is warranted based on the borrower’s overall financial condition, the specific allowance is calculated based on discounted cash flows using the loan’s initial contractual effective interest rate or the fair value of the collateral less selling costs for collateral dependent loans. At June 30, 2015, the Company measured \$10.7 million of impaired loans using discounted cash flows, the loan’s initial contractual effective interest rate and observable market valuations and \$22.3 million of impaired loans based on the fair value of the collateral less selling costs. Impaired loans totaling \$8.2 million, that individually were less than \$250 thousand each, were measured through our general allowance reserves due to their relatively small size.

At June 30, 2015 and December 31, 2014, the Company’s recorded investments in impaired loans were \$41.2 million and \$32.1 million, respectively, of which \$10.9 million and \$11.1 million, respectively, were covered by loss sharing agreements, for the aforementioned periods. The increase in impaired loans during the six months ended June 30, 2015, was primarily due to two relationships totaling \$12.7 million that were deemed impaired during the period. Both of the relationships were in the commercial and industrial segment and were non-covered, one of which totaled \$6.8 million and was current as to principal and interest payments as of June 30, 2015, and the other totaled \$5.9 million and was on non-accrual status at June 30, 2015. Impaired loans had a collective related allowance for loan losses allocated to them of \$0.9 million and \$0.3 million at June 30, 2015 and December 31, 2014, respectively. Additional information regarding impaired loans at June 30, 2015 and December 31, 2014 is set forth in the table below:

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

Troubled debt restructurings

It is the Company's policy to review each prospective credit in order to determine the appropriateness and the adequacy of security or collateral prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with lending laws, the respective loan agreements, and credit monitoring and remediation procedures that may include restructuring a loan to provide a concession by the Company to the borrower from their original terms due to borrower financial difficulties in order to facilitate repayment. Additionally, if a borrower's repayment obligation has been discharged by a court, and that debt has not been reaffirmed by the borrower, regardless of past due status, the loan is considered to be a TDR. At June 30, 2015 and December 31, 2014, the Company had \$15.2 million and \$19.3 million, respectively, of accruing TDRs that had been restructured from the original terms in order to facilitate repayment. Of these, \$1.7 million and \$9.8 million were covered by FDIC loss sharing agreements as of June 30, 2015 and December 31, 2014, respectively. Approximately \$8.8 million of loans reported as TDRs at December 31, 2014 were in compliance with their modified terms at June 30, 2015, and therefore, are no longer reportable as TDRs at June 30, 2015.

Non-accruing TDRs at June 30, 2015 and December 31, 2014 totaled \$5.4 million and \$7.0 million, respectively. Of these, \$1.0 million and \$1.2 million were covered by the FDIC loss sharing agreements as of June 30, 2015 and December 31, 2014, respectively.

During the six months ended June 30, 2015, the Company restructured twelve loans with a recorded investment of \$8.0 million to facilitate repayment. Substantially all of the loan modifications were a reduction of the principal payment, a reduction in interest rate, or an extension of term. Loan modifications to loans accounted for under ASC 310-30 are not considered TDRs. The table below provides additional information related to accruing TDRs at June 30, 2015 and December 31, 2014:

| | Accruing TDRs June 30, 2015 | | | |
|-------------------------|--------------------------------|---|--------------------------------|--|
| | Recorded investment | Average year-to- date recorded investment | Unpaid principal balance | Unfunded commitments to fund TDRs |
| Commercial | \$12,635 | \$12,870 | \$12,765 | \$1,887 |

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

The following table summarizes the Company's carrying value of non-accrual TDRs as of June 30, 2015 and December 31, 2014:

| | Non - Accruing TDRs | | December 31, 2014 | |
|-------------------------|---------------------|-------------|-------------------|-------------|
| | June 30, 2015 | | Covered | Non-covered |
| | Covered | Non-covered | Covered | Non-covered |
| Commercial | \$— | \$3,332 | \$1 | \$3,993 |
| Agriculture | 81 | 154 | 201 | 164 |
| Commercial real estate | 75 | 300 | 94 | 364 |
| Residential real estate | 875 | 567 | 910 | 1,056 |
| Consumer | — | 2 | — | 190 |
| Total | \$1,031 | \$4,355 | \$1,206 | \$5,767 |

Accrual of interest is resumed on loans that were on non-accrual only after the loan has performed sufficiently. The Company had no TDRs that were modified within the past 12 months and had defaulted on their restructured terms during the six months ended June 30, 2015.

During the six months ended June 30, 2014, the Company had four TDRs that had been modified within the past 12 months that defaulted on their restructured terms. The defaulted TDRs consisted of agriculture, residential real estate, and consumer loans totaling \$59 thousand. For purposes of this disclosure, the Company considers "default" to mean 90 days or more past due on principal or interest.

Loans accounted for under ASC Topic 310-30

Loan pools accounted for under ASC Topic 310-30 are periodically remeasured to determine expected future cash flows. In determining the expected cash flows, the timing of cash flows and prepayment assumptions for smaller homogeneous loans are based on statistical models that take into account factors such as the loan interest rate, credit profile of the borrowers, the years in which the loans were originated, and whether the loans are fixed or variable rate loans. Prepayments may be assumed on loans if circumstances specific to that loan warrant a prepayment assumption. The re-measurement of loans accounted for under ASC 310-30 resulted in the following changes in the carrying amount of accretable yield during the six months ended June 30, 2015 and 2014:

| | June 30, 2015 | June 30, 2014 |
|---|------------------|------------------|
| Accretable yield beginning balance | \$113,463 | \$130,624 |
| Reclassification from non-accretable difference | 15,823 | 18,658 |
| Reclassification to non-accretable difference | (1,390) | (909) |
| Accretion | (24,466) | (32,278) |
| Accretable yield ending balance | \$103,430 | \$116,095 |

Below is the composition of the net book value for loans accounted for under ASC 310-30 at June 30, 2015 and December 31, 2014:

| | June 30, 2015 | December 31, 2014 |
|--------------------------------------|------------------|----------------------|
| Contractual cash flows | \$689,116 | \$751,932 |
| Non-accretable difference | (344,391) | (358,824) |
| Accretable yield | (103,430) | (113,463) |
| Loans accounted for under ASC 310-30 | \$241,295 | \$279,645 |

| Total loans | \$686,978 | \$160,140 | \$590,837 | \$617,037 | \$32,839 | \$2,087,831 |

In evaluating the loan portfolio for an appropriate ALL level, non-impaired loans that were not accounted for under ASC 310-30 were grouped into segments based on broad characteristics such as primary use and underlying collateral. Within the segments, the portfolio was further disaggregated into classes of loans with similar attributes and risk characteristics for purposes of applying loss ratios and determining applicable subjective adjustments to the ALL. The application of subjective adjustments was based upon qualitative risk factors, including economic trends and conditions, industry conditions, asset quality, loss trends, lending management, portfolio growth and loan review/internal audit results.

The Company had \$0.5 million net charge-offs of non 310-30 loans during the three months ended June 30, 2015 and \$0.7 million net charge-offs of non 310-30 loans during the six months ended June 30, 2015. Credit quality remained at acceptable levels within the non 310-30 loan portfolio during the three and six months ended June 30, 2015, and management's evaluation resulted in a provision for loan losses on the non 310-30 loans of \$1.9 million and \$3.3 million during the three and six months ended June 30, 2015, respectively.

During the six months ended June 30, 2015, the Company re-estimated the expected cash flows of the loan pools accounted for under ASC 310-30. The re-measurement resulted in net provision of \$8 thousand and \$58 thousand, respectively, for the three and six months ended June 30, 2015. The net provision was comprised primarily of

provision of \$12 thousand and \$144 thousand in the agriculture segment during the three and six months ended June 30, 2015, respectively, and recoupments of \$11 thousand and \$96 thousand in the commercial real estate segment during the three and six months ended June 30, 2015, respectively.

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

The Company charged off \$24 thousand and \$0.3 million, net of recoveries, of non ASC 310-30 loans during the three and six months ended June 30, 2014, respectively. With the exception of a large commercial and industrial loan that was added to non-accrual status during the second quarter of 2014, strong credit quality trends of the non 310-30 loan portfolio continued during the three and six months ended June 30, 2014, and through management's evaluation, resulted in a provision for loan losses on the non 310-30 loans of \$1.8 million and \$3.6 million during the three and six months ended June 30, 2014, respectively.

During the six months ended June 30, 2014, the Company remeasured the expected cash flows of the loan pools accounted for under ASC 310-30 utilizing the same cash flow methodology used at the time of acquisition. The re-measurement resulted in a net recoupment of previous valuations allowances of \$90 thousand and \$144 thousand for the three and six months ended June 30, 2014, respectively, which was comprised of reversals of previous valuation allowances of \$142 thousand and \$226 thousand in the commercial segments, during the three and six months ended June 30, 2014, respectively.

Note 6 FDIC Indemnification Asset

Under the terms of the purchase and assumption agreements with the FDIC with regard to the Hillcrest Bank and Community Banks of Colorado acquisitions, the Company is reimbursed for a portion of the losses incurred on covered assets. Covered assets may be resolved through repayment, short sale of the underlying collateral, the foreclosure on and sale of collateral, or the sale or charge-off of loans or OREO. Any gains or losses realized from the resolution of covered assets reduce or increase, respectively, the amount recoverable from the FDIC. Covered gains or losses that are incurred in excess of the expected reimbursements (which are reflected in the FDIC indemnification asset balance), are recognized in the consolidated statements of operations as FDIC loss sharing income (expense) in the period in which they occur.

Below is a summary of the activity related to the FDIC indemnification asset during the six months ended June 30, 2015 and 2014:

| | For the six months ended | |
|---|--------------------------|------------------|
| | June 30, 2015 | June 30, 2014 |
| Balance at beginning of period | \$39,082 | \$64,447 |
| Amortization | (14,953) | (13,567) |
| FDIC portion of recoveries exceeding fair value marks | (3,409) | (458) |
| Changes for FDIC loss share submissions | 2,495 | 987 |
| Balance at end of period | \$23,215 | \$51,409 |

The \$15.0 million of amortization of the FDIC indemnification asset recognized during the six months ended June 30, 2015 resulted from an overall increase in actual and expected cash flows of the underlying covered assets, resulting in lower expected reimbursements from the FDIC. The increase in overall expected cash flows from these underlying assets is reflected in increased accretion rates on covered loans and is being recognized over the expected remaining lives of the underlying covered loan pools as an adjustment to yield. The claims filed with the FDIC are subject to review and approval, including extensive audits by the FDIC or its assigned agents for compliance with the terms in the loss sharing agreements. During the six months ended June 30, 2015, the Company paid a net \$2.5 million to the FDIC.

During the six months ended June 30, 2014, the Company recognized \$13.6 million of amortization on the FDIC indemnification asset. During the six months ended June 30, 2014, the Company paid \$987 thousand to the FDIC.

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

Note 7 Other Real Estate Owned

A summary of the activity in the OREO balances during the six months ended June 30, 2015 and 2014 is as follows:

| | For the six months ended June 30, | |
|--|-----------------------------------|-----------|
| | 2015 | 2014 |
| Beginning balance | \$29,120 | \$70,125 |
| Transfers from loan portfolio, at fair value | 920 | 1,477 |
| Impairments | (757 |) (880 |
| Sales | (11,019 |) (16,307 |
| Gain on sale of OREO, net | 2,103 | 1,028 |
| Ending balance | \$20,367 | \$55,443 |

Of the \$20.4 million of OREO at June 30, 2015, \$13.4 million, or 65.8%, was covered by loss sharing agreements with the FDIC. At December 31, 2014, \$18.5 million, or 63.4%, of the \$29.1 million of OREO was covered by loss sharing agreements. Any losses on these assets are substantially offset by a corresponding change in the FDIC indemnification asset.

At June 30, 2015 and December 31, 2014, OREO balances excluded \$6.5 million and \$8.1 million, respectively, of the Company's minority interests in OREO which are held by outside banks where the Company was not the lead bank and does not have a controlling interest. The Company maintains a receivable in other assets for these minority interests.

Note 8 Borrowings

As a member of the FHLB of Des Moines, the Bank has access to term financing from the FHLB. These borrowings are secured under an advance, pledge and securities agreement, which includes primarily real estate loans. Total advances at both June 30, 2015 and December 31, 2014 were \$40.0 million. All of the outstanding advances have fixed interest rates and interest expense related to FHLB advances totaled \$166 thousand and \$330 thousand for the three and six months ended June 30, 2015, respectively. More information about FHLB advances at June 30, 2015 is detailed in the table below:

| Maturity Year | June 30, 2015 | Rate | |
|---------------|---------------|------|---|
| 2016 | \$15,000 | 0.84 | % |
| 2018 | \$10,000 | 1.81 | % |
| 2020 | \$15,000 | 2.33 | % |

Note 9 Regulatory Capital

As a bank holding company, the Company is subject to regulatory capital adequacy requirements implemented by the Federal Reserve. In addition, the Office of the Comptroller of the Currency ("OCC") imposes capital adequacy requirements on our subsidiary bank. The federal banking agencies have risk-based capital adequacy regulations intended to provide a measure of capital adequacy that reflects the degree of risk associated with a banking organization's operations. Under these regulations, assets are assigned to one of several risk categories, and nominal dollar amounts of assets and credit equivalent amounts of off-balance-sheet items are multiplied by a risk adjustment percentage for the category.

The law requires federal bank regulatory agencies to take "prompt corrective action" with respect to FDIC-insured depository institutions that do not meet minimum capital requirements. A depository institution's treatment for purposes of the prompt corrective action provisions will depend upon how its capital levels compare to various capital measures and certain other factors, as established by regulation. Under this system, the federal banking regulators have established five capital categories, well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, in which all institutions are placed. The capital adequacy regulations

require banks to maintain a common equity tier 1 capital ratio of 6.5%, a total tier 1 capital ratio of 8.0%, a total capital ratio of 10.0%, and a leverage ratio of 5.0% to be deemed “well capitalized.” Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

regulator must appoint a receiver or conservator for an institution that is critically undercapitalized. Our regulatory capital ratios and those of the Bank are in excess of the levels established for “well-capitalized” institutions.

In connection with the approval of the de novo charter for the Bank, the Company agreed to maintain capital levels of at least 10.0% tier 1 leverage ratio, 11.0% tier 1 risk-based capital ratio and 12.0% total risk-based capital ratio at our subsidiary bank. In March 2015, the Bank received approval from the OCC under the OCC Operating Agreement to permanently reduce the Bank's capital by \$50.0 million. As a result, the Bank distributed \$50.0 million cash to the Company during the first quarter of 2015.

At June 30, 2015 and December 31, 2014, the Bank and the consolidated holding company exceeded all capital ratio requirements under prompt corrective action or other regulatory requirements, as is detailed in the table below:

June 30, 2015

| | Actual | | Required to be considered well capitalized ⁽¹⁾ | | Required to be considered adequately capitalized | |
|--|--------|-------------|---|-------------|--|-------------|
| | Ratio | Amount | Ratio | Amount | Ratio | Amount |

 June 30, 2015

Note 10 FDIC Loss Sharing Income (Expense)

In connection with the loss sharing agreements that the Company has with the FDIC with regard to the Hillcrest Bank and Community Banks of Colorado transactions, the Company recognizes the actual reimbursement of costs of resolution of covered assets from the FDIC through the consolidated statements of operations. The table below provides additional details of the Company's FDIC loss sharing income (expense) during the three and six months ended June 30, 2015 and 2014:

| | For the three months ended | | For the six months ended | |
|--|----------------------------|---------------|--------------------------|---------------|
| | June 30, 2015 | June 30, 2014 | June 30, 2015 | June 30, 2014 |
| Clawback liability amortization | \$ (380) | \$ (336) | \$ (748) | \$ (664) |
| Clawback liability remeasurement | (2) | (538) | (1,109) | (1,054) |
| Reimbursement to FDIC for gain on sale of and income from covered OREO | (315) | (782) | (987) | (1,700) |
| Reimbursement to FDIC for recoveries | (10) | (33) | (18) | (118) |
| FDIC reimbursement of covered asset resolution costs | 1,845 | 1,040 | 3,190 | 1,930 |
| Total | \$ 1,138 | \$ (649) | \$ 328 | \$ (1,606) |

Note 11 Stock-based Compensation and Benefits

The Company provides stock-based compensation in accordance with shareholder-approved plans. During the second quarter of 2014, shareholders approved the 2014 Omnibus Incentive Plan (the "2014 Plan"). The 2014 Plan replaces the NBH Holdings Corp. 2009 Equity Incentive Plan (the "Prior Plan"), pursuant to which the Company granted equity awards prior to the approval of the 2014 Plan. Pursuant to the 2014 Plan, the Compensation Committee of the Board of Directors has the authority to grant, from time to time, awards of options, stock appreciation rights, restricted stock, restricted stock units, performance units, other stock-based awards, or any combination thereof to eligible persons.

As of June 30, 2015, the aggregate number of Class A common stock available for issuance under the 2014 Plan is 5,074,473 shares. Any shares that are subject to stock options or stock appreciation rights under the 2014 Plan will be counted against the amount available for issuance as one share for every one share granted, and any shares that are subject to awards under the 2014 Plan other than stock options or stock appreciation rights will be counted against the amount available for issuance as 3.25 shares for every one share granted. The 2014 Plan provides for recycling of shares from both the Prior Plan and the 2014 Plan, the terms of which are further described in the Company's Proxy Statement for its 2014 Annual Meeting of Shareholders.

To date, the Company has issued stock options and restricted stock under the plans. The Compensation Committee sets the option exercise price at the time of grant but in no case is the exercise price less than the fair market value of a share of stock at the date of grant.

The Company issued stock options and restricted stock in accordance with the plans during the six months ended June 30, 2015. The following table summarizes stock option activity for the six months ended June 30, 2015:

| | Options | Weighted Average Exercise Price | Weighted Average Remaining Contractual Term in Years | Aggregate Intrinsic Value |
|----------------------------------|------------|---------------------------------|--|---------------------------|
| Outstanding at December 31, 2014 | 3,597,111 | \$ 19.90 | 4.46 | \$ 223,211 |
| Granted | 136,903 | 19.09 | | |
| Forfeited | (23,493) | 18.63 | | |
| Surrendered | (130,841) | 19.87 | | |

30

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

Stock option expense is included in salaries and benefits in the consolidated statements of operations and totaled \$0.2 million and \$0.3 million for the three months ended June 30, 2015 and 2014, respectively, and \$0.3 million and \$0.6 million for the six months ended June 30, 2015 and 2014, respectively. At June 30, 2015, there was \$1.0 million of total unrecognized compensation cost related to non-vested stock options granted under the plans. The cost is expected to be recognized over a weighted average period of 2.3 years.

Expense related to non-vested restricted stock totaled \$0.7 million and \$0.6 million during the three months ended June 30, 2015 and 2014, respectively, and \$1.2 million and \$1.0 million during the six months ended June 30, 2015 and 2014, respectively, and is included in salaries and benefits in the consolidated statements of operations. As of June 30, 2015, there was \$3.6 million of total unrecognized compensation cost related to non-vested restricted shares granted under the plans, which is expected to be recognized over a weighted average period of 2.4 years. The following table summarizes restricted stock activity for the six months ended June 30, 2015:

| | Total Restricted Shares | Weighted Average Grant-Date Fair Value |
|-------------------------------|-------------------------------|---|
| Unvested at December 31, 2014 | 955,398 | \$15.16 |
| Vested | (50,720) | 18.80 |
| Granted | 165,658 | 19.13 |
| Forfeited | (8,346) | 18.64 |
| Surrendered | (18,762) | 18.77 |
| Unvested at June 30, 2015 | 1,043,228 | \$15.58 |

Note 12 Warrants

At June 30, 2015 and December 31, 2014, the Company had 830,750 issued and outstanding warrants to purchase Company stock. The warrants were granted to certain lead shareholders of the Company, all with an exercise price of \$20.00 per share. The term of the warrants is for ten years from the date of grant and the expiration dates of the warrants range from October 20, 2019 to September 30, 2020. The fair value of the warrants was estimated to be \$3.4 million and \$3.3 million at June 30, 2015 and December 31, 2014, respectively. The fair value of the warrants was estimated using a Black-Scholes option pricing model utilizing the following assumptions at the indicated dates:

| | June 30, 2015 | December 31, 2014 |
|-------------------------|---------------|-------------------|
| Risk-free interest rate | 1.53 | % 1.67 % |
| Expected volatility | 21.04 | % 24.18 % |
| Expected term (years) | 4-5 | 5-6 |
| Dividend yield | 0.96 | % 1.03 % |

The Company's shares became publicly traded on September 20, 2012, and prior to that had limited private trading. Due to the limited historical volatility of the Company's own stock, expected volatility was calculated using a time-based weighted migration of the Company's own stock price volatility coupled with the median historical volatility, for a period commensurate with the expected term of the warrants, of those of a peer group. The risk-free rate for the expected term of the warrants was based on the U.S. Treasury yield curve and based on the expected term. The expected term was estimated based on the contractual term of the warrants.

The Company recorded an expense of \$0.5 million and \$0.1 million for the three and six months ended June 30, 2015, respectively, and a benefit of \$0.6 million and \$1.5 million for the three and six months ended June 30, 2014, respectively, in the consolidated statements of operations resulting from the change in fair value of the warrant liability.

Note 13 Common Stock

On February 11, 2015, the Board of Directors authorized a new share repurchase program for up to \$50.0 million from time to time in either the open market or through privately negotiated transactions. This new program replaced the previous \$50.0 million share repurchase program approved during the fourth quarter of 2014. During the three and six months ended June 30, 2015, the Company repurchased 1,807,507 and 3,894,673 shares for \$34.7 million and \$72.3 million at a weighted average price of \$19.16 and \$18.55 per share, respectively.

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

The Company had 35,053,339 shares of Class A common stock and zero shares of Class B common stock outstanding as of June 30, 2015, and 38,017,179 shares of Class A common stock and 867,774 shares of Class B common stock outstanding as of December 31, 2014. Additionally, as of June 30, 2015 and December 31, 2014, the Company had 1,043,228 and 955,398 shares, respectively, of restricted Class A common stock issued but not yet vested under the 2014 Plan and the Prior Plan that are not included in shares outstanding until such time that they are vested; however, these shares do have voting and certain dividend rights during the vesting period.

Note 14 Income (Loss) Per Share

The Company calculates income per share under the two-class method, as certain non-vested share awards contain non-forfeitable rights to dividends. As such, these awards are considered securities that participate in the earnings of the Company.

The Company had 35,053,339 and 42,637,687 shares outstanding (inclusive of Class A and B) as of June 30, 2015 and 2014, respectively, exclusive of issued non-vested restricted shares. Certain stock options and non-vested restricted shares are potentially dilutive securities, but are not included in the calculation of diluted earnings per share because to do so would have been anti-dilutive for three and six months ended June 30, 2015.

The following table illustrates the computation of basic and diluted (loss) income per share for the three and six months ended June 30, 2015 and 2014:

| | For the three months ended | | For the six months ended | |
|--|----------------------------|------------------|--------------------------|------------------|
| | June 30, 2015 | June 30, 2014 | June 30, 2015 | June 30, 2014 |
| Net (loss) income | \$(1,341) | \$2,129 | \$(95) | \$3,560 |
| Less: earnings allocated to participating securities | — | (11) | — | (17) |
| (Loss) earnings allocated to common shareholders | \$(1,341) | \$2,118 | \$(95) | \$3,543 |
| Weighted average shares outstanding for basic (loss) earnings per common share | 36,164,617 | 43,868,164 | 37,091,412 | 44,341,276 |
| Dilutive effect of equity awards | — | 12,099 | — | 23,363 |
| Weighted average shares outstanding for diluted earnings per common share | 36,164,617 | 43,880,263 | 37,091,412 | 44,364,639 |
| Basic (loss) earnings per share | \$(0.04) | \$0.05 | \$0.00 | \$0.08 |
| Diluted (loss) earnings per share | \$(0.04) | \$0.05 | \$0.00 | \$0.08 |

The Company had 3,058,821 and 3,616,871 outstanding stock options to purchase common stock at weighted average exercise prices of \$19.86 and \$19.89 per share at June 30, 2015 and 2014, respectively, which have time-vesting criteria, and as such, any dilution is derived only for the time frame in which the vesting criteria had been met and where the inclusion of those stock options is dilutive. Additionally, the Company had 830,750 outstanding warrants to purchase the Company's common stock as of June 30, 2015 and 2014. The warrants have an exercise price of \$20.00, which was out-of-the-money for purposes of dilution calculations during the three and six months ended June 30, 2015. The Company had 1,043,228 and 1,149,014 unvested restricted shares issued as of June 30, 2015 and 2014, respectively, which have performance, market and/or time-vesting criteria, and as such, any dilution is derived only for the time frame in which the vesting criteria had been met and where the inclusion of those restricted shares is dilutive.

In accordance with ASC Topic 260, Earnings Per Share, the dilutive effect of earnings allocated to participating securities, and any potential common shares related to equity awards and warrants are excluded from the calculation of diluted earnings (loss) per share when a loss from continuing operations exists. For the three and six months ended June 30, 2015, the dilutive effect of equity awards totaling 630 shares and 276 shares, respectively, and earnings allocated to participating securities are excluded from diluted loss per share.

Note 15 Derivatives

Risk management objective of using derivatives

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company has established policies that neither carrying value nor fair value at risk should exceed established guidelines. The Company has designed strategies to confine these risks within the established limits and identify appropriate trade-offs in the financial

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

structure of its balance sheet. These strategies include the use of derivative financial instruments to help achieve the desired balance sheet repricing structure while meeting the desired objectives of its clients. Currently the Company employs certain interest rate swaps that are designated as fair value hedges as well as economic hedges. The Company manages a matched book with respect to its derivative instruments in order to minimize its net risk exposure resulting from such transactions.

Fair values of derivative instrument of the balance sheet

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the consolidated statements of financial condition as of June 30, 2015 and December 31, 2014.

Information about the valuation methods used to measure fair value is provided in note 17 of the unaudited consolidated financial statements.

| | Balance Sheet Location | Asset Derivatives Fair Value | | Balance Sheet Location | Liability Derivatives Fair Value | |
|---|------------------------|------------------------------|-------------------|------------------------|----------------------------------|-------------------|
| | | June 30, 2015 | December 31, 2014 | | June 30, 2015 | December 31, 2014 |
| Derivatives designated as hedging instruments | | | | | | |
| Interest rate products | Other assets | \$2,372 | \$ 10 | Other liabilities | \$2,464 | \$ 3,206 |
| Total derivatives designated as hedging instruments | | \$2,372 | \$ 10 | | \$2,464 | \$ 3,206 |
| Derivatives not designated as hedging instruments | | | | | | |
| Interest rate products | Other assets | \$1,414 | \$ 1,418 | Other liabilities | \$1,495 | \$ 1,522 |
| Total derivatives not designated as hedging instruments | | \$1,414 | \$ 1,418 | | \$1,495 | \$ 1,522 |

Fair value hedges of interest rate risk

Interest rate swaps designated as fair value hedges involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without the exchange of the underlying notional amount. As of June 30, 2015, the Company had 23 interest rate swaps with a notional amount of \$199.9 million that were designated as fair value hedges of interest rate risk associated with the Company's fixed-rate loans. The Company had 11 outstanding interest rate swaps with a notional amount of \$68.8 million that were designated as a fair value hedge as of December 31, 2014.

For qualifying derivatives designated as fair value hedges, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in earnings. The Company includes the gain or loss on the hedged items in the same line item as the offsetting loss or gain on the related derivatives. During the three and six months ended June 30, 2015, the Company recognized a net gain of \$405 thousand and \$266 thousand, respectively, in non-interest income related to hedge ineffectiveness. During the three and six months ended June 30, 2014, the Company recognized a net loss of \$67 thousand and \$140 thousand, respectively, in non-interest income related to hedge ineffectiveness.

Non-designated hedges

Derivatives not designated as hedges are not speculative and consist of interest rate swaps with commercial banking clients that facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. As the interest rate swaps associated with this program do not meet

the strict hedge accounting requirements, changes in the fair value of both the client swaps and the offsetting swaps are recognized directly in earnings. As of June 30, 2015, the Company had 13 matched interest rate swap transactions with an aggregate notional amount of \$51.0 million related to this program. As of December 31, 2014, the Company had 11 matched interest rate swap transactions with an aggregate notional amount of \$35.9 million related to this program.

Effect of Derivative Instruments on the Consolidated Statements of Operations

The tables below present the effect of the Company's derivative financial instruments on the unaudited consolidated statements of operations for the three and six months ended June 30, 2015 and 2014:

| Derivatives in fair value hedging relationships | Location of gain (loss) recognized in income on derivatives | Amount of gain or (loss) recognized in income on derivatives | | | |
|---|---|--|---------|-----------------------------------|-----------|
| | | Three months ended June 30, | | For the six months ended June 30, | |
| | | 2015 | 2014 | 2015 | 2014 |
| Interest rate products | Other non-interest income | \$5,256 | \$(721) |) \$3,104 | \$(1,335) |
| Total | | \$5,256 | \$(721) |) \$3,104 | \$(1,335) |

| Derivatives in fair value hedging relationships | Location of gain (loss) recognized in income on derivatives | Amount of gain or (loss) recognized in income on hedged items | | | |
|---|---|---|---------|-----------------------------------|-----------|
| | | Three months ended June 30, | | For the six months ended June 30, | |
| | | 2015 | 2014 | 2015 | 2014 |
| Interest rate products | Other non-interest income | \$(4,851) |) \$655 | \$(2,839) |) \$1,195 |
| Total | | \$(4,851) |) \$655 | \$(2,839) |) \$1,195 |

| Derivatives not designated as hedging instruments | Location of gain (loss) recognized in income on derivatives | Amount of gain or (loss) recognized in income on derivatives | | | |
|---|---|--|--------|-----------------------------------|------|
| | | Three months ended June 30, | | For the six months ended June 30, | |
| | | 2015 | 2014 | 2015 | 2014 |
| Interest rate products | Other non-interest expense | \$65 | \$(37) |) \$26 | (51) |
| Total | | \$65 | \$(37) |) \$26 | (51) |

Credit-risk-related Contingent Features

The Company has agreements with its derivative counterparties that contain a provision where if the Company defaults on any of its indebtedness for reasons other than an error or omission of an administrative or operational nature, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

The Company also has agreements with certain of its derivative counterparties that contain a provision where if the Company fails to maintain its status as a well/adequately capitalized institution, then the counterparty has the right to terminate the derivative positions and the Company would be required to settle its obligations under the agreements. As of June 30, 2015 and December 31, 2014, the termination value of derivatives in a net liability position related to these agreements was \$2.6 million and \$1.9 million, respectively, which includes accrued interest but excludes any adjustment for nonperformance risk. The Company has minimum collateral posting thresholds with certain of its derivative counterparties and as of June 30, 2015 and December 31, 2014, the Company had posted \$3.1 million and \$5.5 million, respectively, in eligible collateral.

Note 16 Commitments and Contingencies

In the normal course of business, the Company enters into various off-balance sheet commitments to help meet the financing needs of clients. These financial instruments include commitments to extend credit, commercial and consumer lines of credit

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

and standby letters of credit. The same credit policies are applied to these commitments as the loans on the consolidated statements of financial condition; however, these commitments involve varying degrees of credit risk in excess of the amount recognized in the consolidated statements of financial condition. At June 30, 2015 and December 31, 2014, the Company had loan commitments totaling \$463.2 million and \$485.5 million, respectively, and standby letters of credit that totaled \$9.4 million and \$10.0 million, respectively. The total amounts of unused commitments do not necessarily represent future credit exposure or cash requirements, as commitments often expire without being drawn upon. However, the contractual amount of these commitments, offset by any additional collateral pledged, represents the Company's potential credit loss exposure. Amounts funded under non-cancelable commitments in effect at the date of acquisition are covered under the applicable loss sharing agreements if certain conditions are met.

Total unfunded commitments at June 30, 2015 and December 31, 2014 were as follows:

| | June 30, 2015 | | | December 31, 2014 | | |
|--|---------------|-------------|-----------|-------------------|-------------|-----------|
| | Covered | Non-covered | Total | Covered | Non-covered | Total |
| Commitments to fund loans | | | | | | |
| Residential | \$— | \$ 1,748 | \$ 1,748 | \$— | \$ 1,683 | \$ 1,683 |

Commitments to fund loans—Commitments to fund loans are legally binding agreements to lend to clients in accordance with predetermined contractual provisions providing there have been no violations of any conditions specified in the contract. These commitments are generally at variable interest rates and are for specific periods or contain termination clauses and may require the payment of a fee. The total amounts of unused commitments are not necessarily representative of future credit exposure or cash requirements, as commitments often expire without being drawn upon. Credit card lines of credit—The Company extends lines of credit to clients through the use of credit cards issued by the Bank. These lines of credit represent the maximum amounts allowed to be funded, many of which will not exhaust the established limits, and as such, these amounts are not necessarily representations of future cash requirements or credit exposure.

Unfunded commitments under lines of credit—In the ordinary course of business, the Company extends revolving credit to its clients. These arrangements may require the payment of a fee.

Commercial and standby letters of credit—As a provider of financial services, the Company routinely issues commercial and standby letters of credit, which may be financial standby letters of credit or performance standby letters of credit. These are various forms of “back-up” commitments to guarantee the performance of a client to a third party. While these arrangements represent a potential cash outlay for the Company, the majority of these letters of credit will expire without being drawn upon. Letters of credit are subject to the same underwriting and credit approval process as traditional loans, and as such, many of them have various forms of collateral securing the commitment, which may include real estate, personal property, receivables or marketable securities.

Contingencies

In the ordinary course of business, the Company and the Bank may be subject to litigation. Based upon the available information and advice from the Company's legal counsel, management does not believe that any potential, threatened or pending litigation to which it is a party will have a material adverse effect on the Company's liquidity, financial condition or results of operations.

 June 30, 2015

Note 17 Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to disclose the fair value of its financial instruments. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. For disclosure purposes, the Company groups its financial and non-financial assets and liabilities into three different levels based on the nature of the instrument and the availability and reliability of the information that is used to determine fair value. The three levels are defined as follows:

• Level 1—Includes assets or liabilities in which the inputs to the valuation methodologies are based on unadjusted quoted prices in active markets for identical assets or liabilities.

• Level 2—Includes assets or liabilities in which the inputs to the valuation methodologies are based on similar assets or liabilities in inactive markets, quoted prices for identical or similar assets or liabilities in inactive markets, and inputs other than quoted prices that are observable, such as interest rates, yield curves, volatilities, prepayment speeds, and other inputs obtained from observable market input.

Level 3—Includes assets or liabilities in which the inputs to the valuation methodology are based on at least one significant assumption that is not observable in the marketplace. These valuations may rely on management's judgment and may include internally-developed model-based valuation techniques.

Level 1 inputs are considered to be the most transparent and reliable and level 3 inputs are considered to be the least transparent and reliable. The Company assumes the use of the principal market to conduct a transaction of each particular asset or liability being measured and then considers the assumptions that market participants would use when pricing the asset or liability. Whenever possible, the Company first looks for quoted prices for identical assets or liabilities in active markets (level 1 inputs) to value each asset or liability. However, when inputs from identical assets or liabilities on active markets are not available, the Company utilizes market observable data for similar assets and liabilities. The Company maximizes the use of observable inputs and limits the use of unobservable inputs to occasions when observable inputs are not available. The need to use unobservable inputs generally results from the lack of market liquidity of the actual financial instrument or of the underlying collateral. Although, in some instances, third party price indications may be available, limited trading activity can challenge the observability of these quotations.

Changes in the valuation inputs used for measuring the fair value of financial instruments may occur due to changes in current market conditions or other factors. Such changes may necessitate a transfer of the financial instruments to another level in the hierarchy based on the new inputs used. The Company recognizes these transfers at the end of the reporting period that the transfer occurs. During the six months ended June 30, 2015 and 2014, there were no transfers of financial instruments between the hierarchy levels.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of each instrument under the valuation hierarchy:

Fair Value of Financial Instruments Measured on a Recurring Basis

Investment securities available-for-sale—Investment securities available-for-sale are carried at fair value on a recurring basis. To the extent possible, observable quoted prices in an active market are used to determine fair value and, as such, these securities are classified as level 1. At June 30, 2015 and December 31, 2014, the Company did not hold any level 1 securities. When quoted market prices in active markets for identical assets or liabilities are not available, quoted prices of securities with similar characteristics, discounted cash flows or other pricing characteristics are used to estimate fair values and the securities are then classified as level 2. At June 30, 2015 and December 31, 2014, the Company's level 2 securities included mortgage-backed securities comprised of residential mortgage pass-through securities, and other residential mortgage-backed securities. All other investment securities are classified as level 3.

Derivatives—The Company's derivative instruments are limited to interest rate swaps that may be accounted for as fair value hedges or non-designated hedges. The fair values of the swaps incorporate credit valuation adjustments in order

to appropriately reflect nonperformance risk in the fair value measurements. The credit valuation adjustment is the dollar amount of the fair value adjustment related to credit risk and utilizes a probability weighted calculation to quantify the potential loss over the life of the trade. The credit valuation adjustments are calculated by determining the total expected exposure of the derivatives (which incorporates both the current and potential future exposure) and then applying the respective counterparties' credit spreads to the exposure offset by marketable collateral posted, if any. Certain derivative transactions are executed with counterparties who are large financial institutions ("dealers"). International Swaps and Derivative Association Master Agreements ("ISDA") and Credit Support Annexes ("CSA") are employed for all contracts with dealers. These contracts contain bilateral collateral arrangements. The fair value inputs of these financial instruments are determined using discounted

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

cash flow analysis through the use of third-party models whose significant inputs are readily observable market parameters, primarily yield curves, with appropriate adjustments for liquidity and credit risk, and are classified as level 2.

Warrant liability—The Company measures the fair value of the warrant liability on a recurring basis using a Black-Scholes option pricing model. The Company’s shares became publicly traded on September 20, 2012 and prior to that, had limited private trading; therefore, expected volatility was estimated using a time-based weighted migration of the Company’s own stock price volatility coupled with the median historical volatility, for a period commensurate with the expected term of the warrants, of those eight comparable companies with publicly traded shares, and is deemed a significant unobservable input to the valuation model, as such these instruments are classified as level 3.

Clawback liability—The Company periodically measures the net present value of expected future cash payments to the FDIC that must be made within 45 days of the conclusion of the loss sharing. The expected cash flows are calculated in accordance with the loss sharing agreements and are based primarily on the expected losses on the covered assets, which involve significant inputs that are not market observable, as such these instruments are classified as level 3.

The tables below present the financial instruments measured at fair value on a recurring basis as of June 30, 2015 and December 31, 2014 on the consolidated statements of financial condition utilizing the hierarchy structure described above:

| | June 30, 2015 | | | |

| Amortization | — | 1,109 |
| Net change in level 3 | 118 | 1,857 |
| Balance at June 30, 2015 | \$3,446 | \$38,195 |

Fair Value Measured on a Non-recurring Basis

Certain assets may be recorded at fair value on a non-recurring basis as conditions warrant. These non-recurring fair value measurements typically result from the application of lower of cost or fair value accounting or a write-down occurring during the period.

The Company records collateral dependent loans that are considered to be impaired at their estimated fair value. A loan is considered impaired when it is probable that the Company will be unable to collect all contractual amounts due in accordance with the terms of the loan agreement. Collateral dependent impaired loans are measured based on the fair value of the collateral. The Company relies on third-party appraisals and internal assessments in determining the estimated fair values of these loans. The inputs used to determine the fair values of loans are considered level 3 inputs in the fair value hierarchy. During the six months ended June 30, 2015, the Company measured six loans not accounted for under ASC 310-30 at fair value on a non-recurring basis. These loans carried specific reserves totaling \$0.9 million at June 30, 2015. During the six months ended June 30, 2015, the Company added specific reserves of \$0.7 million for three loans with carrying balances of \$1.8 million at June 30, 2015. The Company also decreased

specific reserves of \$0.1 million for three loans during the six months ended June 30, 2015, primarily due to updated appraisals.

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 June 30, 2015

The Company may be required to record fair value adjustments on loans held-for-sale on a non-recurring basis. The non-recurring fair value adjustments could involve lower of cost or fair value accounting and may include write-downs.

OREO is recorded at fair value of the collateral less estimated selling costs. The estimated fair values of OREO are updated periodically and further valuation adjustments may be taken to reflect a new basis. The Company recognized \$0.8 million of OREO impairments in its unaudited consolidated statements of operations during the six months ended June 30, 2015, of which \$0.5 million, or 65.5%, were on OREO that was covered by loss sharing agreements with the FDIC. During the six months ended June 30, 2014, the Company recognized \$0.9 million of OREO impairments in its unaudited consolidated statements of operations, of which \$0.6 million, or 65.1%, were on OREO that was covered by loss sharing agreements with the FDIC. The fair values of OREO are derived from third party price opinions or appraisals that generally use an income approach or a market value approach. If reasonable comparable appraisals are not available, then the Company may use internally developed models to determine fair values. The inputs used to determine the fair values of OREO are considered level 3 inputs in the fair value hierarchy.

Premise and equipment held-for-sale are written down to estimated fair value less costs to sell in the period in which the held-for-sale criteria are met. Fair value is estimated in a process which considers current local commercial real estate market conditions and the judgment of the sales agent and often involves obtaining third party appraisals from certified real estate appraisers. These fair value measurements are classified as Level 3. Unobservable inputs to these measurements, which include estimates and judgments often used in conjunction with appraisals, are not readily quantifiable. The Company recognized \$1.1 million of impairments in its unaudited consolidated statements of operations related to banking centers classified as held-for-sale during the six months ended June 30, 2015.

The table below provides information regarding the assets recorded at fair value on a non-recurring basis during the six months ended June 30, 2015 and 2014:

| | June 30, 2015 | |
|-------------------------|---------------|--------------------------------|
| | Total | Losses from fair value changes |
| Other real estate owned | \$20,367 | \$757 |
| Impaired loans | 41,241 | 110 |
| Premise and equipment | 813 | 1,089 |
| | June 30, 2014 | |
| | Total | Losses from fair value changes |
| Other real estate owned | \$55,443 | \$880 |
| Impaired loans | 48,352 | 1,242 |
| Premise and equipment | — | — |

The Company did not record any liabilities for which the fair value was made on a non-recurring basis during the six months ended June 30, 2015.

The following table provides information about the valuation techniques and unobservable inputs used in the valuation of financial instruments falling within level 3 of the fair value hierarchy as of June 30, 2015. The table below excludes non-recurring fair value measurements of collateral value used for impairment measures for OREO and premise and equipment held-for-sale. These valuations utilize third party appraisal or broker price opinions, and are classified as level 3 due to the significant judgment involved:

Note 18 Fair Value of Financial Instruments

The fair value of a financial instrument is the amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is determined based upon quoted market prices to the extent possible; however, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques that may be significantly impacted by the assumptions used, including the discount rate and estimates of future cash flows. Changes in any of these assumptions could significantly affect the fair value estimates. The fair value of the financial instruments listed below does not reflect a premium or discount that could result from offering all of the Company's holdings of financial instruments at one time, nor does it reflect the underlying value of the Company, as ASC Topic 825 excludes certain financial instruments and all non-financial instruments from its disclosure requirements. In connection with the Hillcrest Bank, Bank Midwest, Bank of Choice and Community Banks of Colorado acquisitions, the Company recorded all of the acquired assets and assumed liabilities at fair value at the respective dates of acquisition. The fair value of financial instruments at June 30, 2015 and December 31, 2014, including methods and assumptions utilized for determining fair value of financial instruments, are set forth below:

Cash and cash equivalents

Cash and cash equivalents have a short-term nature and the estimated fair value is equal to the carrying value.

Securities purchased under agreements to resell

The fair value of securities purchased under agreements to resell is estimated by discounting contractual maturities utilizing current market rates for similar instruments.

41

Table of contents

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2015

Investment securities

The estimated fair value of investment securities is based on quoted market prices or bid quotations received from securities dealers. Other investment securities, including securities that are held for regulatory purposes are carried at cost, less any other- than-temporary impairment.

Loans receivable

The estimated fair value of the loan portfolio is estimated using a discounted cash flow analysis using a discount rate based on interest rates offered at the respective measurement dates for loans with similar terms to borrowers of similar credit quality. The allowance for loan losses is considered a reasonable estimate of any required adjustment to fair value to reflect the impact of credit risk. The estimates of fair value do not incorporate the exit-price concept prescribed by ASC Topic 820 Fair Value Measurements and Disclosures.

Loans held-for-sale

Loans held-for-sale are carried at the lower of aggregate cost or estimated fair value. The portfolio consists primarily of fixed rate residential mortgage loans that are sold within 45 days. The estimated fair value is based on quoted market prices for similar loans in the secondary market and is classified as level 2.

Accrued interest receivable

Accrued interest receivable has a short-term nature and the estimated fair value is equal to the carrying value.

Deposits

The estimated fair value of deposits with no stated maturity, such as non-interest bearing demand deposits, savings, NOW accounts, and money market accounts, is equal to the amount payable on demand. The fair value of interest-bearing time deposits is based on the discounted value of contractual cash flows of such deposits, taking into account the option for early withdrawal. The discount rate is estimated using the current market rates offered by the Company, at the respective measurement dates, for deposits of similar remaining maturities.

Derivative assets and liabilities

Fair values for derivative assets and liabilities are fully described in note 17 of the unaudited consolidated financial statements.

Securities sold under agreements to repurchase

The vast majority of the Company's repurchase agreements are overnight transactions that mature the day after the transaction, and as a result of this short-term nature, the estimated fair value is equal to the carrying value.

Due to FDIC

The amount due to FDIC is specified in the purchase agreements and, as it relates to the clawback liability, is discounted to reflect the uncertainty in the timing and payment of the amount due by the Company.

Warrant liability

The warrant liability is estimated using a Black-Scholes model, the assumptions of which are detailed in note 12 of the unaudited consolidated financial statements.

Accrued interest payable

Accrued interest payable has a short-term nature and the estimated fair value is equal to the carrying value.

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2015

Note 19 Subsequent Events

On July 6, 2015 the Company announced an offer to purchase for cash up to \$100.0 million of shares of its issued and outstanding Class A common stock at a price not less than \$19.60 and not more than \$22.50 per share, less any applicable withholding taxes and without interest, upon the terms and subject to the conditions set forth in the offer. The tender offer expired on July 31, 2015. The Company expects to accept the purchase of approximately 4,651,162 shares at a price of \$21.50, for a total price of \$100.0 million, excluding fees and expenses. Immediately following the settlement of the tender offer, the Company expects to have approximately 30,404,200 shares of Class A common stock outstanding, excluding 1,037,564 shares of Class A common stock issued but not yet vested.

During the second quarter of 2015, the Company approved plans to consolidate three banking centers located in the greater Kansas City market into nearby banking centers, effective September 30, 2015. Included in the three and six months ended June 30, 2015 operating results are \$1.1 million of expenses incurred in connection with the consolidations related to fair market value adjustments of banking centers held-for-sale as of June 30, 2015.

On August 1, 2015, the Company completed its previously announced acquisition of Pine River Bank Corporation for \$9.5 million cash, based on tangible book value at closing, adjusted for certain items. At acquisition date, Pine River Bank Corporation held assets of \$140.3 million; loans of \$65.2 million; deposits of \$130.2 million; and capital of \$8.9 million.

In June 2015, NBH Bank, N.A. received approval from the OCC under the OCC Operating Agreement to permanently reduce the Bank's capital by \$36.0 million. As a result, the Bank distributed \$36.0 million cash to the Company in July 2015, which decreased the Bank's tier 1 leverage ratio to 10.5%.

Item 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following management's discussion and analysis of our financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements and related notes as of and for the three and six months ended June 30, 2015, and with our annual report on Form 10-K (file number 001-35654), which includes our audited consolidated financial statements and related notes as of and for the years ended December 31, 2014, 2013, and 2012. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions that may cause actual results to differ materially from management's expectations. Factors that could cause such differences are discussed in the section entitled "Cautionary Note Regarding Forward-Looking Statements" located elsewhere in this quarterly report and in Item 1A "Risk Factors" in the annual report on Form 10-K, referenced above, and should be read herewith. All amounts are in thousands, except share data, or as otherwise noted.

Overview

National Bank Holdings Corporation is a bank holding company formed in 2009. Through our subsidiary, NBH Bank, N.A., we provide a variety of banking products to both commercial and consumer clients through a network of 101 banking centers, located in Colorado, the greater Kansas City area and Texas, and through on-line and mobile banking products. We operate under the following brand names: Community Banks of Colorado in Colorado, Bank Midwest in Kansas and Missouri, and Hillcrest Bank in Texas.

In just less than five years, we have completed the acquisition and integration of four problem or failed banks, three of which were FDIC-assisted. We have transformed these four banks into one collective banking operation with steadily increasing organic growth, prudent underwriting, and meaningful market share with continued opportunity for expansion. Our long-term business model utilizes our organic development infrastructure, low-risk balance sheet,

continuous operational development and a disciplined acquisition strategy to create value and provide opportunities for growth.

As of June 30, 2015, we had \$4.8 billion in assets, \$2.3 billion in loans, \$3.8 billion in deposits and \$0.7 billion in equity. We believe that our established presence positions us well for growth opportunities in our current and complementary markets. Our focus is on building strong banking relationships with small to mid-sized businesses and consumers, while maintaining a low risk profile designed to generate reliable income streams and attractive returns. Through our acquisitions, we have established a solid financial services franchise with a sizable presence for deposit gathering and client relationship building necessary for growth.

Operating Highlights and Key Challenges

Our operations resulted in the following highlights as of and for the six months ended June 30, 2015 (except as noted):

Loan portfolio

Grew the loan portfolio by \$166.1 million, representing a 15.5% annualized growth.

Organic loan originations totaled \$475.1 million.

We had \$2.2 billion of loans outstanding that are associated with a “strategic” client relationship, representing 21.7% annualized growth.

Successfully exited \$45.3 million, or 45.3% annualized, of the non-strategic loan portfolio.

Credit quality

Non 310-30 loans

Credit quality remained strong, as 90 days past due and non-accruing loans were 0.72% of total non 310-30 loans.

Net charge-offs on average non 310-30 loans remained low at 0.06% annualized.

Loss share coverage of 7.6% on non-performing non ASC 310-30 loans.

ASC 310-30 loans

Added a net \$14.4 million to accretable yield for the acquired loans accounted for under ASC 310-30.

310-30 loans represented 10.4% of total loans at June 30, 2015, compared to 12.9% at December 31, 2014.

Client deposit funded balance sheet

- Average transaction deposits and client repurchase agreements increased \$212.1 million for the six months ended June 30, 2015 compared to the six months ended June 30, 2014, or 8.5%.

Transaction account balances improved to 66.3% of total deposits as of June 30, 2015 from 64.0% at December 31, 2014. Driven by a \$85.8 million increase in savings and demand deposits.

As of June 30, 2015, total deposits and client repurchase agreements made up 97.3% of our total liabilities.

Revenues and expenses

The average annual yield on our loan portfolio was 5.95% for the six months ended June 30, 2015 compared to 6.85% for the six months ended June 30, 2014, driven by the increasing originated loan balances at current market rates, coupled with declining balances of higher-yielding purchased loans.

Banking related non-interest income totaled \$16.1 million during the six months ended, June 30, 2015, an increase of \$1.6 million from the six months ended, June 30, 2014. The increase was attributable to a \$0.3 million increase in bank card fee activity, a \$0.4 million favorable fair value adjustment on interest rate swaps related to fixed-rate term loans, a \$0.5 million increase in the gain on sale of mortgages, and a \$0.8 million increase in the value of the bank-owned life insurance asset.

Non-interest income for the six months ended June 30, 2015 totaled \$2.3 million compared to \$1.8 million for the same period in 2014, an increase of \$0.5 million. The increase was due to \$1.9 million of FDIC loss-sharing income, which was partially offset by a \$1.4 million increase in FDIC indemnification asset amortization.

- Net interest margin narrowed to 3.56% on a fully taxable equivalent basis during the six months ended June 30, 2015, from 3.89% during the six months ended June 30, 2014, due to the continued resolution of the higher-yielding acquired loan portfolio and higher levels of short-term investments that were driven by an increase in client repurchase agreements.

Our non-GAAP measure of operating expenses (which exclude OREO expenses, problem loan expense, the impact from the change in the warrant liability, data processing conversion-related expenses, and banking center closure expense accruals) totaled \$73.8 million and decreased \$1.7 million, or 2.3%, from the six months ended June 30, 2014.

Problem loan/OREO workout expenses totaled \$1.5 million for the six months ended June 30, 2015, decreasing \$3.3 million, or 68.6%, from the same period in 2014. The decrease was driven by a \$2.0 million decline in OREO expenses and a \$1.1 million increase in net gains on sales of OREO.

Strong capital position

Capital ratios are strong as capital position remains well in excess of federal bank regulatory thresholds. As of June 30, 2015, our consolidated tier 1 leverage ratio was 13.5% and our consolidated tier 1 risk-based capital and common equity tier 1 risk-based capital ratios were both 24.0%.

The after-tax accretable yield on ASC 310-30 loans plus the after-tax yield on the FDIC indemnification asset, net, in excess of 4.0%, an approximate yield on new loan originations, and discounted at 5%, adds \$0.99 per share to our tangible book value per share as of June 30, 2015.

Tangible common book value per share was \$18.58 before consideration of the excess accretable yield value of \$0.99 per share.

During the six months ended June 30, 2015, we repurchased 3.9 million shares, or 10.0% of outstanding shares, at a weighted average price of \$18.55 per share. Since early 2013 and through August 6, 2015, we have repurchased 17.4 million shares, or 33.24% of outstanding shares, at an attractive weighted average price of \$19.45 per share. Taking into account the expected completion of the self-tender offer (see note 19), we expect to have repurchased approximately 22.1 million shares, or approximately 42.13% of outstanding shares, at a weighted average price of approximately \$19.88 per share.

Key Challenges

There are a number of significant challenges confronting us and our industry. In our short history, we have acquired distressed financial institutions, and sought to rebuild them and implement operational efficiencies across the enterprise as a whole. We face continual challenges implementing our business strategy, including growing the assets and deposits of our business amidst intense competition, particularly for loans, low interest rates, changes in the regulatory environment and identifying and consummating disciplined merger and acquisition opportunities in a very competitive environment.

General economic conditions continue to modestly improve in 2015, but continue to be somewhat dampened by the uncertainty about the strength of the recovery, both nationally and in our markets. Residential real estate values have largely recovered from their lows and commercial real estate property fundamentals continued to improve in our markets and nationally across all property types and classes. We consider this with guarded optimism. A significant portion of our loan portfolio is secured by real estate and any deterioration in real estate values or credit quality or elevated levels of non-performing assets would ultimately have a negative impact on the quality of our loan portfolio. Oil and gas prices declined significantly during 2014 and remained depressed through the second quarter of 2015. The full impact to the broad economy, to banks in general, and to us, is yet to be determined. Energy loans comprise 6.2% of our total loans and prolonged or further pricing pressure on oil and gas could lead to increased credit stress in our energy portfolio. Suppressed energy prices may lead to an increase in consumer spending in the short term, but the decline could have unpredictable secondary impacts such as job losses in industries tied to energy, increased spending habits, lower borrowing needs, higher transaction deposit balances or a number of other effects that are difficult to isolate or quantify.

Our total loan balances increased \$166.1 million during the six months ended June 30, 2015, or 15.5% annualized, on the strength of \$475.1 million of loan originations, partially offset by loan paydowns, particularly in our non-strategic portfolio. Our acquired loans generally have produced higher yields than our originated loans due to the recognition of accretion of fair value adjustments and accretable yield. The tepid economic recovery and intense loan competition have kept interest rates low during the six months ended June 30, 2015, limiting the yields we have been able to obtain on originated loans. During the six months ended June 30, 2015, our weighted average yield on loan originations was 3.52% (fully taxable equivalent), which is significantly lower than our 2014 weighted average yield of our total loan portfolio of 6.60% (fully taxable equivalent). We expect downward pressure on the yields on our total loan portfolio to the extent that our originated loan portfolio does not provide sufficient yields to replace the high yields on the acquired loan portfolio as they pay down or pay off. Growth in our interest income will ultimately be dependent on our ability to generate sufficient volumes of high-quality originated loans.

Increased regulation, impending new liquidity and capital constraints, and a continual need to bolster cybersecurity are adding costs and uncertainty to all U.S. banks and could affect profitability. Also, nontraditional participants in the market may offer increased competition as non-bank payment businesses are expanding into traditional banking products. While certain external factors are out of our control and may provide obstacles to our business strategy, we believe that we are prepared to deal with these challenges. We seek to remain flexible, yet methodical and proactive, in our strategic decision making so that we can quickly respond to market changes and the inherent challenges and opportunities that accompany such changes.

Performance Overview

As a financial institution, we routinely evaluate and review our consolidated statements of financial condition and results of operations. We evaluate the levels, trends and mix of the statements of financial condition and statements of operations line items and compare those levels to our budgeted expectations, our peers, industry averages and trends. Within our consolidated statements of financial condition, we specifically evaluate and manage the following:

Loan balances - We monitor our loan portfolio to evaluate loan originations, payoffs, and profitability. We forecast loan originations and payoffs within the overall loan portfolio, and we work to resolve problem loans and OREO in an expeditious manner. We track the runoff of our covered assets as well as the loan relationships that we have identified as “non-strategic” and put particular emphasis on the buildup of “strategic” relationships.

Asset quality - We monitor the asset quality of our loans and OREO through a variety of metrics, and we work to resolve problem assets in an efficient manner. Specifically, we monitor the resolution of problem loans through payoffs, pay downs and foreclosure activity. We marked all of our acquired assets to fair value at the date of their respective acquisitions, taking into account our estimation of credit quality. Loans accounted for under ASC Topic 310-30 are re-measured quarterly.

Our evaluation of traditional credit quality metrics and the allowance for loan losses (“ALL”) levels, especially when compared to industry averages or to other financial institutions, takes into account that any credit quality deterioration that existed at the date of acquisition was considered in the original valuation of those assets on our balance sheet. Additionally, many of these assets are covered by loss sharing agreements. All of these factors limit the comparability of our credit quality and ALL levels to peers or other financial institutions, but provide additional layers of loss protection.

Deposit balances - We monitor our deposit levels by type, market and rate. Our loans are funded through our deposit base, and we seek to optimize our deposit mix in order to provide reliable, low-cost funding sources.

Liquidity - We monitor liquidity based on policy limits and through projections of sources and uses of cash. In order to test the adequacy of our liquidity, we routinely perform various liquidity stress test scenarios that incorporate wholesale funding maturities, if any, certain deposit run-off rates and access to borrowings. We manage our liquidity primarily through our balance sheet mix, including our cash and our investment security portfolio, and the interest rates that we offer on our loan and deposit products, coupled with contingency funding plans as necessary.

Capital - We monitor our capital levels, including evaluating the effects of share repurchases and potential acquisitions, to ensure continued compliance with regulatory requirements and with the OCC Operating Agreement that we entered into in connection with our Bank Midwest acquisition, which is described under “Supervision and Regulation” in our 2014 Annual Report on Form 10-K. We review our tier 1 leverage capital ratios, our common equity tier 1 risk-based capital ratios, our tier 1 risk-based capital ratios and our total risk-based capital ratios on a regular basis.

Within our consolidated results of operations, we specifically evaluate the following:

Net interest income - Net interest income represents the amount by which interest income on interest earning assets exceeds interest expense incurred on interest bearing liabilities. We generate interest income through interest and dividends on loans, investment securities, securities purchased under agreements to resell and interest bearing bank deposits. Our acquired loans have generally produced higher yields than our originated loans due to the recognition of accretion of fair value adjustments and accretable yield and, as a result, we have historically had downward pressure on our interest income. While there is still some downward pressure and volatility in our interest income due to the nature of our portfolio, solid loan originations are helping to stabilize interest income by offsetting the decrease in interest income from the higher yielding purchased loans with the interest income earned on new loan originations. We incur interest expense on our interest bearing deposits, repurchase agreements and on our FHLB advances, and we would also incur interest expense on any future borrowings, including any debt assumed in acquisitions. We strive to maximize our interest income by acquiring and originating loans and investing excess cash in interest earning assets. Furthermore, we seek to minimize our interest expense through low-cost funding sources, thereby maximizing our net interest income.

Provision for loan losses - The provision for loan losses includes the amount of expense that is required to maintain the ALL at an adequate level to absorb probable losses inherent in the non 310-30 loan portfolio at the balance sheet

date. Additionally, we incur a provision for loan losses on loans accounted for under ASC 310-30 as a result of a decrease in the net present value of the expected future cash flows during the periodic remeasurement of the cash flows associated with these pools of loans. The determination of the amount of the provision for loan losses and the related ALL is complex and involves a high degree of judgment and subjectivity to maintain a level of ALL that is considered by management to be appropriate under GAAP.

Non-interest income - Non-interest income consists of service charges, bank card fees, gains on sales of mortgages, gains on sales of investment securities, gains on previously charged-off acquired loans, OREO related write-ups and other income and other non-interest income. Also included in non-interest income is FDIC indemnification asset amortization and other FDIC loss sharing income (expense), which consists of reimbursement of costs related to the resolution of covered assets, and

amortization of our clawback liability. For additional information, see “Application of Critical Accounting Policies-Valuation of Assets Acquired and Liabilities Assumed and Acquisition Accounting Application” and note 2 in our consolidated financial statements in our 2014 Annual Report on Form 10-K. Due to fluctuations in the amortization rates on the FDIC indemnification asset and the amortization of the clawback liability and due to varying levels of expenses and income related to the resolution of covered assets, the FDIC loss sharing income is not consistent on a period-to-period basis and, is expected to decline over time as covered assets are resolved and as the FDIC loss sharing agreements expire over the next eighteen months.

Non-interest expense - The primary components of our non-interest expense are salaries and benefits, occupancy and equipment, telecommunications and data processing and intangible asset amortization. Any expenses related to the resolution of problem assets are also included in non-interest expense. These expenses are dependent on individual resolution circumstances and, as a result, are not consistent from period-to-period. We seek to manage our non-interest expense in order to maximize efficiencies.

Net income - We utilize traditional industry return ratios such as return on average assets, return on average tangible assets, return on average equity, return on average tangible equity and return on risk-weighted assets to measure and assess our returns in relation to our balance sheet profile.

In evaluating the financial statement line items described above, we evaluate and manage our performance based on key earnings indicators, balance sheet ratios, asset quality metrics and regulatory capital ratios, among others. The table below presents some of the primary performance indicators that we use to analyze our business on a regular basis for the periods indicated:

Edgar Filing: National Bank Holdings Corp - Form 10-Q
