LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Description of Business and Summary of Significant Accounting Policies

Description of Business

Lumentum Holdings Inc. ("we", "our", "Lumentum" or the "Company") is an industry leading provider of optical and photonic products defined by revenue and market share addressing a range of end market applications including data communications ("Datacom") and telecommunications ("Telecom") networking and commercial lasers ("commercial lasers") for manufacturing, inspection and life-science applications. We are using our core optical and photonic technology and our volume manufacturing capability to expand into attractive emerging markets that benefit from advantages that optical or photonics-based solutions provide, including 3-D sensing for consumer electronics and diode light sources for a variety of consumer and industrial applications. The majority of our customers tend to be original equipment manufacturers ("OEMs") that incorporate our products into their products which then address end-market applications. For example, we sell fiber optic components that our network equipment manufacturer ("NEM") customers assemble into communications networking systems, which they sell to network service providers or enterprises with their own networks. Similarly, many of our customers for our Lasers products incorporate our products into tools they produce, which are used for manufacturing processes by their customers.

Basis of Presentation

Lumentum was incorporated in Delaware as a wholly owned subsidiary of JDS Uniphase ("JDSU") on February 10, 2015 and is comprised of the former communications and commercial optical products ("CCOP") segment and WaveReady product lines of JDSU.

On July 31, 2015, prior to the Separation (as described below), JDSU transferred substantially all of the assets and liabilities and operations of the CCOP segment and WaveReady product lines to Lumentum. Financial statements for periods prior to the Separation were prepared on a stand-alone basis and were derived from JDSU's consolidated financial statements and accounting records. The Company prepared consolidated financial statements for the period from June 28, 2015 to August 1, 2015 where expenses were allocated to the Company using estimates that it considers to be a reasonable reflection of the utilization of services provided to, or benefits received by, the Company. Since August 1, 2015, the Company has prepared consolidated financial statements as an independent stand-alone basis pursuant to the rules and regulations of the SEC and are in conformity with U.S. GAAP. In the opinion of management, these consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair statement of the consolidated financial statements for the periods shown. The results of operations for such periods are not necessarily indicative of the results expected for the full year or for any future periods.

On August 1, 2015, Lumentum became an independent publicly-traded company through the distribution by JDSU to its stockholders of 80.1% of our outstanding common stock (the "Separation"). Each JDSU stockholder of record as of the close of business on July 27, 2015 received one share of Lumentum common stock for every five shares of JDSU common stock held on the record date. JDSU was renamed Viavi Solutions Inc. ("Viavi") and at the time of the distribution retained ownership of 19.9% of Lumentum's outstanding shares. Lumentum's Registration Statement on Form 10 was declared effective by the SEC on July 16, 2015. Lumentum's common stock began trading "regular-way" under the ticker "LITE" on the NASDAQ stock market on August 4, 2015.

The preparation of the consolidated financial statements in accordance with GAAP in the United States requires management to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the Company in the future, actual results may be different from the estimates. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, inventory valuation, allocation methods and allocated expenses from Viavi, valuation of goodwill and other intangible assets,

stock-based compensation, retirement and post-retirement plan assumptions, restructuring, warranty and accounting for income taxes.

See "Note 3. Related Party Transactions" in the Notes to Consolidated Financial Statements regarding the relationships we had with Viavi.

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Fiscal Years

We utilize a 52-53 week fiscal year ending on the Saturday closest to June 30th. Our fiscal 2017 is a 52-week year ending on July 1, 2017. Our fiscal 2016 was a 53-week year ended on July 2, 2016.

Principles of Consolidation

These unaudited interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intra-company transactions and balances within our business were eliminated. All material transactions between us and other businesses of Viavi prior to Separation were reflected as net transfers to and from Viavi as a component of financing activities in the consolidated statements of cash flows.

Use of Estimates

The preparation of our consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements, the reported amount of net revenue and expenses and the disclosure of commitments and contingencies during the reporting periods. We base estimates on historical experience and on various assumptions about the future believed to be reasonable based on available information. Our reported financial position or results of operations may be materially different under changed conditions or when using different estimates and assumptions, particularly with respect to significant accounting policies. If estimates or assumptions differ from actual results, subsequent periods are adjusted to reflect more current information.

Accounting Policies

There have been no material changes in our significant accounting policies during the three months ended October 1, 2016 compared to the significant accounting policies described in our Annual Report on Form 10-K for the fiscal year ended July 2, 2016. The accompanying unaudited interim consolidated financial statements and accompanying related notes should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the fiscal year ended July 2, 2016.

Note 2. Recently Issued Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board (FASB) issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (ASU 2016-15), which clarifies how companies present and classify certain cash receipts and cash payments in the statement of cash flows. ASU 2016-15 is effective for us in our first quarter of fiscal 2019 and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2016-15 on our consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13 - Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments ("ASU 2016-13"). ASU 2016-13 amends the impairment model to utilize an expected loss methodology in place of the currently used incurred loss methodology, which will result in the more timely recognition of losses. The new standard applies to financial assets measured at amortized cost basis, including receivables that result from revenue transactions and held-to-maturity debt securities. The new guidance will be effective for the Company starting in the first quarter of fiscal 2021. Early adoption is permitted starting in the first quarter of fiscal 2020. The Company is in the process of determining the effects the adoption will have on its consolidated financial statements as well as whether to adopt the new guidance early.

In March 2016, FASB issued Accounting Standards Update No. ASU 2016-9, Stock Compensation ("ASU 718") - Improvements to Employee Share-Based Payment Accounting." This guidance simplifies various aspects related to how share-based payments are accounted for and presented in the financial statements. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The Company will adopt this standard in fiscal year 2018. The Company has not yet determined the effect, that the adoption of this standard will have on its consolidated financial statements or results of operations.

In February 2016, FASB issued Accounting Standards Update No. 2016-02, Leases ("ASU 2016-02"). The new guidance generally requires an entity to recognize on its balance sheet operating and financing lease liabilities and corresponding right-of-use assets. The standard is effective for us in our first quarter of fiscal 2019 and early adoption is permitted. The Company is currently evaluating the impact of the adoption of ASU 2016-02 on its consolidated

financial statements.

In January 2016, FASB issued Accounting Standards Update 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10) (“ASU 2016-01”). The new standard provides guidance for the recognition,

7

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

measurement, presentation and disclosure of financial instruments. This guidance is effective for us in our first quarter of fiscal 2018, and early adoption is not permitted. The Company is currently evaluating the impact of the adoption of ASU 2016-01 on its consolidated financial statements.

In April 2015, the FASB issued Accounting Standards Update No. 2015-04 Compensation-Retirement Benefits, ("ASU 2015-04") to provide a practical expedient that permits the entity to measure defined benefit plan assets and obligations using the month-end that is closest to the entity's fiscal year-end and apply that practical expedient consistently from year to year. We adopted this guidance effective first quarter of fiscal 2017 on a prospective basis. No prior periods were retrospectively adjusted. The Company does not believe this standard will have a material impact on its consolidated financial statements or the related footnote disclosures.

In May 2014, FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09"), which amended the existing accounting standards for revenue recognition. ASU 2014-09 establishes principles for recognizing revenue upon the transfer of promised goods or services to customers, in an amount that reflects the consideration expected to be received in exchange for those goods or services. The new standard requires that reporting companies disclose the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. On July 9, 2015, FASB agreed to delay the effective date by one year and, accordingly, the new standard is effective for the Company beginning in the first quarter of fiscal 2018. Early adoption is permitted, but not before the original effective date of the standard. The new standard is required to be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying it recognized at the date of initial application. The Company has not yet selected a transition method nor has it determined the impact of the new standard on its consolidated financial statements.

Note 3. Related Party Transactions

Transactions with Viavi

During the three months ended October 1, 2016 and September 26, 2015, the Company recognized revenue of \$0.6 million and \$0.8 million, respectively, from products sold to Viavi. During the three months ended October 1, 2016 and September 26, 2015, the Company recorded \$0.4 million and \$0.5 million, respectively, in research and development cost reimbursement and \$0.2 million and \$0.1 million, respectively, in sublease rental income. As of October 1, 2016 and July 2, 2016, the Company had \$0.2 million and \$1.1 million, respectively, in accounts receivable due from Viavi.

On July 31, 2015, the Company also entered into the following agreements with Viavi:

- a) Contribution Agreement which identified the assets transferred, the liabilities assumed and the contracts assigned and which provided for when and how these transfers, assumptions and assignments would occur.
- b) Separation and Distribution Agreement which governs the Separation of the Lumentum business and other matters related to Lumentum's relationship with Viavi.
- c) Tax Matters Agreement which governs the respective rights, responsibilities and obligations of Lumentum and Viavi with respect to tax liabilities and benefits, attributes, proceedings, returns and certain other tax matters. Employee Matters Agreement which governs the compensation and employee benefit obligations with respect to the current and former employees of Lumentum and Viavi, the treatment of equity based compensation and generally
- d) allocates liabilities and responsibilities relating to employee compensation, benefit plans and programs. The Employee Matters Agreement provides that employees of Lumentum will participate in benefit plans sponsored or maintained by Lumentum.
- e) Securities Purchase Agreement, which also includes Amada Holdings Co., Ltd. ("Amada") as a party, which sets forth the terms for the sale by Viavi to Amada of shares of Series A Preferred Stock (the "Series A Preferred Stock") of Lumentum Inc., our wholly-owned subsidiary, following the Separation.
- f) Intellectual Property Matters Agreement which outlines the intellectual property rights of Lumentum and Viavi following the Separation, as well as non-compete restrictions between Viavi and Lumentum.

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Allocated Costs

From June 28, 2015 to August 1, 2015, the effective date of the Separation, the consolidated statements of operations included the Company's direct expenses for cost of sales, research and development, sales and marketing, and administration as well as allocations of expenses arising from shared services and infrastructure provided by Viavi to the Company. These allocated expenses include costs of information technology, human resources, accounting, legal, real estate and facilities, corporate marketing, insurance, treasury and other corporate and infrastructure services. In addition, other costs allocated to the Company include restructuring and stock-based compensation related to Viavi's corporate and shared services employees and are included in the table below. These expenses were allocated to the Company using estimates that we consider to be a reasonable reflection of the utilization of services or benefits received by our business. The allocation methods include revenue, headcount, square footage, actual consumption and usage of services and others.

There were no allocations of expenses from Viavi for the three months ended October 1, 2016. During the three months ended September 26, 2015, allocated costs from Viavi included in the accompanying consolidated statements of operations were as follows (in millions):

	Three Months Ended September 26, 2015
Research and development	\$ —
Selling, general and administrative	11.7
Restructuring and related charges	—
Interest and other (income) expenses, net	(0.1)
Interest expense	0.1
Total allocated costs	\$ 11.7

Other Agreements

We share and operate under agreements executed by Viavi with third parties, including but not limited to purchasing, manufacturing, and freight agreements; use of facilities owned, leased, and managed by Viavi; and software, technology and other intellectual property agreements.

Note 4. Earnings Per Share

The following table sets forth the computation of basic and diluted net income (loss) per share (in millions, except per share data):

	Three Months Ended	
	October 2016	September 26, 2015
Numerator:		
Net income (loss)	\$(3.4)	\$ (0.2)
Less: Cumulative dividends on Series A Preferred Stock	(0.2)	(0.1)
Less: Accretion of Series A Preferred Stock	—	(9.7)
Net income (loss) attributable to common stockholders	(3.6)	(10.0)
Denominator:		
Weighted-average number of common shares outstanding		
Basic	59.9	58.8
Diluted	59.9	58.8
Net income (loss) per share attributable to common stockholders:		
Basic	\$(0.06)	\$ (0.17)
Diluted	\$(0.06)	\$ (0.17)

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On August 1, 2015, JDSU distributed 47.1 million shares, or 80.1% of the outstanding shares of the Company's common stock to existing holders of JDSU common stock. The weighted average number of common stock outstanding is calculated as the number of shares of common stock outstanding immediately following the Separation through September 26, 2015, and the weighted average number of shares outstanding following the Separation through October 1, 2016. Diluted earnings per share is calculated by dividing net income for the period by the weighted average number of shares of common stock and potentially dilutive common stock outstanding for the period beginning after the Separation.

The dilutive effect of stock-based awards is reflected in diluted earnings per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense, the tax benefits or shortfalls recorded to additional paid-in capital and the dilutive effect of in-the-money options and non-vested restricted stock units. Under the treasury stock method, the amount the employee must pay for exercising stock options and unamortized share-based compensation expense and tax benefits or shortfalls collectively are assumed proceeds to be used to repurchase hypothetical shares. An increase in the fair value of the Company's common stock can result in a greater dilutive effect from potentially dilutive awards.

The dilutive effect of the redeemable convertible preferred stock is reflected in diluted earnings per share by the application of the if-converted method. The number of shares is increased for the assumed conversion of the instrument. Additionally, cumulative dividends and accretion from measuring the instrument at its redemption value are added back to net income (loss).

For the three months ended October 1, 2016, 2.5 million weighted average shares were excluded from the calculation of diluted shares because their inclusion would have been antidilutive.

Note 5. Accumulated Other Comprehensive Income (Loss)

Our accumulated other comprehensive income (loss) consists of the accumulated net unrealized gains or losses on foreign currency translation adjustments and defined benefit obligation.

As of October 1, 2016 and July 2, 2016, balances for the components of accumulated other comprehensive income were as follows (in millions):

	Foreign currency translation adjustments	Defined benefit obligation, net of tax	Total
Beginning balance as of July 2, 2016	\$ 11.7	\$ (2.3)	\$9.4
Other comprehensive loss	(0.9)	—	(0.9)
Ending balance as of October 1, 2016	\$ 10.8	\$ (2.3)	8.5

Note 6. Balance Sheet and Other Details

Accounts receivable allowances

As of October 1, 2016 and July 2, 2016, our accounts receivable allowance balance was \$1.4 million and \$0.9 million, respectively.

Inventories

The components of inventories were as follows (in millions):

	October 1, July 2, 2016 2016	
Finished goods	\$ 45.8	\$46.1
Work in process	26.6	25.5
Raw materials and purchased parts	31.3	29.0
Inventories	\$ 103.7	\$100.6

Less: Accumulated depreciation	(346.3)	(334.8)
Property, plant and equipment, net	\$ 196.0	\$ 183.4

During the three months ended October 1, 2016 and September 26, 2015, we recorded depreciation expense of \$11.9 million and \$11.7 million, respectively. Our construction in progress includes primarily machinery and equipment that was purchased to increase our manufacturing capacity. We expect to place these assets in service in next 12 months.

Other current liabilities

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 7. Non-Controlling Interest Redeemable Convertible Preferred Stock

On July 31, 2015, our wholly-owned subsidiary, Lumentum Inc., issued 40,000 shares of its Series A Preferred Stock to Viavi. Pursuant to a securities purchase agreement between the Company, Viavi and Amada, 35,805 shares of Series A Preferred Stock were sold by Viavi to Amada in August 2015. The remaining 4,195 shares of the Series A Preferred Stock were canceled. The Series A Preferred Stock is referred to as our Non-Controlling Interest Redeemable Convertible Preferred Stock within these consolidated financial statements.

The Series A Preferred Stock is redeemable at the option of Amada after five years and classified as mezzanine equity in our consolidated balance sheet. The Series A Preferred Stock is measured at its redemption value. The Series A Preferred Stock value of \$35.8 million has not changed from prior period. The Series A Preferred Stock conversion feature is bifurcated from the Series A Preferred Stock and accounted for separately as a derivative liability. The derivative liability is measured at fair value each reporting period with the change in fair value recorded in the consolidated statements of operations.

The following paragraphs describe the terms and conditions of the Series A Preferred Stock:

Conversion

The Series A Preferred Stock is convertible, at the option of the holder, into shares of our common stock commencing on the second anniversary of the closing of the securities purchase (absent a change of control of us or similar event) using a conversion price of \$24.63, which is equal to 125% of the volume weighted average price per share of our common stock in the five “regular-way” trading days following the Separation.

Liquidation

Upon any liquidation, dissolution, or winding up of our business, whether voluntary or involuntary, holders of Series A Preferred Stock will be entitled to receive, in preference to holders of common stock or any other class or series of our outstanding capital stock ranking in any such event junior to the Series A Preferred Stock, an amount per share equal to the greater of (i) the Issuance Value of \$1,000 per share for Series A Preferred Stock plus all accrued and unpaid dividends thereon (whether or not authorized or declared) through the date of payment and (ii) the amount as would have been payable had all Series A Preferred Stock been converted into common stock immediately prior to such liquidation event.

If upon occurrence of any such event, our assets legally available for distribution are insufficient to permit payment of the aforementioned preferential amounts, then all of our assets legally available for distribution will be distributed ratably to the holders of the Series A Preferred Stock and to the holders of any other class or series of our capital stock ranking on parity with the Series A Preferred Stock.

Voting Rights

The Series A Preferred Stock have no voting rights except as follows:

• Authorize, approve, or make any change to the powers, preferences, privileges or rights of the Series A Preferred Stock;

• Authorize or issue any additional shares of Series A Preferred Stock or reduce the number of shares of Series A Preferred Stock; or

• Create, or hold capital stock in, any subsidiary that is not wholly-owned by the Company.

Dividends

Holders of Series A Preferred Stock, in preference to holders of common stock or any other class or series of our outstanding capital stock ranking in any such event junior to the Series A Preferred Stock, are entitled to receive, when and as declared by the board of directors, quarterly cumulative cash dividends at the annual rate of 2.5% of the Issuance Value per share on each outstanding share of Series A Preferred Stock. The accrued dividends are payable on March 31, June 30, September 30 and December 31 of each year commencing on September 30, 2015.

The accrued dividends as of October 1, 2016 are \$0.2 million.

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Redemption

Optional redemption by the Company

On or after the third anniversary, we will have the option to redeem for cash all (but not less than all) of the shares of Series A Preferred Stock at a redemption price equal to the Issuance Value plus the accrued and unpaid dividends on each share and any past due dividends, whether or not authorized or declared.

Optional redemption by holders

Commencing on the fifth anniversary of the Issuance Date, each holder of Series A Preferred Stock may cause the Company to redeem for cash any number of shares of Series A Preferred Stock on any date at a redemption price for share redeemed equal to the Issuance Value plus the accrued and unpaid dividends on each share and any past due dividends, whether or not authorized or declared.

Note 8. Derivative Liability

We estimate the fair value of the embedded derivative for the Series A Preferred Stock using the binomial lattice model. We applied the binomial lattice model to value the embedded derivative using a "with-and-without method," where the value of the Series A Preferred Stock including the embedded derivative, is defined as the "with", and the value of the Series A Preferred Stock excluding the embedded derivative, is defined as the "without". This method estimates the value of the embedded derivative by looking at the difference in the values between the Series A Preferred Stock with the embedded derivative and the value of the Series A Preferred Stock without the embedded derivative. The lattice model requires the following inputs: (i) the Company's common stock price; (ii) conversion price; (iii) term; (iv) yield; (v) recovery rate; (vi) estimated stock volatility; and (vii) risk-free rate. The fair value of the embedded derivative was determined using level 3 inputs under the fair value hierarchy (unobservable inputs). Changes in the inputs into this valuation model have a material impact in the estimated fair value of the embedded derivative. For example, a decrease (increase) in the stock price results in a decrease (increase) in the estimated fair value of the embedded derivative. The changes in the fair value of the bifurcated embedded derivative of \$(22.7) million for the three months ended October 1, 2016 is primarily related to the change in the price of the Company's underlying common stock and is reflected in the consolidated statements of operations as "Unrealized loss on derivative liability".

The following table provides a reconciliation of the fair value of the embedded derivative for the Series A Preferred Stock measured by significant unobservable inputs (Level 3) for the three months ended October 1, 2016:

	Balance	
	as of	
	(in	
	millions)	
	October 1,

Note 9. Goodwill and Other Intangible Assets

Goodwill

The following table presents the changes in goodwill by operating segments during the three months ended October 1, 2016 (in millions):

	Optical Communications	Commercial Lasers	Total
Balance as of July 2, 2016	\$ —	\$ 5.4	\$ 5.4
Currency translation	—	—	—
Balance as of October 1, 2016	\$ —	\$ 5.4	\$ 5.4

Impairment of Goodwill

We review goodwill for impairment during the fourth quarter of each fiscal year or more frequently if events or circumstances indicate that an impairment loss may have occurred. In the fourth quarter of fiscal 2016, we completed the annual impairment test of goodwill, which indicated there was no goodwill impairment. During the three months ended October 1, 2016, there have been no events or circumstances that have required us to perform an interim assessment of goodwill for impairment.

Acquired Developed Technology and Other Intangibles

The following tables present details of our acquired developed technology and other intangibles (in millions):

As of	Gross Carrying Amount	Accumulated Amortization	Net
As of October 1, 2016			
Acquired developed technology	\$ 103.0	\$ (90.6)	\$ 12.4
Other	9.4	(9.1)	0.3
Total Intangibles	\$ 112.4	\$ (99.7)	\$ 12.7
As of July 2, 2016			
Acquired developed technology	\$ 103.0	\$ (88.9)	\$ 14.1
Other	9.4	(9.0)	0.4
Total Intangibles	\$ 112.4	\$ (97.9)	\$ 14.5

During the three months ended October 1, 2016 and September 26, 2015, we recorded \$1.8 million and \$1.8 million, respectively, of amortization related to acquired developed technology and other intangibles. The following table presents details of our amortization (in millions):

	Three Months Ended	
	October 2016	September 26, 2015
Cost of sales	\$ 1.7	\$ 1.7
Operating expense	0.1	0.1
Total	\$ 1.8	\$ 1.8

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Based on the carrying amount of acquired developed technology and other intangibles as of October 1, 2016, and assuming no future impairment of the underlying assets, the estimated future amortization is as follows (in millions):

Remainder of 2017	\$4.8
2018	2.8
2019	2.6
2020	2.5
Thereafter	—
Total amortization	\$12.7

Note 10. Restructuring and Related Charges

We have initiated various strategic restructuring events primarily intended to reduce costs, consolidate our operations, rationalize the manufacturing of our products and align our business in response to the market conditions. As of October 1, 2016 and July 2, 2016, our total restructuring accrual was \$5.3 million and \$5.7 million, respectively. During the three months ended October 1, 2016 and September 26, 2015, we recorded \$2.9 million and \$1.0 million, respectively, in restructuring and related charges in the consolidated statements of operations. Of the \$2.9 million charge recorded during the three months ended October 1, 2016, \$0.4 million was related to severance, retention and employee benefits. Other restructuring related charges and exit costs include relocation costs, equipment set-up costs, product qualification costs, facilities and equipment costs to vacate facilities and consolidate operations, and lease termination costs. The timing of associated cash payments is dependent upon the type of restructuring charge and can extend over multiple periods.

Summary of Restructuring Plans

The adjustments to the restructuring accrual related to all of our restructuring plans described below as of October 1, 2016, were as follows (in millions):

	Fiscal 2015 & earlier Restructuring Plan			Fiscal 2016 Restructuring Plan	
	Restructuring Charges	Exit Costs	Other Charges	Restructuring Charges	Total
Liability as of July 2, 2016	\$4.5	\$0.5	\$ —	\$ 0.7	\$5.7
Charges	0.4	—	2.5	—	2.9
Payments	—	(0.1)	(2.5)	(0.7)	(3.3)
Liability as of October 1, 2016	\$4.9	\$0.4	\$ —	\$ —	\$5.3

As of October 1, 2016, our restructuring liability includes \$5.1 million in short-term other current liabilities and \$0.2 million in other non-current liabilities on the consolidated balance sheets.

As of July 2, 2016, our restructuring liability includes \$5.5 million in short-term other current liabilities and \$0.2 million in other non-current liabilities on the consolidated balance sheets.

Ottawa Lease Exit Costs

During fiscal 2008, we recorded lease exit charges, net of assumed sub-lease income related to our Ottawa facility which was included in selling, general and administrative expenses as the space was never occupied and we had no need for the space in the foreseeable future due to changes in business requirements. For the three months ended October 1, 2016 and September 26, 2015, we had cash settlements of \$0.1 million and \$0.1 million, respectively. The fair value of the remaining contractual obligations, net of sublease income is \$0.5 million and \$0.5 million as of October 1, 2016 and July 2, 2016, respectively. As of October 1, 2016 and July 2, 2016, \$0.3 million and \$0.3 million was included in other current liabilities for each year, and \$0.2 million and \$0.2 million in other non-current liabilities, respectively, in the consolidated balance sheets. The payments related to these lease costs are expected to be paid by the end of the third quarter of fiscal 2018.

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 11. Income Taxes

The Company recorded a tax benefit of \$2.3 million and \$0.3 million for the three months ended October 1, 2016, and September 26, 2015, respectively. The quarterly provision for income taxes is based on the estimated annual effective tax rate, plus any discrete items for the respective year. The Company updates its estimated annual effective tax rate at the end of each quarterly period. The estimate takes into account the estimates for annual pre-tax income, the geographic mix of pre-tax income and interpretations of tax laws.

The benefit for income taxes for the three months ended October 1, 2016 was primarily due to an increase of profit in jurisdictions with lower tax rates, utilization of U.S. tax attributes that were subject to a full valuation allowance, certain Canadian tax incentives, and a net benefit of \$0.5 million of true-up adjustments in our foreign jurisdictions. The benefit for income taxes for the three months ended September 26, 2015 was primarily attributable to the utilization of US tax attributes that were subject to a full valuation allowance, and certain Canadian tax incentives. The Company's net deferred tax assets relate predominantly to the Canadian tax jurisdiction and the Company has a partial valuation allowance against these deferred tax assets. The Company weighed both positive and negative evidence and determined that due to the limited carryover period of certain tax attributes in Canada, there is a continued need for a partial valuation allowance against these deferred tax assets as of October 1, 2016. Should the Company determine that it needs to adjust the valuation allowance, the adjustment may have a material impact to net income in the period such determination is made.

The Company also evaluates the ability to realize its U.S. net deferred tax assets based on all available evidence, both positive and negative, on a quarterly basis. The realization of net deferred tax assets is dependent on the Company's ability to generate sufficient future taxable income during periods prior to the expiration of tax attributes to fully utilize these assets. The Company weighed both positive and negative evidence and determined that due to cumulative losses in the United States, there is a continued need for a full valuation allowance against the U.S. deferred tax assets as of October 1, 2016.

At October 1, 2016 and September 26, 2015, the Company had \$0.8 million and \$0.1 million of liability for unrecognized tax benefits, respectively, which, if recognized, would affect the effective tax rate.

The Company is routinely subject to various federal, state and foreign audits by taxing authorities. The timing for the resolution and closure of tax audits is highly unpredictable. Given the uncertainty, it is reasonably possible that certain tax audits may be concluded within the next 12 months that could materially impact the balance of our gross unrecognized tax benefits. An estimate of the range of increase or decrease that could occur in the next twelve months cannot be made. However, the estimated impact to tax expense and net income from the resolution and closure of tax exams is not expected to be significant within the next 12 months.

On October 4, 2016, the Company received a notice of reassessment letter related to an on-going tax audit in one of the foreign jurisdictions for tax years prior to the separation from Viavi. As part of the indemnification agreement entered into with Viavi, the Company will be indemnified for any tax liability assessed.

In addition, the Company is in the process of evaluating its international operational footprint, which could result in future changes to the Company's legal entity structure and operating model. A wholly-owned foreign subsidiary of the Company acquired certain rights to sell the existing products and also those products to be developed or licensed in the future, and will also share in the research and development cost. The existing rights were transferred to its wholly-owned foreign subsidiary prior to the Separation. As a result of these changes, the Company expects that an increasing percentage of its consolidated pre-tax income will be derived from, and reinvested in, its foreign operations. The Company anticipates that this pre-tax income will be subject to foreign tax at relatively lower tax rates when compared to the U.S. federal statutory tax rate and as a consequence, the Company's effective income tax rate is expected to be lower than the U.S. federal statutory rate.

Note 12. Stock-Based Compensation and Stock Plans

Description of Lumentum Stock-Based Benefit Plans

Stock Option Plans

On June 23, 2015, the board of directors of JDS Uniphase Corporation ("JDSU" and, now, Viavi Solutions Inc.) approved, and subsequently, our sole stockholder adopted, the 2015 Equity Incentive Plan (the "2015 Plan") under which 8.5 million shares

17

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

of our Common Stock were authorized for issuance. The 2015 Plan was ratified by the Company's board of directors in August 2015. In connection with our Separation from JDSU on July 31, 2015, outstanding JDSU equity-based awards, held by employees continuing employment with the Company after the Separation, were converted into equity-based awards under the 2015 Plan, reducing the number of shares remaining available for grant under the 2015 Plan. As of immediately following our Separation from JDSU, 2.1 million shares of our Common Stock were subject to outstanding equity-based awards under the 2015 Plan that were converted from JDSU equity-based awards.

As of October 1, 2016, the Company had 2.7 million stock options, performance stock units, restricted stock awards, and restricted stock units outstanding under the 2015 Plan. Performance stock units, restricted stock awards, and restricted stock units are performance-based, time-based or a combination of both and are expected to vest over one to four years. The fair value of the time-based performance stock units, restricted stock awards, or restricted stock units is based on the closing market price of the Company's common stock on the date of award.

The exercise price for stock options is equal to the fair value of the underlying stock at the date of grant. The Company issues new shares of common stock upon exercise of stock options. Options generally become exercisable over a three-year or four-year period and, if not exercised, expire from five to ten years after the date of grant. As of October 1, 2016, 4.3 million shares of common stock under the 2015 Plan were available for grant.

Employee Stock Purchase Plan

On June 23, 2015, the board of directors of JDSU approved, and subsequently, our sole stockholder adopted, the 2015 Employee Stock Purchase Plan (the "2015 Purchase Plan") under which 3.0 million shares of our Common Stock were authorized for issuance. The 2015 Purchase Plan was ratified by our board of directors on July 31, 2015. The 2015 Purchase Plan provides eligible employees with the opportunity to acquire an ownership interest in the Company through periodic payroll deductions and provides a 15% purchase price discount as well as a six-month look-back period. The 2015 Purchase Plan is structured as a qualified employee stock purchase plan under Section 423 of the Internal Revenue Code of 1986. However, the 2015 Purchase Plan is not intended to be a qualified pension, profit sharing or stock bonus plan under Section 401(a) of the Internal Revenue Code of 1986 and is not subject to the provisions of the Employee Retirement Income Security Act of 1974. The 2015 Purchase Plan will terminate upon the date on which all shares available for issuance have been sold. Of the 3.0 million shares authorized under the 2015 Purchase Plan, 2.8 million shares remained available for issuance as of October 1, 2016.

Restricted Stock Units

Each restricted stock unit ("RSU") granted is a bookkeeping entry representing an amount equal to the fair market value of one share. RSUs result in a payment to a holders if any performance goals or other vesting criteria are achieved or the awards otherwise vest. The administrator determines in its sole discretion whether an award will be settled in stock, cash, or a combination of both.

Generally, our RSUs have service conditions, performance conditions, or a combination of both and are expected to vest over one to four years. The fair value of the time-based RSUs is based on the closing market price of the common stock on the date of award.

Restricted Stock Awards

Restricted stock awards are grants of shares of our common stock that are subject to various restrictions, including restrictions on transferability and forfeiture provisions. Restricted stock awards are expected to vest over one to four years, and the shares acquired may not be transferred by the holder until the vesting conditions (if any) are satisfied.

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock-Based Compensation

The impact on our results of operations of recording stock-based compensation by function for the three months ended October 1, 2016 and September 26, 2015 was as follows (in millions):

	Three Months	
	Ended October 1, 2016	September 26, 2015
Cost of sales	\$ 1.9	\$ 1.2
Research and development	2.8	1.9
Selling, general and administrative	3.0	3.4
	7.7	6.5

Approximately \$1.0 million and \$1.2 million of stock-based compensation was capitalized to inventory as of October 1, 2016 and July 2, 2016, respectively. The table above includes allocated stock-based compensation from Viavi of \$0.5 million for the three months ended September 26, 2015. There were no allocations to stock-based compensation from Viavi for the three months ended October 1, 2016. Refer to "Note 3. Related Party Transactions" in the Notes to Consolidated Financial Statements.

Stock Option, Restricted Stock Awards, and Restricted Stock Units Activity

We granted no stock options during the three months ended October 1, 2016. The total intrinsic value of options exercised by our employees during the three months ended October 1, 2016 and September 26, 2015 was \$3.1 million and \$0.1 million, respectively.

In connection with these exercises, the tax benefit realized by us was immaterial due to the fact that Lumentum has no material tax benefit in foreign jurisdictions and a full valuation allowance on its domestic deferred tax assets. As of October 1, 2016, \$63.9 million of stock-based compensation cost related to RSUs granted to our employees remains to be amortized. That cost is expected to be recognized over an estimated amortization period of 2.18 years. The following table summarizes our stock option, RSA, and RSU activities during the three months ended October 1, 2016 (amount in millions except per share amounts):

	Options Outstanding		Restricted Stock Units/Awards Outstanding		
	Number of Shares	Weighted-Average Exercise Price	Number of Shares (PSU)	Number of Shares (RSU/RSA)	Weighted-Average Grant Date Fair Value
Outstanding as of July 2, 2016, as converted	0.3	\$ 17.83	0.1	2.5	\$ 21.04
Granted	—	—	—	1.1	32.74
Exercised / Vested	(0.2)	14.92	(0.1)	(0.6)	21.11
Canceled	—	—	—	(0.1)	21.83
Outstanding as of October 1, 2016	0.1	\$ 22.06	—	2.9	25.53
Vested and expected to vest	0.1	\$ 22.06	—	2.2	24.30

Employee Stock Purchase Plan Activity

The ESPP expense we recorded for the three months ended October 1, 2016 was \$0.5 million. The expense related to the plan is recorded on a straight-line basis over the relevant subscription period. During the three months ended October 1, 2016, there were no shares issued to employees through the ESPP program.

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 13. Commitments and Contingencies

Operating Leases

We lease certain real and personal property from unrelated third parties under non-cancellable operating leases that expire at various dates through fiscal 2026. Certain leases require us to pay property taxes, insurance and routine maintenance, and include escalation clauses. As of October 1, 2016 the future minimum annual lease payments under non-cancellable operating leases were as follows (in millions):

Remainder of 2017	\$5.0
2018	5.6
2019	3.9
2020	2.8
2021	1.7
Thereafter	3.9
Total minimum operating lease payments	\$22.9

Included in the future minimum lease payments table above is \$0.5 million related to lease commitments in connection with our restructuring and related activities. Refer to "Note 10. Restructuring and Related Charges" in the Notes to Consolidated Financial Statements.

Rental expense was \$2.2 million and \$1.5 million for the three months ended October 1, 2016 and September 26, 2015, respectively.

Purchase Obligations

Purchase obligations of \$125.4 million as of October 1, 2016, represent legally-binding commitments to purchase inventory and other commitments made in the normal course of business to meet operational requirements. Although open purchase orders are considered enforceable and legally binding, the terms generally allow the option to cancel, reschedule and adjust the requirements based on our business needs prior to the delivery of goods or performance of services. Obligations to purchase inventory and other commitments are generally expected to be fulfilled within one year.

We depend on a limited number of contract manufacturers, subcontractors and suppliers for raw materials, packages and standard components. We generally purchase these single or limited source products through standard purchase orders or one-year supply agreements and have no significant long-term guaranteed supply agreements with such vendors. While we seek to maintain a sufficient safety stock of such products and maintain on-going communications with our suppliers to guard against interruptions or cessation of supply, our business and results of operations could be adversely affected by a stoppage or delay of supply, substitution of more expensive or less reliable products, receipt of defective parts or contaminated materials, increases in the price of such supplies, or our inability to obtain reduced pricing from our suppliers in response to competitive pressures.

Product Warranties

We provide reserves for the estimated costs of product warranties at the time revenue is recognized. We typically offer a twelve month warranty for most of our products. However, in some instances depending upon the product, product component or application of our products by the end customer, our warranties can vary and generally range from six months to 5 years. We estimate the costs of our warranty obligations on an annualized basis based on our historical experience of known product failure rates, use of materials to repair or replace defective products and service delivery costs incurred in correcting product failures. In addition, from time to time, specific warranty accruals may be made if unforeseen technical problems arise with specific products. We assess the adequacy of our recorded warranty liabilities and adjust the amounts as necessary.

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table presents the changes in our warranty reserve during the three months ended October 1, 2016 and September 26, 2015 (in millions):

	Three Months Ended	
	October 1, 2016	September 26, 2015
Balance as of beginning of period	\$2.8	\$ 2.8
Provision for warranty	3.8	0.9
Utilization of reserve	(1.2)	(1.2)
Balance as of period end	\$5.4	\$ 2.5

Environmental Liabilities

Our R&D, manufacturing and distribution operations involve the use of hazardous substances and are regulated under international, federal, state and local laws governing health and safety and the environment. We apply strict standards for protection of the environment and occupational health and safety to sites inside and outside the United States, even if not subject to regulations imposed by foreign governments. We believe that our properties and operations at our facilities comply in all material respects with applicable environmental laws and occupational health and safety laws. However, the risk of environmental liabilities cannot be completely eliminated and there can be no assurance that the application of environmental and health and safety laws will not require us to incur significant expenditures. We are also regulated under a number of international, federal, state and local laws regarding recycling, product packaging and product content requirements. The environmental, product content/disposal and recycling laws are gradually becoming more stringent and may cause us to incur significant expenditures in the future.

In connection with the Separation, we agreed to indemnify Viavi for any liability associated with contamination from past operations at all properties transferred to us from Viavi, to the extent the resulting issues primarily related to our business.

Legal Proceedings

We are subject to a variety of claims and suits that arise from time to time in the ordinary course of our business. While management currently believes that resolving claims against us, individually or in the aggregate, will not have a material adverse impact on our financial position, results of operations or statements of cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future. Were an unfavorable final outcome to occur, there exists the possibility of a material adverse impact on our financial position, results of operations or cash flows for the period in which the effect becomes reasonably estimable.

Note 14. Operating Segments and Geographic Information

Our chief executive officer is our Chief Operating Decision Maker ("CODM"). The CODM allocates resources to the segments based on their business prospects, competitive factors, net revenue and gross margin.

We are an industry leading provider of optical and photonic products defined by revenue and market share addressing a range of end-market applications including optical communications and commercial lasers. We have two operating segments, Optical Communications, which we refer to as OpComms, and Commercial Lasers, which we refer to as Lasers. The two operating segments were primarily determined based on how the CODM views and evaluates our operations. Operating results are regularly reviewed by the CODM to make decisions about resources to be allocated to the segments and to assess their performance. Other factors, including market separation and customer specific applications, go-to-market channels, products and manufacturing, are considered in determining the formation of these operating segments.

OpComms

Our OpComms products address the following markets: telecommunications (Telecom), data communications (Datacom) and Consumer and Industrial.

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our OpComms products include a wide range of components, modules and subsystems to support and maintain customers in our two primary markets: Telecom and Datacom. The Telecom market includes carrier networks for access (local), metro (intracity), long-haul (city-to-city and worldwide) and submarine (undersea) networks. The Datacom market addresses enterprise, cloud and data center applications, including storage-access networks (“SANs”), local-area networks (“LANs”) and wide-area networks (“WANs”). These products enable the transmission and transport of video, audio and text data over high-capacity fiber-optic cables. We maintain leading positions in the fastest-growing OpComms markets, including reconfigurable optical add/drop multiplexers (“ROADMs”), 100G coherent components, tunable 10-gigabit small form-factor pluggable transceivers and tunable small form-factor pluggables. Our 10G, 40G legacy transceivers and a growing portfolio of 100G pluggable transceivers support LAN/SAN/WAN needs and the cloud for customers building enterprise and hyperscale data center networks.

In the Consumer and Industrial markets, our OpComms products include our light source products, which are integrated into 3-D sensing platforms being used in applications for gaming, computing, virtual and augmented reality, mobile and industrial segments. These systems simplify the way people interact with technology by enabling the use of natural body gestures, like the wave of a hand, to control a product or application. Systems can also be used for human identification, safety, and process efficiency, among numerous other application spaces. Emerging applications for this technology include various mobile device applications, autonomous vehicles, self-navigating robotics and drones in industrial applications and 3-D capture of objects coupled with 3-D printing. Our light sources are also used in a variety of other industrial laser and processing applications.

Lasers

Our Lasers products serve our customers in markets and applications such as manufacturing, biotechnology, graphics and imaging, remote sensing, and precision machining such as drilling in printed circuit boards, wafer singulation and solar cell scribing. Our Lasers products are used in a variety of original equipment manufacturer (“OEM”) applications. Our Laser products are used in a variety of OEM applications including diode-pumped solid-state, fiber, diode, direct-diode and gas lasers such as argon-ion and helium-neon lasers. Diode-pumped solid-state and fiber lasers provide excellent beam quality, low noise and exceptional reliability and are used in biotechnology, graphics and imaging, remote sensing, materials processing and precision machining applications. Diode and direct-diode lasers address a wide variety of applications, including laser pumping, thermal exposure, illumination, ophthalmology, image recording, printing, plastic welding and selective soldering. Gas lasers such as argon-ion and helium-neon lasers provide a stable, low-cost and reliable solution over a wide range of operating conditions, making them well suited for complex, high-resolution OEM applications such as flow cytometry, DNA sequencing, graphics and imaging and semiconductor inspection.

Our acquisition of Time-Bandwidth in 2014 enabled us to provide high-powered and ultrafast lasers for the industrial and scientific markets. Manufacturers use high-power, ultrafast lasers to create micro parts for consumer electronics and to process glass, semiconductor, LED, and other types of materials. Use of ultrafast lasers for micromachining applications is being driven primarily by the increasing use of consumer electronics and connected devices globally. We do not allocate research and development, sales and marketing, or general and administrative expenses to our segments because management does not include the information in its measurement of the performance of the operating segments. In addition, we do not allocate amortization and impairment of acquisition-related intangible assets, stock-based compensation and certain other charges impacting the gross margin of each segment because management does not include this information in its measurement of the performance of the operating segments.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Information on reportable segments utilized by our CODM is as follows (in millions):

	Three Months Ended	
	October 2016	September 26, 2015
Net revenue:		
OpComms	\$218.3	\$ 177.1
Lasers	39.8	35.5
Net revenue	\$258.1	\$ 212.6
Gross profit:		
OpComms	71.0	55.6
Lasers	17.2	14.2
Total segment gross profit	88.2	69.8
Unallocated amounts:		
Stock-based compensation	(2.0)	(1.2)
Amortization of intangibles	(1.7)	(1.7)
Other charges	(2.8)	—
Gross profit	\$81.7	\$ 66.9

The table below discloses the percentage of our total net revenue attributable to each of our two reportable segments. In addition, it discloses the percentage of our total net revenue attributable to our product offerings which serve the Telecom, Datacom and consumer and industrial ("Consumer and Industrial") markets which accounted for more than 10% or more of our total net revenue during the last three fiscal years:

	Three Months Ended		
	October 1, 2016	September 26, 2015	
OpComms:	84.6%	83.3	%
Telecom	64.2%	62.5	%
Datacom	17.1%	16.8	%
Lasers	15.4%	16.7	%

Table of Contents

LUMENTUM HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We operate in three geographic regions: Americas, Asia-Pacific, and EMEA (Europe, Middle East and Africa). Net revenue is assigned to the geographic region and country where our product is initially shipped. For example, certain customers may request shipment of our product to a contract manufacturer in one country, which may differ from the location of their end customers. The following table presents net revenue by the three geographic regions we operate in and net revenue from countries that exceeded 10% of our total net revenue (in millions, except percentage data):

	Three Months Ended			
	October 1, 2016		September 26, 2015	
Net revenue:				
Americas:				
Mexico	\$39.8	15.4%	\$41.8	19.7%
United States	35.9	13.9	34.5	16.2
Other Americas	4.0	1.5	7.8	3.7
Total Americas	\$79.7	30.8%	\$84.1	39.6%
Asia-Pacific:				
Hong Kong	\$58.3	22.6%	\$30.8	14.5%
Japan	31.3	12.1	25.0	11.8
Other Asia-Pacific	65.4	25.3	40.0	18.8
Total Asia-Pacific	\$155.0	60.0%	\$95.8	45.1%
EMEA	\$23.4	9.2%	\$32.7	15.3%

Total net revenue \$258.1 \$212.6

During the three months ended October 1, 2016 and September 26, 2015, net revenue from customers outside the United States, based on customer shipping location, represented 86.1% and 83.8% of net revenue, respectively. Our net revenue is primarily denominated in U.S. dollars, including our net revenue from customers outside the United States as presented above.

Long-lived assets, namely net property, plant and equipment were identified based on the operations in the corresponding geographic areas (in millions):

	October 1, July 2, 2016 2016	
	Property, Plant and Equipment, net	
United States	\$ 75.3	\$69.0
Canada	21.6	21.4
China	50.1	46.6
Thailand	46.4	43.8

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in conjunction with the unaudited interim consolidated financial statements and the corresponding notes included elsewhere in this Quarterly Report on Form 10-Q (this "Quarterly Report"). This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements. The matters discussed in these forward-looking statements are subject to risk, uncertainties and other factors that could cause actual results to differ materially from those made, projected or implied in the forward-looking statements. Please see "Risk Factors" and "Forward-Looking Statements" for a discussion of the uncertainties, risks and assumptions associated with these statements.

FORWARD-LOOKING STATEMENTS

This Quarterly Report contains forward-looking statements that involve risks, uncertainties and assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. The statements contained in this Quarterly Report that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements relate to, among other things, trends in the markets in which we sell our products, our expectations and strategies with respect to market development and growth opportunities, factors affecting our sales, gross margins, operating expenses, including selling, general and administrative expense for non-core expenses, capital expenditures and requirements, liquidity, product development and research and development efforts and expense, anticipated cost savings from restructuring transactions, manufacturing plans, litigation, effective tax rates and tax reserves, our corporate and financial reporting structure, and our plans for growth and innovation. Forward-looking statements are often identified by the use of words such as, but not limited to, "anticipate," "believe," "can," "continue," "could," "estimate," "expect," "intend," "may," "might," "plan," "project," "seek," "should," "target," "will," "would" and similar expressions or variations thereof intended to identify forward-looking statements. These statements are based on the beliefs and assumptions of our management, which are in turn based on information currently available to management. Such forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section entitled "Risk Factors" included under Part II, Item 1A of this Quarterly Report. Furthermore, such forward-looking statements are based on our assessment of information available to us as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Table of Contents

Overview

We are an industry leading provider of optical and photonic products, defined by revenue and market share addressing a range of end-market applications including optical communications and commercial lasers. We have two operating segments, Optical Communications, which we refer to as OpComms, and Commercial Lasers, which we refer to as Lasers. The two operating segments were primarily determined based on how the Chief Operating Decision Maker (“CODM”) views and evaluates our operations. Operating results are regularly reviewed by the CODM to make decisions about resources to be allocated to the segments and to assess their performance. Other factors, including market separation and customer specific applications, go-to-market channels, products and manufacturing, are considered in determining the formation of these operating segments.

OpComms

Our OpComms products address the following markets: telecommunications (“Telecom”), data communications (“Datacom”), and Consumer and Industrial.

Our OpComms products include a wide range of components, modules and subsystems to support and maintain customers in our two primary markets: Telecom and Datacom. The Telecom market includes carrier networks for access (local), metro (intracity), long-haul (city-to-city and worldwide) and submarine (undersea) networks. The Datacom market addresses enterprise, cloud and data center applications, including Storage Area Networks (“SANs”), Local Area Networks (“LANs”), and Wide Area Networks (“WANs”). These products enable the transmission and transport of video, audio and text data over high-capacity fiber-optic cables. We maintain leading positions in the fastest-growing OpComms markets, including ROADMs, 100G coherent components, tunable 10-gigabit small form-factor pluggable transceivers and tunable small form-factor pluggables. Our 10G and 40G legacy transceivers and a growing portfolio of 100G pluggable transceivers support LAN/SAN/WAN needs and the cloud for customers building enterprise and hyperscale data center networks.

In the Consumer and Industrial markets, our OpComms products include our light source products, which are integrated into 3-D sensing platforms being used in applications for gaming, computing, virtual and augmented reality, mobile and industrial segments. These systems simplify the way people interact with technology by enabling the use of natural body gestures, like the wave of a hand, to control a product or application. Systems can also be used for human identification, safety, and process efficiency, among numerous other application spaces. Emerging applications for this technology include various mobile device applications, autonomous vehicles, self-navigating robotics and drones in industrial applications and 3-D capture of objects coupled with 3-D printing. Our light sources are also used in a variety of other industrial laser and processing applications.

Our OpComms customers include Ciena Corporation, Cisco Systems, Inc., Coriant GmbH, Fujitsu, Alphabet Inc. (formerly Google), Facebook, Huawei Technologies Co. Ltd., Microsoft Corporation and Nokia Networks (including Alcatel-Lucent International).

Lasers

Our Lasers products serve our customers in markets and applications such as manufacturing, biotechnology, graphics and imaging, remote sensing, and precision machining, such as drilling of printed circuit boards, wafer singulation and solar cell scribing.

Our Laser products include diode-pumped solid-state with short and ultrafast pulses, fiber, diode, direct-diode and gas lasers such as argon-ion and helium-neon lasers. Diode-pumped solid-state and fiber lasers provide excellent beam quality, low noise and exceptional reliability and are used in biotechnology, graphics and imaging, remote sensing, materials processing and precision machining applications. Diode and direct-diode lasers address a wide variety of applications, including laser pumping, thermal exposure, illumination, ophthalmology, image recording, printing, plastic welding and selective soldering. Gas lasers such as argon-ion and helium-neon lasers provide a stable, low-cost and reliable solution over a wide range of operating conditions, making them well suited for complex, high-resolution OEM applications such as flow cytometry, DNA sequencing, graphics and imaging and semiconductor inspection. We also provide high-powered and ultrafast lasers for the industrial and scientific markets. Manufacturers use high-power, ultrafast lasers to create micro parts for consumer electronics and for medical devices, and to process semiconductor, LED, and other types of materials. Use of ultrafast lasers for micromachining applications is being driven primarily by the increasing use of consumer electronics and connected devices globally.

Our Lasers customers include Amada Holdings, Ltd., ASML Holding N.V., Beckman Coulter, Inc., Becton, Dickinson and Company, DISCO Corporation, Electro Scientific Industries, Inc., EO Technics Co., Ltd. and KLA-Tencor Corporation.

Table of Contents

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP") as set forth in the Financial Accounting Standards Board's Accounting Standards Codification ("ASC"), and we consider the various staff accounting bulletins and other applicable guidance issued by the United States Securities and Exchange Commission. GAAP, as set forth within the ASC, requires us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results include the following:

• Revenue Recognition

• Inventory Valuation

• Stock-based Compensation

• Goodwill and Intangibles

• Long-lived Asset Valuation

• Restructuring

• Income Taxes

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. Our senior management has reviewed our critical accounting policies and related disclosures with the Audit Committee of the Board of Directors.

During the first quarter of fiscal 2017, there were no significant changes to our critical accounting policies and estimates. Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended July 2, 2016 provides a more complete discussion of our critical accounting policies and estimates.

Recently Issued Accounting Pronouncements

Refer to "Note 2. Recently Issued Accounting Pronouncements" in the Notes to Consolidated Financial Statements.

Table of Contents

RESULTS OF OPERATIONS

The results of operations for the periods presented are not necessarily indicative of results to be expected for future periods. The following table summarizes selected Consolidated Statements of Operations items as a percentage of net revenue:

	Three Months Ended			
	October 1, 2016	September 26, 2015		
Segment net revenue:				
OpComms	84.6	83.3	%	%
Lasers	15.4	16.7		
Net revenue	100.0	100.0		
Cost of sales	67.7	67.7		
Amortization of acquired technologies	0.6	0.8		
Gross profit	31.7	31.5		
Operating expenses:				
Research and development	14.3	16.2		
Selling, general and administrative	9.7	16.0		
Restructuring and related charges	1.1	0.5		
Total operating expenses	25.1	32.6		
Income (loss) from operations	6.5	(1.2))	
Unrealized gain (loss) on derivative liabilities	(8.8)	1.0)	
Interest and other income (expense), net	0.1	*		
Loss before income taxes	(2.2)	(0.2))	
Benefit from income tax	(0.9)	(0.1))	
Net loss	(1.3)	(0.1))%)%

* Amount represents less than 0.1%

Financial Data for the three months ended October 1, 2016 and September 26, 2015

The following table summarizes selected Consolidated Statements of Operations items (in millions, except for percentages):

	Three Months Ended		Change	Percentage Change	
	October 1, 2016	September 26, 2015			
Segment net revenue:					
OpComms	\$218.3	\$ 177.1	\$ 41.2	23.3	%

Selling, general and administrative	25.1	34.0	(8.9)	(26.2))%
Percentage of net revenue	9.7	16.0	%		
Restructuring and related charges	2.9	1.0	1.9	190.0	%
Percentage of net revenue	1.1	0.5	%		

Table of Contents

Net Revenue

Net revenue increased by \$45.5 million, or 21.4%, during the three months ended October 1, 2016 compared to the same period ended September 26, 2015. This increase was primarily due to an increase in net revenue from our OpComms segment. OpComms net revenue increased by \$41.2 million, or 23.3%, during the three months ended October 1, 2016 compared to three months ended September 26, 2015, driven by increased demand from our SuperTransport Blade and 100G Datacom products. Lasers net revenue, driven by higher demand, increased by \$4.3 million, or 12.1%, during the three months ended October 1, 2016 compared to the same period a year ago.

Revenue by Region

We operate in three geographic regions: Americas, Asia-Pacific and EMEA. Net revenue is assigned to the geographic region and country where our product is initially shipped. For example, certain customers may request shipment of our product to a contract manufacturer in one country, but the location of the end customers may differ. The following table presents net revenue by the three geographic regions we operate in and net revenue from countries that represented 10% or more of our total net revenue (in millions, except for percentages):

	Three Months Ended			
	October 1, 2016		September 26, 2015	
Net revenue:				
Americas:				
Mexico	\$39.8	15.4%	\$41.8	19.7%
United States	35.9	13.9	34.5	16.2
Other Americas	4.0	1.5	7.8	3.7
Total Americas	\$79.7	30.8%	\$84.1	39.6%
Asia-Pacific:				
Hong Kong	\$58.3	22.6%	\$30.8	14.5%
Japan	31.3	12.1	25.0	11.8
Other Asia-Pacific	65.4	25.3	40.0	18.8
Total Asia-Pacific	\$155.0	60.0%	\$95.8	45.1%
EMEA	\$23.4	9.2%	\$32.7	15.3%

Total net revenue \$258.1 \$212.6

During the three months ended October 1, 2016 and September 26, 2015, net revenue from customers outside the United States, based on customer shipping location, represented 86.1% and 83.8% of net revenue, respectively. Our net revenue is primarily denominated in U.S. dollars, including our net revenue from customers outside the United States as presented above. We expect revenue from customers outside of the United States to continue to be an important part of our overall net revenue and an increasing focus for net revenue growth opportunities.

Table of Contents

Gross Margin and Segment Gross Margin

The following table summarizes segment gross margin for the three months ended October 1, 2016 and September 26, 2015 (in millions, except for percentages):

	Gross Profit		Gross Margin		
	Three Months Ended		Three Months Ended		
	October 1, 2016	September 26, 2015	October 1, 2016	September 26, 2015	
OpComms	\$71.0	\$ 55.6	32.5%	31.4	%
Lasers	17.2	14.2	43.2%	39.9	%
Segment total	\$88.2	\$ 69.8	34.2%	32.8	%
Unallocated corporate items (1)	(6.5)	(2.9)			
Total	\$81.7	\$ 66.9	31.7%	31.5	%

(1) The unallocated corporate items for the three month periods presented include the effects of amortization of acquired developed technology intangible assets, share-based compensation and certain other charges. We do not allocate these items to the gross margin for each segment because management does not include such information in measuring the performance of the operating segments.

Gross Margin

We sell products in certain markets that are consolidating, undergoing product, architectural and business model transitions, have high customer concentrations, are highly competitive (increasingly due to Asia-Pacific-based competition), are price sensitive and/or are affected by customer seasonal and mix variant buying patterns. We expect these factors to continue to result in variability of our gross margin.

Segment Gross Margin

OpComms

OpComms gross margin during the three months ended October 1, 2016 increased by 1.1 percentage points to 32.5% from 31.4% in the same period a year ago. This increase was primarily due to higher sales volumes of SuperTransport Blade and 100G Datacom products.

Lasers

Lasers gross margin during the three months ended October 1, 2016 increased by 3.3 percentage points to 43.2% from 39.9% in the same period a year ago. This increase was primarily due to higher sales volumes of kW laser products partially offset by increases in warranty related costs.

Research and Development ("R&D")

R&D expense increased by \$2.5 million, or 7.3%, for the three months ended October 1, 2016 compared to the same period a year ago.

The increase in R&D expense was primarily due to increased investment in new R&D programs, the increase in the headcount and the employee compensation expense, including stock-based compensation during the three months ended October 1, 2016.

We believe that continuing our investments in R&D is critical to attaining our strategic objectives. We plan to continue to invest in R&D and new products that we believe will further differentiate us in the marketplace and expect our investment to increase in absolute dollars in future quarters.

Selling, General and Administrative ("SG&A")

SG&A expense decreased by \$8.9 million, or 26.2%, during the three months ended October 1, 2016 compared to the same period ended September 26, 2015. The change was primarily attributed to the reduction of \$5.1 million in corporate allocations from Viavi during the three months ended September 26, 2015, which related to pre-separation costs.

We may experience in the future, certain non-core expenses, such as mergers and acquisitions-related expenses and litigation expenses, which could increase our SG&A expenses and potentially impact our profitability expectations in

any particular quarter.

30

Table of Contents

Restructuring and Related Charges

We have reduced costs through targeted restructuring efforts intended to consolidate our operations, rationalize the manufacturing of our products and align our business in response to market conditions. We estimate annualized cost savings of \$12.9 million as of October 1, 2016, excluding any one-time charge as a result of the restructuring activities described below. Refer to "Note 10. Restructuring and Related Charges" in the Notes to Consolidated Financial Statements.

As of October 1, 2016, our total restructuring accrual was \$5.3 million. During the three months ended October 1, 2016, we recorded \$2.9 million in restructuring and related charges. Of the \$2.9 million charge recorded during the three months ended October 1, 2016, \$0.4 million related to severance, retention and employee benefits. Other restructuring related charges and exit costs include relocation costs, equipment set-up costs, product qualification costs, facilities and equipment costs to vacate facilities and consolidate operations, and lease termination costs. Payments related to the remaining severance and benefits accrual are expected to be paid by the end of fiscal 2017. As of September 26, 2015, our total restructuring accrual was \$5.1 million. During the three months ended September 26, 2015, we recorded \$0.9 million in restructuring charges. These charges are primarily due to a previously announced restructuring plan for our Bloomfield, Connecticut site for severance and benefits. Refer to "Note 10. Restructuring and Related Charges" in the Notes to Consolidated Financial Statements.

Interest and Other Income (Expense), Net

Interest and other income (expense), net is comprised substantially of gains and losses associated with the re-measurement of non-functional currency denominated monetary assets and liabilities, as well as other transactions outside of the normal course of business. The three months ended September 26, 2015 also included an allocation from Viavi of gains and losses on the foreign currency forward contracts utilized in Viavi's balance sheet hedging program.

Interest and other income (expense), net was \$0.2 million during the three months ended October 1, 2016 as compared to \$(0.2) million for the three month period ended September 26, 2015. The \$0.4 million change was primarily due to higher foreign exchange gains for the three months ended October 1, 2016.

Unrealized gain (loss) on derivative liabilities

The changes in the fair value of the bifurcated embedded derivative of \$(22.7) million for the three months ended October 1, 2016 is primarily related to the change in the price of the Company's underlying common stock and is reflected in the consolidated statements of operations as "Unrealized loss on derivative liability".

For further discussion of our derivative liability, see "Note 8. Derivative Liability" in the Notes to Consolidated Financial Statements.

Provision for (Benefit from) Income Taxes

We recorded a benefit for income taxes of \$2.3 million and \$0.3 million for the three months ended October 1, 2016 and September 26, 2015, respectively. The quarterly provision for income taxes is based on the estimated annual effective tax rate, plus any discrete items for the respective year.

The benefit for income taxes for the three months ended October 1, 2016 was primarily due to an increase of profit in jurisdictions with lower tax rates, utilization of U.S. tax attributes that were subject to a full valuation allowance, certain Canadian tax incentives, and a net benefit of \$0.5 million of true-up adjustments in our foreign jurisdictions. The benefit for income taxes for the three months ended September 26, 2015 was primarily attributable to the utilization of U.S. tax attributes that were subject to a full valuation allowance, and certain Canadian tax incentives. For further discussion of our income tax provision, see "Note 11. Income Taxes" in the Notes to Consolidated Financial Statements.

Contractual Obligations

We presented our contractual obligations at July 2, 2016 in our Annual Report on Form 10-K for the fiscal year then ended. There have been no material changes outside the ordinary course of business in those obligations during the

three months ended October 1, 2016, other than as noted under the section entitled "Note 13. Commitments and Contingencies".

31

Table of Contents

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, as such term is defined in rules promulgated by the SEC, that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Financial Condition

Liquidity and Capital Resources

As of October 1, 2016 and July 2, 2016, our cash and cash equivalents of \$166.8 million and \$157.1 million, respectively, were held predominantly in the United States, Cayman Islands, Canada, China and Japan. Although the cash generated in the United States from future operations is expected to cover our normal operating requirements, a substantial amount of additional cash could be required for other purposes, such as capital expenditures to support our business and growth, strategic transactions and partnerships, acquisitions, dividends that may be declared, and future stock repurchase programs. Our intent is to indefinitely reinvest funds held outside the United States and our current plans do not demonstrate a need to repatriate them to fund our domestic operations. However, if in the future, we encounter a significant need for liquidity domestically or at a particular location that we cannot fulfill through borrowings, equity offerings, or other internal or external sources, we may determine that cash repatriations are necessary. Repatriation could result in additional material U.S. federal and state income tax payments in future years. Such adverse consequences would occur, for example, if the transfer of cash into the United States is taxed and no foreign tax credit is available to offset the U.S. tax liability, resulting in higher taxes. These factors may cause us to have an overall tax rate higher than other companies or higher than our tax rates have been in the past.

As of October 1, 2016, our consolidated balance of cash and cash equivalents increased by \$9.7 million, to \$166.8 million from \$157.1 million as of July 2, 2016. The increase in cash and cash equivalents was mainly due to operating activities during the three months ended October 1, 2016.

Operating Cash Flow

Cash provided by operating activities was \$36.3 million during the three months ended October 1, 2016, primarily resulting from \$3.4 million of net loss and \$44.1 million of non-cash items such as depreciation, stock-based compensation, amortization of intangibles and unrealized loss on derivative liability, offset by changes in operating assets and liabilities of \$4.4 million. Changes in our operating assets and liabilities related primarily to a decrease in accounts receivable of \$14.0 million due to an increase in billings as well as the timing of payments from these customers, a decrease in accrued expenses and other current and non-current liabilities of \$1.6 million is due to the timing of invoices and payments to vendors, offset by an increase in accounts payable of \$14.2 million related to the growth in our business, an increase in inventories of \$3.0 million, and an increase in income tax payable of \$1.3 million.

Cash provided by operating activities was \$10.6 million during the three months ended September 26, 2015, primarily resulting from \$0.2 million of net loss and \$17.5 million of non-cash items such as depreciation, stock-based compensation, amortization of intangibles and unrealized gain on derivative liability, partially offset by changes in operating assets and liabilities of \$6.7 million. Changes in our operating assets and liabilities related primarily to a decrease in accounts receivable of \$8.6 million, an increase in deferred taxes of \$0.2 million, a decrease in prepayments other current and non-currents assets of \$6.4 million, an increase in accounts payable of \$8.3 million, a decrease in inventories of \$5.4 million, and an increase in accrued payroll and related expenses, accrued expenses and other current and non-current liabilities of \$5.2 million.

Investing Cash Flow

Cash used in investing activities was for capital expenditures of \$28.9 million and \$13.9 million during the three months ended October 1, 2016 and September 26, 2015, respectively.

Financing Cash Flow

Cash provided by financing activities was \$2.3 million during the three months ended October 1, 2016 resulting primarily from proceeds of stock option exercises.

Cash provided by financing activities was \$130.7 million during the three months ended September 26, 2015 resulting primarily from net transfers from Viavi.

Liquidity and Capital Resources Requirement

We expect our primary liquidity and capital spending requirements over at least the next 12 months to be the funding of our operating activities and capital expenditures. We believe that our cash and cash equivalents as of October 1, 2016, and cash flows

32

Table of Contents

from our operating activities will be sufficient to meet our liquidity and capital spending requirements for at least the next 12 months. However, if market conditions are favorable, we may evaluate alternatives to opportunistically pursue liquidity options.

There are a number of factors that could positively or negatively impact our liquidity position, including:

• global economic conditions which affect demand for our products and services and impact the financial stability of our suppliers and customers;

• changes in accounts receivable, inventory or other operating assets and liabilities which affect our working capital;

• increase in capital expenditures to support our business and growth;

• the tendency of customers to delay payments or to negotiate favorable payment terms to manage their own liquidity positions;

• timing of payments to our suppliers;

• factoring or sale of accounts receivable;

• volatility in fixed income and credit which impact the liquidity and valuation of our investment portfolios;

• volatility in foreign exchange markets which impacts our financial results;

• possible investments or acquisitions of complementary businesses, products or technologies, or other strategic transactions or partnerships;

• issuance of debt or equity securities, or other financing transactions, including bank debt; and

• potential funding of pension liabilities either voluntarily or as required by law or regulation.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Exchange Risk

We conduct our business and sell our products to customers primarily in Asia, Europe, and North America. In the normal course of business, our financial position is routinely subject to market risks associated with foreign currency rate fluctuations due to balance sheet positions in foreign currencies which is mainly due to cash held in banks. As of October 1, 2016, our foreign denominated cash was principally in the following currencies: Japanese Yen, Chinese Yuan and Canadian Dollar. Due to the impact of changes in foreign currency exchange rates between the U.S. Dollar and these other currencies, for the three months ended October 1, 2016 and September 26, 2015, we recorded unrealized gain (loss) of \$0.2 million and \$(0.5) million, respectively, in the interest and other income (expense), net in the Consolidated Statements of Operations included in this Form 10-Q. If the exchange rate between the U.S. Dollar and Japanese Yen, Chinese Yuan and Canadian Dollar had increased or decreased by 10%, our local currency expenses would have increased or decreased by \$1.4 million during the three months ended October 1, 2016.

Equity Price Risk

We are exposed to equity price risk related to the conversion option embedded in our Series A preferred stock. Our Series A Preferred Stock is convertible, at the option of the holder, into shares of our common stock commencing on the second anniversary of the closing of the securities purchase (absent a change of control of us or similar event) using a conversion price of \$24.63. This conversion feature is bifurcated from the Series A Preferred Stock and accounted for separately as a derivative liability. On a quarterly basis, the derivative liability is marked to market based on the fair value of the conversion feature, with the resulting income or loss recorded as unrealized loss on derivative liability on our consolidated statements of operations. The determination of fair value includes various inputs, including volatility and interest rate assumptions (see "Note 8. Derivative Liability"). However, the change in the fair value of our common stock has the largest impact to the fair value of the derivative. Based on a hypothetical \$10.00 per share increase in the fair value of our common stock, our net loss would be increased by approximately \$14.1 million.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

(a) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our management (with the participation of our Principal Executive Officer and Principal Financial Officer), as of the end of the period covered by this Quarterly Report, evaluated the effectiveness of our disclosure controls and procedures. Based on this evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our “disclosure controls and procedures” (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms and is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosure.

(b) CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in our internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) and 15d-15(f) that occurred during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(c) INHERENT LIMITATIONS ON EFFECTIVENESS OF CONTROLS

Our management, including the CEO and CFO, recognizes that our disclosure controls and procedures or our internal control over financial reporting cannot prevent or detect all possible instances of errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs.

Table of Contents

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to a variety of claims and suits that arise from time to time in the ordinary course of our business. While management currently believes that resolving claims against us, individually or in the aggregate, will not have a material adverse impact on our financial position, results of operations or cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future. Were an unfavorable final outcome to occur, there exists the possibility of a material adverse impact on our financial position, results of operations or cash flows for the period in which the effect becomes reasonably estimable.

ITEM 1A. RISK FACTORS

Investors in our securities should carefully consider all of the relevant factors disclosed by us, including the following factors that could affect our results of operations, financial condition or stock price. The risk factors generally have been separated into three groups: risks related to our business, risks related to the Separation and risks related to our common stock.

Risks Related to Our Business

Changing technology and intense competition require us to continuously innovate while controlling product costs, and our failure to do so may result in decreased revenues and profitability.

The markets in which we operate are dynamic and complex, and our success depends upon our ability to deliver both our current product offerings and new products and technologies on time and at acceptable prices to our customers. The markets for our products are characterized by rapid technological change, frequent new product introductions, substantial capital investment, changes in customer requirements, continued price pressures and a constantly evolving industry. Our future performance will depend on the successful development, introduction and market acceptance of new and enhanced features and products that address these issues and provide solutions that meet our customers' current and future needs.

The market for optical communications products in particular has matured over time and these products have increasingly become subject to commoditization. Both legacy competitors as well as new entrants, predominantly Asia-based competitors, have intensified market competition in recent years leading to pricing pressure. To preserve our revenues and product margin structures, we will remain reliant on an integrated customer and market approach that anticipates end customer needs as Telecom and Datacom requirements evolve. We also must continue to develop more advanced, differentiated products that command a premium with customers, while conversely continuing to focus on streamlining product costs for established legacy products. If we fail to continue to develop enhanced or new products, or over time are unable to adjust our cost structure to continue to competitively price more mature technologies, our financial condition and results of operations could be materially and adversely affected. Continued competition in our markets may lead to an accelerated reduction in our prices, revenues and market share. The end markets for optical products have experienced significant industry consolidation during the past few years. As a result, the markets for optical subsystems and components are highly competitive. Our current competitors include a number of domestic and international companies, many of which have substantially greater financial, technical, marketing and distribution resources and brand name recognition than we have. These competitors include II-VI Incorporated, Acacia Communications, Inc., Applied Optoelectronics, Inc., Coherent, Inc., Finisar Corporation, Fujitsu Optical Components, Furukawa Electric Co., Ltd., InnoLight Technology Corporation, IPG Photonics Corporation, Neophotonics Corporation, Newport Corporation acquired by MKS Instruments, Oclaro, Inc., Rofin-Sinar Technologies Inc. and Sumitomo Electric Industries, Ltd. We may not be able to compete successfully against either current or future competitors. Our competitors may continue to enter markets or gain or retain market share through aggressive low pricing strategies that may impact the efficacy of our approach. Additionally, if significant competitors were to merge or consolidate, they may be able to offer a lower cost structure through economies of scale that we may be unable to match. For example, Coherent and Rofin-Sinar have announced that they have entered into an agreement for the acquisition of Rofin-Sinar by Coherent. The acquisition may intensify

competition in the Lasers market. Increased competition could result in significant price erosion, reduced revenue, lower margins or loss of market share, any of which would significantly harm our business.

The manufacture of our products may be adversely affected if our contract manufacturers and suppliers fail to meet our production requirements or if we are unable to manufacture certain products in our manufacturing facilities.

We rely on several independent contract manufacturers to supply us with certain products. For many products, a particular contract manufacturer may be the sole source of the finished-good products. We depend on these manufacturers to meet our

Table of Contents

production requirements and to provide quality products to our customers. Despite rigorous testing for quality, both by us and our customers, we may receive and ship defective products. We may incur significant costs to correct defective products which could include harm to our reputation and result in the loss of future sales, result in indemnification costs or costs to replace or repair the defective products, litigation and damage to our reputation and customer relations. Defective products may also cause diversion of management attention from our business and product development efforts. Additionally, the ability of our contract manufacturers to fulfill their obligations may be affected by natural disasters or economic, political or other forces that are beyond our control. Any such failure could have a material impact on our ability to meet our customers' expectations and may materially impact our operating results. In addition, some of our purchase commitments with contract manufacturers are not cancellable which may impact our earnings if customer forecasts driving these purchase commitments do not materialize and we are unable to sell the products to other customers. Alternatively, our contract manufacturers may not be able to meet our demand which would inhibit our ability to meet customer demand and maintain or grow our revenues. Furthermore, it could be costly and require a long period of time to move products from one contract manufacturer to another which could result in interruptions in supply and adversely impact our financial condition and results of operations.

We manufacture some of the components that we provide to our contract manufacturers, along with our own finished goods, in our Bloomfield, Connecticut (which we have announced will be closing) and San Jose, California manufacturing facilities. For some of the components and finished good products we are the sole manufacturer. Our manufacturing processes are highly complex and issues are often difficult to detect and correct. From time to time we have experienced problems achieving acceptable yields in our manufacturing facilities, resulting in delays in the availability of our products. In addition, if we experience problems with our manufacturing facilities, it would be costly and require a long period of time to move the manufacture of these components and finished good products to a different facility or contract manufacturer which could then result in interruptions in supply, and would likely materially impact our financial condition and results of operations.

In addition, the closing of our Bloomfield, Connecticut manufacturing facility will require the transfer to other manufacturing sites of complex technologies and processes. If we are unable to transfer the technology and processes for the products we currently manufacture in the Bloomfield facility in a timely manner, it could result in interruptions in supply and would likely impact our financial condition and results of operations.

Changes in manufacturing processes are often required due to changes in product specifications, changing customer needs and the introduction of new products. These changes may reduce manufacturing yields at our contract manufacturers and at our own manufacturing facilities resulting in reduced margins on those products.

We depend on a limited number of suppliers for raw materials, packages and components, and any failure or delay by these suppliers in meeting our requirements could have an adverse effect on our business and results of operations.

We are dependent on a limited number of suppliers, who are often small and specialized, for raw materials, packages and standard components. Our business and results of operations have been, and could continue to be, adversely affected by this dependency. Specific concerns we periodically encounter with our suppliers include stoppages or delays of supply, insufficient resources to supply our requirements, substitution of more expensive or less reliable materials, receipt of defective parts or contaminated materials, increases in the price of supplies, and an inability to obtain reduced pricing from our suppliers in response to competitive pressures. Any disruption in the supply of the raw materials, packaging or components used in the manufacture and delivery of our products could have a material adverse impact on our business, financial condition and results of operations.

We rely on a limited number of customers for a significant portion of our sales; and the majority of our customers do not have contractual purchase commitments.

We have consistently relied on a small number of customers for a significant portion of our sales (please refer to "Note 14. Operating Segments and Geographic Information" in the Notes to Consolidated Financial Statements) and we expect that this customer concentration will continue in the future. The majority of our customers purchase products under purchase orders or under contracts that do not contain volume purchase commitments. Changes in the business requirements, vendor selection, project prioritization, financial prospects, capital resources, and expenditures, or purchasing behavior (including product mix purchased) of our key customers, or any real or perceived quality issues related to the products that we sell to such customers, could significantly decrease our sales to such customers or

could lead to delays or cancellations of planned purchases of our products or services, which increases the risk of quarterly fluctuations in our revenues and operating results. If forecasted orders do not materialize, we may need to reduce investment in R&D activities, we may fail to optimize our manufacturing capacity, or we may have excess inventory. Any of these factors could adversely affect our business, financial condition and results of operations. We contract with a number of large OEM and end-user service providers that have considerable bargaining power, which may require us to agree to terms and conditions that could have an adverse effect on our business or ability to recognize revenues.

Table of Contents

Large OEM and end-user service providers comprise a significant portion of our customer base. These customers generally have greater purchasing power than smaller entities and, accordingly, often request and receive more favorable terms from suppliers. As we seek to expand our sales to existing customers and acquire new customers, we may be required to agree to terms and conditions that are favorable to our customers and that may affect the timing of our ability to recognize revenue, increase our costs and have an adverse effect on our business, financial condition, and results of operations. Furthermore, consolidation among such large customers can further increase their buying power and ability to require onerous terms. Additionally, the terms these large customers require, such as most-favored nation or exclusivity provisions, may impact our ability to do business with other customers and generate revenues from such customers.

Our products may contain defects that may cause us to incur significant costs, divert our attention from product development efforts and result in a loss of customers.

Our products are complex and defects may be found from time to time. Networking products in particular frequently contain undetected software or hardware defects when first introduced or as new versions are released. In addition, our products are often embedded in or deployed in conjunction with our customers' products which incorporate a variety of components produced by third parties. As a result, when problems occur, it may be difficult to identify the source of the problem. These problems may cause us to incur significant damages or warranty and repair costs, divert the attention of our engineering personnel from our product development efforts and cause significant customer relation problems or loss of customers, all of which would harm our business.

We expect to change our international corporate structure in the near future in order to minimize our effective tax rate; however, if we are unable to adopt this structure or if it is challenged by U.S. or foreign tax authorities, we may be unable to realize such tax savings which could materially and adversely affect our operating results.

We have taken certain preliminary steps to implement an international corporate structure more closely aligned with our international operations. This potential corporate structure is intended to reduce our overall effective tax rate through changes among our wholly-owned subsidiaries in how we use our intellectual property, and how we structure our international procurement and sales operations. The contemplated structure includes legal entities located in jurisdictions with income tax rates lower than the U.S. statutory tax rate. Such intercompany arrangements would be designed to result in income earned by such entities in accordance with arm's-length principles and commensurate with functions performed, risks assumed and ownership of valuable corporate assets. We believe that income taxed in certain foreign jurisdictions at a lower rate relative to the U.S. statutory rate will have a beneficial impact on our worldwide effective tax rate over the medium to long term.

We have agreed to reimburse Viavi for certain tax liabilities and related costs that may be incurred by Viavi, following application of net operating losses by Viavi, in the event that we implement this revised corporate structure. In addition, the implementation of such a structure has required us to incur expenses, and may require that we incur additional expenses, for which we may not realize related benefits, and in any event, we do not expect to materially realize such benefits for several years .

If we put the intended structure into effect and it is not accepted by the applicable taxing authorities, if changes in domestic and international tax laws negatively impact the proposed structure, including proposed legislation to reform U.S. taxation of international business activities, or if we do not operate our business consistent with the proposed structure and applicable tax provisions, we may fail to achieve the financial and operational efficiencies that we anticipate as a result of the proposed structure, and our business, financial condition and operating results may be materially and adversely affected.

We are subject to risks arising from our international operations, which may adversely affect our business, financial condition, and results of operations.

We derive a majority of our revenue from our international operations, and we plan to continue expanding our business in international markets in the future. In addition, we have extensive international manufacturing capabilities through third-party contract manufacturers, as well as through our own international facilities, with employees engaged in R&D, administration, manufacturing, support and sales and marketing activities.

As a result of our international operations, we are affected by economic, business regulatory, social, and political conditions in foreign countries, including the following:

- changes in general IT spending;
- the imposition of government controls, inclusive of critical infrastructure protection;
- changes or limitations in trade protection laws or other regulatory requirements, which may affect our ability to import or export our products from various countries;
- varying and potentially conflicting laws and regulations;

38

Table of Contents

- fluctuations in local economies;
- wage inflation or a tightening of the labor market
- international political developments, such as Great Britain's recent vote to exit from the European Union; and the impact of the following on service provider and government spending patterns: political considerations, unfavorable changes in tax treaties or laws, natural disasters, epidemic disease, labor unrest, earnings expatriation restrictions, misappropriation of intellectual property, military actions, acts of terrorism, political and social unrest and difficulties in staffing and managing international operations.

Any or all of these factors could have a material adverse impact on our business, financial condition, and results of operations.

Moreover, local laws and customs in many countries differ significantly from or conflict with those in the United States or other countries in which we operate. In many foreign countries, particularly in those with developing economies, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or U.S. regulations applicable to us. There can be no assurance that our employees, contractors, channel partners, and agents will not take actions in violation of our policies and procedures, which are designed to ensure compliance with U.S. and foreign laws and policies. Violations of laws or key control policies by our employees, contractors, channel partners, or agents could result in termination of our relationship, financial reporting problems, fines and/or penalties for us, or prohibition on the importation or exportation of our products, and could have a material adverse effect on our business, financial condition and results of operations.

Our operating results may be subject to volatility due to fluctuations in foreign currency.

We are exposed to foreign exchange risks with regard to our operating expenses which may affect our operating results. Although we price our products primarily in U.S. dollars, a portion of our operating expenses are incurred in foreign currencies. If the value of the U.S. dollar depreciates relative to certain other foreign currencies, it would increase our costs as expressed in U.S. dollars. Conversely, if the U.S. dollar strengthens relative to other currencies, such strengthening could raise the relative cost of our products to non-U.S. customers, especially as compared to foreign competitors, and could reduce demand.

We intend to engage in currency hedging transactions to reduce our foreign exchange exposure. However, these transactions may not fully eliminate our risk and could have an adverse effect on our financial condition.

We are subject to continued changes in tax laws; the possible fluctuation of our effective tax rate over time could materially and adversely affect our operating results.

We are subject to taxes in the United States and numerous international jurisdictions. We record tax expense based on current tax payments and our estimates of future tax payments, which may include reserves for estimates of probable settlements of international and domestic tax audits. At any one time, multiple tax years and jurisdictions are subject to audit by various taxing authorities. The results of these audits and negotiations with taxing authorities may affect the ultimate settlement of these issues. As a result, there could be ongoing variability in our tax rates as taxable events occur and uncertain tax positions are re-evaluated or resolved.

Tax policy reform continues to be a topic of discussion in the United States and in the foreign jurisdictions in which we may conduct business. A significant change to the tax system in the United States or other foreign jurisdictions, including changes to the taxation of international income, could have a material adverse effect on our results of operations. Our effective tax rate in a given financial statements period may be materially impacted by changes in tax laws, changes in the mix and level of earnings by taxing jurisdiction, changes to existing accounting rules or regulations or by changes to our ownership or capital structures. Fluctuations in our tax obligations and effective tax rate could materially and adversely affect our results of business, financial condition and operating results.

Our ability to develop, market, and sell products could be harmed if we are unable to retain or hire key personnel. Our future success depends upon our ability to recruit and retain the services of executive, engineering, sales and marketing, and support personnel. The supply of highly qualified individuals, in particular engineers in very specialized technical areas, or sales people specializing in the service provider, enterprise and commercial laser markets, is limited and competition for such individuals is intense. None of our officers or key employees is bound by an employment agreement for any specific term. The loss of the services of any of our key employees, the inability to attract or retain personnel in the future or delays in hiring required personnel and the complexity and time involved in

replacing or training new employees, could delay the development and introduction of new products, and negatively impact our ability to market, sell, or support our products.

We face a number of risks related to our strategic transactions.

Table of Contents

We have made acquisitions of other businesses or technologies, including, most recently, Time-Bandwidth in January 2014, and we will continue to review acquisition opportunities. Such strategic transactions involve numerous risks, including the following:

- diversion of management's attention from normal daily operations of the business;
- unforeseen expenses, delays or conditions imposed upon the acquisition, including due to required regulatory approvals or consents;
- unanticipated changes in the combined business due to potential divestitures or other requirements imposed by antitrust regulators;
- the ability to retain and obtain required regulatory approvals, licenses and permits;
- difficulties and costs in integrating the operations, technologies, products, IT and other systems, facilities and personnel of the purchased businesses;
- potential difficulties in completing projects associated with in-process R&D;
- an acquisition may not further our business strategy as we expected or we may overpay for, or otherwise not realize the expected return on, our investments;
- insufficient net revenue to offset increased expenses associated with acquisitions;
- potential loss of key employees of the acquired companies;
- difficulty forecasting revenues and margins;
- dilution of our current stockholders as a result of any issuance of equity securities as acquisition consideration;
- expenditure of cash that would otherwise be available to operate our business; and
- incurrence of indebtedness on terms that are unfavorable to us or that we are unable to repay.

If we are unable to successfully manage any of these risks in relation to any future acquisitions, our business, financial condition and results of operations could be adversely impacted.

We may require additional capital to support business growth, and this capital might not be available on acceptable terms, if at all.

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges, including to support product development and introduce new products, address new markets, engage in strategic transactions and partnerships, improve or expand our operating infrastructure or acquire complementary businesses and technologies. Accordingly, we may engage in equity or debt financings to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. Any debt financing we secure in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. We may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business may be harmed.

Our business and operations would be adversely impacted in the event of a failure of our information technology infrastructure.

We rely upon the capacity, reliability and security of our information technology infrastructure and our ability to expand and continually update this infrastructure in response to our changing needs. In some cases, we may rely upon third-party providers of hosting, support and other services to meet these needs. Any failure to manage, expand and update our information technology infrastructure, including our Enterprise Resource Planning ("ERP") system and other applications, any failure in the extension implementation or operation of this infrastructure, or any failure by our hosting and support partners or other third-party service providers in the performance of their services could materially and adversely harm our business. Despite our implementation of security measures, our systems and those of our third-party service providers are vulnerable to damage from computer viruses,

Table of Contents

natural disasters, unauthorized access and other similar disruptions. Any system failure, accident or security breach affecting us or our third-party providers could result in disruptions to our operations and loss of or unauthorized access or damage to our data or in inappropriate disclosure of confidential information. Any actual or alleged disruption to, or security breach affecting, our systems or those of our third-party partners could cause significant damage to our reputation, result in legal obligations or liability, affect our relationships with our customers, and ultimately harm our business. In addition, we may be required to incur significant costs to protect against or mitigate damage caused by these disruptions or security breaches in the future.

Our operating results may be adversely affected by unfavorable economic and market conditions.

The uncertain state of the global economy has contributed and continues to contribute to decreases in demand and spending in the technology industry at large, as well as to the specific markets in which we operate. The slow pace of global economic recovery and the resulting effects on global credit markets has created uncertainty in the timing and overall demand from our customers. In addition, Great Britain's recent vote to exit from the European Union has created economic uncertainty in Europe and the global financial markets. This uncertainty may lead to decreased demand for our products and revenue fluctuations, increased price competition for our products, and may increase the risk of excess and obsolete inventories and higher overhead costs as a percentage of revenue. The impact of continued economic challenges on the global financial markets could further negatively impact our operations by affecting the solvency of our customers, the solvency of our key suppliers or the ability of our customers to obtain credit to finance purchases of our products. If economic conditions do not improve or if they deteriorate, our financial condition and results of operations would likely be materially and adversely impacted.

Our business and operations may be adversely affected if we fail to adequately implement and maintain our information management systems.

Our business depends significantly on effective and efficient information systems. The information gathered and processed by our information management systems assists us in managing our supply chain and monitoring customer accounts, among other things. We have partnered with third parties to support our information technology systems and to help design, build, test, implement and maintain our information management systems. Our merger, acquisition and divestiture activity may also require transitions to or from, and the integration of, various information management systems within our overall enterprise architecture.

In 2015, we implemented a third-party information management system across our worldwide operations. Any disruptions resulting from the transition to this system or any failure in the operation or performance of this system could adversely affect our internal and disclosure controls and harm our business, including our ability to forecast or make sales, manage our supply chain and coordinate production. Moreover, such a disruption could result in unanticipated costs or expenditures and a diversion of management's attention and resources.

If we have insufficient proprietary rights or if we fail to protect our rights, our business would be materially harmed. We seek to protect our products and product roadmaps in part by developing and/or securing proprietary rights relating to those products, including patents, trade secrets, know-how and continuing technological innovation. The steps we take to protect our intellectual property may not adequately prevent misappropriation or ensure that others will not develop competitive technologies or products. Other companies may be investigating or developing technologies that are similar to our own. It is possible that patents may not be issued from any of our pending applications or those we may file in the future and, if patents are issued, the claims allowed may not be sufficiently broad to deter or prohibit others from making, using or selling products that are similar to ours, or such patents could be invalidated or ruled unenforceable. We do not own patents in every country in which we sell or distribute our products, and thus others may be able to offer identical products in countries where we do not have intellectual property protections. In addition, the laws of some territories in which our products are or may be developed, manufactured or sold, including Europe, Asia-Pacific or Latin America, may not protect our products and intellectual property rights to the same extent as the laws of the United States. Any patents issued to us may be challenged, invalidated or circumvented. Additionally, we are currently a licensee for a number of third-party technologies including software and intellectual property rights from academic institutions, our competitors and others, and we are required to pay royalties to these licensors for the use thereof. In the future, if such licenses are unavailable or if we are unable to obtain such licenses on commercially reasonable terms, we may not be able to rely on such third-party

technologies which could inhibit our development of new products, impede the sale of some of our current products, substantially increase the cost to provide these products to our customers, and could have a significant adverse impact on our operating results.

We also seek to protect our important trademarks by endeavoring to register them in certain countries. We have not registered our trademarks in every country in which we sell or distribute our products, and thus others may be able to use the same or confusingly similar marks in countries where we do not have trademark registrations. We have adopted Lumentum as a house trademark and trade name for our company, and are in the process of establishing rights in this name and brand. We have also adopted the Lumentum logo as a house trademark for our company, and are in the process of establishing rights in this brand. The Lumentum brand is the subject of trademark applications in the United States or other jurisdictions, but the trademarks have not

Table of Contents

yet proceeded to registration. The efforts we take to register and protect trademarks, including the Lumentum brand, may not be sufficient or effective. Although we will seek to obtain trademark registrations for the Lumentum brand, it is possible we may not be able to protect our brand through registration in one or more jurisdictions, for example, the applicable governmental authorities may not approve the registration. Furthermore, even if the applications are approved, third parties may seek to oppose or otherwise challenge registration. There is the possibility that, despite efforts, the scope of the protection obtained for our trademarks, including the Lumentum brand, will be insufficient or that a registration may be deemed invalid or unenforceable in one or more jurisdictions throughout the world. Our products may be subject to claims that they infringe the intellectual property rights of others, the resolution of which may be time-consuming and expensive, as well as require a significant amount of resources to prosecute, defend, or make our products non-infringing.

Lawsuits and allegations of patent infringement and violation of other intellectual property rights occur regularly in our industry. We have in the past received, and anticipate that we will receive in the future, notices from third parties claiming that our products infringe upon their proprietary rights, with two distinct sources of such claims becoming increasingly prevalent. First, large technology companies, including some of our customers and competitors, are seeking to monetize their patent portfolios and have developed large internal organizations that may approach us with demands to enter into license agreements. Second, patent-holding companies that do not make or sell products (often referred to as “patent trolls”) may claim that our products infringe upon their proprietary rights. We respond to these claims in the course of our business operations. The litigation or settlement of these matters, regardless of the merit of the claims, could result in significant expense and divert the efforts of our technical and management personnel, regardless of whether or not we are successful. If we are unsuccessful, we could be required to expend significant resources to develop non-infringing technology or to obtain licenses to the technology that is the subject of the litigation. We may not be successful in such development, or such licenses may not be available on commercially reasonable terms, or at all. Without such a license, or if we are the subject of an exclusionary order, our ability to make our products could be limited and we could be enjoined from future sales of the infringing product or products, which could adversely affect our revenues and operating results. Additionally, we often indemnify our customers against claims of infringement related to our products and may incur significant expenses to defend against such claims. If we are unsuccessful defending against such claims, we may be required to indemnify our customers against any damages awarded.

We also face risks that third parties may assert trademark infringement claims against us in one or more jurisdictions throughout the world related to our Lumentum brand and/or other trademarks. The litigation or settlement of these matters, regardless of the merit of the claims, could result in significant expense and divert the efforts of our technical and management personnel, regardless of whether or not we are successful. If we are unsuccessful, trademark infringement claims against us could result in significant monetary liability or prevent us from selling some or all of our products or services under the challenged trademark. In addition, resolution of claims may require us to alter our products, labels or packaging, license rights from third parties, or cease using the challenged trademark altogether, which could adversely affect our revenues and operating results.

We face certain litigation risks that could harm our business.

From time to time we have been, and in the future we may become, subject to various legal proceedings and claims that arise in or outside the ordinary course of business. The results of legal proceedings are difficult to predict. Moreover, many of the complaints filed against us may not specify the amount of damages that plaintiffs seek, and we therefore may be unable to estimate the possible range of damages that might be incurred should these lawsuits be resolved against us. While we may be unable to estimate the potential damages arising from such lawsuits, certain of them assert types of claims that, if resolved against us, could give rise to substantial damages. Thus, an unfavorable outcome or settlement of one or more of these lawsuits could have a material adverse effect on our financial condition, liquidity and results of operations. Even if these lawsuits are not resolved against us, the uncertainty and expense associated with unresolved lawsuits could seriously harm our business, financial condition and reputation. Litigation is costly, time-consuming and disruptive to normal business operations. The costs of defending these lawsuits have been significant in the past, will continue to be costly and may not be covered by our insurance policies. The defense of these lawsuits could also result in continued diversion of our management’s time and attention away from business

operations, which could harm our business. For additional discussion regarding litigation, see “Part II, Item 1. Legal Proceedings.”

Our products incorporate and rely upon licensed third-party technology, and if licenses of third-party technology do not continue to be available to us or are not available on terms acceptable to us, our revenues and ability to develop and introduce new products could be adversely affected.

We integrate licensed third-party technology into certain of our products. From time to time, we may be required to license additional technology from third-parties to develop new products or product enhancements. Third-party licenses may not be available or continue to be available to us on commercially reasonable terms. The failure to comply with the terms of any license, including free open source software, may result in our inability to continue to use such license. Our inability to maintain or re-license any third-party licenses required in our products or our inability to obtain third-party licenses necessary to develop new

Table of Contents

products and product enhancements, could potentially require us to develop substitute technology or obtain substitute technology of lower quality or performance standards or at a greater cost, any of which could delay or prevent product shipment and harm our business, financial condition, and results of operations.

We are subject to laws and other regulations worldwide including with respect to environmental matters, securities laws, privacy and personal data collection compliance with which could increase our expenses and harm our operating results.

Our operations and our products are subject to various federal, state and foreign laws and regulations, including those governing pollution and protection of human health and the environment in the jurisdictions in which we operate or sell our products. These laws and regulations govern, among other things, wastewater discharges and the handling and disposal of hazardous materials in our products. Our failure to comply with current and future environmental or health or safety requirements could cause us to incur substantial costs, including significant capital expenditures, to comply with such environmental laws and regulations and to clean up contaminated properties that we own or operate. Such clean-up or compliance obligations could result in disruptions to our operations. Additionally, if we are found to be in violation of these laws, we could be subject to governmental fines or civil liability for damages resulting from such violations. These costs could have a material adverse impact on our financial condition or operating results.

From time to time new regulations are enacted, and it is difficult to anticipate how such regulations will be implemented and enforced. We continue to evaluate the necessary steps for compliance with regulations as they are enacted. These regulations include, for example, the Registration, Evaluation, Authorization and Restriction of Chemicals (“REACH”), the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Directive (“RoHS”) and the Waste Electrical and Electronic Equipment Directive (“WEEE”) enacted in the European Union which regulate the use of certain hazardous substances in, and require the collection, reuse and recycling of waste from, certain products we manufacture. These regulations and similar legislation may require us to re-design our products to ensure compliance with the applicable standards, for example by requiring the use of different types of materials, which could have an adverse impact on the performance of our products, add greater testing lead-times for product introductions or other similar effects. We believe we comply with all such legislation where our products are sold and we continuously monitor these laws and the regulations being adopted under them to determine our responsibilities.

In addition, pursuant to Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, the SEC has promulgated rules requiring disclosure regarding the use of certain “conflict minerals” that are mined from the Democratic Republic of Congo and adjoining countries and procedures regarding a manufacturer’s efforts to prevent the sourcing of such minerals. Complying with these disclosure requirements involves substantial diligence efforts to determine the source of any conflict minerals used in our products and may require third-party auditing of our diligence process. These efforts may demand internal resources that would otherwise be directed towards operations activities.

Since our supply chain is complex, we may face reputational challenges if we are unable to sufficiently verify the origins of the conflict minerals used in our products. Additionally, if we are unable to satisfy those customers who require that all of the components of our products are determined to be conflict free, they may choose a competitor’s products which could materially impact our financial condition and operating results.

Additionally, we are subject to laws and regulations with respect to personal data we collect from our employees, customers, and others. These laws and regulations are subject to frequent modifications and updates and require ongoing supervision. For example, the European Union recently adopted a General Data Protection Regulation, effective in May 2018, that will establish new, and in some cases more stringent, requirements for data protection in Europe. We may be required to modify our practices in order to comply with these or other requirements, which may require us to incur costs and expenses, and we may face difficulties in complying with all privacy and data protection legal requirements that apply to us now or in the future.

Our failure to comply with any of the foregoing legal and regulatory requirements could result in increased costs for our products, monetary penalties, damages to our reputation, government inquiries and investigations, and legal action. Furthermore, the legal and regulatory requirements that are applicable to our business are subject to change from time to time, which increases our monitoring and compliance costs and the risk that we may fall out of

compliance. Additionally, we may be required to ensure that our suppliers comply with such laws and regulations. If we or our suppliers fail to comply with such laws or regulations, we could face sanctions for such noncompliance, and our customers may refuse to purchase our products, which would have a material adverse effect on our business, financial condition and results of operations.

Our sales may decline if we are unable to obtain government authorization to export certain of our products, and we may be subject to legal and regulatory consequences if we do not comply with applicable export control laws and regulations.

Exports of certain of our products are subject to export controls imposed by the U.S. government and administered by the U.S. Departments of State and Commerce. In certain instances, these regulations may require pre-shipment authorization from the administering department. For products subject to the Export Administration Regulations (“EAR”) administered by the Department

Table of Contents

of Commerce's Bureau of Industry and Security, the requirement for a license is dependent on the type and end use of the product, the final destination, the identity of the end user and whether a license exception might apply. Virtually all exports of products subject to the International Traffic in Arms Regulations ("ITAR") administered by the Department of State's Directorate of Defense Trade Controls, require a license. Certain of our fiber optics products are subject to EAR and certain of our RF-over-fiber products, as well as certain products and technical data, are developed with government funding, are currently subject to ITAR. Products and the associated technical data developed and manufactured in our foreign locations are subject to export controls of the applicable foreign nation.

Given the current global political climate, obtaining export licenses can be difficult and time-consuming. Failure to obtain export licenses for these shipments could significantly reduce our revenue and materially adversely affect our business, financial condition and results of operations. Compliance with U.S. Government regulations also subjects us to additional fees and costs. The absence of comparable restrictions on competitors in other countries may adversely affect our competitive position.

Our revenues, operating results, and cash flows may fluctuate from period to period due to a number of factors, which makes predicting financial results difficult.

Spending on optical communication and laser products is subject to cyclical and uneven fluctuations, which could cause our financial results to fluctuate unevenly and unpredictably. It can be difficult to predict the degree to which end-customer demand and the seasonality and uneven sales patterns of our OEM partners or other customers will affect our business in the future, particularly as we release new or enhanced products. While our fourth fiscal quarters are typically strongest, future buying patterns may differ from historical seasonality. If the mix of revenue changes, it may also cause results to differ from historical seasonality. Accordingly, our quarterly and annual revenues, operating results, cash flows, and other financial and operating metrics may vary significantly in the future, and the results of any prior periods should not be relied upon as an indication of future performance.

Risks Related to the Separation and Our Operation as an Independent Public Company

We have a limited history of operating as an independent company, and our pre-Separation financial information is not necessarily representative of the results that we would have achieved as a separate, publicly traded company and may not be a reliable indicator of our future results.

The historical information in this Quarterly Report on Form 10-Q refers in part to our business as operated by and integrated with Viavi. Our historical financial information through July 31, 2015 included in this Quarterly Report on Form 10-Q is derived from the consolidated financial statements and accounting records of Viavi. Accordingly, such historical financial information does not necessarily reflect the financial condition, results of operations or cash flows that we would have achieved as a separate, publicly traded company during the periods presented or those that we will achieve in the future primarily as a result of the factors described below.

Prior to the Separation, our business was operated by Viavi as part of its broader corporate organization, rather than as an independent company. Viavi or one of its affiliates performed various corporate functions for our business such as legal, treasury, accounting, auditing, human resources, finance and other corporate functions. Our historical financial results reflect allocations of corporate expenses from Viavi for such functions, which are likely to be less than our actual operating expenses for these functions following the Separation.

Our business was integrated with the other businesses of Viavi. Historically, we shared economies of scale in costs, employees, vendor and customer relationships. We will need to enter into new arrangements with certain vendors which may result in us paying higher charges than in the past for these services. This could have an adverse effect on our results of operations and financial condition.

Our working capital requirements and capital for general corporate purposes, including acquisitions and capital expenditures, were historically satisfied as part of the corporate-wide cash management policies of Viavi. We may need to obtain additional financing from banks, through public offerings or private placements of debt or equity securities, strategic relationships or other arrangements.

The cost of capital for our business following the Separation may be higher than Viavi's cost of capital prior to the Separation.

Other significant changes may occur in our cost structure, management, financing and business operations as a result of operating as a company separate from Viavi. For additional information about the past financial performance of our business and the basis of presentation of the historical consolidated financial statements, see “Management’s Discussion and Analysis of Financial

Table of Contents

Condition and Results of Operations” and the historical consolidated financial statements and accompanying notes included elsewhere in this Quarterly Report.

Potential indemnification liabilities to Viavi pursuant to the Separation agreement could materially and adversely affect our business, financial condition, results of operations and cash flows.

The Separation Agreement provides for, among other things, indemnification obligations designed to make us financially responsible for:

- any Lumentum Liability (as defined in the Separation Agreement);
- our failure to pay, perform or otherwise promptly discharge any Lumentum Liability or contracts, in accordance with their respective terms, whether prior to, at or after the distribution;
- any guarantee, indemnification obligation, surety bond or other credit support agreement, arrangement, commitment or understanding by Viavi for our benefit, except to the extent it relates to an Excluded Liability (as defined in the Separation Agreement);
- any breach by us of the Separation agreement or certain of its ancillary agreements or any action by us in contravention of our amended and restated certificate of incorporation or amended and restated bylaws; and
- any untrue statement or alleged untrue statement of a material fact or omission or alleged omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, with respect to all information contained in the Registration Statement on Form 10 (the “Registration Statement”) and information statement filed in connection with the Separation or any other disclosure document that describes the Separation or the distribution, or us and our subsidiaries, or primarily relates to the transactions contemplated by the Separation agreement, subject to certain exceptions.

Our indemnification obligations are not subject to maximum loss clauses. If we are required to indemnify Viavi under the circumstances set forth in the Separation Agreement, we may be subject to substantial liabilities.

In connection with the Separation, Viavi has agreed to indemnify us for certain liabilities. However, there can be no assurance that the indemnity will be sufficient to insure us against the full amount of such liabilities, or that Viavi’s ability to satisfy its indemnification obligation will not be impaired in the future.

Pursuant to the Separation agreement, Viavi will indemnify us for certain liabilities relating to, arising out of or resulting from:

- any Excluded Liability (as defined in the Separation Agreement);
- the failure of Viavi or any of its subsidiaries, other than us, to pay, perform or otherwise promptly discharge any of the Excluded Liabilities, in accordance with their respective terms, whether prior to or after the effective time of the distribution;
- any guarantee, indemnification obligation, surety bond or other credit support agreement, arrangement, commitment or understanding by us for the benefit of Viavi, except to the extent it relates to a Lumentum Liability;
- any breach by Viavi or any of its subsidiaries, other than us, of the Separation Agreement or certain of its ancillary agreements; and
- any untrue statement or alleged untrue statement of a material fact or omission or alleged omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, with respect to information contained in the registration statement or information statement filed in connection with the Separation or any other disclosure document that describes the Separation or the distribution or primarily relates to the transactions contemplated by the Separation Agreement, subject to certain exceptions.

However, third parties could seek to hold us responsible for any of the liabilities that Viavi agrees to retain, and there can be no assurance that the indemnity from Viavi will be sufficient to protect us against the full amount of such liabilities, or that Viavi will be able to fully satisfy its indemnification obligations. Moreover, even if we ultimately succeed in recovering from Viavi any amounts for which we are held liable, we may be temporarily required to bear these losses.

We have sought to characterize Viavi’s contribution of the CCOP segment and WaveReady product lines to us as a taxable transaction. If tax authorities were to take the position that this contribution is not a taxable transaction, then we may face greater than expected income tax liabilities, which would negatively impact our operating results.

Table of Contents

In connection with the Separation, Viavi's assets related to the CCOP segment and WaveReady product lines were transferred to us in a transaction or transactions intended to be characterized as taxable, which will result in our receiving a fair market value or substantially stepped-up tax basis in the assets. We expect to reduce our cash taxes by depreciation and amortization deductions related to the stepped-up tax basis in the assets. If the IRS or foreign tax authorities disagree with our characterization of the transactions pursuant to which the CCOP business assets were transferred to us or disallow the depreciation and amortization deductions, and the position were sustained, our financial results would be materially and adversely affected.

We could have an indemnification obligation to Viavi if the distribution were determined not to qualify for non-recognition treatment, which could materially and adversely affect our financial condition.

We have received a private letter ruling from the IRS (the "IRS Ruling"), to the effect that the retention by Viavi of 19.9% of our common stock will not be deemed to be pursuant to a plan having as one of its principal purposes the avoidance of U.S. federal income tax within the meaning of Section 355(a)(1)(D)(ii) of the Internal Revenue Code of 1986, as amended (the "Code"). Notwithstanding the IRS Ruling, the IRS could determine on audit that the retention of our common stock was pursuant to a plan having as one of its principal purposes the avoidance of U.S. federal income tax if it determines that any of the facts, assumptions, representations or undertakings that we or Viavi have made or provided to the IRS are not correct. If the retention is deemed to be pursuant to a plan having as one of its principal purposes the avoidance of U.S. federal income tax, then the distribution could ultimately be determined to be taxable. In addition, Viavi also received a written opinion of PwC, its tax advisor, to the effect that the distribution, together with certain related transactions necessary to effectuate the distribution, should qualify for non-recognition of gain or loss under Sections 368(a)(1)(D) and 355 of the Code. The opinion is not binding on the IRS or the courts, and there can be no assurance that the IRS or any court will not take a contrary position. If the distribution were determined not to qualify for non-recognition of gain and loss, then Viavi would recognize gain in an amount up to the fair market value of our common stock held by it immediately before the distribution, over its tax basis in our stock immediately before the distribution.

If, due to any of our representations being untrue or our covenants being breached, it were determined that the distribution did not qualify for non-recognition of gain or loss under Section 355 of the Code, we could be required to indemnify Viavi for the resulting taxes and related expenses. The indemnification obligation is not expected to be material because Viavi is expected to have a fair market value or substantially stepped-up tax basis in our shares immediately prior to the Separation. If, contrary to our expectation, it were determined that Viavi did not have a fair market value or substantially stepped-up tax basis in our shares, any such indemnification obligation could materially and adversely affect our financial condition.

In addition, Section 355(e) of the Code generally creates a presumption that the distribution would be taxable to Viavi, but not to stockholders, if we or our stockholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the distribution, unless it were established that such transactions and the distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the distribution were taxable to Viavi due to such a 50% or greater change in ownership of our stock, Viavi would recognize gain in an amount equal to the excess of the fair market value of our common stock held by it immediately before the distribution over its tax basis in such stock, and we generally would be required to indemnify Viavi for the tax on such gain and related expenses. The indemnification obligation is not expected to be material because Viavi is expected to have a fair market value or substantially stepped-up tax basis in our shares immediately prior to the Separation. If, contrary to our expectation, it were determined that Viavi did not have a fair market value or substantially stepped-up tax basis in our shares, any such indemnification obligation could materially adversely affect our financial condition.

We have agreed to restrictions to preserve the non-recognition treatment of the distribution, which may reduce our strategic and operating flexibility.

We have entered into a tax matters agreement under which we will be subject to certain covenants and indemnification obligations that address compliance with Section 355(e) of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic transactions or engage in new businesses or other transactions that may maximize the value of our business, and might discourage or delay a strategic transaction that our stockholders may

consider favorable.

The Separation may expose us to potential liabilities and business complications arising out of state and federal fraudulent conveyance laws and legal dividend requirements.

The Separation could be challenged under various state and federal fraudulent conveyance laws. An unpaid creditor or an entity vested with the power of such creditor in either Viavi or us (such as a trustee or debtor-in-possession in a bankruptcy) could claim that the Separation left either Viavi or us insolvent or with unreasonably small capital. In addition, parties could allege that Viavi intended or believed that either Viavi or we would incur debts beyond its or our respective ability to pay such debts as they mature, or that Viavi or we did not receive fair consideration or reasonably equivalent value in the Separation. If a court were to agree with such a plaintiff, then such court could void the Separation as a fraudulent transfer and could impose a number of different remedies, including without limitation:

46

Table of Contents

- returning our assets or your shares in our company to Viavi;
- forcing Viavi to further capitalize us, although there is no assurance Viavi would have the financial ability to do so if such a judgment were rendered;
- voiding our liens and claims against Viavi; or
- providing Viavi with a claim for money damages against us in an amount equal to the difference between the consideration received by Viavi and the fair market value of our company at the time of the Separation.

The measure of insolvency for purposes of the fraudulent conveyance laws will vary depending on which jurisdiction's law is applied. Generally, however, an entity would be considered insolvent if either the fair saleable value of its assets is less than the amount of its liabilities (including the probable amount of contingent liabilities), or it is unlikely to be able to pay its liabilities as they become due. We cannot assure you as to what standard a court would apply to determine insolvency or that a court would determine that Viavi or we were solvent at the time of or after giving effect to the Separation, including the distribution of our common stock.

The distribution of our common stock by Viavi is also subject to review under state corporate distribution statutes. Under the Delaware General Corporation Law (the "DGCL"), a corporation may only pay dividends to its stockholders either (1) out of its surplus (net assets minus capital) or (2) if there is no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. Although we believe that Viavi made the distribution of our common stock entirely from surplus, we cannot assure you that a court will not later determine that some or all of the distribution to Viavi stockholders was unlawful.

Any successful claim that Viavi or Lumentum is insufficiently capitalized following the Separation could potentially expose us to material financial liabilities, unwinding of the transaction and adverse consequences with customers and suppliers related to our perceived inability to timely deliver products and pay for materials and services.

We are an "emerging growth company" and cannot be certain if the reduced disclosure requirements applicable to "emerging growth companies" will make our common stock less attractive to investors.

We are an "emerging growth company," as defined in the JOBS Act. For as long as we continue to be an "emerging growth company," we intend to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies. Among other things, we will not be required to:

- provide an auditor's attestation report on our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act;
- comply with any new rules that may be adopted by the PCAOB requiring mandatory audit firm rotation or a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer;
- comply with any new audit rules adopted by the PCAOB after April 5, 2012 unless the SEC determines otherwise;
- provide certain disclosure regarding executive compensation required of larger public companies; or
- hold a nonbinding advisory vote on executive compensation and obtain stockholder approval of any golden parachute payments not previously approved.

Accordingly, the information that we provide stockholders in this Quarterly Report and in our other filings with the SEC may be different than what is available with respect to other public companies. We cannot predict if investors will find our common stock less attractive because we rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile and adversely affected.

Section 107 of the JOBS Act provides that an "emerging growth company" can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933, as amended ("Securities Act"), for complying with new or revised accounting standards. In other words, an "emerging growth company" can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We have elected not to take advantage of this extended transition period.

We will remain an "emerging growth company" until the earliest of:

Table of Contents

the end of the fiscal year following the fifth anniversary of the date of the first sale of our common stock pursuant to an effective registration statement filed under the Securities Act;

the last day of the first fiscal year in which our total annual gross revenues exceed \$1 billion;

the date on which we have issued more than \$1 billion in non-convertible debt during the preceding three-year period;

or

the date on which we are deemed to be a “large accelerated filer,” as defined in Rule 12b-2 under the Exchange Act or any successor statute, which would occur if the market value of our common stock that is held by non-affiliates exceeds \$700 million as of the last business day of our most recently completed second fiscal quarter and certain other conditions are met, including that we have been subject to the requirements of sections 13(a) or 15(d) of the Securities Act for a period of at least twelve calendar months.

If we fail to maintain an effective system of disclosure controls and internal control over financial reporting, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired. As a public company, we are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act, the Sarbanes-Oxley Act of 2002, as amended, or the Sarbanes-Oxley Act, and Nasdaq listing requirements. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we have expended, and anticipate that we will continue to expend, significant resources, including accounting-related costs and significant management oversight.

Any failure to develop or maintain effective controls, or any difficulties encountered in their implementation or improvement, could cause us to be subject to one or more investigations or enforcement actions by state or federal regulatory agencies, stockholder lawsuits or other adverse actions requiring us to incur defense costs, pay fines, settlements or judgments. Any such failures could also cause investors to lose confidence in our reported financial and other information, which would likely have a negative effect on the trading price of our common stock. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on the NASDAQ stock market.

Risks Related to Our Common Stock

Our stock price may be volatile and may decline regardless of our operating performance.

Our common stock is listed on NASDAQ under the symbol “LITE.” Since shares of our common stock commenced trading on the NASDAQ stock market in August 2015, the reported high and low sales prices of our common stock has ranged from \$13.97 to \$41.97, through October 1, 2016. The market price of our common stock may fluctuate significantly due to a number of factors, some of which may be beyond our control, including:

- actual or anticipated fluctuations in our operating results;
- changes in earnings estimates by securities analysts or our ability to meet those estimates;
- the operating and stock price performance of other comparable companies;
- a shift in our investor base;
- our quarterly or annual earnings, or those of other companies in our industry;
 - success or failure of our business strategy;
 - credit market fluctuations which could negatively impact our ability to obtain financing as needed;
- changes to the regulatory and legal environment in which we operate;
- announcements by us, competitors, customers, or our contract manufacturers of significant acquisitions or dispositions;
- investor perception of us and our industry;
- changes in accounting standards, policies, guidance, interpretations or principles;
- litigation or disputes in which we may become involved;
- overall market fluctuations; sales of our shares by our officers, directors, or significant stockholders;

Table of Contents

- the timing and amount of dividends and share repurchases, if any; and
- general economic and market conditions and other external factors.

In addition, the stock markets, and in particular the market on which our common stock is listed, have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many technology companies. Stock prices of many technology companies have fluctuated in a manner unrelated or disproportionate to the operating performance of those companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If we were to become involved in securities litigation, it could subject us to substantial costs, divert resources and the attention of management from our business and adversely affect our business, results of operations, financial condition and cash flows.

Sales of a substantial amount of shares by our stockholders, including the sale by Viavi of the shares of our common stock that it retained after the distribution, could materially increase the volatility of our stock price and may cause our stock price to decline.

Any sales of substantial amounts of our common stock in the public market or the perception that such sales might occur may cause the market price of our common stock to decline. Our issued and outstanding shares of common stock can be freely tradable without restriction or registration under the Securities Act, unless the shares are owned by one of our “affiliates,” as that term is defined in Rule 405 under the Securities Act, which may include Viavi as discussed below. We are unable to predict whether large amounts of our common stock will be sold in the open market.

Following the Separation, Viavi retained 11.7 million shares of our common stock, representing an ownership interest of 19.9% of our total shares outstanding. As of September 30, 2016, Viavi held a total of 3.4 million shares of our common stock. Pursuant to a stockholder’s and registration rights agreement with Viavi, Viavi will be required to vote such shares in proportion to the votes cast by our other stockholders. In order to not jeopardize the tax-free status of the distribution, Viavi is required to dispose of such retained shares of our common stock that it owns as soon as practicable and consistent with its reasons for retaining such shares, but in no event later than three years after the distribution. Pursuant to the stockholder’s and registration rights agreement, upon the request of Viavi, we will effect the registration under applicable securities laws of the shares of common stock retained by Viavi. Subject to limited exceptions, we do not have the right to prevent or delay the sale of our shares by Viavi pursuant to the stockholder’s and registration right agreement. Any disposition by Viavi, or any significant stockholder, of our common stock in the public market, or the perception that such dispositions could occur, could materially increase the volatility of our stock price and adversely affect prevailing market prices for our common stock.

We do not expect to pay dividends on our common stock.

We do not currently expect to pay dividends on our common stock. The payment of any dividends to our stockholders in the future, and the timing and amount thereof, if any, is within the discretion of our board of directors. Our board of directors’ decisions regarding the payment of dividends will depend on many factors, such as our financial condition, earnings, capital requirements, potential debt service obligations or restrictive covenants, industry practice, legal requirements, regulatory constraints and other factors that our board of directors deems relevant.

In addition, because we are a holding company with no material direct operations, we are dependent on loans, dividends and other payments from our operating subsidiaries to generate the funds necessary to pay dividends on our common stock. However, our operating subsidiaries’ ability to make such distributions will be subject to their operating results, cash requirements and financial condition and the applicable provisions of Delaware law that may limit the amount of funds available for distribution. Our ability to pay cash dividends may also be subject to covenants and financial ratios related to existing or future indebtedness, and other agreements with third parties.

The obligations of Lumentum Inc. to holders of its Series A Preferred Stock could have a negative impact on holders of our common stock.

Our subsidiary, Lumentum Inc., issued \$35.8 million in Series A Preferred Stock to Viavi, which were sold to Amada following the Separation. The Series A Preferred Stock may be converted by Amada into shares of our common stock beginning on the second anniversary of the closing of the stock purchase (absent a change of control of us or similar event) using a conversion price of \$24.63, which is equal to 125% of the volume weighted average price per share of our common stock in the five “regular-way” trading days following the Separation. The Series A Preferred Stock may be

redeemed by us upon the third anniversary of the date of issuance or the preferred stockholders may cause us to redeem the Series A Preferred Stock upon the fifth anniversary of the date of issuance.

Cumulative senior dividends on the Series A Preferred Stock will accrue at the annual rate of 2.5%, but will be paid only when and if declared by the board of directors of Lumentum Inc. Our ability to make payments to holders of the Series A Preferred

Table of Contents

Stock (“Series A Holders”) will depend on Lumentum Inc.’s ability to generate cash in the future from operations, financings or asset sales. Lumentum Inc.’s ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that we cannot control. The payment of this dividend will reduce the amount of cash otherwise available for distribution by Lumentum Inc. to us for further distribution to our common stockholders or for other corporate purposes. If Lumentum Inc. is in arrears on the payment of dividends to the Series A Holders, (i) Lumentum Inc. will not be able to pay any dividends to us, subject to certain exceptions, and (ii) we will not be able to make any distribution on or repurchase of our common stock.

Certain provisions in our charter and Delaware corporate law could hinder a takeover attempt.

We are subject to the provisions of Section 203 of the DGCL which prohibits us, under some circumstances, from engaging in business combinations with some stockholders for a specified period of time without the approval of the holders of substantially all of our outstanding voting stock. Such provisions could delay or impede the removal of incumbent directors and could make more difficult a merger, tender offer or proxy contest involving us, even if such events could be beneficial, in the short-term, to the interests of our stockholders. In addition, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock. Our certificate of incorporation and bylaws contain provisions providing for the limitations of liability and indemnification of our directors and officers, allowing vacancies on our board of directors to be filled by the vote of a majority of the remaining directors, granting our board of directors the authority to establish additional series of preferred stock and to designate the rights, preferences and privileges of such shares (commonly known as “blank check preferred”) and providing that our stockholders can take action only at a duly called annual or special meeting of stockholders, which may only be called by the chairman of the board of directors, the chief executive officer or the board of directors. These provisions may also have the effect of deterring hostile takeovers or delaying changes in control or changes in our management.

Our bylaws designate Delaware courts as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could discourage lawsuits against us or our directors and officers. Our bylaws provide that, unless we consent in writing to an alternative forum, the state or federal courts of Delaware are the sole and exclusive forum for any derivative action or proceeding brought on our behalf; any action asserting breach of fiduciary duty, or other wrongdoing, by our directors, officers or other employees to us or our stockholders; any action asserting a claim against Lumentum pursuant to the Delaware General Corporation Law or our certificate of incorporation or bylaws; any action asserting a claim against Lumentum governed by the internal affairs doctrine; or any action to interpret, apply, enforce or determine the validity of our certificate of incorporation or bylaws. This exclusive forum provision may limit the ability of our stockholders to bring a claim in a judicial forum that such stockholders find favorable for disputes with us or our directors or officers, which may discourage such lawsuits against us or our directors and officers.

Alternatively, if a court outside of Delaware were to find this exclusive forum provision inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings described above, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business, financial condition or results of operations.
