

STANDEX INTERNATIONAL CORP/DE/
Form 10-K
August 25, 2016

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended June 30, 2016

Commission File Number 1-7233

STANDEX INTERNATIONAL CORPORATION
(Exact name of registrant as specified in its Charter)

DELAWARE
(State of incorporation)

31-0596149
(I.R.S. Employer Identification No.)

11 KEEWAYDIN DRIVE, SALEM, NEW HAMPSHIRE
(Address of principal executive offices)

03079
(Zip Code)

(603) 893-9701
(Registrant's telephone number, including area code)

**SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE
SECURITIES EXCHANGE ACT OF 1934:**

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock, Par Value \$1.50 Per Share	New York Stock Exchange

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES ☒ **NO** ☐

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

YES ☐ **NO** ☒

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. **YES** ☒ **NO** ☐

Edgar Filing: STANDEX INTERNATIONAL CORP/DE/ - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). **YES** ☒ **NO** ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller Reporting Company ☐

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES ☐ **NO** ☒

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the Registrant at the close of business on December 31, 2015 was approximately \$1,038,609,853. Registrant's closing price as reported on the New York Stock Exchange for December 31, 2015 was \$83.15 per share.

The number of shares of Registrant's Common Stock outstanding on August 22, 2016 was 12,777,502

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Registrant's 2016 Annual Meeting of Stockholders (the Proxy Statement) are incorporated by reference into Part III of this report.

Forward Looking Statement

Statements contained in this Annual Report on Form 10-K that are not based on historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of forward-looking terminology such as should, could, may, will, expect, estimate, anticipate, intends, continue, or similar terms or variations of those terms or the negative of those terms. There are many factors that affect the Company's business and the results of its operations and may cause the actual results of operations in future periods to differ materially from those currently expected or desired. These factors include, but are not limited to material adverse or unforeseen legal judgments, fines, penalties or settlements, conditions in the financial and banking markets, including fluctuations in exchange rates and the inability to repatriate foreign cash, general and international recessionary economic conditions, including the impact, length and degree of the current slow growth conditions on the customers and markets we serve and more specifically food service equipment, automotive, construction, aerospace, energy, transportation and general industrial markets, lower-cost competition, the relative mix of products which impact margins and operating efficiencies, both domestic

and foreign, in certain of our businesses, the impact of higher raw material and component costs, particularly steel, petroleum based products and refrigeration components, an inability to realize the expected cost savings from restructuring activities, effective completion of plant consolidations, cost reduction efforts, restructuring including procurement savings and productivity enhancements, capital management improvements, strategic capital expenditures, and the implementation of lean enterprise manufacturing techniques, the inability to achieve the savings expected from the sourcing of raw materials from and diversification efforts in emerging markets, the inability to attain expected benefits from strategic alliances or acquisitions and the inability to achieve synergies contemplated by the Company. Other factors that could impact the Company include the impact of cybersecurity, and changes to future pension funding requirements. In addition, any forward-looking statements represent management's estimates only as of the day made and should not be relied upon as representing management's estimates as of any subsequent date. While the Company may elect to update forward-looking statements at some point in the future, the Company and management specifically disclaim any obligation to do so, even if management's estimates change.

PART I

Item 1. Business

Standex International Corporation was incorporated in 1975 and is the successor of a corporation organized in 1955.

As used in this report, the terms we, us, our, the Company and Standex mean Standex International Corporation and its subsidiaries. We have paid dividends each quarter since Standex became a public corporation in November 1964.

Unless otherwise noted, references to years are to fiscal years.

We are a leading manufacturer of a variety of products and services for diverse commercial and industrial markets.

We have 11 operating segments, aggregated and organized for reporting purposes into five segments: Food Service Equipment, Engraving, Engineering Technologies, Electronics and Hydraulics. Overall management, strategic development and financial control are maintained by the executive staff from our corporate headquarters located in Salem, New Hampshire.

Our corporate long term strategy has several primary components to build larger industrial platforms through a value creation system that assists management in meeting specific corporate and business unit financial and strategic performance goals in order to create and sustain shareholder value. The Balanced Performance Plan process aligns annual goals throughout the business and provides a standard reporting, management and review process. It is focused on setting and meeting annual and quarterly targets that support our short term and long term goals. The Standex Growth Disciplines use a set of tools and processes including market maps, growth lane ways, and market tests to identify opportunities to expand the business organically and through acquisitions. Standex Operational Excellence employs a standard playbook and processes, including LEAN, to eliminate waste and improve profitability, cash flow and customer satisfaction. Finally, the Standex Talent Management is an organizational development process that provides training, development, and succession planning for our employees throughout our

worldwide organization. The Standex Value Creation System provides standard tools and processes throughout Standex to deliver our business objectives:

It is our objective to grow larger and more profitable business units through both organic initiatives and acquisitions. On an ongoing basis we identify and implement organic growth initiatives such as new product development, geographic expansion, introduction of products and technologies into new markets and applications, key accounts and strategic sales channel partners. Also, we have a long-term objective to create sizable business platforms by adding strategically aligned or bolt on acquisitions to strengthen the individual businesses, create both sales and cost synergies with our core business platforms, and accelerate their growth and margin improvement. We have a particular focus on identifying and investing in opportunities that complement our products and will increase the global presence and capabilities of our businesses. From time to time we have divested and likely will continue to divest businesses that we feel are not strategic or do not meet our growth and return expectations.

We create Customer Intimacy by utilizing the Standex Growth Disciplines to partner with our customers in order to develop and deliver custom solutions or engineered components that solve problems for our customers or otherwise meet their needs. This relationship generally provides us with the ability to improve sales and profit growth over time and provide operating margins that enhance shareholder returns. Further, we have made a priority of developing new sales channels and leveraging strategic customer relationships.

Standex Operational Excellence drives continuous improvement in the efficiency of our businesses. We recognize that our businesses are competing in a global economy that requires us to improve our competitive position. We have deployed a number of management competencies to drive improvements in the cost structure of our business units including operational excellence through lean enterprise, the use of low cost manufacturing facilities in countries such as Mexico, and China. The consolidation of manufacturing facilities to achieve economies of scale and leveraging of fixed infrastructure costs, alternate sourcing to achieve procurement cost reductions, and capital improvements to increase shop floor productivity.

The Company's strong historical cash flow has been a cornerstone for funding our capital allocation strategy. We use cash flow generated from operations to fund the strategic growth programs described above, (including acquisitions and investments for organic growth), and to return cash to our shareholders through payment of dividends and stock buybacks.

Please visit our website at www.standex.com to learn more about us or to review our most recent SEC filings. The information on our website is for informational purposes only and is not incorporated into this Annual Report on Form 10-K.

Description of Segments

Food Service Equipment

The Food Service Equipment business is comprised of three groups. The Refrigeration Solutions group manufactures walk-in and cabinet coolers and freezers used in commercial food facilities and some industrial, life science and scientific applications. The Cooking Solutions group manufactures cooking equipment such as ovens, fryers, warmers and grills used in commercial food preparation and service. The Specialty Solutions group consists of a specialty pump used in beverage applications and custom display merchandising.

Our products are used throughout the entire commercial food service process from storage, to preparation, to cooking and to display. The equipment that we design and manufacture is utilized in restaurants, convenience stores, quick-service restaurants, supermarkets, drug stores and institutions such as hotels, hospitals, and both corporate and school cafeterias to meet the challenges of providing food and beverages that are fresh and appealing while at the same time providing for food safety, energy efficiency and reliability of the equipment performance. In the scientific markets, our product portfolio is used for research, testing and storage of pharmaceuticals, reagents, enzymes, plasma, whole blood, bone marrow, viruses, stem cells DNA and plant samples.

Food Service Equipment products are manufactured in Hudson, WI; New Albany, MS; Nogales, Mexico; Simpsonville, SC; San Antonio, TX; Belleville, WI; and Mountmellick, Ireland. In addition, we have our culinary demonstration center in Allen, TX. Our products are sold predominantly in North America directly, through dealers, and through industry representatives in the Americas, Europe, Asia and Middle East.

Our product brands include:

-

NorLake® walk-in coolers and freezers and reach-in and under counter refrigerated cabinets to meet food service and scientific needs;

-

Master-Bilt® refrigerated reach-in and under counter refrigerated cabinets, cases, display units, and walk-in coolers and freezers;

-
APW Wyott®, Bakers Pride®, and Tri-Star ovens, char broilers, commercial ranges, griddles, toasters, warmers, roller grills and countertop merchandisers used in cooking, toasting, warming and merchandising food;

-
BKI® and Barbecue King® commercial cook and hold units, rotisseries, pressure fryers, ovens and baking equipment;

-
Ultrafryer® commercial deep fryers for restaurant and commercial installations;

-
Federal merchandizing display cases for bakery, deli and confectionary products; and

-
Procon® pump systems used in beverage and industrial fluid handling applications.

We continue to expand this segment through new product introductions and acquisitions.

Engraving

The Engraving segment consists of three product lines. Mold-Tech is a world-wide leader in applying textures to molds on which manufacturers produce a final product with the desired surface textures on molded plastic parts, slush-molded and in-mold grained parts. Mold-Tech serves the global auto industry as well as consumer goods. Innovent is a specialized supplier of tools and machines used to produce diapers and products which contain absorbent materials between layers of non-woven fabric.

We simplify the supply chain for global Original Equipment Manufacturers, OEM, as a single source texture solutions supplier. We provide texturizing services for the production of automotive components, particularly for interior dashboards and upholstery, textiles for paper towels and hygiene products, consumer products and cosmetic appearances, construction applications, various synthetic flooring products, and surfaces in electronics such as computers, cell phones and printers.

Our worldwide Mold-Tech locations enable us to better serve our customers within key geographic areas on 6 continents including in the United States, Canada, Europe, China, India, Southeast Asia, Korea, Australia, South Africa, and South America. Our products are primarily sold directly through our global sales network. The Engraving segment serves a number of industries including automotive, plastics, building products, synthetic

materials, converting, textile and paper, computer, housewares, hygiene product tooling and aerospace industries.

Subsequent to our fiscal 2016 year-end, we sold our U.S. Roll Plate and Machinery business as it was not strategic, and did not meet our growth and return expectations. This divestiture also allows our Engraving management to focus on higher growth and better return businesses within the segment.

The Engraving segment brands include:

-

Mold-Tech® which provides design and program management services texturizes molds used in the production of plastic parts and manufactures nickel shell slush mold tooling.

-

Mullen® Burst Testers.

-

Innovent is an engineering and manufacturing company delivering innovative product and service solutions to hygiene, aerospace and other industrial clients around the world.

We are particularly focused on growth through the establishment of new greenfield facilities in emerging markets and development of proprietary digital based process technology. Our extensive worldwide network of 38 manufacturing and design centers provides uniform engravings to satisfy the needs of our global customers. We expect to continue to strengthen our market leadership position through continuously expanding the breadth of products and services we provide customers globally.

Engineering Technologies

The Engineering Technologies segment, ETG, provides critical engineered parts in all workable metal alloys using various forming processes combined with the essential value added processes for innovative cost effective solutions. Our competitive advantage is to deliver components or assemblies that can be inserted directly into the production line with no or little surface finishing required. Our precision manufacturing capabilities include metal spinning, metal forming, press forming, stretch forming, hydroforming, heat treating and brazing, computer numerical control and electrical discharge machining, high speed milling, and other fabrication services in all thickness and size ranges for all workable metal alloys.

ETG solutions are in a wide variety of advanced applications, where the utilization of our broad metal forming capabilities with vertically integrated operations are used to reduce part count, decrease input material, and/or optimize the manufacturing process. These solutions are found in the aviation, defense, energy, industrial, medical, marine, oil and gas, and manned and unmanned space markets. Our components and assemblies have been present on major commercial aviation aircraft engines and nacelles as well as defense and navy nuclear programs. We provide complex assemblies and formed solutions for the energy and oil and gas OEM's, MRI machine formed components, and single piece formed and machined fuel and liquid oxygen tanks and tank domes for commercial and government space programs.

The segment includes our Spincraft units, with locations in North Billerica, MA, New Berlin, WI, and Newcastle upon Tyne in the U.K, along with, Enginetics, which has plants in Huber Heights and Eastlake, OH. Our sales are direct with the OEM's and the Tier One's in the particular markets, throughout the world, with the majority of our sales in North America and Europe.

Electronics

The Electronics segment is a manufacturer of custom magnetic sensing and power conversion components and assemblies. The magnetic sensing products employ technologies such as reed switches, hall effect, and magneto-resistive to produce reed relays, fluid level sensors, flow, pressure differential, proximity, as well as custom electronics assemblies containing these devices. The power conversion products include custom wound transformers and inductors for low and high frequency applications, value added assemblies and mechanical packaging and advanced planar transformers technology.

The Electronics segment is a global components solutions provider which designs and manufactures innovative engineered components and assemblies to solve our customers' application needs with a Partner/Solve/Deliver® approach. Our mission and vision is to be a strategic partner with customers, utilize our innovative capabilities and solutions to solve customer problems and deliver quality products that meet or exceed customer expectations. The products are vital to a diverse array of markets to provide safe and efficient power transformation, monitoring and isolation, as well as critical feedback to control systems for function and safety. The end user is typically an OEM industrial equipment manufacturer. End-user markets include, but are not limited to transportation, smart-grid, alternative energy, appliances, HVAC, security, military, medical, aerospace, test and measurement, power distribution, and general industrial applications.

Components are manufactured in plants located in the USA, Mexico, the U.K., Germany and China. The business sells globally through a direct sales force, regional sales managers, field applications engineers, commissioned agents, representative groups, and distribution channels. The products are sold globally with approximately fifty percent of sales within North America, forty percent within Europe and the balance in Asia.

The brand names are Standex Electronics, Standex-Meder Electronics, and Northlake Engineering. The Company continues to expand the business through organic growth with current customers, new customers, developing new products and technologies, geographic expansion, and strategic acquisitions.

Hydraulics

The Hydraulics segment is a global manufacturer of mobile hydraulic cylinders including single or double acting telescopic and piston rod hydraulic cylinders. Additionally we manufacture a specialty pneumatic cylinder and promote complete wet line kits, which are complete hydraulic systems that include a pump, valves, hoses and fittings.

Industries that use our products are construction equipment, refuse, airline support, mining, oil and gas, and other material handling applications. Our products are utilized by OEMs on vehicles such as dump trucks, dump trailers, bottom dumps, garbage trucks, container roll off vehicles, hook lift trucks, liquid waste handlers, compactors, balers, airport catering vehicles, container handling equipment for airlines, lift trucks, yard tractors, and underground mining vehicles.

We manufacture our cylinders in Hayesville, OH and Tianjin, China. Our products are sold directly to OEMs, as well as distributors, dealers, and aftermarket repair outlets primarily in North America with some sales in South America and Asia.

We provide Custom Hoists® branded single and double acting telescopic hydraulic cylinders and single stage, welded type piston rod hydraulic cylinders for use in the mobile hydraulics industry.

Responsiveness to new opportunities drives continuous top line growth. We leverage our full line of products for the dump truck and trailer market and deep expertise in their application to expand into new markets, targeting challenging custom applications. Our flexible design capability and global supply chain enable us to be successful in our expansion efforts. Our team is dedicated to superior customer service through our technical engineering support and on-time delivery.

Raw Materials

Raw materials and components necessary for the manufacture of our products are generally available from numerous sources. Generally, we are not dependent on a single source of raw materials and supplies. We do not foresee unavailability of materials or supplies which would have a significant adverse effect on any of our businesses, nor any of our segments, in the near term.

Seasonality

We are a diversified business with generally low levels of seasonality; however, our fiscal third quarter is typically the period with the lowest level of sales volume.

Patents and Trademarks

We hold approximately 39 United States patents and patents pending covering processes, methods and devices and approximately 43 United States trademarks. Many counterparts of these patents have also been registered in various foreign countries. In addition, we have various foreign registered and common law trademarks.

Due to the diversity of our businesses and the markets served, the loss of any single patent or trademark would not, in our opinion, materially affect any individual segment.

While we believe that many of our patents are important, we credit our competitive position in our niche markets to customer intimacy, engineering capabilities, manufacturing techniques and skills, marketing and sales promotions, service and the delivery of quality products.

Customers

Our business is not dependent upon a single customer or a few large customers, the loss of any one of which would not have a material adverse effect on our operations. No customer accounted for more than 5% of our consolidated revenue in fiscal 2016 or any of the years presented.

Working Capital

Our primary source of working capital is the cash generated from continuing operations. No segments require any special working capital needs outside of the normal course of business.

Backlog

Backlog includes all active or open orders for goods and services that have a firm fixed customer purchase order with defined delivery dates. Backlog also includes any future deliveries based on executed customer contracts, so long as such deliveries are based on agreed upon delivery schedules. Backlog is not generally a significant factor in the Company's businesses because of our relatively short delivery periods and rapid inventory turnover with the exception of Engineering Technologies. Due to the nature of long term agreements in the Engineering Technologies segment, the timing of orders and delivery dates can vary considerably resulting in significant backlog changes from one period to another.

Backlog orders in place at June 30, 2016 and 2015 are as follows (in thousands):

	2016	2015
Food Service Equipment	\$ 37,202	\$ 46,147
Engraving	19,046	18,992
Engineering Technologies	90,241	93,012
Electronics	44,713	38,445
Hydraulics	4,951	4,776
Total	196,153	201,372
Net realizable beyond one year	33,257	33,215
Net realizable within one year	\$ 162,896	\$ 168,157

Backlog realizable within one year decreased \$5.3 million, or 3.1%, to \$162.9 million at June 30, 2016 from \$168.2 million at June 30, 2015. The backlog decrease of \$8.9 million in Food Service Equipment resulted primarily from lower demand in the refrigeration markets. The increase in Electronics backlog of \$6.3 million is primarily a result of the recently acquired Northlake business.

Competition

Standex manufactures and markets products many of which have achieved a unique or leadership position in their market. However, we encounter competition in varying degrees in all product groups and for each product line. Competitors include domestic and foreign producers of the same and similar products. The principal methods of competition are product performance and technology, price, delivery schedule, quality of services, and other terms and conditions.

International Operations

We have international operations in all of our business segments. International operations are conducted at 60 locations, in Europe, Canada, China, India, Southeast Asia, Korea, Australia, Mexico, Brazil, and South Africa. See the Notes to Consolidated Financial Statements for international operations financial data. Our international operations contributed approximately 27% of operating revenues in 2016 and 2015. International operations are subject to certain inherent risks in connection with the conduct of business in foreign countries including, exchange controls, price controls, limitations on participation in local enterprises, nationalizations, expropriation and other governmental action, restrictions of repatriation of earnings, and changes in currency exchange rates.

Research and Development

Developing new and improved products, broadening the application of established products, continuing efforts to improve our methods, processes, and equipment continues to drive our success. However, due to the nature of our manufacturing operations and the types of products manufactured, expenditures for research and development are not significant to any individual segment or in the aggregate. Research and development costs are quantified in the Notes to Consolidated Financial Statements. We develop and design new products to meet customer needs in order to offer enhanced products or to provide customized solutions for customers.

Environmental Matters

Based on our knowledge and current known facts, we believe that we are presently in substantial compliance with all existing applicable environmental laws and regulations and do not anticipate any instances of non-compliance that will have a material effect on our future capital expenditures, earnings or competitive position.

Financial Information about Geographic Areas

Information regarding revenues from external customers attributed to the United States, all foreign countries and any individual foreign country, if material, is contained in the Notes to Consolidated Financial Statements for Industry Segment Information.

Number of Employees

As of June 30, 2016, we employed approximately 5,300 employees of which approximately 2,100 were in the United States. About 300 of our U.S. employees were represented by unions. Approximately 44% of our production workforce is situated in low-cost manufacturing regions such as Mexico, Brazil and Asia.

Executive Officers of Standex

The executive officers of the Company as of June 30, 2016 were as follows:

Name	Age	Principal Occupation During the Past Five Years
David Dunbar	54	President and Chief Executive Officer of the Company since January 2014. President of the Valves and Controls global business unit of Pentair Ltd from 2009 through 2013.
Thomas D. DeByle	56	Vice President and Chief Financial Officer of the Company since March 2008.
Alan J. Glass	52	Vice President, Chief Legal Officer and Secretary of the Company since April 2016. Vice President, General Counsel and Secretary of CIRCOR International, Inc. from 2000 through 2016.
Ross McGovern	38	Vice President of Human Resources of the Company since August 2015. Director of Human Resources of Keurig Green Mountain 2015, Vice President of Human Resources of Datacolor from 2012 through 2015, and Global Human Resources Manager of R&D GE Healthcare, Medical Diagnostics, a subsidiary of General Electric from 2009 through 2011.
Sean Valashinas	44	Chief Accounting Officer and Assistant Treasurer of the Company since October 2007.
Anne De Greef-Safft	54	Segment President of Food Service Equipment since January 2015; President of Danaher's Gems, Setra, Sonix and Anderson Companies, where she directed the worldwide operations, marketing and sales, engineering, accounting and human resources functions of these businesses from 2009 through 2014.
Paul Burns	43	Vice President of Strategy and Business Development since July 2015, Director of Corporate Development and Global Mergers & Acquisitions at General Motors from 2013 through 2015, Director of Strategy and Business Development at Tyco Flow Control from 2011 through 2013.

The executive officers are elected each year at the first meeting of the Board of Directors subsequent to the annual meeting of stockholders, to serve for one-year terms of office. There are no family relationships among any of the directors or executive officers of the Company.

Long-Lived Assets

Long-lived assets are described and discussed in the Notes to Consolidated Financial Statements under the caption Long-Lived Assets.

Available Information

Standex's corporate headquarters are at 11 Keewaydin Drive, Salem, New Hampshire 03079, and our telephone number at that location is (603) 893-9701.

The U.S. Securities and Exchange Commission (the "SEC") maintains an internet website at www.sec.gov that contains our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and proxy statements, and all amendments thereto. All reports that we file with the SEC may be read and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC 20549. Information about the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330. Standex's internet website address is www.standex.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and proxy statements, and all amendments thereto, are available free of charge on our website as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the SEC. In addition, our code of business conduct, our code of ethics for senior financial management, our corporate governance guidelines, and the charters of each of the committees of our Board of Directors (which are not deemed filed by this reference), are available on our website and are available in print to any Standex shareholder, without charge, upon request in writing to Chief Legal Officer, Standex International Corporation, 11 Keewaydin Drive, Salem, New Hampshire, 03079.

The certifications of Standex's Chief Executive Officer and Chief Financial Officer, as required by the rules adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, are filed as exhibits to this Form 10-K.

Item 1A. Risk Factors

An investment in the Company's common shares involves various risks, including those mentioned below and those that are discussed from time to time in our other periodic filings with the SEC. Investors should carefully consider these risks, along with the other information filed in this report, before making an investment decision regarding our common shares. All of these risks could have a material adverse effect on our financial condition, results of operations and/or value of our common shares.

A deterioration in the domestic and international economic environment could adversely affect our operating results and financial condition.

Recessionary economic conditions coupled with a tightening of credit could adversely impact major markets served by our businesses, including cyclical markets such as automotive, heavy construction vehicle, general industrial and food service. An economic recession could adversely affect our business by:

reducing demand for our products and services, particularly in markets where demand for our products and services is cyclical;

causing delays or cancellations of orders for our products or services;

reducing capital spending by our customers;

increasing price competition in our markets;

increasing difficulty in collecting accounts receivable;

increasing the risk of excess or obsolete inventories;

increasing the risk of impairment to long-lived assets due to reduced use of manufacturing facilities;

increasing the risk of supply interruptions that would be disruptive to our manufacturing processes; and

reducing the availability of credit for our customers.

We rely on our credit facility to provide us with sufficient capital to operate our businesses.

We rely on our revolving credit facility to provide us with sufficient capital to operate our businesses. The availability of borrowings under our revolving credit facility is dependent upon our compliance with the covenants set forth in the facility, including the maintenance of certain financial ratios. Our ability to comply with these covenants is dependent upon our future performance, which is subject to economic conditions in our markets along with factors that are beyond our control. Violation of those covenants could result in our lenders restricting or terminating our borrowing ability under our credit facility, cause us to be liable for covenant waiver fees or other obligations, or trigger an event of default under the terms of our credit facility, which could result in acceleration of the debt under the facility and require prepayment of the debt before its due date. Even if new financing is available in the event of a default under

our current credit facility, the interest rate charged on any new borrowing could be substantially higher than under the current credit facility, thus adversely affecting our overall financial condition. If our lenders reduce or terminate our access to amounts under our credit facility, we may not have sufficient capital to fund our working capital needs or we may need to secure additional capital or financing to fund our working capital requirements or to repay outstanding debt under our credit facility.

Our credit facility contains covenants that restrict our activities.

Our revolving credit facility contains covenants that restrict our activities, including our ability to:

incur additional indebtedness;

make investments;

create liens;

pay cash dividends to shareholders unless we are in compliance with the financial covenants set forth in the credit facility; and

sell material assets.

Our global operations subject us to international business risks.

We operate in 54 locations outside of the United States in Europe, Canada, China, India, Singapore, Korea, Australia, Mexico, Brazil, Turkey, Malaysia, and South Africa. If we are unable to successfully manage the risks inherent to the operation and expansion of our global businesses, those risks could have a material adverse effect on our business, results of operations or financial condition. Those international business risks include:

-

fluctuations in currency exchange rates;

-

changes in government regulations;

restrictions on repatriation of earnings;

import and export controls;

political, social and economic instability;

potential adverse tax consequences;

difficulties in staffing and managing multi-national operations;

difficulties in our ability to enforce legal rights and remedies; and

changes in regulatory requirements.

Failure to achieve expected savings and synergies could adversely impact our operating profits and cash flows.

We focus on improving profitability through LEAN enterprise, low cost sourcing and manufacturing initiatives, improving working capital management, developing new and enhanced products, consolidating factories where appropriate, automating manufacturing processes, diversification efforts and completing acquisitions which deliver synergies to supplement sales and growth. If we were unable to successfully execute these programs, this failure could adversely affect our operating profits and cash flows. In addition, actions we may take to consolidate manufacturing operations to achieve cost savings or adjust to market developments may result in restructuring charges that adversely affect our profits.

Violation of anti-bribery or similar laws by our employees, business partners or agents could result in fines, penalties, damage to our reputation or other adverse consequences.

We cannot assure that our internal controls, code of conduct and training of our employees will provide complete protection from reckless or criminal acts of our employees, business partners or agents that might violate US or international laws relating to anti-bribery or similar topics. An action resulting in a violation of these laws could subject us to civil or criminal investigations that could result in substantial civil or criminal fines and penalties and which could damage our reputation.

We face significant competition in our markets and, if we are not able to respond to competition in our markets, our net sales, profits and cash flows could decline.

Our businesses operate in highly competitive markets. In order to effectively compete, we must retain long standing relationships with significant customers, offer attractive pricing, develop enhancements to products that offer performance features that are superior to our competitors and which maintain our brand recognition, continue to automate our manufacturing capabilities, continue to grow our business by establishing relationships with new customers, diversify into emerging markets and penetrate new markets. If we are unable to compete effectively, our net sales, profitability and cash flows could decline. Pricing pressures resulting from competition may adversely affect our net sales and profitability.

If we are unable to successfully introduce new products and product enhancements, our future growth could be impaired.

Our ability to develop new products and innovations to satisfy customer needs or demands in the markets we serve can affect our competitive position and often requires significant investment of resources. Difficulties or delays in research, development or production of new products and services or failure to gain market acceptance of new products and technologies may significantly reduce future net sales and adversely affect our competitive position.

Increased prices or significant shortages of the commodities that we use in our businesses could result in lower net sales, profits and cash flows.

We purchase large quantities of steel, refrigeration components, freight services, foam insulation and other metal commodities for the manufacture of our products. Historically, prices for commodities have fluctuated, and we are unable to enter into long term contracts or other arrangements to hedge the risk of price increases in many of these commodities. Significant price increases for these commodities could adversely affect our operating profits if we cannot timely mitigate the price increases by successfully sourcing lower cost commodities or by passing the increased costs on to customers. Shortages or other disruptions in the supply of these commodities could delay sales

or increase costs.

An inability to identify or complete future acquisitions could adversely affect our future growth.

As part of our growth strategy, we intend to pursue acquisitions that provide opportunities for profitable growth for our businesses and which enable us to leverage our competitive strengths. While we continue to evaluate potential acquisitions, we may not be able to identify and successfully negotiate suitable acquisitions, obtain financing for future acquisitions on satisfactory terms, obtain regulatory approval for certain acquisitions or otherwise complete acquisitions in the future. An inability to identify or complete future acquisitions could limit our future growth.

We may experience difficulties in integrating acquisitions.

Integration of acquired companies involves a number of risks, including:

inability to operate acquired businesses profitably;

failure to accomplish strategic objectives for those acquisitions;

unanticipated costs relating to acquisitions or to the integration of the acquired businesses;

difficulties in achieving planned cost savings synergies and growth opportunities; and

possible future impairment charges for goodwill and non-amortizable intangible assets that are recorded as a result of acquisitions.

Additionally, our level of indebtedness may increase in the future if we finance acquisitions with debt, which would cause us to incur additional interest expense and could increase our vulnerability to general adverse economic and industry conditions and limit our ability to service our debt or obtain additional financing. We cannot assure that future acquisitions will not have a material adverse effect on our financial condition, results of operations and cash

flows.

Impairment charges could reduce our profitability.

We test goodwill and our other intangible assets with indefinite useful lives for impairment on an annual basis or on an interim basis if an event occurs that might reduce the fair value of the reporting unit below its carrying value.

Various uncertainties, including continued adverse conditions in the capital markets or changes in general economic conditions, could impact the future operating performance at one or more of our businesses which could significantly affect our valuations and could result in additional future impairments. The recognition of an impairment of a significant portion of goodwill would negatively affect our results of operations and could be a material effect to us.

Material adverse or unforeseen legal judgments, fines, penalties or settlements could have an adverse impact on our profits and cash flows.

We are and may, from time to time, become a party to legal proceedings incidental to our businesses, including, but not limited to, alleged claims relating to product liability, environmental compliance, patent infringement, commercial disputes and employment matters. In accordance with United States generally accepted accounting principles, we have established reserves based on our assessment of contingencies. Subsequent developments in legal proceedings may affect our assessment and estimates of loss contingencies recorded as reserves which could require us to record additional reserves or make material payments which could adversely affect our profits and cash flows. Even the successful defense of legal proceedings may cause us to incur substantial legal costs and may divert management's time and resources away from our businesses.

The costs of complying with existing or future environmental regulations, and of correcting any violations of these regulations, could increase our expenses and reduce our profitability.

We are subject to a variety of environmental laws relating to the storage, discharge, handling, emission, generation, use and disposal of chemicals, hazardous waste and other toxic and hazardous materials used to manufacture, or resulting from the process of manufacturing, our products. We cannot predict the nature, scope or effect of regulatory requirements to which our operations might be subject or the manner in which existing or future laws will be administered or interpreted. We are also exposed to potential legacy environmental risks relating to businesses we no longer own or operate. Future regulations could be applied to materials, products or activities that have not been subject to regulation previously. The costs of complying with new or more stringent regulations, or with more vigorous enforcement of these or existing regulations, could be significant.

In addition, properly permitted waste disposal facilities used by us as a legal and legitimate repository for hazardous waste may in the future become mismanaged or abandoned without our knowledge or involvement. In such event,

legacy landfill liability could attach to or be imposed upon us in proportion to the waste deposited at any disposal facility.

Environmental laws require us to maintain and comply with a number of permits, authorizations and approvals and to maintain and update training programs and safety data regarding materials used in our processes. Violations of these requirements could result in financial penalties and other enforcement actions. We could be required to halt one or more portions of our operations until a violation is cured. Although we attempt to operate in compliance with these environmental laws, we may not succeed in this effort at all times. The costs of curing violations or resolving enforcement actions that might be initiated by government authorities could be substantial.

Strategic divestitures could negatively affect our results and contingent liabilities from businesses that we have sold could adversely affect our results of operations and financial condition.

We have retained responsibility for some of the known and unknown contingent liabilities related to a number of businesses we have sold, such as lawsuits, tax liabilities, product liability claims, and environmental matters and have agreed to indemnify purchasers of these businesses for certain of those contingent liabilities.

The trading price of our common stock has been volatile, and investors in our common stock may experience substantial losses.

The trading price of our common stock has been volatile and may become volatile again in the future. The trading price of our common stock could decline or fluctuate in response to a variety of factors, including:

our failure to meet the performance estimates of securities analysts;

changes in financial estimates of our net sales and operating results or buy/sell recommendations by securities analysts;

fluctuations in our quarterly operating results;

substantial sales of our common stock;

changes in the amount or frequency of our payment of dividends or repurchases of our common stock;

general stock market conditions; or

other economic or external factors.

Decreases in discount rates and actual rates of return could require future pension contributions to our pension plans which could limit our flexibility in managing our Company.

Key assumptions inherent in our actuarially calculated pension plan obligations and pension plan expense are the discount rate and the expected rate of return on plan assets. If discount rates and actual rates of return on invested plan assets were to decrease significantly, our pension plan obligations could increase materially. Although our pension plans have been frozen, the size of future required pension contributions could require us to dedicate a greater portion of our cash flow from operations to making contributions, which could negatively impact our financial flexibility.

Our business could be negatively impacted by cybersecurity threats, information systems and network interruptions, and other security threats or disruptions.

Our information technology networks and related systems are critical to the operation of our business and essential to our ability to successfully perform day-to-day operations. Cybersecurity threats in particular, are persistent, evolve quickly, and include, but are not limited to, computer viruses, attempts to access information, denial of service and other electronic security breaches. These events could disrupt our operations or customers and other third party IT systems in which we are involved and could negatively impact our reputation among our customers and the public which could have a negative impact on our financial conditions, results of operations, or liquidity.

Various restrictions in our charter documents, Delaware law and our credit agreement could prevent or delay a change in control of us that is not supported by our board of directors.

We are subject to a number of provisions in our charter documents, Delaware law and our credit facility that may discourage, delay or prevent a merger, acquisition or change of control that a stockholder may consider favorable. These anti-takeover provisions include:

maintaining a classified board and imposing advance notice procedures for nominations of candidates for election as directors and for stockholder proposals to be considered at stockholders' meetings;

a provision in our certificate of incorporation that requires the approval of the holders of 80% of the outstanding shares of our common stock to adopt any agreement of merger, the sale of substantially all of the assets of Standex to a third party or the issuance or transfer by Standex of voting securities having a fair market value of \$1 million or more to a third party, if in any such case such third party is the beneficial owner of 10% or more of the outstanding shares of our common stock, unless the transaction has been approved prior to its consummation by all of our directors;

requiring the affirmative vote of the holders of at least 80% of the outstanding shares of our common stock for stockholders to amend our amended and restated by-laws;

covenants in our credit facility restricting mergers, asset sales and similar transactions; and

the Delaware anti-takeover statute contained in Section 203 of the Delaware General Corporation Law.

Section 203 of the Delaware General Corporation Law prohibits a merger, consolidation, asset sale or other similar business combination between Standex and any stockholder of 15% or more of our voting stock for a period of three years after the stockholder acquires 15% or more of our voting stock, unless (1) the transaction is approved by our board of directors before the stockholder acquires 15% or more of our voting stock, (2) upon completing the transaction the stockholder owns at least 85% of our voting stock outstanding at the commencement of the transaction, or (3) the transaction is approved by our board of directors and the holders of 66 2/3% of our voting stock, excluding shares of our voting stock owned by the stockholder.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We have a total of 96 facilities, of which we operate 83 manufacturing plants and warehouses located throughout the United States, Europe, Canada, Australia, Southeast Asia, Korea, China, India, Brazil, South Africa, and Mexico. The Company owns 24 of the facilities and the balance are leased. For the year ended June 30, 2016 the approximate building space utilized by each segment is as follows:

Segment location	Number of Facilities	Area in Square Feet (in thousands)		
		Leased	Owned	Total
EMEA ⁽¹⁾	3	24	10	34
Other Americas	3	32	185	217

United States	15	354	789	1,143

PART II**Item 5. Market for Standex Common Stock****Related Stockholder Matters and Issuer Purchases of Equity Securities**

The principal market in which the Common Stock of Standex is traded is the New York Stock Exchange under the ticker symbol **SXI** . The high and low sales prices for the Common Stock on the New York Stock Exchange and the dividends paid per Common Share for each quarter in the last two fiscal years are as follows:

Year Ended June 30	Common Stock Price Range				Dividends Per Share	
	2016		2015		2016	2015
	High	Low	High	Low		
First quarter	\$ 83.20	\$ 66.98	\$ 76.99	\$ 65.01	\$ 0.12	\$ 0.10
Second quarter	93.10	72.94	87.05	70.25	0.14	0.12
Third quarter	82.45	65.53	83.98	66.72	0.14	0.12
Fourth quarter	89.29	75.59	84.47	77.62	0.14	0.12

The approximate number of stockholders of record on July 31, 2016 was 1,641.

Additional information regarding our equity compensation plans is presented in the Notes to Consolidated Financial Statements under the caption **Stock-Based Compensation and Purchase Plans** and Item 12 **Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**.

Issuer Purchases of Equity Securities ⁽¹⁾**Quarter Ended June 30, 2016**

Period	(a) Total Number of Shares (or units) Purchased	(b) Average Price Paid per Share (or unit)	(c) Total Number of Shares (or units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Appropriate Dollar Value) of Shares (or units) that May Yet Be Purchased Under the Plans or Programs
April 1 - April 30, 2016	2,167	\$ 78.77	2,167	\$ 99,829,305
May 1 - May 31, 2016	25,615	\$ 79.76	27,782	\$ 97,786,253
June 1 - June 30, 2016	2,916	\$ 87.21	30,698	\$ 97,531,949
TOTAL	30,698	\$ 80.40	30,698	\$ 97,531,949

⁽¹⁾ The Company has a Stock Buyback Program (the "Program") which was originally announced on January 30, 1985 and most recently amended on April 26, 2016. Under the Program, the Company was authorized to repurchase up to an aggregate of \$100 million of its shares. Under the program, purchases may be made from time to time on the open market, including through 10b5-1 trading plans, or through privately negotiated transactions, block transactions, or other techniques in accordance with prevailing market conditions and the requirements of the Securities and Exchange Commission. The Board's authorization is open-ended and does not establish a timeframe for the purchases. The Company is not obligated to acquire a particular number of shares, and the program may be discontinued at any time at the Company's discretion.

The following graph compares the cumulative total stockholder return on the Company's Common Stock as of the end of each of the last five fiscal years, with the cumulative total stockholder return on the Standard & Poor's Small Cap 600 (Industrial Segment) Index and on the Russell 2000 Index, assuming an investment of \$100 in each at their closing prices on June 30, 2011 and the reinvestment of all dividends.

Item 6. Selected Consolidated Financial Data

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a leading manufacturer of a variety of products and services for diverse commercial and industrial markets. We have five reportable segments: Food Service Equipment, Engraving, Engineering Technologies, Electronics, and the Hydraulics.

Our long term strategy is to build larger industrial platforms through a value creation system that assists management in meeting specific corporate and business unit financial and strategic performance goals in order to create, improve, and enhance shareholder value. The Standex Value Creation System is a standard methodology which provides consistent tools used throughout the company in order to achieve our organization's goals. The value creation system has four components. The Balanced Performance Plan process aligns annual goals throughout the business and provides a standard reporting, management and review process. It is focused on setting and meeting annual and quarterly targets that support our short term and long term goals. The Standex Growth Disciplines use a set of tools and processes including market maps, growth lane ways, and market tests to identify opportunities to expand the business organically and through acquisitions. Standex Operational Excellence employs a standard playbook and processes, including LEAN, to eliminate waste and improve profitability, cash flow and customer satisfaction. Finally, the Standex Talent Management process is an organizational development process that provides training, development, and succession planning for our employees throughout our worldwide organization. The Standex Value Creation System ties all disciplines in the organization together under a common umbrella by providing standard tools and processes to deliver our business objectives:

It is our objective to grow larger and more profitable business units through both organic initiatives and acquisitions. On an ongoing basis we identify and implement organic growth initiatives such as new product development, geographic expansion, introduction of products and technologies into new markets and applications, key accounts and strategic sales channel partners. Also, we have a long-term objective to create sizable business platforms by adding strategically aligned or bolt on acquisitions to strengthen the individual businesses, create both sales and cost synergies with our core business platforms, and accelerate their growth and margin improvement. We have a particular focus on identifying and investing in opportunities that complement our products and will increase the global presence and capabilities of our businesses. From time to time we have divested and likely will continue to divest businesses that we feel are not strategic or do not meet our growth and return expectations.

As part of this ongoing strategy, during fiscal year 2016, we acquired Northlake Engineering, Inc., a designer, manufacturer and distributor of high reliability magnetics serving the North American power distribution and medical equipment markets. This investment complements our Electronics segment and allows us to provide broader solutions to our customers. Subsequent to our fiscal 2016 year-end, we sold our U.S. Roll Plate and Machinery business as it was not strategic, and did not meet our growth and return expectations. This divestiture also allows our Engraving management to focus on higher growth and better return businesses within the segment.

We create Customer Intimacy by utilizing the Standex Growth Disciplines to partner with our customers in order to develop and deliver custom solutions or engineered components that provide technology-driven solutions to our customers. This relationship generally provides us with the ability to improve sales and profit growth over time and provide operating margins that enhance shareholder returns. Further, we have made a priority of developing new sales channels and leveraging strategic customer relationships.

Standex Operational Excellence drives continuous improvement in the efficiency of our businesses. We recognize that our businesses are competing in a global economy that requires us to improve our competitive position. We have deployed a number of management competencies to drive improvements in cost structure of our business units including operational excellence through lean enterprise, the use of low cost manufacturing facilities in countries such as Mexico, and China, the consolidation of manufacturing facilities to achieve economies of scale and leveraging of fixed infrastructure costs, alternate sourcing to achieve procurement cost reductions, and capital improvements to increase shop floor productivity.

The Company's strong historical cash flow has been a cornerstone for funding our capital allocation strategy. We use cash flow generated from operations to fund the strategic growth programs described above, (including acquisitions and investments for organic growth), and to return cash to our shareholders through payment of dividends and stock buybacks.

Our business units are actively engaged in initiating new product introductions, expansion of product offerings through private labeling and sourcing agreements, geographic expansion of sales coverage, the development of new sales channels, leveraging strategic customer relationships, development of energy efficient products, new applications for existing products and technologies, and next generation products and services for our end-user markets.

Restructuring expenses reflect costs associated with the Company's efforts to continuously improve operational efficiency and expand globally in order to remain competitive in the end-user markets we serve. Each year the Company incurs costs for actions to size its businesses to a level appropriate for current economic conditions and to improve its cost structure to enhance our competitive position and operating margins. Such expenses include costs for moving facilities to low-cost locations, starting up plants after relocation, or downsizing operations because of changing economic conditions, and other costs resulting from asset redeployment decisions. Shutdown costs include severance, benefits, stay bonuses, lease and contract terminations, asset write-downs, costs of moving fixed assets, moving, and relocation costs. Vacant facility costs include maintenance, utilities, property taxes, and other costs.

We continue to focus on our efforts to reduce cost and improve productivity across our businesses. Our refrigeration division and businesses that serve the oil and gas industry have both been negatively impacted by reduced customer spending and customer consolidation. Due to these changing market conditions and consolidations we have and will continue to implement appropriate cost reductions to align our costs to appropriate sales levels. We continue to evaluate our products and production processes and expect to execute similar cost reductions and restructuring

programs on an ongoing basis.

Because of the diversity of the Company's businesses, end user markets and geographic locations, management does not use specific external indices to predict the future performance of the Company, other than general information about broad macroeconomic trends. Each of our individual business units serves niche markets and attempts to identify trends other than general business and economic conditions which are specific to their businesses and which could impact their performance. Those units report pertinent information to senior management, which uses it to the extent relevant to assess the future performance of the Company. A description of any such material trends is described below in the applicable segment analysis.

We monitor a number of key performance indicators (KPIs) including net sales, income from operations, backlog, effective income tax rate, gross profit margin, and operating cash flow. A discussion of these KPIs is included in the discussion below. We may also supplement the discussion of these KPIs by identifying the impact of foreign exchange rates, acquisitions, and other significant items when they have a material impact on the discussed KPI.

We believe that the discussion of these items provides enhanced information to investors by disclosing their consequence on the overall trend in order to provide a clearer comparative view of the KPI where applicable. For discussion of the impact of foreign exchange rates on KPIs, the Company calculates the impact as the difference between the current period KPI calculated at the current period exchange rate as compared to the KPI calculated at the historical exchange rate for the prior period. For discussion of the impact of acquisitions, we isolate the effect to the KPI amount that would have existed regardless of our acquisition. Sales resulting from synergies between the acquisition and existing operations of the Company are considered organic growth for the purposes of our discussion.

Unless otherwise noted, references to years are to fiscal years.

Consolidated Results from Continuing Operations (in thousands):

		2016	2015	2014
Net sales	\$	751,586 \$	772,142 \$	716,180
Gross profit margin		33.6%	32.1%	33.3%
Restructuring costs		4,232	3,443	10,077
Other income/(expense) operating		(7,458)	438	3,462
Income from operations		70,344	78,644	65,868
Backlog (realizable within 1 year)	\$	162,896 \$	168,157 \$	143,132
		2016	2015	2014
Net sales	\$	751,586 \$	772,142 \$	716,180
Components of change in sales:				

Effect of acquisitions	11,672	38,155	297
Effect of exchange rates	(15,011)	(16,423)	3,954
Organic sales growth	(17,217)	34,230	38,539

Net sales for the fiscal year 2016 decreased by \$20.6 million, or 2.7%, when compared to the prior year. The decrease is driven by \$17.2 million, or 2.3% of organic sales declines and \$15.0 million, or 1.9%, of unfavorable foreign exchange partially offset by \$11.7 million, or 1.5% from the Northlake and Enginetics acquisitions. The organic sales decrease was primarily driven by lower sales to the refrigeration and oil and gas markets, partially offset by higher sales to the automotive and other markets. We anticipate continued soft demand in the refrigeration and oil and gas markets during the first half of fiscal year 2017. We expect unfavorable foreign exchange sales impacts in 2017 primarily associated with declines in the British Pound due to the Brexit vote. During fiscal year 2016, 3.0% of our consolidated revenue was recorded in the U.K.

Net sales for the fiscal year 2015 increased by \$56.0 million, or 7.8%, when compared to the prior year. The increase was driven by \$34.2 million or 4.8% of organic sales growth from three of our segments, \$38.2 million or 5.3% of acquisitions from Enginetics, Ultrafryer, and Planar partially offset by unfavorable foreign exchange of \$16.4 million or 2.3% primarily from the strength of the U.S. dollar as compared to the Euro and Pound. Sales growth was a result of success of our top-line growth initiatives and improvements in end-user markets.

Gross Profit Margin

During 2016, gross margin increased to 33.6% as compared to 32.1% in 2015. The increase is a result of higher sales in the Engraving segment which typically carry higher margins than sales in our other segments and operational improvements in our Food Service Equipment segment as our Operational Excellence initiatives continue to generate positive gross margin results. We also experienced gross margin improvements due to reduced purchase accounting charges of \$1.3 million. During fiscal year 2016 we incurred \$0.4 million of purchase accounting charges related to the Northlake acquisition as compared to charges of \$1.7 million in the prior year for the Enginetics and Ultrafryer acquisitions.

During 2015, gross margin decreased to 32.1% as compared to 33.3% in 2014. This decrease is primarily a result of exchange rate declines, an unfavorable sales mix as compared to the prior year, coupled with \$1.7 million of purchase accounting charges associated with the Enginetics and Ultrafryer acquisitions.

Selling, General, and Administrative Expenses

Selling, general, and administrative expenses, (SG&A) for the fiscal year 2016 were \$170.2 million or 22.6% of sales compared to \$165.8 million or 21.5% of sales during the prior year. The increase in SG&A is due to higher health care expenses, compensation, along with SG&A embedded in the Northlake business partially offset by declines in

distribution expense.

Selling, general, and administrative expenses, (SG&A) for the fiscal year 2015 were \$165.8 million or 21.5% of sales compared to \$165.8 million or 23.1% of sales during the prior year. The decline in SG&A as a percentage of sales relates to three primary items: the absence of \$3.9 million of management transition costs in 2014; increased selling and distribution expense in the then current year associated with a 4.8% increase in organic sales during the year; and \$6.6 million of incremental expenses as a result of the Ultrafryer and Enginetics acquisitions.

Income from Operations

Income from operations for the fiscal year 2016 decreased by \$8.3 million or 10.6%, when compared to the prior year. The decrease is a result of a \$7.3 million non-cash loss incurred to adjust the net realizable value of the Roll Plate and Machinery business, increases in health care and compensation expenses, partially offset by gross profit improvements as a result of business segment mix. Discussion of the performance of all of our reportable segments is more fully explained in the segment analysis that follows.

Income from operations for the fiscal year 2015 increased by \$12.8 million or 19.4%, when compared to the prior year. The increase was primarily driven by \$56.0 million of sales increases, increasing gross profit by \$9.2 million, along with a \$6.6 million decline in restructuring expenses, and a reduction in net gain from insurance proceeds of \$3.0 million.

Interest Expense

Interest expense for the fiscal year 2016 was \$2.9 million, a decrease of \$0.3 million as compared to the prior year. The decrease is primarily due to lower average borrowings outstanding during the year.

Interest expense for the fiscal year 2015 was \$3.2 million, an increase of \$0.9 million as compared to the prior year. The increase is primarily due to higher average borrowings outstanding during the year as a result of the Enginetics acquisition and increased capital spending to support strategic growth programs.

Income Taxes

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2016 was \$16.3 million, or an effective rate of 23.8%, compared to \$20.9 million, or an effective rate of 27.4% for the year ended June 30, 2015. Changes in the effective tax rates from period to period may be significant as they depend on many factors including, but not limited to, the amount of the Company's income or loss, the mix of income earned in the US versus outside the US, the effective tax rate in each of the countries in which we earn income, and any one time tax issues which occur during the period. We anticipate our tax rate will be approximately 28% in the coming fiscal year due to mix of income earned in jurisdictions with higher tax rates.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2016 was impacted by the following items: (i) a benefit of \$4.9 million due to the mix of income earned in jurisdictions with beneficial tax rates, (ii) a net benefit of \$0.9 million related to a bargain-sale of idle property to a charitable organization, and (iii) a benefit of \$0.7 million related to the R&D tax credit.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2015 was \$20.9 million, an effective rate of 27.4%, compared to \$18.1 million, an effective rate of 26.6% for the year ended June 30, 2014. The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2015 was impacted by the following items: (i) a benefit of \$0.5 million related to the R&D tax credit that expired during the fiscal year on December 31, 2014 (ii) a benefit of \$4.0 million due to the mix of income earned in jurisdictions with beneficial tax rates.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2014 was impacted by the following items: (i) a benefit of \$0.5 million related to the R&D tax credit that expired during the fiscal year on December 31, (ii) a benefit of \$0.5 million related to a decrease in the statutory tax rate in the United Kingdom on prior period deferred tax liabilities recorded during the first quarter during the fiscal year, (iii) a benefit of \$1.1 million due to non-taxable life insurance proceeds received in the third quarter and (iv) a benefit of \$3.8 million due to the mix of income earned in jurisdictions with beneficial tax rates.

Capital Expenditures

In general, our capital expenditures over the long term are expected to be approximately 2% to 3% of net sales. During 2016, capital expenditures decreased to \$17.9 million or 2.4% of net sales as compared to \$22.6 million or 2.9% of net sales in the prior year. We anticipated 2016 capital spending to be approximately \$24 million, however due to project delays, spending was \$8 million below our target. We anticipate capital expenditures in the range of \$26.0 million to \$28.0 million in 2017, which includes amounts not spent in 2016. The 2017 capital spending will be focused on completion of the new Engineering Technologies facility in Wisconsin along with growth, cost reduction, and typical maintenance capital programs.

Backlog

Backlog includes all active or open orders for goods and services that have a firm fixed customer purchase order with defined delivery dates. Backlog also includes any future deliveries based on executed customer contracts, so long as such deliveries are based on agreed upon delivery schedules. Backlog is not generally a significant factor in the Company's businesses because of our relatively short delivery periods and rapid inventory turnover with the exception of Engineering Technologies. Due to the nature of long term agreements in the Engineering Technologies segment, the timing of orders and delivery dates can vary considerably resulting in significant backlog changes from one period to another.

Backlog orders in place at June 30, 2016 and 2015 are as follows (in thousands):

	2016	2015
Food Service Equipment	\$ 37,202	\$ 46,147
Engraving	19,046	18,992
Engineering Technologies	90,241	93,012
Electronics	44,713	38,445
Hydraulics	4,951	4,776
Total	196,153	201,372
Net realizable beyond one year	33,257	33,215
Net realizable within one year	\$ 162,896	\$ 168,157

Backlog realizable within one year decreased \$5.3 million, or 3.1%, to \$162.9 million at June 30, 2016 from \$168.2 million at June 30, 2015. The backlog decrease of \$8.9 million in the Food Service Equipment segment resulted primarily from lower demand in the refrigeration markets. The increase in Electronics backlog of \$6.3 million is primarily a result of the recently acquired Northlake business.

Segment Analysis (in thousands)

Food Service Equipment

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
	2016	2015	% Change	2015	2014	% Change
Net sales	\$ 381,867	\$ 408,706	-6.6%	\$ 408,706	\$ 377,848	8.2%
Income from operations	40,142	37,456	7.2%	37,456	38,203	-2.0%
Operating income margin	10.5%	9.2%		9.2%	10.1%	

Net sales for fiscal year 2016 decreased \$26.8 million, or 6.6% when compared to the prior year. The reduction was primarily in the Refrigeration Solutions group where sales decreased by 12.2%. Three factors contributed to the Refrigeration sales decline: (i) loss of market share into the dollar store market, (ii) reduced sales to major chains due to reduced capital spending, and (iii) reduced sales in Canada due to the strength of the U.S. dollar. We anticipate that capital spending by our major chain customers will remain soft into the first half of fiscal year 2017 but will begin to increase in the second half of fiscal year 2017. Sales from the Cooking Solutions group increased, by 0.5% year over year due to growth in sales to retail supermarkets. Specialty Solutions sales decreased 1.1% as our European pump business was impacted by a weak Euro early in the year.

Net sales for fiscal year 2015 increased \$30.9 million, or 8.2%, when compared to the prior year. The sales growth was driven by organic sales increases of 4.9%, sales increases of 3.9% due to our acquisition of Ultrafryer, partially offset by foreign exchange declines. The Refrigerated Solutions group sales increased 4.7% as the group saw a return of the drug retail business in 2015 and strong sales into the dollar store market. This strength was partially offset by weakness in national food service chains. Sales from the Cooking Solutions group increased, by 22.2% year over year. Excluding the Ultrafryer acquisition, Cooking Solutions group sales grew at 4.2% as compared to 2014. Growth was driven by increased spending by U.S. retail supermarket customers. Specialty Solutions sales increased 1.1% as our European pump business was impacted by the weakening of the Euro during the year. Foreign exchange losses in the group were offset by sales growth in our specialty merchandising business as several new chains have signed on for development of customized solutions.

Income from operations for fiscal year 2016 increased \$2.7 million, or 7.2%, when compared to the prior year, and operating income margin grew from 9.2% to 10.5%, up 130 basis points. Operating efficiencies, portfolio focus, paring of low-margin products and expense controls have increased our leverage and have positively impacted income from operations for the segment. Our focus in fiscal year 2017 is to generate positive operating income growth through product rationalization, sales volume increases and margin improvement through future deployment of Standex Operational Excellence.

Income from operations for fiscal year 2015 decreased \$0.7 million, or 2.0%, when compared to the prior year, and operating income margin declined from 10.1% to 9.2%. The positive impact of the year-over-year volume increase was offset by a combination of adverse market channel, product and customer mix changes; negative foreign exchange impacts and disruptions resulting from a factory closure.

Engraving

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
	2016	2015	% Change	2015	2014	% Change
Net sales	\$ 124,120	\$ 110,781	12.0%	\$ 110,781	\$ 109,271	1.4%
Income from operations	29,579	24,250	22.0%	24,250	22,145	9.5%
Operating income margin	23.8%	21.9%		21.9%	20.3%	

Net sales for fiscal year 2016 increased by \$13.3 million or 12.0%, compared to the prior year. Sales growth excluding foreign exchange losses of \$8.7 million is driven by sales gains at Mold-Tech for new automotive model introductions along with market share gains throughout the world. The Engraving segment also experienced sales gains in its Roll Plate and Machinery business and core forming tooling business. We expect moderate Mold-Tech sales growth in 2017 as new automotive model launches occur in the coming year.

Subsequent to our fiscal 2016 year-end, the Company sold its U.S. Roll Plate and Machinery business as it was not strategic and did not meet our growth and return expectations. This divestiture also allows the Company's management to focus on higher growth and better return businesses within the Engraving segment. In preparation of this sale, during the fourth quarter of 2016, we recorded a \$7.3 million non-cash loss to adjust the net assets of this business to their net realizable value. This expense is recorded as a component of Other Operating Income (Expense), net.

The Roll Plate and Machinery business sales increased in fiscal 2016 by \$2.8 million up to \$17.4 million. The sales (in millions) for the Roll Plate and Machinery business from the first to the fourth quarter of fiscal year 2016 were \$4.2, \$4.9, \$4.0, and \$4.3, respectively.

Net sales for fiscal year 2015 increased by \$1.5 million or 1.4%, compared to the prior year. Unfavorable foreign exchange impacted sales \$7.2 million. Sales growth excluding foreign exchange losses were primarily driven by continued expansion of our Asia Pacific Mold-Tech business as a result of increased market share. North American sales volumes were down for the year due to lower new automotive model activity and some automotive projects that were pushed out from the fourth quarter to the first half of 2016. Sales of core forming tooling grew 25% or \$2.4 million as compared to prior year.

Income from operations in fiscal year 2016 increased by \$5.3 million, or 22%, when compared to the prior year. The operating income improvement is driven by increased volume in all regions, partially offset by unfavorable foreign exchange and market declines in South America.

The Roll Plate and Machinery business operating income increased in fiscal 2016 by \$1.1 million up to \$1.2 million. The operating income (in thousands) for the Roll Plate and Machinery business from the first to the fourth quarter of fiscal year 2016 were \$89, \$242, \$378, and \$493, respectively.

Income from operations in fiscal year 2015 increased by \$2.1 million, or 9.5%, when compared to the prior year. The increase is driven by increased volume in Asia Pacific partially offset by unfavorable foreign exchange and fewer new model launches which impeded margin growth in the mold texturing business.

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
	2016	2015	% Change	2015	2014	% Change
Net sales	\$ 82,235	\$ 97,018	-15.2%	\$ 97,018	\$ 79,642	21.8%
Income from operations	8,258	13,097	-36.9%	13,097	12,676	3.3%
Operating income margin	10.0%	13.5%		13.5%	15.9%	

Net sales in the fiscal year 2016 decreased \$14.8 million or 15.2% when compared to the prior year. Sales distribution by market in 2016 was as follows: 46% aviation, 27% space, 10% oil and gas, 8% medical, 9% other markets. Sales in the land based gas turbine and oil and gas markets were down over 60% from the prior year level. The decline was a result of reduced demand in the oil and gas industry due to lower oil prices. We expect this market to remain soft for an extended period of time and have and will continue to reduce costs to align with demand. Total space sales decreased by 20.5% due to the completion of project based contracts in the manned space market. Sales in the unmanned space market were up 18.0% compared to the prior year. Aviation sales increased 29.7% from the prior year due to strong customer demand and recent contract awards. We anticipate that aviation sales will continue to increase during 2017 and will be approximately 50% of the segment's sales for the year.

Net sales in the fiscal year 2015 increased \$17.4 million, or 21.8%, when compared to the prior year. Acquisitions contributed \$22.5 million or 28.3%, partially offset by organic sales declines of \$4.6 million, or 5.8%. Sales in the land based gas turbine and oil and gas markets were down 24.9% from the prior year level. The decline was a result of reduced demand due to lower oil prices. Space market sales increased 26.3% from the prior year driven by higher sales in both the launch vehicle and the manned space market currently in the development phase. Legacy sales in the aviation market were up 24% compared to the prior year due to recent contract awards. Defense related sales were down 41.2% due to the timing of project based contracts. Sales in the medical market were down 14.4% primarily due to a shift in product mix.

Income from operations in the fiscal year 2016 decreased \$4.8 million or 36.9% when compared to the prior year. Operating income results were negatively impacted by the significant sales declines in both the energy and oil and gas related markets. This impact was partially offset by improved margins in the aviation market along with cost reduction programs implemented as a result of lower volume. We expect that our new Aluminum Center of Excellence facility will be fully operational beginning in the first quarter of 2017.

Income from operations in the fiscal year 2015 increased \$0.4 million, or 3.3%, when compared to the prior year. Operating income was negatively impacted by \$1.1 million of purchase accounting expenses associated with the Energetics acquisition and lower volume from oil and gas customers.

Electronics

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
			%			%
	2016	2015	Change	2015	2014	Change
Net sales	\$ 118,319	\$ 114,196	3.6%	\$ 114,196	\$ 114,881	-0.6%
Income from operations	21,104	20,884	1.1%	20,884	19,732	5.8%
Operating income margin	17.8%	18.3%		18.3%	17.2%	

Net sales in the fiscal year 2016 increased \$4.1 million, 3.6%, when compared to the prior year. Organic sales growth was \$0.7 million, or 0.6%, while the Northlake acquisition contributed \$7.5 million. Foreign exchange rates adversely affected sales by \$4.1 million. Sales growth in local currency was particularly strong in Europe driven by volume increases in the sensor components. We experienced sales declines in both Asia and North America due to general market softness, particularly earlier in the fiscal year. We expect North American and European sales to increase in fiscal year 2017 which will be partially offset by continued weakness in Asia.

Net sales in the fiscal year 2015 decreased \$0.7 million, 0.6%, when compared to the prior year. Organic sales growth of \$4.8 million or 4.2% were more than offset by exchange rate declines of \$6.2 million. Almost all of the growth came from the sensor, relay and planar product lines across all major geographic areas. Sales growth in local currency was particularly strong in Europe and Asia.

Income from operations in the fiscal year 2016 increased \$0.2 million, or 1.1%, when compared to the prior year. The operating improvements were a result of a facility consolidation into our Northlake site partially offset by \$0.4 million of purchase accounting charges associated with the Northlake acquisition.

Income from operations in the fiscal year 2015 increased \$1.2 million, or 5.8%, when compared to the prior year. The improvement were driven by the organic sales growth; operational improvements; material and labor cost savings; favorable product mix due to increased sensor and relay sales; facility consolidations; and improved efficiencies in our new Mexico facility partially offset by a negative impact due to foreign exchange rates.

Hydraulics

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
			%			%
	2016	2015	Change	2015	2014	Change
Net sales	\$ 45,045	\$ 41,441	8.7%	\$ 41,441	\$ 34,538	20.0%
Income from operations	7,947	7,013	13.3%	7,013	5,781	21.3%
Operating income margin	17.6%	16.9%		16.9%	16.7%	

Net sales in fiscal year 2016 increased \$3.6 million, or 8.7% compared to the prior year. Sales distribution by market in 2016 was as follows: 40% dump trailer and truck, 22% refuse, 22% after market, 6% export, and 10% other markets. Strong demand in the traditional North American dump trailer and truck markets was the largest contributor for the net sales increase in addition to market share gains experienced in the refuse market. In the first quarter of fiscal year 2017 we will complete the expansion of our Tianjin, China facility in order to support continued global market growth.

Net sales in the fiscal year 2015 increased \$6.9 million, or 20.0% when compared to the prior year. Diversification of our OEM business into refuse and construction equipment along with strong demand for cylinder requirements in the traditional North American dump truck and trailer markets drove the increase in net sales. The business has focused on delivering custom engineered cylinder solutions to OEM customers, including single and double acting telescopic hydraulic cylinders, hydraulic rod cylinders, and most recently pneumatic cylinders. New applications for these products are being utilized on roll off container handlers, garbage trucks, airline support equipment, lift trucks, and specialty loading equipment.

Income from operations in the fiscal year 2016 increased \$0.9 million or 13.3% when compared to the prior year due to market growth, increased sales volume and cost containment efforts.

Income from operations in the fiscal year 2015 increased \$1.2 million or 21.3% when compared to the prior year due to increased sales volume and better facility utilization.

Corporate, Restructuring and Other

(in thousands except percentages)	2016 compared to 2015			2015 compared to 2014		
	2016	2015	% Change	2015	2014	% Change
Corporate	\$ (24,996)	\$ (21,051)	18.7%	\$ (21,051)	\$ (26,054)	-19.2%
Restructuring	(4,232)	(3,443)	22.9%	(3,443)	(10,077)	-65.8%
Other operating income (expense), net	(7,458)	438	-1,802.7%	438	3,462	-87.3%

Corporate expenses in fiscal year 2016 increased \$3.9 million or 18.7% when compared to the prior year. The increase is due to increased health care expenses, compensation, and professional services.

Corporate expenses in fiscal year 2015 decreased \$5.0 million or 19.2% when compared to the prior year. The decrease is primarily due to the absence of management transition cost of \$3.9 million incurred in 2014.

Restructuring expenses during fiscal year 2016 were \$4.2 million primarily related to a \$1.7 million non-cash charge from the sale of a vacant property and a \$0.7 million non-cash charge to discontinue a product line at our Refrigeration Solutions group. We also have taken restructuring actions to downsize a Canadian facility in connection with the Northlake acquisition and have reduced personnel in those of our locations impacted by the slowdown in the oil and gas market.

Restructuring expense during fiscal year 2015 was \$3.4 million compared to \$10.1 million the prior year. Restructuring expense consisted of \$2.6 million related to facility closures and consolidations in the Food Service Equipment.

The Company anticipates further restructuring charges in 2017 based upon market conditions and cost reduction activities to improve our competitive advantage.

During fiscal year 2016, other operating income (expense), net was primarily due to a non-cash loss of \$7.3 million incurred to adjust the net realizable value of the U.S. Roll Plate and Machinery business in preparation for its sale on July 1, 2016.

During fiscal year 2015, other operating income (expense), net decreased by \$3.0 million from the prior year. The decrease was primarily a reduction of insurance proceeds received related to the catastrophic failure of a large vertical machining center located at our Engineering Technologies facility in Massachusetts.

Discontinued Operations

In pursuing our business strategy, we have divested certain businesses and recorded activities of these businesses as discontinued operations.

In June 2014, the Company divested the American Foodservice Company, (AFS) a manufacturer of custom design and fabrication of counter systems and cabinets, in our Food Service Equipment segment. In connection with this sale, the Company received proceeds of \$3.1 million and recorded a net loss on disposal of \$3.2 million.

On March 30, 2012, the Air Distribution Products Group, (ADP) was sold to a private equity buyer for consideration of \$16.1 million consisting of \$13.1 million in cash and a \$3.0 million promissory note from the buyer. The note was secured by a mortgage on the ADP real estate sold in the transaction in Detroit Lakes, MN, Medina, NY, and Powder Springs, GA. During the first quarter 2016, the private equity buyer of ADP sold one of the facilities securing the note. The Company released all mortgages on the properties and accepted an advanced payment of \$2.8 million during October 2015 in order to reduce repayment risk and settle all obligations under the note. The Company recorded a \$0.2 million loss in discontinued operations during the first quarter 2016 related to this transaction.

The Company remained the obligor of ADP's Philadelphia, PA facility and administrative offices. We have entered into a renewable sublease agreement with a third party for this space. Our total obligation with respect to the lease is \$0.7 million, of which \$0.3 million was recorded as a liability at June 30, 2016. We do not expect to record additional charges related to these obligations.

During 2014, the Company received notice that its obligations under a guarantee provided to the buyers of ADP were triggered as a result of its withdrawal from both of the multi-employer pension plans in which ADP previously participated. The last of these obligations were settled in July of fiscal year 2016 by a \$0.5 million payment to the final multi-employer plan.

The following table summarizes the Company's discontinued operations activity, by operation, for the years ended June 30, (in thousands):

	Year Disposed	2016	2015	2014
Sales:				
American Foodservice Company	2014	\$ -	\$ -	\$ 20,556
Income (loss) before taxes:				
American Foodservice Company	2014	3	(492)	(8,339)
(1)				
Air Distribution Products Group	2012	(225)	(137)	(1,849)
Other loss from discontinued operations		(7)	(130)	(387)
Income (loss) before taxes from discontinued operations		(229)	(759)	10,575
(Provision) benefit for tax		55	259	3,692
Net income (loss) from discontinued operations		\$ (174)	\$ (500)	\$ (6,883)

(1) American Foodservice Company incurred a pretax operational loss of \$3.5 million and pretax loss on sale of \$4.8 million in 2014.

Liquidity and Capital Resources

At June 30, 2016, our total cash balance was \$122.0 million, of which \$111.5 million was held by foreign subsidiaries. The repatriation of cash balances from certain of our subsidiaries could have adverse tax consequences or be subject to capital controls; however, those balances are generally available without legal restrictions to fund ordinary business operations. Our current plans are not expected to require a repatriation of cash to fund our U.S. operations and as a result, we intend to indefinitely reinvest our foreign earnings to fund our overseas growth. If the undistributed earnings of our foreign subsidiaries are needed for operations in the United States, we would be required to accrue and pay U.S. taxes upon repatriation.

Cash Flow

Net cash provided by operating activities from continuing operations for the year ended June 30, 2016 was \$81.2 million, compared to \$66.2 million for the same period in 2015. Changes to net cash provided by operating activities of \$15.1 million primarily related to net working capital changes of \$17.8 million between periods. Net cash used in investing activities from continuing operations for the year ended June 30, 2016 was \$31.6 million, consisting primarily of \$17.9 million for capital expenditure and \$13.7 million to acquire Northlake Engineering, Inc. Net cash used by financing activities for continuing operations for the year ended June 30, 2016, was \$20.7 million consisting of debt repayments of \$10.0 million, cash dividends of \$6.8 million, and repurchased treasury stock of \$5.6 million.

Net cash provided by operating activities from continuing operations for the year ended June 30, 2015 was \$66.2 million, compared to \$72.0 million for the same period in 2014. Changes to net cash provided by operating activities of \$5.8 million primarily related to increases to net income of \$5.5 million and \$2.9 million of decreases to non-cash stock compensation expenses which were more than offset by the use of cash for net working capital needs during the year. Net cash used in investing activities from continuing operations for the year ended June 30, 2015 was \$78.5 million, consisting primarily of \$57.1 million for the acquisitions and \$22.6 million for capital expenditures. Net cash provided by financing activities for continuing operations for the year ended June 30, 2015, was \$44.6 million consisting of net borrowings of \$58.0 million primarily related to acquisitions during the year, partially offset by dividends paid of \$5.8 million, and repurchased treasury stock of \$10.4million.

Capital Structure

During fiscal year 2015, the Company entered into an Amended and Restated Credit Agreement (Credit Facility , or facility). This five-year Credit Facility expires in December 2019 and has a borrowing limit of \$400 million, which can be increased by an amount of up to \$100 million, in accordance with specified conditions contained in the agreement. The facility also includes a \$10 million sublimit for swing line loans and a \$30 million sublimit for letters of credit.

Under the terms of the Credit Facility, we will pay a variable rate of interest and a commitment fee on borrowed amounts as well as a commitment fee on unused amounts under the facility. The amount of the commitment fee will depend upon both the undrawn amount remaining available under the facility and the Company's funded debt to EBITDA (as defined in the agreement) ratio at the last day of each quarter. As our funded debt to EBITDA ratio increases, the commitment fee will increase.

Funds borrowed under the facility may be used for the repayment of debt, working capital, capital expenditures, acquisitions (so long as certain conditions, including a specified funded debt to EBITDA leverage ratio is maintained), and other general corporate purposes. As of June 30, 2016, the Company has used \$7.7 million against the letter of credit sub-facility and had the ability to borrow \$254.4 million under the facility based on our current EBITDA. The facility contains customary representations, warranties and restrictive covenants, as well as specific financial covenants. The Company's current financial covenants under the facility are as follows:

Interest Coverage Ratio - The Company is required to maintain a ratio of Earnings Before Interest and Taxes, as Adjusted (Adjusted EBIT per the Credit Facility), to interest expense for the trailing twelve months of at least 3.0:1. Adjusted EBIT per the Credit Facility specifically excludes extraordinary and certain other defined items such as cash restructuring and acquisition-related charges up to \$7.5 million, and unlimited non-cash charges including gains or losses on sale of property and goodwill adjustments. At June 30, 2016, the Company's Interest Coverage Ratio was 28.76:1.

Leverage Ratio - The Company's ratio of funded debt to trailing twelve month Adjusted EBITDA per the facility, calculated as Adjusted EBIT per the Credit Facility plus depreciation and amortization, may not exceed 3.5:1. At June 30, 2016, the Company's Leverage Ratio was 1.01:1.

As of June 30, 2016, we had borrowings under our facility of \$93.0 million and the effective rate of interest for outstanding borrowings under the facility was 1.76%. Our primary cash requirements in addition to day-to-day operating needs include interest payments, capital expenditures, acquisitions, share repurchases, and dividends. Our primary sources of cash for these requirements are cash flows from continuing operations and borrowings under the facility. We expect to spend between \$26.0 and \$28.0 million on capital expenditures during 2017, and expect that depreciation and amortization expense will be between \$18.0 and \$19.0 million and \$3.0 and \$4.0 million, respectively.

In order to manage our interest rate exposure, at June 30, 2016 we are party to \$50.0 million of active floating to fixed rate swaps. These swaps convert our interest payments from LIBOR to a weighted average rate of 1.43%.

The following table sets forth our capitalization at June 30, (in thousands):

	2016	2015
Long-term debt, net of issuance cost	\$ 92,114	\$ 101,753
Less cash and cash equivalents	121,988	96,128
Net (cash) debt	(29,874)	5,625
Stockholders' equity	369,959	348,570
Total capitalization	\$ 340,085	\$ 354,195

Stockholders' equity increased year over year by \$21.4 million, primarily as a result of current year net income of \$52.1 million partially offset by \$11.3 million of unfavorable foreign currency translation, \$6.8 million dividends paid, \$13.4 million of unrealized pension loss. The Company's net (cash) debt to capital percentage changed to (8.8%) net cash to capital for the year ended June 30, 2016 from 1.6% net debt to capital for the year ended June 30, 2015. The change in net debt to capital is primarily driven by a reduction in borrowings and cash generated through operations.

We sponsor five defined benefit plans including two in the U.S. and one in Germany, U.K. and Ireland. The Company's pension plan is frozen for U.S. employees and participants in the plan ceased accruing future benefits. The fair value of the Company's U.S. pension plan assets was \$197.9 million at June 30, 2016 and the projected benefit obligation in the U.S. was \$269.2 million at that time. As a result of past contributions, the plan is not expected to be 100% funded under ERISA rules at June 30, 2016, but we do not expect to make mandatory contributions to the plan until 2018. We expect to pay \$1.4 million in prescribed contributions to our U.K. defined benefit plan and other unfunded defined benefit plans in both the U.S. and Europe during fiscal year 2017.

We have evaluated the current and long-term cash requirements of our defined benefit and defined contribution plans as of June 30, 2016 and determined our operating cash flows from continuing operations and available liquidity are expected to be sufficient to cover the required contributions under ERISA and other governing regulations.

We have an insurance program in place to fund supplemental retirement income benefits for six retired executives. Current executives and new hires are not eligible for this program. At June 30, 2016 the underlying policies had a cash surrender value of \$19.5 million and are reported net of loans of \$10.2 million for which we have the legal right of offset.

Contractual obligations of the Company as of June 30, 2016 are as follows (in thousands):

	Payments Due by Period			
	Less than 1	1-3	3-5	More than 5

Contractual Obligations	Total	Year	Years	Years	Years
Long-term debt obligations	\$ 93,018	\$ 12	\$ 6	\$ 93,000	\$ -
Operating lease obligations	36,399	7,442	9,954	5,394	13,609
Estimated interest payments ⁽¹⁾	6,596	1,987	3,705	904	-
Post-retirement benefit payments ⁽²⁾	44,546	1,402	16,519	22,577	4,048
Total	\$ 180,559	\$ 10,843	\$ 30,184	\$ 121,875	\$ 17,657

(1)

Estimated interest payments are based upon effective interest rates as of June 30, 2016, and include the impact of interest rate swaps. See Item 7A for further discussions surrounding interest rate exposure on our variable rate borrowings.

(2)

Post-retirement benefits and pension plan contribution payments represents future pension payments to comply with local funding requirements. Our policy is to fund domestic pension liabilities in accordance with the minimum and maximum limits imposed by the Employee Retirement Income Security Act of 1974 (ERISA), federal income tax laws and the funding requirements of the Pension Protection Act of 2006.

At June 30, 2016, we had \$2.5 million of non-current liabilities for uncertain tax positions. We are not able to provide a reasonable estimate of the timing of future payments related to these obligations.

Off Balance Sheet Items

In March 2012, the Company sold substantially all of the assets of the ADP business. In connection with the divestiture, the Company remained the obligor of ADP's Philadelphia, PA facility and administrative offices. On February 4, 2015 we entered into a one year renewable, sublease agreement for this building. Our total obligation with respect to the remaining Philadelphia leases is \$0.7 million, of which \$0.3 million was recorded as a liability at June 30, 2016. We do not expect to record additional charges related to these obligations.

At June 30, 2016, and 2015, the Company had standby letters of credit outstanding, primarily for insurance and trade financing purposes, of \$7.7 million and \$7.2 million, respectively.

We had no other material off balance sheet items at June 30, 2016, other than the operating leases summarized above in the Contractual obligations table.

Other Matters

Inflation Certain of our expenses, such as wages and benefits, occupancy costs and equipment repair and replacement, are subject to normal inflationary pressures. Inflation for medical costs can impact both our reserves for self-insured medical plans as well as our reserves for workers' compensation claims. We monitor the inflationary rate and make adjustments to reserves whenever it is deemed necessary. Our ability to manage medical costs inflation is dependent upon our ability to manage claims and purchase insurance coverage to limit the maximum exposure for us. Each of our segments is subject to the effects of changing raw material costs caused by the underlying commodity price movements. In general, we do not enter into purchase contracts that extend beyond one operating cycle. While Standex considers our relationship with our suppliers to be good, there can be no assurances that we will not experience any supply shortage.

Foreign Currency Translation Our primary functional currencies used by our non-U.S. subsidiaries are the Euro, British Pound Sterling (Pound), Mexican (Peso), and Chinese (Yuan). During the current year, the Pound, Euro, Peso and Yuan all decreased in value related to the U.S. Dollar, our reporting currency. Since June 30, 2015 the Pound, Euro, Peso, and Yuan have depreciated by 15.3%, 0.3%, 17.6%, and 6.5% respectively (all relative to the U.S. Dollar). These exchange values were used in translating the appropriate non-U.S. subsidiaries' balance sheets into U.S. Dollars at the end of the current year.

Defined Benefit Pension Plans We record expenses related to these plans based upon various actuarial assumptions such as discount rates and assumed rates of returns. The Company's pension plan was frozen for substantially all remaining eligible U.S. employees in 2015 and participants in the plan ceased accruing future benefits.

Environmental Matters To the best of our knowledge, we believe that we are presently in substantial compliance with all existing applicable environmental laws and regulations and do not anticipate any instances of non-compliance that will have a material effect on our future capital expenditures, earnings or competitive position.

Seasonality We are a diversified business with generally low levels of seasonality, however our fiscal third quarter is typically the period with the lowest level of activity.

Employee Relations The Company has labor agreements with a number of union locals in the United States and a number of European employees belong to European trade unions. There are two union contracts in the U.S. expiring during fiscal year 2017. The first has been successfully negotiated in July of 2016 and the second will not expire until October 2016.

Critical Accounting Policies

The Consolidated Financial Statements include accounts of the Company and all of our subsidiaries. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements. Although, we believe that materially different amounts would not be reported due to the accounting policies described below, the application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. We have listed a number of accounting policies which we believe to be the most critical.

The Company's product sales are recorded when persuasive evidence of an arrangement exists, delivery has occurred, the price to the buyer is fixed or determinable, and collectability is reasonably assured. For products that include installation, and if the installation meets the criteria to be considered a separate element, product revenue is recognized upon delivery, and installation revenue is recognized when the installation is complete. Revenues under certain fixed price contracts are generally recorded when deliveries are made.

Sales and estimated profits under certain long-term contracts are recognized under the percentage-of-completion methods of accounting, whereby profits are recorded pro rata, based upon current estimates of costs to complete such contracts. Losses on contracts are provided for in the period in which the losses become determinable. Revisions in profit estimates are reflected on a cumulative basis in the period in which the basis for such revision becomes known. Any excess of the billings over cost and estimated earnings on long-term contracts is included in deferred revenue.

Collectability of Accounts Receivable Accounts Receivable are reduced by an allowance for amounts that may become uncollectible in the future. Our estimate for the allowance for doubtful accounts related to trade receivables includes evaluation of specific accounts where we have information that the customer may have an inability to meet its financial obligation together with a general provision for unknown but existing doubtful accounts.

Realizability of Inventories Inventories are valued at the lower of cost or market. The Company regularly reviews inventory values on hand using specific aging categories, and records a provision for obsolete and excess inventory based on historical usage and estimated future usage. As actual future demand or market conditions may vary from those projected by management, adjustments to inventory valuations may be required.

Realization of Goodwill - Goodwill and certain indefinite-lived intangible assets are not amortized, but instead are tested for impairment at least annually and more frequently whenever events or changes in circumstances indicate that the fair value of the asset may be less than its carrying amount of the asset. The Company's annual test for impairment is performed using a May 31st measurement date.

We have identified our reporting units for impairment testing as our eleven operating segments, which are aggregated into our five reporting segments as disclosed in Note 18 Industry Segment Information.

The test for impairment is a two-step process. The first step compares the carrying amount of the reporting unit to its estimated fair value (Step 1). To the extent that the carrying value of the reporting unit exceeds its estimated fair value, a second step is performed, wherein the reporting unit's carrying value is compared to the implied fair value (Step 2). To the extent that the carrying value exceeds the implied fair value, impairment exists and must be recognized.

As quoted market prices are not available for the Company's reporting units, the fair value of the reporting units is determined using a discounted cash flow model (income approach). This method uses various assumptions that are specific to each individual reporting unit in order to determine the fair value. In addition, the Company compares the estimated aggregate fair value of its reporting units to its overall market capitalization.

Our annual impairment testing at each reporting unit relied on assumptions surrounding general market conditions, short-term growth rates, a terminal growth rate of 2.5%, and detailed management forecasts of future cash flows prepared by the relevant reporting unit. Fair values were determined primarily by discounting estimated future cash flows at a weighted average cost of capital of 10.31%. An increase in the weighted average cost of capital of approximately 200 basis points in the analysis would not result in the identification of any impairments.

While we believe that our estimates of future cash flows are reasonable, changes in assumptions could significantly affect our valuations and result in impairments in the future. The most significant assumption involved in the Company's determination of fair value is the cash flow projections of each reporting unit. Certain reporting units have been significantly impacted by the current global economic downturn and if the effects of the current global economic environment are protracted or the recovery is slower than we have projected estimates of future cash flows for each reporting unit may be insufficient to support the carrying value of the reporting units, requiring the Company to re-assess its conclusions related to fair value and the recoverability of goodwill.

As a result of our annual assessment, the Company determined that the fair value of the reporting units exceeded their respective carrying values. Therefore, no impairment charges were recorded in connection with our annual assessment during 2016. Subsequent to our annual impairment test, we disposed of \$273 thousand of goodwill recorded in the Engraving segment in connection with our sale of the Roll, Plate, and Machinery business.

Cost of Employee Benefit Plans We provide a range of benefits to certain retirees, including pensions and some postretirement benefits. We record expenses relating to these plans based upon various actuarial assumptions such as discount rates, assumed rates of return, compensation increases and turnover rates. The expected return on plan assets assumption of 7.10% in the U.S. is based on our expectation of the long-term average rate of return on assets in the pension funds and is reflective of the current and projected asset mix of the funds and considers the historical returns

earned on the funds. We have analyzed the rates of return on assets used and determined that these rates are reasonable based on the plans' historical performance relative to the overall markets as well as our current expectations for long-term rates of returns for our pension assets. The U.S. discount rate of 4.0% reflects the current rate at which pension liabilities could be effectively settled at the end of the year. The discount rate is determined by matching our expected benefit payments from a stream of AA- or higher bonds available in the marketplace, adjusted to eliminate the effects of call provisions. We review our actuarial assumptions, including discount rate and expected long-term rate of return on plan assets, on at least an annual basis and make modifications to the assumptions based on current rates and trends when appropriate. Based on information provided by our actuaries and other relevant sources, we believe that our assumptions are reasonable.

The cost of employee benefit plans includes the selection of assumptions noted above. A twenty-five basis point change in the expected return on plan assets assumptions, holding our discount rate and other assumptions constant, would increase or decrease pension expense by approximately \$0.6 million per year. A twenty-five basis point change in our discount rate, holding all other assumptions constant, would have no impact on 2016 pension expense as changes to amortization of net losses would be offset by changes to interest cost. In future years the impact of discount rate changes could yield different sensitivities. See the Notes to the Consolidated Financial Statements for further information regarding pension plans.

Business Combinations - The accounting for business combinations requires estimates and judgments as to expectations for future cash flows of the acquired business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair values for assets acquired and liabilities assumed. The fair values assigned to tangible and intangible assets acquired and liabilities assumed, are based on management's estimates and assumptions, as well as other information compiled by management, including valuations that utilize customary valuation procedures and techniques. If the actual results differ from the estimates and judgments used in these fair values, the amounts recorded in the consolidated financial statements could result in a possible impairment of the intangible assets and goodwill, or require acceleration of the amortization expense of finite-lived intangible assets.

Allocations of the purchase price for acquisitions are based on estimates of the fair value of the net assets acquired and are subject to adjustment upon finalization of the purchase price allocation. During this measurement period, the Company will adjust assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and liabilities as of that date. All changes that do not qualify as measurement period adjustments are included in current period earnings.

Recently Issued Accounting Pronouncements

See "Item 8. Financial Statements and Supplementary Data, Note 1. Summary of Accounting Policies" for information regarding the effect of recently issued accounting pronouncements on our consolidated statements of operations, comprehensive income, stockholders' equity, cash flows, and notes for the year ended June 30, 2016.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Risk Management

We are exposed to market risks from changes in interest rates, commodity prices and changes in foreign currency exchange. To reduce these risks, we selectively use, from time to time, financial instruments and other proactive management techniques. We have internal policies and procedures that place financial instruments under the direction of the Treasurer and restrict all derivative transactions to those intended for hedging purposes only. The use of financial instruments for trading purposes (except for certain investments in connection with the non-qualified defined contribution plan) or speculation is strictly prohibited. The Company has no majority-owned subsidiaries that are excluded from the consolidated financial statements. Further, we have no interests in or relationships with any special purpose entities.

Exchange Risk

We are exposed to both transactional risk and translation risk associated with exchange rates. The transactional risk is mitigated, in large part, by natural hedges developed with locally denominated debt service on intercompany accounts.

We also mitigate certain of our foreign currency exchange rate risks by entering into forward foreign currency contracts from time to time. The contracts are used as a hedge against anticipated foreign cash flows, such as dividend payments, loan payments, and materials purchases, and are not used for trading or speculative purposes. The fair values of the forward foreign currency exchange contracts are sensitive to changes in foreign currency exchange rates, as an adverse change in foreign currency exchange rates from market rates would decrease the fair value of the contracts. However, any such losses or gains would generally be offset by corresponding gains and losses, respectively, on the related hedged asset or liability. At June 30, 2016 and 2015, the fair value, in the aggregate, of the Company's open foreign exchange contracts was \$0.1 million and an asset of \$0.7 million, respectively.

Our primary translation risk is with the Euro, British Pound Sterling, Peso, and Chinese Yuan. A hypothetical 10% appreciation or depreciation of the value of any these foreign currencies to the U.S. Dollar at June 30, 2016, would not result in a material change in our operations, financial position, or cash flows. We do not hedge our translation risk. As a result, fluctuations in currency exchange rates can affect our stockholders' equity.

Interest Rate

The Company's effective rate on variable-rate borrowings under the revolving credit agreement is 1.76% and 1.46% at June 30, 2016 and 2015, respectively. Our interest rate exposure is limited primarily to interest rate changes on our variable rate borrowings. From time to time, we will use interest rate swap agreements to modify our exposure to interest rate movements. We currently have \$50.0 million of active floating to fixed rate swaps with terms ranging

from one to three years. These swaps convert our interest payments from LIBOR to a weighted average rate of 1.43%. At June 30, 2016 and 2015, the fair value, in the aggregate, of the Company's interest rate swaps was \$1.0 million and \$0.6 million, respectively. Due to the impact of the swaps, an increase in interest rates would not materially impact our annual interest expense at June 30, 2016.

Concentration of Credit Risk

We have a diversified customer base. As such, the risk associated with concentration of credit risk is inherently minimized. As of June 30, 2016, no one customer accounted for more than 5% of our consolidated outstanding receivables or of our sales.

Commodity Prices

The Company is exposed to fluctuating market prices for all commodities used in its manufacturing processes. Each of our segments is subject to the effects of changing raw material costs caused by the underlying commodity price movements. In general, we do not enter into purchase contracts that extend beyond one operating cycle. While Standex considers our relationship with our suppliers to be good, there can be no assurances that we will not experience any supply shortage.

The Engineering Technologies, Food Service Equipment, Electronics, and Hydraulics segments are all sensitive to price increases for steel products, other metal commodities and petroleum based products. In the past year, we have experienced price fluctuations for a number of materials including steel, copper wire, other metal commodities, refrigeration components and foam insulation. These materials are some of the key elements in the products manufactured in these segments. Wherever possible, we will implement price increases to offset the impact of changing prices. The ultimate acceptance of these price increases, if implemented, will be impacted by our affected divisions' respective competitors and the timing of their price increases.

STANDEX INTERNATIONAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF ACCOUNTING POLICIES

Basis of Presentation and Consolidation

Standex International Corporation (Standex or the Company) is a diversified manufacturing company with operations in the United States, Europe, Asia, Africa, and Latin America. The accompanying consolidated financial statements include the accounts of Standex International Corporation and its subsidiaries and are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). All intercompany accounts and transactions have been eliminated in consolidation.

The Company considers events or transactions that occur after the balance sheet date, but before the financial statements are issued to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. We evaluated subsequent events through the date and time our consolidated financial statements were issued.

Accounting Estimates

The preparation of consolidated financial statements in conformity with GAAP requires the use of estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the financial statements and for the period then ended. Estimates are based on historical experience, actuarial estimates, current conditions and various other assumptions that are believed to be reasonable under the circumstances. These estimates form the basis for making judgments about the carrying values of assets and liabilities when they are not readily apparent from other sources. These estimates assist in the identification and assessment of the accounting treatment necessary with respect to commitments and contingencies. Actual results may differ from these estimates under different assumptions or conditions.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments purchased with a maturity of three months or less. These investments are carried at cost, which approximates fair value. At June 30, 2016 and 2015, the Company's cash was comprised solely of cash on deposit.

Trading Securities

The Company purchases investments for its non-qualified defined contribution plan for employees who exceed certain thresholds under our traditional 401(k) plan. These investments are classified as trading and reported at fair value. The investments generally consist of mutual funds, are included in other non-current assets and amounted to \$2.3 million at June 30, 2016 and 2015. Gains and losses on these investments are recorded as other non-operating income (expense), net in the Consolidated Statements of Operations.

Accounts Receivable Allowances

The Company has provided an allowance for doubtful accounts reserve which represents the best estimate of probable loss inherent in the Company's account receivables portfolio. This estimate is derived from the Company's knowledge of its end markets, customer base, products, and historical experience.

The changes in the allowances for uncollectible accounts during 2016, 2015, and 2014 were as follows (in thousands):

	2016	2015	2014
Balance at beginning of year	\$ 2,226	\$ 2,282	\$ 2,325
Acquisitions and other	3	4	93
Provision charged to expense	8	496	375
Write-offs, net of recoveries	(118)	(556)	(511)
Balance at end of year	\$ 2,119	\$ 2,226	\$ 2,282

Inventories

Inventories are stated at the lower of (first-in, first-out) cost or market.

Long-Lived Assets

Long-lived assets that are used in operations, excluding goodwill and identifiable intangible assets, are tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. Recognition and measurement of a potential impairment loss is performed on assets grouped with other assets and liabilities at the lowest level where identifiable cash flows are largely independent of the cash flows of other assets and liabilities. An impairment loss is the amount by which the carrying amount of a long-lived asset (asset group)

exceeds its estimated fair value. Fair value is determined based on discounted cash flows or appraised values, depending upon the nature of the assets.

Property, Plant and Equipment

Property, plant and equipment are reported at cost less accumulated depreciation. Depreciation is recorded on assets over their estimated useful lives, generally using the straight-line method. Lives for property, plant and equipment are as follows:

Buildings	40 to 50 years
Leasehold improvements	Lesser of useful life or term, unless renewals are deemed to be reasonably assured
Machinery and equipment	8 to 15 years
Furniture and Fixtures	3 to 10 years
Computer hardware and software	3 to 7 years

Routine maintenance costs are expensed as incurred. Major improvements are capitalized. Major improvements to leased buildings are capitalized as leasehold improvements and depreciated over the lesser of the lease term or the life of the improvement.

Routine maintenance costs are expensed as incurred. Major improvements are capitalized. Major improvements to leased buildings are capitalized as leasehold improvements and depreciated over the lesser of the lease term or the life of the improvement.

Amortization of computer hardware and software of \$0.6 million, \$0.5 million, and \$0.4 million is included as a component of depreciation expense for the years ended June 30, 2016, 2015, and 2014, respectively.

Goodwill and Identifiable Intangible Assets

All business combinations are accounted for using the acquisition method. Goodwill and identifiable intangible assets with indefinite lives, are not amortized, but are reviewed annually for impairment or more frequently if impairment indicators arise. Identifiable intangible assets that are not deemed to have indefinite lives are amortized on an accelerated basis over the following useful lives:

Customer relationships	5 to 16 years
Patents	12 years
Non-compete agreements	5 to 10 years
Other	10 years
Trade names	Indefinite life

See discussion of the Company's assessment of impairment in Note 5 Goodwill, and Note 6 Intangible Assets.

Fair Value of Financial Instruments

The financial instruments, shown below, are presented at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. When observable prices or inputs are not available, valuation models may be applied.

Assets and liabilities recorded at fair value in the consolidated balance sheet are categorized based upon the level of judgment associated with the inputs used to measure their fair values. Hierarchical levels directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities and the methodologies used in valuation are as follows:

Level 1 Quoted prices in active markets for identical assets and liabilities. The Company's deferred compensation plan assets consist of shares in various mutual funds (for the deferred compensation plan, investments are participant-directed) which invest in a broad portfolio of debt and equity securities. These assets are valued based on publicly quoted market prices for the funds' shares as of the balance sheet dates. For pension assets (see Note 17 Employee Benefit Plans), securities are valued based on quoted market prices for securities held directly by the trust.

Level 2 Inputs, other than quoted prices in an active market, that are observable either directly or indirectly through correlation with market data. For foreign exchange forward contracts and interest rate swaps, the Company values the instruments based on the market price of instruments with similar terms, which are based on spot and forward rates as of the balance sheet dates. For pension assets held in commingled funds (see Note 17 Employee Benefit Plans) the Company values investments based on the net asset value of the funds, which are derived from the quoted market prices of the underlying fund holdings. The Company has considered the creditworthiness of counterparties in valuing all assets and liabilities.

Level 3 Unobservable inputs based upon the Company's best estimate of what market participants would use in pricing the asset or liability.

We did not have any transfers of assets and liabilities between Level 1 and Level 2 of the fair value measurement hierarchy at June 30, 2016 and 2015.

Cash and cash equivalents, accounts receivable, accounts payable and debt are carried at cost, which approximates fair value.

The fair values of our financial instruments at June 30, 2016 and 2015 were (in thousands):

		2016			
		Total	Level 1	Level 2	Level 3
Financial Assets					
Marketable securities - deferred compensation plan	\$	2,333	\$ 2,333	\$ -	\$ -
Foreign Exchange contracts		11	-	11	-
Financial Liabilities					
Foreign Exchange contracts	\$	94	\$ -	\$ 94	\$ -
Interest rate swaps		1,038	-	1,038	-
		2015			
		Total	Level 1	Level 2	Level 3
Financial Assets					
Marketable securities - deferred compensation plan	\$	2,324	\$ 2,324	\$ -	\$ -
Foreign Exchange contracts		844	-	844	-
Financial Liabilities					
Foreign Exchange contracts	\$	193	\$ -	\$ 193	\$ -
Interest rate swaps		551	-	551	-

Concentration of Credit Risk

The Company is subject to credit risk through trade receivables and short-term cash investments. Concentration of risk with respect to trade receivables is minimized because of the diversification of our operations, as well as our large customer base and our geographical dispersion. No individual customer accounts for more than 5% of revenues or accounts receivable in the periods presented.

Short-term cash investments are placed with high credit-quality financial institutions. The Company monitors the amount of credit exposure in any one institution or type of investment instrument.

Revenue Recognition

The Company's product sales are recorded when persuasive evidence of an arrangement exists, delivery has occurred, the price to the buyer is fixed or determinable, and collectability is reasonably assured. For products that include installation, and if the installation meets the criteria to be considered a separate element, product revenue is recognized upon delivery, and installation revenue is recognized when the installation is complete. Revenues under certain fixed price contracts are generally recorded when deliveries are made.

Sales and estimated profits under certain long-term contracts are recognized under the percentage-of-completion methods of accounting, whereby profits are recorded pro rata, based upon current estimates of costs to complete such contracts. Losses on contracts are provided for in the period in which the losses become determinable. Revisions in profit estimates are reflected on a cumulative basis in the period in which the basis for such revision becomes known. Any excess of the billings over cost and estimated earnings on long-term contracts is included in deferred revenue.

Cost of Goods Sold and Selling, General and Administrative Expenses

The Company includes expenses in either cost of goods sold or selling, general and administrative categories based upon the natural classification of the expenses. Cost of goods sold includes expenses associated with the acquisition, inspection, manufacturing and receiving of materials for use in the manufacturing process. These costs include inbound freight charges, purchasing and receiving costs, inspection costs, internal transfer costs as well as depreciation, amortization, wages, benefits and other costs that are incurred directly or indirectly to support the manufacturing process. Selling, general and administrative includes expenses associated with the distribution of our products, sales effort, administration costs and other costs that are not incurred to support the manufacturing process. The Company records distribution costs associated with the sale of inventory as a component of selling, general and administrative expenses in the Consolidated Statements of Operations. These expenses include warehousing costs, outbound freight charges and costs associated with distribution personnel. Our gross profit margins may not be comparable to those of other entities due to different classifications of costs and expenses.

The Company purchased \$3.3 million, \$2.1 million, and \$1.6 million from a 20% owned equity interest during the years ended June 30, 2016, 2015, and 2014 respectively. The inventory was purchased under customary terms and conditions and sold to customers in the ordinary course of business. Earnings from this investment are not material and are accounted for under the equity method.

Our total advertising expenses, which are classified under selling, general, and administrative expenses are primarily related to trade shows, and totaled \$4.3 million, \$5.0 million, and \$4.6 million for the years ended June 30, 2016, 2015, and 2014, respectively.

Research and Development

Research and development expenditures are expensed as incurred. Total research and development costs, which are classified under selling, general, and administrative expenses, were \$4.9 million, \$4.1 million, and \$4.8 million for the years ended June 30, 2016, 2015, and 2014, respectively.

Warranties

The expected cost associated with warranty obligations on our products is recorded when the revenue is recognized. The Company's estimate of warranty cost is based on contract terms and historical warranty loss experience that is periodically adjusted for recent actual experience. Since warranty estimates are forecasts based on the best available information, claims costs may differ from amounts provided. Adjustments to initial obligations for warranties are made as changes in the obligations become reasonably estimable.

The changes in continuing operations warranty reserve, which are recorded as accrued liabilities, during 2016, 2015, and 2014 were as follows (in thousands):

	2016	2015	2014
Balance at beginning of year	\$ 7,436	\$ 6,941	\$ 6,782
Acquisitions and other charges	(5)	3	274
Warranty expense	13,503	11,086	3,937
Warranty claims	(11,849)	(10,594)	(4,052)
Balance at end of year	\$ 9,085	\$ 7,436	\$ 6,941

The increase in warranty expense during 2016 compared to 2015 is primarily due to the introduction of a longer warranty period for sales in our Refrigeration services group.

Stock-Based Compensation Plans

Restricted stock awards generally vest over a three-year period. Compensation expense associated with these awards is recorded based on their grant-date fair values and is generally recognized on a straight-line basis over the vesting period except for awards with performance conditions, which are recognized on a graded vesting schedule.

Compensation cost for an award with a performance condition is based on the probable outcome of that performance condition. The stated vesting period is considered non-substantive for retirement eligible participants. Accordingly, the Company recognizes any remaining unrecognized compensation expense upon participant reaching retirement eligibility.

Foreign Currency Translation

The functional currency of our non-U.S. operations is generally the local currency. Assets and liabilities of non-U.S. operations are translated into U.S. Dollars on a monthly basis using period-end exchange rates. Revenues and expenses of these operations are translated using average exchange rates. The resulting translation adjustment is reported as a component of comprehensive income (loss) in the consolidated statements of stockholders' equity and comprehensive income. Gains and losses from foreign currency transactions are included in results of operations and were not material for any period presented.

Derivative Instruments and Hedging Activities

The Company recognizes all derivatives on its balance sheet at fair value.

Forward foreign currency exchange contracts are periodically used to limit the impact of currency fluctuations on certain anticipated foreign cash flows, such as foreign purchases of materials and loan payments from subsidiaries.

The Company enters into such contracts for hedging purposes only. For hedges of intercompany loan payments, the Company records derivative gains and losses directly to the statement of operations due to the general short-term nature and predictability of the transactions.

The Company also uses interest rate swaps to manage exposure to interest rates on the Company's variable rate indebtedness. The Company values the swaps based on contract prices in the derivatives market for similar instruments. The Company has designated the swaps as cash flow hedges, and changes in the fair value of the swaps are recognized in other comprehensive income (loss) until the hedged items are recognized in earnings. Hedge ineffectiveness, if any, associated with the swaps will be reported by the Company in interest expense.

The Company does not hold or issue derivative instruments for trading purposes.

Income Taxes

Deferred assets and liabilities are recorded for the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred tax assets and liabilities are determined based on the differences between the financial statements and the tax bases of assets and liabilities using enacted tax rates. Valuation allowances are provided when the Company does not believe it more likely than not the benefit of identified tax assets will be realized.

The Company provides reserves for potential payments of tax to various tax authorities related to uncertain tax positions and other issues. The Company accounts for uncertain tax positions based on a determination of whether and how much of a tax benefit taken by the Company in its tax filings or positions is more likely than not to be realized following resolution of any potential contingencies present related to the tax benefit, assuming that the matter in question will be raised by the tax authorities. Interest and penalties associated with such uncertain tax positions are recorded as a component of income tax expense.

Earnings Per Share

(share amounts in thousands)	2016	2015	2014
Basic Average Shares Outstanding	12,682	12,655	12,613
Effect of Dilutive Securities Stock Options and Restricted Stock Awards	102	150	165
Diluted Average Shares Outstanding	12,784	12,805	12,778

Both basic and dilutive income is the same for computing earnings per share. There were no outstanding instruments that had an anti-dilutive effect at June 30, 2016, 2015 and 2014.

Recently Issued Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) and the International Accounting Standards Board jointly issued a comprehensive new revenue recognition standard, ASU 2014-09, *Revenue from Contract with Customers*, that will supersede nearly all existing revenue recognition guidance under US GAAP and IFRS. The standard's primary principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The original standard was effective for fiscal years beginning after December 15, 2016; however, in July 2015, the FASB approved a one-year deferral of this standard, with a new effective date for fiscal years beginning after December 15, 2017. We expect to adopt this standard in the quarter ending September 30, 2018. The Company is continuing to evaluate the impact of adopting ASU 2014-09 on its consolidated financial statements

In April 2015, the FASB issued accounting standard update ASU 2015-3, *Simplifying the Presentation of Debt Issuance Cost*. The standard is effective for annual and interim periods with those annual periods beginning after December 15, 2015. Early adoption is permitted and retrospective application is required. We adopted this standard in the quarter ended September 30, 2015. The Company's adoption of ASU 2015-3 has been completed and is reflected herein by the reclass of debt issuance cost from Other non-current assets to Long-term debt.

In July 2015, the FASB issued ASU 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory*. The standard is effective for annual and interim periods with those annual periods beginning after December 15, 2016. The amendment is to be applied prospectively. The Company is continuing to evaluate the impact of adopting ASU 2015-11 but currently we do not expect the adoption to have a material impact on the Company's consolidated financial statements.

In September 2015, the FASB issued ASU 2015-16, *Business Combination (Topic 805): Simplifying the Accounting for Measurement Period Adjustments*. The Standard is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. The amendments of this standard will not materially impact the Company.

In November 2015, the FASB issued ASC Update 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes*, as part of its simplification initiatives. This update requires deferred tax liabilities and assets to be classified as non-current on the consolidated condensed balance sheet for fiscal years beginning after December 15, 2016, and interim periods within those annual periods. Early application is permitted. An entity can elect adoption prospectively or retrospectively to all periods presented. The Company is continuing to evaluate the impact of adopting ASU 2015-17.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Overall (Subtopic 825-10): Recognition and measurement of financial assets and financial liabilities*. ASU 2016-01 addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. This standard is effective for annual reporting periods beginning after December 15, 2017 and interim periods within those fiscal years and early application is permitted. The adoption of this standard is not expected to have a material impact on the financial position or results of operations.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. ASU 2016-02 increases transparency and comparability among organizations by recognizing lease assets and liabilities on the balance sheet and disclosing key information about leasing arrangements. For leases with a term or twelve months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and liabilities. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018. The Company is continuing to evaluate the impact of adopting ASU 2016-02.

In March 2016 the FASB issued ASU 2016- 09, *Compensation Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The standard is applied effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company is continuing to evaluate the impact of adopting ASU 2016-09.

2. ACQUISITIONS

The Company's recent acquisitions are strategically significant to the future growth prospects of the Company, however at the time of the acquisition and June 30, 2016, we concluded, that historical results of the acquired Companies both individually and in the aggregate, were immaterial to the Company's consolidated financial results and therefore additional proforma disclosures are not presented.

Northlake

On October 1, 2015, the Company acquired Northlake Engineering, Inc., (Northlake), a Wisconsin-based designer, manufacturer and distributor of high reliability electromagnetic products and solutions serving the North America power distribution and medical equipment markets. Northlake reports to our Electronics segment.

The Company paid \$13.7 million in cash for 100% of the outstanding stock of Northlake and has recorded intangible assets of \$6.8 million, consisting of \$4.1 million of customer relationships which primarily are expected to be amortized over a period of twelve and half years, \$2.4 million of trademarks which are indefinite-lived and \$0.3 million of non-compete which are expected to be amortized over a period of five years. Acquired goodwill of \$5.1 million is deductible for income tax purposes. The Company finalized the purchase price allocation during the quarter ending June 30, 2016.

The components of the fair value of the Northlake acquisition, including the allocation of the purchase price at June 30, 2016, are as follows (in thousands):

	Preliminary Allocation		Adjustments		Final
Fair value of business combination:					
Cash payments	\$	13,859	\$	156	\$ 14,015
Less: cash acquired		(315)		-	(315)
Total	\$	13,544	\$	156	\$ 13,700
Identifiable assets acquired and liabilities assumed:					
Current assets	\$	2,810	\$	-	\$ 2,810
Property, plant, and equipment		1,407		-	1,407
Identifiable intangible assets		4,124		2,700	6,824
Goodwill		7,821		(2,700)	5,121

Other non-current assets	158	-	158
Liabilities assumed	(2,620)	-	(2,620)

Total	\$ 13,544	\$ 156	\$ 13,700

Enginetics

On September 4, 2014, the Company acquired Enginetics Corporation (Enginetics), a leading producer of aircraft engine components for all major aircraft platforms. This investment complements our Engineering Technologies segment and allows us to provide broader solutions to the aviation market.

The Company paid \$55.0 million in cash for 100% of the outstanding stock of MPE Aeroengines, Inc., of which Enginetics is a wholly owned subsidiary and has recorded intangible assets of \$10.6 million, consisting of \$9.1 million of customer relationships which are expected to be amortized over a period of fifteen years and \$1.5 million of trademarks which are indefinite-lived. Acquired goodwill of \$34.8 million is not deductible for income tax purposes due to the nature of the transaction. The Company finalized the purchase price allocation during the fourth quarter ended June 30, 2015.

The components of the fair value of the Enginetics acquisition, including the allocation of the purchase price at June 30, 2015, are as follows (in thousands):

	Final
Fair value of business combination:	
Cash payments	\$ 55,021
Less: cash acquired	(113)
Total	\$ 54,908
Identifiable assets acquired and liabilities assumed:	
Current assets	\$ 12,134
Property, plant, and equipment	8,808
Identifiable intangible assets	10,600
Goodwill	34,790
Other non-current assets	158
Liabilities assumed	(5,449)
Deferred taxes	(6,133)
Total	\$ 54,908

Ultrafryer

The Company paid a total of \$23.0 million, in cash, to acquire all of the outstanding stock of Ultrafryer Systems, Inc. (Ultrafryer), a producer of commercial deep fryers for restaurant and commercial installations on June 20, 2014. The

stock purchase agreement included, a \$2.2 million disbursement made in September of fiscal 2015 related to the purchase of land and building associated with the business.

3. INVENTORIES

Inventories are comprised of (in thousands):

June 30		2016		2015
Raw materials	\$	46,616	\$	46,865
Work in process		26,541		29,165
Finished goods		32,245		32,275
Total	\$	105,402	\$	108,305

Distribution costs associated with the sale of inventory are recorded as a component of selling, general and administrative expenses and were \$20.1 million, \$23.3 million, and \$20.8 million in 2016, 2015, and 2014, respectively.

4. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following (in thousands):

June 30		2016		2015
Land, buildings and leasehold improvements	\$	67,187	\$	71,517
Machinery, equipment and other		177,745		181,394
Total		244,932		252,911
Less accumulated depreciation		138,246		144,375
Property, plant and equipment - net	\$	106,686	\$	108,536

Depreciation expense for the years ended June 30, 2016, 2015, and 2014 totaled \$13.7 million, \$13.4 million, and \$12.2 million, respectively.

During the fourth quarter of fiscal year 2015, the Company classified land and buildings valued at \$1.9 million, net related to a vacant building that was sold in the first quarter of 2016 as available for sale within other current assets.

5. GOODWILL

Goodwill and certain indefinite-lived intangible assets are not amortized, but instead are tested for impairment at least annually and more frequently whenever events or changes in circumstances indicate that the fair value of the asset may be less than its carrying amount of the asset. The Company's annual test for impairment is performed using a May 31st measurement date.

The Company has identified our reporting units for impairment testing as its eleven operating segments, which are aggregated into five reporting segments as disclosed in Note 18 Industry Segment Information.

As quoted market prices are not available for the Company's reporting units, the fair value of the reporting units is determined using a discounted cash flow model (income approach). This method uses various assumptions that are specific to each individual reporting unit in order to determine the fair value. In addition, the Company compares the estimated aggregate fair value of its reporting units to its overall market capitalization.

While the Company believes that estimates of future cash flows are reasonable, changes in assumptions could significantly affect valuations and result in impairments in the future. The most significant assumption involved in the Company's determination of fair value is the cash flow projections of each reporting unit. If the estimates of future cash flows for each reporting unit may be insufficient to support the carrying value of the reporting units, the Company will reassess its conclusions related to fair value and the recoverability of goodwill.

As a result of our annual assessment, the Company determined that the fair value of the reporting units exceeded their respective carrying values. Therefore, no impairment charges were recorded in connection with its assessments during 2016 and 2015. Subsequent to our annual impairment test, we disposed of \$273 thousand of goodwill recorded in the Engraving segment in connection with the July 1, 2016 sale of the Roll, Plate, and Machinery business.

Changes to goodwill during the years ended June 30, 2016 and 2015 are as follows (in thousands):

	2016		2015	
Balance at beginning of year	\$	172,671	\$	143,904

Accumulated impairment losses	17,939	17,939
Balance at beginning of year, net	154,732	125,965
Acquisitions	5,121	34,881
Disposals	(273)	-
Foreign currency translation	(2,226)	(6,114)
Balance at end of year	\$ 157,354	\$ 154,732

6. INTANGIBLE ASSETS

Intangible assets consist of the following (in thousands):

	Customer Relationships		Trademarks (Indefinite-lived)		Other		Total
June 30, 2016							
Cost	\$	46,297	\$	17,263	\$	4,471	\$ 68,031
Accumulated amortization		(24,892)		-		(2,727)	(27,619)
Balance, June 30, 2016	\$	21,405	\$	17,263	\$	1,744	\$ 40,412
June 30, 2015							
Cost	\$	43,493	\$	15,514	\$	4,096	\$ 63,103
Accumulated amortization		(22,628)		-		(2,427)	(25,055)
Balance, June 30, 2015	\$	20,865	\$	15,514	\$	1,669	\$ 38,048

Amortization expense from continuing operations for the years ended June 30, 2016, 2015, and 2014 totaled \$3.6 million, \$2.8 million, and \$2.6 million, respectively. At June 30, 2016, aggregate amortization expense is estimated to be \$3.8 million in fiscal 2017, \$3.5 million in fiscal 2018, \$3.2 million in fiscal 2019, \$2.8 million in fiscal 2020, \$2.3 million in fiscal 2021, and \$7.5 million thereafter.

During the fourth quarter of 2016, the Company discontinued a previously acquired product line within the Food Service Equipment Group. As part of this discontinuation, the Company concluded that the trademark value assigned to this product line was no longer realizable and the Company recorded a \$600 thousand expense to reduce the trademark to zero.

7. DEBT

Long-term debt is comprised of the following at June 30 (in thousands):

		2016		2015
Bank credit agreements	\$	93,000	\$	103,000
Other		18		31
Total funded debt		93,018		103,031
Issuance Cost		(904)		(1,278)
Total long-term debt	\$	92,114	\$	101,753

Long-term debt is due as follows (in thousands):

2017	\$	12
2018		6
2019		-
2020		93,000
2021		-
Thereafter		-
Funded Debt		93,018
Issuance costs		(904)
Debt, net issuance cost		92,114

Bank Credit Agreements

During fiscal year 2015, the Company entered into an Amended and Restated Credit Agreement ("Credit Facility", or facility). This five-year Credit Facility expires in December 2019 and has a borrowing limit of \$400 million, which can be increased by an amount of up to \$100 million, in accordance with specified conditions contained in the agreement. The facility also includes a \$10 million sublimit for swing line loans and a \$30 million sublimit for letters of credit. The facility amends and restates a previously existing \$225 million revolving credit agreement, which was scheduled to expire in January 2017.

Under the terms of the Credit Agreement, we will pay a variable rate of interest and a commitment fee on borrowed amounts as well as a commitment fee on unused amounts under the facility. The amount of the commitment fee will depend upon both the undrawn amount remaining available under the facility and the Company's funded debt to EBITDA (as defined in the agreement) ratio at the last day of each quarter. As our funded debt to EBITDA ratio increases, the commitment fee will increase.

Funds borrowed under the facility may be used for the repayment of debt, working capital, capital expenditures, acquisitions (so long as certain conditions, including a specified funded debt to EBITDA leverage ratio is maintained), and other general corporate purposes. As of June 30, 2016, the Company had the ability to borrow \$254.4 million under the facility based on our current EBITDA. The facility contains customary representations, warranties and restrictive covenants, as well as specific financial covenants which the Company was compliant with as of June 30, 2016. The Company's current financial covenants under the facility are as follows:

Interest Coverage Ratio - The Company is required to maintain a ratio of Earnings Before Interest and Taxes, as Adjusted (Adjusted EBIT per the Credit Agreement), to interest expense for the trailing twelve months of at least 3.0:1. Adjusted EBIT per the Credit Agreement specifically excludes extraordinary and certain other defined items such as cash restructuring and acquisition-related charges up to \$7.5 million, and unlimited non-cash charges including gains or losses on sale of property and goodwill adjustments. At June 30, 2016, the Company's Interest Coverage Ratio was 28.76:1.

Leverage Ratio - The Company's ratio of funded debt to trailing twelve month Adjusted EBITDA per the credit agreement, calculated as Adjusted EBIT per the Credit Agreement plus depreciation and amortization, may not exceed 3.5:1. At June 30, 2016, the Company's Leverage Ratio was 1.01:1.

As of June 30, 2016, we had borrowings under our facility of \$93.0 million and the effective rate of interest for outstanding borrowings under the facility was 1.76%. Our primary cash requirements in addition to day-to-day operating needs include interest payments, capital expenditures, and dividends. Our primary sources of cash for these requirements are cash flows from continuing operations and borrowings under the facility.

In order to manage our interest rate exposure, we are party to \$50.0 million of active floating to fixed rate swaps. These swaps convert our interest payments from LIBOR to a weighted average rate of 1.43%.

Other Long-Term Borrowings

At June 30, 2016, and 2015, the Company had standby letter of credit sub-facility outstanding, primarily for insurance and commercial trade purposes of \$7.7 million and \$7.2 million, respectively.

8. ACCRUED LIABILITIES

Accrued expenses recorded in our Consolidated Balance Sheets at June 30, consist of the following (in thousands):

		2016		2015
Payroll and employee benefits	\$	28,375	\$	26,329
Workers' compensation		1,984		2,586
Warranty		9,085		8,066
Other		11,341		10,761
Total	\$	50,785	\$	47,742

9. DERIVATIVE FINANCIAL INSTRUMENTS

Interest Rate Swaps

In order to manage our interest rate exposure, we are party to \$50.0 million of active floating to fixed rate swaps. These swaps convert our interest payments from LIBOR to a weighted average rate of 1.43% at June 30, 2016.

The fair value of the swaps recognized in accrued liabilities and in other comprehensive income (loss) at June 30, 2016 and 2015 is as follows (in thousands):

Effective Date		Notional Amount	Fixed Interest Rate	Maturity	Fair Value at June 30,	
					2016	2015
March 15, 2012	\$	10,000	2.75%	March 15, 2016	\$ -	\$ (186)
December 19, 2014		20,000	1.18%	December 19, 2017	(201)	(140)
December 19, 2014		5,000	1.20%	December 19, 2017	(52)	(36)
December 18, 2015		15,000	1.46%	December 19, 2018	(325)	(39)
December 19, 2015		10,000	2.01%	December 19, 2019	(460)	(150)
					\$ (1,038)	\$ (551)

The Company reported no losses for the years ended June 30, 2016, 2015, and 2014, as a result of hedge ineffectiveness. Future changes in these swap arrangements, including termination of the agreements, may result in a reclassification of any gain or loss reported in accumulated other comprehensive income (loss) into earnings as an adjustment to interest expense. Accumulated other comprehensive income (loss) related to these instruments is being amortized into interest expense concurrent with the hedged exposure.

Foreign Exchange Contracts

Forward foreign currency exchange contracts are used to limit the impact of currency fluctuations on certain anticipated foreign cash flows, such as foreign purchases of materials and loan payments to and from subsidiaries.

The Company enters into such contracts for hedging purposes only. For hedges of intercompany loan payments, the Company has not elected hedge accounting due to the general short-term nature and predictability of the transactions, and records derivative gains and losses directly to the consolidated statement of operations. At June 30, 2016 and 2015 the Company had outstanding forward contracts related to hedges of intercompany loans with net unrealized gain / (losses) of \$(0.1) million and \$0.7 million, respectively, which approximate the unrealized gains or losses on the related loans. The contracts have maturity dates ranging from 2017-2019, which correspond to the related intercompany loans. The notional amounts of these instruments, by currency, are as follows:

Currency	2016	2015
Euro	2,476,683	10,134,797
Pound Sterling	593,799	1,730,542

The table below presents the fair value of derivative financial instruments as well as their classification on the balance sheet at June 30, (in thousands):

		Asset Derivatives			
		2016		2015	
Derivative designated as hedging instruments	Balance Sheet Line Item	Fair Value		Balance Sheet Line Item	Fair Value
Foreign exchange contracts	Other Assets	\$ 11		Other Assets	\$ 844

		Liability Derivatives			
		2016		2015	
Derivative designated as hedging instruments	Balance Sheet Line Item	Fair Value		Balance Sheet Line Item	Fair Value
Interest rate swaps		\$ 1,038			\$ 551

	Accrued Liabilities		Accrued Liabilities	
Foreign exchange contracts	Accrued Liabilities	94	Accrued Liabilities	193
	\$	1,132	\$	744

The table below presents the amount of gain (loss) recognized in comprehensive income on our derivative financial instruments (effective portion) designated as hedging instruments and their classification within comprehensive income for the periods ended (in thousands):

	2016	2015	2014
Interest rate swaps	\$ (743)	\$ (533)	\$ (194)
Foreign exchange contracts	(267)	(154)	-
	\$ (1,010)	\$ (687)	\$ (194)

The table below presents the amount reclassified from accumulated other comprehensive income (loss) to Net Income for the periods ended (in thousands):

Details about Accumulated Other Comprehensive Income (Loss) Components	2016	2015	2014	Affected line item in the Statements of Operations
Interest rate swaps	\$ 567	\$ 1,034	\$ 1,031	Interest expense
Foreign exchange contracts	112	-	-	Cost of goods sold
	\$ 679	\$ 1,034	\$ 1,031	

10. INCOME TAXES

The components of income from continuing operations before income taxes are as follows (in thousands):

	2016	2015	2014
U.S. Operations	\$ 23,996	\$ 33,161	\$ 26,965
Non-U.S. Operations	44,529	42,956	40,838
Total	\$ 68,525	\$ 76,117	\$ 67,803

The Company utilizes the asset and liability method of accounting for income taxes. Deferred income taxes are determined based on the estimated future tax effects of differences between the financial and tax bases of assets and liabilities given the provisions of the enacted tax laws. The components of the provision for income taxes on continuing operations (in thousands) were as shown below:

	2016		2015		2014	
Current:						
Federal	\$	11,014	\$	9,195	\$	9,653
State		523		556		415
Non-U.S.		11,514		11,372		11,329
Total Current		23,051		21,123		21,397
Deferred:						
Federal	\$	(5,214)	\$	556	\$	(2,017)
State		(1,060)		(495)		(376)
Non-U.S.		(482)		(310)		(950)
Total Deferred		(6,756)		(249)		(3,343)
Total	\$	16,295	\$	20,874	\$	18,054

The following is a reconciliation from the U.S. Federal income tax rate on continuing operations to the total tax provision is as follows (in thousands):

	2016	2015	2014
Provision at statutory tax rate	35.0%	35.0%	35.0%
State taxes	-0.5%	0.1%	0.0%
Impact of foreign operations	-6.7%	-5.0%	-5.6%
Federal tax credits	-1.8%	-1.2%	-0.7%
Life insurance proceeds	0.0%	0.0%	-1.7%
Contributions, net	-1.3%	0.0%	0.0%
Other	-0.9%	-1.5%	-0.4%
Effective income tax provision	23.8%	27.4%	26.6%

Changes in the effective tax rates from period to period may be significant as they depend on many factors including, but not limited to, size of the Company's income or loss and any one-time activities occurring during the period.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2016 was impacted by the following items: (i) a net benefit of \$0.9 million related to a bargain-sale of idle property to a charitable organization, and (ii) a benefit of \$0.7 million related to the R&D tax credit, and (iii) a benefit of \$4.9 million due to the mix of income earned in jurisdictions with beneficial tax rates.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2015 was impacted by the following items: (i) a benefit of \$0.5 million related to the R&D tax credit that expired during the fiscal year on December 31, and (ii) a benefit of \$4.0 million due to the mix of income earned in jurisdictions with beneficial tax rates.

The Company's income tax provision from continuing operations for the fiscal year ended June 30, 2014 was impacted by the following items: (i) a benefit of \$0.5 million related to the R&D tax credit that expired during the

fiscal year on December 31, (ii) a benefit of \$0.5 million related to a decrease in the statutory tax rate in the United Kingdom on prior period deferred tax liabilities recorded during the first quarter during the fiscal year, (iii) a benefit of \$1.1 million due to non-taxable life insurance proceeds received in the third quarter and (iv) a benefit of \$3.8 million due to the mix of income earned in jurisdictions with beneficial tax rates.

Significant components of the Company's deferred income taxes are as follows (in thousands):

	2016	2015
Deferred tax liabilities:		
Depreciation and amortization	\$ (27,437)	\$ (31,126)
Total deferred tax liability	\$ (27,437)	\$ (31,126)
Deferred tax assets:		
Accrued compensation	\$ 3,707	\$ 3,911
Accrued expenses and reserves	6,154	6,680
Pension	29,730	19,624
Inventory	2,548	2,066
Other	1,432	1,741
Net operating loss and credit carry forwards	5,948	3,983
Total deferred tax asset	\$ 49,519	\$ 38,005
Less: Valuation allowance	(649)	(656)
Net deferred tax asset (liability)	\$ 21,433	\$ 6,223

The Company estimates the degree to which deferred tax assets, including net operating loss and credit carry forwards will result in a benefit based on expected profitability by tax jurisdiction and provides a valuation allowance for tax assets and loss carry forwards that it believes will more likely than not go unrealized. The valuation allowance at June 30, 2016 applies to state and foreign loss carry forwards, which management has concluded that it is more likely than not that these tax benefits will not be realized. The increase (decrease) in the valuation allowance from the prior year was less than \$0.1 million.

As of June 30, 2016, the Company had gross state net operating loss ("NOL") and credit carry forwards of approximately \$44.0 million and \$2.7 million, respectively, which may be available to offset future state income tax liabilities and expire at various dates from 2016 through 2035. In addition, the Company had foreign NOL carry forwards of approximately \$2.6 million, \$1.3 million of which carry forward indefinitely and \$1.3 million that carry forward for 10 years.

The Company's income taxes currently payable for federal and state purposes have been reduced by the benefit of the tax deduction in excess of recognized compensation cost from employee stock compensation transactions. The provision for income taxes that is currently payable has not been adjusted by approximately \$2.1 million and \$2.1 million of such benefits as they have been allocated to additional paid in capital in 2016 and 2015, respectively.

A provision has not been made for U.S. or additional non-U.S. taxes on \$194.5 million of undistributed earnings of international subsidiaries that could be subject to taxation if remitted to the U.S. It is not practicable to estimate the amount of tax that might be payable on the remaining undistributed earnings. Our intention is to reinvest these earnings permanently or to repatriate the earnings only when it is tax effective to do so. Accordingly, we believe that

U.S. tax on any earnings that might be repatriated would be substantially offset by U.S. foreign tax credits.

The total provision for income taxes included in the consolidated financial statements was as follows (in thousands):

	2016		2015		2014	
Continuing operations	\$	16,295	\$	20,874	\$	18,054
Discontinued operations		(55)		(259)		(3,692)
	\$	16,240	\$	20,615	\$	14,362

The changes in the amount of gross unrecognized tax benefits during 2016, 2015 and 2014 were as follows (in thousands):

	2016		2015		2014	
Beginning Balance	\$	1,054	\$	1,033	\$	1,286
Additions based on tax positions related to the current year		2,125		17		25
Additions for tax positions of prior years		-		4		-
Reductions for tax positions of prior years		(201)		-		(278)
Ending Balance	\$	2,978	\$	1,054	\$	1,033

If the unrecognized tax benefits in the table above were recognized in a future period, \$2.5 million of the unrecognized tax benefit would impact the Company's effective tax rate.

Within the next twelve months, the statute of limitations will close in various U.S., state and non-U.S. jurisdictions. As a result, it is reasonably expected that net unrecognized tax benefits from these various jurisdictions would be recognized within the next twelve months. The recognition of these tax benefits is not expected to have a material impact to the Company's financial statements. The Company does not reasonably expect any other significant changes in the next twelve months. The following tax years, in the major tax jurisdictions noted, are open for assessment or refund:

Country	Years Ending June 30,
United States	2014 to 2016
Canada	2012 to 2016
Germany	2011 to 2016
Ireland	2016 to 2016
Portugal	2013 to 2016
United Kingdom	2012 to 2016

The Company's policy is to include interest expense and penalties related to unrecognized tax benefits within the provision for income taxes on the consolidated statements of operations. At both June 30, 2016 and June 30, 2015, the company had less than \$0.1 million for accrued interest expense on unrecognized tax benefits.

11. COMMITMENTS

The Company leases certain property and equipment under agreements with initial terms ranging from one to twenty years. Rental expense related to continuing operations for the years ended June 30, 2016, 2015, and 2014 was approximately \$6.6 million, \$6.1 million and \$5.5 million, respectively.

The gross minimum annual rental commitments under non-cancelable operating leases, principally real-estate at June 30, 2016:

(in thousands)	Lease	Sublease	Net obligation
2017	\$ 7,442	\$ 350	\$ 7,092
2018	4,818	87	4,731
2019	5,136	-	5,136
2020	2,958	-	2,958
2021	2,436	-	2,436
Thereafter	13,609	-	13,609

12. CONTINGENCIES

From time to time, the Company is subject to various claims and legal proceedings, including claims related to environmental remediation, either asserted or unasserted, that arise in the ordinary course of business. While the outcome of these proceedings and claims cannot be predicted with certainty, the Company's management does not believe that the outcome of any of the currently existing legal matters will have a material impact on the Company's consolidated financial position, results of operations or cash flow. The Company accrues for losses related to a claim or litigation when the Company's management considers a potential loss probable and can reasonably estimate such potential loss.

13. STOCK-BASED COMPENSATION AND PURCHASE PLANS

Stock-Based Compensation Plans

Under incentive compensation plans, the Company is authorized to make grants of stock options, restricted stock and performance share units to provide equity incentive compensation to key employees and directors. The stock award program offers employees and directors the opportunity to earn shares of our stock over time, rather than options that give the employees and directors the right to purchase stock at a set price. The Company has stock plans for directors, officers and certain key employees.

Total compensation cost recognized in income for equity based compensation awards was \$5.1million, \$3.8 million, and \$6.6 million for the years ended June 30, 2016, 2015, and 2014, respectively, primarily within Selling, General, and Administrative Expenses. The total income tax benefit recognized in the consolidated statement of operations for equity-based compensation plans was \$1.8 million, \$1.3 million, and \$2.3 million for the years ended June 30, 2016, 2015 and 2014, respectively.

319,211 shares of common stock were reserved for issuance under various compensation plans at June 30, 2016.

Restricted Stock Awards

The Company may award shares of restricted stock to eligible employees and non-employee directors of the Company at no cost, giving them in most instances all of the rights of stockholders, except that they may not sell, assign, pledge or otherwise encumber such shares and rights during the restriction period. Such shares and rights are subject to forfeiture if certain employment conditions are not met. During the restriction period, recipients of the shares are entitled to dividend equivalents on such shares, providing that such shares are not forfeited. Dividends are accumulated and paid out at the end of the restriction period. During 2016, 2015, and 2014, the Company granted 48,984, 43,598, and 62,698 shares, respectively, of restricted stock to eligible participants. Restrictions on the stock awards generally lapse between fiscal 2017 and fiscal 2019. For the years ended June 30, 2016, 2015, and 2014, \$2.6 million, \$2.3 million, and \$3.3 million, respectively, was recognized as compensation expense related to restricted stock awards. Substantially all awards are expected to vest.

A summary of restricted stock awards activity during the year ended June 30, 2016 is as follows:

Restricted Stock Awards			
	Number of Shares		Aggregate Intrinsic Value
Outstanding, June 30, 2015	105,079	\$	8,398,964
Granted	48,984		
Exercised / vested	(42,580)	\$	1,069,817
Canceled	(6,958)		
Outstanding, June 30, 2016	104,525	\$	8,636,901

Restricted stock awards granted during 2016, 2015 and 2014 had a weighted average grant date fair value of \$77.38, \$76.47, and \$58.84, respectively. The grant date fair value of restricted stock awards is determined based on the closing price of the Company's common stock on the date of grant. The total intrinsic value of awards exercised during the years ended June 30, 2016, 2015, and 2014 was \$1.1million, \$2.8 million, and \$3.1 million, respectively.

As of June 30, 2016, there was \$3.1 million of unrecognized compensation costs related to awards expected to be recognized over a weighted-average period of 1.49 years.

Executive Compensation Program

The Company operates a compensation program for key employees. The plan contains both an annual component as well as a long-term component. Under the annual component, participants may elect to defer up to 50% of their annual incentive compensation in restricted stock which is purchased at a discount to the market. Additionally, non-employee directors of the Company may defer a portion of their director's fees in restricted stock units which is purchased at a discount to the market. During the restriction period, recipients of the shares are entitled to dividend equivalents on such units, providing that such shares are not forfeited. Dividend equivalents are accumulated and paid out at the end of the restriction period. The restrictions on the units expire after three years. At June 30, 2016 and 2015, respectively, 30,597 and 43,549 shares of restricted stock units are outstanding and subject to restrictions that lapse between fiscal 2017 and fiscal 2019. The compensation expense associated with this incentive program is charged to income over the restriction period. The Company recorded compensation expense related to this program of \$0.2 million, \$0.3 million, and \$0.7 million for the years ended June 30, 2016, 2015 and 2014, respectively.

As of June 30, 2016, there was \$0.3 million of unrecognized compensation costs related to awards expected to be recognized over a weighted-average period of 1.28 years

The fair value of the awards under the annual component of this incentive program is measured using the Black-Scholes option-pricing model. Key assumptions used to apply this pricing model are as follows:

	2016	2015	2014
Risk-free interest rates	1.10%	0.88%	0.70%
Expected life of option grants (in years)	3	3	3
Expected volatility of underlying stock	26.6%	32.0%	38.9%
Expected quarterly dividends (per share)	\$ 0.12	\$ 0.10	\$ 0.08

Under the long-term component, grants of performance share units (PSUs) are made annually to key employees and the share units are earned based on the achievement of certain overall corporate financial performance targets over the performance period. At the end of the performance period, the number of shares of common stock issued will be determined by adjusting upward or downward from the target in a range between 50% and 200%. No shares will be issued if the minimum performance threshold is not achieved. The final performance percentage, on which the payout will be based, considering the performance metrics established for the performance period, will be certified by the Compensation Committee of the Board of Directors.

The awards granted by the Committee provided that the PSUs will be converted to shares of common stock if the Company's EBITDA (earnings before interest, taxes, depreciation and amortization) and return on assets meet specified levels approved by the Committee. A participant's right to any shares that are earned will vest in three equal installments. An executive whose employment terminates prior to the vesting of any installment for a reason other than death, disability, retirement, or following a change in control, will forfeit the shares represented by that installment. In certain circumstances, such as death, disability, or retirement, PSUs are paid on a pro-rata basis. In the event of a change in control, vesting of the awards granted is accelerated.

A summary of the awards activity under the executive compensation program during the year ended June 30, 2016 is as follows:

	Annual Component			Performance Stock Units		
	Number of Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Number of Shares	Aggregate Intrinsic Value	
Non-vested, June 30, 2015	43,549	\$ 41.70	\$ 794,828	28,450	\$ 1,873,626	
Granted	12,383	\$ 58.35		34,124		
Vested	(19,899)	\$ 31.50	\$ 880,209	(341)	\$ 18,577	
Forfeited	(5,436)	\$ 50.58		(7,497)		
Non-vested, June 30, 2016	30,597	\$ 52.62	\$ 286,195	54,736	\$ 3,926,057	

Restricted stock awards granted under the annual component of this program in fiscal 2016, 2015, and 2014 had a grant date fair value of \$82.79, \$80.98, and \$69.47, respectively. The PSUs granted in fiscal 2016, 2015 and 2014 had a grant date fair value of \$76.61, \$74.82, and \$54.48, respectively. The total intrinsic value of awards vested under the executive compensation program during the years ended June 30, 2016, 2015 and 2014 was \$2.3 million, \$1.5 million, and \$2.2 million, respectively.

The Company recognized compensation expense related to the PSUs of \$2.3 million, \$1.3 million, and \$2.7 million for the years ended June 30, 2016, 2015 and 2014, respectively based on the probability of the performance targets being met. The total unrecognized compensation costs related to non-vested performance share units was \$1.6 million at June 30, 2016, which is expected to be recognized over a weighted average period of 1.30 years.

Employee Stock Purchase Plan

The Company has an Employee Stock Purchase Plan that allows employees to purchase shares of common stock of the Company at a discount from the market each quarter. Shares of our stock may be purchased by employees quarterly at 95% of the fair market value on the last day of each quarter. Shares of stock reserved for the plan were 90,679 at June 30, 2016. Shares purchased under this plan aggregated 3,809, 3,382, and 4,473 in 2016, 2015 and 2014, respectively, at an average price of \$75.66, \$74.42, and \$58.54, respectively.

14. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The components of the Company's accumulated other comprehensive income (loss) at June 30 are as follows (in thousands):

	2016		2015
Foreign currency translation adjustment	\$ (24,636)	\$	(13,333)
Unrealized pension losses, net of tax	(92,698)		(79,248)
Unrealized losses on derivative instruments, net of tax	(641)		(436)
Total	\$ (117,975)	\$	(93,017)

15. DISCONTINUED OPERATIONS

In pursuing our business strategy, we have divested certain businesses and recorded activities of these businesses as discontinued operations.

In June 2014, the Company divested the American Foodservice Company, (AFS) a manufacturer of custom design and fabrication of counter systems and cabinets, in our Food Service Equipment segment. In connection with this sale, the Company received proceeds of \$3.1 million and recorded a net loss on disposal of \$3.2 million.

On March 30, 2012, Air Distribution Products Group, (ADP) was sold to a private equity buyer for consideration of \$16.1 million consisting of \$13.1 million in cash and a \$3.0 million promissory note from the buyer. The note was secured by a mortgage on the ADP real estate sold in the transaction in Detroit Lakes, MN, Medina, NY, and Powder Springs, GA. During the first quarter 2016, the private equity buyer of ADP sold one of the facilities securing the note. The Company released all mortgages on the properties and accepted an advanced payment of \$2.8 million during October 2015 in order to reduce repayment risk and settle all obligations under the note. The Company recorded a \$0.2 million loss in discontinued operations during the first quarter 2016 related to this transaction.

The Company remained the obligor of ADP's Philadelphia, PA facility and administrative offices. We have entered into a renewable sublease agreement with a third party for this space. Our total obligation with respect to the lease is \$0.7 million, of which \$0.3 million was recorded as a liability at June 30, 2016. We do not expect to record additional charges related to these obligations.

During 2014, the Company received notice that its obligations under a guarantee provided to the buyers of ADP were triggered as a result of its withdrawal from both of the multi-employer pension plans in which ADP previously participated. The last of these obligations were settled in July of fiscal year 2016 by a \$0.5 million payment to the final multi-employer plan.

The following table summarizes the Company's discontinued operations activity, by operation, for the years ended June 30, (in thousands):

		Year Disposed		
		2016	2015	2014
Sales:				
American Foodservice Company	2014	\$ -	\$ -	\$ 20,556
Air Distribution Products Group	2012	-	-	-
		-	-	20,556
Income (loss) before taxes:				
American Foodservice Company (1)	2014	3	(492)	(8,339)
Air Distribution Products Group	2012	(225)	(137)	(1,849)
Other loss from discontinued operations		(7)	(130)	(387)
Income (loss) before taxes from discontinued operations		(229)	(759)	(10,575)
(Provision) benefit for tax		55	259	3,692
Net income (loss) from discontinued operations		\$ (174)	\$ (500)	\$ (6,883)

(1) American Foodservice Company incurred a pretax operational loss of \$3.5 million and pretax loss on sale of \$4.8 million in 2014.

Assets and liabilities related to discontinued operations to be retained by the Company are recorded in the Consolidated Balance Sheets at June 30 under the following captions (in thousands):

	2016	2015
Current assets	\$ -	\$ 23
Non-current assets	14	3,014
Current liabilities	1,204	1,383
Non-current liabilities	55	896

16. RESTRUCTURING

The Company has undertaken a number of initiatives that have resulted in severance, restructuring, and related charges. A summary of charges by initiative is as follows (in thousands):

Year Ended June 30,	Involuntary Employee Severance and Benefit Costs	Other	Total
2016 Restructuring Initiatives	\$ 1,046	\$ 893	\$ 1,939
Prior Year Initiatives	96	2,197	2,293
Total expense	\$ 1,142	\$ 3,090	\$ 4,232
2015 Restructuring Initiatives	\$ 847	\$ 2,319	\$ 3,166
Prior Year Initiatives	11	266	277
Total expense	\$ 858	\$ 2,585	\$ 3,443
2014 Restructuring Initiatives	\$ 1,528	\$ 8,477	\$ 10,005
Prior Year Initiatives	72	-	72
Total expense	\$ 1,600	\$ 8,477	\$ 10,077

2016 Restructuring Initiatives

The Company continues to focus on our efforts to reduce cost and improve productivity across our businesses, particularly through headcount reductions, facility closures, and consolidations. The Company's 2016 initiatives to date include the movement of manufacturing from a legacy Canadian facility into our newly acquired Northlake facility and a reduction of personnel in those locations impacted by the slowdown in the oil and gas market.

Restructuring expenses during fiscal year 2016 were \$4.2 million primarily related to a \$1.7 million non-cash charge from the sale of a vacant property and a \$0.7 million non-cash charge to discontinue a product line at our Refrigeration Solutions group. Restructuring activities related to 2016 initiatives are substantially complete.

The Company anticipates further restructuring charges in 2017 based upon market conditions and cost reduction activities to improve our competitive advantage.

Activity in the reserves related to 2016 restructuring initiatives is as follows (in thousands):

	Involuntary Employee Severance and Benefit Costs	Other	Total
Restructuring Liabilities at June 30, 2015	\$ -	\$ -	\$ -
Additions	991	304	1,295
Payments	(991)	(272)	(1,263)
Restructuring Liabilities at June 30, 2016	\$ -	\$ 32	\$ 32

Prior Year Initiatives

The Company previously announced the closure of our Food Service Equipment U.K. facility and entered into a distribution agreement with a U.K. based partner in order to reduce channel costs and enhance profitability, expand and strengthen our U.K. Food Service Equipment group's presence for all of our brands.

Restructuring activities related to all prior year initiatives are substantially complete. The cumulative expense related to all activities making up this initiative is expected to be \$5.7 million.

Activity in the reserves related to prior year restructuring initiatives is as follows (in thousands):

	Involuntary Employee Severance and Benefit Costs	Other	Total
	\$ 78	\$ 306	\$ 384

Restructuring Liabilities at June 30,
2015

17. EMPLOYEE BENEFIT PLANS*Retirement Plans*

The Company has defined benefit pension plans covering certain current and former employees both inside and outside of the U.S. The Company's pension plan for U.S. salaried employees was frozen as of December 31, 2007, and participants in the plan ceased accruing future benefits. The Company's pension plan for U.S. hourly employees was frozen for substantially all participants as of July 31, 2013, and replaced with a defined contribution benefit plan. During fiscal 2015, the Society of Actuaries released new mortality tables that reflect increased life expectancy over the previous tables. The company incorporated these new tables into the 2015 measurement of its U.S. pension obligations.

Net periodic benefit cost for U.S. and non-U.S. plans included the following components (in thousands):

	U.S. Plans			Foreign Plans		
	Year Ended June 30,			Year Ended June 30,		
	2016	2015	2014	2016	2015	2014
Service Cost	\$ 70	\$ 211	\$ 233	\$ 34	\$ 44	\$ 46
Interest Cost	11,489	10,476	11,241	1,428	1,618	1,723
Expected return on plan assets	(13,864)	(13,954)	(13,513)	(1,294)	(1,474)	(1,532)
Recognized net actuarial loss	3,979	3,945	3,941	835	750	819
Amortization of prior service cost (benefit)	14	54	57	(49)	(53)	(60)
Curtailment	-	244	-	-	-	-
Net periodic benefit cost (benefit)	\$ 1,688	\$ 976	\$ 1,959	\$ 954	\$ 885	\$ 996

The following table sets forth the funded status and amounts recognized as of June 30, 2016 and 2015 for our U.S. and foreign defined benefit pension plans (in thousands):

	U.S. Plans		Foreign Plans	
	Year Ended June 30,		Year Ended June 30,	
	2016	2015	2016	2015
Change in benefit obligation

---------------	----	----------	----	----------	----	---------	----	---------

Amounts recognized in the consolidated balance sheets

consists of:

Prepaid Benefit Cost	\$	-	\$	-	\$	422	\$	107
Current liabilities		(248)		(199)		(286)		(313)
Non-current liabilities		(71,064)		(47,306)		(6,949)		(6,109)
Net amount recognized	\$	(71,312)	\$	(47,505)	\$	(6,813)	\$	(6,315)
Unrecognized net actuarial loss	\$	137,053	\$	114,715	\$	10,122	\$	10,655
Unrecognized prior service cost		-		14		(81)		(130)
Accumulated other comprehensive income, pre-tax	\$	137,053	\$	114,729	\$	10,041	\$	10,525

The accumulated benefit obligation for all defined benefit pension plans was \$310.4 million and \$295.0 million at June 30, 2016 and 2015, respectively.

The estimated actuarial net loss and prior service benefit for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year are \$5.8 million and less than \$0.1 million, respectively.

Plan Assets and Assumptions

The fair values of the Company's pension plan assets at June 30, 2016 and 2015 by asset category, as classified in the three levels of inputs described in Note 1 under the caption *Fair Value of Financial Instruments*, are as follows (in thousands):

June 30, 2016				
	Total	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 6,924	\$ 511	\$ 6,413	\$ -

Other	10%	3%
Total	100%	100%

Our investment policy for the U.S. pension plans targets a range of exposure to the various asset classes. Standex rebalances the portfolio periodically when the allocation is not within the desired range of exposure. The plan seeks to provide returns in excess of the various benchmarks. The benchmarks include the following indices: S&P 500; Citigroup PMI EPAC; Citigroup World Government Bond and Barclays Aggregate Bond. A third party investment consultant tracks the plan's portfolio relative to the benchmarks and provides quarterly investment reviews which

consist of a performance and risk assessment on all investment managers and on the portfolio.

Certain managers within the plan use, or have authorization to use, derivative financial instruments for hedging purposes, the creation of market exposures and management of country and asset allocation exposure. Currency speculation derivatives are strictly prohibited.

Year Ended June 30	2016	2015	2014
Plan assumptions - obligation			
Discount rate	1.50 - 4.00%	2.30 - 4.70%	2.90 - 4.50%
Rate of compensation increase	3.30%	3.80%	3.80%
Plan assumptions - cost			
Discount rate	2.30 - 4.70%	2.90 - 4.50%	3.50 - 5.10%
Expected return on assets	3.90 - 7.10%	4.20 - 7.25%	4.60 - 7.25%
Rate of compensation increase	3.75%	3.80%	3.90%

Included in the above are the following assumptions relating to the obligations for defined benefit pension plans in the United States at June 30, 2016; a discount rate of 4.0% and expected return on assets of 7.10%. The U.S. defined benefit pension plans represent the majority of our pension obligations. The expected return on plan assets assumption is based on our expectation of the long-term average rate of return on assets in the pension funds and is reflective of the current and projected asset mix of the funds. The discount rate reflects the current rate at which pension liabilities could be effectively settled at the end of the year. The discount rate is determined by matching our expected benefit payments from a stream of AA- or higher bonds available in the marketplace, adjusted to eliminate the effects of call provisions.

Expected benefit payments for the next five years are as follows: 2017, \$17.1 million; 2018, \$17.1 million; 2019, \$17.2 million; 2020, \$17.4 million; 2021, \$17.2 million and thereafter, \$89.1 million. The Company expects to make \$1.4 million of contributions to its pension plans in 2017.

The Company operates a defined benefit plan in Germany which is unfunded.

Multi-Employer Pension Plans

We contribute to a number of multiemployer defined benefit plans under the terms of collective bargaining agreements that cover our union-represented employees. These plans generally provide for retirement, death and/or termination benefits for eligible employees within the applicable collective bargaining units, based on specific eligibility/participation requirements, vesting periods and benefit formulas. The risks of participating in these multiemployer plans are different from single-employer plans in the following aspects:

Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.

If a participating employer stops contributing to the multiemployer plan, the unfunded obligations of the plan may be borne by the remaining participating employers.

If we choose to stop participating in some of our multiemployer plans, we may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability. However, cessation of participation in a multiemployer plan and subsequent payment of any withdrawal liability is subject to the collective bargaining process.

The following table outlines the Company's participation in multiemployer pension plans for the periods ended June 30, 2016, 2015, and 2014, and sets forth the yearly contributions into each plan. The EIN/Pension Plan Number column provides the Employer Identification Number (EIN) and the three-digit plan number. The most recent Pension Protection Act zone status available in 2016 and 2015 relates to the plans' two most recent fiscal year-ends. The zone status is based on information that we received from the plans' administrators and is certified by each plan's actuary. Among other factors, plans certified in the red zone are generally less than 65% funded, plans certified in the orange zone are both less than 80% funded and have an accumulated funding deficiency or are expected to have a deficiency in any of the next six plan years, plans certified in the yellow zone are less than 80% funded, and plans certified in the green zone are at least 80% funded. The FIP/RP Status Pending/Implemented column indicates whether a financial improvement plan (FIP) for yellow/orange zone plans, or a rehabilitation plan (RP) for red zone plans, is either pending or has been implemented. For all plans, the Company's contributions do not exceed 5% of the total contributions to the plan in the most recent year.

Pension Fund	EIN/Plan Number	Pension Protection Act							Expiration Date of Collective Bargaining Agreement

Retirement Savings Plans

The Company has two primary employee savings plans, one for salaried employees and one for hourly employees. Substantially all of our full-time domestic employees are covered by these savings plans. Under the provisions of the plans, employees may contribute a portion of their compensation within certain limitations. The Company, at the discretion of the Board of Directors, may make contributions on behalf of our employees under the plans. Company contributions were \$4.0 million, \$3.8 million, and \$4.0 million for the years ended June 30, 2016, 2015, and 2014, respectively. At June 30, 2016, the salaried plan holds approximately 84,000 shares of Company common stock, representing approximately 7% of the holdings of the plan.

Postretirement Benefits Other Than Pensions

The Company sponsors an unfunded postretirement medical plan covering certain full-time employees who retire and have attained the requisite age and years of service. Retired employees are required to contribute toward the cost of coverage according to various established rules.

The accumulated benefit obligation of the post-retirement medical plan was less than \$0.2 million at both June 30, 2016 and June 30, 2015. The plan holds no assets as the Company makes contributions as benefits are due. Contributions for each of the last two fiscal years were less than \$0.1 million. The net periodic benefit cost for each of the last three fiscal years was less than \$0.1 million. A 1% increase in the assumed health care cost trend rate does not impact either the accumulated benefit obligation or the net postretirement cost, as the employer contribution for each participant is a fixed amount.

18. INDUSTRY SEGMENT INFORMATION

The Company has determined that it has five reportable segments organized around the types of product sold:

Food Service Equipment an aggregation of seven operating segments that manufacture and sell commercial food service equipment;

Engraving provides mold texturizing, slush molding and in-mold graining tools, project management and design services, roll engraving, hygiene product tooling, low observation vents for stealth aircraft, and process machinery for a number of industries;

Engineering Technologies provides net and near net formed single-source customized solutions in the manufacture of engineered components for the aviation, aerospace, defense, energy, industrial, medical, marine, oil and gas, and manned and unmanned space markets.

Electronics manufacturing and selling of electronic components for applications throughout the end-user market spectrum, and

Hydraulics manufacturing and selling of single and double-acting telescopic and piston rod hydraulic cylinders.

Net sales include only transactions with unaffiliated customers and include no significant intersegment or export sales. Operating income by segment and geographic area excludes general corporate and interest expenses. Assets of the Corporate segment consist primarily of cash, office equipment, and other non-current assets.

Given the nature of our corporate expenses, management has concluded that it would not be appropriate to allocate the expenses associated with corporate activities to our operating segments. These corporate expenses include the costs for the corporate headquarters, salaries and wages for the personnel in corporate, professional fees related to corporate matters and compliance efforts, stock-based compensation and post-retirement benefits related to our corporate executives, officers and directors, and other compliance related costs. The Company has a process to allocate and recharge certain direct costs to the operating segments when such direct costs are administered and paid at corporate. Such direct expenses that are recharged on an intercompany basis each month include such costs as insurance, workers' compensation programs, audit fees and pension expense. The accounting policies applied by the reportable segments are the same as those described in the Summary of Accounting Policies footnote to the consolidated financial statements. There are no differences in accounting policies which would be necessary for an understanding of the reported segment information.

Industry Segments

⁽⁴⁾ EMEA consists primarily of Europe, Middle East and S. Africa.

19. INSURANCE PROCEEDS

The Company recorded \$0.4 million and \$3.5 million in 2015 and 2014 of net gains, as components of other operating income net, from insurance proceeds we received related to a catastrophic failure of a large vertical machining center located at our Engineering Technologies facility in Massachusetts. Insurance proceeds of \$4.5 million in 2014 were partially offset by the write-off of the net book value of the machine of \$1.0 million.

During 2014, the Company recorded \$3.4 million gain, as a component of other non-operating income net, from proceeds for a life insurance policy triggered by the death of a former executive. This life insurance policy relates to an inactive program for key executives. There are six retired executives remaining in this program and current management is ineligible to participate.

20. QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

The unaudited quarterly results of operations for the years ended June 30, 2016 and 2015 are as follows (in thousands, except for per share data):

	2016			
	First	Second	Third	Fourth
Net sales	\$ 198,398	\$ 181,948	\$ 177,465	\$ 193,775
Gross profit	68,552	58,235	58,638	66,828
Net income (loss)	15,981	12,371	11,516	12,188
EARNINGS PER SHARE ⁽¹⁾				
Basic	\$ 1.26	\$ 0.97	\$ 0.91	\$ 0.96
Diluted	\$ 1.25	\$ 0.96	\$ 0.91	\$ 0.95
	2015			
	First	Second	Third	Fourth
Net sales	\$ 202,027	\$ 189,337	\$ 180,999	\$ 199,779
Gross profit	66,112	58,800	57,258	65,316
Net income (loss)	14,552	11,184	12,626	16,381
EARNINGS PER SHARE ⁽¹⁾				
Basic	\$ 1.15	\$ 0.88	\$ 1.00	\$ 1.30
Diluted	\$ 1.13	\$ 0.87	\$ 0.99	\$ 1.28

(1) Basic and diluted earnings per share are computed independently for each reporting period. Accordingly, the sum of the quarterly earnings per share amounts may not agree to the year-to-date amounts.

22. SUBSEQUENT EVENT

Subsequent to our fiscal 2016 year-end, the Company sold its U.S. Roll Plate and Machinery business as it was not strategic and did not meet our growth and return expectations. This divestiture also allows the Company's management to focus on higher growth and better return businesses within the Engraving segment.

The Company entered into an agreement for this sale in June 2016 that closed in fiscal July 2017. During the fourth quarter, the Company recorded a \$7.3 million non-cash loss to adjust the net assets of the business to their net realizable value of \$2.4 million, which is recorded as an asset held for sale on the Consolidated Balance Sheets. The expense is recorded as a component of Other Operating Income (Expense), net. The sale of the business does not constitute a significant strategic shift that will have a major effect on the entity's operations and financial results.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Standex International Corporation

We have audited the accompanying consolidated balance sheets of Standex International Corporation (a Delaware corporation) and subsidiaries (the Company) as of June 30, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the two years in the period ended June 30, 2016. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Standex International Corporation and subsidiaries as of June 30, 2016 and 2015, and the results of their operations and their cash flows for each of the two years in the period ended June 30, 2016 in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of June 30, 2016, based on criteria established in the 2013 *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated August 25, 2016 expressed an unqualified opinion.

/s/ GRANT THORNTON LLP

Boston, Massachusetts

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Standex International Corporation

Salem, New Hampshire

We have audited the accompanying consolidated statements of operations, comprehensive (loss) income, equity and cash flows of Standex International Corporation and subsidiaries (the Company) for the year ended June 30, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the results of the operations and cash flows of the Company for the year ended June 30, 2014, in conformity with accounting principles generally accepted in the United States of America.

Boston, Massachusetts

August 28, 2014

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

Not Applicable

Item 9A. Controls and Procedures

The management of the Company including its Chief Executive Officer, and Chief Financial Officer, have conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended, (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of June 30, 2016, that the disclosure controls and procedures are effective in ensuring that the information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and (ii) that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosure.

SEC guidance permits the exclusion of an evaluation of the effectiveness of a registrant's disclosure controls and procedures as they relate to the internal control over financial reporting for an acquired business during the first year following such acquisition. As discussed in Note 2 to the consolidated financial statements contained in this Report, the Company acquired all of the outstanding stock of Northlake Engineering, Inc., (Northlake) on October 1, 2015. Northlake represents less than 1.0% of the Company's consolidated revenue for the year ended June 30, 2016 and approximately 2.5% of the Company's consolidated assets at June 30, 2016. Management's evaluation and conclusion as to the effectiveness of the design and operation of the Company's disclosure controls and procedures as of June 30, 2016 excludes any evaluation of the internal control over financial reporting of Northlake.

There were no changes in the Company's internal control over financial reporting identified in connection with management's evaluation that occurred during the fourth quarter of our fiscal year (ended June 30, 2016) that has materially affected, or is reasonably likely to materially affect our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

The management of Standex is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Section 240.13a-15(f) of the Exchange Act). The Company's internal control over financial reporting is designed to provide reasonable assurance as to the reliability of the Company's financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management, including the Chief Executive Officer and the Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of the end of the fiscal year covered by this report on Form 10-K. In making this assessment, management used the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework (2013). These criteria are in the areas of control environment, risk assessment, control activities, information and communication and monitoring. Management's assessment included documenting, evaluating and testing the design and operating effectiveness of our internal control over financial reporting.

Based on the Company's processes, as described above, management, including the Chief Executive Officer and the Chief Financial Officer, has concluded that our internal control over financial reporting was effective as of June 30, 2016 to provide reasonable assurance of achieving its objectives. These results were reviewed with the Audit Committee of the Board of Directors. Grant Thornton, LLP, the independent registered public accounting firm that audited our consolidated financial statements included in this Annual Report on Form 10-K, has issued an unqualified attestation report on the Company's internal control over financial reporting, which is included below.

Inherent Limitation on Effectiveness of Controls

No matter how well designed, internal control over financial reporting has inherent limitations. Internal control over financial reporting determined to be effective can provide only reasonable, not absolute, assurance with respect to financial statement preparation and may not prevent or detect all misstatements that might be due to error or fraud. In addition, a design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Standex International Corporation

We have audited the internal control over financial reporting of Standex International Corporation (a Delaware corporation) and subsidiaries (the Company) as of June 30, 2016, based on criteria established in the 2013 *Internal*

Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting (Management's Report). Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. Our audit of, and opinion on, the Company's internal control over financial reporting does not include the internal control over financial reporting of Northlake Engineering, Inc., a wholly-owned subsidiary, whose financial statements reflect total assets and revenues constituting 2.5 percent and 1 percent, respectively, of the related consolidated financial statement amounts as of and for the year ended June 30, 2016. As indicated in Management's Report, Northlake Engineering, Inc. was acquired during fiscal 2016. Management's assertion on the effectiveness of the Company's internal control over financial reporting excluded internal control over financial reporting of Northlake Engineering, Inc.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of June 30, 2016, based on criteria established in the 2013 *Internal Control Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended June 30, 2016, and our report dated August 25, 2016 expressed an unqualified opinion on those financial statements.

Item 9B. Other Information

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The Company will file with the Securities and Exchange Commission (SEC) a definitive Proxy Statement no later than 120 days after the close of the fiscal year ended June 30, 2016 (the Proxy Statement). The information required by this item and not provided in Part 1 of this report under Item 1 Executive Officers of Standex is incorporated by reference from the Proxy Statement under the captions Election of Directors, Stock Ownership in the Company, Other Information Concerning the Company, Board of Directors and its Committees and Section 16(a) Beneficial Ownership Reporting Compliance.

There have been no material changes to the procedures by which security holders may recommend nominees to our Board of Directors. Information regarding the process for identifying and evaluating candidates for director are set forth and incorporated in reference to the information in the Proxy Statement under the caption Corporate Governance/Nominating Committee Report.

Information regarding the Audit Committee Financial Expert and the identification of the Audit Committee is incorporated by reference to the information in the Proxy Statement under the caption Other Information Concerning the Company, Board of Directors and its Committee, Audit Committee. The Audit Committee is established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act.

We maintain a corporate governance section on our website, which includes our code of ethics for senior financial management that applies to our chief executive officer, principal financial officer, principal accounting officer, controller or persons performing similar functions. Our corporate governance section also includes our code of business conduct and ethics for all employees. In addition, we will promptly post any amendments to or waivers of the code of ethics for senior financial management on our website. You can find this and other corporate governance information at www.standex.com.

Item 11. Executive Compensation

Information regarding executive compensation is incorporated by reference from the Proxy Statement under the captions and sub-captions: Executive Compensation, Compensation Discussion and Analysis, Compensation Committee Report, 2016 Summary Compensation Table, Other Information Concerning the Company, Board of Directors and Its Committees, and Directors Compensation.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The stock ownership of each person known to Standex to be the beneficial owner of more than 5% of its Common Stock is incorporated by reference in the Proxy Statement under the caption Stock Ownership of Certain Beneficial Owners. The beneficial ownership of Standex Common Stock of all directors and executive officers of the Company is incorporated by reference in the Proxy Statement under the caption and sub-caption Stock Ownership in the Company and Stock Ownership by Directors, Nominees for Director and Executive Officers, respectively.

The Equity Compensation Plan table below represents information regarding the Company's equity based compensation plan at June 30, 2016.

Plan Category	(A) Number of Securities To Be Issued Upon Exercise Of Outstanding Options, Warrants And Rights	(B) Weighted-Average Exercise Price Of Outstanding Options, Warrants And Rights	(C) Number of Securities Remaining Available For Future Issuance Under Equity Compensation Plans (Excluding Securities reflected in Column (A))
Equity compensation plans approved by stockholders	189,859	\$ 8.48	319,211
Equity compensation plans not approved by stockholders	-	-	-
Total	189,859	\$ 8.48	319,211

The Company has one equity compensation plan, approved by stockholders, under which equity securities of the Company have been authorized for issuance to employees and non-employee directors. This plan is further described in the Notes to Consolidated Financial Statements under the heading Stock-Based Compensation and Purchase Plans.

Item 13. Certain Relationships and Related Transactions and Director Independence

Information regarding certain relationships and related transactions is incorporated by reference in the Proxy Statement under the caption and sub-caption Certain Relationships and Related Transactions And Stock Ownership by Directors, Nominees for Director and Executive Officers, respectively.

Information regarding director independence is incorporated by reference in the Proxy Statement under the caption Election of Directors - Determination of Independence.

Item 14. Principal Accountant Fees and Services

This Information in addition to information regarding aggregate fees billed for each of the last two fiscal years for professional services rendered by the professional accountant for audit of the Company's annual financial statements and review of financial statements included in the Company's Form 10-K as well as others are incorporated by reference in the Proxy Statement under the caption Independent Auditors Fees.
