GRACO INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. The consolidated balance sheet of Graco Inc. and Subsidiaries (the Company) as of March 27, 2009 and the related statements of earnings and cash flows for the thirteen weeks then ended have been prepared by the Company and have not been audited.

In the opinion of management, these consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of Graco Inc. and Subsidiaries as of March 27, 2009, and the results of operations and cash flows for all periods presented.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. The results of operations for interim periods are not necessarily indicative of results that will be realized for the full fiscal year.

2. The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share amounts):

	Thirteen Weeks Ende

3. Information on option shares outstanding and option activity for the thirteen weeks ended March 27, 2009 is shown below (in thousands, except per share amounts):

	Option Shares		Weighted Average Exercise Price	Options Exercisable	Weighted Average Exercise Price

Information related to options exercised in the first three months of 2009 and 2008 follows (in thousands):

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions and results:

	Thirteen Weeks Ended

10. The Company accounts for all derivatives, including those embedded in other contracts, as either assets or liabilities and measures those financial instruments at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation.

As part of its risk management program, the Company may periodically use forward exchange contracts and interest rate swaps to manage known market exposures. Terms of derivative instruments are structured to match the terms of the risk being managed and are generally held to maturity. The Company does not hold or issue derivative financial instruments for trading purposes. All other contracts that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as, normal purchases or sales. The Company's policy is to not enter into contracts with terms that cannot be designated as normal purchases or sales.

In 2007, the Company entered into interest rate swap contracts that effectively fix the rates paid on a total of \$80 million of variable rate borrowings. One contract fixed the rate on \$40 million of borrowings at 4.7 percent plus the applicable spread (depending on cash flow leverage ratio) until December 2010. The second contract fixed an additional \$40 million of borrowings at 4.6 percent plus the applicable spread until January 2011. Both contracts have been designated as cash flow hedges against interest rate volatility. Consequently, changes in the fair market value are recorded in accumulated other comprehensive income (loss) (AOCI). Amounts included in AOCI will be reclassified to earnings as interest rates increase and as the swap contracts approach their expiration dates. Net amounts paid or payable under terms of the contracts were charged to interest expense and totaled \$0.6 million in the

first quarter of 2009.

The Company periodically evaluates its monetary asset and liability positions denominated in foreign currencies. The Company enters into forward contracts or options, or borrows in various currencies, in order to hedge its net monetary positions. These instruments are recorded at current market values and the gains and losses are included in other expense (income), net. There were eight contracts outstanding as of March 27, 2009, with notional amounts totaling \$15.6 million. There were 26 contracts outstanding during all or part of the first quarter of 2009, with net gains of \$0.4 million partially offsetting \$0.6 million of exchange losses on net monetary positions, included in other expense (income), net. The Company believes it uses strong financial counterparts in these transactions and that the resulting credit risk under these hedging strategies is not significant.

The Company uses significant other observable inputs to value the derivative instruments used to hedge interest rate volatility and net monetary positions. The fair market value and balance sheet classification of such instruments follows:

	Balance Sheet Classification	March 27, 2009		De	cember 20 2008	26,	
Gain (loss) on interest rate hedge contracts Gain (loss) on foreign currency forward contracts	Other current liabilities	\$	(5,009) \$	(4,936)	
Gains Losses Net	Accounts receivable	\$ \$	706 (555 151	\$) \$	1,868 (670 1,198)	

11. In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." This statement establishes a consistent framework for measuring fair value and expands disclosures on fair market value measurements. SFAS No. 157 was effective for the Company starting in fiscal 2008 for financial assets and liabilities. With respect to non-financial assets and liabilities, the statement was effective for the Company starting in fiscal 2009. The adoption of this statement as it pertains to non-financial assets and liabilities had no significant impact on the consolidated financial statements.

Item 2. GRACO INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The Company designs, manufactures and markets systems and equipment to move, measure, control, dispense and spray fluid materials. Management classifies the Company's business into three reportable segments: Industrial, Contractor and Lubrication. Key strategies include development of new products, expansion of distribution and new market penetration.

The following Management's Discussion and Analysis reviews significant factors affecting the Company's results of operations and financial condition. This discussion should be read in conjunction with the financial statements and the accompanying notes to the financial statements.

Results of Operations

Net sales, net earnings and earnings per share were as follows (in millions except per share amounts and percentages):

	Thirteen Weeks Ended							
	March 27,		March 27, March 28,		%			
		2009		2008	Change			
Net Sales	\$	137.9	\$	204.1	(32)%		
Net Earnings	\$	2.8	\$	35.6	(92)%		
Diluted Net Earnings per Common Share	\$	0.05	\$	0.57	(91)%		

Operating results were severely affected by the depth of the recession and its impact on the markets served by the Company. Sales and orders decreased in all segments and regions. Currency translation had an unfavorable effect on sales (\$6 million) and net earnings (\$2 million). The Company recorded \$4 million of cost related to an additional workforce reduction in March, as part of continued efforts to align operations with market and economic conditions.

Consolidated Results

Sales by geographic area were as follows (in millions):

	N	Thirteen V March 27, 2009	nded Iarch 28, 2008
Americas 1	\$	80.2	\$ 115.8
Europe 2		35.8	59.5
Asia Pacific		21.9	28.8
Consolidated	\$	137.9	\$ 204.1

- 1 North and South America, including the U.S.
- 2 Europe, Africa and Middle East

Consolidated sales decreased 32 percent (29 percent at consistent exchange rates). Sales decreased 31 percent in the Americas, 40 percent in Europe (32 percent at consistent exchange rates) and 24 percent in Asia Pacific.

Gross profit margin, expressed as a percentage of sales, was 46.7 percent, down from 54.8 percent last year, due to lower production volumes (approximately 4 percentage points), unfavorable currency translation rates (approximately 2 percentage points), workforce reduction costs (approximately 1½ percentage points) and increased pension cost (approximately 1 percentage point).

Total operating expenses were slightly lower than last year. Product development expense increased by \$2 million as continued investment in new and improved products is a key component of the Company's strategy for future growth. Offsetting this increase was a decrease of \$2 million from translation effects. Increases in pension expense (\$3 million) and severance expense related to the additional workforce reduction in 2009 (\$1 million) were offset by the effects of the work force reduction in the fourth quarter of 2008, lower incentive and bonus provisions and other spending reductions.

The effective tax rate of 34 percent for the first quarter was higher than last year's first quarter rate of 30 percent due to the settlement of the examination of the Company's income tax returns in the first quarter of 2008.

Liquidity and Capital Resources

In the first quarter of 2009, the Company used cash to reduce the borrowings under its long-term line of credit by \$13 million and paid dividends of \$11 million. Significant uses of cash and borrowings in the first quarter of 2008 included \$60 million for purchases and retirement of Company common stock, \$35 million for a business acquisition and \$11 million for payment of dividends.

Since the end of 2008, inventories have been reduced by \$6 million. Accounts receivable decreased by \$21 million from continuing collections and lower sales levels.

At March 27, 2009, the Company had various lines of credit totaling \$279 million, of which \$98 million was unused. Internally generated funds and unused financing sources are expected to provide the Company with the flexibility to meet its liquidity needs in 2009.

Outlook

Management expects that global economic conditions will continue to present a challenging operating environment in the near term. Workforce reductions initiated in 2008 and the further reduction announced in March of 2009 were made to align operations with market conditions and are expected to yield \$18 million in annualized savings. To the extent permitted by working capital resources, management intends to protect its human capital and continue making targeted investments in strategic operating and growth initiatives, including new product development, improving manufacturing efficiencies, expanding distribution and entering new markets.

Working capital management will continue to be a high priority for the remainder of 2009. The Company plans to reduce inventory by an additional \$25 million. Additional focus will be on collection of receivables over their normal cycle. Given the uncertainty in world economies and the possibility of continued weakness in markets served, the Company is considering cost-effective alternative liquidity options.
