Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)

1. Nature of Operations and Significant Accounting Policies

Basis of Presentation

The unaudited interim consolidated financial statements and the accompanying notes include the accounts of the consolidated entity (the Company), which primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries. The Company also has several non-insurance subsidiaries that individually and collectively are not material.

The unaudited interim consolidated financial statements have been prepared on the basis of U.S. generally accepted accounting principles (GAAP) for interim financial reporting, along with the instructions to Form 10-Q and Regulations S-K, S-X, and other applicable regulations. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. As such, these unaudited interim consolidated financial statements should be read in conjunction with the Company's 2014 Form 10-K, as amended. Management believes that the disclosures are adequate to make the information presented not misleading, and all normal and recurring adjustments necessary to present fairly the financial position and the results of operations for all periods presented have been made. The results of operations for any interim period are not necessarily indicative of the Company's operating results for a full year. Significant intercompany transactions have been eliminated in consolidation and certain immaterial reclassifications have been made to prior period results to conform with the current period's presentation.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions relating to the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements, and the reported amounts of revenue and expenses during the period. These estimates are inherently subject to change and actual results could differ from these estimates.

Significant Accounting Policies

For a full discussion of the Company's significant accounting policies, please refer to the Company's 2014 Form 10-K, as amended. No significant updates or changes to these policies occurred during the six months ended June 30, 2015.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

2. New Accounting Pronouncements

Accounting Pronouncements Issued, Not Yet Adopted

In May 2014, the FASB issued guidance regarding accounting for revenue recognition that identifies the accounting treatment for an entity's contracts with customers. Certain contracts, including insurance contracts, are specifically excluded from this guidance. However, certain other types of contracts may impact the financial statements of insurance providers. This guidance is effective for public entities for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is currently evaluating this guidance.

In August 2014, the FASB issued guidance that requires management to evaluate whether there are concerns or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued. Disclosures are required when certain criteria are met. This guidance is effective for annual periods ending after December 15, 2016. The Company is currently evaluating this guidance, but it does not believe that there will be a material impact to the consolidated financial statements.

In February 2015, the FASB issued guidance regarding the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. Under this guidance, previous consolidation conclusions may change and additional disclosures may be required. This guidance is effective for public entities for fiscal years and interim periods within those fiscal years beginning after December 15, 2015. The Company is currently evaluating this guidance.

In April 2015, the FASB issued guidance regarding a customer's accounting for fees paid in a cloud computing arrangement and whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, a customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, a customer should account for the arrangement as a service contract. The new guidance does not change the accounting for a customer's accounting for service contracts. This guidance is effective for interim and annual reporting periods beginning after December 15, 2015. The Company is currently evaluating this guidance, but it does not believe that there will be a material impact to the consolidated financial statements.

In May 2015, the FASB issued guidance targeted to improve disclosures related to short-duration contracts. Additional disclosures will be required about insurance liabilities to provide information regarding the nature, amount, timing, and uncertainty of future cash flows related to insurance liabilities and the effect of those cash flows on the statement of comprehensive income. This guidance is effective for public entities for annual periods beginning after December 15, 2015, and interim periods within annual periods beginning after December 15, 2016. The Company is currently evaluating this guidance.

All other new accounting standards and updates of existing standards issued through the date of this filing were considered by management and did not relate to accounting policies and procedures pertinent to the Company at this time or were not expected to have a material impact to the consolidated financial statements.

3. Prior Year Adoption of Accounting Principle

On December 31, 2014, the Company retrospectively adopted FASB Accounting Standards Update (ASU) No. 2014-01, Accounting for Investments in Qualified Affordable Housing Projects. Under ASU No. 2014-01, the Company elected to use the proportional amortization method, which requires an entity to amortize the initial cost of the investment in proportion to the tax credits and other tax benefits received and to recognize the net investment performance in the income statement as a component of income tax expense (benefit). As a result of the retrospective adoption, results previously reported in the Company's June 30, 2014 10-Q have been adjusted as follows. Income tax expense decreased \$0.2 million, net income increased \$0.2 million, and net income per share increased \$0.01 for the quarter ended June 30, 2014. Income tax expense decreased \$0.3 million, net income increased \$0.3 million, and net income per share increased \$0.03 for the six months ended June 30, 2014. The adoption did not impact net cash provided by operating activities for the quarter or six months ended June 30, 2014.

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

Unrealized Losses on Investments

At the end of each quarter, all securities are reviewed to determine whether impairments exist and whether other-than-temporary impairments should be recorded. This quarterly process includes an assessment of the credit quality of each investment in the entire securities portfolio. Additional reporting and review procedures are conducted for those securities where fair value is less than 90% of amortized cost. The Company prepares a formal review document no less often than quarterly of all investments where fair value is less than 80% of amortized cost for six months or more and selected investments that have changed significantly from a previous period and that have a decline in fair value greater than 10% of amortized cost. For additional information on the Company's process and considerations, as well as related accounting when other-than-temporary impairments are identified, please refer to Note 4 - Investments of the Company's 2014 Form 10-K, as amended.

The following table provides information regarding fixed maturity and equity security investments available for sale with unrealized losses by length of time at June 30, 2015.

The following table provides the distribution of maturities for fixed maturity securities available for sale with unrealized losses. Expected maturities may differ from these contractual maturities since borrowers may have the right to call or prepay obligations.

	June 30, 2015		December 31, 2014	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Fixed maturity securities available for sale:				
Due in one year or less	\$269	\$1	\$5,052	\$115
Due after one year through five years	35,995	315	21,033	960
Due after five years through ten years	362,055	10,109	202,240	5,772
Due after ten years	68,606	3,306	47,740	3,635
Total	466,925	13,731	276,065	10,482
Securities with variable principal payments	3,386	9	341	2
Redeemable preferred stocks	9,644	453	9,404	713
Total	\$479,955	\$14,193	\$285,810	\$11,197

The Company does not consider these unrealized losses to be credit-related. The unrealized losses at June 30, 2015 primarily relate to changes in interest rates and market spreads subsequent to purchase. A substantial portion of investment securities that have unrealized losses are either corporate debt issued with investment grade credit ratings or other investment securities. Other investment securities include residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities. The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 22 non-U.S. agency mortgage-backed securities that were determined to have such indications at both June 30, 2015 and December 31, 2014. A discounted future cash flow analysis was performed for each of these securities to determine if any portion of the impairment was due to credit and deemed to be other-than-temporary. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant or grade down over time, reflecting the Company's estimate of stabilized collateral performance in the future for such securities.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

The following tables present the range of significant assumptions used in projecting the future cash flows of the Company's residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities. The Company believes that the assumptions below are reasonable and they are based largely upon the actual historical results of the underlying security collateral.

June 30, 2015												
Vintage	Initial Default Rate			Initial Severity Rate			Prepayment Speed					
	Low		High	Low		High	Low		High			
2003	0.8	%	1.0	%	30	%	35	%	12.0	%	16.0	%
2004	0.8	%	7.0	%	35	%	68	%	8.0	%	16.0	%

2006	6.4	%	8.8	%	35	%	85	%	8.0	%	16.0	%
2007	10.3	%	10.3	%	61	%	61	%	8.0	%	8.0	%

December 31, 2014												
Vintage	Initial Default Rate			Initial Severity Rate			Prepayment Speed					
	Low		High	Low		High	Low		High			
2003	0.8	%	1.0	%	30	%	35	%	12.0	%	16.0	%
2004	0.8	%	7.0	%	35	%	65	%	8.0	%	18.0	%
2005	4.8	%	12.6	%	35	%	71	%	6.0	%	18.0	%
2006	5.7	%	8.4	%	35	%	85	%	8.0	%	16.0	%
2007	11.0	%	11.0	%	59	%	59	%	8.0	%	8.0	%

Significant unrealized losses on securities can continue for extended periods of time, particularly for certain individual securities. While this can be an indication of potential credit impairments, it can also be an indication of illiquidity in a particular sector or security. In addition, the fair value of an individual security can be heavily influenced by the complexities of varying market sentiment or uncertainty regarding the prospects for an individual security. Based upon the process described above, the Company is best able to determine if and to what extent credit impairment may exist in these securities by performing present value calculations of projected future cash flows at the conclusion of each reporting period. By reviewing the most recent data available regarding the security and other relevant industry and market factors, the Company can modify assumptions used in the cash flow projections and determine the best estimate of the portion of any impairment that is due to credit at the conclusion of each period.

The Company closely monitors its investments in securities classified as subprime. Less than 1% of the Company's total investments were in these types of investments at June 30, 2015 and December 31, 2014.

The Company also monitors structured securities through a combination of an analysis of vintage, credit ratings, and other factors. Structured securities include asset-backed, residential mortgage-backed securities, along with collateralized debt obligations, and other collateralized obligations.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

The Company recognized other-than-temporary impairments on corporate private-labeled residential mortgage-backed and other securities of \$0.4 million and \$0.1 million for the second quarters and \$0.4 million and \$0.3 million for the six months ended June 30, 2015 and 2014, respectively.

The following table provides a reconciliation of credit losses recognized in earnings on fixed maturity securities held by the Company for which a portion of the other-than-temporary impairment loss was recognized in other comprehensive income (loss).

	Quarter Ended		Six Months Ended	
	June 30		June 30	
	2015	2014	2015	2014
Credit losses on securities held at beginning of the period	\$17,891	\$16,532	\$17,889	\$16,375
Additions for credit losses not previously recognized in other-than-temporary impairment	—	—	—	4
Additions (reductions) for increases in the credit loss for which an other-than-temporary impairment was previously recognized when there was no intent to sell the security before recovery of its amortized cost basis	1,925	107	1,932	265
Reductions for increases in cash flows expected to be collected that are recognized over the remaining life of the security	(5)	(5)	(10)	(10)
Credit losses on securities held at the end of the period	\$19,811	\$16,634	\$19,811	\$16,634

The Company reviews and evaluates information on securities previously impaired and still owned. The identification of additional information or further deteriorations could result in additional impairments in future periods.

	Quarter Ended		Six Months Ended	
	June 30		June 30	
	2015	2014	2015	2014
Proceeds	\$1,039	\$8,269	\$1,039	\$12,643

Mortgage Loans

The Company invests in commercial mortgage loans that are secured by commercial real estate and are stated at cost, adjusted for amortization of premium and accrual of discount, less an allowance for loan losses. This allowance is maintained at a level believed by management to be adequate to absorb estimated credit losses and was \$2.0 million at June 30, 2015 and \$1.9 million at December 31, 2014. The Company had 15% of its total investments in commercial mortgage loans at both June 30, 2015 and December 31, 2014. In addition to the subject collateral underlying the mortgage, the Company typically requires some amount of recourse from borrowers as another potential source of repayment. The recourse requirement is determined as part of the underwriting requirements of each loan. The average loan to value ratio for the overall portfolio was 46% at both June 30, 2015 and December 31, 2014. These ratios are based upon the current balance of loans relative to the appraisal of value at the time the loan was originated or acquired.

The table below identifies mortgage loans by maturity.

	June 30 2015	% of Total		December 31 2014	% of Total	
Due in one year or less	\$28,791	5	%	\$27,607	5	%
Due after one year through five years	119,861	22	%	145,530	27	%
Due after five years through ten years	131,178	24	%	143,382	26	%
Due after ten years	272,846	49	%	226,575	42	%
Principal outstanding	\$552,676	100	%	\$543,094	100	%

The Company may refinance commercial mortgage loans prior to contractual maturity as a means of originating new loans that meet the Company's underwriting and pricing parameters. The Company refinanced three loans with outstanding balances totaling \$2.1 million during the quarter ended June 30, 2015 and three loans with outstanding balances totaling \$3.5 million during the quarter ended June 30, 2014. The Company refinanced six loans with outstanding balances of \$6.7 million during the six months ended June 30, 2015 and five loans with outstanding balances totaling \$6.7 million during the six months ended and June 30, 2014.

In the normal course of business, the Company generally commits to fund commercial mortgage loans up to 120 days in advance. These commitments typically have fixed expiration dates. A small percentage of commitments expire due to the borrower's failure to deliver the requirements of the commitment by the expiration date. In these cases, the Company retains the commitment fee. For additional information, please see Note 16 - Commitments.

5. Fair Value Measurements

Under GAAP, fair value represents the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. It is the Company's practice to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

The Company categorizes its financial assets and liabilities measured at fair value in three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 - Valuations are based upon unadjusted quoted prices for identical instruments traded in active markets.

Level 2 - Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Valuations are obtained from third-party pricing services or inputs that are observable or derived principally from or corroborated by observable market data.

Level 3 - Valuations are generated from techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of discounted cash flow models, spread-based models, and similar techniques, using the best information available in the circumstances.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value but for which fair value is disclosed.

Assets

Securities Available for Sale

Fixed maturity and equity securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon unadjusted quoted prices, if available, except as described in the subsequent paragraphs.

Cash and Short-Term Investments

Cash and short-term investments include cash and highly-liquid investments in institutional money market funds. The carrying value of cash and short-term investments approximates the fair value and are categorized as Level 1. Fair value is provided for disclosure purposes only.

Loans

The Company does not record loans at fair value. As such, valuation techniques discussed herein for loans are primarily for estimating fair value for purpose of disclosure.

Fair values of mortgage loans on real estate properties are calculated by discounting contractual cash flows, using discount rates based on current industry pricing or the Company's estimate of an appropriate risk-adjusted discount rate for loans of similar size, type, remaining maturity, likelihood of prepayment, and repricing characteristics.

Mortgage loans are categorized as Level 3 in the fair value hierarchy.

The Company also has loans made to policyholders. These loans cannot exceed the cash surrender value of the policy. Carrying value of policy loans approximates fair value. Policy loans are categorized as Level 3.

Separate Accounts

The separate account assets and liabilities, which are equal, are recorded at fair value based upon net asset value (NAV) of the underlying investment holdings as derived from closing prices on a national exchange or as provided by the issuer. This is the value at which a policyholder could transact with the issuer on the date. Separate accounts are categorized as Level 2.

Liabilities

Investment-Type Liabilities Included in Policyholder Account Balances and Other Policyholder Funds

The fair values of supplementary contracts and annuities without life contingencies are estimated to be the present value of payments at a market yield. The fair values of deposits with no stated maturity are estimated to be the amount payable on demand at the measurement date. These liabilities are categorized as Level 3. The Company has not estimated the fair value of the liabilities under contracts that involve significant mortality or morbidity risks, as these liabilities fall within the definition of insurance contracts. Insurance contracts are excluded from financial instruments

that require disclosures of fair value.

24

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

Guaranteed Minimum Withdrawal Benefits (GMWB) Included in Other Policyholder Funds

The Company offers a GMWB rider that can be added to new or existing variable annuity contracts. The rider provides an enhanced withdrawal benefit that guarantees a stream of payments to an owner or annuitant, regardless of the contract account value. Fair value for GMWB rider contracts is a Level 3 valuation, as it is based on models which utilize significant unobservable inputs. These models require actuarial and financial market assumptions, which reflect the assumptions market participants would use in pricing the contract, including adjustments for volatility, risk, and issuer non-performance.

Determination of Fair Value

The Company utilizes external third-party pricing services to determine the majority of its fair values on investment securities available for sale. At June 30, 2015, approximately 98% of the carrying value of these investments was from external pricing services, 1% was from brokers, and 1% was derived from internal matrices and calculations. At December 31, 2014, approximately 97% of the carrying value of these investments was from external pricing services, 1% was from brokers, and 2% was derived from internal matrices and calculations. In the event that the primary pricing service does not provide a price, the Company utilizes the price provided by a second pricing service. The Company reviews prices received from service providers for reasonableness and unusual fluctuations but generally accepts the price identified from the primary pricing service. In the event a price is not available from either third-party pricing service, the Company pursues external pricing from brokers. Generally, the Company pursues and utilizes only one broker quote per security. In doing so, the Company solicits only brokers which have previously demonstrated knowledge and experience of the subject security. If a broker price is not available, the Company determines a fair value through various valuation techniques that may include discounted cash flows, spread-based models, or similar techniques, depending upon the specific security to be priced. These techniques are primarily applied to private placement securities. The Company utilizes available market information, wherever possible, to identify inputs into the fair value determination, primarily prices and spreads on comparable securities.

Each quarter, the Company evaluates the prices received from third-party security pricing services and independent brokers to ensure that the prices represent a reasonable estimate of the fair value within the macro-economic environment, sector factors, and overall pricing trends and expectations. The Company corroborates and validates the primary pricing sources through a variety of procedures that include but are not limited to comparison to additional third-party pricing services or brokers, where possible; back testing; in-depth specific analytics on randomly selected issues; and comparison of prices to actual trades for specific securities where observable data exists. In addition, the Company analyzes the primary third-party pricing service's methodologies and related inputs and also evaluates the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy. Finally, the Company also performs additional evaluations when individual prices fall outside tolerance levels when comparing prices received from third-party pricing services.

Fair value measurements for assets and liabilities where there exists limited or no observable market data are calculated using the Company's own estimates and are categorized as Level 3. These estimates are based on current interest rates, credit spreads, liquidity premium or discount, the economic and competitive environment, unique characteristics of the asset or liability, and other pertinent factors. Therefore, these estimates cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any valuation technique. Further, changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Company's own estimates of fair value of fixed maturity and equity securities may be derived in a number of ways, including but not limited to: 1) pricing provided by brokers, where the price indicates reliability as to value; 2) fair values of comparable securities, incorporating a spread adjustment for maturity differences, collateralization, credit quality, liquidity, and other items, if applicable; 3) discounted cash flow models and margin spreads; 4) bond yield curves; 5) observable market prices and exchange transaction information not provided by external pricing services; and 6) statement values provided to the Company by fund managers.

The fair value of the GMWB embedded derivative is calculated using a discounted cash flow valuation model that projects future cash flows under multiple risk neutral stochastic equity scenarios. The risk neutral scenarios are generated using the current swap curve and projected equity volatilities and correlations. The equity correlations are based on historical price observations. For policyholder behavior assumptions, expected lapse and utilization assumptions are used and updated for actual experience. The mortality assumption uses the 2000 US Annuity Basic Mortality Table. The present value of cash flows is determined using the discount rate curve, based upon London Interbank Offered Rate (LIBOR) plus a credit spread.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

	Year Ended December 31, 2014	
	Assets	Liabilities
	Fixed maturity securities available for sale	GMWB
Beginning balance	\$1,433	\$(4,703)
Included in earnings	(12)	3,145
Included in other comprehensive income (loss)	(421)	—
Purchases, issuances, sales and other dispositions:		
Purchases	—	—
Issuances	—	592
Sales	—	—
Other dispositions	(241)	(128)
Transfers into Level 3	—	—
Transfers out of Level 3	—	—
Ending balance	\$759	\$(1,094)

Depending upon the availability of Level 1 or Level 2 pricing, specific securities may transfer into or out of Level 3. The Company did not have any transfers between any levels at June 30, 2015 or December 31, 2014.

The Company's primary category of assets using Level 3 fair values is fixed maturity securities, totaling \$0.6 million at June 30, 2015. These assets are valued using discounted cash flow models for which the significant assumptions are not observable in the market.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments at June 30, 2015.

	Fair Value	Valuation Technique	Unobservable Inputs	Range
Embedded Derivative - GMWB	\$ (4,558)	Actuarial cash flow model	Mortality	80% of US Annuity Basic Table (2000)
			Lapse	0%-16% depending on product/duration/funded status of guarantee
			Benefit Utilization	0%-80% depending on age/duration/funded status of guarantee
			Nonperformance Risk	0.68%-1.52%

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments at December 31, 2014.

	Fair Value	Valuation Technique	Unobservable Inputs	Range
Embedded Derivative - GMWB	\$ (1,094)	Actuarial cash flow model	Mortality	80% of US Annuity Basic Table (2000)
			Lapse	0%-16% depending on product/duration/funded status of guarantee
			Benefit Utilization	0%-80% depending on age/duration/funded status of guarantee
			Nonperformance Risk	0.73%-1.35%

The GMWB liability is sensitive to changes in observable and unobservable inputs. Observable inputs include risk-free rates, index returns, volatilities, and correlations. Increases in risk-free rates and equity returns reduce the liability, while increases in volatilities increase the liability. The Company's mortality, lapse, benefit utilization and nonperformance risk adjustment are unobservable. Increases in mortality, lapses and credit spreads used for nonperformance risk reduce the liability, while increases in benefit utilization increase the liability.

The Company estimates that the impact of unobservable inputs at June 30, 2015 is as follows: a 10% increase in the mortality assumption would reduce the liability less than \$0.1 million; a 10% decrease in the lapse assumption would increase the liability less than \$0.1 million; a 10% increase in the benefit utilization would increase the liability \$0.6 million; and a 10 basis point increase in the credit spreads used for non-performance would decrease the liability \$0.2 million.

The Company estimates that the impact of unobservable inputs at December 31, 2014 is as follows: a 10% increase in the mortality assumption would reduce the liability less than \$0.1 million; a 10% decrease in the lapse assumption would increase the liability \$0.3 million; a 10% increase in the benefit utilization would increase the liability \$0.9 million; and a 10 basis point increase in the credit spreads used for non-performance would decrease the liability \$0.4 million.

6. Financing Receivables

The Company has financing receivables that have both a specific maturity date, either on demand or on a fixed or determinable date, and are recognized as assets in the Consolidated Balance Sheets.

The table below identifies the Company's financing receivables by classification amount.

	June 30 2015	December 31 2014
Receivables:		
Agent receivables, net (allowance \$1,099; 2014 - \$2,003)	\$1,709	\$1,727
Investment-related financing receivables:		
Mortgage loans, net (allowance \$1,952; 2014 - \$1,914)	550,724	541,180
Total financing receivables	\$552,433	\$542,907

The following table details the activity of the allowance for doubtful accounts on agent receivables. Any recoveries are included as deductions.

	June 30 2015	December 31 2014
Beginning of year	\$2,003	\$2,245
Additions	16	306
Deductions	(920) (548
End of period	\$1,099	\$2,003

The following table details the mortgage loan portfolio as collectively or individually evaluated for impairment.

	June 30 2015	December 31 2014
Mortgage loans collectively evaluated for impairment	\$545,099	\$535,398
Mortgage loans individually evaluated for impairment	7,577	7,696
Allowance for loan losses	(1,952) (1,914
Carrying value	\$550,724	\$541,180

The following table details the activity of the allowance for mortgage loan losses. Any recoveries are included as deductions.

	June 30 2015	December 31 2014
Beginning of year	\$1,914	\$3,251
Provision	38	—
Deductions	—	(1,337
End of period	\$1,952	\$1,914

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

Agent Receivables

The Company has agent receivables that are classified as financing receivables and are reduced by an allowance for doubtful accounts. These trade receivables from agents are long-term in nature and are specifically assessed as to the collectability of each receivable. The Company's gross agent receivables totaled \$2.8 million at June 30, 2015 with an allowance for doubtful accounts totaling \$1.1 million. Gross agent receivables totaled \$3.7 million with an allowance for doubtful accounts of \$2.0 million at December 31, 2014. The Company has two types of agent receivables including:

• Agent specific loans. At both June 30, 2015 and December 31, 2014, these loans totaled \$1.0 million and the allowance for doubtful accounts was \$0.3 million.

Other agent receivables. Gross agent receivables in this category totaled \$1.8 million, and the allowance for doubtful accounts was \$0.8 million at June 30, 2015. Gross agent receivables in this category totaled \$2.7 million, and the allowance for doubtful accounts was \$1.7 million at December 31, 2014.

Mortgage Loans

The Company considers its mortgage loan portfolio to be long-term financing receivables. Mortgage loans are stated at cost, adjusted for amortization of premium and accrual of discount, less an allowance for loan losses. Mortgage loan interest income is recognized on an accrual basis with any premium or discount amortized over the life of the loan. Prepayment and late fees are recorded on the date of collection. Loans in foreclosure, loans considered impaired, or loans past due 90 days or more are placed on non-accrual status. Payments received on loans on non-accrual status for these reasons are applied first to interest income not collected while on non-accrual status, followed by fees, accrued and past-due interest, and principal.

If a mortgage loan is determined to be on non-accrual status, the Company does not accrue interest income into its financial statements. The loan is independently monitored and evaluated as to potential impairment or foreclosure. This evaluation includes assessing the probability of receiving future cash flows, along with consideration of many of the factors described below. If delinquent payments are made and the loan is brought current, then the Company returns the loan to active status and accrues income accordingly.

Generally, the Company considers its mortgage loans to be a portfolio segment. The Company considers its primary class to be property type. The Company primarily uses loan-to-value as its credit risk quality indicator but also monitors additional secondary risk factors, such as geographic distribution both on a regional and specific state basis. The mortgage loan portfolio segment is presented by property type in a table in Note 4 - Investments, as are geographic distributions by both region and state. These measures are also supplemented with various other analytics to provide additional information concerning potential impairment of mortgage loans and management's assessment of financing receivables.

The following tables present an aging schedule for delinquent payments for both principal and interest by property type.

	Book Value	Amount of Payments Past Due			Total

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

As of June 30, 2015, there was one mortgage loan that was over 30 days or more past due. Payment was subsequently received on this delinquent loan. As of December 31, 2014, there were no mortgage loans that were past due or were in the process of foreclosure.

Management's periodic evaluation and assessment of the adequacy of the allowance for loan losses is based on known and inherent risks in the portfolio, historical and industry data, current economic conditions, and other relevant factors. The Company assesses the amount it maintains in the mortgage loan allowance through an assessment of what the Company believes are relevant factors at both the macro-environmental level and specific loan basis. A loan is considered impaired if it is probable that contractual amounts due will not be collected. For information regarding management's periodic evaluation and assessment of mortgage loans and the allowance for loan losses, please refer to Note 6 - Financing Receivables in the Company's 2014 Form 10-K, as amended.

7. Variable Interest Entities

The Company invests in certain affordable housing and real estate joint ventures which are considered to be variable interest entities (VIEs) and are included in Real Estate in the Consolidated Balance Sheets. The assets held in affordable housing real estate joint venture VIEs are primarily residential real estate properties that are restricted to provide affordable housing under federal or state programs for varying periods of time. The restrictions primarily apply to the rents that may be paid by tenants residing in the properties during the term of an agreement to remain in the affordable housing program. Investments in affordable housing real estate joint ventures are equity interests in partnerships or limited liability companies that may or may not participate in profits or residual value. The Company's investments in these entities generate a return primarily through the realization of federal and state income tax credits and other tax benefits, such as tax deductions from operating losses of the investments, over specified time periods. The Company amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the Consolidated Statements of Comprehensive Income as a component of income tax expense. The tax credits are recognized as a reduction of tax expense. The Company realized federal income tax credits related to these investments of \$0.7 million for the second quarters and \$1.4 million for the six months ended both June 30, 2015 and 2014. The Company also recognized \$0.4 million and \$0.2 million of amortization related to these investments for the second quarters and \$0.8 million and \$0.6 million for the six months ended June 30, 2015 and 2014, respectively. The Company's investments in other real estate VIEs are recorded using the equity method. Cash distributions from the VIE and cash contributions to the VIE are recorded as decreases or increases, respectively, in the carrying value of the VIE. Certain other equity investments in VIEs, where permitted, are recorded on an amortized cost basis. The operating performance of investments in the VIE is recorded in the Consolidated Statements of Comprehensive Income as investment income or as a component of income tax expense, depending upon the nature and primary design of the investment. The Company evaluates the carrying value of VIEs for impairment on an ongoing basis to assess whether the carrying value is expected to be realized during the anticipated life of the investment. In certain cases, the Company may issue fixed-rate senior mortgage loan investments secured by properties controlled by VIEs. These investments are classified as mortgage loans in the Consolidated Balance Sheets, and the income received from such investments is recorded as investment income in the Consolidated Statements of Comprehensive Income.

Investments in the affordable housing and real estate joint ventures are interests that will absorb portions of the VIE's expected losses or receive portions of expected residual returns of the VIE's net assets exclusive of variable interests. The Company makes an initial assessment of whether it is the primary beneficiary of a VIE at the time of the initial investment and on an ongoing basis thereafter. The Company considers many factors when making this determination based upon a review of the underlying investment agreement and other information related to the specific investment. The first factor is whether the Company has the ability to direct the activities of a VIE that most significantly impact the VIE's economic performance. The power to direct the activities of the VIE is generally vested in the managing general partner or managing member of the VIE, which is not the position held by the Company in these investments. Other factors include the entity's equity investment at risk, decision-making abilities, obligations to absorb economic risks, the right to receive economic rewards of the entity, and the extent to which the Company shares in the VIE's

expected losses and residual returns.

34

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

The following table presents the carrying amount and maximum exposure to loss relating to VIEs for which the Company holds a variable interest, but is not the primary beneficiary, and which had not been consolidated at June 30, 2015 and December 31, 2014. The table includes investments in five real estate joint ventures and 23 affordable housing real estate joint ventures at both June 30, 2015 and December 31, 2014.

	June 30 2015		December 31 2014	
	Carrying Amount	Maximum Exposure to Loss	Carrying Amount	Maximum Exposure to Loss
Real estate joint ventures	\$21,384	\$21,384	\$21,415	\$21,415
Affordable housing real estate joint ventures	12,744	54,246	13,153	54,028
Total	\$34,128	\$75,630	\$34,568	\$75,443

The maximum exposure to loss relating to the real estate joint ventures and affordable housing real estate joint ventures, as shown in the table above, is equal to the carrying amounts plus any unfunded equity commitments, exposure to potential recapture of tax credits, guarantees of debt, or other obligations of the VIE with recourse to the Company. Unfunded equity and loan commitments typically require financial or operating performance by other parties and have not yet become due or payable but which may become due in the future.

At June 30, 2015 and December 31, 2014, the Company had no mortgage loan or equity commitments outstanding to the real estate joint venture VIEs. The Company has contingent commitments to fund additional equity contributions for operating support to certain real estate joint venture VIEs, which could result in additional exposure to loss. However, the Company is not able to quantify the amount of these contingent commitments.

In addition, the maximum exposure to loss on affordable housing joint ventures at June 30, 2015 and December 31, 2014 included \$28.8 million and \$27.7 million, respectively, of losses which could be realized if the tax credits received by the VIEs were recaptured. Recapture events would cause the Company to reverse some or all of the benefit previously recognized by the Company or third parties to whom the tax credit interests were transferred. A recapture event can occur at any time during a 15-year required compliance period. The principal causes of recapture include financial default and non-compliance with affordable housing program requirements by the properties controlled by the VIE. The potential exposure due to recapture may be mitigated by guarantees from the managing member or managing partner in the VIE, insurance contracts, or changes in the residual value accruing to the Company's interests in the VIEs.

8. Separate Accounts

Separate account assets and liabilities arise from the sale of variable universal life insurance and variable annuity products. The separate account represents funds segregated for the benefit of certain policyholders who bear the investment risk. The assets are legally segregated and are not subject to claims which may arise from any other business of the Company. The separate account assets and liabilities, which are equal, are recorded at fair value based upon NAV of the underlying investment holdings as derived from closing prices on a national exchange or as provided by the issuer. Policyholder account deposits and withdrawals, investment income, and realized investment gains and losses are excluded from the amounts reported in the Consolidated Statements of Comprehensive Income. Revenues to the Company from separate accounts consist principally of contract charges, which include maintenance charges, administrative fees, and mortality and expense charges.

The Company has a guaranteed minimum withdrawal benefit (GMWB) rider that can be added to new or existing variable annuity contracts. The value of the separate accounts with the GMWB rider is recorded at fair value of \$126.8 million at June 30, 2015 (December 31, 2014 - \$132.3 million). The GMWB guarantee liability was \$(4.6) million at June 30, 2015 (December 31, 2014 - \$(1.1) million). The change in this value is included in policyholder benefits in the Consolidated Statements of Comprehensive Income. The value of variable annuity separate accounts with the GMWB rider is recorded in separate account liabilities, and the value of the rider is included in other policyholder

funds in the Consolidated Balance Sheets.

The Company has two blocks of variable universal life policies and variable annuity contracts from which the Company receives fees. The fees are based upon both specific transactions and the fund value of the blocks of policies. The Company has a direct block of ongoing business identified in the Consolidated Balance Sheets as separate account assets, totaling \$403.4 million at June 30, 2015 and \$406.5 million at December 31, 2014, and corresponding separate account liabilities of an equal amount. In addition, the Company has an assumed closed block of business that is recorded in the Company's financial statements in accordance with modified coinsurance accounting for variable insurance business. This block of separate account fund balances totaled \$312.7

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

million at June 30, 2015 and \$318.1 million at December 31, 2014. The Company also records separate accounts invested in the general account for the direct block of business. In addition, in accordance with coinsurance reinsurance transaction accounting, the Company also records the assumed block of fixed accounts under its general account. The future policy benefits for the direct block approximated \$0.5 million and \$0.4 million at June 30, 2015 and December 31, 2014, respectively. The future policy benefits for the assumed block approximated \$0.6 million at both June 30, 2015 and December 31, 2014.

9. Notes Payable

The Company had no notes payable at June 30, 2015 or December 31, 2014.

As a member of the Federal Home Loan Bank of Des Moines (FHLB) with a capital investment of \$4.9 million at June 30, 2015, the Company has the ability to borrow on a collateralized basis from the FHLB. The Company received an insignificant amount of dividends on the capital investment in both the second quarters and six months of 2015 and 2014.

The Company had unsecured revolving lines of credit of \$70.0 million with two major commercial banks with no balances outstanding at June 30, 2015 or December 31, 2014. The lines of credit are at variable interest rates based upon short-term indices, and will mature in June of 2016. The Company anticipates renewing these lines of credit as they come due.

10. Income Taxes

The following table provides a reconciliation of the federal income tax rate to the Company's effective income tax rate for the second quarters and for the six months ended June 30, 2015 and 2014, respectively.

	Quarter Ended		Six Months Ended			
	June 30		June 30			
	2015	2014	2015	2014	2015	2014
Federal income tax rate	35	% 35	% 35	% 35	% 35	% 35
Tax credits, net of equity adjustment	(3)% (3)% (3)% (4)% (4)%
Permanent differences	(2)% (1)% (2)% (1)% (1)%
Effective income tax rate	30	% 31	% 30	% 30	% 30	% 30

The Company had uncertain tax positions of \$0.1 million at both June 30, 2015 and December 31, 2014.

At June 30, 2015, the Company had a current tax liability of \$2.4 million and a \$67.3 million net deferred tax liability, compared to a \$2.3 million current tax asset and a \$75.9 million net deferred tax liability at December 31, 2014.

11. Pensions and Other Postemployment Benefits (OPEB)

The following tables provide the components of net periodic benefit cost.

	Pension Benefits		OPEB		
	Quarter Ended		Quarter Ended		
	June 30		June 30		
	2015	2014	2015	2014	
Service cost	\$—	\$—	\$171	\$153	
Interest cost	1,356	1,550	351	374	
Expected return on plan assets	(2,480) (2,580) —	—	
Amortization of:					
Unrecognized actuarial net loss	601	430	118	21	
Unrecognized prior service credit	—	—	(287) (286)
Net periodic benefit cost (credit)	\$(523) \$(600) \$353	\$262

Net periodic benefit cost (credit)	\$(1,047) \$(1,201) \$706	\$525

12. Share-Based Payment

The Company has a long-term incentive plan for senior management that provides a cash award to participants for the increase in the share price of the Company's common stock through units (phantom shares) assigned by the Board of Directors. The cash award is calculated over a three-year interval on a calendar year basis. At the conclusion of each three-year interval, participants will receive a cash award based on the increase in the share price during a defined measurement period, multiplied by the number of units attributable to each participant. The increase in the share price is determined based on the change in the share price from the beginning to the end of the three-year interval. Amounts representing dividends are accrued and paid at the end of each three-year interval to the extent that they exceed negative stock price appreciation. Plan payments are contingent on the continued employment of the participant unless termination is due to a qualifying event such as death, disability, or retirement. In addition, all payments are lump sum with no deferrals allowed. The Company does not make any material payments in shares, warrants, or options. During the first six months of both 2015 and 2014, the plan made cash payments totaling \$3.8 million. No payments were made during the second quarters of 2015 or 2014.

At each reporting period, an estimate of the share-based compensation expense is accrued, utilizing the share price at the period end. The cost of share-based compensation accrued as an operating expense in the second quarters of 2015 and 2014 was less than \$0.1 million and \$0.4 million, net of tax, respectively. The change in accrual for share-based compensation reduced operating expense for the six months ended June 30, 2015 in the amount of \$0.1 million. The cost of share-based compensation accrued as an operating expense for the six months ended June 30, 2014 was \$0.1 million.

13. Comprehensive Income (Loss)

Comprehensive income (loss) is comprised of net income and other comprehensive income (loss). Other comprehensive income (loss) includes the unrealized investment gains or losses on securities available for sale (net of reclassifications for realized investment gains or losses) net of adjustments to deferred acquisition costs (DAC) and value of business acquired (VOBA), future policy benefits, and policyholder account balances (including deferred revenue liability). In addition, other comprehensive income (loss) includes the change in the liability for benefit plan obligations. Other comprehensive income (loss) reflects these items net of tax.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

14. Earnings Per Share

Due to the Company's capital structure and the absence of other potentially dilutive securities, there is no difference between basic and diluted earnings per common share for any of the periods reported. The average number of shares outstanding for the quarters ended June 30, 2015 and 2014 was 10,707,363 and 10,967,910, respectively. The average number of shares outstanding for the six months ended June 30, 2015 and 2014 was 10,754,922 and 10,968,182, respectively. The number of shares outstanding at June 30, 2015 and December 31, 2014 was 10,634,001 and 10,825,205 respectively.

15. Segment Information

The following schedule provides the financial performance of each of the three reportable operating segments of the Company.

		Individual Insurance	Group Insurance	Old American	Intercompany Eliminations ¹	Consolidated
Insurance revenues:						
Second quarter:	2015	\$33,046	\$13,576	\$19,766	\$(103)	\$66,285
	2014	39,100	14,379	18,791	(102)	72,168
Six months:	2015	69,422	27,188	39,250	(207)	135,653
	2014	76,991	28,627	37,338	(203)	142,753
Net investment income:						
Second quarter:	2015	37,312	89	2,805	—	40,206
	2014	38,410	135	2,806	—	41,351
Six months:	2015	74,202	200	5,496	—	79,898
	2014	76,056	260	5,726	—	82,042
Total benefits and expenses:						
Second quarter:	2015	58,558	14,486	20,376	(103)	93,317
	2014	69,621	14,415	20,121	(102)	104,055
Six months:	2015	123,126	27,701	43,980	(207)	194,600
	2014	140,327	29,025	42,054	(203)	211,203
Net income:						
Second quarter:	2015	9,868	(502)	1,533	—	10,899
	2014	7,529	97	999	—	8,625
Six months:	2015	17,200	(142)	619	—	17,677
	2014	13,425	(23)	895	—	14,297

Elimination entries to remove intercompany transactions for life and accident and health insurance that the Company purchases for its employees and agents were as follows: insurance revenues from the Group Insurance segment and operating expenses from the Individual Insurance segment to arrive at Consolidated Statements of Comprehensive Income.

16. Commitments

In the normal course of business, the Company has open purchase and sale commitments. At June 30, 2015, the Company had purchase commitments to fund mortgage loans of \$38.2 million.

Subsequent to June 30, 2015 the Company entered into commitments to fund additional mortgage loans of \$16.5 million.

17. Contingent Liabilities

The Company and its subsidiaries are, from time to time, involved in litigation, both as a defendant and as a plaintiff. The life insurance industry, including the Company and its insurance subsidiaries, has been subject to an increase in litigation in recent

41

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

The Company's subsidiary broker-dealer/investment advisor has been involved in a business that involves a substantial risk of liability. Legal and other proceedings involving financial services firms, including the Company's subsidiary, continue to have a significant impact on the industry. Significant matters over the last few years have included registered representative activity and certain types of securities products (particularly private placements and real estate investment products).

The Company and its subsidiaries are subject to regular reviews and inspections by state and federal regulatory authorities. State insurance examiners - or independent audit firms engaged by such examiners - may, from time to time, conduct examinations or investigations into industry practices and into customer complaints. A regulatory violation discovered during a review, inspection, or investigation could result in a wide range of remedies that could include the imposition of sanctions against the Company, its subsidiaries, or its employees, any of which could have a material adverse effect on the Company's financial condition or results of operations.

Certain policies, contracts, and annuities offered by the Company and certain products offered by its broker-dealer/investment advisor subsidiary are subject to regulation under federal and state securities laws. Federal securities laws contain regulatory restrictions and criminal, administrative, and private remedial provisions. From time to time, the SEC, the Financial Industry Regulatory Authority ("FINRA"), or a state securities regulator examine or investigate the activities of broker-dealers and/or investment advisors, including the Company's affiliated broker-dealer/ investment advisor subsidiary. It is possible that the results of any examination may lead to changes in systems or procedures, payments of fines and penalties, payments to customers, or a combination thereof, any of which could have a material adverse effect on the Company's financial condition or results of operations.

The life insurance industry has been the subject of significant regulatory and legal activities regarding the use of the U.S. Social Security Administration's Death Master File ("Death Master File") in the claims process. The focus of the activity has related to the industry's compliance with state unclaimed property and escheatment laws. Certain states have proposed, and many other states are considering, new legislation and regulations related to unclaimed life insurance benefits and the use of the Death Master File in the claims process. It is possible that audits and/or the enactment of new state laws could result in identifying payments to beneficiaries more quickly than under the current legislative and regulatory standards established for life insurance claims or may provide for additional escheatment of funds deemed abandoned under state laws. The audits could also result in administrative penalties. Given the legal and regulatory uncertainty in this area, it is also possible that life insurers, including the Company, may be subject to claims concerning their business practices. Based on its analysis to date, the Company believes that it has sufficiently reviewed its existing business and has adequately reserved for contingencies from a change in statute or regulation. Additional costs that cannot be reasonably estimated as of the date of this filing are possible as a result of ongoing regulatory developments and other future requirements related to this matter. Any resulting additional payments or costs could be significant and could have a material adverse effect on the Company's financial condition or results of operations.

In addition to the specific items above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these regulatory matters, legal actions, and other claims would not have a material effect on the Company's business, results of operations, or financial position.

In accordance with applicable accounting guidelines, the Company establishes an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter develops, it is evaluated on an ongoing basis, often in conjunction with outside counsel, as to whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure. If and when a loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable,

the Company establishes an accrued liability. This accrued liability is then monitored for further developments that may affect the amount of the accrued liability.

While the Company makes every effort to appropriately accrue liability for litigation and other legal proceedings, the outcome of such matters (including any amount of settlement, judgment, or fine) is inherently difficult to predict. This difficulty arises from the need to gather all relevant facts (which may or may not be available) and to apply those facts to complex legal principles. Based on currently available information, the Company does not believe that any litigation, proceeding or other matter to which it is a party or otherwise involved will have a material adverse effect on its financial position, the results of its operations, or its cash flows. However, an adverse development or an increase in associated legal fees could be material in a particular period depending, in part, on the Company's operating results in that period.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements--(Continued) (Unaudited)

18. Guarantees and Indemnifications

The Company is subject to various indemnification obligations issued in conjunction with certain transactions, primarily assumption reinsurance agreements, stock purchase agreements, mortgage servicing agreements, tax credit assignment agreements, construction and lease guarantees, and borrowing agreements whose terms range in duration and often are not explicitly defined. Generally, a maximum obligation is not explicitly stated. Therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. The Company is unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications. The Company believes that the likelihood is remote that material payments would be required under such indemnifications and therefore such indemnifications would not result in a material adverse effect on the financial position or results of operations.

19. Subsequent Events

On July 23, 2015, the Company sold a real estate property for \$20.3 million, resulting in a pre-tax gain of approximately \$4.1 million.

On July 27, 2015, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid on August 12, 2015 to stockholders of record on August 6, 2015.

On July 28, 2015, the Company filed an 8-K announcing that its Board of Directors has authorized, subject to stockholder approval, amendments to the Company's Articles of Incorporation that would effect a proposed reverse/forward stock split transaction. Further, the Company has suspended repurchasing shares on the open market until completion, withdrawal or termination of the proposed transaction.

The Company repurchased 25,167 shares of its common stock on the open market in July 2015 for \$1.2 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Amounts are stated in thousands, except share data, or as otherwise noted.

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to provide in narrative form the perspective of the management of Kansas City Life Insurance Company (the Company) on its financial condition, results of operations, liquidity, and certain other factors that may affect its future results. The following is a discussion and analysis of the results of operations for the second quarters and six months ended June 30, 2015 and 2014 and the financial condition of the Company at June 30, 2015. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes included in this document, as well as the Company's 2014 Form 10-K, as amended.

Overview

Kansas City Life Insurance Company is a financial services company that is predominantly focused on the underwriting, sales, and administration of life insurance and annuity products. The consolidated entity (the Company) primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries. For additional information, please refer to the Overview included in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2014 Form 10-K, as amended.

State Regulation

The Company's life insurance entities are subject to periodic examinations by state regulatory authorities. Financial statements are prepared and examined on a basis other than GAAP, namely statutory accounting principles. The most recently completed examination performed by the State of Missouri occurred as of December 31, 2009 for Kansas City Life, Sunset Life, and Old American. There were no adjustments recommended to any of the insurance companies as a result of that examination. In addition, the State of Missouri is currently conducting a scheduled examination based upon the year ended December 31, 2014.

Cautionary Statement on Forward-Looking Information

This report reviews the Company's financial condition and results of operations, and historical information is presented and discussed. Where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include "forward-looking statements" that fall within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate or imply future results, performance, or achievements rather than historical facts and may contain words like "believe," "expect," "estimate," "project," "forecast," "anticipate," "plan," "will," "shall," and other words, expressions with similar meaning.

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties. Those risks and uncertainties include, but are not limited to, the risk factors listed in Item 1A. Risk Factors as filed in the Company's 2014 Form 10-K, as amended.

Table of Contents

Consolidated Results of Operations

Summary of Results

The Company earned net income of \$10.9 million in the second quarter of 2015 compared to \$8.6 million in the second quarter of 2014. Net income per share was \$1.01 in the second quarter of 2015 versus \$0.78 in the same period in the prior year. Net income for the first six months of 2015 was \$17.7 million compared to \$14.3 million in the prior year. Net income per share for the first six months of 2015 was \$1.64 versus \$1.30 one year earlier.

The following table presents variances between the results for the second quarters and six months ended June 30, 2015 and 2014.

	Quarter Ended			Six Months Ended		
	June 30 2015	2014	Variance	June 30 2015	2014	Variance
Revenues:						
Insurance and other revenues	\$68,315	\$74,511	\$(6,196)	\$139,463	\$147,429	\$(7,966)
Net investment income	40,206	41,351	(1,145)	79,898	82,042	(2,144)
Net realized investment gains	352	677	(325)	317	2,180	(1,863)
Benefits and expenses:						
Policyholder benefits and interest credited to policyholder account balances	66,394	69,413	3,019	135,175	141,113	5,938
Amortization of deferred acquisition costs	1,958	12,529	10,571	10,342	21,357	11,015
Operating expenses	24,965	22,113	(2,852)	49,083	48,733	(350)
Income tax expense	4,657	3,859	(798)	7,401	6,151	(1,250)
Net income	\$10,899	\$8,625	\$2,274	\$17,677	\$14,297	\$3,380

Information on these items is presented below.

Sales

The Company's marketing plan for individual products focuses on three main aspects: providing financial security with respect to life insurance, the accumulation of long-term value, and future retirement income needs. The primary emphasis is on the growth of individual life insurance business, including new premiums for individual life products and new deposits for universal life and variable universal life products. These deposits can be recurring in nature, as policyholders can choose to make regular deposits into these products. However, policyholders can also choose to make one-time deposits. Consumer preferences and customer choices are very hard to predict and significantly influence life and annuity insurance purchases. These changing preferences and choices can result in large fluctuations period to period. The Company attempts to provide a varied portfolio of products that support consumer needs and is constantly assessing new products and opportunities. The Company also offers a portfolio of group products.

Sales of the Company's products are primarily made through the Company's existing sales force. The Company emphasizes growth of the sales force with the addition of new general agents and agents. The Company believes that increased sales will result through both the number and productivity of general agents and agents. The Company also places an emphasis on training and direct support to the field force to assist new agents in their start-up phase. In addition, the Company provides support to existing agents to help them stay abreast of the ever-changing regulatory environment and to introduce agents to new products and enhanced features of existing products. The Company also selectively utilizes third-party marketing arrangements to enhance its sales objectives. This allows the Company the flexibility to identify niches or pursue unique opportunities in the existing markets and to react quickly to take advantage of opportunities when they occur.

The Company recognizes conversions of policies and contracts on interest sensitive products to traditional life and annuity products as new premiums at the time of conversion. Most notably, the Company has fixed deferred annuities that convert to immediate annuities. Deferred annuity contracts typically provide for such conversions as one of several settlement options, and the volume of such contracts can vary based upon the individual needs and decisions of contract owners. In addition, the timing of these conversions can often result in large fluctuations period to period. The Group Insurance segment primarily uses two marketing approaches. The first is to market business using Kansas City Life's internal sales representatives and an independent general agent and agent field force. This business is

administered internally. The second is through selectively identified independent third-party arrangements that support this segment's marketing and product portfolio. Generally, business sold through these arrangements is administered by the third parties or through specifically identified

45

Table of Contents

reinsurance arrangements.

The Old American segment focuses on the recruitment and development of new agencies and agents. The intent of these activities is to generate improved production from existing agencies and agents, including the expansion or opening of territories believed to offer additional growth opportunities. Further, this segment also focuses on servicing its policyholders and creating and maintaining products that are created and priced to be competitive in the senior markets.

The following tables present gross premiums by new and renewal business, less reinsurance ceded. New premiums are also detailed by product.

	Quarter Ended June 30		2014	%		
	2015	% Change		2014	% Change	
New premiums:						
Traditional life insurance	\$4,529	3	%	\$4,393	(1))%
Immediate annuities	5,825	(21))%	7,352	(34))%
Group life insurance	540	(39))%	880	10	%
Group accident and health insurance	2,576	(32))%	3,770	4	%
Total new premiums	13,470	(18))%	16,395	(18))%
Renewal premiums	40,424	3	%	39,260	3	%
Total premiums	53,894	(3))%	55,655	(4))%
Reinsurance ceded	(14,052)	(2))%	(14,321)	(3))%
Net premiums	\$39,842	(4))%	\$41,334	(5))%
	Six Months Ended June 30					
	2015	% Change	2014	% Change		
New premiums:						
Traditional life insurance	\$9,027	4	%	\$8,693	(1))%
Immediate annuities	12,121	(16))%	14,484	(57))%
Group life insurance	1,110	(37))%	1,755	18	%
Group accident and health insurance	5,082	(35))%	7,877	16	%
Total new premiums	27,340	(17))%	32,809	(35))%
Renewal premiums	80,640	3	%	78,391	4	%
Total premiums	107,980	(3))%	111,200	(12))%
Reinsurance ceded	(27,162)	(3))%	(28,079)	(1))%
Net premiums	\$80,818	(3))%	\$83,121	(15))%

Consolidated total premiums decreased \$1.8 million or 3% in the second quarter of 2015 versus the prior year, as a \$2.9 million decrease in total new premiums was partially offset by a \$1.2 million increase in total renewal premiums. The decrease in new premiums resulted from a \$1.2 million decrease in new group accident and health premiums, principally in the dental line, as well as a \$1.5 million decrease in new immediate annuity premiums. The increase in renewal premiums was largely due to a \$0.7 million increase in renewal traditional life premiums, principally from the Old American segment. In addition, group life and group accident health renewal premiums increased versus the prior year.

Consolidated total premiums decreased \$3.2 million or 3% in the first six months of 2015 versus the prior year, as a \$5.5 million decrease in total new premiums was partially offset by a \$2.2 million increase in total renewal premiums. The decrease in new premiums resulted from a \$2.4 million decrease in new immediate annuity premiums and a \$2.8 million decline in new group accident and health premiums, principally in the dental and disability lines. The increase in renewal premiums reflected a \$1.3 million increase in traditional life renewal premiums, principally from the Old American segment. In addition, renewal premiums in both the group life and group accident health product lines increased \$0.5 million versus the prior year.

Table of Contents

The following tables reconcile deposits with the Consolidated Statements of Cash Flows and provide detail by new and renewal deposits. New deposits are also detailed by product.

	Quarter Ended June 30		2014	% Change		
	2015	% Change				
New deposits:						
Universal life insurance	\$3,042	10	%	\$2,754	(40))%
Variable universal life insurance	73	(53))%	154	(73))%
Fixed annuities	11,481	(17))%	13,851	7	%
Variable annuities	5,102	(52))%	10,711	62	%
Total new deposits	19,698	(28))%	27,470	11	%
Renewal deposits	38,621	(10))%	42,786	7	%
Total deposits	\$58,319	(17))%	\$70,256	9	%
Six Months Ended June 30						
	2015	% Change		2014	% Change	
New deposits:						
Universal life insurance	\$7,284	28	%	\$5,685	(43))%
Variable universal life insurance	165	(68))%	512	(55))%
Fixed annuities	20,332	(20))%	25,554	18	%
Variable annuities	9,946	(46))%	18,257	90	%
Total new deposits	37,727	(25))%	50,008	18	%
Renewal deposits	76,306	(4))%	79,845	8	%
Total deposits	\$114,033	(12))%	\$129,853	11	%

Total new deposits declined \$7.8 million or 28% in the second quarter of 2015 compared with the second quarter of 2014. This decline resulted from a \$2.4 million decrease in new fixed annuity deposits and a \$5.6 million decrease in new variable annuity deposits. Partially offsetting these declines, new universal life deposits increased \$0.3 million or 10%. Total renewal deposits decreased \$4.2 million or 10% in the second quarter of 2015 versus the prior year, reflecting a \$4.3 million decrease in fixed annuity renewal deposits. Based upon changes in financial conditions, alternative and competitive products, and consumer preferences, universal life and fixed annuity deposits can have sizeable fluctuations period-to-period.

Total new deposits declined \$12.3 million or 25% in the first six months of 2015 compared with the prior year. This decline resulted from a \$5.2 million decrease in new fixed annuity deposits and an \$8.3 million decrease in new variable annuity deposits. Partially offsetting these was a \$1.6 million increase in new universal life deposits. Total renewal deposits decreased \$3.5 million or 4% in the first six months of 2015 compared with the prior year, as an increase in universal life renewal deposits was offset by a decrease in variable universal life and fixed annuity renewal deposits.

Insurance Revenues

Insurance revenues consist of premiums, net of reinsurance, and contract charges. Insurance revenues are affected by the level of new sales, the type of products sold, the persistency of policies, general economic conditions, and competitive forces.

Contract charges consist of cost of insurance, expense loads, amortization of unearned revenues, and surrender charges on policyholder account balances. Certain contract charges are not recognized in income immediately but are deferred and are amortized into income in proportion to the expected future gross profits of the business, in a manner similar to deferred acquisition costs (DAC). Profit expectations are based upon assumptions of future interest spreads, mortality margins, expense margins, and policy and premium persistency experience. At least annually, a review is performed of the assumptions related to profit expectations. If it is determined the assumptions should be revised, the impact is recorded as a change in the revenue reported in the current period as an unlocking adjustment.

Total contract charges decreased \$4.4 million or 14% in the second quarter of 2015 and \$4.8 million or 8% in the first six months of 2015, compared to the same periods in the prior year. These declines largely reflected lower amortization of deferred revenue, primarily resulting from unlocking effects on the deferred revenue liability. An

unlocking adjustment decreased the amortization of deferred revenue \$2.3 million during the second quarter of 2015, which compares to an unlocking adjustment that increased

Table of Contents

deferred revenue amortization \$1.8 million during the second quarter of 2014. A component of contract charges results from charges on surrendered policies. Surrendered policies on policyholder account balances decreased in both the second quarter and six months, resulting in reduced contract charges.

Contract charges are impacted by the sales of new products and the persistency of both existing and closed blocks of business. The closed blocks of business reflect products and entities that have been purchased but to which the Company is not actively pursuing marketing efforts to generate new sales. The Company services these policies to achieve long-term profit streams. Total contract charges on closed blocks equaled 45% and 41% of total consolidated contract charges in the second quarters of 2015 and 2014, and 44% and 42% in the first six months of 2015 and 2014, respectively. The increases in 2015 reflected the unlocking effects mentioned above, which decreased contract charges on open, or ongoing, blocks of business. Total contract charges on closed blocks decreased 5% in the second quarter and 3% in the first six months of 2015 compared to the prior year, reflecting the runoff of the business as well as reduced surrender charges on acquired variable universal life and variable annuity products. Total contract charges on open, or ongoing, blocks of business decreased 21% in the second quarter and 12% in the first six months of 2015 compared to the same periods in 2014. These changes largely reflected the lower amortization of deferred revenue resulting from unlocking effects on the deferred revenue liability.

Investment Revenues

Gross investment income is largely composed of interest, dividends, and other earnings on fixed maturity securities, equity securities, short-term investments, mortgage loans, real estate, and policy loans. Gross investment income declined \$0.4 million or 1% in the second quarter and \$0.9 million or 1% in the first six months of 2015 compared with the same periods in 2014. These declines primarily reflected lower average invested assets and lower overall yields earned and available on certain investments. In addition, investment expenses rose \$0.8 million or 26% in the second quarter and \$1.3 million or 21% in the first six months compared to the prior year, primarily due to an increase in real estate expenses from real estate purchases made during 2014.

Fixed maturity securities provided a majority of the Company's investment income during the second quarter and six months ended June 30, 2015. Income on these investments declined \$0.8 million or 3% in the second quarter and \$1.3 million or 2% in the first six months of 2015 compared to one year earlier, as an increase in average invested assets was more than offset by lower yields earned.

Investment income from commercial mortgage loans decreased \$1.1 million or 12% in the first quarter and \$2.6 million or 14% in the first six months of 2015 compared to the prior year. These declines were primarily due to a lower average mortgage loan portfolio balance and lower yields earned on new loans compared to the prior year, primarily from maturities and principal paydowns that have exceeded new mortgage loan originations.

The Company realizes investment gains and losses from several sources, including write-downs of investment securities and mortgage loans, sales of investment securities, and real estate. Many securities purchased by the Company contain call provisions, which allow the issuer to redeem the securities at a particular price on or at a particular date or within a particular time frame. Depending upon the terms of the call provision and price at which the security was purchased, a gain or loss may be realized.

The Company recorded a net realized investment gain of \$0.4 million in the second quarter of 2015, compared with a net realized investment gain of \$0.7 million in the second quarter of 2014. During the second quarter of 2015, the Company recorded \$2.4 million in gains, largely from the sale of certain securities and from certain securities being called. Net realized investment gains for the first six months totaled \$0.3 million in 2015 compared to \$2.2 million in 2014. Gains due to investment securities called and other were \$2.6 million in 2015 and \$1.7 million in 2014. Partially offsetting these gains, investment losses of \$1.9 million and \$0.3 million were recorded due to write-downs of investment securities that were considered other-than-temporarily impaired in the first six months of 2015 and 2014, respectively.

The Company's analysis of securities for the second quarter ended June 30, 2015 resulted in the determination that one fixed maturity security had an other-than-temporary impairment of \$1.6 million. This issuer is in the oil exploration and drilling industry and has announced a restructuring plan. In addition, the Company had a collateralized debt obligation and two mortgage-backed securities with other-than-temporary impairments totaling less than \$0.4 million in the second quarter. The total fair value of the affected securities after the write-downs was \$14.1 million.

Other Revenues

Other revenues consist primarily of supplementary contract considerations; policyholder dividends left with the Company to accumulate; and certain income received from subsidiaries of the Company. Other revenues decreased \$0.3 million or 13% in the second quarter and \$0.9 million or 19% in the first six months of 2015 compared to the same periods in the prior year. The decline in other revenues during 2015 reflects the revenue decrease from the divestiture of certain non-proprietary agent relationships related to Sunset Financial Services in the fourth quarter of 2014. In addition, lower revenue was earned by the Company's subsidiary that invests in affordable housing real estate, due to lower amounts of tax credits transferred or sold in 2015 compared to 2014.

Table of Contents

Policyholder Benefits

Policyholder benefits consist of death benefits, immediate annuity benefits, accident and health benefits, surrenders, interest, other benefits, and the associated increase or decrease in reserves for future policy benefits. The largest component of policyholder benefits was death benefits for the periods presented. Death benefits reflect mortality results, after consideration of the impact of reinsurance. Mortality will fluctuate from period to period.

Policyholder benefits decreased \$2.3 million or 5% in the second quarter of 2015 compared to the same period one year earlier. The largest factor in this change was a decrease in benefit and contract reserves. Several factors contributed to the change in reserves. Changes in the fair value of the GMWB rider resulted in a \$2.0 million decrease in benefit and contract reserves. Also contributing to the reserve change was a decrease in immediate annuity premiums. Policyholder reserves for immediate annuity premiums are established on an approximately equal and offsetting basis, and a decrease in premiums results in a decrease to reserves on a comparative basis.

Policyholder benefits decreased \$4.8 million or 5% in the first six months of 2015 compared to the same period one year earlier. The largest factor in this change was a decrease in benefit and contract reserves. Several factors contributed to the change in reserves. Changes in the fair value of the GMWB rider resulted in a \$4.6 million decrease in benefit and contract reserves. Approximately \$1.5 million of this favorable change was due to the movement of variable annuity investments associated with the GMWB rider into funds managed with the objective of lower volatility. Also contributing to the reserve change was a decrease in immediate annuity premiums. Partially offsetting these declines, death benefits, net of reinsurance, increased in the first six months of 2015, reflecting increased death benefits at the Old American segment, in part due to growth in sales and business retention.

The Company has a GMWB rider for variable annuity contracts that is considered to be a financial derivative and, as such, is accounted for at fair value. The Company determines the fair value of the GMWB rider using a risk-neutral valuation method. The value of the riders will fluctuate depending on market conditions. For the six months ended June 30, 2015, the fair value of the liability decreased \$3.5 million compared to the fair value at December 31, 2014. This fluctuation can be primarily attributed to increases in risk-free swap rates and the movement of variable annuity investments into funds managed with the objective of lower volatility.

Interest Credited to Policyholder Account Balances

Interest is credited to policyholder account balances according to terms of the policies or contracts for universal life, fixed deferred annuities, and other investment-type products. There are minimum levels of interest crediting stipulated in certain policies or contracts, as well as allowances for adjustments to be made to reflect current market conditions in certain policies or contracts. Accordingly, the Company reviews and adjusts crediting rates as necessary and appropriate. Amounts credited are a function of account balances and current period crediting rates. As account balances fluctuate, so will the amount of interest credited to policyholder account balances. Interest credited to policyholder account balances decreased \$0.7 million or 3% in the second quarter and \$1.2 million or 3% in the first six months of 2015 compared with the same periods one year earlier. This decline was due to lower average crediting rates as well as a decrease in policyholder account balances compared to one year earlier.

Amortization of DAC

Total amortization of deferred acquisition costs decreased \$10.6 million or 84% in the second quarter and \$11.0 million or 52% in the first six months of 2015 compared to the same periods in the prior year. These declines were largely due to an unlocking adjustment that decreased DAC amortization \$6.4 million in the second quarter and six months of 2015, compared to an unlocking adjustment that increased DAC amortization \$1.7 million in the second quarter and six months of 2014. The unlocking in 2015 was associated with favorable adjustments for mortality and expenses, partially offset by adjustments related to interest rates. The unlocking in 2014 was associated with adjustments related to interest rates that were mostly offset by adjustments for mortality.

Unlocking and Refinements in Estimates

At least annually, a review is performed of the models and the assumptions used to develop expected gross profits for interest sensitive and variable insurance products based upon management's current view of future events. The Company may also consider refinements in estimates due to improved capabilities resulting from administrative or actuarial system enhancements.

Table of Contents

The following tables summarize the effects of the refinements in estimates on all products and unlocking of assumptions on interest sensitive products in the Consolidated Statements of Comprehensive Income.

	DAC	VOBA	DRL	Total
June 30, 2015				
Unlocking	\$6,380	\$(862)	\$(2,344)	\$3,174
Refinement in estimate	—	—	—	—
	\$6,380	\$(862)	\$(2,344)	\$3,174
	DAC	VOBA	DRL	Total
June 30, 2014				
Unlocking	\$(1,723)	\$1,486	\$1,764	\$1,527
Refinement in estimate	(1,566)	—	—	(1,566)
	\$(3,289)	\$1,486	\$1,764	\$(39)

Operating Expenses

Operating expenses consist of incurred commission expense from the sale of insurance products, net of the deferral of certain commissions and certain expenses directly associated with the successful acquisition of new business, expenses from the Company's operations, the amortization of VOBA, and other expenses. Operating expenses increased \$2.9 million or 13% in the second quarter of 2015 compared to the same period one year earlier. This increase largely reflected higher VOBA amortization, as discussed below, and higher employee salary and benefit costs. Operating expenses increased \$0.4 million or 1% in the first six months of 2015, primarily due to increases in VOBA amortization, as discussed below, and salary and employee benefit costs. Partially offsetting these were lower commissions and increased capitalized expenses. In addition, consulting fees decreased, as the prior year results included administrative conversion costs associated with the reinsurance transaction on variable products.

VOBA is evaluated on an ongoing basis for unlocking adjustments. If necessary, adjustments are made to the current period VOBA amortization. The amortization of VOBA increased \$2.3 million in the second quarter and \$1.9 million in the first six months of 2015 compared to the prior year. The increase in both periods was largely due to an unlocking adjustment, which increased VOBA amortization \$0.9 million in both the second quarter and first six months of 2015. This compares to an unlocking adjustment that decreased VOBA amortization \$1.5 million in the same periods one year earlier. The unlocking in both 2015 and 2014 was associated with interest and expense margins.

Income Taxes

The second quarter income tax expense was \$4.7 million or 30% of income before tax for 2015, versus \$3.9 million or 31% of income before tax for the prior year period. The income tax expense for the six months ended June 30, 2015 was \$7.4 million or 30% of income before tax, versus \$6.2 million or 30% of income before tax for the prior year. The effective income tax rate was lower than the prevailing corporate federal income tax rate of 35% in the second quarters of 2015 and 2014, primarily due to permanent differences, including the dividends-received deduction, and investments in affordable housing tax credits. Permanent differences resulted in a benefit of approximately 2% of income before tax in the second quarter of 2015, versus a benefit of approximately 1% of income before tax in the second quarter of 2014. Investments in affordable housing resulted in a benefit of approximately 3% of income before tax in the second quarters of 2015 and 2014.

The effective income tax rate was lower than the prevailing corporate federal income tax rate of 35% for the six months ended June 30, 2015 and 2014. Permanent differences, including the dividends-received deduction, resulted in a benefit of approximately 2% of income before tax for the six months ended June 30, 2015. This compares to a benefit of approximately 1% of income before tax for the six months ended June 30, 2014. Investments in affordable housing resulted in a benefit of approximately 3% of income before tax for the six months ended June 30, 2015, versus a benefit of approximately 4% of income before tax for the six months ended June 30, 2014.

Table of Contents

Operating Results by Segment

The Company has three reportable business segments, which are defined based on the nature of the products and services offered: Individual Insurance, Group Insurance, and Old American. The Individual Insurance segment consists of individual insurance products for both Kansas City Life and Sunset Life. In addition, the acquired blocks are included with the Individual Insurance segment. The Individual Insurance segment is marketed through a nationwide sales force of independent general agents and third-party marketing arrangements. The Group Insurance segment consists of sales of group life, group disability, dental, and vision products. This segment uses internal sales representatives to market through a nationwide sales force of general agents, agents, and independent brokers, and also markets products through third-party providers that market directly or through independent brokers. Old American consists of individual insurance products designed largely as final expense products. These products are marketed through a nationwide general agency sales force with exclusive territories, using direct response marketing to supply agents with leads. For more information, refer to Note 15 - Segment Information in the Notes to Consolidated Financial Statements.

Individual Insurance

The following table presents financial data of the Individual Insurance business segment.

	Quarter Ended		Six Months Ended	
	June 30		June 30	
	2015	2014	2015	2014
Insurance revenues:				
Net premiums	\$6,603	\$8,266	\$14,587	\$17,359
Contract charges	26,443	30,834	54,835	59,632
Total insurance revenues	33,046	39,100	69,422	76,991
Investment revenues:				
Net investment income	37,312	38,410	74,202	76,056
Net realized investment gains, excluding other-than-temporary impairment losses	2,119	684	2,063	2,142
Net impairment losses recognized in earnings:				
Total other-than-temporary impairment losses	(1,770)	(243)	(1,770)	(456)
Portion of impairment losses recognized in other comprehensive income (loss)	(154)	136	(160)	188
Net other-than-temporary impairment losses recognized in earnings	(1,924)	(107)	(1,930)	(268)
Total investment revenues	37,507	38,987	74,335	77,930
Other revenues	1,982	2,294	3,715	4,557
Total revenues	72,535	80,381	147,472	159,478
Policyholder benefits	25,574	29,608	53,150	60,327
Interest credited to policyholder account balances	18,590	19,260	37,029	38,206
Amortization of deferred acquisition costs	(1,193)	8,251	2,867	12,966
Operating expenses	15,587	12,502	30,080	28,828
Total benefits and expenses	58,558	69,621	123,126	140,327
Income before income tax expense	13,977	10,760	24,346	19,151
Income tax expense	4,109	3,231	7,146	5,726
Net income	\$9,868	\$7,529	\$17,200	\$13,425

The net income for this segment in the second quarter of 2015 was \$9.9 million compared to \$7.5 million in the second quarter of 2014. Factors contributing to this improvement were decreases in policyholder benefits, interest

credited to policyholder account balances, and amortization of deferred acquisition costs. Partially offsetting these were decreases in insurance revenues and net investment income, along with lower net realized investment gains and higher operating expenses.

51

Table of Contents

The net income for this segment was \$17.2 million in the first six months of 2015 compared to \$13.4 million in the same period in 2014. The increase in the current year reflected decreases in policyholder benefits, interest credited to policyholder account balances, and amortization of deferred acquisition costs. Partially offsetting these were decreases in insurance revenues, net investment income, and other revenues, along with lower net realized investment gains and higher operating expenses.

Total insurance revenues decreased \$6.1 million in the second quarter of 2015, reflecting a \$1.7 million or 20% decrease in net premiums and a \$4.4 million or 14% decrease in contract charges. Total insurance revenues decreased \$7.6 million in the first six months of 2015, reflecting a \$2.8 million or 16% decrease in net premiums and a \$4.8 million or 8% decrease in contract charges.

The following tables present gross premiums by new and renewal business, less reinsurance ceded. New premiums are also detailed by product.

	Quarter Ended June 30		2014	%	
	2015	% Change		%	% Change
New premiums:					
Traditional life insurance	\$1,020	(17)%	\$1,229	2	%
Immediate annuities	5,825	(21)%	7,352	(34)%
Total new premiums	6,845	(20)%	8,581	(31)%
Renewal premiums	10,682	1 %	10,598	2	%
Total premiums	17,527	(9)%	19,179	(16)%
Reinsurance ceded	(10,924)	— %	(10,913)	3	%
Net premiums	\$6,603	(20)%	\$8,266	(32)%
	Six Months Ended June 30				
	2015	% Change	2014	% Change	
New premiums:					
Traditional life insurance	\$2,105	(15)%	\$2,464	5	%
Immediate annuities	12,121	(16)%	14,484	(57)%
Total new premiums	14,226	(16)%	16,948	(53)%
Renewal premiums	21,415	1 %	21,202	1	%
Total premiums	35,641	(7)%	38,150	(33)%
Reinsurance ceded	(21,054)	1 %	(20,791)	1	%
Net premiums	\$14,587	(16)%	\$17,359	(52)%

Total new premiums for this segment decreased \$1.7 million or 20% and total renewal premiums increased \$0.1 million or 1% in the second quarter of 2015 compared to the same period one year earlier. The decrease in new premiums resulted from a \$1.5 million or 21% decrease in immediate annuity premiums. The increase in renewal premiums was due to improved traditional life premiums.

Total new premiums for this segment decreased \$2.7 million or 16% and total renewal premiums increased \$0.2 million or 1% in the first six months of 2015 compared to the prior year. The decrease in new premiums reflected a \$2.4 million or 16% decrease in immediate annuity premiums and a \$0.4 million or 15% decrease in traditional life premiums. The increase in renewal premiums was due to improved traditional life renewal premiums.

Table of Contents

The following tables provide detail by new and renewal deposits. New deposits are also detailed by product.

	Quarter Ended June 30			
	2015	% Change	2014	% Change
New deposits:				
Universal life insurance	\$3,042	10 %	\$2,754	(40) %
Variable universal life insurance	73	(53) %	154	(73) %
Fixed annuities	11,481	(17) %	13,851	7 %
Variable annuities	5,102	(52) %	10,711	62 %
Total new deposits	19,698	(28) %	27,470	11 %
Renewal deposits	38,621	(10) %	42,786	7 %
Total deposits	\$58,319	(17) %	\$70,256	9 %
Six Months Ended June 30				
	2015	% Change	2014	% Change
New deposits:				
Universal life insurance	\$7,284	28 %	\$5,685	(43) %
Variable universal life insurance	165	(68) %	512	(55) %
Fixed annuities	20,332	(20) %	25,554	18 %
Variable annuities	9,946	(46) %	18,257	90 %
Total new deposits	37,727	(25) %	50,008	18 %
Renewal deposits	76,306	(4) %	79,845	8 %
Total deposits	\$114,033	(12) %	\$129,853	11 %

Total new deposits decreased \$7.8 million or 28% in the second quarter of 2015 compared to the previous year, resulting from a \$2.4 million decline in new fixed annuity deposits and a \$5.6 million decline in new variable annuity deposits. Total renewal deposits declined \$4.2 million or 10% in the second quarter of 2015, reflecting a decrease in renewal fixed annuity deposits.

Total new deposits decreased \$12.3 million or 25% in the first six months of 2015 compared to the previous year, resulting from a \$5.2 million decline in new fixed annuity deposits and an \$8.3 million decline in new variable annuity deposits. Total renewal deposits declined \$3.5 million or 4% in the first six months of 2015, due to a decrease in fixed annuity renewal deposits. Universal life and fixed annuity deposits can have sizeable fluctuations period-to-period based upon changes in financial conditions, alternative and competitive products, and consumer preferences.

Total contract charges on all blocks of business declined \$4.4 million or 14% in the second quarter and \$4.8 million or 8% in the first six months of 2015 compared to the same periods one year earlier. These declines were primarily due to lower amortization of deferred revenue. An unlocking adjustment decreased the amortization of deferred revenue \$2.3 million during the second quarter of 2015 compared to an unlocking adjustment that increased deferred revenue amortization \$1.8 million during the second quarter of 2014. In addition, contract charges decreased due to lower surrenders on policyholder account balances in both the second quarter and six months.

Total contract charges on closed blocks declined 5% in the second quarter and 3% in the first six months of 2015 compared to the same periods in 2014. This decline reflects the general runoff of the closed blocks of business as well as reduced surrender charges on acquired variable universal life and variable annuity products. Total contract charges on open blocks of business, where there is ongoing marketing for new sales, decreased 21% in the second quarter and 12% in the first six months of 2015. These changes largely reflected the lower amortization of deferred revenue resulting from unlocking effects on the deferred revenue liability.

Gross investment income decreased \$0.3 million or 1% in the second quarter and \$0.6 million or 1% in the first six months of 2015 compared to the same periods in the prior year. These declines primarily reflected lower average invested assets and lower overall yields earned and available on certain investments. In addition, investment expenses rose \$0.8 million or 26% in the second quarter and \$1.3 million or 21% in the first six months compared to the prior year, primarily due to an increase in real estate expenses from real estate purchases made in 2014.

Policyholder benefits decreased \$4.0 million or 14% in the second quarter of 2015 compared to the prior year. This decline reflected decreases in death benefits, net of reinsurance, and benefit and contract reserves. Contributing to the

decline in benefit

53

Table of Contents

and contract reserves was a change in the fair value of the GMWB rider that resulted in a \$2.0 million decrease in benefit and contract reserves. Also contributing to the reserve change was a decrease in immediate annuity premiums. Policyholder benefits decreased \$7.2 million or 12% in the first six months compared to the prior year. The largest factor in this change was a decrease in benefit and contract reserves. Several factors contributed to the change in reserves. Changes in the fair value of the GMWB rider resulted in a \$4.6 million decrease in benefit and contract reserves. Approximately \$1.5 million of this favorable change was due to the movement of variable annuity investments associated with the GMWB rider into funds managed with the objective of lower volatility. Also contributing to the reserve change was a decrease in immediate annuity premiums. Partially offsetting these declines, death benefits, net of reinsurance, increased in the first six months of 2015, largely due to less favorable mortality experience.

Interest credited to policyholder account balances decreased \$0.7 million or 3% in the second quarter and \$1.2 million or 3% in the first six months of 2015 compared to one year earlier. These declines were due to lower average crediting rates, as well as a decrease in total policyholder account balances.

The amortization of DAC decreased \$9.4 million in the second quarter and \$10.1 million in the first six months of 2015 compared to the prior year. These declines were largely due to an unlocking adjustment that decreased DAC amortization \$6.4 million in the second quarter and six months of 2015, compared to an unlocking adjustment that increased DAC amortization \$1.7 million in the second quarter and six months of 2014. The unlocking in 2015 was associated with favorable adjustments for mortality and persistency, partially offset by adjustments related to interest rates. The unlocking in 2014 was associated with adjustments related to interest rates that were mostly offset by adjustments for mortality.

Operating expenses increased \$3.1 million or 25% in the second quarter and \$1.3 million or 4% in the first six months of 2015 compared with one year earlier. The increases in both periods largely reflected higher VOBA amortization, as discussed below, and higher employee salary and benefit costs. In addition, consulting fees decreased in the six months, as the prior year results included administrative conversion costs associated with the reinsurance transaction on variable products.

VOBA is evaluated on an ongoing basis for unlocking adjustments. If necessary, adjustments are made in the current period VOBA amortization. The amortization of VOBA increased \$2.3 million in the second quarter and \$1.9 million in the first six months of 2015 compared to the prior year. The increase in both periods was largely due to an unlocking adjustment, which increased VOBA amortization \$0.9 million in both the second quarter and first six months of 2015. This compares to an unlocking adjustment that decreased VOBA amortization \$1.5 million in the same periods one year earlier.

Table of Contents

Group Insurance

The following table presents financial data of the Group Insurance business segment.

	Quarter Ended		Six Months Ended	
	June 30 2015	2014	June 30 2015	2014
Insurance revenues:				
Net premiums	\$13,576	\$14,379	\$27,188	\$28,627
Total insurance revenues	13,576	14,379	27,188	28,627
Investment revenues:				
Net investment income	89	135	200	260
Other revenues	47	49	94	102
Total revenues	13,712	14,563	27,482	28,989
Policyholder benefits	8,693	8,460	16,279	16,999
Operating expenses	5,793	5,955	11,422	12,026
Total benefits and expenses	14,486	14,415	27,701	29,025
Income (loss) before income tax expense (benefit)	(774)	148	(219)	(36)
Income tax expense (benefit)	(272)	51	(77)	(13)
Net income (loss)	\$(502)	\$97	\$(142)	\$(23)

This segment had a net loss of \$0.5 million in the second quarter of 2015, compared to net income of \$0.1 million in the second quarter of 2014. The loss is a result of decreases in net premiums, coupled with an increase in policyholder benefits.

This segment had a net loss of \$0.1 million for the first six months of 2015, which was a decrease of \$0.1 million compared with prior year. Net premiums decreased \$1.4 million for the first six months of 2015. Partially offsetting this decrease, policyholder benefits decreased \$0.7 million and operating expenses decreased \$0.6 million.

Sales from internal sales representatives through independent general agents and agents accounted for approximately 74% of this segment's total premiums during the second quarter and first six months of 2015, while sales from third-party providers made up the remaining portion of sales. No one third-party provider accounts for a majority of this segment's sales.

The following tables present gross premiums by new and renewal business, less reinsurance ceded. New premiums are also detailed by product.

	Quarter Ended June 30		2014	% Change	
	2015	% Change		% Change	
New premiums:					
Group life insurance	\$540	(39)%	\$879	9	%

Total new premiums	3,116	(33)%	4,650	5	%
Renewal premiums	13,246	4	12,741	4	%
Total premiums	16,362	(6)%	17,391	4	%
Reinsurance ceded	(2,786)	(8)%	(3,012)	(18)%
Net premiums	\$13,576	(6)%	\$14,379	10	%

Table of Contents

	Six Months Ended June 30			
	2015	% Change	2014	% Change
New premiums:				
Group life insurance	\$1,110	(37)%	\$1,759	18%
Group dental insurance	2,797	(42)%	4,833	36%
Group disability insurance	2,285	(25)%	3,040	(5)%
Total new premiums	6,192	(36)%	9,632	17%
Renewal premiums	26,483	4%	25,457	6%
Total premiums	32,675	(7)%	35,089	8%
Reinsurance ceded	(5,487)	(15)%	(6,462)	(5)%
Net premiums	\$27,188	(5)%	\$28,627	12%

New group direct premiums decreased \$1.5 million or 33% in the second quarter of 2015 compared with the same period in 2014. This decrease was principally from group life and dental premiums, which decreased \$0.3 million or 39% and \$0.9 million or 40%, respectively, versus the second quarter of 2014. Group disability products also experienced decreases in the second quarter of 2015. New group direct premiums decreased \$3.4 million or 36% for the first six months of 2015, compared to the same period one year earlier. This decrease was largely from the dental product, which had a \$2.0 million or 42% decrease versus the prior year. The short-term disability product and the group life product also experienced decreases in the first half of 2015. Dental sales are being impacted by the uncertainty that exists for employers concerning the costs, legal requirements, and complexities associated with Affordable Care Act compliance. As a result, many employers have been reluctant to engage in new plans or modify existing benefits for employees.

Renewal premiums increased \$0.5 million or 4% in the second quarter of 2015 versus the same quarter of 2014, reflecting a \$0.5 million or 7% increase in group dental premiums. The increase in dental premiums was the result of improved retention on existing business. Group life renewal premiums for the second quarter of 2015 increased \$0.2 million or 9% versus the same period one year earlier. These improvements were offset by a \$0.2 million or 11% decline in short-term disability premiums.

Renewal premiums for the first half of 2015 for this segment increased \$1.0 million or 4% versus the same period one year earlier. Group dental renewal premiums increased \$1.3 million or 11% and group life premiums also increased \$0.5 million or 9% for the first six months, while the short-term disability premiums declined \$0.9 million or 19% during this period. The increase in dental premiums was the result of improved retention on existing business.

This segment uses targeted reinsurance in its life and disability product lines to help mitigate risk and allow for a higher level and volume of sales and profitability. Reinsurance ceded premiums decreased \$0.2 million for the second quarter and \$1.0 million for the first six months of 2015 compared with the same respective periods in 2014.

Total policyholder benefits for this segment consist of claim payments and increases or decreases in reserves for future policy benefits. Total policyholder benefits, net of reinsurance, for this segment increased \$0.2 million or 3% in the second quarter of 2015 compared with the same period in 2014. This resulted from a \$0.4 million or 26% increase in group life benefits. Partially offsetting this was a \$0.2 million or 3% decrease in group dental benefits. Total policyholder benefits, net of reinsurance, decreased \$0.7 million or 4% for the first six months of 2015 compared with prior year. This decrease was largely from the group dental product, where benefit costs decreased \$0.8 million or 7% compared with the prior year.

This segment identifies and tracks a policyholder benefit ratio, which is derived by dividing policyholder benefits, net of reinsurance, by total group insurance revenues. This ratio allows for a measure of the comparability of product and marketing changes over time. Generally, within each product line, a lower ratio reflects improved results. This ratio was 64% for the second quarter of 2015 compared to 59% for the second quarter of 2014. The ratio was 60% for the first six months of 2015 compared to 59% in the same period one year earlier. The increase in this ratio in the second quarter was most notable in the short-term disability, life, and dental product lines. The increase in this ratio in the six months was most notable in the short-term disability and life product lines.

Operating expenses consist of commissions, fees to third-party marketing and administrative organizations, and expenses from the Company's internal operations. Operating expenses for this segment decreased \$0.2 million or 3% in the second quarter and \$0.6 million or 5% for the six months of 2015 compared with the same periods in the prior year. These results primarily reflect decreased commissions, resulting from lower sales volume, but were partially offset by increases in third-party administration charges and administrative expenses from internal operations.

Income before income tax expense	2,353	1,576	951	1,333
Income tax expense	820	577	332	438
Net income	\$1,533	\$999	\$619	\$895

Net income for the Old American segment was \$1.5 million in the second quarter of 2015, compared with net income of \$1.0 million in the prior year's second quarter. Total insurance revenues increased \$1.0 million compared with the prior year but were offset by a \$1.5 million increase in policyholder benefits. Total investment revenue increased slightly, while amortization of deferred acquisition costs decreased \$1.1 million and operating expenses decreased \$0.1 million.

Net income for this segment for the first six months of 2015 was \$0.6 million, which was a decrease of \$0.3 million compared with the prior year. Policyholder benefits increased \$3.1 million for the first six months. Partially offsetting this increase, life insurance premiums increased \$1.8 million, amortization of deferred acquisition costs decreased \$0.9 million and operating expenses decreased \$0.3 million.

The following tables present gross premiums by new and renewal business, less reinsurance ceded.

	Quarter Ended June 30			
	2015	% Change	2014	% Change
New individual life premiums	\$3,509	11 %	\$3,165	(2)%
Renewal premiums	16,599	4 %	16,022	4 %
Total premiums	20,108	5 %	19,187	3 %
Reinsurance ceded	(342)	(14)%	(396)	(14)%

Net premiums	\$19,766	5	%	\$18,791	3	%
--------------	----------	---	---	----------	---	---

57

Table of Contents

	Six Months Ended June 30			
	2015	% Change	2014	% Change
New individual life premiums	\$6,922	11 %	\$6,225	(3) %
Renewal premiums	32,949	3 %	31,939	4 %
Total premiums	39,871	4 %	38,164	2 %
Reinsurance ceded	(621)	(25) %	(826)	(12) %
Net premiums	\$39,250	5 %	\$37,338	3 %

Total new premiums decreased \$0.3 million or 11% in the second quarter of 2015, while total renewal premiums increased \$0.6 million or 4% compared to the same period one year earlier. Total new premiums increased \$0.7 million or 11% in the first six months of 2015, while total renewal premiums increased \$1.0 million or 3%. This segment continues to have favorable experience with its renewal premiums, which are largely the result of growth in new sales in prior periods and favorable retention of business.

Net investment income remained flat in the second quarter and decreased \$0.2 million or 4% in the first six months of 2015 versus the same periods in the prior year. While average invested assets increased, lower overall yields earned and available on certain investments exceeded the growth in invested assets. In addition, net realized investment gains increased \$0.1 million in the second quarter and decreased \$0.1 million in first six months of 2015 versus the same periods in 2014.

Policyholder benefits increased \$1.5 million in the second quarter and \$3.1 million in the first six months versus the same periods in the prior year. These increases were largely due to an increase in net death benefits of \$0.8 million in the second quarter and \$2.5 million in the first six months of 2015 compared with the same periods one year earlier, in part due to growth in sales and business retention. In addition, there were increases in reserves of \$0.8 million in the second quarter and \$0.6 million in the first six months compared to the prior year. These increases in reserves resulted from growth in business over the past several years and favorable retention of business.

The amortization of DAC decreased \$1.1 million or 26% in the second quarter and \$0.9 million or 11% in the first six months of 2015 compared with the same periods one year earlier. These decreases are largely due to changes in expense assumptions on new business.

Operating expenses remained essentially flat during the second quarter and declined \$0.3 million in the first six months of 2015 compared with the same periods one year earlier. The decrease in the six months was primarily the result of reduced agent meeting costs.

Table of Contents

Analysis of Investments

The Company seeks to protect policyholders' benefits and achieve a desired level of organizational profitability by optimizing risk and return on an ongoing basis through managing asset and liability cash flows, monitoring credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification, among other things.

The primary sources of investment risk to which the Company is exposed include credit risk, interest rate risk, and liquidity risk. The Company's ability to manage these risks is essential to the success of the organization. In particular, the Company devotes considerable resources to both the credit analysis of each new investment and to ongoing credit positions. A default by an issuer usually involves some loss of principal to the investor. Losses can be mitigated by timely sales of affected securities or by active involvement in a restructuring process. However, there can be no assurance that the efforts of an investor will lead to favorable outcomes in a bankruptcy or restructuring. Credit risk is managed primarily through industry, issuer, and structure diversification.

For additional information regarding the Company's asset/liability management program, please see the Asset/Liability Management section within Item 7A: Quantitative and Qualitative Disclosures About Market Risk in the Company's 2014 Form 10-K, as amended.

The fair value of fixed maturity and equity securities with unrealized losses was \$491.8 million at June 30, 2015, compared with \$297.3 million at December 31, 2014. The increase primarily reflected the increase in interest rates during the first half of 2015. At June 30, 2015, 95% of security investments with an unrealized loss were investment grade and accounted for 94% of the total unrealized losses. At December 31, 2014, 94% of securities with an unrealized loss were investment grade and accounted for 82% of the total unrealized losses. At June 30, 2015, the Company had gross unrealized losses on fixed maturity and equity securities of \$14.6 million that were offset by \$156.9 million in gross unrealized gains. At December 31, 2014, the Company had \$11.8 million in gross unrealized losses on fixed maturity and equity securities, offset by \$186.4 million in gross unrealized gains. At June 30, 2015, 82% of the fixed maturity and equity securities portfolio had unrealized gains, a decrease from 89% at December 31, 2014. The decrease in unrealized gains at June 30, 2015 largely reflects an overall increase in interest rates during the first half of 2015. Gross unrealized losses on fixed maturity and equity securities for less than 12 months accounted for \$9.1 million or 63% of total unrealized losses and 83% of the value of the securities in a gross unrealized loss position at June 30, 2015. Gross unrealized losses on fixed maturity and equity security investments of 12 months or longer decreased from \$8.9 million at December 31, 2014 to \$5.4 million at June 30, 2015.

Table of Contents

The following table summarizes the Company's investments in fixed maturity and equity securities available for sale with unrealized losses at June 30, 2015 and should be considered in conjunction with information in Note 4.

	Amortized Cost	Fair Value	Gross Unrealized Losses
Securities owned without realized impairment:

Total	\$309,112	\$297,325	\$11,787

The three categories of investments with the largest amount of unrealized losses at June 30, 2015 were from the industrial sector, the energy sector, and other securities. The unrealized losses in the industrial and energy sectors primarily relate to changes in interest rates and market spreads subsequent to purchase. The other securities category is largely composed of asset-backed securities. The Company performs present value calculations of future cash flow projections for many of the asset-backed securities to evaluate the potential for other-than-temporary impairment. The Company continues to monitor these investments as described in Note 4. Please refer to that note for further information.

Table of Contents

The following table provides information on fixed maturity securities with gross unrealized losses by actual or equivalent Standard & Poor's rating at June 30, 2015.

	Fair Value	% of Total	Gross Unrealized Losses	% of Total

The Company's residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities that were rated below investment grade were 40% of the below investment grade total at June 30, 2015 and December 31, 2014.

The Company does not consider these unrealized losses to be credit-related. The unrealized losses at June 30, 2015 primarily relate to changes in interest rates and market spreads subsequent to purchase. A substantial portion of investment securities that have unrealized losses are either corporate debt issued with investment grade credit ratings or other investment securities. Other investment securities include residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities. The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 22 non-U.S. agency mortgage-backed securities that were determined to have such indications at both June 30, 2015 and December 31, 2014. A discounted future cash flow analysis was performed for each of these securities to determine if any portion of the impairment was due to credit and deemed to be other-than-temporary. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant or grade down over time, reflecting the Company's estimate of stabilized collateral performance in the future for such securities.

Table of Contents

The following tables present the range of significant assumptions used in projecting the future cash flows of the Company's residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities. The Company believes that the assumptions below are reasonable and they are based largely upon the actual historical results of the underlying security collateral.

June 30, 2015												
Vintage	Initial Default Rate			Initial Severity Rate			Prepayment Speed					
	Low		High	Low		High	Low		High			
2003	0.8	%	1.0	%	30	%	35	%	12.0	%	16.0	%
2004	0.8	%	7.0	%	35	%	68	%	8.0	%	16.0	%
2005	3.8	%	11.3	%	30	%	69	%	6.0	%	20.0	%
2006	6.4	%	8.8	%	35	%	85	%	8.0	%	16.0	%
2007	10.3	%	10.3	%	61	%	61	%	8.0	%	8.0	%

December 31, 2014												
Vintage	Initial Default Rate			Initial Severity Rate			Prepayment Speed					
	Low		High	Low		High	Low		High			
2003	0.8	%	1.0	%	30	%	35	%	12.0	%	16.0	%
2004	0.8	%	7.0	%	35	%	65	%	8.0	%	18.0	%
2005	4.8	%	12.6	%	35	%	71	%	6.0	%	18.0	%
2006	5.7	%	8.4	%	35	%	85	%	8.0	%	16.0	%
2007	11.0	%	11.0	%	59	%	59	%	8.0	%	8.0	%

Significant unrealized losses on securities can continue for extended periods of time, particularly for certain individual securities. While this can be an indication of potential credit impairments, it can also be an indication of illiquidity in a particular sector or security. In addition, the fair value of an individual security can be heavily influenced by the complexities of varying market sentiment or uncertainty regarding the prospects for an individual security. Based upon the process described above, the Company is best able to determine if and to what extent credit impairment may exist in these securities by performing present value calculations of projected future cash flows at the conclusion of each reporting period. By reviewing the most recent data available regarding the security and other relevant industry and market factors, the Company can modify assumptions used in the cash flow projections and determine the best estimate of the portion of any impairment that is due to credit at the conclusion of each period.

The Company closely monitors its investments in securities classified as subprime. Less than 1% of the Company's total investments were in these types of investments at June 30, 2015 and December 31, 2014.

The Company also monitors structured securities through a combination of an analysis of vintage, credit ratings, and other factors. Structured securities include asset-backed, residential mortgage-backed securities, along with collateralized debt obligations, and other collateralized obligations.

Table of Contents

The following tables divide these investment types among vintage and credit ratings.

	June 30, 2015		
	Fair Value	Amortized Cost	Unrealized Gains (Losses)
Residential & non-agency MBS: ¹

Other structured securities:			
Investment grade	57,672	57,658	14
Below investment grade	14,728	16,073	(1,345)
Total other	72,400	73,731	(1,331)
Total structured securities	\$179,475	\$175,209	\$4,266

¹ This table accounts for all vintages owned by the Company.

Total net unrealized gains on investments in non-U.S. Agency structured securities totaled \$4.0 million at June 30, 2015, compared to a net unrealized gain of \$4.3 million at December 31, 2014. Total net unrealized gains on these securities as a percent of total amortized cost totaled 2% at June 30, 2015.

Table of Contents

The Company has written down certain investments in previous periods. Fixed maturity securities written down and continuing to be owned at June 30, 2015 had a fair value of \$93.7 million with net unrealized gains of \$5.1 million, which compares to the December 31, 2014 fair value of \$105.3 million and net unrealized gains of \$4.8 million. The identification of additional information or further deteriorations could result in additional impairments in future periods.

The Company evaluated the current status of all investments previously written down to determine whether the Company continues to believe that these investments were still credit-impaired to the extent previously recorded. The Company's evaluation process is similar to its impairment evaluation process. If evidence exists that the Company believes that it will receive its contractual cash flows from securities previously written down, the accretion of income is adjusted. The Company did not change its evaluation of any investments under this process during the first six months of 2015 or 2014.

The Company maintains a diversified investment portfolio, including 4% of its investment portfolio in municipal bond securities and 8% in bond securities from foreign issuers at June 30, 2015. Approximately 63% of the Company's foreign securities were from issuers in Canada, Australia, and Great Britain at June 30, 2015. The Company has no holdings in European sovereign debt and all of these investments are denominated in U.S. dollars. The fair value of the Company's securities from foreign issuers at June 30, 2015 was \$267.3 million with a net unrealized gain of \$6.1 million. This compares to a fair value of \$266.6 million with a net unrealized gain of \$9.3 million at December 31, 2014.

The Company did not have any material direct exposure to financial guarantors at June 30, 2015 or December 31, 2014. The Company's indirect exposure to financial guarantors totaled \$24.3 million, which was 1% of the Company's investment assets at June 30, 2015. The unrealized gain on these investments totaled \$2.8 million at June 30, 2015. The Company's indirect exposure to financial guarantors at December 31, 2014 totaled \$24.8 million, which was 1% of the Company's total investments. Total net unrealized gains on these investments totaled \$2.9 million at December 31, 2014.

The Company's investment portfolio also includes mortgage loans, real estate, policy loans, and short-term investments. Mortgage loans comprised 15% of total investments at both June 30, 2015 and December 31, 2014. Real estate investments were 5% of total investments at both June 30, 2015 and December 31, 2014. Policy loans and short-term investments comprised 3% of total invested assets at both June 30, 2015 and December 31, 2014. Investments in mortgage loans totaled \$550.7 million at June 30, 2015 and \$541.2 million at December 31, 2014. The Company's mortgage loans are mostly secured by commercial real estate and are stated at the outstanding principal balance, adjusted for amortization of premium and accrual of discount, less an allowance for loan losses. This allowance is maintained at a level believed by management to be adequate to absorb estimated credit losses and was \$2.0 million at June 30, 2015 and \$1.9 million at December 31, 2014. The Company evaluates the macro-environmental risk on an ongoing basis using multiple considerations. For additional information on the Company's mortgage loan portfolio, please see Note 4.

Table of Contents

Liquidity and Capital Resources

Liquidity

Statements made in the Company's 2014 Form 10-K, as amended, remain pertinent, as the Company's liquidity position is materially unchanged from year-end 2014.

Net cash provided by operating activities was \$12.0 million for the six months ended June 30, 2015. The primary sources of cash from operating activities in the first six months of 2015 were premium receipts and net investment income. The primary uses of cash from operating activities in the first six months of 2015 were for the payment of policyholder benefits and operating expenses. Net cash used in investing activities was \$5.3 million, driven mainly by purchases of investments totaling \$213.3 million. The purchases were mostly offset by sales, maturities, calls, and principal paydowns of investments totaling \$192.8 million and net sales of short-term investments of \$15.6 million. Net cash used in financing activities was \$8.5 million, primarily due to a net change in treasury stock of \$8.7 million and the payment of stockholder dividends of \$5.8 million. Partially offsetting these were net transfers from separate accounts of \$4.6 million and a change in other deposits of \$4.0 million.

Debt and Short-Term Borrowing

The Company and certain subsidiaries have access to borrowing capacity through their membership affiliation with the FHLB. At June 30, 2015 and December 31, 2014, there were no outstanding balances with the FHLB. The Company has access to unsecured revolving lines of credit of \$70.0 million with two major commercial banks with no balances outstanding. These lines of credit will mature in June of 2016. The Company anticipates renewing these lines of credit as they come due.

Capital Resources

The Company considers existing capital resources to be adequate to support the current level of business activities. In addition, the Company's statutory equity exceeds the minimum capital deemed necessary to support its insurance business, as determined by the risk-based capital calculations and guidelines established by the National Association of Insurance Commissioners. The Company believes these statutory limitations impose no practical restrictions on its dividend payment plans.

The following table shows the capital adequacy for the Company.

	June 30 2015	December 31 2014		
Total assets, excluding separate accounts	\$4,134,921	\$4,165,366		
Total stockholders' equity	730,085	742,759		
Ratio of stockholders' equity to assets, excluding separate accounts	18	% 18		%

The ratio of equity to assets less separate accounts was 18% at both June 30, 2015 and December 31, 2014.

Stockholders' equity decreased \$12.7 million from year-end 2014. The decrease was largely due to other comprehensive loss, primarily resulting from a decrease in net unrealized gains on securities. This was partially offset by an increase in retained earnings due to net income.

The stock repurchase program was extended by the Board of Directors through January 2016 to permit the purchase of up to one million of the Company's shares on the open market. During the first six months of 2015, the Company purchased 190,381 shares under the stock repurchase program, which contributed to reduced total stockholders' equity in the amount of \$8.7 million. During the first six months of 2014, the Company did not purchase any shares under the stock repurchase program.

During the six months ended June 30, 2015, the Company purchased 353 shares and sold 270 shares of treasury stock from the Company's employee stock ownership plan for a net increase in treasury stock of less than \$0.1 million. The employee stock ownership plan held 22,980 shares of the Company's stock at June 30, 2015.

On July 27, 2015, the Board of Directors declared a quarterly dividend of \$0.27 per share, unchanged from the prior year. The dividend will be paid August 12, 2015 to stockholders of record as of August 6, 2015. Total stockholder dividends paid were \$5.8 million and \$5.9 million for the six months ended June 30, 2015 and June 30, 2014, respectively.

In June 2015, the A.M. Best Company, an independent rating agency, reviewed the financial strength rating and outlook of Kansas City Life, Sunset Life, and Old American. A. M. Best reaffirmed the “Stable” outlooks and financial strength ratings of A (Excellent) for Kansas City Life and A- (Excellent) for both Sunset Life and Old American.

Table of Contents

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Periods of volatility and market uncertainty represent a heightened risk for all financial institutions. Such events could negatively affect the Company and policyholder activity, such as a reduction in sales, increased policy surrenders, increased policy loans, and reduced earnings. The Company has factored these risks into its risk management processes and its disclosures of financial condition.

Please refer to the Company's 2014 Form 10-K, as amended, for a more complete discussion of quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

As required by Exchange Act Rule 13a-15(b), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. As required by Exchange Act Rule 13a-15(d), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this report materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

Table of Contents

Part II: Other Information

Item 1. Legal Proceedings

The life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these other claims and legal actions would not have a material effect on the Company's business, results of operations, or financial position.

Item 1A. Risk Factors

The operating results of life insurance companies have historically been subject to significant fluctuations. The factors which could affect the Company's future results include, but are not limited to, general economic conditions and the known trends and uncertainties which are discussed more fully in the Company's Risk Factors included in Part I, Item 1A of the Company's 2014 Form 10-K, as amended.

For Immediate Release: July 28, 2015 press release reporting financial results for the second quarter of 2015.

Kansas City Life Announces Second Quarter 2015 Results

Kansas City Life Insurance Company recorded net income of \$10.9 million or \$1.01 per share in the second quarter of 2015, an increase of \$2.3 million or \$0.23 per share relative to the same quarter in the prior year. Net income totaled \$17.7 million or \$1.64 per share in the first six months of 2015, an increase of \$3.4 million or \$0.34 per share relative to the same period one year earlier. The improvement in both periods reflected reductions in policyholder benefits and amortization of deferred acquisition costs. These reductions were the result of a decline in the fair value of the Company's guaranteed minimum withdrawal benefit rider and an unlocking of deferred acquisition costs that primarily reflected improvements in interest rates and mortality, respectively. Partially offsetting these favorable factors in both periods were decreases in insurance revenues, primarily from reduced contract charges and lower annuity and accident and health premiums, and a decrease in total investment income. The decline in investment income was primarily due to the continuing low interest rate environment. In addition, operating expenses increased in both periods, largely due to changes in amortization of the value of business previously acquired.

On July 27, 2015, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid on August 12, 2015 to stockholders of record on August 6, 2015.

Kansas City Life Insurance Company (NASDAQ: KCLI) was established in 1895 and is based in Kansas City, Missouri. The Company's primary business is providing financial protection through the sale of life insurance and annuities. The Company's revenues were \$465.0 million in 2014, and assets and life insurance in force were \$4.6 billion and \$32.0 billion, respectively, as of December 31, 2014. The Company operates in 49 states and the District of Columbia. For more information, please see the Company's Year End Form 10-K, as amended, or please visit www.kclife.com.
