Report of Independent Registered Public Accounting Firm

Lincoln National Corporation Plan Administrator
Lincoln National Corporation

We have audited the accompanying statements of net assets available for benefits of LNL Agents' 401(k) Savings Plan (Formerly The Lincoln National Life Insurance Company Agents' Savings and Profit-Sharing Plan) as of December 31, 2011 and 2010, and the related statements of changes in net assets available for benefits for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Plan's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2011, and 2010, and the changes in its net assets available for benefits for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2011, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management. The information has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

See accompanying notes to Financial Statements

LNL Agents' 401(k) Savings Plan

(Formerly The Lincoln National Life Insurance Company
Agents' Savings and Profit-Sharing Plan)

Notes to Financial Statements

1. Description of the Plan

The following description of the LNL Agents' 401(k) Savings Plan ("Plan") is a summary only and a detailed Plan document can be obtained from Human Resources. The Plan is intended to be qualified under Internal Revenue Code section 401(a) by the terms and provisions of the Plan document and in operation.

Effective January 1, 2012, the Plan's name was changed from The Lincoln National Life Insurance Company Agents' Savings and Profit-Sharing Plan to LNL Agents' 401(k) Savings Plan.

The Plan is a contributory, defined contribution plan that covers eligible full-time agents of The Lincoln National Life Insurance Company ("LNL" or "Plan Sponsor"), Lincoln Financial Advisors Corporation ("LFA"), Jefferson-Pilot Corporation ("JP") and Lincoln Life & Annuity Company of New York.

Participants are permitted to make pre-tax contributions or elect to reduce their compensation to make Roth 401(k) contributions at a combined rate of at least 1% but not more than 50% of eligible earnings (10% for highly compensated agents, as defined in the Plan document, beginning January 1, 2008), up to a maximum annual amount as determined under applicable law. Roth 401(k) contributions are includable in a participant's gross income at the time of deferral and must be irrevocably designated as Roth 401(k) contributions. The Plan, although not subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), is administered in accordance with the provisions of ERISA.

Plan Sponsor matching contributions are made to the participants' accounts in accordance with the Plan. The Plan Sponsor matching contribution for eligible participants is equal to 50% of each participant's contributions, not to exceed 6% of eligible earnings. In addition, the Plan Sponsor may contribute an additional discretionary match to eligible LFA participants. The Plan Sponsor discretionary match is an amount determined by the sole discretion of the Lincoln National Corporation ("LNC") Board of Directors. One requirement for eligibility for the discretionary match is that the participant must have an agent relationship with LNL or an affiliate as of the last day of the year or have died, retired or became disabled during the year. The amount of the Plan Sponsor discretionary matching contribution varies according to whether LFA has met certain performance-based criteria, as determined by the Compensation Committee of LNC's Board of Directors.

Participants' contributions and any earnings thereon are fully vested at all times. Plan Sponsor contributions vest based upon years of service as defined in the Plan document as follows:

Years of Service	Percent Vested
1	0%
2	50%
3 or more	100%

Participants direct the Plan to invest their contributions, the basic Plan Sponsor matching contributions, and the Plan Sponsor discretionary matching contribution in any combination of the investment options offered under the Plan.

The Plan Sponsor has the right to discontinue contributions at any time and terminate the Plan in accordance with the provisions of ERISA. In the event of Plan termination, all non-vested amounts allocated to participant accounts will become fully vested.

The Plan may make loans to participants in amounts up to 50% of the vested account value to a maximum of \$50,000 reduced by the highest outstanding loan balance in the previous 12-month period. Interest charged on new loans to participants is established monthly based upon the prime rate plus 1%. Interest income credited on loans was \$195,389, \$218,998 and \$238,346 in 2011, 2010 and 2009, respectively. Loans may be repaid over any period selected by the participant up to a maximum repayment period of 5 years except that the maximum repayment period may be 20 years for the purchase of a principal residence.

Upon termination of service, retirement or disability, a participant may elect to receive either a lump-sum amount equal to the entire value of the participant's vested account or an installment option if certain criteria are met. In cases of death, the participant's beneficiary makes that election. Vested account balances less than \$1,000 are immediately distributable as a lump-sum under the terms of the Plan without the participant's consent, unless the participant has made a timely election of rollover to an Individual Retirement Account or other qualified arrangement.

Each participant's account is credited with the participant's contributions, Plan Sponsor contributions and applicable investment earnings thereon, and is charged with an allocation of administrative expenses and applicable investment losses. Forfeited non-vested amounts are used to reduce future Plan Sponsor contributions. Forfeitures of \$1,814, \$5,281 and \$11,141 were used to offset contributions in 2011, 2010 and 2009, respectively.

2. Summary of Significant Accounting Policies

Investments Valuation and Income Recognition

As of January 1, 2010, the TD Ameritrade broker investments ("brokerage account") were added to the Plan's investment options available to the participants. The brokerage account is administered by TD Ameritrade and allows participants to self-direct their contributions into mutual funds and securities within their brokerage account. The brokerage account primarily consists of mutual funds, securities and a money market account, which are stated at fair value as discussed below.

As of October 1, 2008, Wilmington Trust ("Trustee") became the trustee for the Plan and Lincoln Alliance ("Recordkeeper") assumed responsibility as the recordkeeper for the Plan. Prior to that date, Wells Fargo Bank ("WFB") acted as the Plan's trustee and recordkeeper.

As of December 31, 2011, the assets of the Plan consisted primarily of mutual funds, collective investment trusts, LNC common stock, investment contracts issued by LNL, Wilmington Trust money market funds ("money market funds") and brokerage accounts. Marketable securities are stated at fair value based on quoted market prices in an active market at the Plan's year end. The investment in LNC common stock is valued at the closing sales price reported on the New York Stock Exchange Composite Listing on the last business day of the Plan year. Securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year. The fair value of ownership interest of the collective investment trusts is established by the Trustee based on the quoted redemption values of the underlying investments on the last business day of the Plan year. The money market fund, which approximates fair value, is also utilized by the Trustee to hold money that has been removed from the participants' funds and is waiting for distribution to participants.

As described in Financial Accounting Standards Board ("FASB") Accounting Standards Codification™ ("ASC") Fully Benefit-Responsive Investment Contracts Topic, investment contracts held by a defined contribution plan that are fully benefit responsive are required to be reported at fair value and an adjustment to total net assets is required to show net assets at contract value. The investment contracts held by the Plan are fully benefit responsive; therefore, contract value reporting is required. In this instance, contract value approximates fair value as a result of current interest rates credited to the contracts. Contract value represents net contributions plus interest at the contract rate.

The cost of investments sold, distributed or forfeited is determined using the specific identification method. Investment purchases and sales are accounted for on a trade-date basis.

Interest and dividend income are recorded when earned.

Notes Receivable from Participants

Notes receivable from participants are valued at unpaid principal balance plus any accrued interest.

Accounting Estimates and Assumptions

The accompanying financial statements are prepared in accordance with United States generally accepted accounting principles. Management is required to make estimates and assumptions affecting the amounts reported in the financial statements and accompanying notes. Those estimates are inherently subject to change and actual results could differ from those estimates.

Fair Value Measurement

The measurement of fair value is based on assumptions used by market participants in pricing the asset. The estimate of an exchange price is the price in an orderly transaction between market participants to sell the asset (“exit price”) in the principal market, or the most advantageous market in the absence of a principal market, for that asset, as opposed to the price that would be paid to acquire the asset (“entry price”). Pursuant to the Fair Value Measurements and Disclosures Topic of the FASB ASC, the financial instruments carried at fair value are categorized into a three-level fair value hierarchy, based on the priority of inputs to the respective valuation technique. The three-level hierarchy for fair value measurement is defined as follows:

Level 1 – Inputs to the valuation methodology are quoted prices available in active markets for identical investments as of the reporting date;

Level 2 – Inputs to the valuation methodology are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value can be determined through the use of models or other valuation methodologies; and

Level 3 – Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The following is a description of the valuation methodologies used for instruments measured at fair value, including the general classification of such instruments pursuant to the fair value hierarchy.

Mutual funds, including those within the brokerage account, are public investment vehicles valued using the Net Asset Value ("NAV") provided by the administrator of the fund and focused on accumulating earnings while maintaining the appropriate level of diversified risk. The NAV is a quoted price in an active market; therefore, the mutual funds are classified within Level 1 of the fair value hierarchy.

Collective investment trusts are public investment vehicles valued using the NAV provided by the Trustee and focused on stability of maintaining principal and a steady growth of earnings while matching the appropriate level of risk to the type of trust. The NAV is based on the value of the underlying assets owned by the trust, minus its liabilities, and then divided by the number of shares outstanding. The NAV is not a quoted price in an active market; therefore, the trusts are classified within Level 2 of the fair value hierarchy.

LNC common stock and common stock within the brokerage account are valued at the closing price reported on the New York Stock Exchange Composite Listing and is classified within Level 1 of the fair value hierarchy.

The Plan invests in an Unallocated Group Fixed Annuity Contract issued by LNL, who guarantees a fixed interest rate. The NAV for the investment contracts is \$1. The investment contracts are classified within Level 3 of the fair value hierarchy.

The money market fund, including the money market fund within the brokerage account, is a public investment vehicle valued using \$1 for the NAV. The money market fund is classified within Level 2 of the fair value hierarchy.

See "Fair Value of Financial Investments, Carried at Fair Value" in Note 5 for additional fair value disclosures.

Adoption of New Accounting Standards

In January 2010, the FASB issued ASU No. 2010-25, "Plan Accounting – Defined Contribution Pension Plans" ("ASU 2010-25"), which requires disclosure and measurement changes related to participant loans. For reporting purposes, participant loans shall be classified as notes receivable from participants and are no longer subject to fair value measurement disclosure requirements. In addition, notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. The Plan adopted the amendments in ASU 2010-25 effective January 1, 2010, and has retrospectively applied the amendments throughout the financial statements.

In January 2010, the FASB issued ASU No. 2010-06, "Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"), which required additional disclosure related to the three-level fair value hierarchy. The Plan adopted the disclosure requirements related to significant transfers in and out of Levels 1 and 2 of the fair value hierarchy effective January 1, 2010. Effective January 1, 2011, the Plan adopted the remaining disclosure amendments in ASU 2010-06

requiring the Plan to separately present information related to purchases, sales, issuances and settlements in the reconciliation of fair value measurements classified as Level 3, and have included the disclosure in Note 5 for the year ended December 31, 2011.

Future Adoption of Accounting Standards

In May 2011, the FASB issued ASU No. 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards" ("ASU 2011-04"), which was issued to create a consistent framework for the application of fair value measurement across jurisdictions. The amendments include wording changes to GAAP in order to clarify the FASB's intent about the application of existing fair value measurements and disclosure requirements, as well as to change a particular principle or existing requirement for measuring fair value or disclosing information about fair value measurements. There are no additional fair value measurements required upon the adoption of ASU 2011-04. The amendments are effective, prospectively, for interim and annual reporting periods beginning after December 15, 2011. Early adoption is prohibited. The Plan will adopt the provisions of ASU 2011-04 effective January 1, 2012. The adoption is not expected to have a material effect on the financial statements of the Plan.

3. Investments

The Plan holds investments in investment contracts. Since October 1, 2008, the Plan invested in the Lincoln Stable Value Fund (“Investment Contracts – LNL”), which has a credited interest rate that is based upon the three-year average of the Barclays rate plus 20 basis points and can be changed quarterly. For 2010, the average crediting rate was 3.92% (annualized), and for 2011 the average crediting rate was approximately 3.12%. Interest is credited at the same rate for the entire contract value. The guaranteed minimum interest rate (“GMIR”) is 3.00%. The guarantee is based on LNL’s ability to meet its financial obligations from the general assets of LNL.

For both the Investment Contract – LNL and the Guaranteed Account, restrictions apply to the aggregate movement of funds to other investment options. The fair value of the investment contracts approximate contract value. Participants are allocated interest on the investment contracts based on the average rate earned on all Plan investments in the investment contracts.

4. Investment Options

The detail of the net assets available for benefits by investment option as of December 31, 2011, was as follows:
