SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED SEPTEMBER 30, 2002

-OR-

() TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Commission File No. 1-3429

MAINE PUBLIC SERVICE COMPANY

A Maine Corporation

I.R.S. Employer Identification No. 01-0113635

209 STATE STREET, PRESQUE ISLE, MAINE 04769

(207) 768-5811

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes . No .

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the close of the period covered by this report.

Common Stock, \$7.00 par value - 1,573,926 shares

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 1. Financial Statements

See the following exhibits - Maine Public Service Company and Subsidiaries Condensed Consolidated Financial Statements, including an unaudited statement of consolidated operations for the quarter and nine months ended September 30, 2002, and for the corresponding period of the preceding year; an unaudited consolidated balance sheet as of September 30, 2002, and an audited consolidated balance sheet as of December 31, 2001, the end of the Company's preceding fiscal year; and an unaudited statement of consolidated cash flows for the period January 1 (beginning of the fiscal year) through September 30, 2002, and for the corresponding period of the preceding year.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements present fairly the financial position of the Company and Subsidiaries at September 30, 2002 and December 31, 2001, and the results of their operations for the three and nine months ended September 30, 2002 and their cash flows for the nine months ended September 30, 2002, and for the corresponding period of the preceding year.

NOTES TO CONSOLIDATED STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying unaudited consolidated financial statements include the accounts of the Company, its wholly-owned unregulated marketing subsidiary, Energy Atlantic, LLC (EA) and its wholly-owned Canadian subsidiary, Maine and New Brunswick Electrical Power Company, Limited (ME&NB).

The Company is subject to the regulatory authority of the Maine Public Utilities Commission (MPUC) and, with respect to wholesale rates, the Federal Energy Regulatory Commission (FERC).

The accompanying unaudited consolidated financial statements should be read in conjunction with the 2001 Annual Report, an integral part of Form 10-K. Certain financial statement disclosures have been condensed or omitted but are an integral part of the 2001 Form 10-K. These statements reflect all adjustments that are, in the opinion of management, necessary to a fair statement of results for interim periods presented. All such adjustments are of a

normal recurring nature. The Company's significant accounting policies are described in the Notes to Consolidated Financial Statements of the Company's Annual Report filed with the Form 10-K. For interim reporting purposes, these same accounting policies are followed.

For purposes of the statements of consolidated cash flows, the Company considers all highly liquid securities with a maturity, when purchased, of three months or less to be cash equivalents.

Certain reclassifications have been made to the 2001 financial statement amounts in order to conform to the 2002 presentation.

2. ENERGY ATLANTIC (EA)

EA's net income for the third quarter of 2002 was \$3,432,000 compared to a net income of \$411,000 for the third quarter of last year. The increase in net income reflects the final settlement pursuant to a Wholesale Power Sales Agreement (the "Agreement") with Engage Energy America, LLC ("Engage"), as described below.

During 2001, Energy Atlantic's sales were classified into two general categories: Standard Offer Service (SOS) in the service territory of Central Maine Power Company ("CMP) and Competitive Energy Supply (CES) to i

individual retail customers. Except as stated below, the power for those sales was provided entirely under the Agreement with Engage. The Agreement expired on February 28, 2002. Under this Agreement, all revenues from both SOS and CES sales were paid directly to an Escrow Agent that disbursed them in accordance with instructions from Engage. For SOS sales, EA received reimbursement for certain expenses and a portion of the net profit that was reported as SOS margin.

During a scheduled audit of the revenue and expenses accruing under the Agreement conducted by Engage's auditors in August of 2001, a discrepancy was identified between the reconciliation of kilowatt-hours ("KWH") settled by CMP with ISO New England and transferred by ISO New England to Engage, and the KWH revenues achieved by Engage and EA through customer billing derived from actual meter readings. The August 2001 audit noted that this discrepancy was negative in some months and positive in others during the preceding year. As a precautionary measure, on January 21, 2002, EA and Engage agreed to instruct the Escrow Agent to maintain \$1.5 million in the escrow account until the completion of the scheduled final audit of the contract activity, the expiration of the Escrow Agreement, and the release of EA from further obligations pertaining to the Agreement. When final billing information for the month following the February 28, 2002 expiration of the SOS activity in CMP's service territory was received, EA determined that SOS megawatt-hours ("MWH") billed to residential and small commercial customers by CMP exceeded the MWH allocated to the SOS activity by ISO New England by approximately 152,000 MWH, or approximately 2% of the total load charged to the SOS over the two-year period. The associated \$6.1 million represents additional cash and revenue distributed to and shared by EA and

Engage, with EA's share being \$4.8 million. Management believes the difference in MWH is a result of the difference between estimated and actual line loss or the estimating process the utility and ISO New England uses to report the amount of energy transferred to individual energy providers. Management also believes the SOS customers were billed only for the energy delivered according to their meters as read by CMP. Through August 31, 2002, EA has recognized revenues based on the MWH allocated to the SOS by ISO New England, thereby excluding the impact of the discrepancy. During the third quarter, EA and Engage concluded their business relationship pursuant to the terms of their Agreement. Following completion of the final scheduled audit, the final escrow disbursements were made to EA and Engage on September 30, 2002. As a result of the final account settlement, EA recognized the \$4.8 million of additional standard offer service (SOS) revenue during the third

quarter with an after-tax impact of \$2.9 million, or \$1.84 per share. In addition, EA reversed \$321,000 (\$.12 per share) of expenses previously accrued for EA's share of possible regulatory assessments under the Agreement with Engage. This assessment was imposed on Engage by FERC during the course of the Engage/EA Agreement. Engage has indicated that due to a change in regulation, FERC will not be making any further assessments in connection with this matter.

EA has entered into a contract for 40% of the output of the Wheelabrator-Sherman (W-S) energy facility for the two years beginning March 1, 2002. The output from this take-or-pay contract amounts to approximately 55,000 MWH annually and will be used to provide power for additional CES sales in the Company's service territory. This is EA's first take-or-pay contract, which carries more counterparty risk than others entered into to date. To mitigate this risk, EA has entered into a contract with NB Power, whereby NB Power will buy W-S output in excess of load requirements in the Company's service territory at a rate indexed to the price of 3% Sulphur Max No. 6 residential oil into New York Harbor, which is intended to reflect NB Power's avoided cost, subject to a floor and ceiling. Currently, all output has been sold to CES customers, therefore limiting the risk that energy will be sold to NB Power. In addition, NB Power will sell power to EA when load exceeds W-S output at a fixed on and off-peak rate.

In addition, EA has a power supply relationship with Duke Energy Trading and Marketing ("DETM"). In connection with this relationship, and certain transactions between EA and DETM, MPS provides a contractual guaranty on behalf of EA in an aggregate amount of one million dollars (\$1,000,000). This guaranty is related specifically to the delivery and/or receipt of electric power between EA and DETM. This guaranty was renewed in September of 2002 for an additional year.

The following illustrates each type of EA's risk exposure related to these contracts for supply and sales:

- Counterparty risk includes the possibility of the other parties' failure to fulfill their contractual obligations to EA such as:

a) Deliverability risk, referring to EA not being able to serve contracted load due to the supplier's failure to provide energy.

b) Transmission risk, indicating EA's reliance on the utilities, such as the Company, Central Maine Power and Bangor Hydro-Electric, to physically transport energy to EA's customers.

c) Credit risk exposure, depending on EA's customers' ability to pay, which may deteriorate during a general economic downturn or when a commercial customer experiences financial difficulty.

- Market liquidity risk encompasses the risk of being forced to buy or sell energy on the open market. This would occur (1) if energy is not available from W-S, NB Power or other energy supply arrangements, while the contracted customer load must still be satisfied or (2) if the existing customer load deteriorated and NB Power could not buy the excess power from WS, as contracted.

-7-

- Forecasting risk exposure includes possible inaccuracy in the estimation of energy supply requirements. One of EA's suppliers requires a 24-month forecast of load for each commitment to a 1 MW block of energy. Although there is no penalty for not using all of the energy, EA is assessed a penalty for using more than the amount contracted.

- Market-based cost risk is exposure to transactions tied to market indexes, such as the arrangement to sell excess W-S power to NB Power at a current market-indexed rate.

EA's CES sales to retail customers during 2002 will produce far less revenue than EA earned from SOS in CMP's territory. The Company is reviewing EA's current and future business model which may include a possible exit from the CES market, a refinement of its market area, and/or expansion into other product and service lines.

The Company operates in two segments, with Maine Public Service Company (MPS) providing regulated transmission and distribution services and EA performing unregulated power marketing services as described above. The segments' activity for the three months ended September 30, 2002 and 2001 is summarized in the table below.

3. REGULATORY MATTERS

MPUC Approves Stranded Cost Revenue Requirements Effective March 1, 2002

On May 8, 2001, the MPUC issued a notice of investigation to determine whether the Company's annual recovery of \$12.5 million in stranded investment must be changed, effective March 1, 2002, to reflect any changes in its stranded costs. On July 12, 2001, the Company filed its proposal in which it advocated continuing the \$12.5 million annual

recovery of stranded costs and also proposed to begin the recovery of deferred amounts associated with the discounted rates it had made available to certain industrial customers. Also at issue in the proceeding was the Company's receipt of a \$1,005,000 insurance refund associated with Maine Yankee. As of December 31, 2001, the Company reflected the refund as a miscellaneous deferred credit. A stipulation approved by the MPUC on January 7, 2002, with the appropriate order issued on February 27, 2002, includes annual stranded cost recovery of \$11,540,000 and a 15% sharing of the Maine Yankee insurance refund with the Company's shareholders, thereby leaving the rates charged to core retail customers the same.

Based on the level of revenue requirements authorized in this rate order, and further assuming the continued operation of W-S and the sale of its output by MPUC administered auction through 2006, the Company estimates that it will be recovering an equal amount of stranded costs through 2012. Once the W-S contract expires at the end of 2006, the Company expects to begin the recovery of other regulatory assets, principally deferred Maine

Yankee replacement power costs and deferred W-S power costs. Presently, the Company's earns a rate of return on these regulatory assets. As these costs are recovered over time, the Company's return on the remaining regulatory assets will decline thereby reducing net income.

MPUC Conducts Investigation of Rate Design

On May 8, 2001, the MPUC issued a Notice of Investigation into certain common fundamental issues regarding the rates for the State's three major electric utilities - the Company, Central Maine Power Company (CMP) and Bangor Hydro-Electric Company (BHE). These issues have been defined by the MPUC as follows:

- (i) The extent to which stranded cost recovery should be shifted from variable KWH and kw charges to a fixed charge;
- (ii) The redefinition of time of use periods for rate design; and
- (iii) The elimination or reduction of seasonal rates.

The Company originally believed stranded costs should be recovered through fixed charges that its customers cannot avoid by reducing or eliminating their usage. The Company, together with CMP and BHE, filed testimony in support of its position on April 16, 2002. The Company recommended that 50% of the stranded costs allocable to residential and small to medium commercial customers and 25% of the stranded cost allocable to large industrial customers be immediately collected through a fixed charge, with all remaining stranded costs to be phased in during the Company's next rate case. The Company also recommended immediate elimination of its seasonal rates. After further review of the impact of these proposed changes, which had no overall revenue impact, the Company filed a motion to be permitted to withdraw or be released from this proceeding. The Company stated that its service territory was located in a retail energy market that was distinct from that of CMP or BHE. Because, unlike CMP and BHE, the Company has not yet filed an Alternative Rate Plan (ARP), management also wished to reconsider its rate design options and, at the same time, avoid promoting any billing structures that might limit or conflict with these options. The Company intends to file an ARP during the first quarter of 2003. On July 30, 2002, the Company filed a stipulation with the Commission, signed by the parties to the proceeding, to withdraw, without prejudice from the investigation. The Commission approved the Company's petition on August 20, 2002.

Federal Energy Regulatory Commission (FERC) Approves Increase in Retail Transmission Rates

Edgar Filing: MAINE PUBLIC SERVICE CO - Form 10-Q

The FERC approved wholesale transmission rates effective June 1, 2002 in Docket No. ER00-1053. On August 6, 2002, the Company notified the MPUC of its intention to implement the associated transmission component of

-9-

its retail transmission and distribution (T&D) rates, with the new rates effective October 1, 2002. The FERC maintains jurisdiction over all transmission rates. This implementation increased T&D rates by 2%. The parties to MPS's Open Access Transmission Tariff (OATT) informational filing, FERC Docket No. ER00-1053, are currently generating data requests to MPS concerning the wholesale increase, to which the Company is responding. Although the Company expects to resolve the questions without further rate adjustment, it cannot predict the final outcome of this proceeding.

4. INCOME TAXES

A summary of Federal and State income taxes charged to income is presented below. For accounting and ratemaking purposes, income tax provisions included in "Operating Expenses" reflect taxes applicable to

revenues and expenses allowable for ratemaking purposes, with the exception of Energy Atlantic activity, which is above the line and not allowable for ratemaking purposes. The tax effect of items not included in rate base is allocated as "Other Income (Deductions)".

	(Dollars in Thousands)			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2002	2001	2002	2001
Current income taxes	\$2,335	\$582	\$3,333	\$1,555
Deferred income tax	(108)	(281)	478	208
Investment credits	(8)	(8)	(23)	(24)
Total income taxes	\$2,219	\$293	\$3,788	\$1,739
Allocated to:				
Operating Income	\$2,224	\$223	\$3,719	\$1,734
Other income	(5)	70	69	5
Total	\$2,219	\$293	\$3,788	\$1,739

For the nine months ended September 30, 2002 and 2001, the effective income tax rates were 38.6 % and 36.2%, respectively. The principal reasons for the effective tax rates differing from the US federal income tax rate are the contribution to net income of the Company's Canadian subsidiary, flowthrough items, principally Seabrook amortization required by regulation, and state income taxes.

Edgar Filing: MAINE PUBLIC SERVICE CO - Form 10-Q

The following summarizes accumulated deferred income taxes established on temporary differences under SFAS 109 as of September 30, 2002 and December 31, 2001.

	(Dollars in Thousands)

5. MAINE YANKEE

The Company owns 5% of the Common Stock of Maine Yankee, which operated an 860 MW nuclear power plant (the "Plant") in Wiscasset, Maine. On August 6, 1997, the Board of Directors of Maine Yankee voted to permanently cease power operations and to begin decommissioning the Plant.

-10-

The MPUC, on January 27, 2002, approved a Stipulation providing for the recovery of stranded investment, for a two-year period March 1, 2002 until February 29, 2004, which includes the Company's share of Maine Yankee decommissioning expenses, Maine Yankee replacement power costs, and the remaining Maine Yankee investment. As of September 30, 2002, deferred fuel of \$12.6 million is reflected as a regulatory asset, which includes the Maine Yankee replacement power costs, as well as deferred Wheelabrator-Sherman fuel costs.

On September 1, 1997, Maine Yankee estimated the sum of the future payments for the closing, decommissioning and recovery of the remaining investment in Maine Yankee to be approximately \$930 million, of which the Company's 5% share would be approximately \$46.5 million. In December 1998, June 1999, September 2000, February 2001, December 2001, March 2002, May 2002 and again in September, 2002, Maine Yankee updated its estimate of decommissioning costs based on the Settlement. Legislation enacted in Maine in 1997 calls for restructuring the electric utility industry and provides for recovery of decommissioning costs, to the extent allowed by federal regulation, through the rates charged by the transmission and distribution companies. Based on the Maine legislation and regulation precedent established by the FERC in its opinion relating to the decommissioning of the Yankee Atomic nuclear plant, the Company believes that it is entitled to recover substantially all of its share of such costs from its customers and, as of September 30, 2002 is carrying on its consolidated balance sheet a regulatory asset and a corresponding liability in the amount of \$22.9 million, which reflects the Company's 5% share of Maine Yankee's September 2002 revised estimate of the remaining decommissioning costs.

In May 2000, Maine Yankee terminated its decommissioning operations contract with Stone & Webster Engineering Corporation (Stone & Webster) pursuant to terms of the contract. Stone & Webster disputed Maine Yankee's grounds for the termination. In June 2000 Stone & Webster filed a voluntary petition under Chapter 11 of the United States Bankruptcy Code with the United States Bankruptcy Court for the District of Delaware.

Upon the contract termination, Maine Yankee temporarily assumed the general contractor role and entered into interim agreements with Stone & Webster and obtained assignments of several subcontracts in order to allow decommissioning work to continue and to avoid the adverse consequences of an abrupt or inefficient demobilization from the Plant site. Decommissioning of the Plant site continued with major emphasis directed to maintaining the schedule on critical-path projects such as construction of an independent spent fuel storage installation (ISFSI) and preparation of the Plant's reactor vessel for eventual shipment to an off-site disposal facility. After assessing its long-term alternatives for safely and efficiently completing the decommissioning, including evaluating proposals from prospective successor general contractors, on January 26, 2001, Maine Yankee announced that it would continue to manage the project itself.

In June 2000, Federal Insurance Company (Federal), which had provided performance and payment bonds in the amount of approximately \$38.5 million each in connection with the decommissioning operations contract, filed a declaratory-judgment complaint against Maine Yankee in the Bankruptcy Court in Delaware, which was subsequently transferred to the United States District Court in Maine.

The complaint alleged that Maine Yankee had improperly terminated the decommissioning operations contract with Stone & Webster and had failed to give proper notice of the termination to Federal under the contract, and that Federal had no further obligations under the bonds.

After extensive discovery and resolution of certain preliminary issues by the court, in December 2001 Maine Yankee and Federal entered into a settlement agreement pursuant to which Federal paid Maine Yankee \$44 million on January 18, 2002. The settlement was reflected on Maine Yankee's 2001 financial statements. That amount represents full payment under the performance bond, plus an additional amount under the payment bond reflecting certain payments previously made by Maine Yankee to subcontractors and suppliers who had not been fully paid by Stone & Webster. Maine Yankee deposited the payment in its decommissioning trust fund to offset past and future expenses resulting from the failures of Stone & Webster.

-11-

Maine Yankee has continued to pursue its claim for damages that was originally filed against Stone & Webster and its parent corporations in August 2000 in the Bankruptcy Court in Delaware. After recognizing the payment from Federal, Maine Yankee has asserted a right to recover an additional \$21 million in that court from the bankruptcy estates. In February 2002 Stone & Webster filed a claim for approximately \$7 million against Maine Yankee in the Bankruptcy Court in Delaware for alleged breaches of contract and to subordinate any Maine Yankee's claims. On May 30, 2002, the court concluded extensive hearings and argument by allowing a claim in favor of Maine Yankee under section 502 (c) of the Bankruptcy Code, in the estimated amount of \$20.8 million against each of the three principal estates (jointly and severally). The Court's ruling also effectively precluded approximately \$4 million of Stone & Webster's February 2002 claim against Maine Yankee, while offering no opinion or findings on the

remainder, the resolution of which will, if necessary, be the subject of further motions and proceedings. The actual cash amount to be recovered by Maine Yankee on this allowed claim remains contingent on a number of factors beyond Maine Yankee's control, including without limitation the extent to which the bankruptcy estates ultimately have assets available to pay the claim, the ultimate disposition of Stone & Webster's February 2002 claim, possible reconsideration of the ruling in the future based on actual expenses of completing the decommissioning, and the effect, if any, of any appeal of the May 30 decision by the bankruptcy estates. Maine Yankee therefore cannot predict the final outcome of the Bankruptcy Court proceeding.

In accordance with a plan approved by the Securities and Exchange Commission, Maine Yankee has started the redemption of its Common Stock periodically through 2008. On September 27, 2001 and June 27, 2002, Maine Yankee's Board of Directors voted to redeem 75,200 shares and 22,600 shares, respectively, thereby reducing the number of shares outstanding by 20%. On October 4, 2001 and July 17, 2002, the Company received approximately \$500,000 and \$150,000, respectively, for the shares redeemed by Maine Yankee.

6. STOCK COMPENSATION PLAN

Upon approval by the Company's shareholders in June of 2002, the Company adopted the 2002 Stock Option Plan (the Plan). The Plan provides designated employees of the Company and its Subsidiaries with stock ownership opportunities and additional incentives to contribute to the success of the Company, and to attract, reward and retain employees of outstanding ability. The Plan is administered by the members of the Executive Compensation Committee of the Board, who are not employees of the Company or any Subsidiaries. The Company may grant options to its employees for up to 150,000 shares of common stock, provided that the maximum aggregate number of shares which may be issued under the plan pursuant to incentive stock options shall be 120,000 shares. The exercise price for shares to be issued under any incentive stock option shall not be less than one hundred percent (100%) of the fair market value of such shares on the date the option is granted. An option's maximum term is 10 years. The Board, based on a recommendation of the Executive Compensation Committee, modified the grant agreement to the Company's new President & Chief Executive Officer to lessen the economic liability to the Company. As modified, the change of control provisions were eliminated and the three-year vesting schedule will be followed.

The Company accounts for the fair value of its grants under the plan in accordance with the expense provisions of Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation". The effect of the grants on compensation expense for the quarter ended September 30, 2002 was immaterial.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants: dividend yield of 4.9 percent; expected volatility of 20 percent, risk-free interest rate of 3.22; and expected lives of 7 years.

A summary of the status of the Company's stock option plan as of September 30, 2002, and changes during the quarter then ended is presented below:

Options	Shares (000)	Exercise Price
Outstanding at June 30, 2002	5,250	\$30.45
Granted	-	-
Exercised	-	-
Forfeited	-	-
Outstanding at September 30, 2002	5,250	\$30.45
Options exercisable at September 30, 2002	0	
Weighted-average fair value of options granted during the quarter	\$3.61	

The following table summarizes information about fixed stock options outstanding at September 30, 2002:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding at 09/30/02	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number Exercisable at 09/30/02	Weighted-Average Exercise Price
\$30.45	5,250	9.7 years	30.45	-	-

7NEW ACCOUNTING PRONOUNCEMENTS

The Company has adopted Statement of Financial Accounting Standards No. 144 (SFAS 144), "Accounting for the Impairment or Disposal of Long Lived Assets", effective January 1, 2002. This Statement addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS 144 establishes a single accounting model, based on the framework established in Statement 121, for long-lived assets to be disposed of by sale and also resolves significant implementation issues related to Statement 121. The adoption of this statement had no impact on its financial position or results of operations.

In July 2001, the FASB issued SFAS No. 142, "Goodwill and Other Intangible Assets," which addresses financial accounting and reporting for acquired goodwill and other intangible assets. Under the provisions of SFAS No. 142, there is no amortization of goodwill or intangible assets with indefinite lives. Impairment of these assets will need to be assessed annually. The provisions of SFAS No. 142 are required to be applied starting with fiscal years beginning after December 15, 2001, and must be applied at the beginning of a fiscal year and to all goodwill and other intangible assets recognized in the financial statements at that date. The adoption of this statement on January 1, 2002 had no impact on the Company's financial position or results of operations, as the Company shows no goodwill or intangible assets on its Balance Sheets.

For all business combinations subsequent to June 30, 2001, the Company is required to apply the provisions of Statement of Financial Accounting Standards No. 141, "Business Combinations." SFAS 141 requires the use of the purchase method of accounting for all business combinations. Goodwill will initially be recognized as an asset and measured as the excess of the costs of the acquired entity over the net amounts assigned to the assets acquired and liabilities assumed. An intangible asset other than goodwill will be recognized as an asset apart from goodwill if that asset arises from contractual or legal rights. The Company has not entered into any business combination to which this pronouncement applies.

In June of 2001, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations." This Statement addresses financial

-13-

accounting and reporting for obligations associated with the retirement of tangible long-lived assets and associated asset retirement costs. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. The Company does not expect the adoption of this statement to have a material impact on its financial position or results of operations.

8. VOLUNTARY EARLY RETIREMENT PROGRAM (VERP)

On November 6, 2002, the Company offered a VERP to thirteen employees who will attain age 59 and complete sixteen years of service on or before January 1, 2003. The program is necessary to realign the Company's organizational structure and employee resources for the Company's future. At this time, the Company cannot estimate how many employees will accept the Company's offer. The cost of the program for the employees accepting the Company's offer will be recorded as a charge to fourth quarter 2002 earnings.

-14-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Forward-Looking Statements

The discussion below may contain "forward-looking statements", as defined in the Private Securities Litigation Reform Act of 1995, related to expected future performance or our plans and objectives, such as expected future revenues from Energy Atlantic. There can be no assurance that actual results will not materially differ from expectations. Factors that could cause actual results to differ materially from our projections include, among other matters, electric utility restructuring; future economic conditions; changes in tax rates, interest rates or rates of inflation; developments in our legislative, regulatory, and competitive environment; and the decommissioning cost of Maine Yankee.

Results of Operations

The Company earns revenue from its own transmission and distribution (T&D) operations as well as the activities of its wholly-owned unregulated marketing subsidiary, Energy Atlantic, LLC (EA) and its wholly-owned Canadian subsidiary, Maine and New Brunswick Electrical Power Company, Limited (ME&NB). For purposes of the discussion below, ME&NB results are included in Core T&D.

Net income and earnings per share for the three months ended September 30, 2002 along with the corresponding information for the previous year are as follows:

Edgar Filing: MAINE PUBLIC SERVICE CO - Form 10-Q

	2002	2001
Net Income		
Core T&D	\$90	\$292
EA	3,432	411
Total Company	\$3,522	\$703
Earnings Per Share		
Core T&D	\$.06	\$.18
EA	2.18	.26
Total Company	\$2.24	\$.44

As may be seen, there was a reduction in core T&D net income and a substantial increase in EA net income.

Net income from Core T&D declined from \$292,000 in the third quarter of 2001 to \$90,000 in the third quarter of 2002. EA's net income increased from \$411,000 in the third quarter of 2001 to \$3,432,000 in the third quarter of 2002. The increase in EA net income reflects the final settlement pursuant to a Wholesale Power Sales Agreement (the "Agreement") with Engage America, LLC ("Engage"), as previously described in Note 2 to the Consolidated Financial Statements.

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

For the third quarter of 2002 compared to the same quarter last year, the increase in consolidated earnings per share (EPS) of \$1.80 is attributable to the following:

Change in EPS - Third Quarter of 2002

Compared to Third Quarter of 2001

	EPS
	Increase (Decrease)
Increase in Energy Atlantic net income	\$1.92
Increase in employee salary, benefits and other insurance expenses	(.11)
Increase in legal, regulatory and customer service expenses	(.10)
Increase in wheeling and retail revenues	.06
Reduction in net interest costs due to lower rates	.06
Other	(.03)
Total	\$1.80

Consolidated operating revenues for the quarters ended September 30, 2002 and 2001, are as follows:

	2002		2001	
	\$	MWH	\$	MWH
(Dollars in Thousands)				
Maine Public Service (MPS)				
- Retail	6,183	128,306	6,089	125,965
- Other Revenues	400		468	
Energy Atlantic, LLC (EA)				
- Competitive Energy Supply	1,989	36,747	1,600	54,309
- Standard Offer Margin	5,564	152,153	891	861,111
Totals	14,136	317,206	9,048	1,041,385

MPS retail sales increased by 1.9% (2,341 MWH), reflecting increases in sales to large commercial customers of 2.7% (1,108 MWH), to residential customers of 1.6% (1,600 MWH) and to medium and small commercial customers of

1.4% (619 MWH). The \$68,000 decrease in Other Revenues is due primarily to a decrease in flexible pricing revenue according to the regulatory stipulation in Docket 2001-240, as discussed below in Part II, Item 1, "Legal Proceedings".

Competitive Energy Supply revenues of the Company's wholly-owned marketing subsidiary, Energy Atlantic, LLC (EA) increased by \$389,000 due to an increase in residential sales in Northern Maine, offset by the expiration of several large retail customer contracts during 2001. This 24% increase in CES revenues was achieved despite a 32% decrease in MWH sales, reflecting more profitable contracts to residential and small commercial customers during the third quarter of 2002 compared to the same period in 2001. After considering the supply costs, these new sales agreements resulted in higher margins for the quarter compared to the same quarter last year. For the third quarter 2001, sales to one large customer of 26,183 MWH were at substantially lower prices. Correspondingly, energy supply costs were also substantially lower, providing for a small profit margin on these sales.

-16-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

The Standard Offer Service (SOS) margin increased \$4,673,000, due to the recognition of \$4.8 million of additional SOS revenue upon final settlement of the contract, and completion of the final audit, with Engage Energy (Engage). EA's contract for SOS service began March 1, 2000 and ended February 28, 2002. SOS

revenues, MWH sales and MWH purchases reflects the final settlement with Engage.

For the quarters ended September 30, 2002 and 2001, total operating expenses were \$10,533,000 and \$8,074,000, respectively. Energy supply expenses for EA were as follows:

	2002		2001	
	\$	MWH	\$	MWH
Energy Supply				
EA Competitive Energy Supply	1,464	36,747	1,501	54,309
EA Standard Offer Service	-	152,153	-	861,111

Edgar Filing: MAINE PUBLIC SERVICE CO - Form 10-Q

Total Energy Supply	1,464	188,900	1,501	915,420
---------------------	-------	---------	-------	---------

With the start of retail competition on March 1, 2000, EA began selling to retail customers, and MPS itself now provides transmission and distribution (T&D or delivery) services only, no longer purchasing or generating energy supply for its customers. Compared to the third quarter of 2001, CES purchases by EA decreased by 17,562 MWH, or \$37,000, reflecting the new supply agreements discussed in the "Energy Atlantic Operations" section. SOS purchases by EA decreased by 708,958 MWH due to the expired contracts, as discussed above. Only the gross margin of SOS activity is recorded, therefore no energy supply expenses are recognized.

T&D operation and maintenance expenses, as well as stranded costs, are as follows:

	2002	2001	Increase (Decrease)
T&D Operation and Maintenance			
Transmission and Distribution	891	880	11
Customer Accounting and General Administrative	2,363	1,797	566
Energy Atlantic	380	303	77
Total T&D Operation and Maintenance	3,634	2,980	654
Stranded Costs			
Wheelabrator-Sherman	2,084	2,390	(306)
Maine Yankee	716	794	(78)
Seabrook	278	278	-
Deferred Fuel	(323)	211	(534)
Special Discounts	70	-	70
Amortization of Gain from Asset Sale	(641)	(1,293)	652
Total Stranded Costs	2,184	2,380	(196)

Customer accounting and general administrative expenses increased by \$566,000, reflecting increases in employee salaries and benefits, regulatory and legal expenses.

-17-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

The Company recognized \$2,184,000 of stranded costs in the third quarter of 2002, compared to \$2,380,000 in the third quarter of 2001. MPS continues to purchase power from Wheelabrator-Sherman (W-S) under an agreement that expires in 2006, at prices above current market conditions. Beginning on March 1, 2000, as a result of competitive bidding, the output from W-S is sold to the successful bidder, and the above-market amount is included in stranded cost amortization rather than energy supply. The decrease in amortization of stranded costs of \$196,000 reflects a decrease in net W-S costs of \$306,000 and a \$534,000 decrease in deferred fuel recognition, partially offset by a \$652,000 increase in the asset sale gain recognition. Stranded costs include the W-S above-market costs discussed above, less amortization of the deferred gain from the 1999 sale of the Company's generating assets, in accordance with a Divestiture Plan approved by the MPUC under Maine's Electric Industry Restructuring Act.

Energy Atlantic Operations

EA's net income for the third quarter of 2002 was \$3,432,000 compared to a net income of \$411,000 for the third quarter of last year. The increase in net income reflects the final settlement pursuant to a Wholesale Power Sales Agreement (the "Agreement") with Engage Energy America, LLC ("Engage"), as described below.

During 2001, Energy Atlantic's sales were classified into two general categories: Standard Offer Service (SOS) in the service territory of Central Maine Power Company ("CMP") and Competitive Energy Supply (CES) to individual retail customers. Except as stated below, the power for those sales was provided entirely under the Agreement with Engage. The Agreement expired on February 28, 2002. Under this Agreement, all revenues from both SOS and CES sales were paid directly to an Escrow Agent that disbursed them in accordance with instructions from Engage. For SOS sales, EA received reimbursement for certain expenses and a portion of the net profit that was reported as SOS margin.

During a scheduled audit of the revenue and expenses accruing under the Agreement conducted by Engage's auditors in August of 2001, a discrepancy was identified between the reconciliation of kilowatt-hours ("KWH") settled by CMP with ISO New England and transferred by ISO New England to Engage, and the KWH revenues achieved by Engage and EA through customer billing derived from actual meter readings. The August 2001 audit noted that this discrepancy was negative in some months and positive in others during the preceding year. As a precautionary measure, on January 21, 2002, EA and Engage agreed to instruct the Escrow Agent to maintain \$1.5 million in the escrow account until the completion of the scheduled final audit of the contract

activity, the expiration of the Escrow Agreement, and the release of EA from further obligations pertaining to the Agreement. When final billing information for the month following the February 28, 2002 expiration of the SOS activity in CMP's service territory was received, EA determined that SOS megawatt-hours ("MWH") billed to residential and small commercial customers by CMP exceeded the MWH allocated to the SOS activity by ISO New England by approximately 152,000 MWH, or approximately 2% of the total load charged to the SOS over the two-year period. The associated \$6.1 million represents additional cash and revenue distributed to and shared by EA and Engage, with EA's share being \$4.8 million. Management believes the difference in MWH is a result of the difference between estimated and actual line loss or the estimating process the utility and ISO New England uses to report the amount of energy transferred to individual energy providers. Management also believes the SOS customers

were billed only for the energy delivered according to their meters as read by CMP. Through August 31, 2002, EA has recognized revenues based on the MWH allocated to the SOS by ISO New England, thereby excluding the impact of the discrepancy. During the third quarter, EA and Engage concluded their business relationship pursuant to the terms of their Agreement. Following completion of the final

-18-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

scheduled audit, the final escrow disbursements were made to EA and Engage on September 30, 2002. As a

result of the final account settlement, EA recognized the \$4.8 million of additional standard offer service (SOS)

revenue during the third quarter with an after-tax impact of \$2.9 million, or \$1.84 per share. In addition, EA reversed \$321,000 (\$.12 per share) of expenses previously accrued for EA's share of possible regulatory assessments under the Agreement with Engage. This assessment was imposed on Engage by FERC during the course of the Engage/EA Agreement. Engage has indicated that due to a change in regulation, FERC will not be making any further assessments in connection with this matter.

EA has entered into a contract for 40% of the output of the Wheelabrator-Sherman (W-S) energy facility for the two years beginning March 1, 2002. The output from this take-or-pay contract amounts to approximately 55,000 MWH annually and will be used to provide power for additional CES sales in the Company's service territory. This is EA's first take-or-pay contract, which carries more counterparty risk than others entered into to date. To mitigate this risk, EA has entered into a contract with NB Power, whereby NB Power will buy W-S output in excess of load requirements in the Company's service territory at a rate indexed to the price of 3% Sulphur Max No. 6 residential oil into New York Harbor, which is intended to reflect NB Power's avoided cost, subject to a floor and ceiling. Currently, all output has been sold to CES customers, therefore limiting the risk that energy will be sold to NB Power. In addition, NB Power will sell power to EA when load exceeds W-S output at a fixed on and off-peak rate.

In addition, EA has a power supply relationship with Duke Energy Trading and Marketing ("DETM"). In connection with this relationship, and certain transactions between EA and DETM, MPS provides a contractual guaranty on behalf of EA in an aggregate amount of one million dollars (\$1,000,000). This guaranty is related specifically to the delivery and/or receipt of electric power between EA and DETM. The guaranty was renewed in September of 2002 for an additional year.

The following illustrates each type of EA's risk exposure related to these contracts for supply and sales:

- Counterparty risk includes the possibility of the other parties' failure to fulfill their contractual obligations to EA such as

a) Deliverability risk, referring to EA not being able to serve contracted load due to the supplier's failure to provide energy.

b) Transmission risk, indicating EA's reliance on the utilities, such as the Company, Central Maine Power and Bangor Hydro-Electric, to physically transport energy to EA's customers.

c) Credit risk exposure, depending on EA's customers' ability to pay, which may deteriorate during a general economic downturn or when a commercial customer experiences financial difficulty.

- Market liquidity risk encompasses the risk of being forced to buy or sell energy on the open market. This would occur (1) if energy is not available from W-S, NB Power or other energy supply arrangements, while the contracted customer load must still be satisfied or (2) if the existing customer load deteriorated and NB Power could not buy the excess power from WS, as contracted.

-19-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

- Forecasting risk exposure includes possible inaccuracy in the estimation of energy supply requirements. One of EA's suppliers requires a 24-month forecast of load for each commitment to a 1 MW block of energy. Although there is no penalty for not using all of the energy, EA is assessed a penalty for using more than the amount contracted.

- Market-based cost risk is exposure to transactions tied to market indexes, such as the arrangement to sell excess W-S power to NB Power at a current market-indexed rate

EA's CES sales to retail customers during 2002 will produce far less revenue than EA earned from SOS in CMP's territory. The Company is reviewing EA's current and future business model which may include a possible exit from the CES market, a refinement of its market area, and/or expansion into other product and service lines.

Liquidity

Net cash flows from operating activities were \$8,165,000 for the first nine months of 2002. For the period, the Company paid \$1,652,000 in dividends and drew down \$2,281,000 of proceeds from the tax-exempt revenue bonds, based on qualifying property additions. The Company also paid scheduled sinking fund payments of \$585,000 on long-term debt and decreased short-term borrowings by \$100,000. For the period, the Company invested \$4,697,000 in electric plant.

Net cash flows from operating activities were \$9,650,000 for the first nine months of 2001. For the period, the Company paid \$1,510,000 in dividends and drew down \$1,498,000 from the trustee of the tax-exempt revenue bond proceeds based on qualifying property. The Company also paid scheduled sinking fund payments of \$525,000 on long-term debt and decreased short-term borrowings by \$900,000. For the period, the Company invested \$3,485,000 in electric plant.

Revolving Credit Agreement and Letters of Credit Extensions

On May 23, 2002, the Company's \$6 million revolving credit agreement with two participating banks was extended until June 8, 2004. The agreement contains certain restrictive covenants including interest coverage tests and debt-to-equity ratios. As of September 30, 2002, the Company was in compliance with these covenants.

The Maine Public Utility Financing Bank (MPUFB) has issued its tax-exempt bonds on behalf of the Company for the construction of qualifying distribution property. Originally issued for \$15 million and reduced with generating asset sale proceeds, the 1996 Refunding Series has \$13.6 million outstanding at September 30, 2002 and is due in 2021. On October 19, 2000, the 2000 Series of bonds were issued in the amount of \$9 million with these bonds due in 2025. The proceeds of the 2000 Series were placed in trust to be drawn down for the reimbursement of issuance costs and for the construction of qualifying distribution property and, as of September 30, 2002, approximately \$3.5 million is available. For both tax-exempt bond series, a long-term note was issued under a loan agreement between the Company and the MPUFB with the Company agreeing to make payments to the MPUFB for the principal and interest on the bonds. Concurrently, pursuant to a letter of credit and reimbursement agreement, the Bank of New York has separately issued its direct pay letters of credit (LC's) for the benefit of the holders of each series of bonds. Both LC's were due to expire in June 2002, and were

-20-

Form 10-Q

PART 1. FINANCIAL INFORMATION

Item 2. Management's Analysis of Quarterly Income Statements

Results of Operations (Continued)

extended to June 8, 2004. In addition, the Company issued \$14.4 million in Second Mortgage Bonds due 2021 to secure its obligations under the letter of credit and reimbursement agreement for the 1996 Refunding Series, replacing \$15.875 million of second mortgage bonds issued in 1996 that were due in June 2002.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

(a) The Company has interest rate risk with three variable rate debt issues of the regulated business as of September 30, 2002 for purposes other than trading. These issues are discussed in detail in the Company's 2001 Annual Report, which is Exhibit 13 of the Company's 2001 Form 10-K. The discussion occurs in Note 10, "SFAS No. 133", of the Notes to Consolidated Financial Statements.

(b) The Company's unregulated marketing subsidiary, Energy Atlantic, LLC (EA) is engaged in retail and wholesale energy transactions for purposes other than trading. This activity exposes EA to a number of risks such as counterparty, market liquidity, forecasting, deliverability, transmission, volumetric, market-based cost and credit risk as noted above. EA seeks to assure that risks are identified, evaluated and actively managed.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company's President and Chief Executive Officer and Vice President, Treasurer and Chief Financial Officer have implemented new disclosure controls and procedures. Based on their reviews of these disclosure controls and the procedures, conducted within 90 days of this filing, as evidenced by the certifications appearing at the end of this Form 10-Q, the afore-mentioned officers have concluded that the controls are working effectively.

(b) Changes in Internal Controls

There have not been any significant changes in the Company's internal controls or in other factors that could significantly offset these controls subsequent to the date of their evaluation; there were also no corrective actions with regard to significant deficiencies and material weaknesses.

Form 10-Q

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

(a) MPUC Approves Stranded Cost Revenue Requirements Effective March 1, 2002

On May 8, 2001, the MPUC issued a notice of investigation to determine whether the Company's annual recovery of \$12.5 million in stranded investment must be changed, effective March 1, 2002, to reflect any changes in its stranded costs. On July 12, 2001, the Company filed its proposal in which it advocated continuing the \$12.5 million annual recovery of stranded costs and also proposed to begin the recovery of deferred amounts associated with the discounted rates it had made available to certain industrial customers. Also at issue in the proceeding was the Company's receipt of a \$1,005,000 insurance refund associated with Maine Yankee. As of December 31, 2001, the Company reflected the refund as a miscellaneous deferred credit. A stipulation approved by the MPUC on January 7, 2002, with the appropriate order issued on February 27, 2002, includes annual stranded cost recovery of \$11,540,000 and a 15% sharing of the Maine Yankee insurance refund with the Company's shareholders, thereby leaving the rates charged to core retail customers the same.

(b) Maine Public Utilities Commission, Investigation of Rate Design of Transmission and Distribution Utilities, MPUC Docket No. 01-245.

On May 8, 2001, the MPUC issued a Notice of Investigation into certain common fundamental issues regarding the rates for the State's three major electric utilities - the Company, Central Maine Power Company (CMP) and Bangor

Hydro-Electric Company (BHE). These issues have been defined by the MPUC as follows:

- (i) The extent to which stranded cost recovery should be shifted from variable kwh and kw charges to a fixed charge;
- (ii) The redefinition of time of use periods for rate design; and
- (iii) The elimination or reduction of seasonal rates.

The Company originally believed its stranded costs should be recovered through fixed charges that its customers cannot avoid by reducing or eliminating their usage. The Company, together with CMP and BHE, filed testimony in support of its position on April 16, 2002. The Company recommended that 50% of the stranded costs allocable to residential and small to medium commercial and industrial customers and 25% of the stranded costs allocable to large industrial customers be immediately collected through a fixed charge, with all remaining stranded costs to be phased in during the Company's next rate case. The Company also recommended immediate elimination of its seasonal rates. After further review of the impact of these proposed changes, which had no overall revenue impact, the Company filed a motion to be permitted to withdraw or be released from this proceeding. The Company stated that its service territory was located in a retail energy market that was distinct from that of CMP or BHE. Because, unlike CMP and BHE, the Company has not filed an Alternative Rate Plan (ARP), management also wished to reconsider its rate design options and, at the same time, avoid promoting any billing structures that might limit or conflict with these options. The Company intends to file an ARP during the first quarter of 2003. On July 30, 2002, the Company filed a stipulation with the Commission, signed by the parties to the proceeding, to withdraw, without prejudice from the investigation. The Commission approved the Company's petition on August 20, 2002.

(c) Federal Energy Regulatory Commission (FERC) Approves Increase in Retail Transmission Rates

The FERC approved wholesale transmission rates effective June 1, 2002 in Docket No. ER00-1053. On August 6, 2002, the Company notified the MPUC of its intention to implement the associated

-22-

Form 10-Q

PART II. OTHER INFORMATION

Item 1. Legal Proceedings (Continued)

transmission component of its retail transmission and distribution (T&D) rates effective October 1, 2002. The FERC maintains jurisdiction over all transmission rates. This implementation increased T&D rates by 2%. The parties to MPS's Open Access Transmission Tariff (OATT) informational filing, FERC Docket No. ER00-1053, are currently generating data requests to MPS concerning the wholesale increase, to which the Company is responding. Although the Company expects to resolve the questions without further rate adjustment, it cannot predict the final outcome of

this proceeding.

Item 2. Changes in Securities

Item 3. Defaults upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders

None

Item 5. Other Information

Executive Changes

At the August 2, 2002 regular meeting of the Board of Directors:

J. Nicholas Bayne was elected President and Chief Executive officer, with the retirement of Paul Cariani. Mr. Bayne was also elected a Director to fill the vacancy created by the resignation of Mr. Cariani from the Board of Directors.

At the September 6, 2002 regular meeting of the Board of Directors:

Kurt A. Tornquist was appointed Vice President, Corporate Performance and Development. Mr. Tornquist formerly served as Controller and is charged with overall corporate performance improvement, as well as corporate development activities.

Brent M. Boyles was appointed Vice President, Marketing and Customer Service. Mr. Boyles formerly served as Manager of Planning and System Operations and is charged with overall responsibilities for increasing revenues, both core and non-core.

Michael A. Thibodeau was appointed Vice President, Controller and Chief Risk Officer. Mr. Thibodeau previously served as Vice President, Human Resources, Manager of Rates and Financial Planning, and Assistant Vice President Administration.

Board of Directors Authorizes Reorganization of Company into Holding Company

On October 4, 2002, the Company's Board of Directors authorized the Company to reorganize the Company into a holding company structure. The intended result would be that the Company itself would become a wholly owned subsidiary of a new holding company, which would also be the parent company of the Energy Atlantic, LLC, which is now a subsidiary of the Company. The original intent was that the Company's other subsidiary, Maine and New Brunswick Electrical Power Company, Ltd. ("ME&NB"), also become a subsidiary of the new holding company; it has since been decided that ME&NB be dissolved when its obligations have terminated,

-23-

Form 10-Q

PART II. OTHER INFORMATION

Item 5. Other Information (Continued)

and that it remain a subsidiary of the Company until such dissolution. To achieve this corporate structure, stock in the Company will be exchanged for stock in the new holding company, through a "reverse triangular merger". The reorganization will not go forward without an opinion of counsel that the transaction does not cause federal income tax liability to Company shareholders whose stock is exchanged in the reorganization. The Company will be undertaking the reorganization in order to maintain its focus on its core regulated business while at the same time positioning the Company for more diversified growth into unregulated business markets.

The reorganization will require the approval of the Maine Public Utilities Commission (the "MPUC"), the U.S. Securities and Exchange Commission under the Public Utilities Holding Company Act, and from the Federal Energy Regulatory Commission under the Federal Power Act. Among the first steps authorized by the Board were the filing of a petition for MPUC approval and the preparation and filing of documents necessary for other state and federal regulatory approvals.

Certain other regulatory and non-regulatory consents must also be obtained, and will be sought, in connection with the Company's outstanding indebtedness.

Local 1837 of IBEW Ratifies Contract

Local 1837 of the International Brotherhood of Electrical Workers ratified a three year contract with the Company, effective October 1, 2002. The agreement included a 3.25% wage increase in the first year, 3.35% in the second year, and 3.5% increase in the third year of the new contract.

Voluntary Early Retirement Program (VERP)

On November 6, 2002, the Company offered a VERP to thirteen employees who will attain age 59 and complete sixteen years of service on or before January 1, 2003. The program is necessary to realign the Company's organizational structure and employee resources for the Company's future. At this time, the Company cannot estimate how many employees will accept the Company's offer. The cost of the program for the employees accepting the Company's offer will be recorded as a charge to fourth quarter 2002 earnings.

Item 6. Exhibits and Reports on Form 8-K

A Form 8-K was filed on October 18, 2002, covering the board authorization for reorganization described under Item 5, Other Events.

Exhibit 99.1 Certification of Financial Reports dated November 14, 2002 for the Form 10-Q for the quarter ended September 30, 2002.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CERTIFICATIONS

I, J. Nicholas Bayne, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Maine Public Service Company (the registrant);

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and

c) presented in this quarterly report conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's board of directors:

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
