NEWS RELEASE

INDEPENDENCE HOLDING COMPANY ANNOUNCES

2010 FIRST-QUARTER RESULTS

Stamford, Connecticut, May 17, 2010. Independence Holding Company (NYSE: IHC) today reported 2010 first-quarter results. This press release contains both GAAP and non-GAAP financial information for which reconciliations can be found at the end of this release.

Financial Results

Net income per share from continuing operations attributable to IHC was \$1.05 per share, diluted, or \$16,161,000, for the three months ended March 31, 2010 compared to \$.22 per share, diluted, or \$3,356,000, for the three months ended March 31, 2009. Revenues increased 18% to \$116,350,000 for the three months ended March 31, 2010, compared to revenues for the three months ended March 31, 2009 of \$98,795,000. These results were positively impacted by the gain on bargain purchase under acquisition accounting as a result of IHC acquiring a controlling interest in American Independence Corp. (AMIC) in March 2010. The gain in the first quarter was generated because in the fourth quarter of 2009 the Company was required to record an other-than-temporary impairment (OTTI) loss at December 31, 2009. The gain recorded in the 2010 first quarter on IHC's investment in AMIC was \$16,733,000, net of \$11,097,000 of taxes.

IHC reported operating income¹ per share of \$.02 per share, diluted, or \$230,000, for the three months ended March 31, 2010, compared to \$.16 per share, diluted, or \$2,403,000, for the three months ended March 31, 2009.

Chief Executive Officer's Comments

Roy Thung, Chief Executive Officer, commented, "The Company's financial condition remains very strong as our book value per share increased 11% to \$14.55 at March 31, 2010 from \$13.16 at December 31, 2009 and stockholders equity at March 31, 2010 reached \$222 million. We repurchased 156,700 of our common shares during the quarter at an average price of \$8.01, which represents 55% of our book value per share as of March 31, 2010. The repurchases were made pursuant to the Company's share repurchase program, under which 343,300 shares remain available for repurchase.

Mr. Thung continued, "Our operating income dropped to \$.02 per share from \$.16 per share for the comparable quarter of 2009 and \$.14 per share for the fourth quarter of 2009. This decline is primarily due to a decrease in IHC's investment income of \$1.3 million and a much higher than expected incidence of death and long term disability (LTD) claims in our group business amounting to approximately \$1.6 million more than expected claims. The decrease in investment income is due to a decrease in yields (from 4.9% for the first quarter of 2009 to 4.1% for the comparable quarter of 2010) and the shorter duration of our portfolio. IHC has approximately \$80 million in highly rated shorter duration securities earning on average 1.1%; our portfolio as a whole is rated, on average, AA. A portfolio that is shorter in duration

enables us, if we deem prudent, the flexibility to reinvest in much higher yielding longer-term securities, which would significantly increase investment income. With respect to the group segment, fluctuations in death claims occur from time to time, but can be expected to return to projected levels over an extended period. The large influx in LTD claims this quarter is attributable to significant cuts in state and municipal budgets as a result of the recession. Group claims are beginning to show signs of subsiding subsequent to quarter end.

Non-GAAP Financial Measures

The Company provides non-GAAP financial measures to complement its consolidated financial statements presented in accordance with GAAP: (i) Operating income is income from continuing operations net of income or losses attributable to non-controlling interests and excluding net realized gains or losses, other-than-temporary impairment losses and gain on bargain purchase, net of applicable income taxes; and (ii) Operating income per share is operating income (loss) on a per share basis. These non-GAAP financial measures are intended to supplement the user's overall understanding of the Company's current financial performance and its prospects for the future. Specifically, the Company believes the non-GAAP results provide useful information to both management and investors by excluding realized gains or losses, net of taxes, that, when excluded from the GAAP results, may provide additional understanding of the Company's core operating results or business performance. However, these non-GAAP financial measures are not intended to supersede or replace the Company's GAAP results. A reconciliation of the non-GAAP results to the GAAP results is provided in the "Reconciliation of GAAP Income from Continuing Operations to Non-GAAP Income from Continuing Operations" schedule below.

Included in the realized gains, net of taxes, above are IHC's proportionate share of AMIC's realized gains (losses) net of taxes. The other-than-temporary impairment losses are primarily due to the write down in value of certain Alt-A mortgage fixed maturities.

Footnotes

¹ Operating income is a non-GAAP measure representing income from continuing operations net of (income) losses attributable to non-controlling interests and excluding net realized investment gains (losses), other-than-temporary impairment losses and gain on bargain purchase of AMIC, net of applicable income tax. The Company believes that the presentation of operating income may offer a better understanding of the core operating results of the Company. A reconciliation of income from continuing operations to operating income is included in this press release.
