ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ITEM 1. Financial Statements and Supplementary Data
FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
Note 1 Basis of Presentation

The accounting and reporting policies of First Commonwealth Financial Corporation and its subsidiaries ("First Commonwealth" or the "Company") conform with generally accepted accounting principles in the United States of America ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual realized amounts could differ from those estimates. In the opinion of management, the unaudited interim condensed consolidated financial statements include all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of First Commonwealth's financial position, results of operations, comprehensive income, cash flows and changes in shareholders' equity as of and for the periods presented.

The results of operations for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the full year of 2018. These interim financial statements should be read in conjunction with First Commonwealth's 2017 Annual Report on Form 10-K.

Adoption of New Accounting Standards

On January 1, 2018, First Commonwealth adopted ASU 2014-09, "Revenue from Contracts with Customers" ("ASC 606") and all subsequent amendments to the ASU, which creates a single framework for recognizing revenue from contracts with customers that fall within its scope and revises when it is appropriate to recognize a gain(loss) from the transfer of nonfinancial assets, such as OREO. The majority of the Company's revenues come from interest income and other sources, including loans and securities, that are outside the scope of ASC 606. The Company's services that fall within the scope of ASC 606 are presented within non-interest income and are recognized as revenue as the Company satisfies its obligation to the customer. Services within the scope of ASC 606 include trust income, service charges on deposits, insurance and retail brokerage commissions, interchange fees and gain(loss) on other real estate owned ("OREO"). Refer to Note 13, "Revenue Recognition" for further discussion on the Company's accounting policies for revenue sources within the scope of ASC 606. The Company adopted ASC 606 using the modified retrospective method applied to all contracts not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606 while prior period amounts continue to be reported in accordance with legacy GAAP. The adoption of ASC 606 did not result in a change to the accounting for any of the in-scope revenue streams; as such, no cumulative effect adjustment was recorded.

On January 1, 2018, First Commonwealth elected to adopt ASU 2018-02, "Income Statement - Reporting Comprehensive Income (Topic 220)." As part of this adoption, First Commonwealth has elected to reclassify the income tax effects resulting from tax reform from accumulated other comprehensive income to retained earnings on a portfolio basis. ASU 2018-02 provides for the reclassification of the stranded tax effects resulting from the Tax Cuts and Jobs Act. As of January 1, 2018, First Commonwealth reclassified \$1.3 million from accumulated other comprehensive income to retained earnings in relation to the stranded tax effect which included accumulated other comprehensive income recognized on available-for-sale investment securities, interest rate swaps and other post-retirement benefits. This reclassification is shown as an adjustment to the beginning of the year balances and can be seen in the Condensed Consolidated Statements of Changes in Shareholders' Equity.

In January 2016, the FASB issued ASU No. 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities." This ASU addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments by making targeted improvements to GAAP as follows: (1) require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (2) simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, and when that assessment indicates that impairment exists, requiring the entity to measure the investment

at fair value; (3) eliminate the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities; (4) eliminate the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (5) require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (6) require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; (7) require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and (8) clarify that an entity should evaluate the need for a

#### **Table of Contents**

valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. The adoption of ASU No. 2016-01 on January 1, 2018 did not have a material impact on the Company's Consolidated Financial Statements. In accordance with this ASU, and as reflected in Note 10, "Fair Values of Assets and Liabilities", the Company measured the fair value of its loan portfolio as of March 31, 2018 using an exit price notion.

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, federal funds sold and interest-bearing bank deposits. Generally, federal funds are sold for one-day periods. Note 2 Supplemental Comprehensive Income Disclosures

The following table identifies the related tax effects allocated to each component of other comprehensive income ("OCI") in the Condensed Consolidated Statements of Comprehensive Income. Reclassification adjustments related to securities available for sale are included in the "Net securities gains" line and reclassification adjustments related to losses on derivatives are included in the "Other operating expenses" line in the Condensed Consolidated Statements of Income.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### Note 5 Commitments and Contingent Liabilities

Commitments and Letters of Credit

Standby letters of credit and commercial letters of credit are conditional commitments issued by First Commonwealth to guarantee the performance of a customer to a third party. The contract or notional amount of these instruments reflects the maximum amount of future payments that First Commonwealth could be required to pay under the guarantees if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from collateral held or pledged. In addition, many of these commitments are expected to expire without being drawn upon; therefore, the total commitment amounts do not necessarily represent future cash requirements.

The following table identifies the notional amount of those instruments at:

March 31, December 2018 31, 2017 (dollars in thousands)

Financial instruments whose contract amounts represent credit risk:

| Commitments to extend credit          | \$1,782,701 | \$1,840,180 |
|---------------------------------------|-------------|-------------|
| Financial standby letters of credit   | 17,636      | 17,946      |
| Performance standby letters of credit | 21,328      | 20,472      |
| Commercial letters of credit          | 1,055       | 1,149       |

The notional amounts outstanding as of March 31, 2018 include amounts issued in 2018 of \$37 thousand in financial standby letters of credit and \$0.4 million in performance standby letters of credit. There were no commercial letters of credit issued in 2017. A liability of \$0.2 million has been recorded as of March 31, 2018 and December 31, 2017, which represents the estimated fair value of letters of credit issued. The fair value of letters of credit is estimated based on the unrecognized portion of fees received at the time the commitment was issued.

Unused commitments and letters of credit provide exposure to future credit loss in the event of nonperformance by the borrower or guaranteed parties. Management's evaluation of the credit risk related to these commitments resulted in the recording of a liability of \$5.2 million as of March 31, 2018 and December 31, 2017. This liability is reflected in "Other liabilities" in the Condensed Consolidated Statements of Financial Condition. The credit risk evaluation incorporated probability of default, loss given default and estimated utilization for the next twelve months for each loan category and the letters of credit.

# Legal Proceedings

First Commonwealth and its subsidiaries are subject in the normal course of business to various pending and threatened legal proceedings in which claims for monetary damages are asserted. As of March 31, 2018, management, after consultation with legal counsel, does not anticipate that the aggregate ultimate liability arising out of litigation pending or threatened against First Commonwealth or its subsidiaries will be material to First Commonwealth's consolidated financial position. On at least a quarterly basis, First Commonwealth assesses its liabilities and contingencies in connection with such legal proceedings. For those matters where it is probable that First Commonwealth will incur losses and the amounts of the losses can be reasonably estimated, First Commonwealth records an expense and corresponding liability in its consolidated financial statements. To the extent the pending or threatened litigation could result in exposure in excess of that liability, the amount of such excess is not currently estimable. Although not considered probable, the range of reasonably possible losses for such matters in the aggregate, beyond the existing recorded liability (if any), is between \$0 and \$1 million. Although First Commonwealth does not believe that the outcome of pending litigation will be material to First Commonwealth's consolidated financial position, it cannot rule out the possibility that such outcomes will be material to the consolidated results of operations and cash flows for a particular reporting period in the future.

First Commonwealth Financial Corporation and First Commonwealth Bank were named defendants in an action commenced August 27, 2015 by eight named plaintiffs that is pending in the Court of Common Pleas of Jefferson County, Pennsylvania. The plaintiffs allege that the Bank repossessed motor vehicles, sold the vehicles and sought to collect deficiency balances in a manner that did not comply with the notice requirements of the Pennsylvania Uniform Commercial Code (UCC), charged inappropriate costs and fees, including storage costs for dates that a repossessed vehicle was not in storage, and wrongly filed forms with the Department of Motor Vehicles asserting that the Bank had complied with applicable laws relating to the repossession of the vehicles. The plaintiffs seek to pursue the action as a class action on behalf of the named plaintiffs and other similarly situated plaintiffs who had their automobiles repossessed and seek to recover damages under the UCC and the

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Pennsylvania Fair Credit Extension Uniformity Act. First Commonwealth Financial Corporation, First Commonwealth Bank, the plaintiffs, the plaintiffs' counsel and First Commonwealth's liability insurer have entered into a Class Action Settlement Agreement and Release in which, among other things, First Commonwealth and its insurer have agreed to pay certain amounts into a settlement fund to be distributed among the class members and class counsel, First Commonwealth has agreed to satisfy the remaining deficiency balances of the class members and request that credit reporting agencies delete the tradeline relating to the repossession from each class member's credit report, and the class members will release all claims against First Commonwealth and its insurer. The Court granted preliminary approval of the settlement on March 29, 2018, and has scheduled a hearing on July 23, 2018 to consider final approval of the settlement. The estimated cost of the settlement to First Commonwealth was recorded as a liability in the second quarter of 2016. As set forth in the preceding paragraph, all current litigation matters, including this action, are believed to be within the range of reasonably possible losses set forth in the preceding paragraph.

Mortgage-backed securities include mortgage-backed obligations of U.S. Government agencies and obligations of U.S. Government-sponsored enterprises. These obligations have contractual maturities ranging from less than one year to approximately 30 years with lower anticipated lives to maturity due to prepayments. All mortgage-backed securities contain a certain amount of risk related to the uncertainty of prepayments of the underlying mortgages.

Interest rate changes have a direct impact upon prepayment speeds; therefore, First Commonwealth uses computer simulation models to test the average life and yield volatility of all mortgage-backed securities under various interest rate scenarios to monitor the potential impact on earnings and interest rate risk positions.

Expected maturities will differ from contractual maturities because issuers may have the right to call or repay obligations with or without call or prepayment penalties. Other fixed income securities within the portfolio also contain prepayment risk.

| Net gains and impairment       | \$ 2,840       | \$ 652    |

Gross gains from maturities and impairment of \$2.8 million were recognized in 2018 as a result of the successful auction call on PreSTL XIV, one of our pooled trust preferred securities. Gross gains of \$0.7 million were recognized in 2017 due to the early redemption of another of our trust preferred securities, PreSTL VII. Securities available for sale with an estimated fair value of \$609.9 million and \$569.0 million were pledged as of March 31, 2018 and December 31, 2017, respectively, to secure public deposits and for other purposes required or permitted by law.

Note 7 Impairment of Investment Securities

Securities Available for Sale and Held to Maturity

As required by FASB ASC Topic 320, "Investments – Debt and Equity Securities," credit-related other-than-temporary impairment on debt securities is recognized in earnings, while non-credit related other-than-temporary impairment on debt securities not expected to be sold is recognized in OCI. During the three months ended March 31, 2018 and 2017, no other-than-temporary impairment charges were recognized.

First Commonwealth utilizes the specific identification method to determine the net gain or loss on debt securities and the average cost method to determine the net gain or loss on equity securities.

We review our investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer and whether we are more likely than not to sell, or be required to sell, the security. We evaluate whether we are more likely than not to sell debt securities based upon our investment strategy for the particular type of security, our cash flow needs, liquidity position, capital adequacy, tax position and interest rate risk position. In addition, the risk of future other-than-temporary impairment may be influenced by additional bank failures, weakness in the U.S. economy, changes in real estate values and additional interest deferrals in our pooled trust preferred collateralized debt obligations. Our pooled trust preferred collateralized debt obligations are beneficial interests in securitized financial assets within the scope of FASB ASC Topic 325, "Investments – Other," and are therefore evaluated for other-than-temporary impairment using management's best estimate of future cash flows. If these estimated cash flows indicate that it is probable that an adverse change in cash flows has occurred, then other-than-temporary impairment would be recognized in accordance with FASB ASC Topic 320. There is a risk that First Commonwealth will record other-than-temporary impairment charges in the future. See Note 10, "Fair Values of Assets and Liabilities," for additional information.

The following table presents the gross unrealized losses and estimated fair values at March 31, 2018 for both available for sale and held to maturity securities by investment category and time frame for which securities have been in a continuous unrealized loss position:

At March 31, 2018, fixed income securities issued by U.S. Government-sponsored enterprises and U.S. Government agencies comprised 83% and 12%, respectively, of total unrealized losses due to changes in market interest rates. Pooled trust preferred collateralized debt obligations accounted for 2% of the unrealized losses primarily due to the illiquid market for this investment type. At March 31, 2018, there are 155 debt securities in an unrealized loss position.

As of March 31, 2018, our corporate securities had an amortized cost and an estimated fair value of \$20.9 million and \$21.2 million, respectively. As of December 31, 2017, our corporate securities had an amortized cost and estimated fair value of \$15.9 million and \$16.5 million, respectively. Corporate securities are comprised of debt for large regional banks. There were four corporate securities in an unrealized loss position as of March 31, 2018 and one corporate security in an unrealized loss position as of December 31, 2017. When unrealized losses exist on these investments, management reviews each of the issuer's asset quality, earnings trends and capital position, to determine whether issues in an unrealized loss position were other-than-temporarily impaired. All interest payments on the corporate securities are being made as contractually required.

As of March 31, 2018, the book value of our pooled trust preferred collateralized debt obligations totaled \$13.6 million with an estimated fair value of \$14.1 million, which includes securities comprised of 164 banks and other financial institutions. All of our pooled securities are mezzanine tranches, two of which have no senior class remaining in the issue. The credit ratings on all of our issues are below investment grade. At the time of initial issue, the subordinated tranches ranged in size from approximately 7% to 35% of the total principal amount of the respective securities and no more than 5% of any pooled security consisted of a security issued by any one institution. As of March 31, 2018, after taking into account management's best estimates of future interest deferrals and defaults, two of our securities had no excess subordination in the tranches we own and four of our securities had excess subordination which ranged from 2% to 114% of the current performing collateral.

The following table provides information related to our pooled trust preferred collateralized debt obligations as of March 31, 2018:

| Deal | Class | Book  | Estimated | Unrealized | Moody's | /Number | Deferrals | Excess        |
|------|-------|-------|-----------|------------|---------|---------|-----------|---------------|
|      |       | Value | Fair      | Gain       | Fitch   | of      | and       | Subordination |
|      |       |       | Value     | (Loss)     | Ratings | Banks   | Defaults  | as a % of     |

Lack of liquidity in the market for trust preferred collateralized debt obligations, below investment grade credit ratings and market uncertainties related to the financial industry are factors contributing to the impairment on these securities.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

All of the Company's pooled trust preferred securities are included in the non-exclusive list issued by the regulatory agencies and therefore are not considered covered funds under the Volcker Rule.

During the three months ended March 31, 2018, an auction call was successfully completed on PreTSL XIV. This resulted in the security being called at par providing a gain of \$2.8 million.

On a quarterly basis we evaluate our debt securities for other-than-temporary impairment. During the three months ended March 31, 2018 and 2017, there were no credit-related other-than-temporary impairment charges recognized on our pooled trust preferred collateralized debt obligations. When evaluating these investments, we determine a credit-related portion and a non-credit related portion of other-than-temporary impairment. The credit-related portion is recognized in earnings and represents the difference between book value and the present value of future cash flows. The non-credit related portion is recognized in OCI and represents the difference between the fair value of the security and the amount of credit-related impairment. A discounted cash flow analysis provides the best estimate of credit-related other-than-temporary impairment for these securities.

Additional information related to the discounted cash flow analysis follows:

Our pooled trust preferred collateralized debt obligations are measured for other-than-temporary impairment within the scope of FASB ASC Topic 325 by determining whether it is probable that an adverse change in estimated cash flows has occurred. Determining whether there has been an adverse change in estimated cash flows from the cash flows previously projected involves comparing the present value of remaining cash flows previously projected against the present value of the cash flows estimated at March 31, 2018. We consider the discounted cash flow analysis to be our primary evidence when determining whether credit related other-than-temporary impairment exists.

Results of a discounted cash flow test are significantly affected by other variables, such as the estimate of future cash flows, credit worthiness of the underlying banks and determination of probability of default of the underlying collateral. The following provides additional information for each of these variables:

Estimate of Future Cash Flows – Cash flows are constructed in an INTEX cash flow model which includes each deal's structural features. Projected cash flows include prepayment assumptions, which are dependent on the issuer's asset size and coupon rate. For collateral issued by financial institutions over \$15 billion in asset size with a coupon over 7%, a 100% prepayment rate is assumed. Financial institutions over \$15 billion with a coupon of 7% or under are assigned a prepayment rate of 40% for two years and 2% thereafter. Financial institutions with assets between \$2 billion and \$15 billion with coupons over 7% are assigned a 5% prepayment rate. For financial institutions below \$2 billion, if the coupon is over 10%, a prepayment rate of 5% is assumed and for all other issuers, there is no prepayment assumption incorporated into the cash flows. The modeled cash flows are then used to estimate if all the scheduled principal and interest payments of our investments will be returned.

Credit Analysis – A quarterly credit evaluation is performed for each of the 164 banks comprising the collateral across the various pooled trust preferred securities. Our credit evaluation considers all evidence available to us and includes the nature of the issuer's business, its years of operating history, corporate structure, loan composition, loan concentrations, deposit mix, asset growth rates, geographic footprint and local economic environment. Our analysis focuses on profitability, return on assets, shareholders' equity, net interest margin, credit quality ratios, operating efficiency, capital adequacy and liquidity.

Probability of Default – A probability of default is determined for each bank and is used to calculate the expected impact of future deferrals and defaults on our expected cash flows. Each bank in the collateral pool is assigned a probability of default for each year until maturity. Currently, any bank that is in default is assigned a 100% probability of default and a 0% projected recovery rate. All other banks in the pool are assigned a probability of default based on their unique credit characteristics and market indicators with a 10% projected recovery rate. For the majority of banks currently in deferral we assume the bank continues to defer and will eventually default and, therefore, a 100% probability of default is assigned. However, for some deferring collateral there is the possibility that they will become current on interest or principal payments at some point in the future and in those cases a probability that the deferral

will ultimately cure is assigned. The probability of default is updated quarterly. As of March 31, 2018, default probabilities for performing collateral ranged from 0.33% to 50%.

Our credit evaluation provides a basis for determining deferral and default probabilities for each underlying piece of collateral. Using the results of the credit evaluation, the next step of the process is to look at pricing of senior debt or credit default swaps for the issuer (or where such information is unavailable, for companies having similar credit profiles as the issuer). The pricing of these market indicators provides the information necessary to determine appropriate default probabilities for each bank.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition to the above factors, our evaluation of impairment also includes a stress test analysis which provides an estimate of excess subordination for each tranche. We stress the cash flows of each pool by increasing current default assumptions to the level of defaults that results in an adverse change in estimated cash flows. This stressed breakpoint is then used to calculate excess subordination levels for each pooled trust preferred security. The results of the stress test allow management to identify those pools that are at a greater risk for a future break in cash flows so that we can monitor banks in those pools more closely for potential deterioration of credit quality.

Our cash flow analysis as of March 31, 2018, indicates that no credit-related other-than-temporary impairment has occurred on our pooled trust preferred securities during the three months ended March 31, 2018. Based upon the analysis performed by management, it is probable that two of our pooled trust preferred securities will experience principal and interest shortfalls and therefore appropriate other-than-temporary charges were recorded in prior periods. These securities are identified in the previous table with 0.00% "Excess Subordination as a % of Current Performing Collateral." For the remaining securities listed in that table, our analysis as of March 31, 2018 indicates it is probable that we will collect all contractual principal and interest payments. For three of those securities, PreTSL IX, PreTSL X, and MMCap I, other-than-temporary impairment charges were recorded in prior periods; however, due to improvement in the expected cash flows of these securities, it is now probable that all contractual payments will be received.

During 2008, 2009 and 2010, other-than-temporary impairment charges were recognized on all of our pooled trust preferred securities, except for PreTSL IV. Our cash flow analysis as of March 31, 2018, for all of these impaired securities indicates that it is now probable we will collect principal and interest in excess of what was estimated at the time other-than-temporary impairment charges were recorded. This change can be attributed to improvement in the underlying collateral for these securities and has resulted in the present value of estimated future principal and interest payments exceeding the securities' current book value. The excess for each bond of the present value of future cash flows over our current book value ranges from 19% to 101% and will be recognized as an adjustment to yield over the remaining life of these securities. The excess subordination recognized as an adjustment to yield is reflected in the following table as increases in cash flows expected to be collected.

The following table provides a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold:

For the Three Months Ended March 31. 2018 2017 (dollars in thousands) Balance, beginning (a) \$12,208 \$17,056 Credit losses on debt securities for which other-than-temporary impairment was not previously recognized Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized Increases in cash flows expected to be collected, recognized over the remaining life of the security (147) ) (228 ) Reduction for debt securities called during the period (2,302)Balance, ending \$9,759 \$16,828

<sup>(</sup>a) The beginning balance represents credit related losses included in other-than-temporary impairment charges recognized on debt securities in prior periods.

<sup>(</sup>b) Represents the increase in cash flows recognized in interest income during the period.

In the first three months of 2018 and 2017, no other-than-temporary impairment charges were recorded on equity securities. On a quarterly basis, management evaluates equity securities for other-than-temporary impairment by reviewing the severity and duration of decline in estimated fair value, research reports, analysts' recommendations, credit rating changes, news stories, annual reports, regulatory filings, impact of interest rate changes and other relevant information. As of March 31, 2018 and 2017, there were no equity securities in an unrealized loss position. Other Investments

As a member of the Federal Home Loan Bank ("FHLB"), First Commonwealth is required to purchase and hold stock in the FHLB to satisfy membership and borrowing requirements. The level of stock required to be held is dependent on the amount of First Commonwealth's mortgage-related assets and outstanding borrowings with the FHLB. This stock is restricted in that it can only be sold to the FHLB or to another member institution, and all sales of FHLB stock must be at par. As a result of these restrictions, FHLB stock is unlike other investment securities insofar as there is no trading market for FHLB stock and the transfer price is determined by FHLB membership rules and not by market participants. As of March 31, 2018 and

ITEM 1. Financial Statements and Supplementary Data

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2017, our FHLB stock totaled \$24.4 million and \$29.8 million, respectively, and is included in "Other investments" on the Condensed Consolidated Statements of Financial Condition.

FHLB stock is held as a long-term investment and its value is determined based on the ultimate recoverability of the par value. First Commonwealth evaluates impairment quarterly and has concluded that the par value of its investment in FHLB stock will be recovered. Accordingly, no impairment charge was recorded on these securities during the three months ended March 31, 2018.

Note 8 Loans and Allowance for Credit Losses

Credit Quality Information

As part of the on-going monitoring of credit quality within the loan portfolio, the following credit worthiness categories are used in grading our loans:

Pass Acceptable levels of risk exist in the relationship. Includes all loans not classified as OAEM, substandard or doubtful.

Other Assets Especially Mentioned (OAEM) Potential weaknesses that deserve management's close attention. The potential weaknesses may result in deterioration of the repayment prospects or weaken the Company's credit position at some future date. The credit risk may be relatively minor, yet constitute an undesirable risk in light of the circumstances surrounding the specific credit. No loss of principal or interest is expected.

Substandard

Well-defined weakness or a weakness that jeopardizes the repayment of the debt. A loan may be classified as substandard as a result of deterioration of the borrower's financial condition and repayment capacity. Loans for which repayment plans have not been met or collateral equity margins do not protect the Company may also be classified as substandard.

Loans with the characteristics of substandard loans with the added characteristic that collection or liquidation in full, on the basis of presently existing facts and conditions, is highly improbable.

The use of creditworthiness categories to grade loans permits management's use of migration analysis to estimate a portion of credit risk. The Company's internal creditworthiness grading system provides a measurement of credit risk based primarily on an evaluation of the borrower's cash flow and collateral. Movement between these rating categories provides a predictive measure of credit losses and therefore assists in determining the appropriate level for the loan loss reserves. Category ratings are reviewed each quarter, at which time management analyzes the results, as well as other external statistics and factors related to loan performance. Loans that migrate towards higher risk rating levels generally have an increased risk of default, whereas loans that migrate toward lower risk ratings generally will result in a lower risk factor being applied to those related loan balances.

#### Portfolio Risks

The credit quality of our loan portfolio can potentially represent significant risk to our earnings, capital and liquidity. First Commonwealth devotes substantial resources to managing this risk primarily through our credit administration department that develops and administers policies and procedures for underwriting, maintaining, monitoring and collecting loans. Credit administration is independent of our lending departments and oversight is provided by the credit committee of the First Commonwealth Board of Directors.

Criticized loans have been evaluated when determining the appropriateness of the allowance for credit losses, which we believe is adequate to absorb losses inherent to the portfolio as of March 31, 2018. However, changes in economic conditions, interest rates, borrower financial condition, delinquency trends or previously established fair values of collateral factors could significantly change those judgmental estimates.

## Age Analysis of Past Due Loans by Segment

The following tables delineate the aging analysis of the recorded investments in past due loans as of March 31, 2018 and December 31, 2017. Also included in these tables are loans that are 90 days or more past due and still accruing because they are well-secured and in the process of collection.

|   | March 31, 2018                 |                                |  |              |                                     |             |             |  |

| Nonaccrual Loans                              |                                |                                |  |            |                                     |             |             |

The previous tables summarize nonaccrual loans by loan segment. The Company generally places loans on nonaccrual status when the full and timely collection of interest or principal becomes uncertain, when part of the principal balance has been charged off and no restructuring has occurred, or the loans reach a certain number of days past due. Generally, loans 90 days or more past due are placed on nonaccrual status, except for consumer loans, which are

placed on nonaccrual status at 150 days past due.

When a loan is placed on nonaccrual, the accrued unpaid interest receivable is reversed against interest income and all future payments received are applied as a reduction to the loan principal. Generally, the loan is returned to accrual status when (a) all delinquent interest and principal becomes current under the terms of the loan agreement or (b) the loan is both well-secured and in the process of collection and collectability is no longer in doubt. **Impaired Loans** 

Management considers loans to be impaired when, based on current information and events, it is determined that the Company will not be able to collect all amounts due according to the loan contract, including scheduled interest payments. Determination of impairment is treated the same across all loan categories. When management identifies a loan as impaired, the impairment is measured based on the present value of expected future cash flows, discounted at the loan's effective interest rate, except when the sole source for repayment of the loan is the operation or liquidation of collateral. When the loan is collateral dependent, the appraised value less estimated cost to sell is utilized. If management determines the value of the impaired loan is less than the recorded investment in the loan, impairment is recognized through an allowance estimate or a charge-off to the allowance. Troubled debt restructured loans on accrual status are also considered to be impaired loans.

When the ultimate collectability of the total principal of an impaired loan is in doubt and the loan is on nonaccrual status, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the

total principal of an impaired loan is not in doubt and the loan is on nonaccrual status, contractual interest is credited to interest income when received under the cash basis method.

At March 31, 2018 and December 31, 2017, there were no nonaccrual loans held for sale. There were no gains or losses recognized on sales of impaired loans during the three months ended March 31, 2018 and 2017.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following tables include the recorded investment and unpaid principal balance for impaired loans with the associated allowance amount, if applicable, as of March 31, 2018 and December 31, 2017. Also presented are the average recorded investment in impaired loans and the related amount of interest recognized while the loan was considered impaired. Average balances are calculated using month-end balances of the loans for the period reported and are included in the table below based on their period-end allowance position.

| and are included in the table below based on  | their perio | od-end allo                           | owance pos        | ition.   |                                       |                   |

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unfunded commitments related to nonperforming loans were \$4.2 million at March 31, 2018 and \$2.4 million at December 31, 2017. After consideration of the requirements to draw and available collateral related to these commitments, a reserve of \$0.4 million and \$0.2 million was established for these off balance sheet exposures at March 31, 2018 and December 31, 2017, respectively.

Troubled debt restructured loans are those loans whose terms have been renegotiated to provide a reduction or deferral of principal or interest as a result of the financial difficulties experienced by the borrower, who could not obtain comparable terms from alternate financing sources.

The following table provides detail as to the total troubled debt restructured loans and total commitments outstanding on troubled debt restructured loans:

> March December 31. 31, 2017 2018 (dollars in thousands)

Troubled debt restructured loans

Accrual status \$18,707 \$11,563 Nonaccrual status 10,233 11,222 Total \$28,940 \$22,785 Commitments

Letters of credit \$60 \$60 Unused lines of credit 1.778 54 Total \$1,838 \$114

The following tables provide detail, including specific reserves and reasons for modification, related to loans identified as troubled debt restructurings:

| Total  | 13  | \$308                               | \$ 157              | \$ 352             | \$   | 817          | \$ 778   | \$              | _ |

The troubled debt restructurings included in the above tables are also included in the impaired loan tables provided earlier in this note. Loans defined as modified due to a change in rate may include loans that were modified for a change in rate as well as a re-amortization of the principal and an extension of the maturity. For the three months ended March 31, 2018 and 2017, \$0.1 million and \$0.2 million, respectively, of total rate modifications represent loans with modifications to the rate as well as payment as a result of re-amortization. For both 2018 and 2017 the changes in loan balances between the pre-modification balance and the post-modification balance are due to customer payments.

A troubled debt restructuring is considered to be in default when a restructured loan is 90 days or more past due. The following table provides information related to loans that were restructured within the past twelve months and that were considered to be in default during the three months ended March 31:

|   | 2018            | 2017                  |

Note 9 Income Taxes

impairment

impairment

At March 31, 2018 and December 31, 2017, First Commonwealth had no material unrecognized tax benefits or accrued interest and penalties. If applicable, First Commonwealth will record interest and penalties as a component of noninterest expense. Federal and state returns for tax years 2014 and forward remain open for examination as of March 31, 2018.

1,122,200 240,122

During the first quarter of 2018, First Commonwealth adopted ASU No. 2018-02, "Income Statement - Reporting Comprehensive Income (Topic 220)". Adoption of this ASU reclassified the stranded other accumulated income of \$1.3 million resulting from the tax reform passed in December 2017 from accumulated other comprehensive income to retained earnings. There was no impact to total equity as a result of the adoption of this update. During the first quarter of 2017, First Commonwealth adopted ASU No. 2016-09, "Compensation-Stock Compensation (Topic 718)." Adoption of this ASU resulted in a \$0.1 million tax benefit.

Note 10 Fair Values of Assets and Liabilities

Ending balance: collectively evaluated for

FASB ASC Topic 820, "Fair Value Measurements and Disclosures," requires disclosures for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). All non-financial assets are included either as a separate line item on the Condensed Consolidated Statements of Financial Condition or in the "Other assets" category of the Condensed Consolidated

Statements of Financial Condition. Currently, First Commonwealth does not have any non-financial liabilities to disclose.

FASB ASC Topic 825, "Financial Instruments", permits entities to irrevocably elect to measure select financial instruments and certain other items at fair value. The unrealized gains and losses are required to be included in earnings each reporting period for the items that fair value measurement is elected. First Commonwealth has elected not to measure any existing financial

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

instruments at fair value under FASB ASC Topic 825; however, in the future we may elect to adopt this guidance for select financial instruments.

In accordance with FASB ASC Topic 820, First Commonwealth groups financial assets and financial liabilities measured at fair value in three levels based on the principal markets in which the assets and liabilities are transacted and the observability of the data points used to determine fair value. These levels are:

Level 1 – Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange ("NYSE"). Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 – Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained for identical or comparable assets or liabilities from alternative pricing sources with reasonable levels of price transparency. Level 2 includes Obligations of U.S. Government securities issued by Agencies and Sponsored Enterprises, Obligations of States and Political Subdivisions, corporate securities, FHLB stock, loans held for sale, interest rate derivatives (including interest rate caps, interest rate swaps and risk participation agreements), certain other real estate owned and certain impaired loans.

Level 2 investment securities are valued by a recognized third party pricing service using observable inputs. The model used by the pricing service varies by asset class and incorporates available market, trade and bid information as well as cash flow information when applicable. Because many fixed-income investment securities do not trade on a daily basis, the model uses available information such as benchmark yield curves, benchmarking of like investment securities, sector groupings and matrix pricing. The model will also use processes such as an option adjusted spread to assess the impact of interest rates and to develop prepayment estimates. Market inputs normally used in the pricing model include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications.

Management validates the market values provided by the third party service by having another recognized pricing service price 100% of the securities on an annual basis and a random sample of securities each quarter, monthly monitoring of variances from prior period pricing and, on a monthly basis, evaluating pricing changes compared to expectations based on changes in the financial markets.

Other investments recorded in the Condensed Consolidated Statements of Financial Condition are comprised of FHLB stock whose estimated fair value is based on its par value. Additional information on FHLB stock is provided in Note 7, "Impairment of Investment Securities."

Loans held for sale include residential mortgage loans originated for sale in the secondary mortgage market. The estimated fair value for these loans was determined on the basis of rates obtained in the respective secondary market. Also included in loans

held for sale are commercial loans for which fair value is determined using an executed trade or market bid obtained from potential buyers.

Interest rate derivatives are reported at an estimated fair value utilizing Level 2 inputs and are included in other assets and other liabilities, and consist of interest rate swaps where there is no significant deterioration in the counterparties' (loan customers') credit risk since origination of the interest rate swap as well as interest rate caps and risk participation agreements. First Commonwealth values its interest rate swap and cap positions using a yield curve by taking market prices/rates for an appropriate set of instruments. The set of instruments currently used to determine the U.S. Dollar yield curve includes cash LIBOR rates from overnight to one year, Eurodollar futures contracts and swap rates from one year to thirty years. These yield curves determine the valuations of interest rate swaps. Interest rate derivatives are further described in Note 11, "Derivatives."

For purposes of potential valuation adjustments to our derivative positions, First Commonwealth evaluates the credit risk of its counterparties as well as our own credit risk. Accordingly, we have considered factors such as the likelihood of default, expected loss given default, net exposures and remaining contractual life, among other things, in

determining if any fair value adjustments related to credit risk are required. We review our counterparty exposure quarterly, and when necessary, appropriate adjustments are made to reflect the exposure.

We also utilize this approach to estimate our own credit risk on derivative liability positions. In 2018, we have not realized any losses due to a counterparty's inability to pay any uncollateralized positions.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Interest rate derivatives also include interest rate forwards entered into to hedge residential mortgage loans held for sale and the related interest-rate lock commitments. This includes forward commitments to sell mortgage loans. The fair value of these derivative financial instruments are based on derivative market data inputs as of the valuation date and the underlying value of mortgage loans for rate lock commitments.

In addition, the Company hedges foreign currency risk through the use of foreign exchange forward contracts. The fair value of foreign exchange forward contracts is based on the differential between the contract price and the market-based forward rate.

The estimated fair value for other real estate owned included in Level 2 is determined by either an independent market-based appraisal less estimated costs to sell or an executed sales agreement.

Level 3 – Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer or broker traded transactions. If the inputs used to provide the valuation are unobservable and/or there is very little, if any, market activity for the security or similar securities, the securities would be considered Level 3 securities. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities. The assets included in Level 3 are pooled trust preferred collateralized debt obligations, non-marketable equity investments, certain interest rate derivatives, certain other real estate owned and certain impaired loans. Our pooled trust preferred collateralized debt obligations are collateralized by the trust preferred securities of individual banks, thrifts and bank holding companies in the United States. There has been little or no active trading in these securities since 2009; therefore, it is more appropriate to determine estimated fair value using a discounted cash flow analysis. Detail on our process for determining the appropriate cash flows for this analysis is provided in Note 7, "Impairment of Investment Securities." The discount rate applied to the cash flows is determined by evaluating the current market yields for comparable corporate and structured credit products along with an evaluation of the risks associated with the cash flows of the comparable security. Due to the fact that there is no active market for the pooled trust preferred collateralized debt obligations, one key reference point is the market yield for the single issue trust preferred securities issued by banks and thrifts for which there is more activity than for the pooled securities. Adjustments are then made to reflect the credit and structural differences between these two security types. Management validates the fair value of the pooled trust preferred collateralized debt obligations by monitoring the performance of the underlying collateral, discussing the discount rate, cash flow assumptions and general market trends with a specialized third party and confirming changes in the underlying collateral to the trustee reports. Management's monitoring of the underlying collateral includes deferrals of interest payments, payment defaults, cures of previously deferred interest payments, any regulatory filings or actions and general news related to the underlying collateral. Management also evaluates fair value changes compared to expectations based on changes in the interest rates used in determining the discount rate and general financial markets.

The estimated fair value of the non-marketable equity investments included in Level 3 is based on par value. The estimated fair value of limited partnership investments included in Level 3 is based on par value. For interest rate derivatives included in Level 3, the fair value incorporates credit risk by considering such factors as likelihood of default and expected loss given default based on the credit quality of the underlying counterparties (loan customers).

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In accordance with ASU 2011-4, the following table provides information related to quantitative inputs and assumptions used in Level 3 fair value measurements.

|                                      | Fair Value ( |     |                         | Unobservable Inputs    | Range /                |

|                                      |              |     |                         | Gas per MMBTU          | \$2.81 - \$3.35 (c)    |
|                                      |              |     |                         | Oil per BBL/d          | \$51.59 - \$59.55 (c)  |
|                                      | 11,181       | (b) | Discounted Cash<br>Flow | Discount Rate          | 1.9% - 21.0%           |
| Limited Partnership Investments      | 2,292        |     | Par Value               | N/A                    | N/A                    |

- (a) Incorporates spread over risk free rate related primarily to credit quality and illiquidity of securities.
- (b) The remainder of impaired loans valued using Level 3 inputs are not included in this disclosure as the values of those loans are based on bankruptcy agreement documentation.
- (c) Unobservable inputs are defined as follows: MMBTU million British thermal units; BBL/d barrels per day. The significant unobservable inputs used in the fair value measurement of pooled trust preferred securities are the probability of default, discount rates and prepayment rates. Significant increases in the probability of default or discount rate used would result in a decrease in the estimated fair value of these securities, while decreases in these variables would result in higher fair value measurements. In general, a change in the assumption of probability of default is accompanied by a directionally similar change in the discount rate. In most cases, increases in the prepayment rate assumptions would result in a higher estimated fair value for these securities while decreases would provide for a lower value. The direction of this change is somewhat dependent on the structure of the investment and the amount of the investment tranches senior to our position.

The discount rate is the significant unobservable input used in the fair value measurement of impaired loans. Significant increases in this rate would result in a decrease in the estimated fair value of the loans, while a decrease in this rate would result in a higher fair value measurement. Other unobservable inputs in the fair value measurement of impaired loans relate to gas, oil and natural gas prices. Increases in these prices would result in an increase in the estimated fair value of the loans, while a decrease in these prices would result in a lower fair value measurement.

During the three months ended March 31, 2018 and 2017, there were no transfers between fair value Levels 1, 2 or 3. There were no gains or losses included in earnings for the periods presented that are attributable to the change in realized gains (losses) relating to assets held at March 31, 2018 and 2017.

ITEM 1. Financial Statements and Supplementary Data

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The tables below present the balances of assets measured at fair value on a nonrecurring basis at:

March 31, 2018

Lekelvel 2 Level 3 Total (dollars in thousands)

Impaired loans \$\\_\$26,546 \\$19,238 \\$45,784

Other real estate owned \( -3,278 \) \( -\\$3,278 \)

Total Assets \\$\\_\$29,824 \\$19,238 \\$49,062

December 31, 2017 Lekelvel 2 Level 3 Total

Lekevel 2 Level 3 Total (dollars in thousands)

Impaired loans \$\\_\$23,249 \\$15,245 \\$38,494

Other real estate owned \( -3,264 \) \( -\) \( 3,264 \)

Total Assets \\$\\_\$26,513 \\$15,245 \\$41,758

The following gain (losses) were realized on the assets measured on a nonrecurring basis:

For the Three Months Ended March 31, 2018 2017 (dollars in thousands)

Impaired loans \$(7,850) \$(1,460) Other real estate owned (30 ) (31 ) Total losses \$(7,880) \$(1,491)

Impaired loans over \$100 thousand are individually reviewed to determine the amount of each loan considered to be at risk of non-collection. The fair value for impaired loans that are collateral based is determined by reviewing real property appraisals, equipment valuations, accounts receivable listings and other financial information. A discounted cash flow analysis is performed to determine fair value for impaired loans when an observable market price or a current appraisal is not available. For real estate secured loans, First Commonwealth's loan policy requires updated appraisals be obtained at least every twelve months on all impaired loans with balances of \$250 thousand and over. For real estate secured loans with balances under \$250 thousand, we rely on broker price opinions. For non-real estate secured assets, the Company normally relies on third party valuations specific to the collateral type.

The fair value for other real estate owned, determined by either an independent market-based appraisal less estimated costs to sell or an executed sales agreement, is classified as Level 2. The fair value for other real estate owned determined using an internal valuation is classified as Level 3. OREO has a current carrying value of \$3.0 million as of March 31, 2018 and consists primarily of residential and commercial real estate properties in Pennsylvania. We review whether events and circumstances subsequent to a transfer to other real estate owned have occurred that indicate the balance of those assets may not be recoverable. If events and circumstances indicate further impairment we will record a charge to the extent that the carrying value of the assets exceed their fair values, less estimated cost to sell, as determined by valuation techniques appropriate in the circumstances.

Certain other assets and liabilities, including goodwill and core deposit intangibles, are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances. Additional information related to goodwill is provided in Note 12, "Goodwill." There were no other assets or liabilities measured at fair value on a nonrecurring basis during the three months ended March 31, 2018.

FASB ASC 825-10, "Transition Related to FSP FAS 107-1" and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," requires disclosure of the fair value of financial assets and financial liabilities, including those

financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are as discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash and due from banks and interest-bearing bank deposits: The carrying amounts for cash and due from banks and interest-bearing bank deposits approximate the estimated fair values of such assets.

Securities: Fair values for securities available for sale and held to maturity are based on quoted market prices, if available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. Pooled trust preferred collateralized debt obligations values are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer or broker traded transactions. These valuations incorporate certain assumptions and projections in determining the fair value assigned to each instrument. The carrying value of other investments, which includes FHLB stock, is considered a reasonable estimate of fair value.

Loans: The fair values of all loans are estimated by discounting the estimated future cash flows using interest rates currently offered for loans with similar terms to borrowers of similar credit quality adjusted for past due and nonperforming loans.

Loans held for sale: The estimated fair value of loans held for sale is based on market bids obtained from potential buyers.

Off-balance sheet instruments: Many of First Commonwealth's off-balance sheet instruments, primarily loan commitments and standby letters of credit, are expected to expire without being drawn upon; therefore, the commitment amounts do not necessarily represent future cash requirements. FASB ASC Topic 460, "Guarantees" clarified that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The carrying amount and fair value for standby letters of credit was \$0.2 million at March 31, 2018 and December 31, 2017. See Note 5, "Commitments and Contingent Liabilities," for additional information.

Deposit liabilities: The estimated fair value of demand deposits, savings accounts and money market deposits is the amount payable on demand at the reporting date because of the customers' ability to withdraw funds immediately. The carrying value of variable rate time deposit accounts and certificates of deposit approximate their fair values at the report date. Also, fair values of fixed rate time deposits for both periods are estimated by discounting the future cash flows using interest rates currently being offered and a schedule of aggregated expected maturities.

Short-term borrowings: The fair values of borrowings from the FHLB were estimated based on the estimated incremental borrowing rate for similar type borrowings. The carrying amounts of other short-term borrowings such as federal funds purchased and securities sold under agreement to repurchase were used to approximate fair value due to the short-term nature of the borrowings.

Subordinated debt, long-term debt and capital lease obligation: The fair value is estimated by discounting the future cash flows using First Commonwealth's estimate of the current market rate for similar types of borrowing arrangements or an announced redemption price.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### Note 11 Derivatives

Derivatives Not Designated as Hedging Instruments

First Commonwealth is a party to interest rate derivatives that are not designated as hedging instruments. These derivatives relate to interest rate swaps that First Commonwealth enters into with customers to allow customers to convert variable rate loans to a fixed rate. First Commonwealth pays interest to the customer at a floating rate on the notional amount and receives interest from the customer at a fixed rate for the same notional amount. At the same time the interest rate swap is entered into with the customer, an offsetting interest rate swap is entered into with another financial institution. First Commonwealth pays the other financial institution interest at the same fixed rate on the same notional amount as the swap entered into with the customer, and receives interest from the financial institution for the same floating rate on the same notional amount.

The changes in the fair value of the swaps offset each other, except for the credit risk of the counterparties, which is determined by taking into consideration the risk rating, probability of default and loss given default for all counterparties.

We have 37 risk participation agreements with financial institution counterparties for interest rate swaps related to loans in which we are a participant. The risk participation agreements provide credit protection to the financial institution should the borrower fail to perform on its interest rate derivative contract with the financial institution. We have twelve risk participation agreements with financial institution counterparties for interest rate swaps related to loans in which we are the lead bank. The risk participation agreement provides credit protection to us should the borrower fail to perform on its interest rate derivative contract with us.

First Commonwealth is also party to interest rate caps that are not designated as hedging instruments. These derivatives relate to contracts that First Commonwealth enters into with loan customers that provide a maximum interest rate on their variable rate loan. At the same time the interest rate cap is entered into with the customer, First Commonwealth enters into an offsetting interest rate cap with another financial institution. The notional amount and maximum interest rate on both interest cap contracts are identical.

The fee received, less the estimate of the loss for the credit exposure, was recognized in earnings at the time of the transaction.

Derivatives Designated as Hedging Instruments

The Company has entered into two interest rate swap contracts that were designated as cash flow hedges. The interest rate swaps have a total notional amount of \$115.0 million with an original maturity of four years. The Company's risk management objective for these hedges is to reduce its exposure to variability in expected future cash flows related to interest payments on commercial loans benchmarked to the 1-month LIBOR rate. Therefore, the interest rate swaps convert the interest payments on the first \$115.0 million of 1-month LIBOR based commercial loans into fixed rate payments.

The periodic net settlement of interest rate swaps is recorded as an adjustment to "Interest and fees on loans" in the Condensed Consolidated Statements of Income. For the three months ended March 31, 2018, there was a \$0.1 million negative impact on interest income as a result of these interest rate swaps, respectively. Changes in the fair value of the effective portion of cash flow hedges are reported in OCI. When the cash flows associated with the hedged item are realized, the gain or loss included in OCI is recognized in "Interest and fees on loans," the same line item in the Condensed Consolidated Statements of Income as the income on the hedged items. The cash flow hedges were highly effective at March 31, 2018 and December 31, 2017, and changes in the fair value attributed to hedge ineffectiveness were not material.

The Company also enters into interest rate lock commitments in conjunction with its mortgage origination business. These are commitments to originate loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. The Company locks the rate in with an investor and commits to deliver the loan if settlement occurs ("best efforts") or commits to deliver the locked loan in a binding ("mandatory") delivery program with an investor. Loans under mandatory rate lock commitments are covered under forward sales contracts of

mortgage-backed securities ("MBS"). Forward sales contracts of MBS are recorded at fair value with changes in fair value recorded in "Other noninterest expense" in the Condensed Consolidated Statements of Income. The impact to noninterest expense for the three months ended March 31, 2018 totaled \$62 thousand.

Interest rate lock commitments and commitments to deliver loans to investors are considered derivatives. The market value of interest rate lock commitments and best efforts contracts are not readily ascertainable with precision because they are not actively traded in stand-alone markets. We determine the fair value of rate lock commitments and delivery contracts by measuring the fair value of the underlying asset, which is impacted by current interest rates and taking into consideration the probability that the rate lock commitments will close or will be funded. At March 31, 2018, the underlying funded mortgage loan commitments had a carrying value of \$7.0 million and a fair value of \$7.2 million, while the underlying unfunded

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

mortgage loan commitments had a notional amount of \$18.3 million. At December 31, 2017, the underlying funded mortgage loan commitments had a carrying value of \$14.3 million and a fair value of \$14.7 million, while the underlying unfunded mortgage loan commitments had a notional amount of \$13.8 million.

In addition, a small amount of interest income on loans is exposed to changes in foreign exchange rates. Several commercial borrowers have a portion of their operations outside of the United States and borrow funds on a short-term basis to fund those operations. In order to reduce the risk related to the translation of foreign denominated transactions into U.S. dollars, the Company enters into foreign exchange forward contracts. These contracts relate principally to the Euro and the Canadian dollar. The contracts are recorded at fair value with changes in fair value recorded in "Other noninterest expense" in the Condensed Consolidated Statements of Income. The impact on other noninterest expense for the three months ended March 31, 2018 totaled \$3 thousand. At March 31, 2018 and December 31, 2017, the underlying loans had a carrying value of \$7.8 million and \$10.0 million, respectively, and a fair value of \$7.8 million and \$10.1 million, respectively.

The following table depicts the credit value adjustment recorded related to the notional amount of derivatives outstanding as well as the notional amount of risk participation agreements participated to other banks:

| (Decrease) increase in other expense              | (3    | )                      | 2    |  |

The fair value of our derivatives is included in a table in Note 10, "Fair Values of Assets and Liabilities," in the line items

<sup>&</sup>quot;Other assets" and "Other liabilities."

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### Note 12 Goodwill

FASB ASC Topic 350-20, "Intangibles – Goodwill and Other" requires an annual valuation of the fair value of a reporting unit that has goodwill and a comparison of the fair value to the book value of equity to determine whether the goodwill has been impaired. Goodwill is also required to be tested on an interim basis if an event or circumstance indicates that it is more likely than not that an impairment loss has been incurred. When triggering events or circumstances indicate that goodwill testing is required, an assessment of qualitative factors can be completed before performing the two step goodwill impairment test. ASU 2011-8 provides that if an assessment of qualitative factors determines it is more likely than not that the fair value of a reporting unit exceeds its carrying amount, then the two step goodwill impairment test is not required.

We consider First Commonwealth to be one reporting unit. The carrying amount of goodwill as of March 31, 2018 and December 31, 2017 was \$255.2 million and \$255.4 million, respectively. Goodwill decreased \$0.2 million during the three months ended March 31, 2018 as a result of deferred tax adjustments related to the DCB Financial ("DCB") acquisition. No impairment charges on goodwill or other intangible assets were incurred in 2018 or 2017. We test goodwill for impairment as of November 30th each year and again at any quarter-end if any material events

As of March 31, 2018, goodwill was not considered impaired; however, changing economic conditions that may adversely affect our performance, the fair value of our assets and liabilities, or our stock price could result in impairment, which could adversely affect earnings in future periods. Management will continue to monitor events that could impact this conclusion in the future.

Note 13 Revenue Recognition

occur during a quarter that may affect goodwill.

On January 1, 2018, the Company adopted ASU No. 2014-09 "Revenue from Contracts with Customers" (Topic 606) and all subsequent ASUs that modified Topic 606. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, First Commonwealth will generally be required to use more judgment and make more estimates than under current guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation.

The Company adopted ASC 606 using the modified retrospective method applied to all contracts not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts were not adjusted and continue to be reported in accordance with our historic accounting under Topic 605. The implementation of the new standard did not have a material impact on the measurement or recognition of revenue, therefore a cumulative effect adjustment to opening retained earnings was not necessary.

In connection with the adoption of Topic 606, First Commonwealth is required to capitalize, and subsequently amortize into expense, certain incremental costs of obtaining a contract with a customer if these costs are expected to be recovered. The incremental costs of obtaining a contract are those costs that an entity incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained, for example sales commission. The Company utilizes the practical expedient which allows entities to immediately expense contract acquisition costs when the asset that would have resulted from capitalizing these costs would have been amortized in one year or less. Upon adoption of Topic 606, the Company did not capitalize any contract acquisition cost.

The Company also evaluated whether it has any significant contract balances. A contract asset balance occurs when an entity performs a service for a customer before the customer pays consideration resulting in a contract receivable or before payment is due resulting in a contract asset. A contract liability balance is an entity's obligation to transfer a

service to a customer for which the Company has already received payment from the customer. First Commonwealth's noninterest revenue streams are largely based on transactional activity, or standard month-end revenue accruals such as trust income which is based on month-end market values. Consideration is often received immediately or shortly after the Company satisfies its performance obligation and revenue is recognized. The Company does not typically enter into long-term revenue contracts with customers, and therefore, does not experience significant contract balances. As of March 31, 2018 and December 31, 2017, the Company did not have any significant contract balances.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Topic 606 does not apply to revenue associated with financial instruments, including revenue from loans and securities. In addition, certain noninterest income streams such as fees associated with derivatives are not in scope of the new guidance. Topic 606 is applicable to noninterest revenue streams such as trust income, service charges on deposits, insurance and retail brokerage commissions, card related interchange income and gain(loss) on sale of OREO. The recognition of these revenue streams did not change significantly upon adoption of Topic 606. Substantially all of the Company's revenue is generated from contracts with customers.

Noninterest revenue streams in-scope of Topic 606 are discussed below:

#### Trust Income

Trust income is primarily comprised of fees earned from the management and administration of trusts and other customer assets. The Company's performance obligation is generally satisfied over time and the resulting fees are recognized monthly, based upon a tiered scale of market value of the assets under management at month-end. Payment is generally received a few days after month end through a direct charge to customers' accounts. The Company does not earn performance-based incentives. Optional services such as financial planning or tax return preparation services are also available to trust customers. The Company's performance obligation for these transactional-based services is generally satisfied and related revenue recognized, at a point in time. Payment is received shortly after services are rendered.

## Service Charges on Deposit Accounts

Service charges on deposit accounts consist of fees earned from its deposit customers for transaction-based, account maintenance, overdraft services and account analysis fees. Transaction-based fees, which include services such as ATM use fees, stop payment fees, statement rendering and ACH fees are recognized at the time the transaction is executed which is the point in time the Company fulfills the customer's request. Monthly account maintenance fees are earned over the course of the month, representing the period over which the Company satisfies the performance obligation. Overdraft fees are recognized at the point in time that the overdraft occurs. The Company's performance obligation for account analysis fees is generally satisfied, and the related revenue recognized, during the month the service is provided. Payment for service charges on deposit accounts is primarily received immediately or in the following month through a direct charge to customers' accounts.

#### **Insurance and Retail Brokerage Commissions**

Insurance income primarily consists of commissions received from execution of personal, business and health insurance policies when acting as an agent on behalf of insurance carriers. The Company's performance obligation is generally satisfied upon the issuance of the insurance policy. Because the Company's contracts with the insurance carriers are generally cancellable by either party, with minimal notice, insurance commissions are recognized during the policy period as received. Also, the majority of insurance commissions are received on a monthly basis during the policy period, however some carriers pay the full annual commission to First Commonwealth at the time of policy issuance or renewal. In these cases, First Commonwealth would be required to refund any commissions it would not be entitled to as a result of cancelled or terminated policies. The Company has established a refund liability for the remaining term of the policies expected to be cancelled. The Company also receives incentive-based contingency fees from the insurance carriers. Contingency fee revenue, which totals approximately \$0.3 million per year, is recognized as received due to the immaterial amount.

Retail brokerage income primarily consists of commissions received on annuity and investment product sales through a third-party service provider. The Company's performance obligation is generally satisfied upon the issuance of the annuity policy or the execution of an investment transaction. The Company does not earn a significant amount of trailer fees on annuity sales. However, after considering the factors impacting these trailer fees, such as the uncertainty of investor behavior and changes in the market value of assets, First Commonwealth determined that it would recognize trailing fees as received because it could not reasonably estimate an amount of future trailing commissions for which collection is probable. Commissions from the third-party service provider are received on a monthly basis based upon customer activity for the month. The fees are recognized monthly with a receivable until commissions are received from the third-party service provider the following month. Because the Company acts an agent in arranging the relationship between the customer and the third-party service provider and does not control the services rendered to the customers, retail brokerage fees are presented net of related costs, including \$0.4 million in commission expense.

Card Related Interchange Income

ITEM 1. Financial Statements and Supplementary Data
FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Card related interchange income is primarily comprised of debit and credit card income, ATM fees and merchant services income. Debit and credit card income is primarily comprised of interchange fees earned whenever the Company's debit and credit cards are processed through card payment networks such as Mastercard. ATM fees are primarily generated when a Company cardholder uses a non-Company ATM or a non-Company cardholder uses a Company ATM. Merchant services income mainly represents fees charged to merchants to process their debit and credit card transactions, in addition to account management fees. Card related interchange income is recognized daily as the customer transactions are settled.

#### Other Income

Other income includes service revenue from processing wire transfers, bill pay service, cashier's checks, and other services. The Company's performance obligation for these services are largely satisfied, and related revenue recognized, when the services are rendered or upon completion. Payment is typically received immediately or in the following month.

#### Gains(loss) on sales of OREO

First Commonwealth records a gain or loss from the sale of OREO when control of the property transfers to the buyer, which generally occurs at the time of an executed deed. When First Commonwealth finances the sale of OREO to the buyer, an assessment of whether the buyer is committed to perform their obligations under the contract is completed along with an evaluation of whether collectability of the transaction price is probable. Once these criteria are met, the OREO asset is derecognized and the gain or loss on sale is recorded upon transfer of control of the property to the buyer. In determining the gain or loss on the sale, First Commonwealth adjusts the transaction price and related gain(loss) on sale if a significant financing component is present.

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The impact on the condensed consolidated statements of income of adopting ASC 606 for period ending March 31 2018 is outlined below:

#### Note 14 New Accounting Pronouncements

Total Noninterest Income

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)," in order to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. Additionally, in January 2018, the FASB issued ASU No. 2018-01, "Leases (Topic 842)" providing an optional practical expedient to Topic 842. Lessor accounting under the new guidance remains largely unchanged as it is substantially equivalent to existing guidance for sales-type leases, direct financing leases, and operating leases. Leveraged leases have been eliminated, although lessors can continue to account for existing leveraged leases using the current accounting guidance. Other limited changes were made to align lessor accounting with the lessee accounting model and the new revenue recognition standard. All entities will classify leases to determine how to recognize lease-related revenue and expense. Quantitative and qualitative disclosures will be required by lessees and lessors to meet the objective of enabling users of financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases. The intention is to require enough information to supplement the amounts recorded in the financial statements so that users can understand more about the nature of an entity's leasing activities. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. All entities are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. Entities have the option to use certain relief; full retrospective application is prohibited. We are currently evaluating the potential impact of ASU 2016-02 on our financial statements.

\$22,043 \$16,932

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments – Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments," which amends the guidance for recognizing credit losses from an "incurred loss" methodology that delays recognition of credit losses until it is probable a loss has been incurred to an expected credit loss methodology. The guidance requires the use of the modified retrospective transition method by means of a cumulative-effect adjustment to equity as of the beginning of the period in which the guidance is adopted. The standard is effective for the Company as of January 1, 2020. Management is currently evaluating the impact of the amended guidance on First Commonwealth's financial condition or results of operations.

In January 2017, the FASB issued ASU No. 2017-04, "Intangibles-Goodwill and Other (Topic 350), Simplifying the Test for Goodwill Impairment" which simplifies the subsequent measurement of goodwill by eliminating Step 2 from

the goodwill impairment test. Under this ASU, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. Impairment should be recognized for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to the reporting unit. Income tax effects from any tax deductible goodwill should be taken into consideration of the carrying amount of the reporting unit when measuring for goodwill impairment, if applicable. An entity still has the option to perform the qualitative assessment for the reporting unit to determine if the quantitative impairment test is necessary. This

ITEM 1. Financial Statements and Supplementary Data FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

standard is effective for interim and annual periods for fiscal years beginning after December 15, 2019. The adoption of this ASU is not expected to have a material impact on First Commonwealth's financial condition or results of operations.

In August 2017, the FASB issued ASU No. 2017-12, "Derivatives and Hedging (Topic 815), Targeted Improvements to Accounting for Hedging Activities" with the objective of improving the financial reporting of hedging relationships to better portray the economic results of risk management activities in its financial statements. The main provisions of this ASU update the hedge accounting model to expand the ability to hedge risk, reduce complexity, and ease certain documentation and assessment requirements. It also eliminates the requirement to separately measure and report hedge ineffectiveness, and generally requires the change in fair value of a hedging instrument to be presented in the same income statement line as the hedged item. The standard is effective for fiscal years beginning after December 15, 2018, including interim periods within that fiscal year. The adoption of this ASU is not expected to have a material impact on First Commonwealth's financial condition or results of operations.

In February 2018, the FASB issued ASU No. 2018-02, "Income Statement - Reporting Comprehensive Income (Topic 22)" allowing a reclassification from accumulated other comprehensive income to retained earnings for the stranded tax effects resulting from the Tax Cuts and Jobs Act. This amendment also requires certain disclosures about the stranded tax effects, including disclosure of the policy for releasing income tax effects from accumulated other comprehensive income and the impact if the entity elected to reclassify the income tax effects or, if the entity did not elect to reclassify, a statement that the entity did not elect to reclassify. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company adopted this ASU as of January 1, 2018. Adoption of this ASU did not have a material impact on First Commonwealth's financial condition or results of operations.

Note 15 Subsequent Event

On May 1, 2018, the Company completed its acquisition of Garfield Acquisition Corp., and its banking subsidiary, Foundation Bank. Foundation has approximately \$207 million in assets and operates five full-service banking offices which will operate under the First Commonwealth name.

# ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

This discussion and the related financial data are presented to assist in the understanding and evaluation of the consolidated financial condition and the results of operations of First Commonwealth Financial Corporation including its subsidiaries ("First Commonwealth") for the three months ended March 31, 2018 and 2017, and should be read in conjunction with the Condensed Consolidated Financial Statements and notes thereto included in this Form 10-Q. Forward-Looking Statements

Certain statements contained in this report that are not historical facts may constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and are intended to be covered by the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, notwithstanding that such statements are not specifically identified as such. In addition, certain statements may be contained in our future filings with the Securities and Exchange Commission, in press releases, and in oral and written statements made by us or with our approval that are not statements of historical fact and constitute "forward-looking statements" as well. These statements, which are based on certain assumptions and describe our future plans, strategies and expectations, can generally be identified by the use of words such as "may," "will," "should," "could," "would," "plan," "believe," "expect," "anticipate," "intend," "estimate" similar meaning. These forward-looking statements are subject to significant risks, assumptions and uncertainties, and could be affected by many factors, including, but not limited to: (1) local, regional, national and international economic conditions and the impact they may have on First Commonwealth and its customers; (2) volatility and disruption in national and international financial markets; (3) the effects of and changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve Board; (4) inflation, interest rate, commodity price, securities market and monetary fluctuations; (5) the effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities and insurance) with which First Commonwealth or its customers must comply; (6) the soundness of other financial institutions; (7) political instability; (8) impairment of First Commonwealth's goodwill or other intangible assets; (9) acts of God or of war or terrorism; (10) the timely development and acceptance of new products and services and perceived overall value of these products and services by users; (11) changes in consumer spending, borrowings and savings habits; (12) changes in the financial performance and/or condition of First Commonwealth's borrowers; (13) technological changes; (14) acquisitions and integration of acquired businesses; (15) First Commonwealth's ability to attract and retain qualified employees; (16) changes in the competitive environment in First Commonwealth's markets and among banking organizations and other financial service providers; (17) the ability to increase market share and control expenses; (18) the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters; (19) the reliability of First Commonwealth's vendors, internal control systems or information systems; (20) the costs and effects of legal and regulatory developments, the resolution of legal proceedings or regulatory or other governmental inquiries, the results of regulatory examinations or reviews and the ability to obtain required regulatory approvals; and (21) other risks and uncertainties described in this report and in the other reports that we file with the Securities and Exchange Commission, including our most recent Annual Report on Form 10-K.

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements in this report. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Explanation of Use of Non-GAAP Financial Measure

In addition to the results of operations presented in accordance with generally accepted accounting principles ("GAAP"), First Commonwealth management uses, and this quarterly report contains or references, certain non-GAAP financial measures, such as net interest income on a fully taxable equivalent basis. We believe this non-GAAP financial measure provides information useful to investors in understanding our underlying operational performance and our business and performance trends as it facilitates comparison with the performance of others in the financial services

industry. Although we believe that this non-GAAP financial measure enhances investors' understanding of our business and performance, this non-GAAP financial measure should not be considered an alternative to GAAP. We believe the presentation of net interest income on a fully taxable equivalent basis ensures comparability of net interest income arising from both taxable and tax-exempt sources and is consistent with industry practice. Interest income per the Condensed Consolidated Statements of Income is reconciled to net interest income adjusted to a fully taxable equivalent basis on pages 48 for the three months ended March 31, 2018 and 2017, respectively.

### ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

**Results of Operations** 

Three Months Ended March 31, 2018 Compared to Three Months Ended March 31, 2017 Net Income.

For the three months ended March 31, 2018, First Commonwealth had net income of \$23.3 million, or \$0.24 diluted earnings per share, compared to net income of \$15.9 million, or \$0.18 diluted earnings per share, in the three months ended March 31, 2017. Growth in net income is primarily the result of increases in net interest income and noninterest income more than offsetting increases in noninterest expense and provision for credit losses. Also contributing to the increase in net income is a decrease in the statutory tax rate from 35% in 2017 to 21% in 2018.

For the three months ended March 31, 2018, the Company's return on average equity was 10.57% and its return on average assets was 1.29%, compared to 8.51% and 0.96%, respectively, for the three months ended March 31, 2017. Net Interest Income

Net interest income, on a fully taxable equivalent basis, was \$60.2 million in the first three months of 2018, compared to \$52.8 million for the same period in 2017. This increase was due to both growth in average interest earning assets of \$483.6 million and a 33 basis point increase in the yield on interest earning assets. Net interest income comprises a majority of our operating revenue (net interest income before provision expense plus noninterest income), at 73% and

75% for the three months ended March 31, 2018 and 2017, respectively.

The net interest margin, on a fully taxable equivalent basis, was 3.69% and 3.50% for the three months ended March 31, 2018 and March 31, 2017, respectively. The 19 basis point increase in the net interest margin is attributable to both changes in the level of interest rates and the amount and composition of interest-earning assets and interest-bearing liabilities.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

The taxable equivalent yield on interest-earning assets was 4.11% for the three months ended March 31, 2018, an increase of 33 basis points compared to the 3.78% yield for the same period in 2017. This increase is largely due to an increase in the loan portfolio yield, which improved by 36 basis points when compared to the three months ended March 31, 2017. Contributing to this increase was the yield on our adjustable and variable rate commercial loan portfolios, which increased 63 basis points largely due to the Federal Reserve increasing short term interest rates four times since December 2016. In addition, the yield on the investment portfolio increased 3 basis points in comparison to the prior year. This increase can be attributed to investment security runoff being replaced with higher yielding investments. Investment portfolio purchases during the three months ended March 31, 2018 have been primarily in mortgage-related assets with approximate durations of 30-64 months and corporate securities with durations of approximately five years. The mortgage-related investments have monthly principal payments that will provide for reinvestment opportunities at higher rates if interest rates rise.

The cost of interest-bearing liabilities increased to 0.56% for the three months ended March 31, 2018, from 0.38% for the same period in 2017, primarily due to an increase in the cost of short-term borrowings. Deposits acquired in our recent acquisitions, as well as organic growth in consumer checking and savings deposits contributed to a decline in average short-term borrowings of \$258.9 million for the three months ended March 31, 2018 compared to the same period in 2017. Higher market interest rates resulted in the cost of short-term borrowings increasing 62 basis points in comparison to the same period last year.

For the three months ended March 31, 2018, changes in interest rates positively impacted net interest income by \$2.3 million when compared with the same period in 2017. The higher yield on interest-earning assets positively impacted net interest income by \$4.9 million, while the increase in the cost of interest-bearing liabilities negatively impacted net interest income by \$2.7 million.

Changes in the volume of interest-earning assets and interest-bearing liabilities positively impacted net interest income by \$5.1 million in the three months ended March 31, 2018, as compared to the same period in 2017. Higher levels of interest-earning assets resulted in an increase of \$4.9 million in interest income, and changes in the volume of interest-bearing liabilities decreased interest expense by \$0.2 million, primarily as the result of decreases in short-term borrowings. Average earning assets for the three months ended March 31, 2018 increased \$483.6 million, or 7.9%, compared to the same period in 2017. Average loans for the comparable period increased \$496.9 million, or 10.1%.

Net interest income also benefited from a \$202.1 million increase in average net free funds at March 31, 2018 as compared to March 31, 2017. Average net free funds are the excess of noninterest-bearing demand deposits, other noninterest-bearing liabilities and shareholders' equity over noninterest-earning assets. The largest component of the increase in net free funds was an increase of \$169.3 million, or 13.8%, in noninterest-bearing demand deposit average balances. The increase in these deposits is largely impacted by deposits acquired from the acquisition of DCB in April 2017. Additionally, average time deposits for the three months ended March 31, 2018 increased by \$60.5 million at higher costs compared to the comparable period in 2017, decreasing net interest income by \$0.4 million. Increases in market interest rates negatively impacted net interest income by \$2.7 million, while changes in the mix of interest-bearing liabilities had a \$0.2 million positive impact.

The following table reconciles interest income in the Condensed Consolidated Statements of Income to net interest income adjusted to a fully taxable equivalent basis for the three months ended March 31:

2018 2017 (dollars in thousands) \$66,499\$56,179

Interest income per Condensed Consolidated Statements of Income

| Adjustment to fully taxable equivalent basis                              | 493      | 988       |
|---|----------|-----------|
| Interest income adjusted to fully taxable equivalent basis (non-GAAP)     | 66,992   | 57,167    |
| Interest expense  | 6,814    | 4,349     |
| Net interest income adjusted to fully taxable equivalent basis (non-GAAP) | \$60,178 | 3\$52,818 |

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

The following is an analysis of the average balance sheets and net interest income on a fully taxable equivalent basis for the three months ended March 31:

|  | 2018               |                     | 2017                |                    |                        |                     |

| Assets   |                    | \$ 60,178           | 3.69%               | )                  | \$ 52,818              | 3.50%               |

Income on interest-earning assets has been computed on a fully taxable equivalent basis using the 21% federal

<sup>(</sup>a) income tax statutory rate for the three months ended March 31, 2018 and the 35% federal income tax statutory rate for the three months ended March 31, 2017.

<sup>(</sup>b) Loan balances include held for sale and nonaccrual loans. Income on nonaccrual loans is accounted for on the cash basis.

<sup>(</sup>c)Loan income includes loan fees earned.

Average balances do not include reallocations from noninterest-bearing demand deposits and interest-bearing demand deposits into savings deposits, which were made for regulatory purposes.

# ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

The following table shows the effect of changes in volumes and rates on interest income and interest expense for the three months ended March 31, 2018 compared with March 31, 2017:

|                                      | Analysis of Year-to-Year Changes in Net |               |          |  |  |  |  |  |
|--------------------------------------|---|---------------|----------|--|--|--|--|--|
|                                      | Interest Income                         |               |          |  |  |  |  |  |
|                                      | Total                                   | Change Due To |          |  |  |  |  |  |

| Interest-bearing liabilities:        |   |               |          |  |  |  |  |  |
| Interest-bearing demand deposits     | 573                                     | 36            | 537      |  |  |  |  |  |
| Savings deposits                     | 727                                     | 86            | 641      |  |  |  |  |  |
| Time deposits                        | 429                                     | 92            | 337      |  |  |  |  |  |
| Short-term borrowings                | 546                                     | (485)         | 1,031    |  |  |  |  |  |
| Long-term debt                       | 190                                     | 68            | 122      |  |  |  |  |  |
| Total interest expense               | 2,465                                   | (203)         | 2,668    |  |  |  |  |  |
| Net interest income                  | \$7,360                                 | \$ 5,080      | \$ 2,280 |  |  |  |  |  |
|                                      |   |               |          |  |  |  |  |  |

<sup>(</sup>a) Changes in interest income or expense not arising solely as a result of volume or rate variances are allocated to rate variances.

### **Provision for Credit Losses**

The provision for credit losses is determined based on management's estimates of the appropriate level of the allowance for credit losses needed for probable losses inherent in the loan portfolio, after giving consideration to charge-offs and recoveries for the period. The provision for credit losses is an amount added to the allowance, against which credit losses are charged.

The table below provides a breakout of the provision for credit losses by loan category for the three months ended March 31:

|   | 2018     |        |       | 2017                 |      |   |
|---|----------|--------|-------|----------------------|------|---|
|   | Dollars  | Percei | ntage | e Dollars Percentage |      |   |
|   | (dollars | in tho | usand | ls)                  |      |   |
| Commercial, financial, agricultural and other | \$4,150  | 60     | %     | \$2,184              | - 68 | % |
| Real estate construction                      | (242     | )(3    | )     | (17                  | )(1  | ) |

<sup>(</sup>b) Changes in interest income have been computed on a fully taxable equivalent basis using the 21% federal income tax statutory rate.

The provision for credit losses for the three months ended March 31, 2018 increased in comparison to the three months ended March 31, 2017 by \$3.7 million. The level of provision expense in the first three months of 2018 is primarily a result of an increase in specific reserves for commercial, financial, agricultural and other loans of \$5.6 million related to a local commercial and industrial loan relationship. In addition, specific reserves on commercial real estate loans increased \$2.0 million primarily due to one loan secured by an office building. The specific reserves recognized for both of these categories were offset by the Company's periodic assessment of the allowance for loan loss methodology, the current lending environment, and associated risks for each portfolio. Net charge-offs in the loans to individuals were \$1.0 million for three months ended March 31, 2018, with \$0.5 million related to indirect auto loans and \$0.3 million to personal lines of credit. The majority of the provision expense related to residential real estate can be attributed to growth in the portfolio in comparison to December 31, 2017.

# ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

The majority of the 2017 provision expense is attributable to commercial, financial, agricultural and other loans as the result of \$3.4 million in charge-offs recognized on two commercial loan relationships. Of this total, \$1.9 million was recognized on a commercial loan that was transferred to held for sale and subsequently sold in the second quarter of 2017.

The allowance for credit losses was \$53.7 million, or 1.00%, of total loans outstanding and 1.08% of total originated loans outstanding at March 31, 2018, compared to \$48.3 million, or 0.89%, and 0.96%, respectively, at December 31, 2017 and \$48.7 million, or 0.99%, and 1.01%, respectively, at March 31, 2017. Nonperforming loans as a percentage of total loans increased to 1.06% at March 31, 2018 from 0.78% at December 31, 2017 and 1.01% as of March 31, 2017. The allowance to nonperforming loan ratio was 93.84%, 114.34% and 105.20% as of March 31, 2018, December 31, 2017 and March 31, 2017, respectively.

Below is an analysis of the consolidated allowance for credit losses for the three months ended March 31, 2018 and 2017 and the year-ended December 31, 2017:

|   | March 31, 2018 | March 31, 2017 | December 31, 2017 |

| Other income                               | 1,628                  | 1,706    | (78)         | (5     | )  |  |  |  |
| Subtotal                                   | 16,356                 | 14,994   | 1,362        | 9      |    |  |  |  |
| Net securities gains                       | 2,840                  | 652      | 2,188        | 336    |    |  |  |  |
| Gain on sale of mortgage loans             | 1,484                  | 977      | 507          | 52     |    |  |  |  |
| Gain on sale of other loans and assets     | 574                    | 307      | 267          | 87     |    |  |  |  |
| Derivatives mark to market                 | 789                    | 2        | 787          | 39,350 |    |  |  |  |
| Total noninterest income                   | \$22,043               | \$16,932 | \$5,111      | 30     | %  |  |  |  |

Noninterest income, excluding net securities gains, gain on sale of loans and other assets and the derivatives mark to market, increased \$1.4 million for the first three months of 2018 compared to 2017. Service charges on deposit accounts increased \$0.1 million, primarily due to deposit accounts acquired in the acquisition of DCB in April 2017. Card-related interchange income increased \$0.5 million during the first three months of 2018 compared to 2017, of which \$0.3 million is attributable to the DCB acquisition. Trust income increased \$0.5 million, of which \$0.3 million can be attributed to accounts obtained in the DCB acquisition. Swap fee income compared to 2017 increased \$0.4 million due to an increase in the number of interest rate swaps entered into for our commercial loan customers during the first three months of 2018 compared to the same period in the prior year. Insurance and retail brokerage commissions decreased by \$0.2 million as a result of \$0.4 million in producer commission expense which is netted against revenue in 2018 but was included as salary expense in 2017. This change is a result of Topic 606, the new revenue recognition standard which was adopted January 1, 2018.

Total noninterest income for the three months ended March 31, 2018 increased \$5.1 million in comparison to the three months ended March 31, 2017. The most significant change, other than the changes noted above, includes a \$2.2 million increase in net securities gains resulting from the redemption of one of our trust preferred securities and a \$0.8 million increase related to the mark to market adjustment on interest rate swaps entered into for our commercial loan customers. This adjustment does not reflect a realized gain on the swaps, but rather relates to a change in fair value due to movements in corporate bond spreads and swap rates. Gain on sale of mortgage loans increased \$0.5 million as a result of continued growth in our mortgage lending area.

Noninterest expense, excluding loss on sale or write-down of assets, litigation and operational losses and merger and acquisition related expenses, increased \$4.3 million, or 10%, for the three months ended March 31, 2018 compared to the same period in 2017. Contributing to the higher expenses in 2018 is a \$1.4 million increase in salaries and employee benefits as a result of 94 additional full-time equivalent employees at March 31, 2018 compared to March 31, 2017. The higher number of employees is primarily a result of the acquisition of DCB in April 2017. This acquisition also accounted for \$0.5 million of the \$0.6 million increase in net occupancy expense, \$0.2 million of the \$0.5 million increase in furniture and equipment expense and all of the \$0.2 million increase in intangible amortization. The most significant items contributing to the \$0.9 million increase in other operating expense include an increase of \$0.2 million in unfunded commitment reserve expense in 2018 as compared to 2017 and an increase of \$0.3 million in expense recognized in connection with the fair value of derivatives related to mortgage loans held for sale and the fair value of mortgage loans held for sale.

Total noninterest expense increased by \$4.1 million, or 10%, for the three months ended March 31, 2018 compared to the same period in 2017. Offsetting the total increase is a decrease of \$0.3 million in merger and acquisition expense. Income Tax

The provision for income taxes decreased \$2.2 million for the three months ended March 31, 2018, compared to the corresponding period in 2017. Despite a \$5.2 million increase in the level of income before taxes, the lower provision for income taxes was the result of the Tax Cuts and Jobs Act passed in December 2017, which decreased the statutory tax rate from 35% to 21%.

We applied the "annual effective tax rate approach" to determine the provision for income taxes, which applies an annual forecast of tax expense as a percentage of expected full year income, for the three months ended March 31, 2018 and 2017.

We generate an annual effective tax rate that is less than the statutory rate of 21% due to benefits resulting from tax-exempt interest, income from bank-owned life insurance and tax benefits associated with low income housing tax

credits, which are relatively consistent regardless of the level of pretax income. Additionally, the three months ended March 31, 2018, included a \$0.6 million adjustment to the deferred tax asset adjustment recorded in the fourth quarter of 2017 due to the reduction in the statutory tax rate. These provided for an annual effective tax rate of 18.9% and 30.2% for the three months ended March 31, 2018 and 2017, respectively.

As of March 31, 2018, our deferred tax assets totaled \$25.9 million. Based on our evaluation, we determined that it is more likely than not that all of these assets will be realized. As a result, a valuation allowance against these assets was not

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

recorded. In evaluating the need for a valuation allowance, we estimate future taxable income based on management approved forecasts, evaluation of historical earning levels and consideration of potential tax strategies. If future events differ from our current forecasts, we may need to establish a valuation allowance, which could have a material impact on our financial condition and results of operations.

#### Liquidity

Liquidity refers to our ability to meet the cash flow requirements of depositors and borrowers as well as our operating cash needs with cost-effective funding. We generate funds to meet these needs primarily through the core deposit base of First Commonwealth Bank and the maturity or repayment of loans and other interest-earning assets, including investments. During the first three months of 2018, liquidity used by the net decrease in short-term borrowings totaled \$119.5 million, while the sales, maturity and redemption of investment securities provided \$55.4 million. This liquidity provided funds to originate loans, purchase investment securities and fund depositor withdrawals. Additionally, on March 1, 2018, an auction call was successfully completed on PreTSL IX, a pooled trust preferred security on which other-than-temporary impairment charges were recognized in 2009 and 2010. Based on the outcome of the auction, it is expected that this security will be called at par in the second quarter of 2018. As of March 31, 2018, the security has a par value of \$3.0 million and a book value of \$2.5 million.

We also have available unused wholesale sources of liquidity, including overnight federal funds and repurchase agreements, advances from the FHLB of Pittsburgh, borrowings through the discount window at the Federal Reserve Bank of Cleveland ("FRB") and access to certificates of deposit through brokers.

We participate in the Certificate of Deposit Account Registry Services ("CDARS") program as part of an Asset/Liability Committee ("ALCO") strategy to increase and diversify funding sources. As of March 31, 2018, our maximum borrowing capacity under this program was \$1.1 billion and as of that date there was \$14.6 million outstanding with an average weighted rate of 0.98% and an average original term of 472 days. These deposits are part of a reciprocal program which allows our depositors to receive expanded FDIC coverage by placing multiple certificates of deposit at other CDARS member banks.

An additional source of liquidity is the FRB Borrower-in-Custody of Collateral program, which enables us to pledge certain loans that are not being used as collateral at the FHLB as collateral for borrowings at the FRB. At March 31, 2018, the borrowing capacity under this program totaled \$781.1 million and there were no amounts outstanding. As of March 31, 2018, our maximum borrowing capacity at the FHLB of Pittsburgh was \$1.5 billion and as of that date amounts used against this capacity included \$0.5 billion in outstanding borrowings and no outstanding letters of credit.

We also have available unused federal funds lines with five correspondent banks. These lines have an aggregate commitment of \$195.0 million with a \$6.0 million outstanding balance as of March 31, 2018. In addition, we have available unused repo lines with three correspondent banks. These lines have an aggregate commitment of \$509.4 million with no outstanding balance as of March 31, 2018.

First Commonwealth Financial Corporation has an unsecured \$15.0 million line of credit with another financial institution. As of March 31, 2018, there are no amounts outstanding on this line.

First Commonwealth's long-term liquidity source is its core deposit base. Core deposits are the most stable source of liquidity a bank can have due to the long-term relationship with a deposit customer. The level of deposits during any period is influenced by factors outside of management's control, such as the level of short-term and long-term market interest rates and yields offered on competing investments, such as money market mutual funds. The following table shows a breakdown of the components of First Commonwealth's deposits:

March 31, December 2018 31, 2017 (dollars in thousands)

Noninterest-bearing demand deposits \$1,443,747 \$1,416,771 Interest-bearing demand deposits 187,286 187,281

 Savings deposits
 3,428,967
 3,361,840

 Time deposits
 643,522
 614,813

 Total
 \$5,703,522
 \$5,580,705

During the first three months of 2018, total deposits increased \$122.8 million due to a \$67.1 million increase in interest-bearing demand and savings deposits, a \$27.0 million increase in noninterest-bearing demand deposits and a \$28.7 million increase in time deposits. The increase in time deposits is the result of an increase in core certificates of deposit of \$28.9 million offset by a decline in CDARs deposits of \$0.2 million.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

#### Market Risk

The following gap analysis compares the difference between the amount of interest-earning assets and interest-bearing liabilities subject to repricing over a period of time. The ratio of rate-sensitive assets to rate-sensitive liabilities repricing within a one-year period was 0.73 and 0.73 at March 31, 2018 and December 31, 2017, respectively. A ratio of less than one indicates a higher level of repricing liabilities over repricing assets over the next twelve months. The level of First Commonwealth's ratio is largely driven by the modeling of interest-bearing non-maturity deposits, which are included in the analysis as repricing within one year.

Gap analysis has limitations due to the static nature of the model that holds volumes and consumer behaviors constant in all economic and interest rate scenarios. A lower level of rate sensitive assets to rate sensitive liabilities repricing in one year could indicate reduced net interest income in a rising interest rate scenario, and conversely, increased net interest income in a declining interest rate scenario. However, the gap analysis incorporates only the level of interest-earning assets and interest-bearing liabilities and not the sensitivity each has to changes in interest rates. The impact of the sensitivity to changes in interest rates is provided in the table below the gap analysis.

The following is the gap analysis as of March 31, 2018 and December 31, 2017:

|  | March 31, 201    | 8              |                 |                       |                                   |                 |

% 4.66

%

)% 2.41

Net interest income change (12 months) for basis point movements of: -200 -100 +200 +100(dollars in thousands) March 31, 2018 (\$) \$(35,444) \$(13,464) \$10,940 \$20,896 March 31, 2018 (%) (14.08)% (5.35) )% 4.35 % 8.30 December 31, 2017 (\$) \$(33,734) \$(16,356) \$14,427 \$27,815 December 31, 2017 (%) (13.90 )% (6.74 )% 5.94 % 11.46

)% (2.55

The analysis and model used to quantify the sensitivity of our net interest income becomes less meaningful in a decreasing 200 basis point scenario given the current interest rate environment. Results of the 100 and 200 basis point interest rate decline scenario are affected by the fact that many of our interest-bearing liabilities are at rates below 1%,

with an assumed floor of zero in the model. In the three months ended March 31, 2018 and 2017, the cost of our interest-bearing liabilities averaged 0.56% and 0.38%, respectively, and the yield on our average interest-earning assets, on a fully taxable equivalent basis, averaged 4.11% and 3.78%, respectively.

In 2015 and 2014, the Company entered into cash flow interest rate swaps, in which we extended the duration of \$115.0 million of the \$1.3 billion LIBOR based loans in our loan portfolio at that time into fixed interest rates for a period of three or four years. Please refer to Note 11 "Derivatives," for additional information on interest rate swaps.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

Asset/liability models require that certain assumptions be made, such as prepayment rates on earning assets and the impact of pricing on non-maturity deposits, which may differ from actual experience. These business assumptions are based upon our experience, business plans and published industry experience. While management believes such assumptions to be reasonable, there can be no assurance that modeled results will approximate actual results. Credit Risk

First Commonwealth maintains an allowance for credit losses at a level deemed sufficient for losses inherent in the loan portfolio at the date of each statement of financial condition. Management reviews the adequacy of the allowance on a quarterly basis to ensure that the provision for credit losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is appropriate based on management's assessment of probable estimated losses.

First Commonwealth's methodology for assessing the appropriateness of the allowance for credit losses consists of several key elements. These elements include an assessment of individual impaired loans with a balance greater than \$0.1 million, loss experience trends and other relevant factors.

First Commonwealth also maintains a reserve for unfunded loan commitments and letters of credit based upon credit risk and probability of funding. The reserve totaled \$5.2 million at March 31, 2018 and is classified in "Other liabilities" on the Condensed Consolidated Statements of Financial Condition.

Nonperforming loans include nonaccrual loans and loans classified as troubled debt restructurings. Nonaccrual loans represent loans on which interest accruals have been discontinued. Troubled debt restructured loans are those loans whose terms have been renegotiated to provide a reduction or deferral of principal or interest as a result of the deteriorating financial position of the borrower, who could not obtain comparable terms from alternative financing sources. In the first three months of 2018, 18 loans totaling \$8.4 million were identified as troubled debt restructurings.

The balance of troubled debt restructured loans increased \$6.2 million from December 31, 2017 due to the addition of a \$3.8 million commercial, financial, agricultural and other relationship and a \$3.0 million commercial real estate relationship. Offsetting these additions is the payoff of a \$0.9 million commercial real estate relationship and a \$0.5 million commercial, financial, agricultural and other relationship. Please refer to Note 8, "Loans and Allowance for Credit Losses," for additional information on troubled debt restructurings.

We discontinue interest accruals on a loan when, based on current information and events, it is probable that we will be unable to fully collect principal or interest due according to the contractual terms of the loan. A loan is also placed on nonaccrual status when, based on regulatory definitions, the loan is maintained on a "cash basis" due to the weakened financial condition of the borrower. Generally, loans 90 days or more past due are placed on nonaccrual status, except for consumer loans which are placed on nonaccrual status at 150 days past due.

Nonperforming loans are closely monitored on an ongoing basis as part of our loan review and work-out process. The probable risk of loss on these loans is evaluated by comparing the loan balance to the fair value of any underlying collateral or the present value of projected future cash flows. Losses or a specifically assigned allowance for loan losses are recognized where appropriate.

Nonperforming loans, including loans held for sale, increased \$15.0 million to \$57.3 million at March 31, 2018 compared to \$42.2 million at December 31, 2017. During the first quarter of 2018, \$15.6 million of loans were moved to nonaccrual. Included in this total are \$2.5 million commercial real estate relationship with a property management company and an \$11.8 million local commercial, financial, agricultural and other relationship, of which \$7.0 million is classified as doubtful. Offsetting these additions is the aforementioned payoff of \$0.5 million of troubled debt restructured loans classified as nonaccrual.

The allowance for credit losses as a percentage of nonperforming loans was 93.84% as of March 31, 2018 compared to 114.34% at December 31, 2017 and 105.20% at March 31, 2017. The amount of specific reserves included in the allowance for nonperforming loans was determined by using fair values obtained from current appraisals and updated

discounted cash flow analyses. The allowance for credit losses includes specific reserves of \$11.5 million and general reserves of \$42.3 million as of March 31, 2018. Specific reserves increased \$7.7 million from December 31, 2017, and \$8.5 million from March 31, 2017 primarily due to the addition of the two nonaccrual relationships noted above. Management believes that the allowance for credit losses is at a level deemed sufficient to absorb losses inherent in the loan portfolio at March 31, 2018.

Criticized loans totaled \$126.4 million at March 31, 2018 and represented 2.3% of the loan portfolio. The level of criticized loans increased as of March 31, 2018 when compared to December 31, 2017, by \$2.0 million, or 1.6%. Classified loans totaled \$78.2 million at March 31, 2018 compared to \$73.0 million at December 31, 2017, an increase of \$5.1 million, or 7.0%. This

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

increase is primarily the result of the downgrade of two relationships totaling \$17.6 million offset by the payoff of four relationships totaling \$11.3 million. Delinquency on accruing loans for the same period decreased \$0.6 million, or 4.4%, the majority of which are commercial, financial, agricultural and other loans and residential real estate loans. The allowance for credit losses was \$53.7 million at March 31, 2018 or 1.00% of total loans outstanding, compared to 0.89% reported at December 31, 2017 and 0.99% at March 31, 2017. General reserves, or the portion of the allowance related to loans that were not specifically evaluated for impairment, as a percentage of non-impaired loans were 0.79% at March 31, 2018 compared to 0.83% at December 31, 2017 and 0.94% at March 31, 2017. General reserves as a percentage of non-impaired originated loans were 0.86% at March 31, 2018 compared to 0.90% at December 31, 2017 and 0.96% at March 31, 2017.

<sup>(</sup>a) For the three-month period ended.

The following tables show the outstanding balances of our loan portfolio and the breakdown of net charge-offs and nonperforming loans, excluding loans held for sale, by loan type as of and for the periods presented:

|   | March 31, 2     | 2018   | December 3 2017 | 1, |   |
|---|-----------------|--------|-----------------|----|---|
|   | Amount          | %      | Amount          | %  |   |
|   | (dollars in the | housan | ds)             |    |   |
| Commercial, financial, agricultural and other | \$1,131,594     | 21 %   | \$1,163,383     | 22 | % |
| Real estate construction                      | 246,961         | 4      | 248,868         | 5  |   |

<sup>(</sup>b) For the twelve-month period ended.

<sup>(</sup>c) Does not include loans held for sale.

<sup>(</sup>d)Does not include nonperforming loans held for sale.

| Residential real estate                       | 1,434,623   | 27   | 1,426,370   | 26   |
|---|-------------|------|-------------|------|
| Commercial real estate                        | 2,027,072   | 38   | 2,019,096   | 37   |
| Loans to individuals                          | 541,055     | 10   | 549,659     | 10   |
| Total loans and leases net of unearned income | \$5,381,305 | 100% | \$5,407,376 | 100% |

During the three months ended March 31, 2018, loans decreased \$26.1 million, or 0.5%, compared to balances outstanding at December 31, 2017. Growth in the residential and commercial real estate loans were offset by decreases in commercial, financial, agricultural and other categories as new volumes were offset by several large payoffs and loans to individuals which declined primarily due to runoff in our indirect auto portfolio.

# ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

Net charge-offs for the three months ended March 31, 2018 totaled \$1.5 million, compared to \$4.7 million for the three months ended March 31, 2017. The most significant charge-offs during the three months ended March 31, 2018 included \$1.0 million in net charge-offs related to loans to individuals, primarily indirect auto loans and personal credit lines. During the three months ended March 31, 2017, the most significant charge-offs included a \$1.9 million partial charge-off on a loan to a custom display manufacturer and a \$1.5 million partial charge-off related to a containment tank manufacturer.

| Loans to individuals                          | 971                                       |                | 66.10                      |      | 0.07          |                      | 356                    | 0.62                                      |           | 0.01                            |   |
| Total loans, net of unearned income           | \$1,469                                   | )              | 100.00                     | %    | 0.11          | %                    | \$57,257               | 100.00                                    | %         | 1.06                            | % |

As the above table illustrates, commercial, financial, agricultural and other, residential real estate and commercial real estate loans represented a significant portion of the nonperforming loans as of March 31, 2018. See discussions related to the provision for credit losses and loans for more information.

#### Capital Resources

At March 31, 2018, shareholders' equity was \$899.3 million, an increase of \$11.2 million from December 31, 2017. The increase was primarily the result \$23.3 million in net income and \$2.3 million in treasury stock sales. These increases were partially offset by \$7.8 million of dividends paid to shareholders, a decrease of \$5.5 million in the fair value of available for sale investments and \$1.1 million of common stock repurchases. Cash dividends declared per common share were \$0.08 and \$0.08 for the three months ended March 31, 2018 and 2017, respectively. First Commonwealth and First Commonwealth Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on First Commonwealth's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, First Commonwealth and First Commonwealth Bank must meet specific capital guidelines that involve quantitative measures of First Commonwealth's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. First Commonwealth's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weighting and other factors. First Commonwealth maintains capital to absorb unexpected losses. In order to provide assurance that our capital levels are adequate for our risk exposure, we test our capital position under several stress scenarios on an annual basis. This analysis is reviewed by our Board of Director's. Our most recent capital stress test was completed in September 2017.

Effective January 1, 2015, the Company became subject to the new regulatory risk-based capital rules adopted by the federal banking agencies implementing Basel III. The most significant changes include higher minimum capital requirements, as the minimum Tier I capital ratio increased from 4.0% to 6.0% and a new common equity Tier I capital ratio was established with a minimum level of 4.5%. Additionally, the new rules improve the quality of capital

by providing stricter eligibility criteria for regulatory capital instruments and provide for a phase-in, beginning January 1, 2016, of a capital conservation buffer of 2.5% of risk-weighted assets. This buffer provides a requirement to hold common equity Tier 1 capital above the minimum risk-based capital requirements, resulting in an effective common equity Tier I risk-weighted asset minimum ratio of 7% on a fully phased-in basis.

The Basel III Rules also permit banking organizations with less than \$15.0 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which currently does not affect regulatory capital. The Company elected to retain this treatment, which reduces the volatility of regulatory capital levels.

# ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

As of March 31, 2018, First Commonwealth and First Commonwealth Bank met all capital adequacy requirements to which they are subject and was considered well-capitalized under the regulatory rules, all on a fully phased-in basis. To be considered well capitalized, the Company must maintain minimum Total risk-based capital, Tier I risk-based capital, Tier I leverage ratio and Common equity tier I risk-based capital as set forth in the table below:

|   | Actual            |          | Minimum<br>Required<br>III Phase-<br>Schedule | - Basel | Minimum Capital<br>Required - Basel<br>III Fully<br>Phased-In |        | Required<br>Considere<br>Capitalize | ed Well |

On April 24, 2018, First Commonwealth Financial Corporation declared a quarterly dividend of \$0.09 per share payable on May 18, 2018 to shareholders of record as of May 4, 2018. This dividend represents a 12.5% increase over the previous quarterly dividend of \$0.08. The timing and amount of future dividends are at the discretion of First Commonwealth's Board of Directors based upon, among other factors, capital levels, asset quality, liquidity and current and projected earnings.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

Information appearing in Item 2 of this report under the caption "Market Risk" is incorporated by reference in response to this item.

ITEM 4. Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 (the "Exchange Act"). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that the information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms of the Securities and Exchange Commission.

In addition, our management, including our Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal controls over financial reporting to determine whether any changes occurred during the current fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting. No such changes were identified in connection with this evaluation.
