Effective October 31, 1998, the Company adopted the provisions of Statement of Financial Accounting Standards No. 128, Earnings per Share, which requires the presentation of "basic" and "diluted" earnings (loss) per common share, as further explained in Note 1 of the notes to the audited financial statements of the Company, included in Form 10-KSB for the fiscal year ended October 31, 2000.

Basic earnings per share is computed by dividing net earnings by the weighted average number of common stock outstanding during the period.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains forward-looking statements. These statements relate to future events or the Company's future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "except," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither the Company, nor any other person, assumes responsibility for the accuracy and completeness of the forward-looking statements. The Company is under no obligation to update any of the forward-looking statements after the filing of this Quarterly Report on Form 10-QSB to conform such statements to actual results or to changes in its expectations.

The following discussion should be read in conjunction with the Company's financial statements and the related notes and other financial information appearing elsewhere in this Form 10-QSB. Readers are also urged to carefully review and consider the various disclosures made by the Company which attempt to advise interested parties of the factors which affect the Company's business, including without limitation the disclosures made under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the caption "Risk Factors," and the audited financial statements and related notes included in the Company's Annual Report filed on Form 10-KSB for the year ended October 31, 2000 and other reports and filings made with the Securities and Exchange Commission.

Liquidity and Capital Resources

Management believes that cash generated from operations will be sufficient to fund the anticipated growth of the Company in fiscal 2001. Management believes that any financing requirements can be met through a combination of cash and investments held as of January 31, 2001, internally generated cash flow and advance payments from customers. The Company does not currently have any commercial banking arrangements providing for loans, credit facilities or similar matters.

The Company does not believe it will need material additional capital equipment in fiscal 2001. In the past, the Company has financed some of its fixed asset requirements through capital leases. No additional capital equipment purchases have been currently identified that would require significant additional leasing or capital obligations during fiscal 2001. Management also believes that based on the Company's financial condition at January 31, 2001, the absence of outstanding bank debt and recent operating results, the Company would be able to obtain bank loans to finance its expansion, if necessary, although there can be no assurance any bank loan would be obtainable, or if obtained, would be on favorable terms or conditions.

Three Months 2001 vs. Three Months 2000

Net sales increased 33%, or \$588,075, to \$2,348,601 from \$1,760,526 in the first three months of fiscal 2001. RF Connectors sales increased 27% to \$2,053,276, compared to \$1,614,266 for the same period last year, due to continuing strong order rates for coax connectors and cable assemblies. Sales at RF Neulink increased 68% to \$245,254 compared to \$146,260 last year. This increase can be attributed to stronger sales in new application areas. Bioconnect's first quarter sales were \$50,071. Cost of sales increased 44%, or \$374,909 to \$1,220,164 from \$845,255 last year. The increase is due to the increased sales.

Engineering expenses increased \$50,248, or 77%, from \$65,481 last year. This increase can be attributed to added personnel and expenses associated with the expansion of our engineering departments to meet the increased business demands.

Selling and general expenses increased 28% or \$142,829, to \$651,555 from \$508,726 last year. The increase is due to increased travel, advertising, and insurance expenses. As a percent of sales, selling and administrative expenses declined to 28% from 29% due to the increase in sales.

Net interest income increased \$949 to \$31,508 from \$30,559 the previous year. Commissions for the Neulink divisions sales were \$18,073. This is the first time we have earned any income from commissions.

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

October 31, 2000 balance of \$1,313,935. This decrease is due to the continued collection efforts.

Inventories increased \$889,663 compared to October 31, 2000 inventory levels. This increase is in response to the current demand and the anticipated backlog requirements, and includes \$37,500 in Bioconnect inventory.

Other current assets, including prepaid expenses and deposits, increased \$21,469, to \$196,248, from \$174,779 on October 31, 2000. This increase is due the annual invoice for accounting expenses that is expensed throughout the year, but is invoiced in the first quarter as a prepaid expense. There are also the added Bioconnect deposits for their building and equipment.
