## SECTION 7 - REGULATION FD

### Item 7.01 Regulation FD Disclosure

On October 16, 2014, Moray Dewhurst, Vice Chairman and Chief Financial Officer, and Executive Vice President - Finance of NextEra Energy, Inc. (NEE) and Chief Financial Officer of NextEra Energy Partners GP, Inc., plans to discuss at Platts 16th Annual Financing U.S. Power Conference in New York, New York, among other topics, NextEra Energy Partners, LP's (NEP) expected increase in the short-term growth rate of quarterly distributions of 40-50% per year by the end of 2015 or possibly earlier, while still expecting to maintain an average annual growth rate of 12-15% thereafter through 2020.

This expected acceleration of growth in NEP's quarterly unit distributions implies earlier recognition of the expected value stream represented by the incentive distribution rights (IDRs) than NEE had previously considered. Should NEP's growth profile accelerate as described above, NEE expects that the 50% split of distributions to unitholders and payments to NEE of IDRs would be reached by the end of 2015 and possibly earlier. While the cash flows from the IDRs, when they start, will likely be small, the expected rapid growth implies that by the end of the decade they could be approximately \$200 million per year.

NEP's growth is expected to be achievable through NEP's acquisition of assets from the right of first offer (ROFO) portfolio and through the acquisition of other assets from NextEra Energy Resources, LLC, assuming current market conditions. These expectations should be viewed in conjunction with NextEra Energy's cautionary statements and risk factors set forth below.
