ASTEC INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X promulgated under the Securities Act of 1933. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three month period ended March 31, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008. It is suggested that these condensed financial statements be read in conjunction with the financial statements and the notes thereto included in the Astec Industries, Inc. and subsidiaries Annual Report on Form 10-K for the year ended December 31, 2007.

The condensed consolidated balance sheet at December 31, 2007 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standard ("SFAS") No. 157, "Fair Value Measurements" (SFAS No. 157), which provides guidance on how to measure assets and liabilities that use fair value. SFAS No. 157 applies whenever another US GAAP standard requires (or permits) assets or liabilities to be measured at fair value but does not expand the use of fair value to any new circumstances. This standard also requires additional disclosures in both annual and quarterly reports. Portions of SFAS No. 157 were effective for financial statements issued for fiscal years beginning after November 15, 2007, and the Company began applying those provisions effective January 1, 2008. The adoption of this statement did not have a significant impact on the Company's financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133." The objective of this statement is to require enhanced disclosures about an entity's derivative and hedging activities and to improve the transparency of financial reporting. This statement changes the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Statement No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. This statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The Company will adopt the standard as of January 1, 2009. The adoption of SFAS No. 161 is not expected to have a material impact on the Company's financial position or results of operations.

Note 2. Earnings per Share

Basic and diluted earnings per share are calculated in accordance with SFAS No. 128 and SFAS No. 123(R). Basic earnings per share exclude any dilutive effects of stock options and restricted stock units.

The following table sets forth the computation of basic and diluted earnings per share:

	Three Months Ended March 31,	
	2008	2007
Numerator:		
Net income	\$ 17,519,000	\$ 15,344,000
Denominator:		
Denominator for basic earnings per share	22,237,100	21,644,097
Effect of dilutive securities:		
Employee stock option & incentive plans	227,712	442,674
Supplemental Executive Retirement Plan	85,724	107,965
Denominator for diluted earnings per share	22,550,536	22,194,736
Net income per share:		
Basic	\$ 0.79	\$ 0.71
Diluted	\$ 0.78	\$ 0.69

A total of approximately 1,840 and 300 options were antidilutive for the three months ended March 31, 2008 and 2007, respectively and were therefore not included in the diluted earnings per share computation.

Note 3. Receivables

Receivables are net of allowance for doubtful accounts of \$1,534,000 and \$1,713,000 as of March 31, 2008 and December 31, 2007, respectively.

Note 4. Inventories

Inventories are stated at the lower of first-in, first-out cost or market and consist of the following:

	(in thousands)	
	March 31, 2008	December 31, 2007
Raw materials and parts	\$ 103,033	\$ 96,719
Work-in-process	55,975	54,128
Finished goods	51,500	51,027
Used equipment	8,520	8,945
Total	\$ 219,028	\$ 210,819

The above inventory amounts are net of reserves totaling \$14,139,000 and \$13,714,000 as of March 31, 2008 and December 31, 2007, respectively.

Note 5. Property and Equipment

Property and equipment is stated at cost, less accumulated depreciation of \$126,130,000 and \$122,689,000 as of March 31, 2008 and December 31, 2007, respectively.

Note 6. Fair Value of Investments

The Company's investments consist of the following (amounts in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value (Net Carrying Amount)
March 31, 2008:				
Available-for-sale equity securities	\$ 10,305	\$ --	\$ 988	\$ 9,317
Trading equity securities	2,585	66	94	2,557
Trading debt securities	7,935	63	78	7,920
	\$ 20,825	\$ 129	\$ 1,160	\$ 19,794
December 31, 2007:				
Available-for-sale equity securities	\$ 10,305	\$ --	\$ 1,483	\$ 8,822
Trading equity securities	3,011	103	167	2,947
Trading debt securities	6,861	49	1	6,909
	\$ 20,177	\$ 152	\$ 1,651	\$ 18,678

Management reviews several factors to determine whether a loss is other than temporary, such as the length of time a security is in an unrealized loss position, the extent to which fair value is less than amortized cost, the financial condition and near term prospects of the issuer and the Company's intent and ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. Management determined that the gross unrealized loss on available-for-sale equity securities is considered temporary and, therefore, it has been recorded in other comprehensive income in the periods in which it arose.

Available-for-sale equity securities are comprised of actively traded marketable equity securities with quoted prices on national markets.

Trading equity securities are mainly marketable equity mutual funds that comprise a portion of the Company's liability under its Supplemental Executive Retirement Plan ("SERP"), an unqualified defined contribution plan.

Trading debt securities are comprised mainly of marketable debt securities held by Astec Insurance Company. At March 31, 2008 and December 31, 2007, respectively, \$445,000 and \$149,000 of trading debt securities were due to mature within twelve months and, accordingly, are included in other current assets.

SFAS No. 157 requires that investments be categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, defined by SFAS No. 157 and directly related to the amount of subjectivity associated with the inputs to fair valuation of these investments, are as follows:

Level 1 – Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 – Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 – Inputs reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

The table below categorizes the Company's investments based upon the lowest level of significant input to the valuation (amounts in thousands).

	Investments at March 31, 2008			
	Level 1	Level 2	Level 3	Total
Available-for-sale securities	\$ 9,317	\$ -	\$ -	\$ 9,317
Trading equity securities	2,557	-	-	2,557
Trading debt securities	-	7,920	-	7,920
Total	\$ 11,874	\$ 7,920	\$ -	\$ 19,794

Note 7. Goodwill

At March 31, 2008 and December 31, 2007, the Company had goodwill in the amount of \$26,093,000 and \$26,416,000, respectively.

The changes in the carrying amount of goodwill by operating segment for the period ended March 31, 2008 are as follows (in thousands):

	Asphalt Group	Aggregate and Mining Group	Mobile Asphalt Paving Group	Underground Group	Other	Total
Balance December 31, 2007	\$ 1,157	\$ 17,799	\$ 1,646	\$ -	\$ 5,814	\$ 26,416
Foreign currency translation	-	(323)	-	-	-	(323)
Balance March 31, 2008	\$ 1,157	\$ 17,476	\$ 1,646	\$ -	\$ 5,814	\$ 26,093

Note 8. Debt

During April 2007, the Company entered into an unsecured credit agreement with Wachovia Bank, National Association (Wachovia) whereby Wachovia has extended to the Company an unsecured line of credit loan of up to \$100,000,000 including a sub-limit for letters of credit of up to \$15,000,000. The Wachovia credit agreement replaced the previously \$87,500,000 secured credit facility the Company had in place with General Electric Capital Corporation and General Electric Capital-Canada.

The Wachovia credit facility is unsecured and has an original term of three years (which is subject to further extensions as provided therein). The interest rate for borrowings is a function of the Adjusted LIBOR Rate or Adjusted LIBOR Market Index Rate, as elected by the Company, plus a margin based upon a leverage ratio pricing grid ranging between 0.5% and 1.5%. As of March 31, 2008, if any loans would have been outstanding, the applicable margin based upon the leverage ratio pricing grid would equal 0.5%. The Wachovia credit facility requires no principal amortization and interest only payments are due, in the case of loans bearing interest at the Adjusted LIBOR Market Index Rate, monthly in arrears and, in the case of loans bearing at the Adjusted LIBOR Rate, at the end of the applicable interest period therefore. The Wachovia credit agreement contains certain financial covenants related to minimum fixed charge coverage ratios, minimum tangible net worth and maximum allowed capital expenditures. At March 31, 2008, the Company had borrowing availability of \$92,694,000, net of letters of credits of \$7,306,000, on its revolver. No amounts were outstanding under the credit facility at March 31, 2008.

The Company was in compliance with the financial covenants under its credit facility as of March 31, 2008.

The Company's South African subsidiary, Osborn Engineered Products SA (Pty) Ltd., (Osborn) has available a credit facility of approximately \$4,456,000 (ZAR 33,000,000) to finance short-term working capital needs, as well as to cover the short-term establishment of letter of credit performance guarantees. As of March 31, 2008, Osborn had no outstanding borrowings under the credit facility, but approximately \$3,421,000 in performance and retention bonds were guaranteed under the facility. The facility is secured by Osborn's account receivables, retention and cash balances and a \$2,000,000 letter of credit issued by the parent Company. The portion of the available facility not secured by the \$2,000,000 letter of credit fluctuates monthly based upon fifty percent (50%) of Osborn's accounts receivable, retention plus total cash balances at the end of the prior month. As of March 31, 2008, Osborn Engineered Products had available credit under the facility of approximately \$1,035,000.

Note 9. Product Warranty Reserves

Changes in the Company's product warranty liability for the three month periods ended March 31, 2008 and 2007 are as follows:

	(in thousands)			
	Three Months Ended March 31,			
	2008		2007	
Reserve balance at the beginning of the period	\$	7,827	\$	7,184
Warranty liabilities accrued during the period		4,447		3,280
Warranty liabilities settled during the period		(3,413)		(2,552)
Reserve balance at the end of the period	\$	8,861	\$	7,912

The Company warrants its products against manufacturing defects and performance to specified standards. The warranty period and performance standards vary by market and uses of its products. The Company estimates the costs that may be incurred under its warranties and records a liability at the time product sales are recorded. The product warranty liability is primarily based on historical claim rates, nature of claims and the associated cost.

Note 10. Accrued Loss Reserves

The Company accrues reserves for losses related to workers' compensation and general liability claims that have been incurred but not yet paid or are estimated to have been incurred but not yet reported to the Company. The reserves are estimated based on the Company's evaluation of the type and severity of individual claims and historical information, primarily its own claims experience, along with assumptions about future events. Changes in assumptions, as well as changes in actual experience, could cause these estimates to change in the future.

Note 11. Pension and Post-retirement Benefits

The Company expects to contribute approximately \$800,000 to its pension plan and \$200,000 to its post-retirement benefit plan during 2008. Approximately \$148,000 of the contribution was paid to the pension plan and approximately \$168,000 was paid for post-retirement benefits during the three months ended March 31, 2008.

The components of net periodic pension cost and post-retirement benefit cost for the three months ended March 31, 2008 and 2007 are as follows:

	(in thousands)			
	Pension Benefit		Post-Retirement Benefits	
	2008	2007	2008	2007
Service cost	\$ -	\$ -	\$ 12	\$ 14
Interest cost	141	140	13	12
Expected return on assets	(160)	(160)	-	-
Amortization of prior service cost	-	-	12	7
Amortization of net (gain) loss	23	20	4	(19)
Net periodic benefit cost	\$ 4	\$ -	\$ 41	\$ 14

Note 12. Uncertainty in Income Taxes

Regarding FASB Interpretation 48 (FIN 48), "Accounting for Uncertainty in Income Taxes: An Interpretation of FASB Statement 109, Accounting for Income Taxes", the Company's liability recorded for unrecognized tax benefits as of March 31, 2008 has not changed significantly in amount or composition since December 31, 2007.

Note 13. Segment Information

The Company has four reportable operating segments, which include the Asphalt Group, the Aggregate and Mining Group, the Mobile Asphalt Paving Group and the Underground Group. The business units in the Asphalt Group design, manufacture and market a complete line of asphalt plants and related components, heating and heat transfer processing equipment and storage tanks for the asphalt paving and other non-related industries. The business units in the Aggregate and Mining Group design, manufacture and market equipment for the aggregate, metallic mining and recycling industries. The business units in the Mobile Asphalt Paving Group design, manufacture and market asphalt pavers, material transfer vehicles, milling machines and screeds. The business units in the Underground Group design, manufacture and market a complete line of trenching equipment and directional drills for the underground construction market. The Company also has one other category that contains the business units that do not meet the requirements for separate disclosure as an operating segment. The business units in the Other category include Peterson Pacific Corp. (Peterson), Astec Insurance Company and the parent company, Astec Industries, Inc. Peterson designs, manufactures and markets whole-tree pulpwood chippers, horizontal grinders and blower trucks.

	(in thousands)					
	Three Months Ended					
	March 31, 2008					
	Asphalt Group	Aggregate and Mining Group	Mobile Asphalt Paving Group	Underground Group	All Others	Total
Net sales from external customers	\$ 71,585	\$ 91,090	\$ 47,131	\$ 32,643	\$ 20,623	\$ 263,072

Reconciliation of the reportable segment totals for profit to the Company's consolidated totals is as follows:

(in thousands)
Three Months Ended March 31,
2008 2007

Edgar Filing: ASTEC INDUSTRIES INC - Form 10-Q

Total profit for reportable segments	\$	17,752	\$	15,209
Minority interest in earnings		(57)		(34)
Recapture (elimination) of intersegment profit		(176)		159
Consolidated net income	\$	17,519	\$	15,334

Note 14. Contingent Matters

Certain customers have financed purchases of the Company's products through arrangements in which the Company is contingently liable for customer debt of approximately \$568,000 and for residual value guarantees aggregating approximately \$147,000 at March 31, 2008 and contingently liable for customer debt of approximately \$629,000 and for residual value guarantees aggregating approximately \$147,000 at December 31, 2007. At March 31, 2008, the maximum potential amount of future payments under these guarantees for which the Company would be liable is equal to \$715,000. The Company does not believe it will be called on to fulfill any of these contingencies, and therefore the carrying amounts on the consolidated balance sheets of the Company for these contingent liabilities are zero.

In addition, the Company is contingently liable under letters of credit totaling approximately \$7,306,000, including a \$2,000,000 letter of credit issued on behalf of the Company's South African subsidiary, Osborn Engineered Products SA (Pty) (Osborn). The outstanding letters of credit expire at various dates through July 2009. Osborn is contingently liable for a total of \$3,421,000 in performance and retention bonds, of which \$1,211,000 are secured by the \$2,000,000 letter of credit issued by the Company. As of March 31, 2008, the maximum potential amount of future payments under these letters of credit and bonds for which the Company could be liable is approximately \$9,516,000.

The Company is engaged in certain pending litigation involving claims or other matters arising in the ordinary course of business. Most of these claims involve product liability or other tort claims for property damage or personal injury against which the Company is insured. As a part of its litigation management program, the Company maintains general liability insurance coverage for product liability and other similar tort claims in amounts the Company believes are adequate. The coverage is subject to a substantial self-insured retention under the terms of which the Company has the right to coordinate and control the management of its claims and the defense of these actions.

The Company is currently a party to various claims and legal proceedings that have arisen in the ordinary course of business. If management believes that a loss arising from such claims and legal proceedings is probable and can reasonably be estimated, the Company records the amount of the loss (excluding estimated legal fees), or the minimum estimated liability when the loss is estimated using a range, and no point within the range is more probable than another. As management becomes aware of additional information concerning such contingencies, any potential liability related to these matters is assessed and the estimates are revised, if necessary. If management believes that a loss arising from such claims and legal proceedings is either (i) probable but cannot be reasonably estimated or (ii) reasonably possible but not probable, the Company does not record the amount of the loss, but does make specific disclosure of such matter, if material. Based upon currently available information and with the advice of counsel, management believes that the ultimate outcome of its current claims and legal proceedings, individually and in the aggregate, will not have a material adverse effect on the Company's financial position, cash flows or results of operations. However, claims and legal proceedings are subject to inherent uncertainties and rulings unfavorable to the Company could occur. If an unfavorable ruling were to occur, there exists the possibility of a material adverse effect on the Company's financial position, cash flows or results of operations.

Note 15. Stock-based Compensation

Under terms of the Company's stock option plans, officers and certain other employees may be granted options to purchase the Company's common stock at no less than 100% of the market price on the date the option is granted. The Company has reserved shares of common stock for exercise of outstanding non-qualified options and incentive options of officers and employees of the Company and its subsidiaries at prices determined by the Board of Directors. In addition, a Non-employee Directors Stock Incentive Plan has been established to allow non-employee directors to have a personal financial stake in the Company through an ownership interest. Directors may elect to receive their compensation in cash, common stock, deferred stock or stock options. For 2008, all the directors elected to receive their compensation in either common stock or deferred stock. Total compensation expense for these

director related shares equaled \$42,000 for the three months ended March 31, 2008. Options granted under the Non-employee Directors Stock Incentive Plan and the Executive Officer Annual Bonus Equity Election Plan vest and become fully exercisable immediately. Generally, other options granted vest over 12 months. All stock options have a ten-year term. All granted options were vested prior to December 31, 2006, therefore no stock option expense was recorded in the three months ended March 31, 2008 and 2007 and there were no unrecognized compensation costs related to stock options previously granted as of those dates.

In August 2006, the Compensation Committee of the Board of Directors implemented a five-year plan to award key members of management restricted stock units each year. The details of the plan were formulated under the 2006 Incentive Plan approved by the Company's shareholders in their annual meeting held in April, 2006. The plan allows up to 700,000 shares to be granted to employees. Units granted each year will be determined based upon the performance of individual subsidiaries and consolidated annual financial performance. Each award will vest at the end of five years from the date of grant, or at the time a recipient reaches age 65, if earlier. On March 8, 2007, management was granted 64,950 restricted stock units, net of forfeitures of 6,150 units for performance during 2006. An additional 74,800 units were granted on February 28, 2008 for performance in 2007. It is anticipated that an additional 77,800 units will be granted in February 2009 for performance in 2008. Expenses previously recorded for units forfeited are reversed in the period of forfeiture. Based upon the grant date fair values of \$38.76 and \$38.52 for the units still outstanding from the March 8, 2007 and February 28, 2008 grants, respectively and the March 31, 2008 fair value of \$38.76 for the 77,800 units expected to be granted in February 2009, compensation costs, after reduction for expected forfeitures of \$5,669,000 will be recognized in future periods through 2014. The fair value of the units expected to be issued in February 2009 will be adjusted quarterly to the period end market value of the Company's stock until the units are actually granted. Compensation expense of \$506,000 and \$560,000 has been recorded in the three month periods ended March 31, 2008 and 2007, respectively, to reflect the fair value of the total shares amortized over the portion of the vesting period occurring during the periods.

Note 16. Seasonality

Based upon historical results of the past several years and expected results for this year, 25% to 27% of the Company's business volume typically occurs during the first three months of the year. During the usual seasonal trend, the first three quarters of the year are the Company's stronger quarters for business volume, with the fourth quarter normally being the weakest quarter.

Note 17. Comprehensive Income

Total comprehensive income for the three month periods ended March 31, 2008 and 2007 was \$15,524,000 and \$15,180,000, respectively. The components of comprehensive income for the periods indicated are set forth below:

(in thousands)			
Three Months Ended March 31,			
	2008		2007
Net income	\$ 17,519	\$	15,334
Change in unrecognized pension and post retirement benefit costs	14		8
Unrealized gain on available for sale securities, net of income tax	310		-
Foreign currency translation adjustments	(2,319)		(162)
Total comprehensive income	\$ 15,524	\$	15,180

Note 18. Other Income, net of expense

For the three months ended March 31, 2008 and 2007, the Company had other income, net of expenses, totaling \$426,000 and \$685,000, respectively. Major items comprising the net totals for the periods are as follows:

(in thousands)			
Three Months Ended March 31,			
	2008		2007
Interest income	\$ 358	\$	644

Edgar Filing: ASTEC INDUSTRIES INC - Form 10-Q

(Gain) on foreign currency transactions		(69)		(74)
Other		137		115
Total	\$	426	\$	685

Note 19. Business Combination

On July 31, 2007 the Company acquired all of the outstanding capital stock of Peterson, Inc., an Oregon company (Peterson) for approximately \$21,105,000 including cash acquired of approximately \$1,702,000, plus transaction costs of approximately \$252,000. One million dollars of the purchase price is being held in escrow pending the resolution of certain contingent matters. In addition to the purchase price paid to the sellers, the Company also paid off approximately \$7,500,000 of outstanding Peterson debt coincident with the purchase. The effective date of the purchase was July 1, 2007 and the results of Peterson's operations have been included in the consolidated financial statements since that date. The transaction resulted in the recognition of approximately \$5,814,000 of goodwill. The purchase price allocation is preliminary and will be finalized upon the earlier of June 30, 2008 or distribution of the escrow.

Peterson is a manufacturer of whole-tree pulpwood chippers, horizontal grinders and blower trucks. Founded in 1961 as Wilbur Peterson & Sons, a heavy construction company, Peterson expanded into manufacturing in 1982 to develop equipment to suit their land clearing and construction needs. Peterson will continue to operate from its Eugene, Oregon headquarters under the name Peterson Pacific Corp.

Conditional earn-out payments of up to \$3,000,000 may be due to the sellers based upon actual 2008 and 2009 results of operations. The Company and Peterson's former majority owner and his wife have also entered into a separate agreement for the Company to purchase the real estate and improvements used by Peterson for \$7,000,000 at a later date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Statements contained anywhere in this Quarterly Report on Form 10-Q that are not limited to historical information are considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are sometimes identified by the words, "will," "would," "should," "could," "believes," "anticipates," "intends," and "expects" and expressions. Such forward-looking statements include, without limitation, statements regarding the Company's expected sales and results of operations during 2008, the Company's expected effective tax rates for 2008, the Company's expected capital expenditures in 2008, the expected benefit and impact of financing arrangements, the ability of the Company to meet its working capital and capital expenditure requirements through March 31, 2009, the impact of the enactment of Safe, Accountable, Flexible and Efficient Transportation Equity Act - A Legacy for Users (SAFETEA-LU), the need for road improvements, the impact of other public sector spending and funding mechanisms, the Company's backlog levels, changes in the economic environment as it affects the Company, the timing and impact of changes in the economy, the market confidence of customers and dealers, the Company's general liability insurance coverage for product liability and other similar tort claims, the Company being called upon to fulfill certain contingencies, the expected contributions by the Company to its pension plan, its post-retirement plan and other benefits, the expected dates of granting of restricted stock units, changes in interest rates and the impact of such changes on the financial results of the Company, changes in the prices of steel and oil, the change in the level of the Company's presence in international markets, the seasonality of the Company's business, the outcome of audits by taxing authorities, the amount or value of unrecognized tax benefits, the Company's discussion of its critical accounting policies and the ultimate outcome of the Company's current claims and legal proceedings.

These forward-looking statements are based largely on management's expectations which are subject to a number of known and unknown risks, uncertainties and other factors discussed in this Report and in other documents filed by the Company with the Securities and Exchange Commission, which may cause actual results, financial or otherwise, to be

materially different from those anticipated, expressed or implied by the forward-looking statements. All forward-looking statements included in this document are based on information available to the Company on the date hereof, and the Company assumes no obligation to update any such forward-looking statements to reflect future events or circumstances.

In addition to the risks and uncertainties identified herein under the caption “Item 1A. Risk Factors” in Part II of this Report, elsewhere herein and in other documents filed by the Company with the Securities and Exchange Commission, most recently in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2007, the risk factors described in the section under the caption “Risk Factors” should be carefully considered when evaluating the Company's business and future prospects.

Overview

The Company is a leading manufacturer and marketer of construction equipment. The Company's businesses:

- § design, engineer, manufacture and market equipment that is used in each phase of road building, from quarrying and crushing the aggregate to applying asphalt to the road surface;
- § manufacture certain equipment and components unrelated to road construction, including trenching, auger boring, directional drilling, industrial heat transfer, wood chipping and grinding; and
- § manufacture and sell replacement parts for equipment in each of its product lines.

The Company has 14 manufacturing companies, 13 of which fall within four reportable operating segments, which include the Asphalt Group, the Aggregate and Mining Group, the Mobile Asphalt Paving Group and the Underground Group. The business units in the Asphalt Group design, manufacture and market a complete line of asphalt plants and related components, heating and heat transfer processing equipment and storage tanks for the asphalt paving and other unrelated industries. The business units in the Aggregate and Mining Group design, manufacture and market equipment for the aggregate, metallic mining and recycling industries. The business units in the Mobile Asphalt Paving Group design, manufacture and market asphalt pavers, material transfer vehicles, milling machines, stabilizers and screeds. The business units in the Underground Group design, manufacture and market a complete line of trenching equipment, directional drills and auger boring machines for the underground construction market. The Company also has one other category that contains the business units that do not meet the requirements for separate disclosure as an operating segment. The business units in the Other category include Peterson Pacific Corp. (Peterson), Astec Insurance Company and Astec Industries, Inc., the parent company. Peterson designs, manufactures and markets whole-tree pulp wood chippers, horizontal grinders and blower trucks.

The Company's financial performance is affected by a number of factors, including the cyclical nature and varying conditions of the markets it serves. Demand in these markets fluctuates in response to overall economic conditions and is particularly sensitive to the amount of public sector spending on infrastructure development, privately funded infrastructure development, changes in the price of crude oil (fuel costs and liquid asphalt) and changes in the price of steel.

In August 2005, President Bush signed SAFETEA-LU into law, which authorizes appropriation of \$286.5 billion in guaranteed federal funding for road, highway and bridge construction, repair and improvement of the federal highway and transit projects for federal fiscal years October 1, 2004 through September 30, 2009. The Company believes that the federal highway funding significantly influences the purchasing decisions of many of the Company's customers who are more comfortable making purchasing decisions with the legislation in place. The Federal funding provides for approximately 25% of highway, street, roadway and parking construction funding in the United States. President Bush signed into law on December 26, 2007, a funding bill for the 2008 fiscal year, which fully funds the highway program at \$40.2 billion for the 2008 fiscal year.

The public sector spending described above is needed to fund road, bridge and mass transit improvements. The Company believes that increased funding is unquestionably needed to restore the nation's highways to a quality level required for safety, fuel efficiency and mitigation of congestion. In the Company's opinion, amounts needed for such improvements are significantly above amounts approved, and funding mechanisms such as the federal usage fee per gallon of gasoline, which has not been increased in fourteen years, would need to be increased along with other measures to generate the funds needed.

In addition to public sector funding, the economies in the markets the Company serves, the price of oil and its impact on customers' purchase decisions and the price of steel may each affect the Company's financial performance. Economic downturns, like the one experienced from 2001 through 2003, generally result in decreased purchasing by

the Company's customers, which, in turn, causes reductions in sales and increased pricing pressure on the Company's products. When interest rates rise, they typically have the effect of negatively impacting customers' attitudes toward purchasing equipment. Although the Federal Reserve has recently made significant reductions to interest rates, primarily in response to weakness in the housing sector, the Company expects only slight changes in interest rates in the remainder of 2008 and does not expect such changes to have a material impact on the financial results of the Company.

Significant portions of the Company's revenues relate to the sale of equipment that produces asphalt mix. A major component of asphalt is oil. An increase in the price of oil increases the cost of providing asphalt, which could likely decrease demand for asphalt, and therefore decrease demand for certain Company products. While increasing oil prices may have an impact on the Company's customers, the Company's equipment can use a significant amount of recycled asphalt pavement, thereby mitigating the cost of asphalt for the customer. The Company continues to develop products and initiatives to reduce the amount of oil and related products required to produce asphalt mix. Oil price volatility makes it difficult to predict the costs of oil-based products used in road construction such as liquid asphalt and gasoline. The Company's customers appear to be adapting their prices in response to the fluctuating oil prices, and the fluctuations do not appear to be significantly impairing their equipment purchases at this time.

Steel is a major component in the Company's equipment. Steel prices retracted somewhat during 2005 and 2006 from record highs during 2004 but returned to historically high levels during 2007. Steel prices have increased significantly during the first quarter of 2008. In response to rapidly increasing steel prices the Company has negotiated with suppliers to lock in steel pricing at current levels where possible. The Company has also increased sales prices to offset steel costs and is contemplating additional price increases and other methods to mitigate the rapid rise in steel prices. Although the Company has instituted price increases in response to the rising costs of steel and components, the Company may not be able to raise the prices of its products enough to cover the increased costs which will negatively impact the Company's financial results. The Company will also take advantage of additional buying opportunities to offset such future pricing where possible.

In addition to the factors stated above, many of the Company's markets are highly competitive, and its products compete worldwide with a number of other manufacturers and distributors that produce and sell similar products. The reduced value of the dollar relative to many foreign currencies and the current positive economic conditions in certain foreign economies continue to have a positive impact on the Company's international sales.

Results of Operations

For the three months ended March 31, 2008, net sales increased \$47,509,000 or 22.0%, to \$263,072,000 from \$215,563,000 for the three months ended March 31, 2007. Peterson accounted for \$20,623,000 of the sales increase, resulting in an increase, net of Peterson, of \$26,886,000 or 12.5% for the first quarter of 2008 as compared to the first quarter of 2007. Sales are generated primarily from new equipment purchases made by customers for use in construction for privately funded infrastructure development and public sector spending on infrastructure development. The overall growth in sales for the three months ended March 31, 2008 compared to the three months ended March 31, 2007 is reflective of a weak dollar resulting in stronger international sales, market acceptance of new products, improving market share and increasing sales of recycling equipment. For the quarter ended March 31, 2008 compared to the quarter ended March 31, 2007, (1) net sales for the Asphalt Group increased approximately \$6,575,000 or 10.1%; (2) net sales for the Aggregate and Mining Group increased approximately \$8,747,000 or 10.6%; (3) net sales for the Underground Group increased approximately \$8,383,000 or 34.6%; and (4) net sales for the Mobile Asphalt Paving Group increased approximately \$3,181,000 or 7.2%. Parts sales for the quarter ended March 31, 2008 were \$52,590,000 compared to \$42,991,000 for the quarter ended March 31, 2007, for an increase of \$9,599,000 or 22.3%. Peterson accounted for \$3,913,000 of the increase in parts sales, resulting in a change in parts sales, net of Peterson, of \$5,686,000 or 13.2% for the first quarter of 2008 compared to the same quarter in 2007.

For the quarter ended March 31, 2008 compared to the same quarter in 2007, domestic sales increased 2.5% from \$166,430,000 to \$170,586,000. Excluding Peterson, domestic sales were \$156,253,000 for a decrease of 6.1% compared to the prior year. Domestic sales increased in the Underground segment while domestic sales decreased in the Aggregate and Mining, Asphalt and the Mobile Asphalt Paving segments. Domestic sales accounted for 64.8% and international sales accounted for 35.2% of the first quarter sales of 2008 compared to 77.2% for domestic sales and 22.8% for international sales for the first quarter of 2007.

International sales for the quarter ended March 31, 2008 compared to the same period of 2007 increased \$43,353,000, or 88.2% from \$49,133,000 to \$92,486,000. Excluding Peterson, international sales increased \$37,063,000, or 75.4% for the first quarter of 2008 compared to the same period in 2007. International sales increased for the first quarter of 2008 compared to the same period in 2007, in Canada, Asia, South America, Central America and Australia. There were only nominal changes in all other geographic markets. The Company believes the overall increased level of international sales relates to strong economic conditions in certain foreign markets, continued weakness of the U.S. dollar compared to most foreign currencies and increased sales efforts by the Company in foreign markets. For the quarter ended March 31, 2008 compared to the same period of 2007, international sales increased in all segments.

Gross profit for the three months ended March 31, 2008 increased \$11,847,000 or 21.8%, to \$66,220,000 from \$54,373,000 for the three months ended March 31, 2007. Peterson accounted for \$3,747,000 of the gross profit increase in the first quarter of 2008 compared to the first quarter of 2007. Excluding Peterson, gross profit increased \$8,100,000, or 14.9%, for the first quarter of 2008 compared to the same period in 2007. Gross profit as a percentage of sales remained flat for the three months ended March 31, 2008 and 2007 at 25.2% for both periods. For the quarter ended March 31, 2008 compared to the same period in 2007, gross profit for the Asphalt Group increased from \$17,927,000 to \$19,606,000 or an increase of \$1,679,000 or 9.4%. This resulted in a decrease in gross profit as a percentage of sales from 27.6% to 27.4%, or 20 basis points. For the quarter ended March 31, 2008 compared to the same period in 2007, gross profit for the Aggregate and Mining Group increased from \$20,879,000 to \$23,157,000 or an increase of \$2,278,000 or 10.9%. Gross profit as a percentage of sales remained flat at 25.4% for both periods. For the quarter ended March 31, 2008 compared to the same period in 2007, gross profit for the Mobile Asphalt Paving Group increased from \$10,182,000 to \$12,592,000 or an increase of \$2,410,000 or 23.7%. Gross profit, as a percentage of sales increased from 23.2% to 26.7%, or 350 basis points. The primary reasons for the increase in the Mobile Asphalt Paving Group gross margin are increased efficiencies in the manufacturing plant due to the implementation of lean concepts along with pricing increases. For the quarter ended March 31, 2008 compared to the same period in 2007, gross profit for the Underground Group increased from \$5,395,000 to \$7,103,000 or an increase of \$1,708,000 or 31.7%. Gross profit as a percentage of sales for the Underground Group decreased from 22.2% to 21.8% or 40 basis points.

Selling, general, administrative and engineering expenses for the quarter ended March 31, 2008 were \$38,779,000, or 14.7% of net sales, compared to \$30,529,000, or 14.2% of net sales for the quarter ended March 31, 2007, an increase of \$8,250,000 or 27.2%. The following discussion is presented net of the increase in selling, general, administrative and engineering expenses of \$2,484,000 due to the operations of Peterson. The increase in selling, general, administrative and engineering expenses for the three months ended March 31, 2008 compared to the same period of 2007 was primarily related to the ConExpo show in March 2008. ConExpo costs for the first quarter of 2008 were \$3,205,000 higher than the same quarter in 2007. The ConExpo, show which is held once every three years, was held in March 2008. Personnel and related expenses increased approximately \$893,000 due to increased staffing in order to support increased sales volume while health insurance costs increased \$904,000. Sales commissions also increased approximately \$460,000 due to increased sales volume.

On January 1, 2006, the Company began accounting for share based payments under the provisions of Statement of Financial Accounting Standards No. 123R, "Share Based Payment" (SFAS 123R). SFAS 123R requires the share based compensation expense to be recognized over the period during which an employee is required to provide service in exchange for the award (the vesting period). All granted options were vested prior to December 31, 2006, therefore no stock option expense was recorded in the three months ended March 31, 2008 and 2007 and there were no unrecognized compensation costs related to stock options previously granted as of those dates.

In August 2006, the Compensation Committee of the Board of Directors implemented a five-year plan to award key members of management restricted stock units each year. The details of the plan were formulated under the 2006 Incentive Plan approved by the Company's shareholders in their annual meeting held in April, 2006. The plan allows up to 700,000 shares to be granted to employees. Units granted each year will be determined based upon the performance of individual subsidiaries and consolidated annual financial performance. Each award will vest at the end of five years from the date of grant, or at the time a recipient reaches age 65, if earlier. On March 8, 2007 management was granted 64,950 restricted stock units, net of forfeitures of 6,150 units for performance during 2006. An additional 74,800 units were granted on February 28, 2008 for performance in 2007. It is anticipated that an additional 77,800 units will be granted in February 2009 for performance in 2008. Expenses previously recorded for units forfeited are reversed in the period of forfeiture. Based upon the grant date fair values of \$38.76 and \$38.52 for the units still outstanding from the March 8, 2007 and February 28, 2008 grants, respectively, and the March 31, 2008 fair value of \$38.76 for the 77,800 units expected to be granted in February 2009, \$5,669,000 of compensation costs will be recognized in future periods through 2014. The fair value of the units expected to be issued in February 2009 will be adjusted quarterly to the period-end market value of the Company's stock until the units are actually granted. Compensation expense of \$506,000 and \$560,000 has been recorded in the three month periods ended March 31, 2008 and 2007, respectively, to reflect the fair value of the total shares amortized over the portion of the vesting period occurring during the periods.

For the quarter ended March 31, 2008 compared to the quarter ended March 31, 2007, interest expense decreased \$284,000, or 68.4%, to \$131,000 from \$415,000. Interest expense as a percentage of net sales was 0.05% and 0.19% for the quarters ended March 31, 2008 and 2007, respectively. Interest expense for the three months ended March 31, 2008 related primarily to the payment of interest on letters of credit issued by the Company. The reduction in interest expense was due to significant reductions in collection day charges, unused line of credit fees and amortization of prepaid loan costs under the Company's new financing arrangement with Wachovia, as compared to these costs under the Company's previous financing agreement.

Other income, net was \$426,000 for the quarter ended March 31, 2008 compared to other income, net of \$685,000 for the quarter ended March 31, 2007, for a decrease of \$259,000. Other income, net for the quarters ended March 31, 2008 consisted primarily of interest income earned on the Company's cash balances. The decrease in interest income is a result of a decrease in cash invested in interest bearing investments combined with lower interest rates.

For the three months ended March 31, 2008, the Company recorded income tax expense of \$10,160,000, compared to income tax expense of \$8,746,000 for the three months ended March 31, 2007. This resulted in effective tax rates for the quarters ended March 31, 2008 and 2007 of 36.6% and 36.3%, respectively.

For the three months ended March 31, 2008, the Company had net income of \$17,519,000 compared to net income of \$15,334,000 for the three months ended March 31, 2007 for an increase of \$2,185,000, or 14.2%. Earnings per diluted share for the three months ended March 31, 2008 were \$0.78 compared to earnings per diluted share for the quarter ended March 31, 2007 of \$0.69 for an increase of \$0.09, or 13.0%. Diluted shares outstanding for the three months ended March 31, 2008 and 2007 were 22,550,536 and 22,194,736, respectively. The increase in shares outstanding is primarily due to the exercise of stock options by employees of the Company.

The backlog of orders at March 31, 2008 was \$263,011,000 compared to \$266,226,000, including the backlog of Peterson, at March 31, 2007, for a decrease of \$3,215,000, or 1.2%. The decrease in the backlog of orders at March 31, 2008 compared to March 31, 2007 related to a decrease in domestic backlog totaling approximately \$1,978,000 and a decrease in international backlog of approximately \$1,237,000. The decrease in domestic backlog at March 31, 2008 was due primarily to decreases of \$9,969,000 in the Aggregate and Mining Group and \$4,183,000 in the Mobile Asphalt Paving Group. These decreases were offset by increases in the domestic backlogs of the Asphalt Group of

\$9,728,000 and the Other Group of \$2,953,000. The decrease in international backlog at March 31, 2008 related primarily to a \$10,999,000 decrease in the Aggregate and Mining Group along with a decrease in the Asphalt Group of \$1,578,000. These decreases were offset by increases in the international backlogs of the Underground Group of \$5,703,000, the Other Group of \$4,577,000 and the Mobile Asphalt Paving Group of \$1,060,000. Although the backlog decreased slightly compared to the same quarter in the prior year, the March 31, 2007 backlog reflected an 80% increase over the March 31, 2006 backlog. This large growth in the prior year backlog combined with strong first quarter of 2008 revenues contributed to the decline in the March 31, 2008 backlog as compared to March 31, 2007 backlog. The Company is unable to determine whether the continued strength of the backlog was experienced by the industry as a whole.

Liquidity and Capital Resources

During April 2007, the Company entered into an unsecured credit agreement with Wachovia Bank, National Association (Wachovia) whereby Wachovia has extended to the Company an unsecured line of credit loan of up to \$100,000,000 including a sub-limit for letters of credit of up to \$15,000,000. The Wachovia credit agreement replaced the previous \$87,500,000 secured credit facility the Company had in place with General Electric Capital Corporation and General Electric Capital-Canada.

The Wachovia credit facility is unsecured and has an original term of three years (which is subject to further extensions as provided therein). The interest rate for borrowings is a function of the Adjusted LIBOR Rate or Adjusted LIBOR Market Index Rate, as defined, as elected by the Company, plus a margin based upon a leverage ratio pricing grid ranging between 0.5% and 1.5%. As of March 31, 2008, if any loans would have been outstanding, the applicable margin based upon the leverage ratio pricing grid would equal 0.5%. The Wachovia credit facility requires no principal amortization and interest only payments are due, in the case of loans bearing interest at the Adjusted LIBOR Market Index Rate, monthly in arrears and, in the case of loans bearing at the Adjusted LIBOR Rate, at the end of the applicable interest period. The Wachovia credit agreement contains certain financial covenants related to minimum fixed charge coverage ratios, minimum tangible net worth and maximum allowed capital expenditures. At March 31, 2008, the Company had borrowing availability of \$92,694,000, net of letters of credits of \$7,306,000 on its revolver. No amounts were outstanding under the credit facility at March 31, 2008.

The Company was in compliance with the financial covenants under its credit facility as of March 31, 2008.

The Company's South African subsidiary, Osborn Engineered Products SA (Pty) Ltd., (Osborn) has available a credit facility of approximately \$4,456,000 (ZAR 33,000,000) to finance short-term working capital needs, as well as to cover the short-term establishment of letter of credit performance guarantees. As of March 31, 2008, Osborn had no outstanding borrowings under the credit facility, but approximately \$3,421,000 in performance and retention bonds were guaranteed under the facility. The facility is secured by Osborn's account receivables, retention and cash balances and a \$2,000,000 letter of credit issued by the parent Company. The portion of the available facility not secured by the \$2,000,000 letter of credit fluctuates monthly based upon fifty percent (50%) of Osborn's accounts receivable, retention plus total cash balances at the end of the prior month. As of March 31, 2008, Osborn Engineered Products had available credit under the facility of approximately \$1,035,000.

Net cash provided by operating activities for the three months ended March 31, 2008 was \$622,000 compared to net cash provided by operating activities of \$14,826,000 for the three months ended March 31, 2007. The primary differences in cash provided by operating activities are increases in trade and other receivables of \$8,059,000 over the prior year increase and inventory of \$1,370,000 over the prior year increase. Customer deposits at March 31, 2008 increased \$7,402,000 less than the same quarter in 2007 also detracting from operating cash flows. Providing operating cash in 2008 was an increase in the provision for warranty reserves which is \$1,167,000 in excess of the prior year's provision.

Net cash used by investing activities for the three months ended March 31, 2008 was \$6,090,000 compared to net cash used by investing activities of \$7,442,000, for the three months ended March 31, 2007. The decrease in net cash used by investing activities for the three months ended March 31, 2008 compared to the same period of 2007 relates primarily to a reduction of \$1,460,000 in expenditures for property and equipment.

Net cash provided by financing activities for the three months ended March 31, 2008 was \$1,288,000 compared to net cash provided by financing activities of \$4,940,000 for the three months ended March 31, 2007. The decrease in net cash provided by financing activities for the three months ended March 31, 2008, compared to the same period of 2007, relates primarily to a \$2,577,000 reduction in the proceeds from the exercise of stock options by Company

employees in 2008 as compared with 2007, combined with a pro rata reduction in the tax benefit of those option exercises.

The Company believes that its current working capital, cash flows generated from future operations and available capacity remaining under its credit facility will be sufficient to meet the Company's working capital and capital expenditure requirements through March 31, 2009.

Capital expenditures for 2008 are forecasted to total approximately \$43,000,000, which includes amounts added to the Company's forecast in early 2008 for additional plant buildings and equipment to provide increased production capacity. The Company expects to finance these expenditures using currently available cash balances and internally generated funds.

Off-balance Sheet Arrangements

As of March 31, 2008, the Company does not have any off-balance sheet arrangements as defined by Item 303(a)(4) of Regulation S-K.

Contingencies

During the three months ended March 31, 2008, there were no substantial changes in our commitments or contractual liabilities including the effects of the adoption of FIN 48. We are unable to make reasonably reliable estimates of the period of potential cash settlements, if any, with taxing authorities.

The Company is engaged in certain pending litigation involving claims or other matters arising in the ordinary course of business. Most of these claims involve product liability or other tort claims for property damage or personal injury against which the Company is insured. As a part of its litigation management program, the Company maintains general liability insurance coverage for product liability and other similar tort claims in amounts the Company believes are adequate. The coverage is subject to a substantial self-insured retention under the terms of which the Company has the right to coordinate and control the management of its claims and the defense of these actions.

As mentioned above, the Company is currently a party to various claims and legal proceedings that have arisen in the ordinary course of business. If management believes that a loss arising from such claims and legal proceedings is probable and can reasonably be estimated, the Company records the amount of the loss (excluding estimated legal fees), or the minimum estimated liability when the loss is estimated using a range, and no point within the range is more probable than another. As management becomes aware of additional information concerning such contingencies, any potential liability related to these matters is assessed and the estimates are revised, if necessary. If management believes that a loss arising from such claims and legal proceedings is either (i) probable but cannot be reasonably estimated or (ii) reasonably possible but not probable, the Company does not record the amount of the loss but does make specific disclosure of such matter, if material. Based upon currently available information and with the advice of counsel, management believes that the ultimate outcome of its current claims and legal proceedings, individually and in the aggregate, will not have a material adverse effect on the Company's financial position, cash flows or results of operations. However, claims and legal proceedings are subject to inherent uncertainties and rulings unfavorable to the Company could occur. If an unfavorable ruling were to occur, there exists the possibility of a material adverse effect on the Company's financial position, cash flows or results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We have no material changes to the disclosure on this matter made in our Annual Report on Form 10-K for the year ended December 31, 2007.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective in timely making known to them material information relating to the Company and the Company's subsidiaries required to be disclosed in the Company's reports filed or submitted under the Exchange Act.

Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities exchange Act of 1934, as amended) that occurred during the quarter ended March 31, 2008 that have materially affected or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

There have been no material developments in the legal proceedings previously reported by the registrant since the filing of its Annual Report on Form 10-K for the year ended December 31, 2007. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Contingencies" in Part I - Item 2 of this Report.

Item 1A. Risk Factors

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2007, which could materially affect our business, financial condition or future results. There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2007. The risks described in our Annual Report on Form 10-K for the year ended December 31, 2007 are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or operating results.

Item 6. Exhibits

Exhibit No.	Description
31.1	Certification of the Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of the Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32*	Certification of Chief Executive Officer and Chief Financial Officer of Astec Industries, Inc. pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

The Exhibits are numbered in accordance with Item 601 of Regulation S-K. Inapplicable Exhibits are not included in the list.

* In accordance with Release No. 34-47551, this exhibit is hereby furnished to the SEC as an accompanying document and is not to be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference into any filing under the Securities Act of 1933, as amended.

Items 2, 3, 4 and 5 are not applicable and have been omitted.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
