Other Terms

Prior to February 18, 2024 (one month prior to their maturity date) (the "Par Call Date"), the Notes will be redeemable as a whole at any time or in part from time to time, at our option, at a redemption price equal to the greater of:

- (i) 100% of the principal amount of the Notes being redeemed, or
- (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (not including any portion of such payments of interest accrued as of the redemption date), discounted to the redemption date on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 20 basis points, plus, in either case, any interest accrued but not paid to the date of redemption.

On or after the Par Call Date, the Notes will be redeemable as a whole at any time or in part from time to time, at our option, at a redemption price equal to 100% of the principal amount of the Notes being redeemed plus any interest accrued but not paid to the date of redemption.

“Treasury Rate” means, with respect to any redemption date for the Notes,

(i) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated “H. 15” or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded United States Treasury securities adjusted to constant maturity under the caption “Treasury Constant Maturities,” for the maturity corresponding to the Comparable Treasury Issue (if no maturity is within three months before or after the Par Call Date for the Notes, yields for the two published maturities most closely corresponding to the Comparable Treasury Issue will be determined and the Treasury Rate shall be interpolated or extrapolated from those yields on a straight line basis, rounding to the nearest month), or

(ii) if the release referred to in (i) (or any successor release) is not published during the week preceding the calculation date or does not contain the yields referred to above, the rate per year equal to the semiannual equivalent yield to maturity of the Comparable Treasury Issue, calculated using a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for that redemption date. The Treasury Rate will be calculated on the third Business Day preceding the redemption date.

“Comparable Treasury Issue” means the United States Treasury security selected by an “Independent Investment Banker” as having a maturity comparable to the remaining term of the Notes to be redeemed (assuming, for this purpose, that the Notes matured on the Par Call Date) that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of the Notes (assuming, for this purpose, that the Notes matured on the Par Call Date).

“Independent Investment Banker” means, with respect to any redemption date for the Notes, one of the Reference Treasury Dealers appointed by us.

“Comparable Treasury Price” means with respect to any redemption date for the Notes,

(i) the average of the Reference Treasury Dealer Quotations for the redemption date, after excluding the highest and lowest of those Reference Treasury Dealer Quotations, or

(ii) if the Trustee is given fewer than five Reference Treasury Dealer Quotations, the average of all quotations obtained.

PS-2

“Reference Treasury Dealer” means, with respect to any redemption date for the Notes, (i) each of Morgan Stanley & Co. LLC and Wells Fargo Securities, LLC and their respective successors, provided, however that if any such firm or such successor, as the case may be, ceases to be a primary U.S. Government securities dealer in the United States (a “Primary Treasury Dealer”), we shall substitute therefor another Primary Treasury Dealer and (ii) one other Primary Treasury Dealer selected by Lloyds Securities Inc., or its successor after consultation with us, (iii) one other Primary Treasury Dealer selected by MUFG Securities Americas Inc., or its successor after consultation with us, and (iv) one other Primary Treasury Dealer selected by U.S. Bancorp Investments, Inc., or its successor after consultation with us.

“Reference Treasury Dealer Quotations” means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Trustee, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Trustee by that Reference Treasury Dealer, at 5:00 p.m. on the third Business Day preceding the redemption date.

Notice of any redemption will be mailed at least 30 days but no more than 60 days before the redemption date to each holder of Notes to be redeemed.

Unless we default in payment of the redemption price, on and after the redemption date, interest will cease to accrue on the Notes or portions of the Notes called for redemption.

Repayment at Option of Holder: If we experience a Change of Control Triggering Event, we will be required to offer to purchase the Notes from holders as described in the accompanying prospectus supplement under “Offer to Redeem Upon Change of Control Triggering Event.”

Terms of Notes - Master Global Book-Entry Notes

The Notes will be represented by a global security. Generally, all securities represented by the same global security will have the same terms. Issuers may, however, issue a global security that represents multiple securities of the same kind, such as debt securities, that have different terms and are issued at different times. We call this global security a master global security. We have elected to issue a master global security that represents each series of our Medium-Term Notes and will represent the Notes offered hereby.

The Underwriters have advised the Company that they propose initially to offer part of the Notes directly to the public at the public offering price set forth on the cover page of this Pricing Supplement.

The Underwriters and certain of their affiliates may engage in transactions with and perform investment banking and commercial lending services for the Company and certain of its affiliates from time to time in the ordinary course of business, for which they receive customary fees and expenses.

In addition, in the ordinary course of their business activities, the agents and their affiliates may make or hold a broad array of investments, including acting as counterparties to certain derivative and hedging arrangements, and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. Certain of the agents or their affiliates that have a lending relationship with us routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, such agents and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Notes offered hereunder. Any such credit default swaps or short positions could adversely affect future trading prices of the Notes offered hereunder. The agents and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.
