### Operating Results

#### Lines and local traffic

At December 31, 2011, TELMEX supported 14.814 million lines, a decrease of 5.0% compared with the same period of the previous year. The lines included:

- Telmex Social: 1.496 million lines concentrated in rural communities and prepaid lines, with a reduction of 465,000 prepaid lines in the last 12 months.
- Also, 689,000 public telephony lines, which have decreased in the last 12 months by 63,000.

During the fourth quarter, local calls decreased 8.9% compared with the same period of 2010, totaling 4.258 billion. The decline reflected the lower number of billed lines due to the growth in cellular telephony services and competition from other operators, as well as customers' changing consumption profiles.

#### Long distance

In the fourth quarter, domestic long distance (DLD) traffic decreased 2.1% compared with the same quarter of 2010, totaling 4.350 billion minutes, mainly due to, among other factors, the decrease in termination traffic with other cellular telephony operators and less traffic because of the decrease of billed lines.

In the quarter, outgoing international long distance (ILD) traffic increased 3.3% compared with the fourth quarter of 2010, totaling 381 million minutes. Among other factors contributing to this increase was higher termination traffic from cellular operators. Incoming international long distance traffic rose 29.3% compared with the fourth quarter of 2010, totaling 2.604 billion minutes. The incoming-outgoing ratio was 6.8 times.

#### Interconnection

In the fourth quarter, interconnection traffic totaled 10.816 billion minutes, 2.5% higher than the same quarter of 2010, due to the 9.8% increase in interconnection traffic with long distance and cellular operators, partially offset by the 3.7% decrease in traffic related to calling party pays services.

#### Internet access

**infinitum**'s growth has been supported by the sale of 3.2 million computers since 1999. This growth has been affected by some of the main broadband barriers, the lack of PC penetration in Mexican homes and low income per capita in a considerable part of the population.

- **Cost of sales and services:** In the fourth quarter, cost of sales and services increased 27.5% compared with the same period of 2010, totaling 10.879 billion pesos, due to higher costs related to projects for corporate customers, in particular the security project and information technologies, and to higher maintenance and operating expenses for our telecommunications services.

- **Depreciation and amortization:** In the quarter, depreciation and amortization decreased 4.0% compared with the fourth quarter of 2010, to 4.226 billion pesos, as a result of lower amounts of investments in recent years.

**Financing cost:** In the fourth quarter, financing cost produced a charge of 1.066 billion pesos. This was a result of: i) a net interest charge of 928 million pesos, 11.5% higher than the same quarter of last year, related to recognition of the market value of interest rate swaps, partially offset by debt reduction, and ii) a net exchange loss of 138 million pesos because of the fourth-quarter exchange rate depreciation of 0.557 pesos per dollar and the 2.101 billion dollars in dollar-peso hedges in effect at December 31, 2011.

**Net income:** In the fourth quarter, net income attributable to controlling interest was 4.085 billion pesos, 21.3% higher than the same period of the previous year.
