APRIA HEALTHCARE GROUP INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE A - CERTAIN SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

Basis of Presentation: The accompanying unaudited condensed consolidated financial statements include the accounts of Apria Healthcare Group Inc. ("Apria" or "the company") and its subsidiaries. Intercompany transactions and accounts have been eliminated.

In the opinion of management, all adjustments, consisting of normal recurring accruals necessary for a fair presentation of the results of operations for the interim periods presented, have been reflected herein. The unaudited results of operations for interim periods are not necessarily indicative of the results to be expected for the entire year. For further information, refer to the consolidated financial statements and footnotes thereto for the year ended December 31, 2002, included in the company's 2002 Form 10-K.

Certain amounts from prior periods have been reclassified to conform to the current period presentation.

Use of Accounting Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Revenue Recognition and Concentration of Credit Risk: Net revenues are recognized on the date services and related products are provided to patients and are recorded at amounts expected to be received under reimbursement arrangements with third-party payors, including private insurers, prepaid health plans, Medicare and Medicaid. Approximately 34% of the company's revenues are reimbursed under arrangements with Medicare and Medicaid. No other third-party payor group represents 10% or more of the company's revenues. The majority of the company's revenues are derived from fees charged for patient care under fee-for-service arrangements. Revenues derived from capitation arrangements represent less than 10% of total net revenues.

Due to the nature of the industry and the reimbursement environment in which Apria operates, certain estimates are required to record net revenues and accounts receivable at their net realizable values. Inherent in these estimates is the risk that they will have to be revised or updated as additional information becomes available. Specifically, the complexity of many third-party billing arrangements and the uncertainty of reimbursement amounts for certain services from certain payors may result in adjustments to amounts originally recorded. Such adjustments are typically identified and recorded at the point of cash application, claim denial or account review.

Management performs periodic analyses to evaluate accounts receivable balances to ensure that recorded amounts reflect estimated net realizable value. Specifically, management considers historical realization data, accounts receivable aging trends, other operating trends and relevant business conditions. Management also performs focused reviews of certain large and/or problematic payors. Due to continuing changes in the healthcare industry and with third-party reimbursement, it is possible that management's estimates may change in the near term, which could have an impact on operations and cash flows.

Accounts receivable are reduced by an allowance for doubtful accounts which provides for those accounts from which payment is not expected to be received, although services were provided and revenue was earned.

Recent Accounting Pronouncements: Effective January 1, 2003, Apria adopted Statement of Financial Accounting Standards ("SFAS") No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 updates and clarifies existing accounting

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

pronouncements related to gains and losses from the extinguishment of debt and requires that certain lease modifications be accounted for in the same manner as sale-leaseback transactions. Adoption of this statement did not have a material effect on Apria's consolidated financial statements.

Effective January 1, 2003, Apria adopted SFAS No. 146, "Accounting for Costs Associated With Exit or Disposal Activities." This statement addresses the financial accounting and reporting for costs associated with exit or disposal activities and requires that a liability for such costs be recognized when the liability is incurred rather than at the date of an entity's commitment to an exit plan. SFAS No. 146 also establishes that the liability should be measured and recorded at fair value. Adoption of this statement did not have a material effect on the company's consolidated financial statements.

In December 2002, SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123," was issued. This statement amends SFAS No. 123, "Accounting for Stock-Based Compensation," to provide alternative methods of transition and guidance for a voluntary change to the fair value based method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The company has complied with the expanded financial statement disclosure requirements in its consolidated financial statements.

In November 2002, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation ("FIN") No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees and Indebtedness of Others," an interpretation of SFAS Nos. 5, 57 and 107 and rescission of FIN No. 34, "Disclosure of Indirect Guarantees of Indebtedness of Others." FIN No. 45 elaborates on the disclosure requirements for the annual and interim financial statements of the guarantor. It also requires that a guarantor recognize a liability at the inception of the guarantee for the fair value of the obligation undertaken. Apria adopted the recognition and measurement provisions of FIN No. 45 beginning January 1, 2003, while the disclosure provisions became effective at December 31, 2002. Adoption of this interpretation did not have a material effect on Apria's consolidated financial statements as the company did not issue any guarantees during the three month period ended March 31, 2003.

In January 2003, FIN No. 46, "Consolidation of Variable Interest Entities," an interpretation of Accounting Research Bulletin No. 51, was issued. FIN No. 46 requires that a company consolidate variable interest entities if that company is subject to a majority of the risk of loss from the entity's activities or the company receives a majority of the entity's residual returns. FIN No. 46 also requires certain disclosures about variable interest entities in which a company has a significant interest, regardless of whether consolidation is required. Apria adopted the consolidation provisions of FIN No. 46 beginning January 1, 2003, while certain disclosure requirements became effective for all financial statements issued after January 31, 2003, regardless of when the variable interest entities were established. The company currently has no variable interest entities, therefore the adoption of this interpretation is not expected to have a material effect on the company's consolidated financial statements.

Stock-based Compensation: The company accounts for its stock-based compensation plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. Apria has adopted the disclosure provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123." No stock-based employee compensation expense is recognized in net income for any of the periods presented. Had

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

compensation expense for the company's stock-based compensation awards been recognized based on the fair value recognition provisions of SFAS No. 123, Apria's net income and per share amounts would have been adjusted to the pro forma amounts indicated below.

(IN THOUSANDS, EXCEPT PER SHARE DATA)	THREE MONTHS ENDED MARCH 31,	
	2003	2002
Net income as reported.....	\$ 27,826	\$ 22,995
Deduct: total stock-based compensation expense determined for all awards under fair value-based method, net of related tax effects.....	2,022	2,306
Pro forma net income.....	\$ 25,804	\$ 20,689
	=====	=====
Basic net income per share:		
As reported.....	\$ 0.51	\$ 0.42
Pro forma.....	\$ 0.47	\$ 0.38
Diluted net income per share:		
As reported.....	\$ 0.50	\$ 0.41
Pro forma.....	\$ 0.47	\$ 0.37

For purposes of the pro forma disclosure, the fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants in the three-month period ended March 31, 2003 and 2002: risk-free interest rates ranging from 2.36% to 2.81% and 4.27% to 4.71%, respectively; dividend yield of 0% for both periods; expected lives ranging from 4.02 to 4.42 years and 4.13 years, respectively; and volatility of 59% for both periods.

NOTE B - BUSINESS COMBINATIONS

Apria periodically makes acquisitions of complementary businesses in specific geographic markets. The results of operations of the acquired companies are included in the accompanying consolidated income statements from the dates of acquisition. During the three-month period ended March 31, 2003, cash paid for acquisitions was \$23,107,000, which included deferred payments of \$3,504,000 that were related to prior year acquisitions. At March 31, 2003, outstanding deferred consideration totaled \$6,011,000 and is included on the balance sheet in other accrued liabilities.

During the three months ended March 31, 2003, Apria acquired seven companies comprised entirely of home respiratory therapy businesses. Pending receipt of valuation information, amounts preliminarily allocated to goodwill, other intangible assets and patient service equipment were \$18,332,000, \$695,000 and \$3,450,000, respectively. This allocation is inclusive of amounts not yet paid.

The following supplemental unaudited pro forma information presents the combined operating results of Apria and the businesses that were acquired by Apria during the three-month period ended March 31, 2003, as if the acquisitions had occurred at the beginning of the periods presented. The pro forma information is based on the historical financial statements of Apria and those of the acquired businesses. Amounts are not necessarily indicative of the results that may have been obtained had the combinations been in effect at the beginning of the periods presented or that may be achieved in the future.

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

(IN THOUSANDS)	THREE MONTHS ENDED ENDED MARCH 31,	
	2003	2002
Net revenues.....	\$336,859	\$306,206
Net income.....	\$ 27,793	\$ 22,511
Basic net income per common share.....	\$ 0.51	\$ 0.41
Diluted net income per common share.....	\$ 0.50	\$ 0.40

NOTE C - GOODWILL AND INTANGIBLE ASSETS

Apria accounts for intangible assets and goodwill under the initial recognition provisions of SFAS No. 141, "Business Combinations" and the financial accounting and reporting provisions of SFAS No. 142, "Goodwill and Other Intangible Assets." Goodwill and other intangible assets with indefinite lives are no longer amortized, but are tested for impairment annually, or more frequently if circumstances indicate that the possibility of impairment exists. If the carrying value of goodwill or an intangible asset exceeds its fair value, an impairment loss is recognized.

For the quarter ended March 31, 2003, the net change in the carrying amount of goodwill of \$17,850,000 is the result of business combinations. All of the goodwill recorded in conjunction with business combinations completed during the periods presented is expected to be deductible for tax purposes.

Intangible assets, all of which are subject to amortization, consist of the following:

(DOLLARS IN THOUSANDS)	MARCH 31, 2003				
	AVERAGE LIFE IN YEARS	GROSS CARRYING AMOUNT	ACCUMULATED AMORTIZATION	NET BOOK VALUE	GR CAR AM
Covenants not to compete....	4.7	\$ 10,329	\$(5,072)	\$5,257	\$
Tradename.....	2.0	1,324	(441)	883	
	4.0	\$ 11,653	\$(5,513)	\$6,140	\$ 1
	====	=====	=====	=====	=====

Amortization expense amounts to \$696,000 for the three months ended March 31, 2003. Estimated amortization expense for each of the fiscal years ending December 31, is presented below:

(DOLLARS IN THOUSANDS)	FOR THE YEAR ENDING DECEMBER 31,
2003.....	\$ 2,698
2004.....	2,047
2005.....	980
2006.....	721
2007.....	368
2008.....	22

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

NOTE D - LONG-TERM DEBT

At March 31, 2003, there were no borrowings under the revolving credit facility, outstanding letters of credit totaled \$5,155,000, credit available under the revolving facility was \$94,845,000, and Apria was in compliance with all of the financial covenants required by the credit agreement.

Apria utilizes interest rate swap agreements to moderate its exposure to interest rate fluctuations on its underlying variable rate long-term debt. Apria does not use derivative financial instruments for trading or other speculative purposes. Until their March 31, 2003 expiration, Apria had two interest rate swap agreements with a total notional amount of \$100,000,000 and a fixed-rate of 2.58% (before applicable margin). In December 2002, Apria entered into four interest rate swap agreements with a total notional amount of \$100,000,000 that fix an equivalent amount of its variable rate debt at rates ranging from 2.43% to 3.42% (before the applicable margin). The terms of the new swap agreements range from two to four years. The swap agreements are being accounted for as cash flow hedges under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." Accordingly, the difference between the interest received and interest paid is reflected as an adjustment to interest expense. For the three-month periods ended March 31, 2003 and 2002, Apria paid net settlement amounts of \$653,000 and \$153,000, respectively. At March 31, 2003, the aggregate fair value of the swap agreements was a deficit of \$2,091,000 and is reflected in the accompanying balance sheet in other accrued liabilities. Unrealized gains and losses on the fair value of the swap agreements are reflected, net of taxes, in other comprehensive loss (See Note E - "Stockholders' Equity"). Apria's exposure to credit loss under the swap agreements is limited to the interest rate spread in the event of counterparty non-performance.

NOTE E - STOCKHOLDERS' EQUITY

For the three months ended March 31, 2003, changes to stockholders' equity are comprised of the following amounts:

(DOLLARS IN THOUSANDS)

Net income.....	\$ 27,826
Proceeds from the exercise of stock options.....	1,220
Tax benefit related to the exercise of stock options.....	428
Other comprehensive loss, net of taxes.....	(42)
Repurchased common shares held in treasury.....	(1,120)

	\$ 28,312

For the three months ended March 31, 2003 and 2002, net income and comprehensive income differed by unrealized gains and losses related to interest rate swap agreements. In the first quarter of 2003, unrealized losses amounted to \$42,000, and for the same period of 2002, unrealized gains were \$229,000.

Pursuant to its credit agreement, Apria can repurchase up to \$35,000,000 worth of its outstanding common stock during this calendar year. In March 2003, Apria announced that its Board of Directors had authorized the repurchase program for fiscal year 2003. The company repurchased 50,700 shares for \$1,120,000 during the quarter ended March 31, 2003.

NOTE F - INCOME TAXES

Income taxes for the three months ended March 31, 2003 and 2002 have been provided at the effective tax rates expected to be applicable for the respective

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

year. The annual rate for 2002 was reduced by a benefit of \$11,073,000 that resulted from prior year tax examinations that were settled in the fourth quarter.

At December 31, 2002, Apria had federal net operating loss carryforwards of \$15,348,000, of which \$10,000,000 are limited to \$5,000,000 of usage per year under Internal Revenue Code Section 382 and are expected to be fully utilized during 2003 and 2004. The remaining \$5,348,000 is a carryforward of unused unlimited losses expected to be utilized during 2003. The company has an alternative minimum tax credit carryforward of \$9,614,000 which is expected to be utilized during 2003. Additionally, the company has various state net operating loss carryforwards that began to expire in 1997.

NOTE G - COMMITMENTS AND CONTINGENCIES

As previously reported, since mid-1998 Apria has been the subject of an investigation conducted by the U.S. Attorney's office in Los Angeles and the U.S. Department of Health and Human Services. The investigation concerns the documentation supporting Apria's billing for services provided to patients whose healthcare costs are paid by Medicare and other federal programs. Apria is cooperating with the government and has responded to various document requests and subpoenas.

Apria has been informed that the investigation is the result of civil qui tam litigation filed on behalf of the government against Apria. The complaints in the litigation are under seal, however, and the government has not informed Apria of either the identities of the plaintiffs, the court or courts where the proceedings are pending, the date or dates instituted or the factual bases alleged to underlie the proceedings. To date, the U.S. Attorney's office has not informed Apria of any decision to intervene in the qui tam actions; however, it could reach a decision with respect to intervention at any time.

Government representatives and counsel for the plaintiffs in the qui tam actions asserted in July 2001 that, by a process of extrapolation from a sample of 300 patient files to all of Apria's billings to the federal government during the three-and-one-half year sample period, Apria could be liable to the government under the False Claims Act for more than \$9 billion, consisting of extrapolated overpayment liability, treble damages and penalties of up to \$10,000 for each allegedly false claim derived from the extrapolation.

Apria has acknowledged that there may be errors and omissions in supporting documentation affecting a portion of its billings. However, it considers the assertions and amounts described in the preceding paragraph to be unsupported both legally and factually and believes that most of the alleged documentation errors and omissions should not give rise to any liability, for overpayment refunds or otherwise. Accordingly, Apria believes that the claims asserted are unwarranted and that it is in a position to assert numerous meritorious defenses.

Apria has been exchanging information and having discussions with government representatives in an attempt to explore whether it will be possible to resolve this matter on a basis that would be considered fair and reasonable by all parties. Apria cannot provide any assurances as to the outcome of these discussions, however, or as to the outcome of the qui tam litigation in the absence of a settlement. Management cannot estimate the possible loss or range of loss that may result from these proceedings and therefore has not recorded any related accruals.

If a judge, jury or administrative agency were to determine that false claims were submitted to federal healthcare programs or that there were significant overpayments by the government, Apria could face civil and administrative claims

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

for refunds, sanctions and penalties for amounts that would be highly material to its business, results of operations and financial condition, including the exclusion of Apria from participation in federal healthcare programs.

Apria is also engaged in the defense of certain claims and lawsuits arising out of the ordinary course and conduct of its business, the outcomes of which are not determinable at this time. Apria has insurance policies covering such potential losses where such coverage is cost effective. In the opinion of management, any liability that might be incurred by Apria upon the resolution of these claims and lawsuits will not, in the aggregate, have a material adverse effect on Apria's results of operations or financial condition.

NOTE H - PER SHARE AMOUNTS

The following table sets forth the computation of basic and diluted per share amounts:

	THREE
	MONTHS
	ENDED
	MARCH 31,
	2003
(in thousands, except per share data)	

NUMERATOR:	
Net income	\$27,8
Numerator for basic and diluted per share amounts - income available to common stockholders	\$27,8
DENOMINATOR:	
Denominator for basic per share amounts - weighted average shares	54,9
Effect of dilutive securities:	
Employee stock options - dilutive potential common shares	4
Denominator for diluted per share amounts - adjusted weighted average shares	55,3

Basic net income per common share	\$ 0.

Diluted net income per common share	\$ 0.

Employee stock options excluded from the computation of diluted per share amounts:	
Shares for which exercise price exceeds average market price of common stock	2,5
Average exercise price per share that exceeds average market price of common stock	\$ 25.

=====

CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995: Apria's business is subject to a number of risks which are partly or entirely beyond the company's control. The company has described certain of those risks in its Form 10-K for the fiscal year ended December 31, 2002, as filed with the Securities and Exchange Commission on March 31, 2003. This report may be used for purposes of the Private Securities Litigation Reform Act of 1995 as a readily available document

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

containing meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected in any forward-looking statements the company may make from time to time. Those risks include:

- trends and developments affecting the collectibility of accounts receivable;
- the effectiveness of the company's operating systems and controls;
- healthcare reform and the effect of federal and state healthcare regulations;
- government legislative and budget developments which could affect reimbursement levels for products and services provided by Apria;
- the ongoing government investigation regarding patients covered by Medicare and other federal programs;
- pricing pressures from large payors; and
- the successful implementation of the company's acquisition strategy and integration of acquired businesses.

In addition, the terrorist attacks of September 11, 2001 and the military and security activities which followed, including the conflict in Iraq, have and could continue to have significant impacts on the United States economy and government spending priorities. The effects of any further such developments, including but not limited to a prolonged occupation in Iraq, pose significant risks and uncertainties to Apria's business. Among other things, deficit spending by the government as the result of adverse developments in the economy and costs of the government's response to the terrorist attacks and efforts in Iraq, Syria, North Korea and elsewhere could lead to increased pressure to reduce government expenditures for other purposes, including government-funded programs such as Medicare and Medicaid.

=====

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Apria operates in the home healthcare segment of the healthcare industry and provides services in the home respiratory therapy, home infusion therapy and home medical equipment areas. In all three lines, Apria provides patients with a variety of clinical services and related products and supplies, most of which are prescribed by a physician as part of a care plan. Apria provides these services to patients in the home throughout the United States through approximately 410 branch locations.

CRITICAL ACCOUNTING POLICIES. Apria's management considers the accounting policies that govern revenue recognition and the determination of the net realizable value of accounts receivable to be the most critical in relation to the company's consolidated financial statements. These policies require management's most complex and subjective judgments. Other accounting policies requiring significant judgment are those related to goodwill and long-lived assets. These policies are presented in detail in Apria's 2002 Form 10-K - Management's Discussion and Analysis of Financial Condition and Results of Operations.

SEGMENT REPORTING. Apria's branch locations are organized into geographic regions. Each region consists of a number of branches and a regional office that provides key support services, such as billing, purchasing, patient service equipment maintenance, repair and warehousing. Management evaluates operating results on a geographic basis, and therefore views each region as an operating segment. All regions provide the same products and services, including respiratory therapy, infusion therapy and home medical equipment and supplies. For financial reporting purposes, all the company's operating segments are aggregated into one reportable segment in accordance with the aggregation criteria of Statement of Financial Accounting Standards ("SFAS") No. 131,

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

"Disclosures about Segments of an Enterprise and Related Information."

RECENT ACCOUNTING PRONOUNCEMENTS. In April 2002, the Financial Accounting Standards Board ("FASB") issued SFAS No. 145, "Rescission of FASB Statement Nos. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 updates and clarifies existing accounting pronouncements related to gains and losses from the extinguishment of debt and requires that certain lease modifications be accounted for in the same manner as sale-leaseback transactions. Apria adopted the provisions of SFAS No. 145 January 1, 2003. Adoption of this statement did not have a material effect on the company's consolidated financial statements.

In July 2002, SFAS No. 146, "Accounting for Costs Associated With Exit or Disposal Activities," was issued. This statement addresses the financial accounting and reporting for costs associated with exit or disposal activities and requires that a liability for such costs be recognized when the liability is incurred rather than at the date of an entity's commitment to an exit plan. SFAS No. 146 also establishes that the liability should be measured and recorded at fair value. Adoption of the provisions of SFAS No. 146 is required for exit and disposal activities that are initiated after December 31, 2002.

In December 2002, SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123," was issued. This statement amends SFAS No. 123, "Accounting for Stock-Based Compensation," to provide alternative methods of transition and guidance for a voluntary change to the fair value based method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The company has complied with the expanded financial statement disclosure requirements in its consolidated financial statements.

In November 2002, the FASB issued FASB Interpretation ("FIN") No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees and Indebtedness of Others," an interpretation of SFAS Nos. 5, 57 and 107 and rescission of FIN No. 34, "Disclosure of Indirect Guarantees of Indebtedness of Others." FIN No. 45 elaborates on the disclosure requirements for the interim and annual financial statements of the guarantor. It also requires that a guarantor recognize a liability at the inception of the guarantee for the fair value of the obligation undertaken. The disclosure provisions became effective at December 31, 2002 while the recognition provisions of FIN No. 45 became effective January 1, 2003. Adoption of this interpretation did not have a material effect on Apria's consolidated financial statements as the company did not issue any guarantees during the three month period ended March 31, 2003.

In January 2003, FIN No. 46, "Consolidation of Variable Interest Entities," an interpretation of Accounting Research Bulletin No. 51, was issued. FIN No. 46 requires that a company consolidate variable interest entities if that company is subject to a majority of the risk of loss from the entity's activities or the company receives a majority of the entity's residual returns. FIN No. 46 also requires certain disclosures about variable interest entities in which a company has a significant interest, regardless of whether consolidation is required. Adoption of the provisions of FIN No. 46 was required January 1, 2003. The company currently has no variable interest entities, therefore the adoption of this interpretation is not expected to have a material effect on the company's consolidated financial statements.

RESULTS OF OPERATIONS

NET REVENUES. Net revenues were \$335.1 million in the first quarter of

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

2003, compared to \$301.3 million for the corresponding period in 2002. This represents an increase of 11.2%. The growth is due to volume increases including new contracts with regional and national payors and the acquisition of complementary businesses.

Apria's acquisition strategy generally results in the rapid integration of acquired businesses into existing operating locations. This limits management's ability to separately track the amount of revenue generated by an acquired business. Estimating the revenue contribution from acquisitions therefore requires certain assumptions. Based on its analysis, Apria's management estimates that approximately one third to one half of the revenue growth between the quarters presented was derived from acquisitions.

The following table sets forth a summary of net revenues by service line:

(DOLLARS IN THOUSANDS)	THREE MONTHS ENDED MARCH 31,			
	2003		2002	
	\$	%	\$	%
Respiratory therapy.....	\$224,214	66.9%	\$203,232	67.4%
Infusion therapy.....	58,803	17.6%	53,783	17.9%
Home medical equipment/other.....	52,052	15.5%	44,330	14.7%
Total net revenues	\$335,069	100.0%	\$301,345	100.0%
	=====	=====	=====	=====

Respiratory Therapy. Respiratory therapy revenues are derived primarily from the provision of oxygen systems, home ventilators, sleep apnea equipment, nebulizers, respiratory medications and related services. The respiratory therapy service line increased by 10.3% in the first quarter of 2003, as compared to the first quarter of 2002. This growth was primarily driven by volume increases as well as Apria's focus on acquiring respiratory therapy businesses. As a percentage of total net revenues, the respiratory therapy service line declined slightly due to the growth in the home medical equipment/other line.

Infusion Therapy. The infusion therapy service line involves the administration of a drug or nutrient directly into the body intravenously through a needle or catheter. Examples include parenteral nutrition, antibiotics, pain management, chemotherapy and other medications and related services. Infusion therapy also includes enteral nutrition, which is the administration of nutrients directly into the gastrointestinal tract through a feeding tube. Infusion therapy revenues increased by 9.3% in the first quarter of 2003, when compared to the corresponding periods in 2002. This growth was primarily in the enteral nutrition and antibiotic therapies. The infusion line continues to benefit from the increased sales focus placed on enteral nutrition in conjunction with the centralization, at the regional level, of the related intake and distribution functions. This centralization commenced in mid-2001 and was completed early in the second quarter of 2003.

Home Medical Equipment/Other. Home medical equipment/other revenues are derived from the provision of patient safety items, ambulatory and patient room equipment. Home medical equipment/other revenues increased by 17.4% in the first quarter of 2003 versus the same period in 2002. Much of the growth in this revenue line is from volume increases in core product areas such as wheelchairs and hospital beds and due to a geographic expansion of the company's rehabilitation business.

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

Revenue Recognition and Certain Concentrations. Revenues are recognized on the date services and related products are provided to patients and are recorded at amounts estimated to be received under reimbursement arrangements with third-party payors, including private insurers, prepaid health plans, Medicare and Medicaid. Due to the nature of the industry and the reimbursement environment in which Apria operates, certain estimates are required to record net revenues and accounts receivable at their net realizable values. Inherent in these estimates is the risk that they will have to be revised or updated as additional information becomes available, which could have an impact on the consolidated financial statements.

Approximately 34% of Apria's revenues are reimbursed under arrangements with Medicare and Medicaid. No other third-party payor represents 10% or more of the company's revenues. The majority of the company's revenues are derived from fees charged for patient care under fee-for-service arrangements. Revenues derived from capitation arrangements represent less than 10% of total net revenues for all periods presented.

Medicare and Medicaid Reimbursement. The Balanced Budget Act of 1997 contained several provisions that have affected Apria's Medicare reimbursement levels. Subsequent legislation - the Medicare Balanced Budget Refinement Act of 1999 and the Medicare Medicaid and SCHIP Benefits Improvement and Protection Act of 2000 - mitigated some of the effects of the original legislation. However, there are some pending issues that may further impact Medicare reimbursement to Apria in the future.

The Balanced Budget Act of 1997 granted streamlined authority to the Secretary of the U.S. Department of Health and Human Services ("HHS") to increase or reduce the reimbursement for home medical equipment, including oxygen, by up to 15% each year under an inherent reasonableness authority. In December 2002, the Centers for Medicare and Medicaid Services ("CMS") issued an interim final rule that establishes a process by which such adjustments may be made. The rule applies to all Medicare Part B services except those paid under a physician fee schedule or a prospective payment system.

Further, the Balanced Budget Act of 1997 mandated that CMS conduct up to five competitive bidding market demonstrations for Medicare Part B-covered items and services. CMS conducted demonstration projects in Polk County, Florida and San Antonio, Texas. These demonstration projects have been completed. The demonstrations could provide CMS and Congress with a model for implementing competitive pricing in all Medicare programs. Initial reports from government agencies allege cost savings that vary by product line, but the reports do not include costs incurred by the government to administer the program. If such a competitive bidding system were implemented, it could result in lower reimbursement rates, exclude certain items and services from coverage or impose limits on increases in reimbursement rates. Although not included in the President's budget, the administration may seek authority to implement nationwide competitive bidding for all Medicare Part B products and services other than physicians' services. There are members of Congress who support legislation to create a national competitive bidding system for durable medical equipment. The homecare industry is currently working with members of Congress and the administration to ensure that the negative impact of competitive bidding on patient choice, small businesses, the economy and other aspects are fully understood. The industry is also working with the same groups to ensure that the total costs for the government to establish an infrastructure to administer such a complicated program as has been proposed are studied and quantified in detail. It is not clear under what timeframe the government will conduct such analyses, or whether such initiatives will move ahead.

During 2000, the Secretary of HHS wrote to the durable medical equipment regional carriers and recommended, but did not mandate, that Medicare and Medicaid claims processors base their payments for covered outpatient drugs and

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

biologicals on pricing schedules other than the normally calculated Average Wholesale Prices, which historically has been the industry's basis for drug reimbursement. The suggested alternative pricing methodology was offered in an effort to reduce reimbursement levels for certain drugs to more closely approximate a provider's acquisition cost, but it would not have covered the costs that homecare pharmacies incur to prepare, deliver or administer the drugs to patients. Clinical services, billing, collection and other overhead costs also would not have been considered. Under current government reimbursement schedules, these costs are not clearly defined but are implicitly covered within the reimbursement for the drug. The healthcare industry has taken issue with HHS's approach for several reasons, primarily because it fails to consider the accompanying costs of delivering and administering these types of drug therapies to patients in their homes. Further, if providers choose to discontinue providing these drugs due to inadequate reimbursement, patient access to homecare may be jeopardized. The Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act of 2000 provided for a moratorium on decreasing the payment rates in effect as of January 1, 2001, for drugs and biologicals under the current Medicare payment methodology. This legislation also required the General Accounting Office to conduct a thorough study, by September 2001, of the adequacy of current payments. The General Accounting Office was also directed to recommend revised payment methodologies and report to Congress and the Secretary of HHS. The study was completed but the authors acknowledged that 1) the limited scope and deadline associated with the study did not allow for a thorough analysis of the homecare pharmacy aspects of covered services, 2) legitimate service components and related costs do exist, and 3) different methods of determining drug delivery and administration payments may be necessary for different types of drugs. Currently, the timing and impact of such pricing methodology revisions are not known. There is interest in Congress in legislation that would replace Average Wholesale Price as the basis for Medicare drug reimbursement, but to date there has been no agreement within Congress as to what the alternative should be.

Some states have already adopted, or are contemplating adopting, some form of the proposed alternate pricing methodology for certain drugs and biologicals under the Medicaid program. In at least 20 states, these changes have reduced the level of reimbursement received by Apria without a corresponding offset or increase to compensate for the service costs incurred. In several of those states, Apria has elected to stop accepting new Medicaid patient referrals for the affected drugs. The company is continuing to provide services to patients already on service, and for those who receive other Medicaid-covered respiratory, home medical equipment or infusion therapies. Proportionally, Medicaid represents a very small percentage of Apria's home infusion and home-delivered respiratory medication revenues.

GROSS PROFIT. Gross margins were 72.5% and 72.7% for the first quarter of 2003 and the first quarter of 2002, respectively. The respiratory medications margin has deteriorated somewhat due to an increased demand for more expensive brand name inhalation medications without a corresponding increase in reimbursement and due to reimbursement reductions for certain drugs in some states' Medicaid programs. Also affecting the gross margin is an increase in depreciation expense, particularly in the respiratory therapy line, resulting from increased patient service equipment expenditures. See "Cash Flow."

PROVISION FOR DOUBTFUL ACCOUNTS. The provision for doubtful accounts results from management's estimate of the net realizable value of accounts receivable after considering actual write-offs of specific receivables. The provision was 3.8% of net revenues for both the first quarter of 2003 and the first quarter of 2002. See "Accounts Receivable."

SELLING, DISTRIBUTION AND ADMINISTRATIVE. Selling, distribution and administrative expenses are comprised of expenses incurred in direct support of operations and those associated with administrative functions. Expenses incurred

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

by the operating locations include salaries and other expenses in the following functional areas: selling, distribution, clinical, intake, reimbursement, warehousing and repair. Many of these operating costs are directly variable with revenue growth patterns. Certain expenses, such as facility lease and fuel costs, are also very sensitive to market-driven price fluctuations. The administrative expenses include overhead costs incurred by the operating locations and corporate support functions. These expenses do not vary as closely with revenue growth as do the operating costs. Selling, distribution and administrative expenses, expressed as percentages of net revenues, were 54% in the first quarter of 2003, down from 55.1% in the first quarter of 2002. The first quarter of 2002 included \$2.8 million in contract termination costs related to the departure of the former Chief Executive Officer, which, if excluded, would result in selling, distribution and administrative expenses at 54.2% of net revenues.

AMORTIZATION OF INTANGIBLE ASSETS. Amortization of intangible assets for the first quarter of 2003 was \$696,000, compared to \$671,000 in the first quarter of 2002. See "Business Combinations."

INTEREST EXPENSE. Interest expense was \$3.5 million for the first quarter of 2003, down from \$4.1 million in the first quarter of 2002. Two factors primarily contributed to the decrease. Long-term debt decreased by \$37 million from the end of the first quarter of 2002 to the end of the first quarter of 2003 and the applicable interest rate margin for the \$175 million term loan was reduced as a result of the June 2002 credit agreement amendment.

INCOME TAXES. Income taxes for the three months ended March 31, 2003 and 2002 have been provided at the effective tax rates expected to be applicable for the respective year. The annual rate for 2002 was reduced by a benefit of \$11.1 million that resulted from prior year tax examinations that were settled in the fourth quarter.

At December 31, 2002, Apria had federal net operating loss carryforwards of \$15 million, of which \$10 million are limited to \$5 million of usage per year under Internal Revenue Code Section 382 and are expected to be fully utilized during 2003 and 2004. The remaining \$5 million is a carryforward of unused unlimited losses expected to be utilized during 2003. The company has an alternative minimum tax credit carryforward of \$9.6 million, which is expected to be utilized during 2003. Additionally, the company has various state net operating loss carryforwards that began to expire in 1997.

LIQUIDITY AND CAPITAL RESOURCES

Apria's principal source of liquidity is its operating cash flow, which is supplemented by a \$100 million revolving credit facility. Apria's ability to generate operating cash flows in excess of its operating needs has afforded it the ability, among other things, to pursue its acquisition strategy and fund patient service equipment expenditures to support revenue growth. Apria's management believes that its operating cash flow and revolving credit line will continue to be sufficient to fund its operations and growth strategies. However, sustaining the current cash flow levels is dependent on many factors, some of which are not within Apria's control, such as government reimbursement levels and the financial health of its payors.

CASH FLOW. Cash provided by operating activities was \$58.5 million in the first three months of 2003 compared with \$41.3 million in the corresponding period in 2002. The improvement is mainly due to the increase between periods in net income (before items not requiring cash) and the timing of payments against accounts payable and other expense accruals.

Cash used in investing activities increased to \$61.4 million for the first

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

quarter of 2003 compared to \$30.3 million during the same period last year. The increase is primarily due to increased acquisition activity during the first quarter of 2003. Purchases of patient service equipment also increased between the periods. Often, the patient service equipment acquired in business combinations does not meet Apria's standards or is not adequate to support the company's delivery models, resulting in incremental equipment purchases. Another factor contributing to the increase in patient service equipment expenditures is an increase in purchases of specialized ambulatory liquid oxygen units that are being marketed by the manufacturer in an effort to increase market share for both the manufacturer and Apria.

Cash used in financing activities was \$3.8 million during the first quarter of 2003 compared to \$12.9 million during the first quarter of 2002. The primary reason for the difference is the higher level of repurchases of the company's stock in the first quarter of 2002 than in the same period in 2003.

CONTRACTUAL CASH OBLIGATIONS. The following table summarizes Apria's long term cash payment obligations to which the company is contractually bound. The years presented below represent twelve-month rolling periods ending March 31.

(DOLLARS IN MILLIONS)	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5
Term loans.....	\$ 26	\$ 27	\$ 29	\$ 16	\$ 83
Capitalized lease obligations.....	2	2	1	-	-
Operating leases.....	56	49	42	30	18
Deferred acquisition payments.....	6	-	-	-	-
	----	----	----	----	----
Total contractual cash obligations...	\$ 90	\$ 78	\$ 72	\$ 46	\$101
	====	====	====	====	====

ACCOUNTS RECEIVABLE. Accounts receivable before allowance for doubtful accounts increased to \$231.5 million at March 31, 2003 from \$217.5 million at December 31, 2002, which is primarily attributable to the increase in revenues. Also, patient deductible requirements and patient payor and/or benefit changes, which generally coincide with the start of a new calendar year, typically delay the collection process, thereby increasing accounts receivable, days sales outstanding and the provision for doubtful accounts.

Days sales outstanding (calculated as of each period end by dividing accounts receivable, less allowance for doubtful accounts, by the 90-day rolling average of net revenues) were 53 at March 31, 2003, 51 at December 31, 2002 and 52 at March 31, 2002. Accounts aged in excess of 180 days were 16.6% at March 31, 2003, 18% at December 31, 2002 and 18.5% at March 31, 2002.

Evaluation of Net Realizable Value. Management performs various analyses to evaluate accounts receivable balances to ensure that recorded amounts reflect estimated net realizable value. Management applies specified percentages to the accounts receivable aging to estimate the amount that will ultimately be uncollectible and therefore should be reserved. The percentages are increased as the accounts age; accounts aged in excess of 360 days are reserved at 100%. Management establishes and monitors these percentages through extensive analyses of historical realization data, accounts receivable aging trends, other operating trends, the extent of contracted business and business combinations. Also considered are relevant business conditions, such as governmental and managed care payor claims processing procedures and system changes. If indicated by such analyses, management may periodically adjust the uncollectible estimate and corresponding percentages. Further, focused reviews of certain large and/or problematic payors are performed to determine if additional reserves are

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

necessary.

Unbilled Receivables. Included in accounts receivable are earned but unbilled receivables of \$33.9 million and \$29.2 million at March 31, 2003 and December 31, 2002, respectively. Delays, ranging from a day up to several months, between the date of service and billing can occur due to delays in obtaining certain required payor-specific documentation from internal and external sources. Earned but unbilled receivables are aged from date of service and are considered in Apria's analysis of net realizable value. The increase is largely due to recent acquisitions. The time-consuming processes of converting patient files onto Apria's systems and obtaining provider numbers from government payors routinely delay billing of the newly acquired business.

INVENTORIES AND PATIENT SERVICE EQUIPMENT. Inventories consist primarily of pharmaceuticals and disposable articles used in conjunction with patient service equipment. Patient service equipment consists of respiratory and home medical equipment that is provided to in-home patients for the course of their care plan and subsequently returned to Apria for reuse. Continued revenue growth is directly dependent on Apria's ability to fund its inventory and patient service equipment requirements.

LONG-TERM DEBT. On March 31, 2003, total borrowings under the credit agreement were \$263.4 million, outstanding letters of credit totaled \$5.2 million and credit available under the revolving facility was \$94.8 million. The company continues to be in compliance with all of the financial covenants required by the credit agreement.

Hedging Activities. Apria is exposed to interest rate fluctuations on its underlying variable rate long-term debt. Apria's policy for managing interest rate risk is to evaluate and monitor all available relevant information, including but not limited to, the structure of its interest-bearing assets and liabilities, historical interest rate trends and interest rate forecasts published by major financial institutions. The tools Apria may utilize to moderate its exposure to fluctuations in the relevant interest rate indices include, but are not limited to: (1) strategic determination of repricing periods and related principal amounts, and (2) derivative financial instruments such as interest rate swap agreements, caps or collars. Apria does not use derivative financial instruments for trading or other speculative purposes.

In December 2002, Apria entered into four interest rate swap agreements to fix its variable rate debt. The terms of such agreements are as follows: two two-year agreements with an aggregate notional amount of \$50 million and a fixed rate of 2.43%; a three-year agreement with a notional amount of \$25 million and a fixed rate of 3.04%; and a four-year agreement with a notional amount of \$25 million and a fixed rate of 3.42%. Two existing swap agreements with an aggregate notional amount of \$100 million and a fixed rate of 2.58% expired on March 31, 2003. All rates are stated before application of the interest margins specified in the credit agreement.

The swap agreements are being accounted for as cash flow hedges under SFAS No. 133, "Accounting for Derivative and Hedging Activities." Accordingly, the difference between the interest received and interest paid is reflected as an adjustment to interest expense. During the first quarters of 2003 and 2002, Apria paid net settlement amounts of \$653,000 and \$153,000, respectively. Unrealized gains and losses on the fair value of the swap agreements are reflected, net of taxes, in other comprehensive income. At March 31, 2003, the aggregate fair value of the swap agreements was a deficit of \$2.1 million and, accordingly, is reflected in the accompanying balance sheet in other accrued liabilities. Apria does not anticipate losses due to counterparty nonperformance as its counterparties to the various swap agreements are nationally-recognized financial institutions with strong credit ratings.

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

TREASURY STOCK. Apria's credit agreement limits common stock repurchases to \$35 million in any fiscal year and \$100 million in the aggregate. During the first quarter of 2003, Apria repurchased 50,700 shares of its outstanding common stock for \$1.1 million. All repurchased common shares are being held in treasury.

BUSINESS COMBINATIONS. Pursuant to one of its primary growth strategies, Apria periodically acquires complementary businesses in specific geographic markets. The results of operations of the acquired companies are included in the accompanying consolidated income statements from the dates of acquisition. Covenants not to compete, typically effected in these transactions, are being amortized over the life of the respective agreements.

The aggregate consideration for acquisitions that closed during the first quarter of 2003 was \$22.9 million. Pending receipt of valuation information, the preliminary allocation of this amount includes \$18.3 million to goodwill, \$695,000 to other intangible assets and \$3.5 million to patient service equipment. Cash paid for acquisitions, which includes amounts deferred from prior year acquisitions, totaled \$23.1 million and \$3.3 million in the first quarters of 2003 and 2002, respectively.

The success of Apria's acquisition strategy is directly dependent on Apria's ability to maintain and/or generate sufficient liquidity to fund such acquisitions and on the company's ability to integrate the acquired operations successfully.

FEDERAL INVESTIGATION. As previously reported, since mid-1998 Apria has been the subject of an investigation conducted by the U.S. Attorney's office in Los Angeles and the U.S. Department of Health and Human Services. The investigation concerns the documentation supporting Apria's billing for services provided to patients whose healthcare costs are paid by Medicare and other federal programs. Apria is cooperating with the government and has responded to various document requests and subpoenas.

Apria has been informed that the investigation is the result of civil qui tam litigation filed on behalf of the government against Apria. The complaints in the litigation are under seal, however, and the government has not informed Apria of either the identities of the plaintiffs, the court or courts where the proceedings are pending, the date or dates instituted or the factual bases alleged to underlie the proceedings. To date, the U.S. Attorney's office has not informed Apria of any decision to intervene in the qui tam actions; however, it could reach a decision with respect to intervention at any time.

Government representatives and counsel for the plaintiffs in the qui tam actions asserted in July 2001 that, by a process of extrapolation from a sample of 300 patient files to all of Apria's billings to the federal government during the three-and-one-half year sample period, Apria could be liable to the government under the False Claims Act for more than \$9 billion, consisting of extrapolated overpayment liability, treble damages and penalties of up to \$10,000 for each allegedly false claim derived from the extrapolation.

Apria has acknowledged that there may be errors and omissions in supporting documentation affecting a portion of its billings. However, it considers the assertions and amounts described in the preceding paragraph to be unsupported both legally and factually and believes that most of the alleged documentation errors and omissions should not give rise to any liability, for overpayment refunds or otherwise. Accordingly, Apria believes that the claims asserted are unwarranted and that it is in a position to assert numerous meritorious defenses.

Apria has been exchanging information and having discussions with government representatives in an attempt to explore whether it will be possible

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

to resolve this matter on a basis that would be considered fair and reasonable by all parties. Apria cannot provide any assurances as to the outcome of these discussions, however, or as to the outcome of the qui tam litigation in the absence of a settlement. Management cannot estimate the possible loss or range of loss that may result from these proceedings and therefore has not recorded any related accruals.

If a judge, jury or administrative agency were to determine that false claims were submitted to federal healthcare programs or that there were significant overpayments by the government, Apria could face civil and administrative claims for refunds, sanctions and penalties for amounts that would be highly material to its business, results of operations and financial condition, including the exclusion of Apria from participation in federal healthcare programs.

OFF-BALANCE SHEET ARRANGEMENTS

Apria is not a party to "off-balance sheet arrangements" as defined by the Securities and Exchange Commission. However, from time to time the company enters into certain types of contracts that contingently require the company to indemnify parties against third party claims. The contracts primarily relate to: (i) certain asset purchase agreements, under which the company may provide customary indemnification to the seller of the business being acquired; (ii) certain real estate leases, under which the company may be required to indemnify property owners for environmental and other liabilities, and other claims arising from the company's use of the applicable premises; and (iii) certain agreements with the company's officers, directors and employees, under which the company may be required to indemnify such persons for liabilities arising out of their employment relationship.

The terms of such obligations vary by contract and in most instances a specific or maximum dollar amount is not explicitly stated therein. Generally, amounts under these contracts cannot be reasonably estimated until a specific claim is asserted. Consequently, no liabilities have been recorded for these obligations on the company's balance sheets for any of the periods presented.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Apria is exposed to interest rate fluctuations on its underlying variable rate long-term debt. Apria utilizes interest rate swap agreements to moderate such exposure. Apria does not use derivative financial instruments for trading or other speculative purposes.

At March 31, 2003, Apria's term loan borrowings totaled \$263.4 million. The bank credit agreement governing the term loans provides interest rate options based on the following indices: Federal Funds Rate, Prime Rate or the London Interbank Offered Rate ("LIBOR"). All such interest rate options are subject to the application of an interest margin as specified in the bank credit agreement. At March 31, 2003, all of Apria's outstanding term debt was tied to LIBOR.

Until their March 31, 2003 expiration, Apria had two interest rate swap agreements with a total notional amount of \$100 million to pay a fixed rate of 2.58% (before application of interest margin). In December 2002, Apria entered into four additional interest rate swap agreements with a total notional amount of \$100 million to pay fixed rates ranging from 2.43% to 3.42% (before application of interest margin). The terms of the new swap agreements range from two to four years.

Based on the term debt outstanding and the swap agreements in place at March 31, 2003 (excluding those just expired), a 100 basis point change in the applicable interest rates would increase or decrease Apria's annual cash flow

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

and pretax earnings by approximately \$1.6 million. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Long-term Debt - Hedging Activities."

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. Within the 90 days prior to the date of this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures are effective in timely alerting them to material information relating to the company that is required to be included in the company's periodic Securities and Exchange Commission filings.

(b) Changes in internal controls. No significant changes to the company's internal controls, or in other factors that could significantly affect these controls subsequent to the date of their evaluation, have been made during the periods covered by this report.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

As previously reported, since mid-1998 Apria has been the subject of an investigation conducted by the U.S. Attorney's office in Los Angeles and the U.S. Department of Health and Human Services. The investigation concerns the documentation supporting Apria's billing for services provided to patients whose healthcare costs are paid by Medicare and other federal programs. Apria is cooperating with the government and has responded to various document requests and subpoenas.

Apria has been informed that the investigation is the result of civil qui tam litigation filed on behalf of the government against Apria. The complaints in the litigation are under seal, however, and the government has not informed Apria of either the identities of the plaintiffs, the court or courts where the proceedings are pending, the date or dates instituted or the factual bases alleged to underlie the proceedings. To date, the U.S. Attorney's office has not informed Apria of any decision to intervene in the qui tam actions; however, it could reach a decision with respect to intervention at any time.

Government representatives and counsel for the plaintiffs in the qui tam actions asserted in July 2001 that, by a process of extrapolation from a sample of 300 patient files to all of Apria's billings to the federal government during the three-and-one-half year sample period, Apria could be liable to the government under the False Claims Act for more than \$9 billion, consisting of extrapolated overpayment liability, treble damages and penalties of up to \$10,000 for each allegedly false claim derived from the extrapolation.

Apria has acknowledged that there may be errors and omissions in supporting documentation affecting a portion of its billings. However, it considers the assertions and amounts described in the preceding paragraph to be unsupported both legally and factually and believes that most of the alleged documentation errors and omissions should not give rise to any liability, for overpayment refunds or otherwise. Accordingly, Apria believes that the claims asserted are unwarranted and that it is in a position to assert numerous meritorious

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

defenses.

Apria has been exchanging information and having discussions with government representatives in an attempt to explore whether it will be possible to resolve this matter on a basis that would be considered fair and reasonable by all parties. Apria cannot provide any assurances as to the outcome of these discussions, however, or as to the outcome of the qui tam litigation in the absence of a settlement. Management cannot estimate the possible loss or range of loss that may result from these proceedings and therefore has not recorded any related accruals.

If a judge, jury or administrative agency were to determine that false claims were submitted to federal healthcare programs or that there were significant overpayments by the government, Apria could face civil and administrative claims for refunds, sanctions and penalties for amounts that would be highly material to its business, results of operations and financial condition, including the exclusion of Apria from participation in federal healthcare programs.

Apria is also engaged in the defense of certain claims and lawsuits arising out of the ordinary course and conduct of its business, the outcomes of which are not determinable at this time. Apria has insurance policies covering such potential losses where such coverage is cost effective. In the opinion of management, any liability that might be incurred by Apria upon the resolution of these claims and lawsuits will not, in the aggregate, have a material adverse effect on Apria's results of operations or financial condition.

ITEMS 2-5. Not applicable

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits:

Exhibit Number -----	Reference -----
10.1	Form of Stock Ownership Requirements Agreement, dated February 18, 2003, between Registrant and its executive officers, and Exhibit A thereto, Stock Ownership Requirements for Senior Executive Officers.
99.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350.
99.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350.

(b) Reports on Form 8-K:

Apria filed a Current Report on Form 8-K on January 23, 2003 to report the issuance of a press release announcing the final dismissal of a previously reported class action litigation against Apria.

SIGNATURES

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

APRIA HEALTHCARE GROUP INC.

CERTIFICATION - CHIEF EXECUTIVE OFFICER

I, Lawrence M. Higby, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Apria Healthcare Group Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit

Edgar Filing: APRIA HEALTHCARE GROUP INC - Form 10-Q

committee of registrant's board of directors:

- a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
