CORILLIAN CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Corillian Corporation and subsidiaries have been prepared pursuant to Securities and Exchange Commission rules and regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Corillian's annual report on Form 10-K for the year ended December 31, 2004, filed with the Securities and Exchange Commission on March 16, 2005.

The condensed consolidated financial statements include all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the results for interim periods. The results of operations for the three and nine-month periods ended September 30, 2005 are not necessarily indicative of the results to be expected for the full year.

The preparation of condensed consolidated financial statements requires Corillian to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, Corillian evaluates its estimates, including those related to software revenue recognition, accrual for contracts in a loss position, allowance for doubtful accounts and the valuation allowance for deferred tax assets. Corillian bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

(2) Principles of Consolidation

The unaudited condensed consolidated financial statements include the financial statements of Corillian Corporation and its wholly-owned subsidiaries, Corillian International, Ltd., Corillian South Asia Sdn Bhd, Corillian Community Banking Solutions, LLC and Corillian Payment Solutions, Inc. All intercompany balances and transactions have been eliminated in consolidation.

(3) Reclassification

Certain reclassifications have been made to the condensed consolidated financial statements for the nine-month period ended September 30, 2004 in order to conform to the nine-month period ended September 30, 2005 presentation. Such reclassifications had no effect on previously reported net income, liquidity or cash flows from operations.

In the current period, Corillian reclassified balances for the nine-month period ended September 30, 2004, related to auction rate securities, totaling \$10.1 million, from cash equivalents to short-term investments. This reclassification affected the presentation of the cash flows statement for the nine-months ended September 30, 2004.

(4) Acquisition of IntelliData Technologies Corporation

On August 18, 2005, Corillian acquired IntelliData Technologies Corporation (IntelliData), a leading provider of electronic bill payment and presentment and online banking solutions to the financial services industry. IntelliData's products provide financial institutions with the real-time financial processing infrastructure needed to provide their customers with payment and presentment services and online banking via the internet and other online delivery channels. IntelliData's customers included banks, credit unions, brokerage firms, financial institution processors and credit card issuers. The acquisition was an investment aimed at expanding Corillian's product offering, customer base and driving revenue growth which supports the premium paid over the fair market value of individual assets. IntelliData has subsequently been renamed Corillian Payment Solutions, Inc.

Corillian acquired all of IntelliData's outstanding common stock for \$4.3 million in cash and 4,916,430 shares of Corillian common stock issued plus merger related transaction costs of \$0.2 million. The 4,916,430 shares issued were valued at \$3.38 per share, or \$16.6 million in the aggregate, based on the average closing price of our stock on the announcement date and the two-day trading period before and after the announcement of the signing of a material

agreement, which was March 31, 2005. The purchase price was allocated to the underlying assets acquired and liabilities assumed based on their estimated fair values. Analysis supporting the purchase price allocation includes a valuation of assets and liabilities as of the closing date, a third party valuation of intangible assets and a detailed review of the opening balance sheet to determine other significant adjustments required to recognize assets and liabilities at fair value. The purchase price allocation is subject to further changes, including the finalization of the intangibles valuation.

Table of Contents

The following table presents the total purchase price (in thousands):

Cash paid	\$ 4,301
Stock issued	16,618
Merger related transaction costs	205
Total purchase price	\$ 21,124

The following table presents the preliminary allocation of the purchase price to the assets acquired and liabilities assumed based on their fair values (in thousands):

Cash and cash equivalents	\$ 34
Accounts receivable	1,370
Unbilled accounts receivable	335
Prepaid expense and other current assets	229
Property plant and equipment	173
Intangible assets	3,200
Goodwill	21,851
Other long-term assets	175
Accounts payable and accrued liabilities ⁽¹⁾	(5,754)
Deferred revenue ⁽²⁾	(489)
Total purchase price	\$ 21,124

(1) Includes \$1.4 million of accrued employee termination costs pursuant to EITF 95-03, *Recognition of Liabilities in a Purchase Business Combination*. All amounts have been paid as of September 30, 2005.

(2) The fair value of deferred revenue represents an amount equivalent to the estimated cost to fulfill the maintenance obligations assumed associated with bug fixes and phone support plus an appropriate profit margin.

At the acquisition date on August 18, 2005, IntelliData did not have any in-process research and development and accordingly, there is no related expense in Corillian's results of operations for the three and nine-month periods ended September 30, 2005.

The following table presents the details of the intangible assets purchased in the IntelliData acquisition as of September 30, 2005 (in thousands):

	Useful Life (in years)	Estimated Fair Value	Accumulated Amortization	Net
Developed Technology	3	\$ 2,300	\$ (91)	\$ 2,209
Bank Customer Relationships	6	900	(17)	883
		\$ 3,200	\$ (108)	\$ 3,092

Amortization expense for intangible assets purchased in the IntelliData acquisition was approximately \$108,000 for the three and nine-month periods ended September 30, 2005. Amortization expense for intangible assets purchased in the IntelliData acquisition has been recorded in the Condensed Consolidated Statement of Operations as follows (in thousands):

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Cost of revenues	\$ 91	\$ 0	\$ 91	\$ 0
Sales and marketing	17	0	17	0
	\$ 108	\$ 0	\$ 108	\$ 0

Table of Contents

The estimated amortization expense of intangible assets purchased in the IntelliData acquisition for the current fiscal year, including amounts amortized to date, and in future years is as follows:

Fiscal Year	Amount (in thousands)
2005	\$ 338
2006	917
2007	917
2008	633
2009	150
2010	150
2011	95
Total	\$ 3,200

The Condensed Consolidated Statements of Operations include the results of operations of IntelliData since August 18, 2005. The following unaudited pro forma consolidated results of operations have been prepared as if the acquisition of IntelliData had occurred at January 1, 2004.

(In thousands, except per share amounts)	For the Quarter Ended September 30,		For the Nine Months Ended September 30,	
	2005	2004	2005	2004
Sales	\$ 13,145	16,966	\$ 41,958	47,965
Net earnings	(1,828)	1,493	(2,431)	2,086
Net earnings per share basic	\$ (0.04)	0.03	\$ (0.05)	0.05
Net earnings per share diluted	(0.04)	0.03	(0.05)	0.05

The pro forma information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have been achieved had the acquisition been consummated as of that time, nor is it intended to be a projection of future results.

(5) Acquisition of qbt Systems, Inc.

On August 8, 2005, Corillian acquired qbt Systems, Inc. (qbt), a leading provider of integration solutions, electronic funds transfer networks and core data processors. qbt's MultiPoint product is a powerful integration platform that allows financial institutions to integrate their delivery channels and account processing systems in one seamless network environment. qbt's technology provides an unprecedented combination of flexibility, reliability, throughput and security. The acquisition was aimed at expanding Corillian's product offering, increasing revenue growth, and allows for a more seamless, real-time integration to the many different systems in the industry today. These factors, among others, support the premium paid over the fair market value of individual assets. qbt has subsequently been renamed Corillian Community Banking Solutions, LLC.

Corillian acquired all of qbt's outstanding common stock for \$3.2 million in cash and 649,785 shares of Corillian common stock, of which 6,388 shares remain issuable as of September 30, 2005, plus of merger related transaction costs and assumed liabilities of \$0.1 million. Total shares issued and issuable of 649,785 were valued at \$3.20 per share, based on Corillian's closing stock price on the consummation date, amounting to an aggregate value of \$2.1 million. The purchase price was allocated to the underlying assets acquired and liabilities assumed based on their

estimated fair values. Analysis supporting the purchase price allocation includes a valuation of assets and liabilities as of the closing date, a third party valuation of intangible assets and a detailed review of the opening balance sheet to determine other adjustments required to recognize assets and liabilities at fair value. The purchase price allocation is subject to further changes, including the finalization of the intangibles valuation.

Table of Contents

The following table presents the total purchase price (in thousands):

Cash paid	\$ 3,160
Stock consideration	2,059
Merger related transaction costs	119
Liabilities assumed	38
Total purchase price	\$ 5,376

The following table presents the preliminary allocation of the purchase price to the assets acquired and liabilities assumed based on their fair values (in thousands):

Cash and cash equivalents	\$ 141
Accounts receivable	59
Employee receivable	229
Unbilled accounts receivable	73
Property, plant, and equipment	21
Intangible assets	1,300
Goodwill	4,999
Other assets	2
Accounts payable and accrued liabilities	(1,073)
Note Payable	(100)
Deferred revenue ⁽¹⁾	(100)
Long-term note payable	(175)
Total purchase price	\$ 5,376

(1) The fair value of deferred revenue represents an amount equivalent to the estimated cost to fulfill the maintenance obligations assumed plus an appropriate profit margin.

At the acquisition date on August 8, 2005, qbt did not have any in-process research and development and thus, there is no expense in Corillian's results of operations for the three and nine-month periods ended September 30, 2005.

The following table presents the details of the intangible assets purchased in the qbt acquisition as of September 30, 2005 (in thousands):

Useful Life	Estimated Fair Value	Accumulated Amortization	Net
------------------------	-------------------------------------	-------------------------------------	------------

	(in years)					
Developed Technology	2	\$	900	\$	(65)	\$ 835
Backlog	1		300		(44)	256
Customer Relationships	4		100		(4)	96
		\$	1,300	\$	(113)	\$ 1,187

Amortization expense for intangible assets purchased in the qbt acquisition was approximately \$113,000 for the three and nine-month periods ended September 30, 2005. Amortization expense for intangible assets purchased in the qbt acquisition has been recorded in the Condensed Consolidated Statement of Operations as follows (in thousands):

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Cost of revenues	\$ 109	\$ 0	\$ 109	\$ 0
Sales and marketing	4	0	4	0
	\$ 113	\$ 0	\$ 113	\$ 0

Table of Contents

The estimated amortization expense of intangible assets purchased in the qbt acquisition for the current fiscal year, including amounts amortized to date, and in future years is as follows:

Fiscal Year	Amount (in thousands)
2005	\$ 306
2006	657
2007	297
2008	25
2009	15
Total	\$ 1,300

The Condensed Consolidated Statements of Operations include the results of operations of qbt since August 8, 2005. Pro forma results of operations have not been presented because the effect of the acquisition was not material to the Corillian's results.

Prior to the acquisition, Corillian and qbt executed a Proof of Concept whereby Corillian could sub-license and install a qbt MultiPoint adapter at any two of Corillian's customers. As of the consummation date, Corillian did install one adapter for a customer and all amounts owed related to the implementation were paid in full in accordance with the terms of the agreement. There was no settlement gain or loss associated with this agreement.

(6) Summary of Significant Accounting Policies*Goodwill and Intangible Assets*

Goodwill and intangible assets are accounted for in accordance with SFAS No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Other Intangible Assets*. Corillian will perform its annual goodwill impairment analysis during the fourth quarter of fiscal year 2005. SFAS No. 142 requires purchased intangible assets, other than goodwill, to be amortized over their estimated useful lives, unless an asset has an indefinite life. Purchased intangible assets with definite useful lives are carried at cost less accumulated amortization. Amortization expense is recognized on a straight-line basis over the estimated useful lives of the intangible assets, which range from one to six years. Amortization expense for intangible assets that are software-related developed technology and backlog is recorded as cost of revenues on the Condensed Consolidated Statements of Operations. The valuation of intangibles and their useful lives are subject to change as the purchase price allocations of qbt Systems, Inc. and InteliData Technologies Corporation are still under review, including finalization of a third party valuation of intangibles. Management reviews Corillian's long-lived assets and definite-lived intangible assets for impairment when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Recoverability of long-lived assets is determined by comparing the forecasted undiscounted net cash flows of the asset or asset group to the carrying amount of the asset or asset group. If the operation is determined to be unable to recover the carrying amount of its assets, the assets or asset groups are written down to their estimated fair value. Fair value is determined based on discounted cash flows or appraised values, depending upon the nature of the assets.

(7) Concentration of Business and Credit Risk

Results of operations are substantially derived from United States operations and substantially all assets reside in the United States. A majority of Corillian's revenues are generated from banks and other financial institutions. Accordingly, Corillian's near-term and long-term prospects depend on its ability to attract the technology expenditures of these companies. The market for Internet-based financial services is intensely competitive and rapidly changing. Additionally, the sale and implementation of Corillian's products and services are often subject to delays because of Corillian's customers' internal budgets and procedures for approving large capital expenditures and deploying new technologies within their networks. Corillian's financial condition, results of operations and liquidity could be materially affected if adverse conditions in the industry developed, such as a reduction in technology expenditures or a

delay in the sales or implementation timeline. An inability of Corillian to generate demand for its products, whether as a result of competition, technological change, economic, or other factors, could have a material adverse result on Corillian's financial condition, results of operations or liquidity.

Table of Contents

Corillian continues to experience a high degree of customer concentration. During the three-month period ended September 30, 2005, two customers individually accounted for 15% and 10% of consolidated revenues, as compared to two customers individually accounting for 27% and 16% for the three-month period ended September 30, 2004. During the nine-month period ended September 30, 2005, one customer accounted for 12% of consolidated revenues, as compared to two customers individually accounting for 25% and 12% of consolidated revenues for the nine-month period ended September 30, 2004.

Corillian is exposed to concentration of credit risk principally from accounts receivable and revenue in excess of billing. As of September 30, 2005, two customers individually accounted for 37% and 11% of consolidated accounts receivable and one customer individually accounted for 36% of consolidated revenue in excess of billings.

As of December 31, 2004, four customers individually accounted for 24%, 15%, 13% and 13% of consolidated accounts receivable and one customer accounted for 49% of consolidated revenue in excess of billings.

Corillian is also subject to concentrations of credit risk from its cash, cash equivalents and short-term investments. Corillian limits its exposure to credit risk associated with cash, cash equivalents and short-term investments by placing its cash, cash equivalents and short-term investments with major financial institutions and by investing in investment-grade securities.

(8) Comprehensive Income

Comprehensive income (loss) is defined as changes in shareholders' equity exclusive of transactions with owners. To date, only foreign currency translation adjustments have been reported in comprehensive income (loss) for Corillian. All other amounts have not been material to Corillian's financial position or results of operations.

(9) Supplemental Disclosures of Cash Flow Information

	For the Nine-Month Period Ended	
	September	September 30,
	30, 2005	2004
	(in thousands)	
Cash paid during the period for:		
Interest	\$ 21	\$ 93
Taxes	47	99
Non-cash investing and financing activities:		
Common stock issued in InteliData acquisition	\$ 16,618	\$
Common stock issued in qbt Systems, Inc. acquisition	2,059	

(10) Deferred Stock-Based Compensation

At September 30, 2005, Corillian had various stock-based compensation plans, including stock option plans and an employee stock purchase plan. Corillian applies the intrinsic-value-based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations including FASB Interpretation (FIN) No. 44, *Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25*, to account for its stock-based compensation plans. Under this method, compensation expense is generally recorded on the date a stock option is granted if the current market price of the underlying stock exceeded the exercise price. Statement No. 123, *Accounting for Stock-Based Compensation* and Statement No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure, an amendment of FASB Statement No. 123*, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As permitted by existing accounting standards, Corillian has elected to continue to apply the intrinsic-value-based method of accounting described above, and has adopted only the disclosure requirements of Statement No. 123, as amended. Expense associated with stock-based compensation is amortized on an accelerated basis over the vesting period of the individual stock option awards consistent with the method prescribed in FIN No. 28.

In December 2004, the Financial Accounting Standards Board revised Statement of Financial Accounting Standards No. 123 (SFAS 123R), *Share-Based Payment*, which requires companies to expense the estimated fair value of employee stock options and similar awards. The accounting provisions of SFAS 123R will be effective for annual

and interim periods beginning after January 1, 2006. Management is currently evaluating the requirements of SFAS No. 123R. The adoption of SFAS No. 123R is expected to have a significant effect on the consolidated financial statements of Corillian. Corillian has not yet determined whether the adoption will result in amounts that are similar to the current pro forma disclosures under SFAS 123.

Table of Contents

The effect of applying SFAS 123 for providing these pro forma disclosures is not necessarily representative of the effects on reported net income (loss) in future periods. In 2005, Corillian updated assumptions surrounding the volatility and risk-free interest rates that were not properly reflected in our pro forma expense. For the three and nine-month periods ended September 30, 2005 and 2004, we are presenting pro forma compensation expense amounts that includes updates for the volatility and risk-free interest rate assumptions for the respective periods.

The following table illustrates the effect on net income and net income per share if the fair-value-based method had been applied to all outstanding and unvested awards in each period:

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(in thousands, except per share data)			
Net (loss) income, as reported	\$ (60)	\$ 3,072	\$ 2,692	\$ 7,204
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of tax	(712)	(702)	(2,204)	(2,364)
Pro forma net (loss) income	\$ (772)	\$ 2,370	\$ 488	\$ 4,840
Net (loss) income per share:				
Basic as reported	\$ (0.00)	\$ 0.08	\$ 0.07	\$ 0.19
Diluted as reported	\$ (0.00)	\$ 0.08	\$ 0.07	\$ 0.18
Basic pro forma	\$ (0.02)	\$ 0.06	\$ 0.01	\$ 0.13
Diluted pro forma	\$ (0.02)	\$ 0.06	\$ 0.01	\$ 0.12

(11) Net Income (Loss) Per Share

Corillian computes net income (loss) per share in accordance with Statement No. 128, *Earnings Per Share*. Under the provisions of Statement No. 128, basic net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted-average number of shares of common stock outstanding during the period. Diluted net income (loss) per share is computed by dividing net income (loss) for the period by the weighted-average number of shares of common stock and potential dilutive common shares outstanding during the period.

Table of Contents

The following is a reconciliation of basic and diluted weighted-average shares:

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(in thousands)			
Shares for basic net income (loss) per share:				
Weighted-average common shares outstanding	41,756	37,947	39,808	37,432
Effect of dilutive securities:				
Stock options and employee stock purchase plan		2,482	1,212	2,971
Shares for diluted net income (loss) per share	41,756	40,429	41,020	40,403

Options with exercise prices less than the fair market value of the underlying common stock totaling approximately 991,000 were excluded from the net loss per share calculation for the three-month period ended September 30, 2005 due to their anti-dilutive impact.

The following shares issuable under stock options were excluded from dilutive shares under the treasury stock method as the exercise price of the stock options exceeded the average fair market value of the underlying common stock for the periods presented below:

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(in thousands)			
Shares issuable under stock options	2,370	1,342	2,163	1,206

Table of Contents**(12) Segment Information**

Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for reporting information related to operating segments in annual financial statements and requires selected information for those segments to be presented in interim financial reports issued to shareholders. Statement No. 131 also establishes standards for related disclosures about products and services and geographic areas. Operating segments are defined as components of an enterprise about which separate, discrete financial information is available for evaluation by the chief operating decision maker, or decision-making group, in making decisions about how to allocate resources and assess performance. Corillian's chief operating decision maker, as defined under Statement No. 131, is its chief executive officer. Corillian operates in a single segment.

(a) Geographic Information

Results of operations are substantially derived from United States operations and substantially all assets reside in the United States. Direct operating expenses related to Corillian's international operations were insignificant for the three-month and nine-month periods ended September 30, 2005 and 2004, respectively.

Consolidated revenues generated from Corillian's international operations decreased \$4,000, or 3%, to \$112,000 for the three-month period ended September 30, 2005, as compared to \$116,000 for the three-month period ended September 30, 2004. Consolidated revenues generated from Corillian's international operations increased \$20,000, or 4%, to \$505,000 for the nine-month period ended September 30, 2005, as compared to \$485,000 for the nine-month period ended September 30, 2004. Domestic and international revenues were 99% and 1% of total revenues for the three and nine-month periods ended September 30, 2005 and 2004, respectively.

Geographic revenue information for the three and nine-month periods ended September 30, 2005 and 2004 is presented below:

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(in thousands)			
Revenues from:				
United States	\$ 11,825	\$ 13,401	\$ 34,954	\$ 37,158
All foreign countries	112	116	505	485
	\$ 11,937	\$ 13,517	\$ 35,459	\$ 37,643

(b) Revenues

Corillian's chief decision-maker monitors the revenue streams of licenses and various services. There are many shared expenses generated by the various revenue streams. Because management believes that any allocation of the expenses to multiple revenue streams would be impractical and arbitrary, management has not historically made such allocations internally.

The chief decision-maker does, however, monitor revenue streams at a more detailed level than those depicted in the accompanying condensed consolidated statement of operations.

Revenues derived from Corillian's licenses and services are as follows:

	For the Three-Month Period Ended		For the Nine-Month Period Ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(in thousands)			
License and professional services	\$ 7,827	\$ 9,544	\$ 23,422	\$ 26,663
Post-contractual support	3,275	3,046	9,294	8,331

Edgar Filing: CORILLIAN CORP - Form 10-Q

14

Table of Contents**(13) Commitments and Contingencies***(a) Long-term debt*

In November 2000, Corillian obtained a \$5.0 million equipment line of credit with a financial institution. As of December 31, 2004, \$911,000 was outstanding under this line of credit. In February 2005, Corillian paid off the outstanding balance under this line of credit and no further amounts are available for borrowing.

In March 2005, Corillian entered into a new one-year revolving line of credit facility with another financial institution that allows Corillian to borrow up to \$4.0 million to assist with working capital needs as necessary. As of September 30, 2005, Corillian did not have an outstanding balance on this line of credit. Under this line of credit, Corillian must comply with affirmative covenants that require it to maintain a specified tangible net worth, quick ratio, liabilities to tangible net worth ratio and certain levels of net income.

(b) Operating Leases

The acquisitions of IntelliData and qbt resulted in Corillian assuming the future lease obligations for the respective companies. The remaining terms of the agreements range from 1 to 2 years. Future minimum lease payments that related to the acquisitions of IntelliData and qbt are as follows:

Fiscal Year	Amount (in thousands)
2005	\$ 282
2006	946
2007	89
	\$ 1,317

(c) Environmental liability

A portion of the liabilities assumed for the IntelliData acquisition relate to the environmental clean-up associated with prior tenants' operations at IntelliData's former New Milford, Connecticut property. In January 2000, IntelliData sold the property and the building located thereon. In connection with the sale, IntelliData agreed to undertake limited remediation of the property in accordance with applicable state and federal law. The property is not a listed federal or state Superfund site and IntelliData has not been named a potentially responsible party at the property. The remediation plan agreed to with the purchaser allowed IntelliData to use engineering and institutional controls (e.g., deed restrictions) to minimize the extent and costs of the remediation. Moreover, IntelliData obtained environmental insurance, which is now retained by Corillian, to pay for remediation costs up to \$6,600,000 in excess of a retained exposure limit of \$600,000. As of September 30, 2005, the \$600,000 deductible has been exhausted. While Corillian does not believe that the remaining costs will exceed the \$6,000,000 limit, it has not been able to establish a range for what total costs will be and accordingly has not provided for future costs or related insurance recoveries in its condensed consolidated balance sheet as of September 30, 2005.

Corillian has engaged a legal firm and an environmental specialist firm to represent it regarding this matter. The timing of the ultimate resolution of this matter is uncertain. Management does not believe that the resolution of this matter will likely have a material adverse effect on the Company's financial condition or results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Forward-Looking Statements and Risk Factors**

This Quarterly Report on Form 10-Q and the documents incorporated herein by reference contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact made in this Quarterly Report on Form 10-Q are forward-looking including but not limited to, statements regarding industry prospects; future results of operations or position; Corillian's expectations and beliefs regarding future revenue growth and future profits; Corillian's strategies, expectations and intentions regarding

acquisitions and their integration; the outcome of any litigation to which Corillian is a party; Corillian's accounting and tax policies; Corillian's future strategies regarding investments, product offerings, research and development, market share, and strategic relationships and collaboration; Corillian's dividend policies; Corillian's future capital requirements; Corillian's intentions and expectations regarding credit facilities; and Corillian's expectations regarding the sufficiency of its insurance coverage. These statements relate to future events or Corillian's future financial performance. In some cases, you can identify forward-looking statements by terminology including intend, could, may, will, should, expect, plan, anticipate, believe, estimate, predict, potential, future, or con these terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially from those expressed or implied in such forward-looking statements. In evaluating these statements, you should specifically consider various factors, including the risks described below and in greater detail in Exhibit 99.1 to this Report, Corillian's registration statements and reports filed with the Securities and Exchange Commission, and contained in Corillian's press releases from time to time. You are advised to read the more detailed and thorough discussion of the following risks Corillian faces in its business contained in Exhibit 99.1 to this Report.

Table of Contents

While Corillian has generated net income in nine out of the last ten fiscal quarters, Corillian has a history of losses and may incur losses in future periods if Corillian is not able to, among other things, increase its sales to new and existing customers.

Corillian's quarterly results fluctuate significantly and may fall short of anticipated levels, which may cause the price of Corillian's common stock to decline.

Acquisitions by Corillian may be costly and difficult to integrate, divert management resources or dilute shareholder value. Recently, Corillian acquired qbt Systems, Inc. and InteliData Technologies Corporation, and both of these acquisitions may be subject to these challenges. In addition, InteliData has reported internal control deficiencies without a clear plan to correct those deficiencies, and qbt has not been subject to the internal control standards of a public company. The failure to successfully integrate the two companies, and timely and cost effectively implement appropriate internal controls and procedures, could have a material adverse effect on the results of operations and financial condition of the combined companies.

If Corillian's goodwill or amortizable intangible assets become impaired, we may be required to record a significant charge to earnings.

A small number of customers account for a substantial portion of Corillian's revenues in each period; Corillian's results of operations and financial condition could suffer if Corillian loses customers or fails to add additional customers to its customer base.

If Corillian, or its implementation partners, do not effectively implement Corillian's solutions at financial service providers' facilities, Corillian may not achieve anticipated revenues or gross margins.

Corillian's products' lengthy sales cycles may cause revenues and operating results to be unpredictable and to vary significantly from period to period.

Corillian may not achieve anticipated revenues if Corillian does not successfully introduce new products or develop upgrades or enhancements to its existing products.

Corillian's partners may be unable to fulfill their service obligations and cause Corillian to incur penalties or other expenses with its customers.

Corillian's facility and operations may be disabled by a disaster or similar event, which could damage Corillian's reputation and require Corillian to incur financial loss.

Competition in the market for Internet-based financial services is intense and could reduce Corillian's sales and prevent Corillian from achieving profitability.

Consolidation in the financial services industry could reduce the number of Corillian's customers and potential customers.

If Corillian loses key personnel, Corillian could experience reduced sales, delayed product development and diversion of management resources.

If Corillian does not develop international operations as expected or fails to address international market risks, Corillian may not achieve anticipated sales growth.

Table of Contents

If Corillian becomes subject to intellectual property infringement claims, these claims could be costly and time consuming to defend, divert management attention or cause product delays.

Network or Internet security problems could damage Corillian's reputation and business.

New technologies could render Corillian's products obsolete.

Defects in Corillian's solutions and system errors in Corillian's customers' data processing systems after installing Corillian's solutions could result in loss of revenues, delay in market acceptance and injury to Corillian's reputation.

Corillian's products and services must interact with other vendors' products, which may not function properly.

If Corillian becomes subject to product liability litigation, it could be costly and time consuming to defend.

If Corillian is unable to protect its intellectual property, Corillian may lose a valuable competitive advantage or be forced to incur costly litigation to protect its rights.

Increasing government regulation of the Internet and the financial services industry would limit the market for Corillian's products and services impose on Corillian liability for transmission of protected data and increase its expenses.

Corillian does not guarantee future results, levels of activity, performance or achievements. Corillian does not plan to update any of the forward-looking statements after the date of this document to conform them to actual results or to changes in its expectations.

Overview

Corillian is a leading provider of solutions that enable banks, credit unions, brokers, financial portals and other financial service providers to rapidly deploy Internet-based financial services. Corillian's solutions allow consumers to conduct financial transactions, view personal and market financial information, pay bills and access other financial services on the Internet. Corillian provides a set of applications for Internet banking, online fraud prevention, electronic bill presentment and payment, targeted marketing, data aggregation, alerts and online customer relationship management. Corillian's solutions integrate into existing database applications and systems and enable its customers to monitor transactions across all systems in real time. Corillian's solutions are also designed to support multiple lines of business, including small business banking and credit card management, and to scale to support millions of users. Current Corillian customers include J.P. Morgan Chase, Wachovia Bank, The Huntington National Bank, Capital One and SunTrust Bank.

Substantially all of Corillian's revenues are derived from licensing Corillian's software and performing professional services for its customers, both through direct sales channels and indirect sales partners. These professional services include implementation, custom software engineering, consulting, maintenance, training and hosting. In most cases, Corillian recognizes revenues for licenses, implementation, training and custom engineering services using the percentage-of-completion method. Revenues relating to maintenance and hosting services are recognized ratably over the term of the associated maintenance or hosting contract. Revenues derived from consulting services are recognized as the services are performed. Corillian generally licenses Corillian applications on an end-user basis, with its initial license fee based on a fixed number of end users. As a customer increases its installed base of end users beyond the initial fixed number of end users, Corillian's software license requires the customer to pay Corillian an additional license fee to cover additional increments of end users. Revenues from additional seat sales are generally recognized in the period in which the licenses are sold.

The market for new sales of Internet banking solutions continued to be challenging in 2004 and the first nine months of 2005 due to various factors, including reluctance on the part of some banks to upgrade their Internet banking platforms or improve their Internet banking websites. Despite these conditions, Corillian was able to sign a significant contract in the second quarter of 2005 with a major financial institution and contracts with three new

customers in the third quarter of 2005. However, most of Corillian's license revenues for the three and nine-month periods ended September 30, 2005 and 2004 came from sales to existing customers. Moving forward, Corillian will continue to focus on developing additional applications to complement its market position within Internet banking and selling products and services to new and existing customers.

Since incorporation, Corillian has incurred substantial costs to develop and market its technology and to provide professional services. As a result, Corillian has an accumulated deficit of approximately \$94.7 million as of September 30, 2005. Corillian's operating history makes it difficult to forecast future operating results. As a result of the rapid evolution of Corillian's business and limited operating history, Corillian believes period-to-period comparisons of its results of operations, including its revenues and cost of revenues and operating expenses as a percentage of revenues are not necessarily indicative of its future performance.

Table of Contents

On August 18, 2005, Corillian completed its acquisition of IntelliData Technologies Corporation, a leading provider of electronic bill payment and presentment and online banking solutions to the financial services industry. IntelliData's products provide financial institutions with the real-time financial processing infrastructure needed to provide its customers with payment and presentment services and online banking via the Internet and other delivery channels. IntelliData's customers included banks, credit unions, brokerage firms, financial institution processors and credit card issuers. The acquisition was an investment aimed at expanding Corillian's product offering, customer base and revenue growth. These factors, among others, support the premium paid over the fair market value of individual assets. The total purchase price including merger related transaction costs was \$21.1 million. The cost of the acquisition was allocated on the basis of the estimated fair value of assets and liabilities assumed. The preliminary purchase accounting allocations resulted in goodwill of \$21.9 million and intangibles of \$3.2 million. Intangibles will be amortized to cost of revenues and sales and marketing over an estimated 3 to 6 years. At the acquisition date on August 18, 2005, IntelliData did not have any in-process research and development and thus, there is no expense in Corillian's results of operations for the three and nine-month periods ended September 30, 2005.

On August 8, 2005, Corillian completed its acquisition of qbt Systems, Inc., a leading provider of integration solutions to electronic funds transfer networks and core data processors. qbt's MultiPoint product is a powerful integration platform that allows financial institutions to integrate all of their delivery channel and account processing systems in one seamless network environment. The acquisition was an investment aimed at expanding Corillian's product offering and will allow for a more seamless, real-time integration to the many different systems in the industry today. These factors, among others, support the premium paid over the fair market value of individual assets. The total purchase price including merger related transaction costs was \$5.4 million. The cost of the acquisition was allocated on the basis of the estimated fair value of assets and liabilities assumed. The preliminary purchase accounting allocations resulted in goodwill of \$5.0 million and intangibles of \$1.3 million. Intangibles will be amortized to cost of revenues and sales and marketing over an estimated 1 to 4 years. At the acquisition date on August 8, 2005, qbt did not have any in-process research and development and thus, there is no expense in Corillian's results of operations for the three and nine-month periods ended September 30, 2005.

Critical Accounting Policies and Estimates*Revenue Recognition*

Corillian recognizes revenues from software licensing agreements in accordance with the provisions of Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended by SOP No. 98-9, *Modification of SOP No. 97-2, Software Revenue Recognition, with Respect to Certain Transactions*. Corillian's software arrangements generally include software licenses, implementation and custom software engineering services, post-contractual customer support, training services and hosting services. Corillian's software licenses are, in general, functionally dependent on implementation, training and certain custom software engineering services; therefore, software licenses and implementation and training services, together with custom software engineering services that are essential to the functionality of the software, are combined and recognized using the percentage-of-completion method of contract accounting in accordance with SOP No. 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*. Corillian has determined that post-contractual customer support and hosting services can be separated from software licenses, implementation, training and custom software engineering services because (a) post-contractual customer support and hosting services are not essential to the functionality of any other element in the arrangement, and (b) sufficient vendor-specific objective evidence exists to permit the allocation of revenue to these service elements. The hosting element can be accounted for separately from the license element, as the customer can take possession of the software without significant penalty, in accordance with Emerging Issues Task Force (EITF) 00-3, *Application of AICPA Statement of Position 97-2 to Arrangements that Include the Right to Use Software Stored on Another Entity's Hardware*.

Percentage-of-completion is measured by the percentage of contract hours incurred to date compared to the estimated total contract hours for each contract. Corillian has the ability to make reasonably dependable estimates relating to the extent of progress towards completion, contract revenues and contract costs. Any estimation process, including that used in preparing contract accounting models, involves inherent risk. Profit estimates are subject to revision as the contract progresses towards completion. Revisions in profit estimates are charged to income in the

period that the facts giving rise to the revision become known. Corillian reduces the inherent risk relating to revenue and cost estimates in percentage-of-completion models through various approval and monitoring processes and policies. Risks relating to service delivery, usage, productivity and other factors are considered in the estimation process. Cumulative revenues recognized may be less or greater than cumulative billings at any point in time during a contract's term. The resulting difference is recognized as deferred revenue or revenue in excess of billings, respectively. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are estimated.

Table of Contents

Vendor-specific objective evidence has been established on the majority of Corillian's post-contractual customer support and hosting services using the renewal rate. Corillian allocates revenue to these elements in multiple element arrangements using the residual method. The difference between the total software arrangement fee and the amount deferred for post-contractual customer support and hosting services is allocated to software license, implementation, training and custom software engineering services and recognized using contract accounting. When VSOE has not been established on post-contractual customer support, all revenues under such arrangements is recognized ratably over the term of the post-contractual support contract. Arrangements that include transactional services, which include application services provider (ASP) services, are recognized as transactions are processed.

Revenues for post-contractual customer support are recognized ratably over the term of the support services period, generally a period of one year. Services provided to customers under customer support and maintenance agreements generally include technical support and unspecified product upgrades deliverable on a when and if available basis. Revenues from hosting services for transactions processed by Corillian are recognized ratably over the hosting term.

Pursuant to SOP No. 81-1, on projects where ultimate recoverability is questionable due to inherent hazards, Corillian limits revenue recognition in the period to the amount of project costs incurred in the same period, and postpones recognition of profits until results can be estimated more precisely. Under this zero profit methodology, equal amounts of revenues and costs, measured on the basis of performance during the period, are presented in Corillian's condensed consolidated statements of operations.

Corillian generally licenses Corillian applications on an end-user basis, with its initial license fee based on a fixed number of end users. As a customer increases its installed base of end users beyond the initial fixed number of end users, Corillian's software license agreements require customers to pay Corillian an additional license fee to cover additional increments of end users. Revenues from additional license seat sales, less any amounts related to maintenance included in the arrangement, are generally recognized in the period in which the licenses are sold.

In arrangements where Corillian does not have an obligation to install its products, but may become involved in the installation of these products, Corillian recognizes non-refundable license fees over the estimated implementation period for the customer or reseller's project. If Corillian determines that the customer or reseller can successfully install Corillian's products in a production environment without Corillian's involvement, Corillian will recognize non-refundable license fees in the period in which collectibility of the license fees is probable, assuming all other SOP No. 97-2 revenue recognition criteria are met.

In certain arrangements, Corillian may defer all revenues and related costs of revenues until delivery is complete and customer acceptance is obtained. These arrangements have certain elements of risk such as an obligation to deliver new products when technological feasibility has not been obtained at the onset of the arrangement. In arrangements where Corillian is providing customized functionality on a best efforts basis, Corillian generally recognizes revenues as services are performed. Arrangements where customers fund expedited development of software products are accounted for as funded research and development. In arrangements where Corillian retains and reserves title and all ownership rights to the software products, Corillian recognizes these funds as a reduction of research and development expense.

Goodwill and Intangible Assets

Goodwill and intangible assets are accounted for in accordance with SFAS No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Other Intangible Assets*. Corillian will perform its annual goodwill impairment analysis during the fourth quarter of fiscal year 2005. SFAS No. 142 requires purchased intangible assets, other than goodwill, to be amortized over their estimated useful lives, unless an asset has an indefinite life. Purchased intangible assets with definite useful lives are carried at cost less accumulated amortization. Amortization expense is recognized on a straight-line basis over the estimated useful lives of the intangible assets, which range from one to six years. Amortization expense for intangible assets that are software-related developed technology and backlog is recorded as cost of revenues on the Condensed Consolidated Statements of Operations. The valuation of intangibles and their useful lives are subject to change as the purchase price allocations of the qbt Systems, Inc. and InteliData Technologies Corporation are still under review, including finalization of a third party valuation of intangibles.

Table of Contents**Results of Operations*****Revenues***

Corillian's revenues are derived from licensing Corillian's software and performing professional services for its customers, both through direct sales channels and indirect sales partners. These professional services include implementation, custom software engineering, consulting, maintenance, training and hosting.

Revenues decreased approximately \$1.6 million, or 12%, to \$11.9 million for the three-month period ended September 30, 2005, as compared to \$13.5 million for three-month period ended September 30, 2004. The decrease in revenues was primarily due to a decrease in license and professional services of approximately \$1.7 million for the three-month period ended September 30, 2005, as compared to the three-month period ended September 30, 2004. The decrease in license and professional services was primarily due to a significant license and services agreement in the prior year that did not contribute license or professional services revenues in the three-month period ended September 30, 2005. The decrease in license and professional services revenues was partially offset by increases in post-contractual support totaling \$229,000. Post-contractual support increased primarily due to services related to the companies acquired in the third quarter of 2005.

Revenues decreased approximately \$2.1 million, or 6%, to \$35.5 million for the nine-month period ended September 30, 2005, as compared to \$37.6 million for the nine-month period ended September 30, 2004. The decrease in revenues was primarily due to a decrease in license and professional services of approximately \$3.2 million for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004. The decrease in license and professional services was primarily due to a significant license and services agreement in the prior year that did not contribute license or professional services revenues in the nine-month period ended September 30, 2005. The decrease in license and professional services revenues was partially offset by increases in post-contractual support and hosting revenues of approximately \$963,000 and \$94,000, respectively. Post-contractual support increased primarily due to one significant customer receiving \$770,000 of additional services combined with \$180,000 of services related to the companies acquired in the third quarter of 2005. Hosting revenues increased primarily due to one significant customer receiving \$61,000 in additional services for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004.

Cost of Revenues

Cost of revenues consists primarily of salaries and related expenses for professional service personnel, outsourced professional service providers who are responsible for the implementation and customization of Corillian's software, maintenance and support personnel who are responsible for post-contractual customer support and the amortization of Corillian's developed technology and backlog intangible assets.

Cost of revenues increased approximately \$0.8 million, or 18%, to \$5.3 million for the three-month period ended September 30, 2005, as compared to \$4.5 million for the three-month period ended September 30, 2004. The increase was primarily due to approximately \$0.7 million of cost of services related to the companies acquired in the third quarter of 2005 and \$200,000 of amortization of acquisition related intangibles.

Cost of revenues decreased \$0.5 million, or 3%, to \$13.8 million for the nine-month period ended September 30, 2005, as compared to \$14.3 million for the nine-month period ended September 30, 2004. The decrease in cost of revenues was primarily due to a decrease of \$0.9 million related to services. The decrease in cost of revenues associated with services was due to smaller implementation projects for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004. This decrease was partially offset by an increase in the amortization of acquisition related intangibles of \$200,000 for the nine-month period ended September 30, 2004.

The amortization of acquisition related intangibles to be recognized in cost of revenues is estimated to be \$423,000 for the three-month period ended December 31, 2005.

Gross profit as a percentage of revenues was 56% for the three-month period ended September 30, 2005, as compared to 67% for the three-month period ended September 30, 2004, and remained relatively consistent at 61% for the nine-month period ended September 30, 2005, as compared to 62% for the nine-month period ended September 30, 2004. The decrease in gross profit as a percentage of revenue for the three-month period ended 2005 was primarily due to sales mix where there was a decrease in license and professional services revenues of 18% for

the three-month period ended September 30, 2005 and a 12% decrease for the nine-month period ended September 30, 2005. Corillian generally receives higher margins on license and professional services revenues. The decrease in gross margin for the three-month period ended September 30, 2005 was also impacted by the decline in revenues. Revenues for the three-month period ended September 30, 2005 decreased by 12% whereas revenues for the nine-month period ended September 30, 2004 decreased by 6%.

Table of Contents***Operating Expenses******Sales and Marketing Expenses***

Sales and marketing expenses consist of salaries, commissions and related expenses for personnel involved in marketing, sales and support functions, costs associated with trade shows and other promotional activities and amortization of Corillian's customer relationships intangible assets.

Sales and marketing expenses increased approximately \$200,000, or 11%, to \$2.0 million for the three-month period ended September 30, 2005, as compared to \$1.8 million for the three-month period ended September 30, 2004. Sales and marketing expense increased approximately \$100,000, or 2%, to \$5.5 million for the nine-month period ended September 30, 2005, as compared to \$5.4 million for the nine-month period ended September 30, 2004. The increase for the three-month period ended September 30, 2005 was due to an increase in payroll and payroll related costs as headcount increased to 39 at September 30, 2005, as compared to 25 at September 30, 2004. This increase includes 11 sales and marketing employees from the companies acquired in the third quarter of 2005. The increase for the nine-month period ended September 30, 2005 was primarily attributable to increases in trade show expenses for the respective period.

Research and Development Expenses

Research and development expenses consist primarily of salaries and related expenses for engineering personnel and costs of materials and equipment associated with the design, development and testing of Corillian's products.

Research and development expenses increased approximately \$1.0 million, or 63%, to \$2.6 million for the three-month period ended September 30, 2005, as compared to \$1.6 million for the three-month period ended September 30, 2004. The increase was primarily due to additional payroll and payroll related costs of \$535,000 due to research and development headcount increasing to 82 at September 30, 2005, as compared to 57 at September 30, 2004. The headcount amount at September 30, 2005 includes 11 research and development employees from companies acquired in the third quarter of 2005. Additionally, in the prior year, research and development personnel performed work to assist in the implementation of a large project whereas in the current year, these individuals were involved with product development. This resulted in \$360,000 being allocated out of research and development to cost of revenues for the three-month period ended September 30, 2004.

Research and development expenses increased approximately \$3.3 million, or 72%, to \$7.9 million for the nine-month period ended September 30, 2005, as compared to \$4.6 million for the nine-month period ended September 30, 2004. The increase was due, in part, to approximately \$1.5 million in payroll and payroll related costs due to increased headcount at September 30, 2005, as compared to September 30, 2004. Additional increases were due to research and development personnel assisting with implementation on a large project in the prior year whereas these individuals were involved with product development in the current year. Additionally, more professional services employees were working on product development in the current year. The impact of product development personnel dedicating less time to implementation and more on product development, combined with professional services employees dedicating more time to product development, resulted in approximately a \$1.9 million increase for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004.

Research and development expenses, to a certain extent, could fluctuate in future periods due to the additional funding of Corillian's research and development activities by customers accounted for under the provisions of Statement No. 68, *Research and Development Arrangements*, as well as internal funding for the development of new products and enhancements to existing products and the use of Corillian's research and development personnel to provide services for Corillian's customers.

Table of Contents*General and Administrative Expenses*

General and administrative expenses consist of salaries and related expenses for executive, finance, human resources, legal, information systems management and administration personnel, as well as professional fees, bad debt expenses and other general corporate expenses.

General and administrative expenses increased \$0.5 million, or 28%, to \$2.3 million for the three-month period ended September 30, 2005, as compared to \$1.8 million for the three-month period ended September 30, 2004. The increase was primarily due to increases in payroll and payroll related costs as administrative headcount increased to 42 at September 30, 2005, as compared to 34 at September 30, 2004.

General and administrative expenses increased approximately \$1.1 million, or 22%, to \$6.2 million for the nine-month period ended September 30, 2005, as compared to \$5.1 million for the nine-month period ended September 30, 2004. The increase was primarily due to an increase of \$915,000 in salaries, wages and employee related benefits as administrative headcount increased from 34 at September 30, 2004 to 42 at September 30, 2005. Additional increases were due to \$168,000 in new software maintenance agreements related to internally used software and \$86,000 in accounting fees related to Sarbanes-Oxley compliance audit fees.

Other Income (Expense), Net

Other income (expense), net, consists primarily of interest earned on cash, cash equivalents and short-term investments, interest expense, Corillian's share of losses in equity investments, and other miscellaneous items.

Other income (expense), net, increased \$370,000 to income of \$248,000 for the three-month period ended September 30, 2005, as compared to an expense of \$122,000 for the three-month period ended September 30, 2004. The increase was partially due to \$130,000 of additional interest income as a result of more cash held in short-term investments in 2005 and also receiving higher interest rates on the respective investments. Additionally, equity losses in the Synoran investment decreased approximately \$214,000.

Other income (expense), net, increased \$1.1 million to income of \$623,000 for the nine-month period ended September 30, 2005, as compared to expense of \$506,000 for the nine-month period ended September 30, 2004. The increase was partially due to \$502,000 of additional interest income as a result of more cash held in short-term investments in 2005 and also receiving higher interest rates on the respective investments. Additionally, equity losses in the Synoran investment decreased approximately \$531,000.

Income Taxes

Corilliant expects to be profitable for the twelve-month period ended December 31, 2005, and, therefore, expects to incur an alternative minimum tax liability for this period. Due to the net loss for the three-month period ended September 30, 2005, Corilliant did not record an income tax benefit related to estimated alternative minimum taxes for the for the respective period. However, Corilliant has recorded an income tax charge of \$63,000 for the nine-month period ended September 30, 2005. Alternative minimum taxes paid are available to be carried forward to reduce the excess of regular taxes over alternative minimum taxes in future years. Such alternative minimum tax credit carryforwards are includable in deferred tax assets. Corilliant has recorded a full valuation allowance against such credit carryforwards in addition to all other net deferred tax assets, as it believes it is more likely than not that these deferred tax assets will not be realized. We consider future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment to decrease the valuation allowance would either increase income, contributed capital, or decrease goodwill in the period such determination was made.

Liquidity and Capital Resources

As of September 30, 2005, Corilliant had \$27.3 million in cash, cash equivalents and short-term investments, as compared to \$39.4 million as of December 31, 2004. Cash equivalents consisted mainly of demand deposits, money market mutual funds and commercial paper with original maturities less than 90 days. Short-term investments consisted mainly of taxable government agency bonds with original maturities between 90 and 180 days, taxable municipal bonds and auction rate securities, with original maturities greater than one year. Although original maturities are greater than one year, Corilliant classifies auction rate securities as short-term investments as they are bought and sold at par every 28 to 35 days and therefore are available for use in normal operations.

In November 2000, Corillian obtained a \$5.0 million equipment line of credit with a financial institution. As of December 31, 2004, \$911,000 was outstanding under this line of credit. In February 2005, Corillian paid off the outstanding balance under this line of credit and no further amounts are available for borrowing.

Table of Contents

In March 2005, Corillian entered into a new one-year revolving line of credit facility with another financial institution that allows Corillian to borrow up to \$4.0 million to assist with working capital needs as necessary. As of September 30, 2005, Corillian did not have an outstanding balance on this line of credit. Under this line of credit, Corillian must comply with affirmative covenants that require it to maintain a specified tangible net worth, quick ratio, liabilities to tangible net worth ratio and certain levels of net income.

Net cash used in operating activities was \$3.4 million for the nine-months ended September 30, 2005, as compared to net cash provided by operating activities of \$7.3 million for the nine-months ended September 30, 2004. Net income, adjusted to add back the effects of non-cash items such as depreciation, amortization and equity losses on the Synoran investment, decreased by \$6.0 million for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004. Corillian's cash provided by operating activities decreased as deferred revenue and other current and long-term liabilities decreased \$4.7 million for the nine-month period ended September 30, 2005, as compared to a decrease of \$0.8 million for the nine-month period ended September 30, 2004. The decrease primarily related to deferred revenue, which decreased due to an overall decline in sales volume. Additionally, the significant decrease to deferred revenue for the nine-month period ended September 30, 2005 can be attributed to a large project in deferred revenue at December 31, 2004 totaling \$3.5 million whereas the largest project in deferred revenue as of September 30, 2005 was \$1.6 million. In addition to the decrease in deferred revenue, accounts payable and accrued liabilities increased \$3.3 million for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004. The increase in accounts payable and accrued liabilities was due primarily to the liabilities associated with IntelliData, which was acquired on August 18, 2005. The decrease in deferred revenue and the increase in accounts payable and accrued liabilities, which had a negative impact on net cash used in operating activities, was offset by an increase of \$2.4 million in net cash provided by accounts receivable for the nine-month period ended September 30, 2005, as compared to the nine-month period ended September 30, 2004. This is due to a decrease in accounts receivable due to lower sales volume and smaller projects at September 30, 2005, as compared to September 30, 2004.

Net cash used in investing activities was \$9.1 million for the nine-months ended September 30, 2005, as compared to net cash used in investing of \$0.8 million for the nine-months ended September 30, 2004. The increase in the net cash used in investing activities was primarily due to the acquisitions of IntelliData and qbt, which occurred on August 18, 2005 and August 8, 2005, respectively. The cash used in conjunction with the IntelliData acquisition was \$4.5 million and the net cash used in conjunction with the qbt acquisition was \$3.1 million.

Net cash used in financing activities was \$159,000 for the nine-month period ended September 30, 2005. Net cash provided by financing activities was \$828,000 for the nine-month period ended September 30, 2004. During the nine-month period ended September 30, 2005, net cash used in financing activities consisted primarily of \$1.1 million in proceeds received from issuance of common stock under Corillian's stock option and employee stock purchase plans, which was more than offset by repayments on long-term borrowing and capital lease obligations of \$0.9 million and \$0.3 million in registration costs associated with shares issued in business combinations. Net cash provided by financing activities during the nine-month period ended September 30, 2004 consisted primarily of \$1.9 million received from the issuance of common stock under Corillian's stock option and employee stock purchase plans, which was offset, in part, by repayments on long-term borrowings and capital lease obligations of \$1.1 million.

Working capital decreased to \$19.3 million as of September 30, 2005, as compared to \$29.4 million as of December 31, 2004. The decrease was primarily due to cash used in the acquisitions of IntelliData and qbt combined which also resulted in higher accounts payable and accrued liabilities as of September 30, 2005, as compared to December 31, 2004. In addition, the overall decrease in sales volume resulted in decreases in the deferred revenue and accounts receivable balances as of September 30, 2005, as compared to December 31, 2004.

Corillian had no material financial obligations as of September 30, 2005, other than its obligations under its operating leases. Further capital requirements will depend on many factors, including the timing of research and development efforts and the expansion of Corillian's operations, both domestically and internationally. Corillian believes its current cash, cash equivalents, and short-term investments will be sufficient to meet its working capital requirements for at least the next 12 months.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Exchange Rate Sensitivity

Corillian develops products in the United States and markets its products and services in the United States, and to a lesser extent in Europe, Asia and Australia. As a result, its financial results could be affected by factors such as changes in foreign currency exchange rates or weak economic conditions in foreign markets. Because nearly all of Corillian's revenues are currently denominated in United States dollars, a strengthening of the United States dollar could make Corillian's products less competitive in foreign markets.

Table of Contents

Corillian does not use derivative financial instruments for speculative purposes. Corillian does not engage in exchange rate hedging or hold or issue foreign exchange contracts for trading purposes. Corillian does have foreign-based operations where transactions are denominated in foreign currencies and are subject to market risk with respect to fluctuations in the relative value of currencies. Corillian has limited operations in Europe, Asia and Australia and conducts transactions in various local currencies in these locales. To date, the impact of fluctuations in the relative fair value of other currencies has not been material.

Interest Rate Sensitivity

As of September 30, 2005, Corillian had \$27.3 million in cash, cash equivalents and short-term investments compared to \$39.4 million at December 31, 2004. Cash equivalents consist mainly of demand deposit accounts, money market mutual funds and commercial paper with original maturities less than 90 days. Short-term investments consist of taxable government agency bonds with original maturities ranging between 90 and 180 days taxable municipal bonds, auction rate securities, with original maturities ranging from greater than one year. Government agency bonds are classified as held-to-maturity. All auction rate securities are classified as available-for-sale and reported on the balance sheet at par value, which equals market value, as these securities are bought and sold every 28 to 35 days. Corillian is not subject to interest rate risks on its available-for-sale investments as these investments are bought and sold at par value. Corillian's short-term held-to-maturity investments are subject to interest rate risk and will decrease in value if market interest rates increase. Corillian manages this risk by maintaining an investment portfolio with high credit quality. Changes in the overall level of interest rates affect our interest income that is generated from our short-term investments. If interest rates increase or decrease equally during 2005, by a total of one percent, Corillian's interest income could increase or decrease by approximately \$273,000 on an annual basis and approximately \$68,000 on a quarterly basis. Corillian may invest in short-term investments with original maturities greater than 180 days. These investments would be subject to higher levels of interest rate risks.

ITEM 4. CONTROLS AND PROCEDURES**(a) Evaluation of disclosure controls and procedures.**

The term "disclosure controls and procedures" (defined in SEC Rule 13a-15(e)) refers to the controls and other procedures of a company that are designed to ensure that the information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized and reported within required time periods. Corillian's management, with the participation of the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operations of the Company's disclosure controls and procedures as of the end of the period covered by this quarterly report (the Evaluation Date). In designing and evaluating our disclosure controls and procedures, management recognized that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Corillian's disclosure controls and procedures are designed to provide reasonable assurance that the objectives of the system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on that evaluation, Corillian's management, with the participation of the Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, such controls and procedures were effective.

(b) Changes in internal controls over financial reporting

In August 2005 Corillian completed the acquisitions of IntelliData and qbt, which Corillian believes are material to its results of operations, financial position and cash flows. Management continues to assess the internal controls of the acquired companies. There has been no significant change in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are likely to materially affect,

the Company's internal control over financial reporting.

Table of Contents

We intend to regularly review and evaluate the design and effectiveness of our disclosure controls and procedures and internal controls over financial reporting on an ongoing basis and to improve these controls and procedures over time and to correct any significant deficiencies that we may discover in the future. While we believe the present design of our disclosure controls and procedures and internal controls over financial reporting are effective, future events affecting our business may cause us to modify these controls and procedures in the future.

Table of Contents

PART II. OTHER INFORMATION

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) On August 8, 2005, Corillian issued an aggregate of 643,397 shares of common stock in connection with the acquisition of qbt Systems, Inc. to the former shareholders of qbt, along with an aggregate of \$3.2 million in cash, in consideration for all of their outstanding shares of qbt stock. The offer and sale of the securities were effected without registration in reliance on rule 505 of Regulation D of the Securities Act of 1933. Corillian's closing share price on August 8, 2005 was \$3.20 per share. Under the agreement, 6,388 shares remain issuable.

(b) None.

(c) None.
