Dear
SHAREHOLDER

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

Once again, I am pleased to state that during the period covered by this report your Nuveen Fund continued to meet its objective of providing attractive tax-free monthly income. Detailed information on your Fund's performance can be found in the Portfolio Manager's Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information through the Internet and by e-mail rather than in hard copy. Not only will you be able to receive the information faster, but this also may help lower your Fund expenses. Sign up is quick and easy -- see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by our seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. Portfolio Manager's
COMMENTS

Portfolio manager Tom Futrell discusses U.S. economic conditions, key investment strategies, and the recent performance of the Nuveen Premium Income Funds. With 19 years of investment management experience at Nuveen, Tom assumed portfolio management responsibility for NPI in 1988 and for NPM and NPT in 2001.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In a number of ways, market conditions have not changed significantly since our last shareholder report.

We believe the most influential factors affecting the economy and the municipal

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

market continued to be the slow pace of economic growth and the relatively low levels of interest rates. In addition, the ongoing threat of terrorism and the current uncertain geopolitical climate also had an impact on the economy and the markets over this reporting period.

Looking more closely at the municipal market, the sluggish economic recovery and lack of inflationary pressures helped many bonds perform well during most of the twelve-month period that ended October 31, 2002. However, during the month of October 2002, the market environment for all fixed-income investments soured as a rally in the equity markets seemingly caused some investors to sell fixed-income products and purchase common stocks.

In the first ten months of 2002, new municipal bond issuance nationwide reached \$289.4 billion, an increase of 30% over January-October 2001. Demand for municipal bonds also remained strong over most of this period, as many individual investors continued to seek investments offering diversification for their portfolios and tax-free income. In addition, institutional investors, especially traditional municipal bond purchasers such as property/casualty insurance companies, have been active buyers in the municipal market.

HOW DID THESE FUNDS PERFORM OVER THE TWELVE MONTHS ENDED OCTOBER 31, 2002?

Individual results for the Premium Income Funds, as well as for relevant benchmarks, are presented in the accompanying table.

	MARKET YIELD		TOTAL RETURN ON NAV	LEHMAN TOTAL RETURN ¹	LIPPER AVERAGE ²
	10/31/02	TAXABLE- EQUIVALENT ³	1 YEAR ENDED 10/31/02	1 YEAR ENDED 10/31/02	1 YEAR ENDED 10/31/02
NPI	6.68%	9.54%	3.47%	5.87%	4.93%
NPM	6.79%	9.70%	5.03%	5.87%	4.93%
NPT	6.57%	9.39%	0.76%	5.87%	4.93%

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

NPM reported a total return for the period that was roughly in line with the performance of its Lipper leveraged fund peer group average and the unleveraged, unmanaged Lehman index.

The relative underperformance of NPI and NPT, when compared with both their Lipper peer group

1 The total annual returns on common share net asset value for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.

- 2 The total returns of these Funds are compared with the average annualized return of the 56 funds in the Lipper General Leveraged Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30%.

2

and the Lehman index, resulted primarily from specific issues affecting a small number of individual holdings, as well as from exposure to some underperforming sectors of the municipal market. For example, both Funds continued to hold bonds issued to support the terminal or maintenance facilities of private air carriers. The value of these bonds fell over the past year, in part due to the general decline in passenger volume that affected many airlines and in part due to the possibility of a bankruptcy declaration by United Air Lines. (United filed for bankruptcy protection on December 9, 2002.) Since most of the bonds we hold support ongoing operations, we believe United has every intention of continuing to honor the obligations underlying these facilities. Over the longer-term, we believe air travel will remain a major component of transportation in this country, and we think these airline-backed bonds, at their current depressed levels, are positioned to appreciate in value as the outlook for these companies improves.

NPT's performance also was negatively impacted by its holdings of several distressed credits. These included parking revenue bonds issued for the River Park Square project in Spokane, Washington; Wood River Township Hospital (Illinois) general obligation bonds; industrial development bonds issued by Erie County (New York) for the CanFibre of Lackawanna project; and multifamily housing bonds for projects in Oklahoma, Texas, and Indiana. These holdings accounted for about 6% of the Fund's net assets. We were disappointed that several unrelated credit issues occurred more or less simultaneously within the portfolio of this one particular Fund. We have reviewed our research and surveillance procedures, and are convinced they remain fundamentally sound. All of the distressed bonds are in various stages of workout, and we are monitoring each situation carefully. In each case, we intend to pursue our rights vigorously and will be guided by what we believe is in the best long-term interest of the Fund's shareholders.

The performance of NPI was affected by one credit in the multifamily housing sector, Harris County (TX) HFC Housing Finance Corp. [Coolwood Oaks], which from the start of this reporting period lost more than 30% of its market value before we sold this position in July 2002. At the start of the reporting period, this holding equaled about 1% of the Fund's net assets.

3

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As the Fed continued to keep short-term interest rates relatively low, the dividend-payment capabilities of all these Funds benefited from their use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. The amount of this benefit is tied, in part, to the short-term rates the Funds pay their MuniPreferred, shareholders. Low short-term rates, such as those currently in effect, can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

common share dividends.

During the fiscal year ended October 31, 2002, steady or falling short-term interest rates enabled us to implement four dividend increases in NPI, three in NPM, and one in NPT.

Over the course of the entire reporting period, the share prices and NAVs of each of these Funds declined modestly. As of October 31, 2002, the Funds continued to trade at discounts to their common share net asset values (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THE FUNDS DURING THE FISCAL YEAR ENDED OCTOBER 31, 2002?

Over the twelve-month period, our strategic focus continued to be on working to diversify Fund holdings, enhance call protection, and position the Funds for potential changes in the interest rate environment. Specifically, that included selling some bonds with current coupons and short call dates and reinvesting the proceeds in bonds from the 15- to 20-year part of the yield curve. We believe these bonds should help moderate the Funds' durations⁴ over time (making the portfolios less sensitive to interest rate changes), while still allowing the Funds to provide competitive yields and returns. In our opinion, bonds in the 15- to 20-year range offered excellent opportunities for price appreciation and should perform relatively well if and when interest rates rise.

Looking at market sectors, we judiciously purchased single-family housing bonds for all three Funds. We believe these bonds, as well as the Funds' holdings of U.S. guaranteed, pre-refunded bonds, should perform relatively well if interest rates rise. During the past year, we also found attractive opportunities in tobacco settlement bonds and the healthcare sector.

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

4

Given the current geopolitical and economic climate, maintaining strong credit quality remained a key requirement for the Funds. As of October 31, 2002, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 74% to 86%.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE FUNDS IN PARTICULAR?

In general, our outlook for the fixed income markets over the coming months remains positive. We believe the U.S. economy is headed for an eventual recovery, but one that may be slower to arrive and less robust than some are now predicting. We expect inflation and interest rates to remain relatively low over the near term, while new municipal volume should continue to be strong as issuers take advantage of the low rate environment for both new issues and refinancings. Currently, national issuance totals are on pace to surpass \$300 billion in 2002, eclipsing the record of \$292 billion set in 1993. We also expect demand for tax-exempt municipal bonds to remain solid as investors

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

continue to look for ways to rebalance their portfolios and reduce their overall investment risk.

Over the next two years, each of the Funds will continue to face some call exposure. Potential calls during 2003 and 2004 represent about 20% of all three Funds. As in the past we will continue to work through these calls on a case-by-case basis, holding some bonds until their call dates and selling others before their calls if we can get attractive prices. In all cases, we will be looking to reinvest the proceeds in the 20+ year portion of the yield curve in an effort to maintain diversity and enhance the future income stream and dividend-paying capabilities of the Funds. While the number of actual calls experienced by these Funds will depend largely on market interest rates over this time, we believe these potential call exposures are very manageable, and, given the expected abundant supply of municipal bonds, we foresee no problems in working through this period.

Additional specific areas of concentration in the months ahead will include managing duration by seeking to purchase more bonds in the 15- to 20-year part of the yield curve and working through the credit issues noted earlier. In general, our focus will remain on strategies that can add value for our shareholders and provide support for the Funds' dividends over time. Overall, we believe the attractive tax-free income, portfolio diversification, and risk reduction potential (for equity-dominated portfolios) represented by these Funds will continue to make them potentially valuable components in your long-term financial plans.

Notes to
FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The National Funds (the "Funds") covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Premium Income Municipal Fund, Inc. (NPI), Nuveen Premium Income Municipal Fund 2, Inc. (NPM) and Nuveen Premium Income Municipal Fund 4, Inc. (NPT).

Each Fund seeks to provide current income exempt from regular federal income tax by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities. The Funds are registered under the Investment Company Act of 1940 as closed-end, diversified management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors of the Funds or its designee may establish a fair value for the security. Temporary investments in

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At October 31, 2002, Premium Income 4 (NPT) had an outstanding when-issued purchase commitment of \$4,911,000. There were no such outstanding purchase commitments in Premium Income (NPI) or Premium Income 2 (NPM).

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Federal Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended October 31, 2002, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

43

Notes to

FINANCIAL STATEMENTS (continued)

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in more than one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of shares outstanding, by Series and in total, for each of the Funds is as follows:

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended October 31, 2002.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Change in Accounting Policy

As required, effective November 1, 2001, the Funds have adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. Prior to November 1, 2001, the Funds did not accrete taxable market discount on debt securities until they were sold. The cumulative effect of this accounting change had no impact on the total net assets applicable to Common shares or the Common share net asset values of the Funds, but resulted in an increase in the cost of securities and a corresponding decrease in net unrealized appreciation based on securities held by the Funds on November 1, 2001, as follows:

	PREMIUM INCOME (NPI)	PREMIUM INCOME 2 (NPM)	PREMIUM INCOME 4 (NPT)

=====			

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

The Statement of Changes in Net Assets and Financial Highlights for the prior periods have not been restated to reflect this change in presentation.

The net effect of this change for the fiscal year ended October 31, 2002, was to increase investment income with a corresponding decrease in net unrealized appreciation as follows:

	PREMIUM INCOME (NPI)	PREMIUM INCOME 2 (NPM)	PREMIUM INCOME 4 (NPT)
	\$183,475	\$148,591	\$197,521

Classification and Measurement of Redeemable Securities

The Funds have adopted the classification requirement of EITF D-98, Classification and Measurement of Redeemable Securities. EITF D-98 requires that Preferred shares, at liquidation value, be presented separately in the Statement of Assets and Liabilities. Accordingly, certain reclassifications have been made to the financial statements and financial highlights for all prior periods presented. The adoption of EITF D-98 had no impact on the Funds' Common share net asset values.

Certain investments owned by the Funds are either covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (59% for Premium Income (NPI), 53% for Premium Income 2 (NPM) and 48% for Premium Income 4 (NPT)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Funds' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Fund.

Build Your Wealth
AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times

Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-30D

when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the twelve-month period ended October 31, 2002. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
