Ohio Valley Banc Corp Continues Earnings Growth

Edgar Filing: OHIO VALLEY BANC CORP - Form 8-K

Ohio Valley Banc Corp [Nasdaq: OVBC] reported consolidated net earnings for the quarter ended June 30, 2003, of \$1,573,000 representing an increase of 16.3 percent over the same time period last year. Earnings per share for the second quarter of 2003 were \$.45, up 15.4 percent from the \$.39 earned the second quarter of 2002. For the six months ended June 30, 2003, consolidated net earnings were \$3,032,000, up 16.4 percent compared to \$2,605,000 a year ago. Earnings per share were \$.87 for 2003 versus \$.75 last year, an increase of 16.0 percent.

OVBC's earnings represent another quarter of solid growth despite a challenging economic environment. The double-digit earnings growth was driven by an increase in revenue sources combined with a decline in operating expenses. For the second quarter of 2003, net interest income increased \$285,000 or 4.3 percent over the prior year second quarter. For the six months ended June 30, 2003, net interest income improved \$828,000 or 6.3 percent over the prior year. For the first half of 2003, the net interest margin was 4.36 percent compared to 4.40 percent for the same time period last year.

Providing additional revenue growth was positive gains in noninterest income. For the three months ended June 30, 2003, noninterest income increased \$114,000 over the prior year second quarter and on a year-to-date basis noninterest income was up \$280,000 or 10.4% from 2002. The growth in noninterest income came from the sales of secondary market real estate loans which generated an additional \$331,000 in revenue over the prior year.

For the second quarter of 2003, noninterest expense totaled \$5,039,000, which is a decline of \$371,000 or 6.9 percent compared to the same time period last year. On a year-to-date basis, noninterest expense totaled \$9,963,000 in 2003, a decrease of \$220,000 compared to \$10,183,000 the previous year. Salaries and employee benefits grew \$363,000 or 6.8 percent for the first six months of 2003, as compared to the same time period in 2002. The increase was related to annual merit increases and the rising cost of medical insurance. Contributing to the decline in other noninterest expense was the charge off of fraudulent checks during the second quarter of 2002 with the impact net of recoveries being \$454,000. The remaining noninterest expense categories are collectively down from 2002. OVBC's efficiency ratio continues to improve driven by revenue growth of 7.0 percent versus a decrease in total expense of 2.2 percent. The efficiency ratio was 58.4 percent for the first half of 2003, as compared to 63.4 percent the prior year.

For the six months ended 2003, the Company's provision for loan losses increased \$678,000 over the same time period last year. Nonperforming loans as a percent of total loans decreased to 1.08 percent at June 30, 2003, compared to 1.44 percent at year end 2002. However, nonperforming assets to total assets increased to 1.36 percent at June 30, 2003 from 1.21 percent at December 31, 2002. The decrease in nonperforming loans and increase in nonperforming assets was in relation to two commercial loans moving from nonaccrual status to other real

estate owned. Net charge-offs for the first half of 2003 were up \$902,000 from the same time period last year which occurred primarily in commercial loans. The allowance for loan losses was 1.32 percent of total loans at June 30, 2003, as compared to 1.26 percent on December 31, 2002. Based on the evaluation of the adequacy of the allowance for loan losses, management feels that the allowance for loan losses is adequate to absorb probable losses in the portfolio.

Total assets increased \$2,290,000 from year end 2002 to reach \$698,646,000 at June 30, 2002. Asset growth in 2003 has been challenged by a decline in loan demand combined with more emphasis placed on selling long-term, fixed rate residential real estate loans into the secondary market to reduce interest rate

Edgar Filing: OHIO VALLEY BANC CORP - Form 8-K

risk. The real estate loan portfolio is down \$12,633,000 from year end. Commercial loans have increased modestly by \$7,972,000 and installment loans have been relatively level since year end. OVBC's funding growth has occurred mostly in retail deposits. Interest-bearing deposits grew \$9,337,000 led by savings and NOW accounts. Furthermore, checking account balances are up \$4,064,000. Offsetting the increase in retail deposits was a decline in repurchase agreements of \$7,717,000 and other borrowed funds of \$6,344,000.

President and CEO Jeff Smith stated, "We are pleased with the double-digit earnings growth delivered by our employees which continues our commitment to improving shareholder total cumulative return. The Company's improved efficiency has enhanced return on equity which improved to 11.95 percent for the six months ended June 30, 2003 versus 11.20 percent for the first six months of 2002."

Ohio Valley Banc Corp common stock is traded on the NASDAQ Stock Market under the symbol OVBC. The holding company owns three subsidiaries: Ohio Valley Bank, with 17 offices in Ohio and West Virginia; Loan Central, with five consumer finance offices in Ohio, and Ohio Valley Financial Services, an insurance agency based in Jackson, Ohio.
