(Zip Code)

Registrant's Telephone Number, Including Area Code: (269) 567-2900

Securities registered pursuant to Section 12(b) of the Securities Exchange Act: None

Securities registered pursuant to Section 12(g) of the Securities Exchange Act:

Common Stock, No Par Value

(Title of Class)

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes \_\_\_\_\_ No  X

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes \_\_\_\_\_ No  X

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  X  No \_\_\_\_\_

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. \_\_\_\_\_

Edgar Filing: MANATRON INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer (as defined in Exchange Act Rule 12b-2), an accelerated filer (as defined in Exchange Act Rule 12b-2) or a non-accelerated filer.

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes  No

The aggregate market value of the registrant's common equity held by non-affiliates based on the last sale price of such common equity on October 31, 2006, the last business day of the registrant's most recently completed second fiscal quarter: \$25,760,812.

---

Number of shares outstanding of the registrant's Common Stock, no par value (excluding treasury stock) as of July 13, 2007: 5,100,009.

**DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the definitive proxy statement for the registrant's annual meeting of shareholders to be held Thursday, October 11, 2007, are incorporated by reference into Part III of this report.

## **FORWARD-LOOKING STATEMENTS**

In addition to historical information, this Annual Report on Form 10-K contains forward-looking statements about the plans, strategies, objectives, goals or expectations of the Company. These forward-looking statements are based on management's beliefs, assumptions, current expectations, estimates and projections about the computer software and service business, worldwide economics and the Company itself. These forward-looking statements are made in reliance upon safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and involve important known and unknown risks, uncertainties, assumptions and other factors that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Some of these statements can be identified by phrases using "estimate," "anticipate," "believe," "project," "expect," "forecast," "is likely," "plan," "intend," "predict," "potential," "future," "may," "should," "will" and similar expressions or words. The Company's future results, performance or achievements may differ materially from the results, performance or achievements discussed in the forward-looking statements. There are numerous factors that could cause actual results to differ materially from what may be discussed in forward-looking statements, including those risk factors set forth in Item 1A of this Form 10-K, which are incorporated herein by reference.

Although the Company believes that the forward-looking statements contained in this Annual Report on Form 10-K are reasonable, the Company cannot provide any guarantee that the anticipated results will be achieved. All forward-looking statements in this Annual Report on Form 10-K are expressly qualified in their entirety by the cautionary statements contained in this section and readers are cautioned not to place undue reliance on the forward-looking statements contained in this Annual Report on Form 10-K. In addition to the risks listed above, other risks may arise in the future. Furthermore, the Company undertakes no obligation to update, amend or clarify forward-looking statements, whether as a result of new information, future events or otherwise.

## PART I

### Item 1. Business. General

Manatron, Inc. ("Manatron" or "the Company") is the nation's leading provider of property tax systems and services for state and local government. Manatron believes its software contains the latest in technology advancements and reflects the Company's 36 plus year heritage and experience in developing and supporting property tax software systems for this niche. Manatron's software and services enable state and local governments to maintain and update real and personal property values, create assessment and tax rolls, produce property tax bills, collect property tax payments, manage delinquent accounts, administer tax sales of property, provide Internet access to property information and conduct certain transactions such as the payment of property taxes over the Internet.

Manatron is a Michigan corporation and was founded in 1969 as a partnership. The Company was incorporated in Michigan in 1972 and went public in September of 1986. Manatron initially provided in-house data processing services for local governmental units located in Michigan, Illinois and Indiana. The Company's business was later extended into other states through a series of acquisitions and expanded to provide advanced proprietary microcomputer-based "turn-key" data processing systems for counties, cities and townships. These "turn-key" data processing systems included computer hardware produced by leading manufacturers at that time, such as Digital Equipment Corporation, IBM and Unisys. These "turn-key" systems also included proprietary software developed or purchased by the Company and all of the related implementation and ongoing maintenance and support services.

In the past, the Company's software addressed many of the back office needs of various local government officials such as the Assessor, Auditor, Clerk, Equalization Director, Recorder, Register of Deeds, Tax Collector and Treasurer. The Company offered a wide range of software products, such as accounting, budgeting, dog tags, fixed assets, payroll, utility billing, tax billing and collection, residential and commercial property assessment, personal property, child support, court management, court accounting, voter registration, land information, indexing and recording.

Beginning in 2002, the Company undertook a thorough review of its corporate vision, strategy and direction. In connection with that effort, the Company concluded that it needed to chart a new course for the future since computer hardware had become a commodity item with thin profit margins, the market for mass appraisal services did not present a lot of growth opportunities, and all of its software needed to be significantly updated and perhaps even rewritten due to technology advancements. Manatron also had aspirations of becoming a national company and felt that in order to be successful it needed to develop software that could be used in multiple states. Historically, many of the Company's software products were state specific, which resulted in duplicate sales, marketing, development and support efforts and costs in the Midwest and Southeast, the two major market areas at that time.

During this review, the Company noted that the market for new property tax and assessment systems appeared to present significant growth opportunities because among other things, the majority of state and local governments across the United States were using 20 year old technology, most of the competition had yet to invest in the latest technology, and property tax revenue was becoming the fiscal life line for county governments due to budget cutbacks and restraints. Since Manatron had a significant amount of property tax core competency and subject matter expertise in house and a large base of clients using its legacy property tax systems, the Company felt it could become the leader in this space with appropriate focus and investment. As a result, the Company began to focus exclusively on the property tax market and started to make significant investments in its property tax software, including its new suite

of software called Government Revenue Management® (GRM®) which is described later in this report. In connection with this new focus, the Company also sold its non-core financial and judicial product lines in 2003 and 2004, respectively.

Today, the Company's business is primarily focused on providing software and services to enable state and local governments in North America to completely, fairly and efficiently assess real and personal property, and to bill and collect the related property taxes in their jurisdiction. The Company's software solutions essentially enable state and local governments to more effectively serve their constituents by expediting the delivery of service through technology; ensuring security, accuracy and completeness of governmental documents and information; and increasing efficiency by reducing operational and administrative costs. The Company's strategy is to provide high quality, value-added software and services to its client base by leveraging a core technology framework across multiple product development efforts and state lines. This will allow the Company to maximize economies of scale and further leverage its costs across the business.

Manatron has over 1,300 client relationships in 30 states and two Canadian territories. The Company has made significant investments in marketing during the past three years and now enjoys a strong national brand recognition. The Company has long standing relationships with the majority of its clients and has a very high customer retention rate. In the last three years, the Company has added a number of significant new clients and opened new markets in Alaska, California, Colorado, Georgia, Idaho, Kansas, Minnesota, Nevada, South Carolina, Tennessee, Virginia and Washington. The Company intends to expand its customer base both within the current markets it is operating in, as well as new markets that can be entered profitably. The Company also plans to sell additional products and services to its current large client base and, more importantly, to preserve and grow its recurring revenue, which currently stands at approximately \$21.7 million annually.

Manatron has approximately 334 employees with over 3,000 years of subject matter expertise in the property tax market. The Company's strategy is to attract and retain high qualified employees and continue to increase its already leading industry property tax subject matter expertise. The Company also plans to continue to pursue selective strategic acquisitions as part of its growth strategy. When reviewing acquisition opportunities, the Company considers, among other things, the quality of the employees, the products and services which might complement its offerings, recurring revenue, opportunities for customer growth and market expansion, and whether the acquisition will be immediately accretive.

The Company's revenues are primarily generated from software license fees, professional services and sales of hardware, forms and supplies. Professional services consist of software maintenance, data conversions, installation, training, project management, hardware maintenance, forms processing and printing, consulting and appraisal services.

For financial information regarding the Company, see the financial statements of the Company and the notes thereto, which are attached as Appendix A to this Form 10-K.

## **Products**

### *Historical Perspective*

The Company's current software product portfolio consists of over 50 distinct products that are used by auditors, assessors, treasurers, recorders, clerks and other elected officials in state and local government markets. This software portfolio, which had grown to nearly 250 products as a result of several acquisitions during the last 15 years, has been significantly reduced as a result of the Company's recent strategic decision to focus its efforts and direction on those software products and services that are

primarily related to property taxation and assessment. The Company anticipates that this number will continue to reduce as it continues to rationalize its product offering.

The Company had built its product portfolio using several different programming tools, including COBOL, BASIC, Clipper, FoxPro, Uniface and Admins. This variety of tools was a result of technology improvements over time, as well as differing decisions made by the various businesses that were acquired by the Company. These products utilize several different operating system platforms, including VMS, OS/400, MS-DOS and Microsoft Windows. Supporting this quantity of software products and variety of platforms is complex. As a result, the Company has focused its new product development activities on building a comprehensive suite of full life-cycle property applications known as the Government Revenue Management® (GRM®) suite. With this new suite of products, the Company seeks to provide state and local governments with advanced technology and usability features allowing them to more efficiently serve their taxpayers and other constituents.

### *Technology*

The Company has made a number of strategic platform decisions to ensure that its next-generation products are built using common technologies and to leverage the technical expertise from the internal and external resources it utilizes. While the product life-cycles vary from jurisdiction to jurisdiction, the Company has historically found that the life of products for state and local government ranges from 10 to 20 years.

The Company is building its new software products with certain, specific design themes. One important theme is database independence. Recognizing that its customer base has some level of built-in commitment to database technologies of choice, the Company has decided to support the popular relational database engines, such as Microsoft SQL Server and Oracle and has clients running in both of these environments. The Company continues to support existing Informix clients, as well.

With respect to operating environments, the Company's new software products are built to run on Microsoft operating system platforms, specifically the .NET Framework. Microsoft is the most common platform currently being used in the state and local government market. While the Company will support additional operating systems, such as IBM AIX, Linux and Sun Solaris for the relational database engine, the user interface and business rules components are being built for Microsoft Windows Server platform, the .NET Framework and Internet Information Server (web) platforms.

The Company's product development teams use a limited set of programming tools when building new products. In particular, Microsoft Visual Studio (C# and Visual C++) is the primary programming tool. The Company's analysts document certain designs in models and XML structures. Reporting is developed using an industry-leading reporting toolset, Crystal Reports from Crystal Decisions, along with the use of Microsoft Office technology. All web-based applications are being built on this same platform. The Company anticipates that integrated Geographic Information Systems (GIS) technology, representing a spatial view of the GRM® data, will be demanded more in the market as state and local governments continue to upgrade their legacy systems. As such, the Company is integrating GIS technologies from industry-leading providers, such as ESRI, with its own products to provide those features.

### *iFramework*

The Company's technology framework initiative, iFramework, provides a shared technical platform for all products in the GRM® suite. iFramework is built on Microsoft's .NET Framework v2.0 and provides a robust, long-term operating platform for all of the Company's products. In practice, it is a

pseudo-4GL targeted to provide a common infrastructure, look and feel, and to increase the productivity of its product development teams. In the future, the Company may choose to market the iFramework SDK (software development kit) to specific clients to allow them to extend or customize their implementation of the Company's applications. This decision will be based on market demand and associated costs of doing so.

This standard tool set along with technical productivity gains provided by the iFramework allows the Company's development teams to focus on solving business problems rather than constantly learning new programming skills. It also enables them to build and leverage re-usable components. The result of this strategy is a suite of products that are interoperable with other systems (such as desktop productivity applications, partner applications, state-sponsored systems, separate and disconnected systems via XML-based web services, and custom-written applications), a set of products that integrate tightly with the customers' operating environment, and a development force that is more productive and quickly able to bring new product features and extensions to market. In addition, the Internet-centric design of iFramework also enables the Company to offer a "software as service" model utilizing a completely hosted application service provider (ASP) solution; although, it remains unclear whether state and local governments will accept a hosted model for their mission-critical applications. The Company has applied for patents on select features of its GRM® technology.

The following is a general description of the features and functionality of the Company's major software product groups that it continues to develop or has made arrangements to resell. The Company specializes in keeping its application software in compliance with the varying requirements of state statutes. New development is primarily focused on the ongoing development of the GRM® software products and continuing to enhance and extend the suite as a whole. In connection with this effort, the Company plans to continue to rationalize its product portfolio as existing customers migrate to the new products, further leveraging costs across the organization.

#### *Manatron GRM® Products*

As pressure mounts on state and local government to improve services and reduce costs, previously isolated departments are faced with doing more with less. By integrating Recording, Tax Billing and Collection, Assessment and GIS, Manatron's GRM® suite of software allows the various departments to work together to achieve efficiencies and improve service. As a result, the Company has been re-engineering its entire property suite of software into an Enterprise Resource Planning (ERP) type application suite for state and local government. Manatron's GRM® software encompasses the Administration, Taxation, Assessment or Valuation, Recording and Mapping (GIS) of real and personal property. Clients can use the entire suite or opt to purchase only specific modules to integrate with their existing systems. Consistent with the technology process described previously, Manatron's GRM® software uses iFramework, component-based development and object-oriented analysis, design and programming. Manatron's GRM® software is designed from the ground up to be an integrated property management application. Its architecture is based on the Microsoft operating system and platform, and is designed with inherent interoperability with other Microsoft Windows-based applications, such as Microsoft Office. Manatron's GRM® software products are designed with database independence and have an n-tier architecture giving them broad scalability options and inherent Internet interoperability.

#### *Taxation*

Manatron Tax is a comprehensive property tax software system, which maintains, bills, collects, distributes and tracks real and personal properties and their associated taxes as well as other revenue sources for state and local government. Manatron Tax maintains multiple tax years, provides extensive security, and automates settlements, balances and roll-overs. Manatron Tax also manages real, personal,

mobile homes, mineral, motor vehicle and special assessments. It includes "On-line" and "What's This?" help, and provides easy-to-use "Wizards" and workflow to guide the user through multi-step or infrequently used processes. Manatron Tax provides user-defined tax units and rate tables, tracks property splits, combinations and transfers, and allows comprehensive searches and inquiries. It also automates delinquencies, tax sales, interest and penalty calculations, and incorporates a built-in report writer. The Company continues to grow market share and enter new markets with Manatron Tax. The latest version of Manatron Tax is built on Manatron iFramework and is 100% browser-based. Manatron GRM® Tax v8 is the consolidating product that has enabled the Company to have a single, leveraged code base for all of its tax/revenue clients, through time.

In addition, as a part of the Company's acquisition of ASIX Inc. ("ASIX"), it added the Ascend Tax system to its product portfolio. Ascend Tax is a full featured, Windows-based tax billing and collection system with robust GAAP-compliant accounting features built in. Ascend Tax is live in seven states and the Company continues to invest in the product to ensure it remains competitive in the markets for which it is targeted.

#### *Appraisal or Valuation*

Manatron CAMA is a comprehensive appraisal software product within the GRM® suite. It features a highly productive, integrated sketch package and an extremely accurate valuation engine for calculating property values. It is the most widely deployed and, nationally recognized CAMA software product available today.

With its powerful ProVal® valuation engine, Manatron CAMA offers all the traditional approaches to value, including the cost, market and income approaches, while conforming to strict national and international standards. It encapsulates advanced CAMA technology, provides integrated Assessment Administration, Mapping (GIS), and supports real and personal property valuation. It also features hearing scheduling and certified roll processing and maintenance, while adhering to the CAMA business rules that have been developed and refined over the last 30 years.

In addition to Manatron CAMA, through a partnership with DoxTek, Manatron provides a document imaging solution specifically for Indiana Assessors called Manatron iDox .

#### *Recording*

Manatron Recorder is a national application that meets the indexing, recording and retrieval standards for numerous types of documents, including deeds, mortgages, UCC financing statements, liens, vital records and military discharges in one simple-to-use application. Manatron Recorder includes receipting, cashiering, indexing, integrated imaging, workflow analysis, accounts receivable, escrow, public-inquiry and Internet access. It supports a variety of operating systems, hardware platforms, network configurations and relational databases. In addition, Manatron Recorder supports the storage of many types of data elements, including grantors and grantees, legal descriptions, associated document references, property addresses, parcel identification numbers and user defined data fields, as needed. County officials no longer have to look up records one at a time by party name or approximate time frame with the robust inquiry system that comes with Manatron Recorder. Rather, documents can be located by many different methods, including name, book, page or instrument number, platted or unplatted description, lot number, parcel number, property address, consideration amount, and index and date range.

### *Mapping/GIS*

The Company also has extensive GIS experience and accordingly, has built its property tax and assessment software so that the property data is spatially enabled for data analysis, property assessment calculations (for items such as agricultural soil use valuation) and general data validation. The Company views GIS as an inherently critical feature for its product line as a critical mass of the property tax market has already invested heavily in creating an electronic GIS database and now seeks to make use of that investment.

The Company has created partnerships with successful GIS vendors to offer these features and capabilities as part of the Manatron GRM® software suite. The Company expects to continue working closely with these GIS vendors to offer competitive products to its customers and publish open standards that will enable other qualified GIS vendors to integrate their own GIS technology with Manatron's GRM® suite of software.

### *Manatron eGovernment*

The Company's eGovernment products and services facilitate access to public information or provide e-commerce on the Internet. Taxpayers, industry professionals and others with Internet access can now review current, formatted information relevant to their needs without leaving their home or office, 24 hours a day, seven days a week. Manatron eGovernment products are web-based applications written using Microsoft's Internet technologies and a SQL Server database, which makes these products fast and full-featured. From custom themes and table-driven field labels to multi-language support, Manatron eGovernment clients can also customize their sites to their needs.

The key modules are:

- PropertyMax - Provides access to property information
- RecordMax - Provides access to deeds, vital records and other information that is recorded
- CollectMax - Provides a collection system for online payment of property taxes and other fees
- VoiceMax - Allows access to public information and services from a phone

The Company hosts its eGovernment applications for its customers in a secure, scalable web farm with full redundancy. The web farm includes audited/monitored Internet security, physical access security, triple redundant power backup and access to the Internet via three different backbone providers for quick uptime and security.

The Company distinguishes its eGovernment product line from many dot.com competitors by linking these products to its "back-office" software applications running in the various jurisdictions. This "end-to-end" solution minimizes errors and results in more accurate, up-to-date information via the Internet, bringing both the governmental units and the public or commercial consumer of the information closer together. This improved information access for the public and commercial users also frees the governmental units from their traditional roles of helping users gather information, which allows governmental officials to focus on improving the efficiency and effectiveness of other services.

### **Sale of Product Line**

Effective May 31, 2004, the Company sold all of the assets of its Judicial product line to MAXIMUS, Inc. As a result of the sale, MAXIMUS now owns all Gavel and WRITS products, including case management, court accounting, prosecution management, probation tracking, jury

management, child support and related judicial software. See Note 9 of the Notes to Financial Statements for further details.

## **Acquisitions**

### *ASIX Inc.*

Effective February 1, 2006, the Company acquired ASIX Inc. Founded in 1991, ASIX designed, developed and marketed Ascend , a comprehensive client/server-based assessment administration and property tax billing and collection system that was installed in 16 counties in Colorado, Illinois, Minnesota, Missouri, Nevada, Oregon and Washington. ASIX also provided professional services including installation, training, project management, data conversions and on-going maintenance and support in connection with sales of its property tax software.

### *Plexis Group, LLC*

Effective November 1, 2005, the Company acquired substantially all of the assets of the Plexis Group, LLC ("Plexis") and assumed the support and maintenance obligations of its software contracts. Formed in 2000 as a subsidiary of Beam, Longest & Neff, LLC, a 50-year-old engineering company, Plexis was an Indiana-based company that had long standing relationships with several Indiana counties. Plexis also provided property tax and GIS software and related services.

### *Visicraft Systems, Inc.*

Effective November 1, 2004, the Company acquired substantially all of the assets of VisiCraft Systems, Inc. ("Visicraft") and assumed the support and maintenance obligations of its software contracts. Founded in 1999, VisiCraft had contracts for its Windows-based VCS Property Tax Collection System with 23 counties and three cities in Georgia.

See Note 10 of the Notes to Financial Statements for further details on the Company's acquisitions.

## **Services**

In connection with the installation of its "turn-key" systems, the Company provides ongoing hardware integration and maintenance, project management, implementation services, conversions, training and other customer services. In addition, virtually all of the Company's software customers have a maintenance and support contract, which provides the Company with a significant source of recurring revenue. These services are generally provided under annual contracts, which automatically renew unless the customer provides notice of termination prior to their expiration. The billings for these services are normally based on a percentage of the software license fee, are paid in advance of the contract period and are increased annually.

The Company typically maintains an office in each region or state where it has a significant nucleus of customers, so it can more effectively respond to their needs. Each regional office includes customer service personnel who are able to assist with the installation of the Company's "turn-key" systems and provide technical support on site before and after the installation. The Company also has a number of customer service employees who work out of home offices. In addition, Company personnel respond on a daily basis to customer telephone inquiries regarding the use of Manatron systems.

Many of the software packages described above can be used in conjunction with software enhancement options, such as the use of a laser pen to decipher bar coding for efficient storage and

retrieval of information. In addition, laser printing and CD-ROM storage services are provided by the Company and through alliances with other companies. Laser printing and CD-ROM services reduce the amount of paper needed to store documents and, accordingly, save storage space. Laser printing produces copies that look like originals because data is printed electronically from magnetic computer tape onto paper, which results in improved print quality, and offers the option of multiple fonts and graphics. Through the use of laser printing and CD-ROM storage, Manatron's customers are able to keep historical data in a user's department, which permits retrieval and printing.

Manatron also provides mass revaluation appraisal services to local governments. A typical mass appraisal engagement is performed under a fixed-price contract over an 18- to 24-month time frame. Using the technology of its appraisal software products, Manatron has developed a flexible, innovative methodology for appraisal delivery, which enables it to service jurisdictions of any size and accommodate the specific requirements of an individual client. Through physical inspection, data collection, computer analysis and sound judgment of professional appraisers, Manatron calculates an assessed valuation of each parcel of property in a jurisdiction. Manatron supports these values on behalf of the jurisdiction through the hearings process and finalizes the tax rolls to enable the jurisdiction to create tax bills.

Manatron, through its acquisition of Plexis, offers emergency 911 address mapping services to its customer base. With the increased awareness of homeland security and availability of wireless funds in support of E911 projects, the Company views it as a growing service with which it has a rich heritage of success and experience.

## **Marketing**

The Company has been aggressively focusing its marketing efforts on positioning a single, consolidated brand image of its name, Manatron. This includes media advertising in select industry-specific publications, targeted direct mail, sales generation programs and participation in tradeshow and conferences. All aspects of the Company's name, products and marketing strategy reflect this focus. The Company develops user groups and provides industry and product research. The Company's marketing personnel are responsible for the development of product literature, newsletters, presentations and seminars for current and prospective customers. In cooperation with the sales and business development function, the product marketing department assists in responding to requests for proposals.

## **Sales and Business Development**

The Company primarily markets its products through a direct sales force who work out of the corporate, regional or home offices in Florida, Georgia, Illinois, Indiana, Michigan, North Carolina, Ohio, and Washington. Manatron continues to invest in organic business development activities across the country. In the Company's core markets, emphasis is on customer retention and market share improvement via improved account management functions focusing on customer success. In addition, emphasis is on providing outstanding software maintenance and support, excellent customer care, continuous updates to technology and product enhancements based upon evolving customer needs and software functionality.

In the Company's growth markets, a strategy of rapid market expansion is being employed by leveraging initial successful key customer implementations across the market as a whole. In this market segment, emphasis is on selling the value proposition of an experienced and proven company with a national presence, financial stability, superior technology, a modern solution to solve customer needs in that particular market and excellent customer care. Basic business development activity is planned and measured in terms of new customer contacts, demonstrations, implementation planning and rapid increase of market share.

The Company's emerging market emphasis starts with an evaluation of the new market. The competitive landscape, product fit, funding availability and the ability to win more than one or two clients are key factors that the Company considers when evaluating new markets. Investment in business development activity begins with discovery meetings with key prospects to gain an understanding of product requirements and specific common value propositions to the market. An emphasis is made to identify early, those jurisdictions with strong leadership capabilities that are looking for a new integrated commercial off-the-shelf solution for Real and Personal Property Tax Billing and Collection and CAMA. The goal of the emerging market is to quickly identify, contract, and implement one or two successful installations and then migrate the market from an emerging market to a growth market to cost effectively maximize the market potential as quickly as possible.

Currently, Manatron has focused its sales and business development activities into three core markets, several growth markets and a few key emerging markets, including California, for its integrated GRM® suite of software and related services. The sales cycles for state and local governments are generally long, often ranging from one to three years in duration, as many jurisdictions are slow to change, are required to go through a competitive bid process, have numerous constituents they need to satisfy and are currently faced with budget constraints.

### **Customer Base**

The Company's customers are primarily county, city and township governments in the United States. Revenue derived from Canada, which is the only other country in which the Company has customers, has accounted for less than 1% of the Company's total revenues for each of the last three fiscal years. As of April 30, 2007, the Company's 1,300 customers in 30 states and two Canadian territories were located in approximately 370 counties, 152 cities and 290 townships. There are approximately 3,000 counties, 19,000 cities and 16,000 townships in the United States. Within each of these governmental units, the Company generally works with elected officials such as tax collectors, auditors, treasurers, assessors, recorders and clerks. The Company's sales are highly dependent on the quality of the relationships it has with these elected officials within each county, city and township government, as well as their demand for its products and services. The Company does not believe that the loss of any single customer would have a materially adverse effect on the Company; however, a material decline in the Company's sales to various governments could have such an effect.

### **Competition**

Competition for the Company's software and related services is intense. The Company competes primarily on the basis of its name recognition, financial stability, industry expertise, technology, range and quality of products, reputation for providing excellent customer service and its commitment to its core values.

The Company's competitors are stratified into two distinct groups. The first group consists of small local software and service firms, which offer price competitive solutions or have developed long-term relationships with key governmental officials. Generally, these smaller firms do not have a significant infrastructure and thus have lower overhead costs in their business model. In addition, their focus is often only on one state and the smaller less-sophisticated jurisdictions within that state. In addition, many of these small local competitors do not offer integrated solutions and interface their product to other property systems within the state.

The second group of competitors that the Company competes with is a smaller group of larger, national companies such as Tyler Technologies, Colorado CustomWare, Patriot Properties, Associated Computer Systems (ACS) and Software Techniques. The Company would be adversely affected if a

large computer manufacturer, technology or professional service firm such as International Business Machines Corporation, Accenture Ltd., Bearing Point, Inc., Electronic Data Systems Corporation, CGI-AMS or Peoplesoft, Inc. were to decide to develop software for Real and Personal Property Tax Billing and Collection and Property Assessment. Furthermore, application software is developed periodically by or for public agencies for use by governments. If the funding and distribution of governmentally developed or funded software becomes more widespread, such products could compete with the Company's products. In addition, because there are now new tools and technologies available to speed up the development of software at reduced costs, increased price competition may be expected in the future.

Although state and local governments traditionally have lagged behind both the federal government and the private sector in computer automation, the application of microcomputer and personal computer technology to state and local governmental units recently has been subject to rapid development and change. The ability of the Company to develop new application software programs utilizing browser technology is critical to its ability to compete successfully. Manatron regularly reviews and updates its software to meet the needs of its customers and to ensure that the software can be utilized in connection with the new technologies that are available. In addition, the ability of Manatron to win new business and to successfully implement it on a timely basis, are additional critical success factors.

The most significant barriers to entry into the Company's market are subject-matter expertise, legislative requirements by state and/or county, unique competitive bid processes, bonding requirements, relationships with current and prospective customers and qualified personnel needed to design and develop software for the unique needs of state and local government.

## **Research and Development**

Manatron's success depends on its ability to respond quickly to changing technology, market demands and the needs of its customers. Manatron emphasizes research and development and has been investing significant amounts of its revenue for the last three years to support and further its role as the leader in the markets it serves. The Company's research and development expenditures relate primarily to the design, development, testing and deployment of computer software. Systems programming and support costs charged to expense were approximately \$7.4 million, \$8.9 million and \$7.8 million for the fiscal years ended April 30, 2007, 2006 and 2005, respectively. These amounts include the annual amortization expense associated with software that has been capitalized, which was \$1.2 million for fiscal 2007, \$1.7 million for fiscal 2006 and \$1.5 million for fiscal 2005. In addition, the Company capitalized approximately \$2.3 million, \$1.6 million and \$2.1 million of computer software development costs during fiscal 2007, 2006 and 2005, respectively.

Manatron has continued its investment in its GRM® software suite, including the iFramework toolset during fiscal 2007. A major goal is to have innovative software with a robust technology direction that supports emerging open standards, including XML-based web-services, true thin-client design, as well as support for the "Smart Client" initiative of Microsoft and other industry groups. Another goal is to produce a robust, highly-scalable, feature-rich suite of products built on a common, reliable, scalable architecture centered around Microsoft's .NET platform with inherent Internet capabilities. Through these efforts, the Company seeks to provide a product that it can deploy across its entire client-base and into new geography. The Company may pursue new market segments based on an ASP model and, accordingly, has been investing in that capability as well.

## **Suppliers**

The Company generally maintains more than one alternative supplier. All computers, peripherals, disks, printers, plotters, digitizers, operating system software, office automation software and other equipment required by the Company presently are available from at least two sources. Hardware is purchased on original equipment manufacturer or distributor terms at discounts from retail. The Company has not experienced any significant supply problems.

## **Backlog**

At April 30, 2007, the Company's backlog of orders for hardware, software and services was \$21.0 million, compared with \$23.0 million at April 30, 2006. This backlog value does not include recurring revenue associated with monthly, quarterly and annual maintenance and support, printing and processing contracts, which currently stands at approximately \$21.7 million annually and was 49% and 48% of net revenues for fiscal 2007 and 2006, respectively. Backlog for the Company's business can fluctuate significantly from quarter to quarter primarily because of the seasonality of government ordering patterns and lengthy sales cycles in this market. Accordingly, a comparison of backlog from quarter to quarter is not necessarily informative and may not be indicative of eventual actual shipments. See Management's Discussion and Analysis of Financial Condition and Results of Operations for further information concerning the Company's backlog of orders.

## **Intellectual Property**

The Company regards certain features of its operations, products and services to be confidential and proprietary and relies on measures such as contractual restrictions and trade secret laws to protect its intellectual property. Due to the rapid rate of technological development in the computer software industry, the Company heavily values the knowledge, ability and experience of the Company's employees, frequency of improvements and timeliness and quality of support services. The Company does not have any patents; however, it does have two patents pending associated with its iFramework toolset.

The Company incorporates programming on software disks to make unauthorized duplication of the software more difficult. The Company typically licenses its software products under exclusive license agreements, which are generally non-transferable and have a perpetual term. The Company does not generally provide source code to its customers. The Company has registered certain trademarks and may apply for registration of additional trademarks at appropriate times in the future.

## **Environmental**

Due to the nature of the Company's business, compliance with federal, state and local environmental laws and regulations governing discharges into the environment is not a significant issue nor is it expected to have a material effect upon future capital expenditures, earnings or the competitive position of the Company.

## **Employees**

As of July 1, 2007, the Company had 322 full-time employees and 12 temporary employees. Temporary employees generally do not receive the same benefits as regular full-time employees. An approximate breakdown of the Company's full-time employees is as follows:

Administrative	10%
Development	32%
Professional Services	53%
Sales and Marketing	5%
	<hr/>
TOTAL	100%
	<hr/>

**Available Information**

The Company's principal executive offices are located at 510 East Milham Avenue, Portage, Michigan 49002, its telephone number is (269) 567-2900 and its fax number is (269) 567-2930. The Company also has offices in Florida, Georgia, Illinois, Indiana, Minnesota, Ohio, Pennsylvania and Washington. Manatron files annual, quarterly and other reports, proxy statements and other information with the Securities and Exchange Commission ("SEC"), pursuant to the Securities Exchange Act of 1934. You may read and copy any materials Manatron files with the SEC at the SEC's Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and other information statements, and other information regarding issuers, including Manatron, that file electronically with the SEC. The address of the site is [www.sec.gov](http://www.sec.gov). The Company's website address is [www.manatron.com](http://www.manatron.com), where the Company makes available free of charge the Company's reports on Forms 10-K, 10-Q and 8-K, as well as any amendments to these reports, as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission.

**Item 1A. Risk Factors.**

***Fluctuation in our quarterly revenues may adversely affect our operating results.***

In each fiscal quarter our expense levels, operating costs, and hiring plans are based on projections of future revenues and are relatively fixed. If our actual revenues fall below expectations, we could experience a reduction in operating results. In addition, as with other software vendors, we may be required to delay revenue recognition into future periods, which could adversely impact our operating results. We have in the past had to, and in the future may have to, defer revenue recognition for license fees due to several factors, including whether:

License agreements include applications that are under development or other undelivered elements;

We must deliver services that are considered essential to the functionality of the software, including significant modifications, customization, or complex interfaces, which could delay product delivery or acceptance;

The transaction involves acceptance criteria;

The transaction involves contingent payment terms or fees;

We are required to accept a fixed-fee services contract; or

We are required to accept extended payment terms.

Because of the factors listed above and other specific requirements under generally accepted accounting principles in the United States for software revenue recognition, we must have very precise

terms in our license agreements in order to recognize revenue when we initially deliver and install software or perform services. Negotiation of mutually acceptable terms and conditions can extend the sales cycle, and sometimes we do not obtain terms and conditions that permit revenue recognition at the time of delivery or even as work on the project is completed.

In addition, a decline in information technology spending may result in a decrease in our revenues or lower our growth rate. A decline in the demand for information technology among our current and prospective customers may result in decreased revenues or a lower growth rate for us because our sales depend in part, on our customers' level of funding for new or additional information technology systems and services. Moreover, demand for our solutions may be reduced by a decline in overall demand for computer software and services. Accordingly, we cannot assure you that we will be able to increase or maintain our revenues.

***Compliance with changing regulation of corporate governance and public disclosure may result in additional expenses.***

Changing laws, regulations, and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new Securities and Exchange Commission regulations and NASDAQ rules, are creating uncertainty for companies such as ours. The costs required to comply with such evolving laws are difficult to predict. To maintain high standards of corporate governance and public disclosure, we intend to invest all reasonably necessary resources to comply with evolving standards. This investment may result in an unforeseen increase in general and administrative expenses and a diversion of management time and attention from revenue-generating activities, which may harm our business, financial condition, or results of operations.

***Increases in service revenue as a percentage of total revenues could decrease overall margins and adversely affect our operating results.***

We realize lower margins on software and service revenues than on license revenue. The majority of our contracts include both software licenses and professional services. Therefore, an increase in the percentage of software service and service revenue compared to license revenue could have a detrimental impact on our overall gross margins and could adversely affect operating results.

***Selling products and services into the public sector poses unique challenges.***

We derive substantially all of our revenues from sales of software and services to county and city governments. We expect that sales to state and local governments will continue to account for substantially all of our revenues in the future. We face many risks and challenges associated with contracting with governmental entities, including:

The sales cycle of governmental agencies are generally complex and lengthy;

Payments under some public sector contracts are subject to achieving implementation milestones, and we have had, and may in the future have, differences with customers as to whether milestones have been achieved;

Political resistance to the concept of government agencies contracting with third parties to provide information technology solutions;

Changes in legislation authorizing government's contracting with third parties;

The internal review process by governmental agencies for bid acceptance;

Changes to the bidding procedures by governmental agencies;

Changes in governmental administrations and personnel;

Limitations on governmental resources placed by budgetary restraints, which in some circumstances, may provide for a termination of executed contracts because of a lack of future funding; and

The general effect of economic downturns and other changes on state and local governments' ability to spend public funds on outsourcing arrangements.

Each of these risks is outside our control. If we fail to adequately adapt to these risks and uncertainties, our financial performance could be adversely affected. The open bidding process for governmental contracts creates uncertainty in predicting future contract awards. Many governmental agencies purchase products and services through an open bidding process. Generally, a governmental entity will publish an established list of requirements requesting potential vendors to propose solutions for the established requirements. To respond successfully to these requests for proposals, we must accurately estimate our cost structure for servicing a proposed contract, the time required to implement our software for the proposed client, and the likely terms of any other third party proposals submitted. We cannot guarantee that we will win any bids in the future through the request for proposal process, or that any winning bids will ultimately result in contracts on favorable terms. Our failure to secure contracts through the open bidding process, or to secure such contracts on favorable terms, may adversely affect our business, financial condition, and results of operations.

***Some of our present and future contracts are on a fixed-priced basis, which may adversely affect our profits if we:***

Fail to accurately estimate the resources and time required for an engagement;

Fail to effectively manage governmental agencies' and other customers' expectations regarding the scope of services to be delivered for an estimated price; and

Fail to timely complete fixed-price engagements within budget to the customers' satisfaction, and

Fail to get change orders approved by our clients, which approve additional fees for cost overruns that are due to circumstances beyond our control.

If we do not adequately assess these and other risks, we may be subject to cost overruns and penalties, which may harm our business, financial condition, or results of operations.

***We face significant competition from other vendors and potential new entrants into our markets.***

We believe we are the Nation's leading provider of integrated Property Tax and CAMA solutions for state and local governments. However, we face competition from a variety of software vendors that offer products and services similar to those offered by us, as well as from companies offering to develop custom software. We compete on the basis of a number of factors, including:

The attractiveness of the business strategy and services we offer;

The breadth of products and services we offer;

Our extensive subject matter expertise;

Price;

Our relationship with our 1,300 clients;

The quality and stability of our products and service;

Technological innovation;

Name recognition;

Our financial stability;

Our 36 plus year history;

Our culture and core values; and

Our ability to modify existing products and services to accommodate the particular needs of our customers.

We believe the market is highly fragmented with a large number of competitors that vary in size, geographic coverage, and overall product scope. Our competitors include large system integrators and software companies that focus on selected segments of the public sector market, and a significant number of smaller, privately held companies. Certain competitors have greater technical, marketing, and financial resources than we do. We cannot assure you that such competitors will not develop products or offer services that are superior to our products or services or that achieve greater market acceptance.

We also compete with internal, centralized information service departments of governmental entities, which requires us to persuade the end-user to stop the internal service and outsource to us. In addition, our customers may elect in the future to provide information management services internally through new or existing departments, which could reduce the market for our services.

We could face additional competition as other established and emerging companies enter the public sector software application market and new products and technologies are introduced. Increased competition could result in price reductions, fewer customer orders, reduced gross margins, and loss of market share. In addition, current and potential competitors may make strategic acquisitions or establish cooperative relationships among themselves or with third-parties, thereby increasing the ability of their products to address the needs of our prospective customers. It is possible that new competitors or alliances among current and new competitors may emerge and rapidly gain significant market share.

Further, competitive pressures could require us to reduce the price of our software licenses and related services. We cannot assure you that we will be able to compete successfully against current and future competitors, and the failure to do so would have a material adverse effect upon our business, operating results, and financial condition.

***We must respond to rapid technological and legislative changes to be competitive.***

The market for our products is characterized by rapid technological and legislative change, evolving industry standards in computer hardware and software technology, changes in customer requirements, and frequent new product introductions and enhancements. The introduction of products embodying new technologies and the emergence of new industry standards can render existing products obsolete and unmarketable.

In addition, the introduction of new legislation that requires our software to be modified can render our products obsolete and unmarketable. As a result, our future success will depend, in part, upon our ability to continue to enhance our existing products and develop or acquire new products in a timely manner that keep pace with technological developments, satisfy increasingly sophisticated customer requirements, and achieve market acceptance. We cannot assure you that we will successfully identify new product opportunities and develop and bring new products to market in a timely and cost-effective manner. Further, we cannot assure you that the products, capabilities, or technologies developed by others will not render our products or technologies obsolete or noncompetitive. If we are unable to develop or acquire on a timely and cost-effective basis new software products or enhancements to existing products, or if such new products or enhancements do not achieve market acceptance, our business, operating results, and financial condition may be materially adversely affected.

***Our failure to properly manage growth could adversely affect our business.***

We intend to continue expansion into new markets in the foreseeable future to pursue existing and potential market opportunities. This growth places a significant demand on management and operational resources. To manage growth effectively, we must implement and improve our operational systems, procedures, and controls on a timely basis. We must also identify, hire, train, and retain key managerial, technical and other qualified personnel. If we fail to implement these systems or employ and retain such qualified personnel, our business, financial condition, and results of operations may be materially adversely affected.

Our continued success will depend upon the availability and performance of our key management, sales, marketing, customer support, and product development personnel. The loss of key management or technical personnel could adversely affect us. We believe that our continued success will depend in large part upon our ability to attract, integrate, and retain such personnel. We have at times experienced and continue to experience difficulty in recruiting qualified personnel. Competition for qualified software development, sales, and other personnel is intense, and we cannot assure you that we will be successful in attracting and retaining such personnel.

***We may experience difficulties in executing our acquisition strategy.***

A significant portion of our growth has resulted from strategic acquisitions in new product and geographic markets. Although our future focus is on internal growth, we will continue to identify and pursue strategic acquisitions and alliances with suitable candidates. Our future success will depend, in part, on our ability to successfully integrate future acquisitions and other strategic alliances into our operations. Acquisitions may involve a number of special risks, including diversion of management's attention, failure to retain key acquired personnel, unanticipated events or circumstances, legal liabilities, and amortization of certain acquired intangible assets. Some, or all, of these risks could have a material adverse effect on our business, financial condition, and results of operations. Although we conduct due diligence reviews of potential acquisition candidates, we may not identify all material liabilities or risks related to acquisition candidates. There can be no assurance that any such strategic acquisitions or alliances will be accomplished on favorable terms or will result in profitable operations.

***We may be unable to protect our proprietary rights.***

Many of our product and service offerings incorporate proprietary information, trade secrets, know-how, and other intellectual property rights. We rely on a combination of contracts, copyrights, and trade secret laws to establish and protect our proprietary rights in our technology. We cannot be certain that we have taken all appropriate steps to deter misappropriation of our intellectual property. In addition, there has been significant litigation in the United States in recent years involving intellectual property rights. We are not currently involved in any material intellectual property litigation. We may, however, be a party to intellectual property litigation in the future to protect our proprietary information, trade secrets, know-how, and other intellectual property rights. Further, we cannot assure you that third parties will not assert infringement or misappropriation claims against us in the future with respect to current or future products. Any claims or litigation, with or without merit, could be time-consuming and result in costly litigation and diversion of management's attention. Further, any claims and litigation could cause product shipment delays or require us to enter into royalty or licensing arrangements. Such royalty or licensing arrangements, if required, may not be available on terms acceptable to us, if at all. Thus, litigation to defend and enforce our intellectual property rights could have a material adverse effect on our business, financial condition, and results of operations, regardless of the final outcome of such litigation.

***Our products are complex and we run the risk of delays, errors or defects with new product introductions or enhancements.***

Software products as complex as those developed by us may take longer to develop than initially planned and may contain errors or defects, especially when first introduced or when new versions or enhancements are released. Although we have not experienced material adverse effects resulting from any such delays, defects or errors to date, we cannot assure you that material delays, defects and errors will not occur in the future. Any such delays, errors and defects could result in loss of revenues or delay market acceptance. Our license agreements with our customers typically contain provisions designed to limit our exposure to potential liability claims. It is possible, however, that we may not always be able to negotiate such provisions in our contracts with customers or that the limitation of liability provisions contained in our license agreements may not be effective as a result of existing or future federal, state or local laws, ordinances, or judicial decisions. Although we maintain errors and omissions and general liability insurance, and we try to structure our contracts to include limitations on liability, we cannot assure you that a successful claim could not be made or would not have a material adverse effect on our business, financial condition, and results of operations.

***Changes in the insurance markets may affect our ability to win some contract awards and may lead to increased expenses.***

Some of our customers require that we secure bid and performance bonds before they will select us as their vendor. The number of qualified, high-rated insurance companies that offer bid and performance bonds has decreased in recent years, while the costs associated with securing these bonds has increased dramatically. In addition, we may be required to issue a letter of credit as security for the issuance of a performance bond. Each letter of credit we issue without corresponding cash collateral would reduce our borrowing capacity under our senior secured credit agreement. We cannot guarantee that we will be able to secure such bid and performance bonds in the future on terms that are favorable to us, if at all. Our inability to obtain performance bonds on favorable terms or at all could impact our future ability to win some contract awards, particularly the large contracts, which could have a material adverse effect on our business, financial condition, and results of operations. Recent volatility in the stock markets, increasing shareholder litigation, the adoption of expansive legislation that redefines corporate controls (in particular, legislation adopted to prevent future corporate and accounting scandals), as well as

other factors have recently led to significant increases in premiums for directors' and officers' liability insurance. The number of insurers offering directors and officers insurance at competitive rates has also decreased in recent years. We cannot predict when the insurance market for such coverage will stabilize, if at all. The continued volatility of the insurance market may result in future increases in our general and administrative expenses, which may adversely affect future operating results.

***The market price of our common stock may be volatile and may be significantly affected by many different factors. Some examples of factors that can have a significant impact on our stock price include:***

Actual or anticipated fluctuations in our operating results;

The relatively small number of shares we have outstanding, as well as the low volume of shares that trade daily could result in significant price fluctuations if one or more large shareholders decide they want to sell a large block of our stock;

Announcements of technological innovations, new products, or new contracts by us or our competitors;

Developments with respect to patents, copyrights, or other proprietary rights;

Conditions and trends in the software and other technology industries;

Adoption of new accounting standards affecting the software industry;

Changes in financial estimates by securities analysts; and

General market conditions and other factors.

In addition, the stock market has from time to time experienced significant price and volume fluctuations that have particularly affected the market prices for the common stock of technology companies. These broad market fluctuations may adversely affect the market price of our common stock. In the past, following periods of volatility in the market price of a particular company's securities, securities class action litigation has often been brought against that company. We cannot assure you that similar litigation will not occur in the future with respect to us. Such litigation could result in substantial costs and a diversion of management's attention and resources, which could have a material adverse effect upon our business, operating results, and financial condition. Historically, we have not paid dividends on our common stock. We have never declared or paid a cash dividend since we went public in 1986. We have however declared and issued three small stock dividends in 1992, 1993 and 1994. We intend to retain earnings for use in the operation and expansion of our business. We do not anticipate paying any cash dividends on our common stock in the foreseeable future. In addition, we may enter into credit agreements that could restrict our ability to pay cash dividends.

Provisions in our articles of incorporation, bylaws, and Michigan law could deter takeover attempts. Our board of directors has approved a preferred stock purchase rights plan (see note 8 of the Notes to Consolidated Financial Statements). Under this plan, the Board has declared a dividend distribution of one preferred stock purchase right on each outstanding share of common stock. These rights contain a number of advantages that may be invoked if a person or group who does not hold 20% or more of Manatron's outstanding common stock subsequently acquires 20% or more of the stock. The rights of the holders of our common stock will be subject to, and may be adversely affected by, the rights

of the holders of any preferred stock that may be issued in the future. The issuance of preferred stock may make it more difficult for a third party to acquire a majority of our outstanding voting stock. In addition, some provisions of our articles of incorporation, bylaws and of Michigan general corporate law could also delay, prevent, or make more difficult a merger, tender offer, or proxy contest involving us.

This list provides examples of factors that could affect the results described by forward-looking statements contained in this Annual Report on Form 10-K. However, this list is not intended to be exhaustive; many other factors could impact the Company's business and it is impossible to predict with any accuracy which factors could result in which negative impacts.

**Item 2. Properties.**

The Company's principal executive and administration offices are located in a building owned by Manatron in Portage, Michigan, which consists of approximately 50,000 square feet, a portion of which is subleased to a non-affiliated business. The Company leases office space in Florida, Georgia, Illinois, Indiana, Minnesota, Ohio, Pennsylvania and Washington. Rental payments for the Company's leased office space for the fiscal year ended April 30, 2007, totaled approximately \$1,130,000.

Management considers all of its offices to be well maintained, in good operating condition and suitable and adequate for their intended purposes.

**Item 3. Legal Proceedings.**

The Company is not a party to any material pending legal proceedings other than routine litigation incidental to its business. While the ultimate effect of such litigation cannot be predicted with certainty, management believes that the liabilities resulting from these proceedings, if any, will not be material to the Company's financial position or results of operations. See Note 12 to the Financial Statements for additional information concerning legal proceedings, contingent liabilities and guarantees involving the Company, which is incorporated herein by reference.

**Item 4. Submission of Matters to a Vote of Security Holders.**

No matter was submitted during the fourth quarter of the fiscal year covered by this Annual Report on Form 10-K to a vote of security holders, through the solicitation of proxies or otherwise.

**Supplemental Item.      Executive Officers of the Registrant.**

Executive officers of the Company are generally elected by the Board of Directors at its organizational meeting following the annual meeting of shareholders and serve until their successors are elected and qualified. All executive officers serve at the discretion of the Board of Directors of the Company, or if not appointed by the Board of Directors, they serve at the discretion of management.

The following information includes the names and ages of the executive officers of the Company who are not directors as of the date of this Annual Report on Form 10-K, the officers' present position with the Company and the business experience of the officers for at least the past five years. None of the executive officers' past employers were affiliates of the Company.

*Mary Nestell Gephart* (age 48) has been Vice President of Human Resources and Administration since July of 2002. Ms. Gephart joined the Company in 1994 as the Manager of Human Resources and served in that position until 1998 when she was promoted to Director of Human Resources. Ms. Gephart is primarily responsible for all aspects of human resources and administration including compliance with employment laws and regulations, talent and performance management, professional development and training, compensation, benefits, employee relations and corporate culture.

*Krista L. Inosencio* (age 33) has been the Chief Financial Officer since July of 2002. Ms. Inosencio joined the Company in March of 2000 as the Director of Accounting and Finance. Prior to joining the Company, Ms. Inosencio was employed by Arthur Andersen LLP within the audit division. She is primarily responsible for accounting, banking, corporate governance, insurance, financial reporting, securities compliance and taxes.

*G. William McKinzie* (age 41) has been Chief Operating Officer since July of 2002 and was promoted to President and Chief Operating Officer in July of 2006. Prior to joining Manatron, Mr. McKinzie spent eight years in various information technology positions at Kellogg Company, a leading global cereal, snack and specialty foods company, the last of which was Vice President of Information Services for their International Operations. Mr. McKinzie is responsible for the Company's strategy and overall business delivery.

*Early L. Stephens* (age 44) has been Chief Technology and Marketing Officer since October of 2003. Mr. Stephens rejoined the Company in June 1996 as its Chief Technology Officer. Mr. Stephens is primarily responsible for all software marketing, product management, including application design and marketing strategy, development and the establishment of technology standards for the Company's products and services.

*Marty A. Ulanski* (age 48) has been Vice President of Sales and Business Development since July 2003. Prior to joining the Company, Mr. Ulanski worked for Spartan Stores, Inc., a grocery retailer and distributor, where he served as the Senior Director of Application Development from 2000 to 2003 and the Director of Retail Information Technology Services from 1999 to 2000. Mr. Ulanski is primarily responsible for building a national sales team to effectively execute the Company's growth and account management strategies.

*Kurt J. Wagner* (age 47) has been President of the ASIX Subsidiary since Manatron acquired ASIX in February 2006. Mr. Wagner founded ASIX in 1991 where he served as the company's President and CEO. He is primarily responsible for managing the Company's delivery of software solutions and professional services.

**PART II****Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities.**

Manatron's common stock is traded is regularly quoted on The NASDAQ Global Market under the symbol "MANA."

The following table shows the range of high and low bid information reported by The NASDAQ Global Market for the fiscal years ended April 30, 2007 and 2006:

<u>Quarter</u>	<u>2007</u>		<u>2006</u>	
	<u>Low</u>	<u>High</u>	<u>Low</u>	<u>High</u>
May - July	\$ 5.55	\$ 6.95	\$ 8.07	\$ 10.08
August - October	5.61	7.42	7.32	10.30
November - January	6.43	10.35	6.35	8.47
February - April	8.22	9.50	6.62	8.92

The Company historically has not paid cash dividends. The Company currently does not anticipate paying cash or stock dividends on its common stock in the foreseeable future, but instead intends to retain its earnings, if any, for the operation and expansion of the Company's business.

As of July 1, 2007, the Company's common stock was held by approximately 1,500 shareholders, approximately 200 of which were record holders.

See Item 12 of this Annual Report on Form 10-K for information regarding the Company's equity compensation plans, which is incorporated herein by reference.

**Issuer Purchases of Equity Securities**

A summary of the Company's purchases of its common stock during the fourth quarter of fiscal year 2007 is as follows:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)</u>
February 1 to February 28, 2007	--	--	--	617,261
March 1 to March 31, 2007	6,000	\$ 8.95	6,000	563,561
April 1 to April 30, 2007	--	--	--	563,561
<b>Total</b>	<b>6,000</b>	<b>\$ 8.95</b>	<b>6,000</b>	<b>563,561</b>

- On October 9, 2006, the Company announced that its Board of Directors authorized management to repurchase, over the course of the subsequent 12-month period, up to a total of \$1 million of its common stock in open market transactions. The program is currently set to expire October 8, 2007 and replaced the

previous repurchase plan announced September 13, 2005.

**Item 6. Selected Financial Data.**

The following table sets forth selected financial data of the Company for the last five fiscal years. It has been derived from and should be read in connection with the Company's Financial Statements, the related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing elsewhere in this Form 10-K or in Forms 10-K previously filed by the Company.

	<u>2007</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>
<b>Fiscal Years Ended April 30:</b>					
Net revenues	\$ 41,795,564	\$ 36,324,396	\$ 40,154,825	\$ 38,455,296	\$ 40,387,265
Gross profit	20,428,595	11,129,556	17,512,270	17,749,540	17,369,526
Income (loss) from operations	1,211,432	(6,894,822)	1,335,662	2,794,799	2,063,113
Net income (loss)	946,080	(4,316,659)	2,365,654	4,585,705	1,510,322
Basic earnings (loss) per share	.19	(.97)	.57	1.15	.40
Diluted earnings (loss) per share	.19	(.97)	.53	1.06	.38
<b>At April 30:</b>					
Cash and short-term investments	\$ 7,057,403	\$ 3,714,685	\$ 7,949,049	\$ 10,125,370	\$ 10,349,165
Total assets	41,333,652	44,421,964	37,801,200	32,882,639	31,330,567
Shareholders' equity	24,516,587	23,042,801	23,640,545	20,295,953	15,050,582
Long-term debt (1)	653,193	2,334,228	807,686	--	--
Book value per share (2)	4.82	4.53	5.28	4.75	3.64

- (1) The long-term debt reflected in this table consists solely of notes payable executed by the Company in connection with its recent acquisitions. Specifically, the February 2006 acquisition of ASIX Inc., the November 2005 acquisition of Plexis Group, LLC and the November 2004 acquisition of VisiCraft Systems, Inc. The Company had no other long-term debt during the periods covered by the table.

- (2) Book value per share was calculated by dividing total shareholders' equity by the sum of total shares outstanding and total shares pending issuance at the respective year ends.

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

The following section provides a narrative discussion about Manatron's financial condition, changes in financial condition and results of operations. The comments that follow should be read in conjunction with the Company's Financial Statements and related notes thereto appearing elsewhere in this Annual Report on Form 10-K.

**Critical Accounting Policies and Estimates**

The Company enters into contracts with customers to license or sell application software, third-party software, hardware and related professional services, such as data conversion, installation, training, project management, appraisal services, consulting services and post-contract maintenance and support ("PCS").

The Company recognizes revenue for contracts with multiple element software arrangements in accordance with Statement of Position ("SOP") 97-2, "Software Revenue Recognition," as amended. The Company allocates the total arrangement fee among each deliverable based on the relative fair value of each of the deliverables, determined based on vendor-specific objective evidence ("VSOE"). When discounts are offered in a software arrangement, the Company utilizes the residual method, as defined in SOP 97-2, and allocates revenue to the undelivered elements based on VSOE. The discount and remaining revenue are allocated to the delivered elements, which typically encompass the software and hardware components of the contract.

Certain of the Company's software arrangements involve "off-the-shelf" software and services that are not considered essential to the functionality of the software. For these arrangements, software revenue is recognized when the installation has occurred, customer acceptance is reasonably assured, the sales price represents an enforceable claim and is probable of collection, and the remaining services such as training and installation are considered nominal. Fees allocable to services under these arrangements are recognized as revenue as the services are performed.

Revenue related to sales of computer hardware and supplies is recognized when title passes, which is normally the shipping or installation date.

PCS includes telephone support, bug fixes, enhancements and rights to upgrades on a when-and-if available basis. These support fees are typically billed in advance on a monthly, quarterly or annual basis and are recognized as revenue ratably over the related contract periods.

Billings for Future Services, as reflected in the accompanying balance sheets, includes PCS and other services that have been billed to the customer in advance of performance.

For arrangements that include customization or modification of the software, or where software services are otherwise considered essential, or for software that is not generally available, revenue is recognized using contract accounting. Revenue from these arrangements is recognized using the percentage-of-completion method with progress-to-completion measured based primarily upon labor hours incurred. Revenue earned is based on the progress-to-completion percentage after giving effect to the most recent estimates of total cost. Changes to total estimated contract costs, if any, are recognized in the period they are determined. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. As of April 30, 2007 and 2006, the reserves for contract

losses, as well as billed retainages outstanding associated with revenue that has been recognized, were \$393,000 and \$979,000, respectively.

For its appraisal service projects, the Company recognizes revenue using the proportional performance method as the Company believes that each of its projects result in one ultimate deliverable, the appraised values of all properties defined within a given contract, and due to the fact that many of these projects are implemented over a one to three year period and consist of various activities. Under this method of revenue recognition, the Company identifies each activity for the appraisal project with a typical project generally calling for planning, data collection, data verification, data input, project management, abstracts and hearings. The costs for these activities are determined and the total contract value is then allocated to each activity based on the proportion of the budgeted cost for a given activity divided by the total budgeted cost for a project. Revenue recognition occurs for each activity based upon the proportional performance method, driven primarily by output measures such as parcels or hearings complete. Actual costs are expensed in the period in which they occur.

Since the timing of billings does not always coincide with revenue recognition, the Company reflects Revenues Earned in Excess of Billings and Retainages, as well as Billings in Excess of Revenues for contracts in process at the end of the reporting period, as reflected in the accompanying consolidated balance sheets.

Reserves against Accounts Receivable and reserves against Revenues Earned in Excess of Billings and Retainages are established based on the Company's collection history and other known risks associated with the related contracts. These reserves contain a general provision of 2%, as well as a specific provision for accounts the Company believes collection is not probable. Because of the nature of its customers, which are predominantly governmental entities, the Company does not generally incur losses resulting from the inability of its customers to make required payments. Alternatively, customers may become dissatisfied with the functionality of the software products and/or the quality of the services provided and as a result may withhold payment until they are satisfied. Management reviews significant past due accounts receivables on a quarterly basis and the related adequacy of the Company's reserves. As of April 30, 2007 and 2006, the Company's reserves for uncollectible accounts receivable and revenues earned in excess of billings and retainages were \$710,000 and \$527,000, respectively.

The Company's contracts do not typically contain a right of return or cancellation. For those that do, management reviews the adequacy of the Company's reserves for returns or cancellations on a quarterly basis. As of April 30, 2007 and 2006, these reserves for returns were not material.

Notes Receivable result from certain software contracts in which customers pay for the application software, hardware or related services over an extended period of time, generally three to five years. Interest on these notes ranges from 8% to 10%. The Company recognizes revenue for these contracts when the related elements are delivered, as the contract terms are fixed and determinable, and the Company has a longstanding history of collecting on the notes under the original payment terms without providing concessions. In addition, certain of the Company's contracts with customers include lease terms which meet the criteria of sales type leases as defined by Statement of Financial Accounting Standards No. 13, "Accounting for Leases." However, the Company's leasing activities are not a material part of its business activities and, accordingly, are not separately presented in the accompanying consolidated financial statements.

The Company has approximately \$12 million of goodwill recorded as of April 30, 2007 related to prior acquisitions. As more fully described in Note 2 of the Notes to Consolidated Financial Statements, goodwill is required to be reviewed for impairment at least annually and as indicators of impairment occur. The annual evaluation of goodwill impairment requires the use of estimates about the future cash

flows of each reporting unit to determine estimated fair values. Changes in forecasted operations and changes in discount rates can materially affect these estimates. The annual tests performed by the Company indicated that there is no impairment of goodwill.

As more fully described in Note 1 of the Notes to Consolidated Financials Statements, the Company capitalizes software development costs incurred subsequent to the establishment of technological feasibility on a specific software project. This intangible asset is amortized over an estimated useful life of not greater than five years. The unamortized balance of capitalized software is reviewed for impairment annually or whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable by calculating the net realizable value for each respective product. The net realizable value is the estimated future gross revenues from a product reduced by the estimated future costs of completing and disposing of that product. Changes in forecasted operations, driven primarily by market trends and customer demand, can materially affect the estimates of net realizable value.

Effective May 1, 2006, the Company adopted the fair value recognition provisions of FASB Statement No. 123(R), Share-Based Payment ("SFAS 123(R)") using the modified-prospective-transition method. Under SFAS 123(R), a public entity is required to measure the cost of employee services received in exchange for an award of equity instruments based on the fair value of the award on the grant date, with such cost recognized over the applicable vesting period. As a result of the current year adoption, the Company incurred approximately \$266,000 of additional compensation expense for the year ended April 30, 2007.

### **Results of Operations: Fiscal Year 2007 Compared to Fiscal Year 2006**

The Company's business is primarily focused on providing software and services to enable state and local governments in North America to completely, fairly and efficiently assess real and personal property, and to bill and collect the related property taxes in their jurisdiction. The Company's software manages the entire property life cycle, which includes deed indexing and recording, geographic information system (GIS) integration, maintenance and assessment of real and personal property values, tax billing and collection, delinquents, tax sales and e-government.

The Company's revenues are primarily generated from software license fees, professional services and sales of hardware and supplies. Professional services consist of software maintenance, data conversions, installation, training, project management, hardware maintenance, forms printing and processing, appraisal services and consulting services.

For simplicity purposes, many of the numbers described below are rounded; however, the percentage variations are based upon the actual amounts.

Total net revenues of \$10.1 million and \$41.8 million for the three months and year ended April 30, 2007 increased by \$171,000 or 1.7% and by \$5.5 million or 15.1%, respectively, in comparison to the \$9.9 million and \$36.3 million of net revenues that were reported for the three months and year ended April 30, 2006. These increases were primarily due to increases in the Company's application software license fees and recurring software maintenance fees offset by a decrease in professional services revenues.

Application software license fees increased by \$856,000 to \$1.3 million for the three months ended April 30, 2007 versus the \$455,000 of software license fees that were recognized for the three months ended April 30, 2006. For the year, application software license fees increased by \$2.7 million to \$5.3 million, from \$2.7 million for the year ended April 30, 2006. These increases were driven by several

property tax implementations in the Company's core markets of Florida, Indiana and Ohio during fiscal 2007, as well as the continued execution of the Company's GRM® implementations in Minnesota, Nevada, South Carolina, Tennessee and Virginia.

Recurring software maintenance fees increased by \$511,000 or 11.9% to \$4.8 million for the three months ended April 30, 2007 and by \$3.5 million or 23.5% from \$14.7 million to \$18.1 million for the year ended April 30, 2007 versus the prior year comparable periods. These increases are due to three factors. First, the acquisitions of Plexis on November 1, 2005 and ASIX on February 1, 2006, contributed \$2.0 million of new maintenance revenues for the year ended April 30, 2007. Second, annual price increases on the Company's software maintenance contracts initiated in the prior year primarily took effect January 1, 2007 and resulting in an increase in maintenance revenue of approximately \$325,000 and \$433,000 for the three months and year ended April 30, 2007 over the prior year comparable periods. Finally, new software maintenance has been initiated on several new GRM® implementations, as well as a number of other new accounts in the Company's core markets.

Professional services revenues decreased by \$803,000 or 18.0% to \$3.7 million for the three months ended April 30, 2007 versus \$4.5 million for the fourth quarter in the prior fiscal year. For the year ended April 30, 2007, professional services revenues decreased by \$182,000 or 1.1% to \$16.7 million from \$16.9 million for the prior fiscal year. These decreases were due to a reduction in appraisal services revenues. Appraisal services revenues decreased by \$918,000 and \$1.9 million for the three months and year ended April 30, 2007 respectively, versus the prior year comparable periods because of the cyclicity of that work, as well as increased competition for these services.

Software license fees and professional services revenues can vary significantly from quarter to quarter or year to year, as they are primarily driven by the Company's backlog, new sales, the timing of the related software implementations and the cyclicity of certain markets. In addition, many of the larger and more complex jurisdictions, which the Company is now able to pursue due to its new product and business strategy, often take more than a year to fully implement and a number of these contracts are accounted for using the percentage of completion method, which results in the license revenues being recognized over the implementation period.

As of April 30, 2007, the Company's backlog for software license fees and professional services was \$21.0 million compared to \$23.0 million at April 30, 2006. It should however be noted that the amounts for both periods include \$2.8 million related primarily with the second phase of the project with the City of Baltimore that the Company believes may not be realized in the future. The decrease in backlog versus the prior year is primarily due to a reduction in appraisal services, sales and backlog during fiscal 2007.

The Company's total sales for fiscal 2007 were actually \$1.6 million greater than the amount of contracts signed during fiscal 2006. Total sales or signed contracts for the twelve months ended April 30, 2007 totaled \$20.6 million versus \$19.0 million for the year ended April 30, 2006. The majority of the increase is due to new name accounts recently signed such as Vigo County, Indiana; Sedgewick County, Kansas; Wyandotte County, Kansas; Clay County, Missouri; four counties in Oregon; Clinton County, Pennsylvania; Beaufort County, South Carolina; and a number of upgrades in the Company's core markets of Florida, Indiana and Ohio. These backlog amounts are exclusive of the Company's recurring revenue from software maintenance, hardware maintenance and printing and processing contracts, which currently approximates \$21.7 million on an annualized basis.

The GRM® suite of software is a web-based, feature-rich, fully-integrated enterprise-level solution that has enabled Gwinnett County, Georgia; Kenai, Alaska; and several counties in Idaho to replace their legacy systems and to realize significant efficiencies and cost savings, provide more and

modern services to their constituents and, in most cases, to collect additional tax revenues, which will help to offset the cost of the GRM® system. The rollout of this new, next generation national product has been a key pillar in the Company's growth strategy. It is providing a competitive edge in the market as few, if any, other companies currently have a similar product suite. Historically, the Company had unique tax products for each state that it did business in. This required separate sales, marketing, development, and support initiatives. The Company expects to realize significant cost savings and economies of scale as it continues to market and implement GRM®.

Cost of revenues decreased by \$2.1 million or 30.4% from \$6.8 million to \$4.7 million for the three months ended April 30, 2007 versus the prior year quarter. Cost of revenues for the year ended April 30, 2007, also decreased by \$3.8 million or 15.2% from \$25.2 million to \$21.4 million even though revenues were \$5.5 million greater than the revenues posted for the prior year.

These decreases in cost of revenues were driven by four factors. First, the Company completed a restructuring effective April 26, 2006 (see Note 11 of Notes to the Consolidated Financial Statements), which has resulted in lower labor costs. In addition, the reduction in appraisal services revenues has also resulted in a decrease in the Company's payroll expense.

Second, outsourced labor has decreased by \$666,000 and \$1.4 million for the three months and year ended April 30, 2007, respectively, versus the prior year comparable periods, primarily because the prior year amounts included significant contracted labor expense related to the City of Baltimore implementation. As noted in prior filings, the City of Baltimore had delayed its "go live" date several times and in June of 2006 made the decision to delay once more until January 2007. This project evolved into a custom build solution versus the Commercial-Off-The-Shelf (COTS) product initially purchased. As a result, the Company has continued its negotiations with Unisys (the prime contractor) to address how the Company will be compensated for out-of-scope work performed since March 1, 2006. The Company released all subcontractors associated with the project and will not resume work until an agreement is in place to compensate the Company for prior work and any additional work to be performed in the future. The Company has not incurred any internal or external labor expense on this project since August 1, 2006, but did incur \$352,000 of outsourced labor with no associated revenue during the first quarter of fiscal 2007.

Third, effective May 1, 2006 the Company extended the useful life of its capitalized GRM® software development from three years to five years. Since GRM® is a national product, which will be implemented in many states and all of the clients will be using the same and single thread of code, the Company believes that its useful life is greater than the historic state-specific software that did not cross state boundaries. This change in accounting estimate has resulted in a reduction of software amortization expense during the current fiscal year of approximately \$502,000 before tax, \$340,000 after tax and \$0.07 per diluted share. Software amortization expense is included within the Company's cost of revenues.

Finally, cost of sales for the three months and year ended April 30, 2006 included approximately \$321,000 and \$420,000 of expense related to cost to complete accruals, whereas the three months and year ended April 30, 2007 did not include any related expense.

As a result of the increases in revenues and decreases in cost of revenues noted previously, gross margins have increased to 53.1% for the three months ended April 30, 2007 compared to 31.4% for the three months ended April 30, 2006. For the year ended April 30, 2007, gross margins have increased to 48.9% from 30.6%, versus the prior year. The margin improvements are primarily due to the increase in revenues and decrease in cost of sales as previously noted. In addition, a favorable change in the mix of revenues has resulted in gross margin improvements. The Company typically generates higher gross

margins on software license fees than service revenues and software license fees have increased substantially for both the quarter and year ended April 30, 2007 versus the comparable prior year periods.

Selling, general and administrative expenses increased by 3.9% to \$5.0 million for the three months ended April 30, 2007 and by 9.9% to \$19.2 million for the year ended April 30, 2007 versus the respective periods in the prior fiscal year. The increases over the prior year comparable periods are primarily due to four factors.

First, the amortization expense associated with the intangible assets acquired in connection with the acquisitions of VisiCraft, Plexis and ASIX. Intangible asset amortization was flat for the three months but increased by \$261,000 for the year ended April 30, 2007 over the prior year comparable period.

Second, deferred compensation expense increased by \$148,000 and \$337,000 for the three months and year ended April 30, 2007 over the prior year comparable period. This increase has resulted from the implementation of SFAS 123(R), Share-Based Payment effective May 1, 2006 which requires the Company to book compensation expense associated with stock option issuances as the Company issued 430,000 options to key members of its executive team during fiscal 2007.

Third, commission expense has increased by \$244,000 and \$596,000 for the three months and year ended April 30, 2007 over the prior year comparable periods because of the increase in signed contracts noted previously, as well as the implementation of a new commission structure for fiscal 2007.

Finally, the remaining increase in selling, general and administrative expenses is due to the addition of key sales, marketing and development personnel associated with the Plexis and ASIX acquisitions, offset by the decline attributable to the restructuring discussed in Note 11 of the Notes to the Consolidated Financial Statements.

As a result of the factors noted above, as well as the restructuring charge incurred during the three months and year ended April 30, 2006, the Company's operating income increased by \$2.6 million to \$311,000 for the three months ended April 30, 2007 from an operating loss of \$2.3 million for the fourth quarter in the prior fiscal year. In addition, operating income increased by \$8.1 million to \$1.2 million for the year ended April 30, 2007 from an operating loss of \$6.9 million for the prior fiscal year.

Net other income increased by \$125,000 and \$8,000 for the three months and year ended April 30, 2007 to \$95,000 and \$185,000, respectively. These amounts primarily consist of interest earned on the Company's cash balances and rental income on a portion of the Company's office space offset by interest expense. The increases from the prior year, specifically for the quarter, are due to reduced interest expense associated with seller financed notes as the Company paid \$2.9 million during fiscal 2007 against these notes. In addition, there was an increase in interest income as the Company had a higher average cash balance available in fiscal 2007.

The Company's provision or credit for income taxes generally fluctuates with the level of pretax income or loss. The effective tax rate was approximately 19.3% and 32.3% for the three months and year ended April 30, 2007, respectively. These amounts are inclusive of both federal and state tax provisions. The effective tax rate was approximately 31.4% and 35.7% for the three months and year ended April 30, 2006. The decreases over the prior year are due to changes in the estimates used to compute the fiscal 2006 income tax provision.

The Company reported net income of \$328,000 or \$0.06 per diluted share for the three months ended April 30, 2007 versus a net loss of \$1.6 million or \$0.33 per diluted share for the fourth quarter of

the prior fiscal year. Net income was \$946,000 or \$0.19 per diluted share for the year ended April 30, 2007 versus a net loss of \$4.3 million or \$0.97 per diluted share for the prior fiscal year. Net income for the year ended April 30, 2007 was positively impacted by \$340,000 or \$0.07 per diluted share due to the change in the estimated useful life of the Company's GRM® software, as noted previously, from three to five years.

Diluted weighted average outstanding common shares increased by approximately 353,000 shares for the three months ended April 30, 2007 and by 542,000 shares for the year ended April 30, 2007 over the prior year comparable periods. These increases were primarily due to the inclusion of the dilutive impact of stock options and restricted stock. The dilutive impact of stock options and restricted stock was excluded from the prior year comparable periods due to the losses reported for those periods.

### **Results of Operations: Fiscal Year 2006 Compared to Fiscal Year 2005**

Total net revenues of \$9.9 million for the three months ended April 30, 2006 decreased by \$1.9 million or 16.0% in comparison to the \$11.8 million of net revenues that were reported for the three months ended April 30, 2005. However, net revenues for the three months ended April 30, 2006 were 23.5% higher than the net revenues the Company reported for the three months ended April 30, 2005. Much of this increase was due to the acquisition of ASIX, which was completed on February 1, 2006. ASIX contributed \$1.4 million in net revenues for the three months ended April 30, 2006, which was down somewhat from its normal run rate due to the timing of its service contracts. Prior to the acquisition, for the year ended December 31, 2005, ASIX generated \$7.4 million in revenues and produced \$1.3 million in operating income.

Total net revenues of \$36.3 million for the year ended April 30, 2006 decreased by \$3.8 million or 9.5% from the total net revenues of \$40.2 million that were reported for the year ended April 30, 2005. The decreases in revenues for the three months and year ended April 30, 2006 were primarily due to reductions in software license fees and appraisal services revenues. These decreases were partially offset by increases in professional services revenues, and recurring support and maintenance revenues.

Software license revenues decreased by \$2.4 million or 84.0% to \$455,000 for the three months ended April 30, 2006 and by \$3.9 million or 59.2% to \$2.7 million for the year ended April 30, 2006 versus the three and twelve months ended April 30, 2005, respectively. Fiscal 2005 included significant license fees related to the Arizona Department of Revenue; Charlotte County, Florida; Duval County, Florida; Gwinnett County, Georgia; Belmont County, Ohio; Mahoning County, Ohio; Wood County, Ohio; Davidson County, Tennessee; and the City of Virginia Beach, Virginia. Fiscal 2006 software license revenues were negatively impacted by lower than expected sales.

The Company had planned for \$6 million of its fiscal 2006 software license and professional services revenue to come from contracts that were signed during fiscal 2006 in order to meet its financial plan. While the Company did have \$4.4 million of unearned license fees in its backlog as of the beginning of fiscal 2006, the Company was not able to recognize the full amount during fiscal 2006 due to the timing of several client implementations and the related product rollout plans. As a result, a significant portion of these amounts remained in the Company's backlog for fiscal 2007. Although there were no significant software license revenues recognized in fiscal 2006 like the Company had for fiscal 2005, the Company did recognize software license revenues from a number of important Tax and CAMA implementations. For example, fiscal 2006 included software license revenues from projects in Columbia County, Florida; Gwinnett County, Georgia; Bonneville County, Idaho; Perry County, Indiana; Marshall County, Indiana; Posey County, Indiana; Columbiana County, Ohio; Defiance County, Ohio; Licking County, Ohio and the City of Virginia Beach, Virginia.

Appraisal service revenues decreased by 15.3% from \$2.1 million to \$1.8 million for the three months ended April 30, 2006 and by 16.1% from \$8.3 million to \$7.0 million for the year ended April 30, 2006, versus the fiscal 2005 comparable periods. These decreases were anticipated as the Company had been at the low point of its appraisal services cycle, which was reflected in its backlog amounts. The Company's backlog for appraisal services decreased to \$7.9 million as it entered fiscal 2006 from \$13.0 million at the beginning of fiscal 2005. On the positive side, the Company did sign contracts for \$4.4 million of appraisal services work during fiscal 2006 compared to \$2.9 million for the prior fiscal year. The Company's backlog for appraisal services at April 30, 2006 was \$5.0 million.

Professional service revenues recognized during the three months ended April 30, 2006, decreased 2.4% from \$1.9 million to \$1.8 million. For fiscal 2006, professional service revenues increased by 4.3% from \$6.5 to \$6.8 million. The increase for fiscal 2006 was primarily due to change orders for additional services provided to the City of Baltimore during the first quarter of fiscal 2006 and the additional revenues contributed by ASIX during the fourth quarter of fiscal 2006.

Recurring software maintenance and support revenue increased by \$952,000 or 26.6% to \$4.5 million for the three months ended April 30, 2006 and by \$1.5 million or 10.2% to \$15.7 million for the year ended April 30, 2006 versus the fiscal 2005 comparable periods. These increases were the result of software implementations for new clients, price increases and the acquisitions of VisiCraft, Plexis and ASIX. (see Note 10 of the Notes to Consolidated Financial Statements).

Despite the upward movement in professional service revenues, and recurring software maintenance and support revenues, total net revenues were well below the Company's expectations. Two factors that significantly affect the Company's net revenues are backlog and current sales. Total signed contracts or sales for fiscal 2005 were \$7.9 million lower than the fiscal 2004 amount which negatively impacted the Company's backlog, as it entered fiscal 2006. As a result and as noted in previous reports, the Company had planned for approximately \$6 million of its fiscal 2006 revenues to come from contracts that were signed in that fiscal year in order to meet its financial plan. While the Company did sign several significant new contracts in fiscal 2006 as noted below, the nature, number and dollar amount of the contracts were not sufficient enough for the Company to meet its financial plan.

Total signed contracts or sales for the year ended April 30, 2006 were \$19.0 million compared to \$20.2 million for the year ended April 30, 2005. While the Company's sales results for fiscal 2006 were below the Company's expectations, the Company did sign a number of key contracts during fiscal 2006. Specifically, the Company signed a \$4.9 million contract with the Minnesota Counties Computer Cooperative ("MCCC") for the Company's GRM® Tax product. MCCC is a joint powers organization providing services, software, and other cost-effective measures to substantially reduce the cost of data processing for Minnesota counties. At that time, 49 of Minnesota's 87 counties were members of the MCCC Tax User Group. All of these counties work cooperatively under a single contract for property tax software and services. This was one of the most significant tax contracts in the history of the Company and only covered 27 of the 49 counties in the consortium. Additional counties are expected to sign up once the project is further along. In fact, Blue Earth County, which was not part of the consortium, also signed a Tax contract for \$400,000 during fiscal 2006. In addition, there will be future opportunities for the Company to sell complimentary products such as Manatron CAMA and Manatron Recorder to MCCC that will integrate with the Manatron GRM® Tax application.

Also included in the fiscal 2006 sales amount was a \$450,000 contract for the Company's first CAMA contract in Tennessee, with Williamson County; the Company's first major CAMA contract in the state of South Carolina from Horry County (Myrtle Beach) for \$725,000; a \$1.2 million appraisal services contract from Franklin County, Ohio; and its first property tax contract in Nevada from Washoe County (Reno) for \$2.3 million.

As of April 30, 2006, the Company's backlog for software and related services was \$18.0 million compared to \$15.6 million at April 30, 2005. The Company's backlog for appraisal services decreased to \$5.0 million at April 30, 2006 versus \$7.9 million at April 30, 2005. These backlog amounts are exclusive of the Company's recurring revenue from hardware maintenance, software support, e-government subscriptions, and printing and processing contracts which was approximately \$20.0 million on an annualized basis at April 30, 2006.

Fiscal 2006 was also highlighted by the successful launch of the Company's first full GRM® installation in Gwinnett County, Georgia. There has been a lot of discussion about the significance of this launch, as well as the importance of Gwinnett County in the Company's prior Form 10-Q filings. Gwinnett County started paying maintenance and support fees in fiscal 2006 and has been a positive reference site for prospective new GRM® customers, including MCCC and Washoe County.

In addition, the Company made significant progress on its Tax and Assessment products within the Ohio market during fiscal 2006. Defiance County, Ohio went live on the Company's integrated solution for Ohio in the fourth quarter. This was a major milestone for the Company in that it was the first implementation the Company has completed in less than 90 days for this product within the state of Ohio.

The Company also completed two acquisitions during fiscal 2006. Effective November 1, 2005, the Company completed the acquisition of Plexis Group (see Note 10 of the Notes to Consolidated Financial Statements). Plexis was generating over \$1 million in annual revenues, of which \$550,000 was from recurring software maintenance and support agreements when the Company acquired it. The Plexis acquisition provided key employees with subject matter expertise, who have helped cement the Company's leadership position in the Indiana market and improve the ongoing rollout of our GRM® solution nationwide.

Effective February 1, 2006, the Company completed the acquisition of ASIX Inc. (see Note 10 of the Notes to Consolidated Financial Statements). ASIX generated \$7.4 million in annual revenue, of which \$2.2 million was from recurring maintenance and support agreements. This acquisition provided the Company with immediate and better access to the California marketplace, which the Company has conservatively estimated to be valued at \$200 million. At that time, ASIX was a sub-contractor to BearingPoint, Inc., providing technical services and subject matter expertise in connection with a \$31 million project to develop a state-of-the-art property tax and assessment system for the County of San Diego. In connection with the County of San Diego project, BearingPoint and ASIX also entered into an exclusive joint marketing arrangement to provide the developed solution to other California counties.

The ASIX acquisition augmented the Company's capacity and capabilities in Minnesota, particularly on the MCCC and Blue Earth property tax contracts previously noted since ASIX had already completed a successful implementation of their property tax system in Anoka County, Minnesota. As a result, the Company has been leveraging ASIX's efforts and Minnesota expertise in these engagements, which has and will continue to facilitate the successful completion of these projects. The Company is also leveraging the knowledge and expertise ASIX has in Nevada as a result of its successful property tax implementation in Clark County (Las Vegas) particularly on the Washoe County (Reno) property tax implementation. Finally, ASIX personnel have been working collectively with Manatron in Illinois, Missouri and Oregon to accelerate the successful penetration of these markets.

Despite the decreases in revenues, cost of revenues increased by \$540,000 or 8.6% from \$6.3 million to \$6.8 million for the three months ended April 30, 2006. For fiscal 2006, cost of revenues increased by \$2.6 million or 11.3% from \$22.6 million for fiscal 2005, to \$25.2 million. These increases were driven by \$955,000 of additional subcontractor expense over fiscal 2005 primarily associated with

the City of Baltimore implementation. The Company incurred \$1.8 million of subcontractor expense during fiscal 2006 associated with Phase One of the City of Baltimore implementation. For the year ended April 30, 2006, the Company only recognized \$835,000 of revenue associated with this implementation and incurred \$2.5 million of total cost resulting in a loss from operations of \$1.6 million on this implementation alone.

As noted in prior filings, the City of Baltimore delayed its "go live" date several times. This project turned into a custom build solution versus the Commercial-Off-The-Shelf (COTS) product initially purchased.

As a result of the decrease in revenues and increased costs, the Company's gross margins decreased significantly to 31.4% for the three months ended April 30, 2006 from 47.0% for the three months ended April 30, 2005. For fiscal 2006, gross margins decreased to 30.6% versus 43.6% for the year ended April 30, 2005. Substantially all of the Company's costs of revenue are fixed in nature, and relate primarily to employees who are needed to implement and support the software. Thus, gross margins fluctuate significantly with increases or decreases in net revenues. As noted in previous filings, the Company had been investing in its people and building a new infrastructure which the Company believed was capable of supporting revenues up to \$50 million. When quarterly revenues drop below \$10 million, gross margins are dramatically impacted. On April 26, 2006, the Company restructured its business which resulted in the elimination of sixty-two positions or about 14% of the workforce level the Company had on February 1, 2006. In connection with the reorganization, the Company incurred a restructuring charge of \$532,421 for both the three months and year ended April 30, 2006 (see Note 11 of the Notes to Consolidated Financial Statements).

Selling, general and administrative expenses increased \$433,000 or 9.8% from \$4.4 million to \$4.9 million for the three months ended April 30, 2006 and \$1.3 million or 8.1% from \$16.2 million to \$17.5 million for the year ended April 30, 2006, in each case versus the prior year comparable periods. The increases were primarily due to the amortization expense associated with the intangible assets acquired in connection with the VisiCraft, Plexis and ASIX acquisitions (see Note 10 of the Notes to Consolidated Financial Statements). Amortization expense was \$241,000 and \$701,000 for the three months and year ended April 30, 2006 compared to \$112,000 and \$225,000, respectively, for the three and twelve months ended April 30, 2005. In addition, the Company had increased its spending on sales and marketing during fiscal 2006 primarily on regional and national trade shows and conferences and in various marketing publications to further position Manatron as the leading provider of property systems in North America. Finally, the Company's non-project related travel expenses in fiscal 2006 increased substantially over the prior year as the Company was pursuing business in new markets across the Country, particularly in California and Washington.

A substantial component of the Company's selling, general and administrative expenses is its research and development costs. These costs increased from \$2.2 million to \$2.4 million during the fourth quarter of fiscal 2006 and from \$7.8 million to \$8.9 million for the year ended April 30, 2006 versus the comparable periods in fiscal 2005. The increases in software development costs were primarily due to pay increases and additional personnel who were hired to accelerate the completion of the GRM® Suite of software.

As a result of the lower revenue, higher operating costs and restructuring charge, the Company reported an operating loss for the three months ended April 30, 2006 of \$2.3 million compared to operating income of \$1.1 million for the three months ended April 30, 2005. The Company also reported a loss from operations of \$6.9 million for the year ended April 30, 2006 versus income from operations of \$1.3 million for the year ended April 30, 2005.

As more fully described in Note 9 of the Notes to Consolidated Financial Statements, the Company recorded a non-recurring pre-tax gain of \$2.2 million in the first quarter of fiscal 2005 related to the sale of its Judicial Product line, which impacted the results for the year ended April 30, 2005. While this had no impact on the fiscal 2006 fourth quarter or full year, it did significantly benefit the fiscal 2005 results and therefore, should be excluded for comparison purposes.

Net other expense was \$29,000 for the three months ended April 30, 2006 compared to net other income of \$85,000 for the three months ended April 30, 2005. Net other income was \$178,000 and \$274,000 for the years ended April 30, 2006 and 2005, respectively. This income consisted of interest earned on the Company's cash balances, as well as rental income associated with the lease of a portion of the Company's corporate headquarters. The decreases for both the three months and year ended April 30, 2006 are primarily due to the additional interest expense the Company incurred in connection with seller financed notes payable related to the Company's acquisitions.

The Company's provision (credit) for income taxes generally fluctuates with the level of pre-tax income or loss. The effective tax rate was 31.4% and 40.4% for the three months ended April 30, 2006 and 2005, respectively. The effective tax rate was 35.7% and 38.5% for the years ended April 30, 2006 and 2005, respectively.

The Company reported a net loss of \$1.6 million or \$0.33 per diluted share for the three months ended April 30, 2006 versus net income of \$721,000 or \$0.16 per diluted share for the three months ended April 30, 2005. For the twelve months ended April 30, 2006, the Company reported a net loss of \$4.3 million or \$0.97 per diluted share versus net income of \$2.4 million or \$0.53 per diluted share for the twelve months ended April 30, 2005. Approximately \$1.4 million of the fiscal 2005 net income or \$0.31 per diluted share was attributable to the divestiture of the Judicial product line described in Note 9 of the Notes to Consolidated Financial Statements. The net gain on this sale was calculated using an effective tax rate of 38% for fiscal 2005.

Diluted weighted average outstanding common shares increased by approximately 299,000 and 15,000 shares for the three months and year ended April 30, 2006, respectively versus the fiscal 2005 comparable periods. These increases were primarily due to the 436,500 shares of Company stock issued in connection with the ASIX acquisition. In addition, due to the loss position for both the three months and year ended April 30, 2006, the Company utilized the weighted average basic shares outstanding for both the basic and diluted earnings per share calculations. Had the Company reported net income for these periods, diluted weighted average shares would have increased by 307,000 and 306,000 shares for the three months and year ended April 30, 2006 versus the respective prior year periods.

**Quarterly Results**

The following table sets forth selected unaudited quarterly financial data for the last eight quarters:

<b>For the quarter ended:</b>	Fiscal 2007			
	April 30, 2007	January 31, 2007	October 31, 2006	July 31, 2006
Net revenues	\$ 10,080,141	\$ 10,324,099	\$ 10,668,865	\$ 10,722,459
Gross profit	5,351,409	5,326,449	5,108,481	4,642,256
Income (loss) from operations	310,713	589,046	251,594	60,079
Net income (loss)	327,860	393,662	173,017	51,541
Basic earnings (loss) per share	.07	.08	.04	.01
Diluted earnings (loss) per share	.06	.08	.03	.01
<b>At quarter end:</b>				
Cash and short-term investments	7,057,403	4,009,764	4,336,930	1,585,107
Total assets	41,333,652	44,073,581	39,208,712	42,000,587
Shareholders' equity	24,516,587	23,870,753	23,551,086	23,249,775
Book value per share*	4.82	4.69	4.62	4.56

<b>For the quarter ended:</b>	Fiscal 2006			
	April 30, 2006	January 31, 2006	October 31, 2005	July 31, 2005
Net revenues	\$ 9,909,583	\$ 8,024,451	\$ 9,017,210	\$ 9,373,152
Gross profit	3,113,652	2,165,583	3,133,406	2,716,915

Edgar Filing: MANATRON INC - Form 10-K

Income (loss) from operations	(2,272,077)	(2,202,440)	(1,153,468)	(1,266,837)
Net income (loss)	(1,578,432)	(1,332,227)	(668,121)	(737,879)
Basic earnings (loss) per share	(.33)	(.31)	(.15)	(.17)
Diluted earnings (loss) per share	(.33)	(.31)	(.15)	(.17)
<b>At quarter end:</b>				
Cash and short-term investments	3,714,685	3,318,307	3,855,102	5,751,040
Total assets	44,421,964	38,260,758	33,250,728	35,504,209
Shareholders' equity	23,042,801	21,310,366	22,476,601	23,174,761
Book value per share*	4.53	4.70	4.97	5.13

\* Book value per share was calculated by dividing total shareholders' equity by the total shares outstanding at the end of the respective periods.

## Financial Condition and Liquidity

Working capital of \$5.1 million at April 30, 2007 increased by 9.2% compared to the \$4.7 million that was reported at April 30, 2006. These levels reflect current ratios of 1.33 and 1.25, respectively. The increase in both working capital and the current ratio is primarily due to the income reported for the twelve months ended April 30, 2007, as well as the positive cash flow generated from operations.

Shareholders' equity at April 30, 2007 increased by \$1.5 million to \$24.5 million from the balance reported at April 30, 2006. This increase was due to the net income reported for fiscal 2007 of \$946,000, \$200,000 related to the issuance of 65,000 shares of Company stock under stock purchase plans including the associated tax benefit from option exercises, \$787,000 of deferred compensation expense and \$30,000 of comprehensive income. These increases were offset by the repurchase of 60,975 shares of Company stock totaling \$490,000. Book value per share increased to \$4.82 as of April 30, 2007 from \$4.53 as of April 30, 2006. Book value per share was calculated by dividing total shareholders' equity by the sum of total shares outstanding and total shares pending issuance at the respective year ends.

Net capital expenditures decreased by approximately 6.5% or \$31,000 to \$443,000 for the fiscal year ended April 30, 2007 compared to \$473,000 for the prior fiscal year. The slight decrease in capital expenditures is primarily due to the restructuring activities that occurred on April 26, 2006. The Company has been able to redeploy internal hardware and software, which has reduced the need for new replacement equipment. These expenditures, as well as prior year expenditures, primarily relate to purchases or upgrades of computer hardware and software used by the Company's development and support personnel.

The Company has continued to invest significantly in its GRM® software suite, as well as its other software products in Indiana, Ohio and Florida. Total research and development costs included in expense were \$1.4 million and \$7.4 million for the fourth quarter and year ended April 30, 2007, respectively, compared to \$2.4 million and \$8.9 million of research and development costs included in expense for the respective prior year periods. These amounts include \$304,000 and \$1.2 million of software amortization expense for the fourth quarter and year ended April 30, 2007, respectively, and \$436,000 and \$1.7 million of amortization expense for the fourth quarter and year ended April 30, 2006, respectively. Software amortization expense is included in cost of sales. In addition, the Company capitalized approximately \$687,000 and \$2.3 million of development cost for the fourth quarter and year ended April 30, 2007 compared to \$354,000 and \$1.6 million for the respective prior year periods. The increases over the prior year are due to the Company's ability to focus its internal and external development efforts on its GRM® software suite. The prior year included significant development cost associated with completing contracts for products that were not capitalized, such as the product the Company developed for Baltimore, Maryland.

The Company has applied for patents on its iFramework toolset, which provides a shared technical platform for all Manatron software in the GRM® suite and is being built on Microsoft's .NET Framework. A major goal is to produce a feature-rich suite of software that can be deployed across the Company's entire client-base and into new geography. The Company has proven that this can be done with its CAMA software which is running in approximately 300 jurisdictions in over 20 states. Manatron's GRM® system has been implemented in Gwinnett County, Georgia; Kenai, Alaska and three Counties in Idaho. GRM® implementations are currently in process in the City of Virginia Beach, Virginia; Sedgwick and Wyandotte Kansas; Washoe County, Nevada; Horry County, South Carolina; Williamson, Tennessee and the states of Minnesota. The iFramework toolset will allow the software to be more easily modified to include additional jurisdictions as the Company enters new markets. A successful delivery of this GRM® software and concept starting with Gwinnett County, Georgia will allow the Company to leverage these significant investments across a broader base.

Since the Company's revenues are generated from contracts with state and local governmental entities, it is not uncommon for certain of its accounts receivable to remain outstanding for approximately three to four months, thereby having a negative impact upon cash flow.

On January 14, 2005, the Company entered into a Revolving Credit Loan Agreement (the "Credit Agreement") with Comerica Bank, which superseded and replaced the Company's previous credit agreement with the bank dated May 17, 2002. Under the Credit Agreement, Comerica Bank provided the Company with a \$6 million revolving line of credit. The Company's borrowing limit was no longer limited based on the ratio of the Company's funded debt to EBITDA, as was the case under the previous credit agreement. Any principal outstanding under the Credit Agreement would bear interest at a rate equal to the bank's prime rate less 0.5%. The Credit Agreement was unsecured and terminated on August 1, 2007, the date on which payment of any amounts owing under it were due. The Credit Agreement contained standard events of default and affirmative and negative covenants, which included the maintenance of financial ratios based on the Company's tangible-net-worth and debt, as well as on its current assets and liabilities. As of April 30, 2007 and 2006, the Company had no borrowings outstanding under either credit agreement.

Effective June 29, 2006, the Company amended its Revolving Credit Agreement with Comerica Bank. The amendment allows the Company to borrow up to \$10,000,000 through April 1, 2007, after which point the amount available was reduced to \$8,000,000. In addition, the Company's debt covenants were revised to account for its financial structure subsequent to the ASIX acquisition. As of April 30, 2007, the Company had no borrowings outstanding under this credit agreement and was in compliance with its covenants. The Company's current Credit Agreement terminates on August 1, 2007. The Company is currently in the process of renewing its Credit Agreement under similar terms and conditions.

The fourth quarter of fiscal 2007 was the Company's 23<sup>rd</sup> consecutive quarter with no bank debt. However, the Company has executed several seller financed notes payable in connection with its recent acquisitions of VisiCraft, Plexis and ASIX with the following maturities:

	Fiscal 2008	Fiscal 2009	Fiscal 2010
VisiCraft Systems, Inc.	\$300,000	\$253,193	--
ASIX Inc.	1,200,000	200,000	200,000
Total	\$1,500,000	\$453,193	\$200,000

Effective July 31, 2006, the Company paid the remaining \$400,000 outstanding under the note payable associated with the Plexis acquisition. The Company did this because the note accrued interest at prime plus 2% and the Company can borrow at prime less 0.5%. The interest rates on the remaining notes associated with the VisiCraft and ASIX acquisitions are favorable to the Company.

During the second quarter of fiscal 2007, the Company received approximately \$2 million in state and federal tax refunds generated from the losses the Company reported for fiscal 2006.

The Company's cash and investment balances increased by approximately \$3.3 million during the year ended April 30, 2007, which is primarily due to the \$9.3 million of cash provided by operating activities. The Company

anticipates that the line of credit, together with existing cash and short-term investments of approximately \$7.6 million, and cash generated from future operations, will be sufficient for the Company to meet its working capital requirements for the foreseeable future.

On October 5, 2006, the Board of Directors authorized the Company to repurchase up to \$1 million of the Company's common stock over the subsequent 12 months. The Company repurchased 52,299 shares under this program during the twelve months ended April 30, 2007 at an average price of \$8.35 per share totaling \$436,439. The Company repurchased 20,000 shares under a prior repurchase program, which expired on September 6, 2006, during the second quarter of fiscal 2006 at an average price of \$8.31 per share, totaling \$166,200.

The Board of Directors approved the Manatron, Inc. Supplemental Executive Retirement Plan (the "Plan") effective January 1, 2002, for certain executive officers and employees of the Company. Under this nonqualified Plan, the Company is obligated to contribute 5% of a participant's annual cash compensation to a Rabbi trust on behalf of the participants for a period of ten years. One-third of the contribution will become vested immediately when granted, the remaining two-thirds of the contribution will vest in equal increments over the next two years, on the first and second anniversaries of the grant date. Participants may also elect to make pre-tax contributions to the trust. Payments will begin on January 1<sup>st</sup> following the later of (i) a participant's termination of employment; or (ii) the participant's 55<sup>th</sup> birthday. The total amount charged to expense in fiscal 2007, 2006 and 2005 was approximately \$55,000, \$55,000 and \$47,000, respectively. As of April 30, 2007, 2006 and 2005, the total value of vested participant contributions was approximately \$228,000, \$174,000 and \$118,000, respectively.

The following table lists the Company's significant contractual obligations as of April 30, 2007, including the payments due by period:

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating leases	\$ 1,803,000	\$ 835,000	\$ 598,000	\$ 328,000	\$ 42,000
Notes payable	2,153,193	1,500,000	653,193	--	--
<b>Total</b>	<b>\$ 3,956,193</b>	<b>\$ 2,335,000</b>	<b>\$ 1,251,193</b>	<b>\$ 328,000</b>	<b>\$ 42,000</b>

The operating leases reported in this table are also reported in the immediately following section entitled "Off-Balance Sheet Arrangements."

### Off-Balance Sheet Arrangements

The Company has no significant off-balance sheet transactions other than operating leases for real estate. It also is not the Company's policy to issue guarantees to third parties. The Company's future contractual obligations for operating leases with initial terms greater than one year are summarized as follows for the next five fiscal years ended April 30:

<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>
\$ 835,000	\$ 320,000	\$ 278,000	\$ 201,000	\$ 127,000

The Company cannot precisely determine the effect of inflation on its business. The Company continues, however, to experience relatively stable costs for its inventory and equipment as the computer hardware market is very competitive. The Company anticipates that inflationary price increases related to labor and overhead will have a negative effect on cash flow and net income to the extent that the increases cannot be offset through improved

productivity and price increases.

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk.**

The Company's primary market risk exposure is a potential change in interest rates in connection with its outstanding line of credit. As of April 30, 2007, there were no borrowings outstanding under this line of credit. However, the Company does have the ability to draw on this line of credit, which could result in a potential interest rate risk. Based on the Company's historical borrowings, a change of 1% in interest rates would not have a material adverse effect on the Company's financial position. The Company does not enter into market risk sensitive instruments for trading purposes.

The Company does not believe that there has been a material change in the nature or categories of the primary market risk exposures or the particular markets that present the primary risk of loss to the Company. As of the date of this report, the Company does not know of or expect any material changes in the general nature of its primary market risk exposure in the near term. In this discussion, "near term" means a period of one year following the date of the most recent balance sheet contained in this report.

Prevailing interest rates and interest rate relationships are primarily determined by market factors that are beyond the Company's control. All information provided in response to this item consists of forward-looking statements. Reference is made to the section captioned "Forward-Looking Statements" before Part I of this Annual Report on Form 10-K for a discussion of the limitations on the Company's responsibility for such statements.

**Item 8. Financial Statements and Supplementary Data.**

The response to this Item is set forth in Appendix A of this Annual Report on Form 10-K and in Item 7 of this Annual Report on Form 10-K, each of which is incorporated herein by reference.

**Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.**

None.

**Item 9A(T). Controls and Procedures.**

**Disclosure Controls and Procedures**

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer, President and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by the Company in its filings under the Securities Exchange Act of 1934, such as this Annual Report on Form 10-K, is recorded, processed, summarized and reported within the time periods specified by the SEC. Disclosure controls and procedures include controls and procedures designed to ensure that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer, President and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Based on such evaluation, the Chief Executive Officer, President and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

## **Internal Control Over Financial Reporting**

There was no change in the Company's internal control over financial reporting that occurred during the fiscal quarter ended April 30, 2007 that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

## **PART III**

### **Item 10. Directors and Executive Officers of the Registrant.**

The Company's Audit Committee is comprised of three Board members who are independent under applicable regulations of the SEC and the National Association of Securities Dealers. The Audit Committee members each have financial and business experience with companies of substantial size and complexity and have a significant understanding of generally accepted accounting principles, financial statements, internal controls and audit committee functions. The Company's Board of Directors has determined that Mr. W. Scott Baker is an audit committee financial expert as defined under applicable regulations of the SEC. Additional information regarding the Audit Committee is provided in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, under the caption "Board Committees and Meetings" and is incorporated herein by reference.

The Company has adopted an Accounting and Finance Code of Ethics that applies to the Company's principal executive officer, principal financial officer and principal accounting officer. The Accounting and Finance Code of Ethics is available on the Company's website, <http://www.manatron.com>. The Company intends to satisfy the disclosure requirement under Form 8-K regarding an amendment to, or a waiver from, a provision of the Accounting and Finance Code of Ethics by posting such information on the Company's website.

The information regarding directors of the Company contained under the caption "Board of Directors" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference.

The information regarding directors and executive officers of the Company under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference. Additional information regarding executive officers is provided in the Supplemental Item following Item 4 in Part I of this Annual Report on Form 10-K and is incorporated herein by reference.

### **Item 11. Executive Compensation.**

The information contained under the captions "Compensation of Directors," "Executive Compensation," "Potential Payments Upon Termination or Change-in-Control," "Compensation Committee Report," and "Compensation Committee Interlocks and Insider Participation" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference.

**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters.**

The information contained under the captions "Voting Securities" and "Ownership of Common Stock" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference.

***Equity Compensation Plan Information***

The following table provides information about the Company's equity compensation plans regarding the number of securities to be issued under these plans, the weighted average exercise prices of options outstanding under these plans and the number of securities available for future issuance as of April 30, 2007:

<b>Plan Category</b>	<b>Number of securities to be issued upon exercise of outstanding options, warrants and rights</b>	<b>Weighted average exercise price of outstanding options, warrants and rights</b>	<b>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))(3)</b>
Equity compensation plans approved by shareholders(1)	828,000	\$ 6.54	442,975
Equity compensation plans not approved by shareholders(2)	--	Not applicable	4,400
<b>Total</b>	<b>828,000</b>	<b>\$ 6.54</b>	<b>447,375</b>

- (1) Consists of the Manatron, Inc. Restricted Stock Plan of 1987, the Manatron, Inc. 1989 Stock Option Plan, the Manatron, Inc. 1994 Long-Term Incentive Plan, the Manatron, Inc. 1995 Long-Term Incentive Plan, the Manatron, Inc. Restricted Stock Plan of 1998, the Manatron, Inc. Stock Incentive Plan of 1999, the Manatron, Inc. Executive Stock Plan of 2000, the Manatron, Inc. Stock Option and Restricted Stock Plan of 2003, the Manatron, Inc. Stock Option and Restricted Stock Plan of 2004 and the Manatron, Inc. 2006 Executive Stock Incentive Plan. Each plan for which aggregated information is provided contains customary anti-dilution provisions that are applicable in the event of a stock split, stock dividend or certain other changes in the Company's capitalization.
- (2) Consists of the Manatron, Inc. Restricted Stock Plan of 2000. This plan provides for the grant of restricted stock to certain employees, including software development and other technical-related employees. Directors and officers are not eligible to participate. The Compensation Committee has the power to select the participants to participate in the plan and sets the terms and conditions of the plan, based upon the recommendations of the Company's Chief Executive Officer. The terms and conditions of awards may vary among participants. No payment is required from a participant for an award of restricted stock. If a participant is no longer an employee of the Company or a subsidiary for any reason other than death, total

disability or any other reason

determined by the Compensation Committee, any shares of restricted stock not vested and still subject to restrictions on the date of termination are forfeited and must be returned to the Company. Unless the Compensation Committee otherwise consents or unless the terms of the restricted stock agreement provide otherwise, shares of restricted stock may not be sold, transferred or otherwise disposed of by a participant while they are still restricted ("Restricted Period") other than to the Company or by will or the laws of descent and distribution. The participants may not resell or redistribute the restricted stock after the Restricted Period except upon such conditions as the Company reasonably may specify to ensure compliance with federal and state securities laws. The Restricted Stock Plan of 2000 contains customary anti-dilution provisions that are applicable in the event of a stock split, stock dividend or certain other changes in the Company's capitalization.

- (3) The numbers of shares reflected in column (c) in the table above with respect to the Manatron, Inc. Restricted Stock Plan of 1987 (300 shares), the Manatron, Inc. Restricted Stock Plan of 1998 (600 shares), the Manatron, Inc. Stock Incentive Plan of 1999 (57,200 shares), the Manatron, Inc. Executive Stock Plan of 2000 (27,500 shares), the Manatron, Inc. Restricted Stock Plan of 2000 (4,400 shares), the Manatron, Inc. Stock Option and Restricted Stock Plan of 2003 (14,000 shares) and the Manatron, Inc. Stock Option and Restricted Stock Plan of 2004 (188,675 shares) represent shares that may be issued as a result of future stock option or restricted stock grants.

The numbers provided in this footnote and in column (c) will increase to the extent that options relating to the number of shares listed in column (a) of the table or outstanding shares of restricted or unrestricted stock previously issued under a plan are canceled, surrendered, modified, exchanged for substitutes or expire or terminate prior to exercise or vesting because any such number of shares will again become available for issuance under the plan under which the option or stock was granted.

**Item 13. Certain Relationships and Related Transactions.**

The information under the captions "Board Committees and Meetings," "Compensation Committee Interlocks and Insider Participation" and "Transactions with Related Persons" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference.

**Item 14. Principal Accounting Fees and Services.**

The information contained under the caption "Selection of Auditors" in the definitive Proxy Statement of the Company for its annual meeting of shareholders to be held October 11, 2007, is incorporated herein by reference.

**PART IV**

APPENDIX A

**MANATRON, INC.**

FINANCIAL STATEMENTS

TOGETHER WITH

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of  
Manatron, Inc.

We have audited the accompanying consolidated balance sheets of Manatron, Inc. and subsidiary as of April 30, 2007 and 2006, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended April 30, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Manatron, Inc. and subsidiary at April 30, 2007 and 2006, and the consolidated results of their operations and their cash flows for each of the three years in the period ended April 30, 2007, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 6 to the consolidated financial statements, in fiscal year 2007, Manatron, Inc. and subsidiary changed its method of accounting for share-based payments in connection with the required adoption of Statement of Financial Accounting Standards No. 123(R).

June 27, 2007

**Report of Independent Registered Public Accounting Firm  
on Financial Statement Schedule**

To the Board of Directors and Shareholders of  
Manatron, Inc.

We have audited the consolidated financial statements of Manatron, Inc. and subsidiary as of April 30, 2007 and 2006, and for each of the three years in the period ended April 30, 2007, and have issued our report thereon dated June 27, 2007 (included elsewhere in this Form 10-K). Our audits also included the financial statement schedule listed in Item 15(a)2 of this Form 10-K. This schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits.

In our opinion, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.
