Exhibit 99.1

Golar LNG - successfully completes new share issue

Golar LNG Limited (the “Company”) is pleased to advise that the Company on 16 November 2007 successfully completed a private placement of a total of 3.2 million new shares at a subscription price of NOK133.00 per share. Gross proceeds from the equity issue amounted to NOK425.6 million (equivalent to approximately US\$77.5 million). The total number of shares outstanding after the issue will be 67,576,866. The share issue was well oversubscribed.

The net proceeds from the private placement will be used to finance the equity portion of the purchase of the LNG Carrier “Granatina”. The Company sees this addition to its fleet as an attractive platform for the pursuit of further growth opportunities. Since this vessel is a sister ship of the Golar Winter, which is scheduled to be converted to a FSRU, the vessel is particularly well suited to FRSU projects.

Hemen Holding Limited, a company indirectly controlled by the Company’s chairman, John Fredriksen, underwrote the whole issue. No compensation was paid for the underwriting. World Shipholding Ltd, a company indirectly controlled by John Fredriksen, has increased its shareholding with 413,000 shares in connection with the issue. World Shipholding Ltd will after this control a total of 31,065,000 shares constituting 46.0 percent of the issued share capital.

Allocations will be communicated today. Payment date is set to Thursday 22 November 2007. The Managers intend to facilitate settlement by way of delivery of existing shares in the Company that are already listed on the Oslo Stock Exchange pursuant to a Stock Lending agreement entered into between the Managers and World Shipholding Ltd. Please note that shares subscribed for in reliance on Regulation S under the United States Securities Act of 1933 (as amended) may for a period of 40 days from the closing of the placement only be traded on the Oslo Stock Exchange.

---

The share issue was managed by Carnegie ASA and Fearnley Fonds ASA.
