SEANERGY MARITIME HOLDINGS CORP. REPORTS FINANCIAL RESULTS FOR THE FOURTH QUARTER AND TWELVE MONTHS ENDED DECEMBER 31, 2015

March 15, 2016 - Athens, Greece - Seanergy Maritime Holdings Corp. (the "Company") (NASDAQ:SHIP) announced today its financial results for the fourth quarter and twelve months ended December 31, 2015.

For the three months ended December 31, 2015, the Company generated net revenues of \$6.8 million. Total equity as of December 31, 2015 was \$23.3 million.

Stamatis Tsantanis, the Company's Chairman & Chief Executive Officer, stated:

"I am pleased to announce that in the fourth quarter of 2015, we successfully completed the \$185 million fleet acquisition that we signed in August of 2015. As a result, our fleet now consists of 6 Capesize and 2 Supramax vessels. In 2015, our cargo carrying capacity grew from zero to more than 1.1 million DWT."

"Seanergy's acquisition cost, which is among the lowest of our peers, coupled with our advantageous financing arrangements should provide significant upside potential for our investors. Looking forward, we firmly believe that current market conditions represent a unique opportunity to acquire quality tonnage at 30-year historical low prices. For that reason, we intend to pursue acquisition opportunities that we believe can further enhance value for our shareholders. We believe that Seanergy is the right platform in dry bulk listed space for further fleet expansion in order to capitalize on the recovery of the freight market and asset values."

Ownership days are the total number of days in a period during which the vessels in a fleet have been owned.

(1) Ownership days are an indicator of the size of the Company's fleet over a period and affect both the amount of revenues and the amount of expenses that the Company recorded during a period.

Available days are the number of ownership days less the aggregate number of days that vessels are off-hire due to major repairs, dry dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels should be capable of generating revenues. During the year ended December 31, 2015, the Company incurred 52 off-hire days for vessel surveys.

Operating days are the number of available days in a period less the aggregate number of days that vessels are off-hire for any reason, including off-hire days between successive voyages, as well as other unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues. In the three months ended December 31, 2015, the company incurred 99 off-hire days between voyages and zero off-hires due to other unforeseen circumstances. In the twelve months ended December 31, 2015, the company incurred 126 off-hire days between voyages and zero off-hires due to other unforeseen circumstances.

(4) Fleet utilization is the percentage of time that our vessels were generating revenue, and is determined by dividing operating days by ownership days for the relevant period.

TCE rate is defined as our net revenue less voyage expenses during a period divided by the number of our operating days during the period. Voyage expenses include port charges, bunker (fuel oil and diesel oil) expenses, canal charges and other commissions. We include TCE rate, a non-GAAP measure, as we believe it provides additional meaningful information in conjunction with net revenues from vessels, the most directly comparable US GAAP measure, because it assists our management in making decisions regarding the deployment and use of our vessels and in evaluating their financial performance. Our calculation of TCE rate may not be comparable to that reported by other companies. The following table reconciles our net revenues from vessels to TCE rate.

(In thousands of US Dollars, except operating days and TCE rate)

	Q4 2015	Q4 2014	FY 2015	FY 2014
Net revenues from vessels	6,822	-	11,223	2,010
Less: Voyage expenses	4,763	-	7,496	1,298
Net operating revenues	2,059	-	3,727	712
Operating days	409	N/A	598	142
TCE rate	5,034	N/A	6,232	5,014

Vessel operating expenses include crew costs, provisions, deck and engine stores, lubricants, insurance, maintenance and repairs. Vessel operating expenses before pre-delivery expenses exclude one-time pre-delivery and pre-joining expenses associated with initial crew manning and supply of stores of Company's vessels upon delivery. Daily Vessel Operating Expenses are calculated by dividing vessel operating expenses before pre-delivery expenses by ownership days for the relevant time periods. We include daily vessel operating (6) expenses, a non-GAAP measure, as we believe it provides additional meaningful information in conjunction with vessel operating expenses, the most directly comparable US GAAP measure, because it assists our management in making decisions regarding the assessment of our vessels' operational performance. Our calculation of daily vessel operating expenses may not be comparable to that reported by other companies. The following table reconciles our vessel operating expenses to daily vessel operating expenses.

(In thousands of US Dollars, except ownership days and Daily Vessel Operating Expenses)

	Q4 2015	Q4 2014	FY 2015	FY 2014

#### Subsequent Developments:

##### Amendments to the Revolving Convertible Promissory Note to the Sponsor

On January 27, 2016 and on March 7, 2016 the Company entered into a third and fourth amendment to the issued unsecured revolving convertible promissory note of September 7, 2015 as amended on December 1, 2015 and December 14, 2015. These amendments have increased the amount of the note to approximately \$16.3 million (the "Applicable Limit") and have further modified the amount by which the Applicable Limit is reduced to \$2.5 million on September 10, 2017 and each year on the anniversary of that date. As of today, the Company has drawn down the entire amount available under the note.

##### Reverse Stock Split and Nasdaq Compliance

On January 8, 2016 a 1-for-5 reverse split of the Company's common stock became effective and the common stock began trading on a split-adjusted basis on the NASDAQ Capital Market.

This reduced the number of outstanding shares of the Company's common stock from 97,612,971 shares to approximately 19,522,413 shares, after adjusting for fractional shares. On January 27, 2016, we received a letter from Nasdaq confirming that we had regained compliance with Nasdaq's minimum bid price requirement.

Additional information about the reverse stock split can be found in the Company's proxy statement furnished to the Securities and Exchange Commission on August 7, 2014, a copy of which is available at [www.sec.gov](http://www.sec.gov).
