Approximate date of commencement of proposed sale to the public: As soon as practicable after this Registration Statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, please check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Edgar Filing: Seanergy Maritime Holdings Corp. - Form F-1/A

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

---

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933.

Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 7(a)(2)(B) of the Securities Act.

† The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Proposed Maximum Aggregate Offering Price <sup>(1)(2)</sup>	Amount of Registration Fee
Common shares, \$0.0001 par value per share		
Total	\$13,800,000	\$1,718.10 <sup>(3)</sup>

(1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(o) of the Securities Act of 1933, as amended.

(2) Includes the offering price of common shares that may be sold pursuant to the underwriters' option to purchase additional common shares.

(3) Previously paid.

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED DECEMBER 4, 2017  
PRELIMINARY PROSPECTUS  
12,000,000  
Common Shares

Seanergy Maritime Holdings Corp.

We are offering 12,000,000 of our common shares in this offering. On December 1, 2017, the last reported sale price per share of our common shares on the Nasdaq Capital Market was \$1.06.

Our common shares are listed on the Nasdaq Capital Market under the symbol "SHIP".

Investing in our securities involves a high degree of risk. See "Risk Factors" beginning on page 14 of this prospectus for a discussion of information that should be considered in connection with an investment in our securities.

	Per Common Share	Total
Public offering price	\$	\$
Underwriting discount and commissions	\$	\$
Proceeds to the Company, before expenses	\$	\$

We have granted the underwriters an option for a period of up to 45 days to purchase up to 1,800,000 additional common shares.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the common shares to purchasers in the offering on or about , 2017.

## ABOUT THIS PROSPECTUS

You should rely only on the information contained and incorporated by reference into this prospectus and in any free writing prospectus filed with the Securities and Exchange Commission. We have not, and the underwriters have not, authorized anyone to provide you with different information or to make representations other than those contained in this prospectus. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and the underwriters are not, making an offer to sell these securities in any jurisdiction where the offer is not permitted.

We obtained certain statistical data, market data and other industry data and forecasts used or incorporated by reference into this prospectus from publicly available information. While we believe that the statistical data, industry data, forecasts and market research are reliable, we have not independently verified the data, and we do not make any representation as to the accuracy of the information.

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus and the documents incorporated by reference into this prospectus contain certain forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, statements regarding our or our management's expectations, hopes, beliefs, intentions or strategies regarding the future and other statements that are other than statements of historical fact. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. The words "anticipate", "believe", "continue", "could", "estimate", "expect", "intend", "may", "might", "plan", "possible", "potential", "predict", "project", "should", "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

The forward-looking statements in this prospectus and the documents incorporated by reference into this prospectus are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections. As a result, you are cautioned not to rely on any forward-looking statements.

In addition to these important factors and matters discussed elsewhere herein and in the documents incorporated by reference herein, important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include among other things:

- changes in shipping industry trends, including charter rates, vessel values and factors affecting vessel supply and demand;
- changes in seaborne and other transportation patterns;
- changes in the supply of or demand for drybulk commodities, including drybulk commodities carried by sea, generally or in particular regions;
- changes in the number of newbuildings under construction in the drybulk shipping industry;
- changes in the useful lives and the value of our vessels and the related impact on our compliance with loan covenants;
- the aging of our fleet and increases in operating costs;
- changes in our ability to complete future, pending or recent acquisitions or dispositions;

- our ability to achieve successful utilization of our expanded fleet;
- changes to our financial condition and liquidity, including our ability to pay amounts that we owe and obtain additional financing to fund capital expenditures, acquisitions and other general corporate activities;
- risks related to our business strategy, areas of possible expansion or expected capital spending or operating expenses;
- changes in the availability of crew, number of off-hire days, classification survey requirements and insurance costs for the vessels in our fleet;
- changes in our ability to leverage the relationships and reputation in the drybulk shipping industry of V.Ships Limited, or V.Ships, and Fidelity Marine Inc., or Fidelity;
- changes in our relationships with our contract counterparties, including the failure of any of our contract counterparties to comply with their agreements with us;
- loss of our customers, charters or vessels;
- damage to our vessels;
- potential liability from future litigation and incidents involving our vessels;
- our future operating or financial results;
- our ability to continue as a going concern;
- acts of terrorism and other hostilities;
- changes in global and regional economic and political conditions;
- changes in governmental rules and regulations or actions taken by regulatory authorities, particularly with respect to the drybulk shipping industry; and
- other factors listed from time to time in registration statements, reports or other materials that we have filed with or furnished to the U.S. Securities and Exchange Commission, or the Commission, including our most recent annual report on Form 20-F, which is incorporated by reference into this prospectus.

These factors could cause actual results or developments to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors also could harm our results or developments. Consequently, there can be no assurance that actual results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, us. Given these uncertainties, prospective investors are cautioned not to place undue reliance on such forward-looking statements.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. If one or more forward-looking statements are updated, no inference should be drawn that additional updates will be made with respect to those or other forward-looking statements.

iii

---

#### ENFORCEABILITY OF CIVIL LIABILITIES

We are incorporated under the laws of the Republic of the Marshall Islands and our principal executive offices are located outside the United States. Certain of our directors and officers reside outside the United States. In addition, substantially all of our assets and the assets of certain of our directors and officers are located outside the United States. As a result, it may not be possible for you to serve legal process within the United States upon us or any of these persons. It may also not be possible for you to enforce, both in and outside the United States, judgments you may obtain in United States courts against us or these persons in any action, including actions based upon the civil liability provisions of U.S. federal or state securities laws.

Furthermore, there is substantial doubt that courts in jurisdictions outside the U.S (i) would enforce judgments of U.S. courts obtained in actions against us or our directors or officers based upon the civil liability provisions of applicable U.S. federal and state securities laws or (ii) would enforce, in original actions, liabilities against us or our directors or officers based on those laws.

## PROSPECTUS SUMMARY

This summary highlights certain information that appears elsewhere in this prospectus or in documents incorporated by reference herein, and this summary is qualified in its entirety by that more detailed information. This summary may not contain all of the information that may be important to you. We urge you to carefully read this entire prospectus and the documents incorporated by reference herein. As an investor or prospective investor, you should also review carefully the sections entitled "Cautionary Statement Regarding Forward-Looking Statements" and "Risk Factors" in this prospectus and in our Annual Report on Form 20-F for the year ended December 31, 2016.

Unless the context otherwise requires, as used in this prospectus, the terms "Company", "Seanergy", "we", "us" and "our" refer to Seanergy Maritime Holdings Corp. and all of its subsidiaries, and "Seanergy Maritime Holdings Corp." refers only to Seanergy Maritime Holdings Corp. and not to its subsidiaries. We use the term deadweight ton, or dwt, in describing the size of our vessels. Dwt, expressed in metric tons, each of which is equivalent to 1,000 kilograms, refers to the maximum weight of cargo and supplies that a vessel can carry. Unless otherwise indicated, all references in this prospectus to "\$" or "dollars" are to U.S. dollars, and financial information presented in this prospectus is derived from the financial statements incorporated by reference in this prospectus that were prepared in accordance with accounting principles generally accepted in the United States, or U.S. GAAP.

### Overview

We are an international shipping company specializing in the worldwide seaborne transportation of drybulk commodities. We believe we have established a reputation in the international drybulk shipping industry for operating and maintaining vessels with high standards of performance, reliability and safety. We have assembled a management team comprised of executives who have extensive experience operating large and diversified fleets, and who have strong ties to a number of international charterers.

In 2015, we acquired eight modern drybulk vessels (Capesize and Supramaxes), in 2016, we acquired two Capesize drybulk vessels and in 2017, we acquired an additional Capesize drybulk vessel. We refer to the eleven vessels we presently own as our Fleet. Capesize vessels range in size between 150,000 to 190,000 dwt. Supramax vessels range in size between 40,000 to 65,000 dwt.

In particular, since March 2015, we have invested \$275 million to acquire our Fleet. More specifically, in March 2015, we took delivery of the first vessel in our Fleet, a secondhand Capesize vessel, Leadership, from an unaffiliated third party for \$17.1 million. The acquisition was funded with proceeds from a senior secured loan, a convertible promissory note issued to an entity affiliated with our principal shareholder, who we refer to as our Sponsor, and the sale of common shares to our Sponsor. Between September and December of 2015 we took delivery of seven additional secondhand drybulk vessels, consisting of five Capesize vessels, Premiership, Geniuship, Gloriuship, Squireship and Championship, and two Supramax vessels, Gladiatorship, and Guardianship, from entities affiliated with our Sponsor for an aggregate purchase price of \$183.4 million. These acquisitions were funded with proceeds from senior secured loans, a revolving convertible promissory note issued to an entity affiliated with our Sponsor, and the sale of common shares to our Sponsor. During November and December of 2016, we took delivery of two additional secondhand Capesize vessels, Lordship and Knightship from an unaffiliated third party for an aggregate purchase price of \$41.5 million. The acquisitions were funded with proceeds from a senior secured loan with Northern Shipping Fund III LP, or NSF, and through a loan facility with Jelco Delta Holding Corp., or Jelco, a company affiliated with our principal shareholder. In May 2017, we took delivery of an additional secondhand Capesize vessel, Partnership, from an unaffiliated third party for an aggregate purchase price of \$32.65 million. The acquisition was funded with proceeds from a senior secured loan with Amsterdam Trade Bank N.V., or ATB, and through a new loan facility with Jelco.

## Our Fleet

As of the date of this prospectus, we own a fleet of eleven drybulk carriers, comprised of nine Capesize vessels and two Supramax vessels, with a combined cargo-carrying capacity of approximately 1,682,582 dwt and an average age of approximately 8.6 years. The following table lists the vessels in our fleet as of the date of this prospectus:

### Fleet

Vessel Name	Year Built	Dwt	Flag	Yard	Type of Employment
Championship	2011	179,238	LIB	Sungdong	Spot
Partnership	2012	179,213	MI	Hyundai	Time Charter <sup>(1)</sup>
Knightship	2010	178,978	LIB	Hyundai	Spot
Lordship	2010	178,838	LIB	Hyundai	Time Charter <sup>(2)</sup>
Gloriuship	2004	171,314	MI	Hyundai	Spot
Leadership	2001	171,199	BA	Koyo - Imabari	Spot
Geniuship	2010	170,057	MI	Sungdong	Spot
Premiership	2010	170,024	IoM	Sungdong	Spot
Squireship	2010	170,018	LIB	Sungdong	Spot
Guardianship	2011	56,884	MI	CSC Jinling	Spot
Gladiatorship	2010	56,819	BA	CSC Jinling	Spot
Average Age/Total dwt:	8.6 years	1,682,582			

(1) This vessel is being chartered by Uniper Global Commodities SE and was delivered to the charterer on June 13, 2017 for a period of employment of about 12 months to about 18 months at a gross daily rate of \$16,200.

(2) This vessel is being chartered by Oldendorff Carriers GmbH & Co. KG and was delivered to the charterer on June 28, 2017, in direct continuation of the vessel's previous time charter, for a period of about 18 months to about 22 months. The net daily charter hire is calculated at an index linked rate based on the five time charter routes rate of the Baltic Capesize Index. In addition, the time charter provides us an option for any period of time during the hire to be converted into a fixed rate time charter, between three months and 12 months, with a rate corresponding to the prevailing value of the respective Capesize forward freight agreement.

### Key to Flags:

BA – Bahamas, IoM – Isle of Man, LIB – Liberia, MI – Marshall Islands

## Competitive Strengths

We believe that we possess a number of strengths that provide us with a competitive advantage in the drybulk shipping market, including the following:

**Modern, High Quality Fleet.** Our Fleet has an average age of 8.6 years as of the date of this prospectus, compared to world-wide Supramax and Capesize drybulk market industry average ages of 9.2 and 8.7 years, respectively, as of that date. We believe that owning a young, modern and well-maintained fleet provides us with a competitive advantage in securing favorable time and spot charters. All of our vessels have been built in high quality shipyards that we view as having a longstanding reputation for building such vessels. We expect that the combination of these factors will provide us with a competitive advantage in securing favorable employment for our vessels, although it is possible that the daily rates we receive on future time and spot charters may be lower depending on market fluctuations.

Focus on Capesize Vessels. Our fleet primarily consists of Capesize vessels. We believe that the Capesize sector will benefit significantly from the increase in demand for commodities such as iron ore and coal. According to Karatzas Marine Advisors & Co. seaborne transportation has increased by 1.7% in 2016 and is expected to increase by 4.5% in 2017. In addition, the newbuilding orderbook has seen a significant reduction for Capesize vessels currently standing at approximately 3% of the current fleet, lowest in history, compared to 35.4% that has been the average ratio of newbuilding orderbook of the fleet for the last 10 years.

Experienced Management. Our Company's leadership has considerable depth of shipping industry expertise. Mr. Tsantanis, our Chairman, Chief Executive Officer and interim Chief Financial Officer, brings more than 19 years of experience in shipping and finance and has held senior management positions in prominent shipping companies.

Access to Attractive Chartering Opportunities. Fidelity, our commercial manager, has established strong global relationships with charterers and brokers. We believe Fidelity's relationships with these counterparties should provide us with access to attractive chartering opportunities.

#### Business Strategy

Our strategy is to manage and expand our fleet in a manner that produces strong cash flows and allows us to build our position as a reliable provider of international seaborne transportation services for drybulk commodities. The key elements of our business strategy include:

Expanding Our Fleet Through Accretive Acquisitions. We intend to acquire drybulk carriers with fuel-efficient specifications and carrying capacities of greater than 170,000 dwt through timely and selective acquisitions, although we may also consider other classes of drybulk carriers as opportunities warrant. We currently view the Capesize vessel class as providing attractive return characteristics given the existing vessel price levels. A key element to our acquisition strategy will be to acquire high-quality vessels at attractive prices. When evaluating acquisitions, we will consider and analyze, among other things, our expectation of fundamental developments in the drybulk shipping industry sector, the level of liquidity in the resale and charter market, the cash flow expected to be earned by a vessel in relation to its value, its condition and technical specifications with particular regard to fuel consumption, expected remaining useful life, the credit quality of the charterer and duration and terms of charter contracts for vessels acquired with charters attached, as well as the overall diversification of our fleet and customers. We believe that these circumstances combined with our management's knowledge of the shipping industry present an opportunity for us to grow our fleet at favorable prices.

Well Positioned to Capitalize on an Improving Rate Environment via Spot Market Exposure. We believe our current eleven-vessel fleet is optimized to capture increasing vessel revenues as a result of an upward trend in spot rates. Currently nine of our eleven vessels are on the spot market and one vessel is employed under an index-linked charter providing us the ability to capture upward movements in rates. The average of the four time charter routes for the Baltic Capesize Index, or the BCI TCE, a daily average of charter rates for key Capesize routes published by the Baltic Exchange Limited, which has long been viewed as the main benchmark to monitor the movements of the Capesize vessel charter market, has recently increased significantly by 5,154% from the record low level of \$485 per day on March 17, 2016 to \$25,481 per day on November 30, 2017. The average BCI TCE of the last ten years has been \$27,154 per day. As rates increase we expect to utilize a more balanced portfolio approach for our commercial vessel management. We believe employing a chartering strategy to capture upside opportunities in the spot market with a mixture of fixed-rate time charters as the charter market improves will enable us to reduce downside risks and provide more stability in cash flows. Because the spot market is volatile, there can be no assurance that the recent increases in the drybulk charter market will continue.

Operating a Modern, High-Quality Fleet. Our Fleet had an average age of 8.6 years as of the date of this prospectus, compared to world-wide Supramax and Capesize drybulk market industry average ages of 9.2 and 8.7 years, respectively, as of that date. We believe that owning a young, well-maintained fleet provides us with a competitive advantage in securing favorable time and spot charters. All of our vessels have been built in high quality shipyards that we view as having a longstanding reputation for building quality vessels. We expect that the combination of these factors will provide us with a competitive advantage in securing favorable employment for our vessels.

#### Management of Our Fleet

We manage our vessels' operations, insurances, claims and bunkering and have the general supervision of our third-party technical and commercial managers. Pursuant to technical management agreements with our vessel owning subsidiaries, V. Ships, an independent third party, provides technical management for our vessels that includes general administrative and support services, such as crewing and other technical management, accounting related to vessels and provisions. Fidelity, an independent third party, provides commercial management services for all of the vessels in our fleet pursuant to a commercial management agreement with Seanergy Management Corp., our wholly-owned ship managing subsidiary.

#### Loan Facilities Update

We currently have six senior secured loan facilities with an aggregate outstanding balance of \$199.3 million and two junior secured loan facilities with Jelco with an outstanding balance of \$17.4 million.

The senior secured loan facility with Alpha Bank AE, originally entered into in March 2015 and amended in December 2015 and July 2016, currently has an outstanding balance of \$7.1 million and amortization payments for this facility commenced on June 17, 2015. The senior secured loan facility with HSH Nordbank AG, originally entered into in September 2015 and amended in May 2016 and February 2017, currently has an outstanding balance of \$43.4 million and amortization payments for this facility commenced on September 30, 2017. The senior secured loan facility with UniCredit Bank AG, originally entered into in September 2015 and amended in June 2016, July 2016, March 2017 and September 2017, currently has an outstanding balance of \$49.6 million and amortization payments for this facility commenced on June 26, 2017. The senior secured loan facility with Alpha Bank AE, originally entered into in November 2015 and amended in July 2016, currently has an outstanding balance of \$33.8 million and for which we will commence amortization payments on February 12, 2018. The senior secured loan facility with NSF, originally entered into in November 2016, currently has an outstanding balance of \$32 million for which we will commence amortization payments on March 13, 2019. Lastly, the senior secured loan facility with ATB, originally entered into in May 2017 and amended and restated in September 2017, currently has an outstanding balance of \$33.5 million and amortization payments for this facility commenced on August 28, 2017.

Additionally, the junior secured loan facility with Jelco, originally entered into in October 2016 and amended and restated in November 2016, currently has an outstanding balance of \$5.9 million. The junior secured loan facility with Jelco, originally entered into in May 2017 which was amended and restated in September 2017, currently has an outstanding balance of \$11.5 million.

Finally, all our liabilities with regard to the senior secured loan facility with Natixis, originally entered into in December 2015 and amended in March 2017, were discharged in September 2017. On September 29, 2017, Natixis entered into a deed of release and fully discharged the \$35.4 million balance of our secured term loan facility obligations to the lender for a total settlement amount of \$24.0 million. The first-priority mortgage over the Championship and all other securities created in favour of Natixis were irrevocably and unconditionally released pursuant to the deed of release.

Most financial covenants under our loan facilities with our lenders have been either waived until June 30, 2018 or will become effective on that date. In particular, all financial covenants under our loan facilities with our lenders, except for minimum liquidity undertakings for all loan facilities and asset coverage undertakings for Championship, Knightship, Leadership, Lordship and Partnership which are currently applicable, have been either waived until June 30, 2018 or will become effective on that date. For more information regarding our current loan facilities, please see "Recent Developments" below and "Management's Discussion and Analysis of Financial Condition and Results of Operations - Description of Indebtedness" in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

#### Drybulk Shipping Industry Trends

Based on information provided by Karatzas Marine Advisors & Co., we believe that the following industry trends create growth opportunities for us as an owner and operator of drybulk vessels:

- the low drybulk freight market in the years 2014 – 2016 and limited availability of shipping finance, among other factors, have resulted in low drybulk vessel asset pricing, relative to average prices, over the last five years; The BCI TCE has recently increased significantly by 5,154% from the record low level of \$485 per day on March 17, 2016 to \$25,481 per day on November 30, 2017. The average BCI TCE of the last ten years has been \$27,154 per day. Because the spot market is volatile, there can be no assurance that the recent increases in the drybulk charter market will continue;
- the recovery of global economic activity and industrial production, which continues to rely heavily on raw materials and commodity consumption;
- the increased aggregate demand for seaborne transport for commodities and raw materials expected over the next decade; economic growth has been reviving in 2017 and raw materials remain the primary driver for world economies; coal is expected to remain one of the main inputs for generating electricity while iron ore will be the necessary source of raw material for an active steel industry; expanded mining capacity by the world's largest mining companies supports these trends;
- the regulations enacted by the International Maritime Organization, mandating higher maintenance standards of vessels, installation of ballast water management systems, and gradually lower emissions will require material capital investments that will render older drybulk vessels uneconomical for retrofitting and will expedite their demolition;
- and charterers' concerns about environmental and safety standards shifting their preference toward modern vessels that are owned by reputable and financially stable ship owners at the expense of weaker ship owners.

In this Drybulk Shipping Industry Trends section, the details on the industry trends have been prepared by Karatzas Marine Advisors & Co. We and Karatzas Marine Advisors & Co. can provide no assurance, however, that the industry trends described above will continue, we will be successful in capitalizing on any such opportunities or we will be able to expand our business. For further discussion of the risks that we face, see "Risk Factors" beginning on page 14 of this prospectus. Please read "The Drybulk Shipping Industry" for more information on the drybulk shipping industry.

### Recent Developments

On September 25, 2017, in order to partially fund the refinancing of our Natixis facility, we amended and restated the loan agreement dated May 24, 2017 previously entered into with ATB, increasing the loan amount of the facility by an additional tranche of \$16.5 million, or Tranche B. The principal of Tranche B is repayable by nineteen consecutive quarterly installments, being \$0.2 million each of the first four installments, \$0.3 million each of the subsequent four installments, and \$0.4 million each of the subsequent eleven installments, in addition to a balloon installment of any outstanding indebtedness due on the maturity date, May 26, 2022. On each quarterly repayment date, an additional repayment of at least \$0.01 million, or an integral multiple of that amount, of any excess cash standing to the credit of the relevant vessel's operating account shall be applied towards reducing the balloon installment. Excess cash, as defined in the loan facility, is any amount above \$1.0 million. The aggregate amount of the additional repayments, with regard to Tranche B, shall not exceed \$1.25 million. The amendment and restatement of the facility did not alter the interest rate, the maturity date, the amortization and the repayment terms of the existing tranche under the loan facility, or the financial covenants applicable to the Company as guarantor. The amended and restated loan facility is secured by first preferred mortgages and general assignments covering earnings, insurances and requisition compensation over the Partnership and Championship, earnings account pledges, shares security deeds relating to the shares of both vessels' owning subsidiaries, technical and commercial managers' undertakings and, where applicable, charter assignments.

On September 27, 2017, we amended and restated the loan agreement dated May 24, 2017 with Jelco. The amended facility currently bears interest at three-month LIBOR plus a margin of 6% per annum which is payable quarterly and the principal is repayable in one bullet payment due on the maturity date. The maturity date, which was deferred from May 24, 2018 to May 24, 2019, may, at the Company's option, be extended to May 24, 2020, from May 24, 2019 previously. The facility is secured by the following amended cross collaterals: second preferred mortgages over the Championship and Partnership, second priority general assignments covering earnings, insurances and requisition compensation over each vessel, guarantees from our vessel-owning subsidiaries, and a guarantee from our wholly-owned subsidiary, Emperor Holding Ltd, which is the holding company of two of our ship-owning subsidiaries owning vessels Lordship and Knightship.

On September 27, 2017, we also issued a \$13.75 million convertible promissory note to Jelco. The note is repayable by two consecutive annual installments of \$1.375 million with the first installment occurring 24 months after the drawdown date, the second installment occurring 36 months after the drawdown date and a balloon payment of \$11.0 million four years after the drawdown date. The note bears quarterly interest at three-month LIBOR plus a margin of 5% and is only payable in cash. At Jelco's option, the whole or any part of the principal amount under the note may only be paid at any time in common shares at a conversion price of \$0.90 per share. The conversion price was determined and approved by a special committee of independent directors of the Company's Board of Directors, as well as by the Board of Directors itself. The special committee of independent directors of the Company's Board of Directors and our Board of Directors obtained a valuation report from an independent third party financial advisor for the fair market value of the Company's equity per share. Jelco also received customary registration rights with respect to all shares it beneficially owns, including any shares to be received upon conversion of the note. The note is secured by the following cross collaterals: second preferred mortgages over the Championship and Partnership, second priority general assignments covering earnings, insurances and requisition compensation over each vessel, guarantees from our two vessel-owning subsidiaries, and a guarantee from our wholly-owned subsidiary, Emperor Holding Ltd, which is the holding company of two of our ship-owning subsidiaries owning vessels Lordship and Knightship. Of the \$13.75 million under the note, \$4.75 million were used to make a mandatory prepayment under the May 2017 Jelco loan facility.

On September 27, 2017, we also entered into the ninth amendment to the \$21.165 million revolving convertible promissory note dated September 7, 2015 (the "Ninth Amendment") and on September 18, 2017, we entered into the second amendment to the \$4.0 million convertible promissory note dated March 12, 2015 (the "Second Amendment"), each note previously issued to Jelco. The Ninth Amendment changed the reduction date of the applicable limit so that the applicable limit of the note is now reduced by \$3.3 million in the third quarter of 2019 (four years from the drawdown date) and the remaining balance of the note of \$17.865 million is payable at maturity in the third quarter of 2020 (five years from the drawdown date). The Second Amendment amended the repayment schedule so that the note is repayable in four installments so that the first be repaid six months after the delivery date of the Leadership to the ship owning company and the other three installments semi-annually commencing four years after the delivery date of the Leadership (in the first quarter of 2019), and a balloon payment of \$3.2 million payable at maturity in the first quarter of 2020. As amended by the Second Amendment and the Ninth Amendment, these two notes are also secured by a corporate guarantee offered by our wholly-owned subsidiary, Emperor Holding Ltd, which is the holding company of two of our ship-owing subsidiaries owning vessels Lordship and Knightship.

Furthermore, as a result of the foregoing transactions, each of the September 27, 2017 convertible promissory note issued to Jelco and the May 24, 2017 Jelco loan facility, as this was amended and restated on September 27, 2017, were secured by identical cross collaterals and cross default provisions.

On September 29, 2017, our lender, Natixis, entered into a deed of release and fully discharged the \$35.4 million balance of our secured term loan facility obligations to the lender for a total settlement amount of \$24.0 million. The settlement resulted into a \$11.4 million gain and equity accretion that will be recorded on our financial results for the third quarter and nine months ended September 30, 2017. The first-priority mortgage over the Championship and all other securities created in favour of Natixis were irrevocably and unconditionally released pursuant to the deed of release.

#### Corporate Information

We were incorporated under the laws of the Republic of the Marshall Islands on January 4, 2008, originally under the name Seanergy Merger Corp., as a wholly-owned subsidiary of Seanergy Maritime Corp. We changed our name to Seanergy Maritime Holdings Corp. on July 11, 2008. Our principal executive office is located at 16 Grigoriou Lambraki Street, 166 74 Glyfada, Athens, Greece. Our telephone number at that address is +30 2108913507. Our corporate website address is [www.seanergymaritime.com](http://www.seanergymaritime.com). The information contained on our website does not constitute part of this prospectus.

THE OFFERING

Common shares presently outstanding	36,979,346 common shares(1)
Securities offered by us	12,000,000 common shares (13,800,000 common shares if the underwriters exercise their option to purchase additional shares in full)
Common shares to be outstanding immediately after this offering	48,979,346 common shares (50,779,346 common shares if the underwriters exercise their option to purchase additional shares in full)
Use of proceeds	<p>We estimate that we will receive net proceeds of approximately \$ million, and approximately \$ million if the underwriters exercise their option to purchase additional shares in full, after deducting underwriting discounts and commissions and estimated expenses payable by us.</p> <p>We intend to use all of the net proceeds of this offering for general corporate purposes which may include, among</p>

other things, prepaying debt or partially funding the acquisition of modern Capesize drybulk vessels in accordance with our growth strategy. However, we do not currently have definitive plans for any debt prepayments nor have we identified any potential acquisitions, and we can provide no assurance that we will be able to complete any debt prepayment or the acquisition of any vessel that we are able to identify. See "Use of Proceeds."

Investing in our securities involves a high degree of risk. See "Risk Factors" below on page 14 and in our Annual Report on Form 20-F for the year ended December 31, 2016, which is incorporated by reference herein, to read about the risks you should consider before investing in our common shares.

Risk factors

Listing

Our common shares and class A warrants are listed on the Nasdaq Capital Market under the symbols "SHIP" and "SHIPW",

respectively.

Subject to certain exceptions, we, all of our executive officers and directors, and certain affiliates have entered into lock-up agreements with the underwriters. Under these agreements, we and each of these persons may not, without the prior written approval of the representatives to the underwriters, offer, sell, contract to sell or otherwise dispose of or hedge common shares or securities convertible into or exchangeable for common shares. These restrictions will be in effect for a period of 120 days after the date of the closing of this offering.

#### Lock-Up Agreements

(1) Excludes 43,016,668 shares issuable upon exercise of convertible promissory notes comprised of (i) 4,222,223 common shares issuable upon exercise of a conversion option pursuant to the convertible promissory note dated March 12, 2015, as amended, that we issued to Jelco, (ii) 23,516,667 common shares issuable upon exercise of a conversion option pursuant to the revolving convertible promissory note dated September 7, 2015, as amended, that we issued to Jelco, and (iii) 15,277,778 common shares issuable upon exercise of a conversion option pursuant to the convertible promissory note dated September 27, 2017 that we issued to Jelco. Under each of the convertible promissory notes, Jelco may, at its option, convert the whole or any part of the principal amount under each note at any time into common shares at a conversion price of \$0.90 per share. As of November 30, 2017, \$38.8 million was outstanding of convertible promissory notes comprised of (i) \$3.8 million was outstanding under the convertible promissory note dated March 12, 2015, (ii) \$21.2 million was outstanding under the revolving convertible promissory note dated September 7, 2015 and (iii) \$13.8 million was outstanding under the convertible promissory note dated September 27, 2017.

## SUMMARY HISTORICAL CONSOLIDATED FINANCIAL DATA

The information set forth below should be read in conjunction with "Capitalization" and our audited and unaudited consolidated financial statements and related notes incorporated by reference herein.

We have derived the following consolidated financial data for the years ended as of December 31, 2016, 2015, 2014, 2013 and 2012 from our audited consolidated financial statements, as presented in our most recent annual report on Form 20-F, which is incorporated by reference in this prospectus. We have derived the following consolidated financial data for the nine months ended September 30, 2017 and 2016 and as of September 30, 2017 from our unaudited interim consolidated financial statements that are incorporated by reference in this prospectus. Operating results for the nine months ended September 30, 2017 are not necessarily indicative of the results that may be expected for the entire year ending December 31, 2017.

On January 8, 2016, we effected a 1-for-5 reverse split of our common shares. The reverse stock split became effective and the common shares began trading on a split-adjusted basis on the NASDAQ Capital Market at the opening of trading on January 8, 2016. There was no change in the number of authorized shares or the par value of our common stock. All share and per share amounts disclosed herein give effect to this reverse stock split retroactively, for all periods presented.

Based on our audited consolidated financial statements:

Edgar Filing: Seenergy Maritime Holdings Corp. - Form F-1/A

Basic	\$ (0.09	) \$ (0.90	)
Weighted average common shares outstanding			
Basic	35,591,170	19,594,354	
Dividends declared per share	-	-	

	Nine-month period ended September 30,	
	2017	2016
Fleet Data:		
Ownership days(1)	2,852	2,192
Available days(2)	2,839	2,019
Operating days(3)	2,432	1,795
Fleet utilization(4)	85 %	82 %
TCE rate(5)	\$10,058	\$4,881
Daily vessel operating expenses(6)	\$4,806	\$4,613

Ownership days are the total number of calendar days in a period during which we owned each vessel in our fleet.

(1) Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses recorded during a period.

Available days are the number of ownership days less the aggregate number of days that our vessels are off-hire due to major repairs, drydockings, lay-up or special or intermediate surveys. The shipping industry uses available

(2) days to measure the aggregate number of days in a period during which vessels should be capable of generating revenues. During the nine months ended September 30, 2017, we incurred 13 off-hire days for one vessel drydocking.

Operating days are the number of available days in a period less the aggregate number of days that our vessels are off-hire for any reason, including off-hire days between successive voyages, as well as other unforeseen

(3) circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which the vessels actually generate revenues. In the nine months ended September 30, 2017, we incurred 402 off-hire days between voyages and 5 off-hire days due to other unforeseen circumstances.

(4) Fleet utilization is the percentage of time that our vessels are generating revenue, and is determined by dividing operating days by ownership days for the relevant period.

Time Charter Equivalent (TCE) rate is defined as our net revenue less voyage expenses during a period divided by the number of our operating days during the period. Voyage expenses include port charges, bunker expenses, canal charges and other commissions. We include the TCE rate, a non-GAAP measure, as we believe it provides

(5) additional meaningful information in conjunction with net revenues from vessels, the most directly comparable U.S. GAAP measure, and because it assists our management in making decisions regarding the deployment and use of our vessels and in evaluating their financial performance. Our calculation of TCE rate may not be comparable to that reported by other companies. The following table reconciles the Company's net revenues from vessels to the TCE rate.

	Nine months ended September 30,	
	2017	2016
(In thousands of US Dollars, except operating days and TCE rate)		
Net revenues from vessels	\$50,545	\$23,791
Voyage expenses	(26,084)	(15,030)
Net operating revenues	24,461	8,761
Operating days	2,432	1,795
Daily time charter equivalent rate	\$10,058	\$4,881

(6) Vessel operating expenses include crew costs, provisions, deck and engine stores, lubricants, insurance, maintenance and repairs. Daily Vessel Operating Expenses are calculated by dividing vessel operating expenses by ownership days for the relevant time periods. The following table reconciles our vessel operating expenses to Daily Vessel Operating Expenses.

(In thousands of US Dollars, except ownership days and Daily Vessel Operating Expenses)	Nine months ended	
	September 30, 2017	2016
Vessel operating expenses	\$14,049	\$10,112
Less: Pre-delivery expenses	343	-
Vessel operating expenses before pre-delivery expenses	13,706	10,112
Ownership days	2,852	2,192
Daily vessel operating expenses	\$4,806	\$4,613

	Nine months ended	
	September 30, 2017	2016
EBITDA reconciliation:		
Net loss	\$(3,119 )	\$(17,730)
Add: Net interest expense	12,431	6,817
Add: Depreciation and amortization	8,384	6,677
Add: Taxes	22	-
EBITDA(1)	\$17,718	\$(4,236 )
Less: Gain on debt refinancing	11,392	-
Adjusted EBITDA(1)	\$6,326	\$(4,236 )

Earnings before interest, taxes, depreciation and amortization ("EBITDA") represents the sum of net income/(loss), interest and finance costs, interest income, depreciation and amortization and, if any, income taxes during a period. (1) Adjusted EBITDA represents EBITDA adjusted to exclude the gain on debt refinancing that we believe is not indicative of the ongoing performance of its core operations. EBITDA and Adjusted EBITDA are not recognized measurements under U.S. GAAP.

EBITDA and Adjusted EBITDA are presented in this prospectus as we believe that they provide investors with means of evaluating and understanding how our management evaluates operating performance. These non-GAAP measures should not be considered in isolation from, as a substitute for, or superior to, financial measures prepared in accordance with U.S. GAAP. In addition, these non-GAAP measures do not have standardized meanings, and are therefore unlikely to be comparable to similar measures presented by other companies.

## RISK FACTORS

An investment in our securities involves a high degree of risk. Before deciding to invest in our securities, you should carefully consider the risks described below. These risks and uncertainties are not the only risks and uncertainties that we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of these risks actually occurs, our business, financial condition and results of operations could be materially adversely affected. In that case, you may lose all or part of your investment in the securities.

### Risks Relating to Our Industry

The market values of our vessels may decrease, which could limit the amount of funds that we can borrow or trigger certain financial covenants under our loan agreements, and we may incur an impairment or, if we sell vessels following a decline in their market value, a loss.

The fair market values of our vessels are related to prevailing freight charter rates. While the fair market value of vessels and the freight charter market have a very close relationship as the charter market moves from trough to peak, the time lag between the effect of charter rates on market values of ships can vary. A decrease in the market value of our vessels could require us to raise additional capital in order to remain compliant with our loan covenants, and could result in the loss of our vessels and adversely affect our earnings and financial condition.

The fair market value of our vessels may increase or decrease, and we expect the market values to fluctuate depending on a number of factors including:

- prevailing level of charter rates;
- general economic and market conditions affecting the shipping industry;
- types and sizes of vessels;
- supply and demand for vessels;
- other modes of transportation;
- cost of newbuildings;
- governmental and other regulations; and
- technological advances.

In addition, as vessels grow older, they generally decline in value. If the fair market value of our vessels declines, we may not be in compliance with certain covenants in our loan agreements, and our lenders could accelerate our indebtedness or require us to pay down our indebtedness to a level where we are again in compliance with our loan covenants. If any of our loans are accelerated, we may not be able to refinance our debt or obtain additional funding. We expect that we will enter into more loan agreements in connection with our future acquisitions of vessels. For more information regarding our current loan facilities, please see "Prospectus Summary—Recent Developments" herein and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Indebtedness" in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

In addition, if vessel values decline, we may have to record an impairment adjustment in our financial statements, which could adversely affect our financial results. Furthermore, if we sell vessels at a time when vessel prices have fallen and before we have recorded an impairment adjustment to our financial statements, the sale may be at less than the vessel's carrying amount in our financial statements, resulting in a loss and a reduction in earnings.

Charter hire rates for drybulk vessels are highly volatile and remain significantly below the highs of 2008, which had and may continue to have an adverse effect on our revenues, earnings and profitability.

The dramatic downturn in the drybulk charter market, from which we derive substantially all of our revenues, has severely affected the drybulk shipping industry and has harmed our business. The Baltic Dry Index, or BDI, declined from a high of 11,793 on May 20, 2008 to a low of 290 on February 10, 2016, which represents a decline of 98%. In 2016, the BDI ranged from a low of 290 on February 10, 2016 to a high of 1,257 on November 18, 2016, and to date in 2017, has ranged from a low of 685 on February 14, 2017, to a high of 1,588 on October 24, 2017. The decline and volatility in charter rates has been due to various factors, including the over-supply of drybulk vessels, the lack of trade financing for purchases of commodities carried by sea, which resulted in a significant decline in cargo shipments, and trade disruptions caused by natural disasters. Drybulk charter rates are at depressed levels and may decline further. These circumstances have had a number of adverse consequences from time to time for drybulk shipping, including, among other developments:

- decrease in available financing for vessels;
- no active secondhand market for the sale of vessels;
- charterers seeking to renegotiate the rates for existing time charters;
- widespread loan covenant defaults in the drybulk shipping industry due to the substantial decrease in vessel values;
- and
- declaration of bankruptcy by some operators, charterers and vessel owners.

The degree of charter hire rate volatility among different types of drybulk vessels has varied widely. If we enter into a charter when charter hire rates are low, our revenues and earnings will be adversely affected and we may not be able to successfully charter our vessels at rates sufficient to allow us to operate our business profitably or meet our obligations. Further, if low charter rates in the drybulk market continue or decline further for any significant period, this could have an adverse effect on our vessel values and ability to comply with the financial covenants in our loan agreements. In such a situation, unless our lenders were willing to provide waivers of covenant compliance or modifications to our covenants, our lenders could accelerate our debt and we could face the loss of our vessels. We are dependent on spot charters and any decrease in spot charter rates in the future may adversely affect our earnings.

We currently operate the majority of our vessels in the spot market, exposing us to fluctuations in spot market charter rates. Further, we may employ any additional vessels that we may acquire in the spot market.

Although the number of vessels in our fleet that participate in the spot market will vary from time to time, we anticipate that a significant portion of our fleet will participate in this market. As a result, our financial performance will be significantly affected by conditions in the drybulk spot market and only our vessels that operate under fixed-rate time charters may, during the period such vessels operate under such time charters, provide a fixed source of revenue to us.

Historically, the drybulk markets have been volatile as a result of the many conditions and factors that can affect the price, supply of and demand for drybulk capacity. The weak global economic trends may further reduce demand for transportation of drybulk cargoes over longer distances, which may materially affect our revenues, profitability and cash flows. The spot charter market may fluctuate significantly based upon supply of and demand for vessels and cargoes. The successful operation of our vessels in the competitive spot charter market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. The spot market is very volatile, and, in the past, there have been periods when spot rates have declined below the operating cost of vessels. If future spot charter rates decline, then we may be unable to operate our vessels trading in the spot market profitably or to meet our obligations, including payments on indebtedness. Furthermore, as charter rates for spot charters are fixed for a single voyage, which may last up to several weeks, during periods in which spot charter rates are rising, we will generally experience delays in realizing the benefits from such increases.

An over-supply of drybulk vessel capacity may prolong or further depress the current low charter rates and, in turn, adversely affect our profitability.

The market supply of drybulk vessels had increased due to the high level of new deliveries in the last years. Drybulk newbuildings were delivered in significant numbers starting at the beginning of 2006 and continued to be delivered in significant numbers through 2016. In addition, the drybulk newbuilding orderbook, which extends to 2019, equaled approximately 6% of the existing world drybulk fleet as of September 30, 2017, according to Karatzas Marine Advisors & Co., and the orderbook may increase further in proportion to the existing fleet. An over-supply of drybulk vessel capacity could prolong the period during which low charter rates prevail.

Factors that influence the supply of vessel capacity include:

- number of new vessel deliveries;
- scrapping rate of older vessels;
- vessel casualties;
- price of steel;
- number of vessels that are out of service;
- changes in environmental and other regulations that may limit the useful life of vessels; and
- port or canal congestion.

If drybulk vessel capacity increases but the demand for vessel capacity does not increase or increases at a slower rate, charter rates could materially decline, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If economic conditions throughout the world do not improve, it will impede our results of operations, financial condition and cash flows, and could cause the market price of our common shares to decline.

Negative trends in the global economy that emerged in 2008 continue to adversely affect global economic conditions. In addition, the world economy continues to face a number of new challenges, including recent turmoil and hostilities in the Middle East, North Africa and other geographic areas and countries and continuing economic weakness in the European Union. The deterioration in the global economy has caused, and may continue to cause, a decrease in worldwide demand for certain goods and, thus, shipping. We cannot predict how long the current market conditions will last.

The European Union and other parts of the world have recently been or are currently in a recession and continue to exhibit weak economic trends. Moreover, there is uncertainty related to certain countries' ability to refinance their sovereign debt, such as Greece, Spain, Portugal, Ireland, and Italy. As a result, the credit markets in the United States and Europe have experienced significant contraction, deleveraging and reduced liquidity, and the U.S. federal and state governments and European authorities have implemented a broad variety of governmental action and new regulation of the financial markets and may implement additional regulations in the future. As a result, global economic conditions and global financial markets have been, and continue to be, volatile. Further, credit markets and the debt and equity capital markets have been distressed and the uncertainty surrounding the future of the global credit markets has resulted in reduced access to credit worldwide.

In addition, continued economic slowdown in the Asia Pacific region, particularly in China, may exacerbate the effect of the weak economic trends in the rest of the world. Before the global economic financial crisis that began in 2008, China had one of the world's fastest growing economies in terms of gross domestic product, or GDP, which had a significant impact on shipping demand. The quarterly year-over-year growth rate of China's GDP decreased to approximately 6.7% for the year ended December 31, 2016, as compared to approximately 6.8% for the year ended December 31, 2015, and continues to remain below pre-2008 levels. It is possible that China and other countries in the Asia Pacific region will continue to experience slowed or even negative economic growth in the near future.

Moreover, the current economic slowdown in the economies of the European Union and in certain Asian countries may further adversely affect economic growth in China and elsewhere. Our results of operations and ability to grow our fleet could be impeded by a continuing or worsening economic downturn in any of these countries or geographic regions.

Further, governments may turn to trade barriers to protect their domestic industries against foreign imports, thereby depressing shipping demand. In particular, leaders in the United States have indicated the United States may seek to implement more protective trade measures. The new U.S. president was elected on a platform promoting trade protectionism. The results of the presidential election have thus created significant uncertainty about the future relationship between the United States and China and other exporting countries, including with respect to trade policies, treaties, government regulations and tariffs. On January 23, 2017, the U.S. President signed an executive order withdrawing the United States from the Trans-Pacific Partnership, a global trade agreement intended to include the United States, Canada, Mexico, Peru and a number of Asian countries. Protectionist developments, or the perception they may occur, may have a material adverse effect on global economic conditions, and may significantly reduce global trade. Moreover, increasing trade protectionism may cause an increase in (i) the cost of goods exported from regions globally, particularly the Asia-Pacific region, (ii) the length of time required to transport goods and (iii) the risks associated with exporting goods. Such increases may further reduce the quantity of goods to be shipped.

We face risks attendant to the trends in the global economy, such as changes in interest rates, instability in the banking and securities markets around the world, the risk of sovereign defaults, reduced levels of growth, and trade protectionism, among other factors. Major market disruptions and the current adverse changes in market conditions and regulatory climate worldwide may adversely affect our business or impair our ability to borrow under our loan agreements or any future financial arrangements. We cannot predict how long the current market conditions will last. However, these recent and developing economic and governmental factors, together with decreased charter rates and vessel values as compared to historical averages, may have a material adverse effect on our results of operations, financial condition or cash flows, our ability to finance our pending vessel acquisitions and the trading price of our common shares. In the absence of available financing, we also may be unable to complete our vessel pending acquisitions, take advantage of business opportunities or respond to competitive pressures.

The instability of the euro or the inability of Eurozone countries to refinance their debts could have a material adverse effect on our revenue, profitability and financial position.

Concerns persist regarding the debt burden of certain Eurozone countries and their ability to meet future financial obligations and the overall stability of the euro. An extended period of adverse development in the outlook for European countries could reduce the overall demand for drybulk cargoes and for our services. These potential developments, or market perceptions concerning these and related issues, could affect our financial position, results of operations and cash flow.

We maintain cash with a limited number of financial institutions including financial institutions that may be located in Greece, which will subject us to credit risk.

We maintain all of our cash with a limited number of financial institutions, including institutions that are located in Greece. These financial institutions located in Greece may be subsidiaries of international banks or Greek financial institutions. Economic conditions in Greece have been, and continue to be, severely disrupted and volatile, and as a result of sovereign weakness, Moody's Investor Services Inc. has downgraded the bank financial strength ratings, as well as the deposit and debt ratings, of several Greek banks to reflect their weakening stand-alone financial strength and the anticipated additional pressures stemming from the country's challenged economic prospects.

Risks associated with operating ocean-going vessels could affect our business and reputation, which could adversely affect our revenues and expenses.

The operation of an ocean-going vessel carries inherent risks. These risks include the possibility of:

- crew strikes and/or boycotts;
- marine disaster;
- piracy;
- environmental accidents;
- cargo and property losses or damage; and
- business interruptions caused by mechanical failure, human error, war, terrorism, political action in various countries, labor strikes or adverse weather conditions.

Any of these circumstances or events could increase our costs or lower our revenues.

Rising fuel prices may adversely affect our profits.

The cost of fuel is a significant factor in negotiating charter rates. As a result, an increase in the price of fuel may adversely affect our profitability. The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by members of the Organization of the Petroleum Exporting Countries and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations. Further, fuel may become much more expensive in the future, which may reduce the profitability and competitiveness of our business versus other forms of transportation, such as truck or rail.

Upon redelivery of vessels at the end of a period time or voyage time charter, we may be obligated to repurchase bunkers on board at prevailing market prices, which could be materially higher than fuel prices at the inception of the charter period. In addition, fuel is a significant, if not the largest, expense that we would incur with respect to vessels operating on voyage charter.

The majority of our vessels are chartered on the spot charter market, either through trip charter contracts or voyage charter contracts. Voyage charter contracts generally provide that the vessel owner bears the cost of fuel in the form of bunkers, which is a material operating expense. We do not intend to hedge our fuel costs, thus an increase in the price of fuel may affect in a negative way our profitability and our cash flows.

Our revenues are subject to seasonal fluctuations, which could affect our operating results and ability to service our debt or pay dividends.

We operate our vessels in markets that have historically exhibited seasonal variations in demand and, as a result, in charter hire rates. This seasonality may result in quarter-to-quarter volatility in our operating results. The drybulk shipping market is typically stronger in the fall and winter months in anticipation of increased consumption of coal and other raw materials in the northern hemisphere during the winter months. In addition, unpredictable weather patterns in these months tend to disrupt vessel schedule and supplies of certain commodities. As a result, our revenues may be weaker during the fiscal quarters ending June 30 and September 30, and, conversely, our revenues may be stronger in fiscal quarters ending December 31 and March 31. This seasonality should not affect our operating results if our vessels are employed on period time charters, but since the majority of our vessels are employed in the spot market, seasonality may materially affect our operating results.

Our vessels may call on ports located in or may operate in countries that are subject to restrictions imposed by the United States, the European Union or other governments that could adversely affect our reputation and the market price of our common shares.

During the year ended December 31, 2016, none of our vessels called on ports located in countries subject to sanctions and embargoes imposed by the U.S. government and other authorities or countries identified by the U.S. government or other authorities as state sponsors of terrorism, such as Iran, Sudan and Syria; however our vessels may call on ports in these countries from time to time in the future on our charterers' instructions. The U.S. sanctions and embargo laws and regulations vary in their application, as they do not all apply to the same covered persons or proscribe the same activities, and such sanctions and embargo laws and regulations may be amended or strengthened over time. In 2010, the U.S. enacted the Comprehensive Iran Sanctions Accountability and Divestment Act, or CISADA, which amended the Iran Sanctions Act. Among other things, CISADA introduced limits on the ability of companies and persons to do business or trade with Iran when such activities relate to the investment, supply or export of refined petroleum or petroleum products. In 2012, President Obama signed Executive Order 13608 which prohibits foreign persons from violating or attempting to violate, or causing a violation of any sanctions in effect against Iran or facilitating any deceptive transactions for or on behalf of any person subject to U.S. sanctions. Any persons found to be in violation of Executive Order 13608 will be deemed a foreign sanctions evader and will be banned from all contacts with the U.S., including conducting business in U.S. dollars. Also in 2012, President Obama signed into law the Iran Threat Reduction and Syria Human Rights Act of 2012, or the Iran Threat Reduction Act, which created new sanctions and strengthened existing sanctions. Among other things, the Iran Threat Reduction Act intensifies existing sanctions regarding the provision of goods, services, infrastructure or technology to Iran's petroleum or petrochemical sector. The Iran Threat Reduction Act also includes a provision requiring the President of the U.S. to impose five or more sanctions from Section 6(a) of the Iran Sanctions Act, as amended, on a person the President determines is a controlling beneficial owner of, or otherwise owns, operates, or controls or insures a vessel that was used to transport crude oil from Iran to another country and (1) if the person is a controlling beneficial owner of the vessel, the person had actual knowledge the vessel was so used or (2) if the person otherwise owns, operates, or controls, or insures the vessel, the person knew or should have known the vessel was so used. Such a person could be subject to a variety of sanctions, including exclusion from U.S. capital markets, exclusion from financial transactions subject to U.S. jurisdiction, and exclusion of that person's vessels from U.S. ports for up to two years.

On November 24, 2013, the P5+1 (the U.S., United Kingdom, Germany, France, Russia and China) entered into an interim agreement with Iran entitled the Joint Plan of Action, or JPOA. Under the JPOA it was agreed that, in exchange for Iran taking certain voluntary measures to ensure that its nuclear program is used only for peaceful purposes, the U.S. and European Union, or EU, would voluntarily suspend certain sanctions for a period of six months.

On January 20, 2014, the U.S. and EU indicated that they would begin implementing the temporary relief measures provided for under the JPOA. These measures include, among other things, the suspension of certain sanctions on the Iranian petrochemicals, precious metals, and automotive industries from January 20, 2014 until July 20, 2014. The JPOA was subsequently extended twice.

On July 14, 2015, the P5+1 and the EU announced that they reached a landmark agreement with Iran titled the Joint Comprehensive Plan of Action Regarding the Islamic Republic of Iran's Nuclear Program, or the JCPOA, which is intended to significantly restrict Iran's ability to develop and produce nuclear weapons for 10 years while simultaneously easing sanctions directed toward non-U.S. persons for conduct involving Iran, but taking place outside of U.S. jurisdiction and does not involve U.S. persons. On January 16, 2016, the U.S. joined the EU and the United Nations, or the UN, in lifting a significant number of their nuclear-related sanctions on Iran following an announcement by the International Atomic Energy Agency, or the IAEA, that Iran had satisfied its respective obligations under the JCPOA.

U.S. sanctions prohibiting certain conduct that is now permitted under the JCPOA have not actually been repealed or permanently terminated at this time. Rather, the U.S. government has implemented changes to the sanctions regime by: (1) issuing waivers of certain statutory sanctions provisions; (2) committing to refrain from exercising certain discretionary sanctions authorities; (3) removing certain individuals and entities from the Office of Foreign Assets Control's sanctions lists; and (4) revoking certain Executive Orders and specified sections of Executive Orders. These sanctions will not be permanently "lifted" until the earlier of "Transition Day," set to occur on October 20, 2023, or upon a report from the IAEA stating that all nuclear material in Iran is being used for peaceful activities.

Although it is our intention to comply with the provisions of the JCPOA, there can be no assurance that we will be in compliance in the future as such regulations and U.S. Sanctions may be amended over time, and the U.S. retains the authority to revoke the aforementioned relief if Iran fails to meet its commitments under the JCPOA.

We believe that we are currently in compliance with all applicable sanctions and embargo laws and regulations. In order to maintain compliance, we monitor and review the movement of our vessels on a frequent basis. During 2017, none of our vessels made port calls to Iran.

All or most of our future charters shall include provisions and trade exclusion clauses prohibiting the vessels from calling on ports where there is an existing U.S embargo. Furthermore as of the date hereof, neither the Company nor its subsidiaries have ever entered into or have any future plans to enter into, directly or indirectly, any contracts, agreements or other arrangements with the governments of Iran, Syria or Sudan or any entities controlled by the governments of these countries, including any entities organized in these countries.

Due to the nature of our business and the evolving nature of the foregoing sanctions and embargo laws and regulations, there can be no assurance that we will be in compliance at all times in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations. Any such violation could result in fines, penalties or other sanctions that could severely impact our ability to access U.S. capital markets and conduct our business, and could result in some investors deciding, or being required, to divest their interest, or not to invest, in us. In addition, certain institutional investors may have investment policies or restrictions that prevent them from holding securities of companies that have contracts with countries identified by the U.S. government as state sponsors of terrorism. The determination by these investors not to invest in, or to divest from, our common shares may adversely affect the price at which our common shares trade. Moreover, our charterers may violate applicable sanctions and embargo laws and regulations as a result of actions that do not involve us or our vessels, and those violations could in turn negatively affect our reputation. In addition, our reputation and the market for our securities may be adversely affected if we engage in certain other activities, such as entering into charters with individuals or entities in countries subject to U.S. sanctions and embargo laws that are not controlled by the governments of those countries, or engaging in operations associated with those countries pursuant to contracts with third parties that are unrelated to those countries or entities controlled by their governments. Investor perception of the value of our common shares may be

adversely affected by the consequences of war, the effects of terrorism, civil unrest and governmental actions in these and surrounding countries.

20

---

We are subject to regulation and liability under environmental laws that could require significant expenditures and affect our cash flows and net income.

Our business and the operation of our vessels are materially affected by government regulation in the form of international conventions, national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the country or countries of their registration, including those governing oil spills, discharges to air and water, ballast water management, and the handling and disposal of hazardous substances and wastes. These requirements include, but are not limited to, EU Regulations, the U.S. Oil Pollution Act of 1990, or OPA, the U.S. Comprehensive Environmental Response, Compensation and Liability Act of 1980, or CERCLA, the U.S. Clean Air Act, including its amendments of 1977 and 1990, or the CAA, the U.S. Clean Water Act, or the CWA, the U.S. Maritime Transportation Security Act of 2002, or the MTSA, and regulations of the International Maritime Organization, or the IMO, including but not limited to the International Convention on Civil Liability for Oil Pollution Damage of 1969, as from time to time amended and generally referred to as CLC, the IMO International Convention for the Prevention of Pollution from Ships of 1973, as from time to time amended and generally referred to as MARPOL, including the designation of emission control areas, or ECAs, thereunder, the IMO International Convention for the Safety of Life at Sea of 1974, as from time to time amended and generally referred to as SOLAS, the IMO International Convention on Load Lines of 1966, as from time to time amended and generally referred to as the LL Convention, the International Convention on Civil Liability for Bunker Oil Pollution Damage, generally referred to as the Bunker Convention, the IMO's International Management Code for the Safe Operation of Ships and for Pollution Prevention, generally referred to as the ISM Code, the International Convention for the Control and Management of Ships' Ballast Water and Sediments, generally referred to as the BWM Convention, and the International Ship and Port Facility Security Code, or ISPS. We may also incur additional costs in order to comply with other existing and future regulatory obligations, including, but not limited to, costs relating to air emissions including greenhouse gases, the management of ballast water, maintenance and inspection, development and implementation of emergency procedures and insurance coverage or other financial assurance of our ability to address pollution incidents. These costs could have a material adverse effect on our business, results of operations, cash flows and financial condition and our available cash. Because such conventions, laws and regulations are often revised, we cannot predict the ultimate cost of complying with such conventions, laws and regulations or the impact thereof on the resale price or useful life of vessels we may acquire in the future. Additional conventions, laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our operations.

Recent action by the IMO's Maritime Safety Committee and U.S. agencies indicate that cybersecurity regulations for the maritime industry are likely to be further developed in the near future in an attempt to combat cybersecurity threats. This might cause companies to cultivate additional procedures for monitoring cybersecurity, which could require additional expenses and/or capital expenditures. However, the impact of such regulations is hard to predict at this time.

Increased inspection procedures, tighter import and export controls and new security regulations could increase costs and disrupt our business.

International shipping is subject to security and customs inspection and related procedures in countries of origin, destination and trans-shipment points. Since the events of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security, such as the MTSA. These security procedures can result in delays in the loading, discharging or trans-shipment and the levying of customs duties, fines or other penalties against exporters or importers and, in some cases, vessels. Future changes to the existing security procedures may be implemented that could affect the drybulk sector. These changes have the potential to impose additional financial and legal obligations on vessels and, in certain cases, to render the shipment of certain types of goods uneconomical or impractical. These additional costs could reduce the volume of goods shipped, resulting in a decreased demand for vessels and have a negative effect on our business, revenues and customer relations.

Acts of piracy on ocean-going vessels have recently increased in frequency, which could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea, Strait of Malacca, Arabian Sea, Red Sea, Gulf of Aden off the coast of Somalia, Indian Ocean and Gulf of Guinea. Sea piracy incidents continue to occur, particularly in the South China Sea, the Indian Ocean, and increasingly in the Gulf of Guinea and Strait of Malacca, with drybulk vessels particularly vulnerable to such attacks. If piracy attacks result in regions in which our vessels are deployed being characterized as "war risk" zones by insurers, as the Gulf of Aden temporarily was in May 2008, or Joint War Committee "war and strikes" listed areas, premiums payable for such coverage could increase significantly and such insurance coverage may be more difficult to obtain. In addition, crew and security equipment costs, including costs which may be incurred to employ onboard security armed guards, could increase in such circumstances. Furthermore, while we believe the charterer remains liable for charter payments when a vessel is seized by pirates, the charterer may dispute this and withhold charter hire until the vessel is released. A charterer may also claim that a vessel seized by pirates was not "on-hire" for a certain number of days and is therefore entitled to cancel the charter party, a claim that we would dispute. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, any detention hijacking as a result of an act of piracy against our vessels could have a material adverse impact on our business, financial condition and results of operations.

The operation of drybulk vessels has particular operational risks.

The operation of drybulk vessels has certain unique risks. With a drybulk carrier, the cargo itself and its interaction with the vessel can be an operational risk. By their nature, drybulk cargoes are often heavy, dense, easily shifted, and react badly to water exposure. In addition, drybulk vessels are often subjected to battering treatment during discharging operations with grabs, jackhammers (to pry encrusted cargoes out of the hold) and small bulldozers. This treatment may cause damage to the vessel. Vessels damaged due to treatment during discharging procedures may affect a vessel's seaworthiness while at sea. Hull fractures in drybulk vessels may lead to the flooding of the vessels' holds. If a drybulk carrier suffers flooding in its forward holds, the bulk cargo may become so dense and waterlogged that its pressure may buckle the vessel's bulkheads, leading to the loss of a vessel. If we are unable to adequately maintain our vessels, we may be unable to prevent these events. Any of these circumstances or events could negatively impact our business, financial condition, and results of operations.

If any of our vessels fails to maintain its class certification or fails any annual survey, intermediate survey, or special survey, or if any scheduled class survey takes longer or is more expensive than anticipated, this could have a material adverse impact on our financial condition and results of operations.

The hull and machinery of every commercial vessel must be certified by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the International Convention for the Safety of Life at Sea.

A vessel must undergo annual, intermediate and special surveys. The vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. At the beginning, in between and in the end of this cycle, every vessel is required to undergo inspection of her underwater parts that usually includes dry-docking. These surveys and dry-dockings can be costly and can result in delays in returning a vessel to operation.

If any vessel does not maintain its class, the vessel will not be allowed to carry cargo between ports and cannot be employed or insured. Any such inability to carry cargo or be employed, or any related violation of our loan covenants, could have a material adverse impact on our financial condition and results of operations.

Because seafaring employees we employ are covered by industry-wide collective bargaining agreements, failure of industry groups to renew those agreements may disrupt our operations and adversely affect our earnings.

We employ a large number of seafarers. All of the seafarers employed on the vessels in our fleet are covered by industry-wide collective bargaining agreements that set basic standards. We cannot assure you that these agreements will be renewed as necessary or will prevent labor interruptions. Any labor interruptions could disrupt our operations and harm our financial performance.

Maritime claimants could arrest one or more of our vessels.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder may enforce its lien by arresting a vessel through foreclosure proceedings. The arresting or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest lifted, which would have a material adverse effect on our financial condition and results of operations.

In addition, in some jurisdictions, such as South Africa, under the "sister ship" theory of liability, a claimant may arrest both the vessel which is subject to the claimant's maritime lien and any "associated" vessel, which is any vessel owned or controlled by the same owner. Claimants could try to assert "sister ship" liability against one of our vessels for claims relating to another of our vessels.

Governments could requisition our vessels during a period of war or emergency, resulting in loss of earnings.

A government could requisition for title or hire one or more of our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. Also, a government could requisition a vessel for hire. Requisition for hire occurs when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Generally, requisitions occur during a period of war or emergency. Government requisition of one or more of our vessels could have a material adverse effect on our financial condition and results of operations. The shipping industry has inherent operational risks that may not be adequately covered by our insurance. Further, because we obtain some of our insurance through protection and indemnity associations, we may also be subject to calls or premiums in amounts based not only on our own claim records, but also on the claim records of all other members of the protection and indemnity associations.

We procure insurance for our fleet against risks commonly insured against by vessel owners and operators. Our current insurance includes hull and machinery insurance, war risks insurance, freight, demurrage and defense insurance and protection and indemnity insurance (which includes environmental damage and pollution insurance). We do not expect to maintain for all of our vessels insurance against loss of hire, which covers business interruptions that result from the loss of use of a vessel. We may not be adequately insured against all risks or our insurers may not pay a particular claim. Even if our insurance coverage is adequate to cover our losses, we may not be able to timely obtain a replacement vessel in the event of a loss. Furthermore, in the future, we may not be able to obtain adequate insurance coverage at reasonable rates for our fleet. We may also be subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability. Our insurance policies also contain deductibles, limitations and exclusions which, although we believe are standard in the shipping industry, may nevertheless increase our costs. If our insurance is not enough to cover claims that may arise, the deficiency may have a material adverse effect on our financial condition and results of operations.

We may also be subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability, including pollution-related liability. Our payment of these calls could result in significant expenses to us.

### Risks Relating to Our Company

We are a recently restructured company with a limited history of recent operations on which investors may assess our performance.

In March 2014, we completed a financial restructuring, following which we did not own any vessels. During 2015, we acquired eight of the eleven vessels in our Fleet, and during November 2016, December 2016 and May 2017 we acquired the remaining vessels in our Fleet. As a result, we have a limited operating history since our financial restructuring, and therefore limited historical financial results upon which you can evaluate our restructured operations. We cannot assure you that we will be successful in operating our fleet in the future. We have depended on an entity affiliated with our principal shareholder for financing.

We have relied on Jelco, a company affiliated with Claudia Restis, who is also our principal shareholder, for funding during 2015, 2016 and 2017, for vessel acquisitions and general corporate purposes. We cannot assure you that in the future we will be able to rely on Jelco for financing on similar terms or at all. Any inability to secure financing in the future from Jelco could negatively affect our liquidity position and ability to fund our ongoing operations.

If we fail to manage our planned growth properly, we may not be able to successfully expand our market share.

We acquired three vessels between November 2016 and May 2017, and we may acquire additional vessels in the future. Our ability to manage our growth will primarily depend on our ability to:

- generate excess cash flow so that we can invest without jeopardizing our ability to cover current and foreseeable working capital needs, including debt service;
- raise equity and obtain required financing for our existing and new operations;
- locate and acquire suitable vessels;
- identify and consummate acquisitions or joint ventures;
- integrate any acquired businesses or vessels successfully with our existing operations;
- hire, train and retain qualified personnel and crew to manage and operate our growing business and fleet;
- enhance our customer base; and
- manage our expansion.

Growing any business by acquisitions presents numerous risks such as obtaining acquisition financing on acceptable terms or at all, undisclosed liabilities and obligations, difficulty in obtaining additional qualified personnel, managing relationships with customers and suppliers and integrating newly acquired operations into existing infrastructures. We may not be successful in executing our growth plans and we may incur significant additional expenses and losses in connection therewith.

Purchasing and operating secondhand vessels, such as vessels in our Fleet, may result in increased operating costs and vessel off-hire, which could adversely affect our financial condition and results of operations.

All eleven of the vessels in our Fleet are secondhand vessels. Our inspection of these or other secondhand vessels prior to purchase does not provide us with the same knowledge about their condition and the cost of any required or anticipated repairs that we would have had if these vessels had been built for and operated exclusively by us. We have not received in the past, and do not expect to receive in the future, the benefit of warranties on any secondhand vessels we acquire.

As the vessels in our fleet or other secondhand vessels we may acquire age, they may become less fuel efficient and more costly to maintain and will not be as advanced as recently constructed vessels due to improvements in design, technology and engineering. Rates for cargo insurance, paid by charterers, also increase with the age of a vessel, making older vessels less desirable to charterers.

Rightship, the ship vetting service founded by Rio Tinto and BHP-Billiton, has become a major vetting service in the drybulk shipping industry, which ranks the suitability of vessels based on a scale of one to five stars. Two, six and three of the vessels in our Fleet have five, four and three star risk ratings from Rightship, respectively. There are carriers that may not charter a vessel that Rightship has vetted with fewer than three stars. Therefore, a potentially deteriorated star rating system for our vessels may affect their commercial operation and profitability and vessels in our Fleet with lower ratings may experience challenges in securing charters.

Governmental regulations, safety or other equipment standards related to the age or condition of vessels may require expenditures for alterations, or the addition of new equipment, to our vessels and may restrict the type of activities in which the vessels may engage. As our vessels age, market conditions may not justify those expenditures or enable us to operate our vessels profitably during the remainder of their useful lives.

In addition, unless we maintain cash reserves for vessel replacement, we may be unable to replace the vessels in our fleet upon the expiration of their useful lives. We estimate the useful life of our vessels to be 25 years from the date of initial delivery from the shipyard. Our cash flows and income are dependent on the revenues we earn by chartering our vessels to customers. If we are unable to replace the vessels in our fleet upon the expiration of their useful lives, our business, financial condition and results of operations will be materially adversely affected. Any reserves set aside for vessel replacement would not be available for other cash needs or dividends.

Newbuilding projects are subject to risks that could cause delays.

We may enter into newbuilding contracts in connection with our vessel acquisition strategy. Newbuilding construction projects are subject to risks of delay inherent in any large construction project from numerous factors, including shortages of equipment, materials or skilled labor, unscheduled delays in the delivery of ordered materials and equipment or shipyard construction, failure of equipment to meet quality and/or performance standards, financial or operating difficulties experienced by equipment vendors or the shipyard, unanticipated actual or purported change orders, inability to obtain required permits or approvals, design or engineering changes and work stoppages and other labor disputes, adverse weather conditions or any other events of force majeure. A shipyard's failure to deliver a vessel on time may result in the delay of revenue from the vessel. Any such failure or delay could have a material adverse effect on our operating results.

We may acquire further vessels, and if those vessels are not delivered on time or are delivered with significant defects, our earnings and financial condition could suffer.

We may acquire further vessels in the future. The delivery of these vessels could be delayed or certain events may arise which could result in us not taking delivery of a vessel, such as a total loss of a vessel, a constructive loss of a vessel, or substantial damage to a vessel prior to delivery. A delay in the delivery of any vessels to us, the failure of the contract counterparty to deliver a vessel at all, or us not taking delivery of a vessel could cause us to breach our obligations under a related time charter or could otherwise adversely affect our financial condition and results of operations. In addition, the delivery of any vessel with substantial defects could have similar consequences.

Substantial debt levels could limit our flexibility to obtain additional financing and pursue other business opportunities.

As of November 30, 2017, we had \$216.6 million of outstanding debt, net of unamortized financing fees and the convertible promissory notes issued to Jelco. Moreover, we anticipate that we will incur significant future indebtedness in connection with the acquisition of additional vessels, including any vessel we may acquire with the net proceeds of this offering, although there can be no assurance that we will be successful in identifying further vessels or securing such debt financing. Significant levels of debt could have important consequences to us, including the following:

- our ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may be unavailable on favorable terms;
- we may need to use a substantial portion of our cash from operations to make principal and interest payments on our debt, reducing the funds that would otherwise be available for operations, future business opportunities and any future dividends to our shareholders;
- our debt level could make us more vulnerable than our competitors with less debt to competitive pressures or a downturn in our business or the economy generally; and
- our debt level may limit our flexibility in responding to changing business and economic conditions.

Our ability to service our indebtedness will depend upon, among other things, our future financial and operating performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond our control, as well as the interest rates applicable to our outstanding indebtedness. If our operating income is not sufficient to service our indebtedness, we will be forced to take actions, such as reducing or delaying our business activities, acquisitions, investments or capital expenditures, selling assets, restructuring or refinancing our debt or seeking additional equity capital. We may not be able to effect any of these remedies on satisfactory terms, or at all. In addition, a lack of liquidity in the debt and equity markets could hinder our ability to refinance our debt or obtain additional financing on favorable terms in the future. For more information regarding our current loan facilities, please see "Prospectus Summary—Recent Developments" herein and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Indebtedness" in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

If LIBOR is volatile, it could affect our profitability, earnings and cash flow.

LIBOR has been volatile in the past, with the spread between LIBOR and the prime lending rate widening significantly at times. Because the interest rates borne by most of our outstanding indebtedness fluctuates with changes in LIBOR, significant changes in LIBOR would have a material effect on the amount of interest payable on our debt, which in turn, could have an adverse effect on our financial condition.

Furthermore, historically interest in most loan agreements in our industry has been based on published LIBOR rates. Recently, however, lenders have insisted on provisions that entitle the lenders, in their discretion, to replace published LIBOR as the base for the interest calculation with their cost-of-funds rate. Due to current market practices, we have agreed to such a provision and may be required to do so in future loan agreements. In case our lenders elect to replace LIBOR with their higher cost of funds rate, our lending costs could increase significantly, which would have an adverse effect on our profitability, earnings and cash flow.

Our loan agreements contain, and we expect that other future loan agreements will contain, restrictive covenants that may limit our liquidity and corporate activities, which could limit our operational flexibility and have an adverse effect on our financial condition and results of operations. In addition, because of the presence of cross-default provisions in our loan agreements, a default by us under one loan could lead to defaults under multiple loans. Our loan agreements contain, and we expect that other future loan agreements will contain, customary covenants and event of default clauses, financial covenants, restrictive covenants and performance requirements, which may affect operational and financial flexibility. Such restrictions could affect, and in many respects limit or prohibit, among other things, our ability to pay dividends, incur additional indebtedness, create liens, sell assets, or engage in mergers or acquisitions. These restrictions could limit our ability to plan for or react to market conditions or meet extraordinary capital needs or otherwise restrict corporate activities. There can be no assurance that such restrictions will not adversely affect our ability to finance our future operations or capital needs.

As a result of these restrictions, we may need to seek permission from our lenders and other financing counterparties in order to engage in some corporate actions. Our lenders' and other financing counterparties' interests may be different from ours and we may not be able to obtain their permission when needed. This may prevent us from taking actions that we believe are in our best interests, which may adversely impact our revenues, results of operations and financial condition.

A failure by us to meet our payment and other obligations, including our financial covenants and any security coverage requirements, could lead to defaults under our financing arrangements. Likewise, a decrease in vessel values or adverse market conditions could cause us to breach our financial covenants or security requirements (the market values of drybulk vessels have generally experienced high volatility). In the event of a default that we cannot remedy, our lenders and other financing counterparties could then accelerate their indebtedness and foreclose on the respective vessels in our fleet. The loss of any of our vessels could have a material adverse effect on our business, results of operations and financial condition.

In the recent past, we have obtained waivers and deferrals of most major financial covenants under our loan facilities with our lenders until the second quarter of 2018. In particular, all financial covenants under our loan facilities with our lenders, except for minimum liquidity undertakings for all loan facilities and asset coverage undertakings for Championship, Knightship, Leadership, Lordship and Partnership which are currently applicable, have been either waived until June 30, 2018 or will become effective on that date. However, there can be no assurance that we will obtain similar waivers and deferrals from our lenders in the future if needed.

Because of the presence of cross-default provisions in our loan agreements, a default by us under a loan and the refusal of any one lender to grant or extend a waiver could result in the acceleration of our indebtedness under our other loans. A cross-default provision means that if we default on one loan, we would then default on our other loans containing a cross-default provision.

The failure of our counterparties to meet their obligations under our charter agreements could cause us to suffer losses or otherwise adversely affect our business.

The ability and willingness of each of our counterparties to perform its obligations under charter agreements with us will depend on a number of factors that are beyond our control and may include, among other things, general economic conditions, the condition of the drybulk shipping industry and the industries in which our counterparties operate and the overall financial condition of the counterparties. From time to time, those counterparties may account for a significant amount of our chartering activity and revenues. In addition, in challenging market conditions, there have been reports of charterers renegotiating their charters or defaulting on their obligations under charter agreements, and so our customers may fail to pay charter hire or attempt to renegotiate charter rates. Should a counterparty fail to honor its obligations under agreements with us, it may be difficult to secure substitute employment for such vessel, and any new charter arrangements we secure in the spot market or on time charters could be at lower rates. If our charterers fail to meet their obligations to us or attempt to renegotiate our charter agreements, we could suffer significant losses, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Rising crew costs may adversely affect our profits.

Crew costs are expected to be a significant expense for us. Recently, the limited supply of and increased demand for qualified crew, due to the increase in the size of the global shipping fleet, has created upward pressure on crewing costs. Increases in crew costs may adversely affect our profitability.

We may not be able to attract and retain key management personnel and other employees in the shipping industry, which may negatively affect the effectiveness of our management and our results of operations.

Our success will depend to a significant extent upon the abilities and efforts of our management team, including our ability to retain key members of our management team and the ability of our management to recruit and hire suitable employees. The loss of any of these individuals could adversely affect our business prospects and financial condition. Difficulty in hiring and retaining personnel could adversely affect our results of operations.

Our vessels may suffer damage, and we may face unexpected repair costs, which could adversely affect our cash flow and financial condition.

If our vessels suffer damage, they may need to be repaired at a shipyard facility. The costs of repairs are unpredictable and can be substantial. The loss of earnings while our vessels are being repaired and repositioned, as well as the actual cost of these repairs, would decrease our earnings and reduce the amount of any dividends in the future. We may not have insurance that is sufficient to cover all or any of these costs or losses and may have to pay repair costs not covered by our insurance.

We are exposed to U.S. dollar and foreign currency fluctuations and devaluations that could harm our reported revenue and results of operations.

We generate all of our revenues and incur the majority of our operating expenses in U.S. dollars, but we currently incur many of our general and administrative expenses in currencies other than the U.S. dollar, primarily the euro. Because such portion of our expenses is incurred in currencies other than the U.S. dollar, our expenses may from time to time increase relative to our revenues as a result of fluctuations in exchange rates, particularly between the U.S. dollar and the euro, which could affect the amount of net income that we report in future periods. We may use financial derivatives to operationally hedge some of our currency exposure. Our use of financial derivatives involves certain risks, including the risk that losses on a hedged position could exceed the nominal amount invested in the instrument and the risk that the counterparty to the derivative transaction may be unable or unwilling to satisfy its contractual obligations, which could have an adverse effect on our results.

We are a holding company, and we depend on the ability of our subsidiaries to distribute funds to us in order to satisfy financial obligations or to pay dividends.

We are a holding company and our subsidiaries, which are all wholly-owned by us either directly or indirectly, conduct all of our operations and own all of our operating assets. We have no significant assets other than the equity interests in our wholly-owned subsidiaries. As a result, our ability to make dividend payments depends on our subsidiaries and their ability to distribute funds to us. The ability of a subsidiary to make these distributions could be affected by the covenants in our loan agreements, a claim or other action by a third party, including a creditor, and the laws of Bermuda, the British Virgin Islands, Hong Kong, Liberia, Malta and the Republic of the Marshall Islands, where our vessel-owning subsidiaries are incorporated, which regulate the payment of dividends by companies. If we are unable to obtain funds from our subsidiaries, we may not be able to satisfy our financial obligations.

We face strong competition, and we may not be able to compete for charters with new entrants or established companies with greater resources, which may adversely affect our results of operations.

We employ our vessels in a highly competitive market that is capital intensive and highly fragmented. Competition arises primarily from other vessel owners, some of whom have substantially greater resources than we do.

Competition for the transportation of drybulk cargoes by sea is intense and depends on price, location, size, age, condition and the acceptability of the vessel and its operators to the charterers. Due in part to the highly fragmented market, competitors with greater resources could enter the drybulk shipping industry and operate larger fleets through consolidations or acquisitions and may be able to offer lower charter rates and higher quality vessels than we are able to offer. Although we believe that no single competitor has a dominant position in the markets in which we compete, we are aware that certain competitors may be able to devote greater financial and other resources to their activities than we can, resulting in a significant competitive threat to us. We cannot give assurances that we will continue to compete successfully with our competitors or that these factors will not erode our competitive position in the future. Due to our limited fleet diversification, adverse developments in the maritime drybulk shipping industry would adversely affect our business, financial condition, and operating results.

We depend primarily on the transportation of drybulk commodities. Our relative lack of diversification could make us vulnerable to adverse developments in the maritime drybulk shipping industry, which would have a significantly greater impact on our business, financial condition and operating results than it would if we maintained more diverse assets or lines of business.

We may be subject to litigation that, if not resolved in our favor and not sufficiently insured against, could have a material adverse effect on us.

We may be, from time to time, involved in various litigation matters. These matters may include, among other things, contract disputes, personal injury claims, environmental claims or proceedings, asbestos and other toxic tort claims, employment matters, governmental claims for taxes or duties, and other litigation that arises in the ordinary course of our business. Although we intend to defend these matters vigorously, we cannot predict with certainty the outcome or effect of any claim or other litigation matter, and the ultimate outcome of any litigation or the potential costs to resolve them may have a material adverse effect on us. Insurance may not be applicable or sufficient in all cases or insurers may not remain solvent, which may have a material adverse effect on our financial condition.

Failure to comply with the U.S. Foreign Corrupt Practices Act could result in fines, criminal penalties, and an adverse effect on our business.

We operate throughout the world, including countries known to have a reputation for corruption. We are committed to doing business in accordance with applicable anti-corruption laws and have adopted a code of business conduct and ethics which is consistent and in full compliance with the U.S. Foreign Corrupt Practices Act of 1977. We are subject, however, to the risk that we, our affiliated entities or our or their respective officers, directors, employees and agents may take actions determined to be in violation of such anti-corruption laws, including the U.S. Foreign Corrupt Practices Act. Any such violation could result in substantial fines, sanctions, civil and/or criminal penalties, curtailment of operations in certain jurisdictions, and might adversely affect our business, results of operations or financial condition. In addition, actual or alleged violations could damage our reputation and ability to do business. Furthermore, detecting, investigating, and resolving actual or alleged violations is expensive and can consume significant time and attention of our senior management.

We depend on our commercial and technical managers to operate our business and our business could be harmed if our managers fail to perform their services satisfactorily.

Pursuant to our management agreements, V.Ships provides us with technical, general administrative and support services (including vessel maintenance, crewing, purchasing, shipyard supervision, assistance with regulatory compliance, accounting related to vessels and provisions). Fidelity provides us with commercial management services for our vessels and Seanergy Management Corp., or Seanergy Management, our wholly owned subsidiary, provides us with certain other management services. Our operational success depends significantly upon V.Ships, Fidelity's and Seanergy Management's satisfactory performance of these services. Our business would be harmed if V.Ships, Fidelity or Seanergy Management failed to perform these services satisfactorily. In addition, if our management agreements with either V.Ships, Fidelity or Seanergy Management were to be terminated or if their terms were to be altered, our business could be adversely affected, as we may not be able to immediately replace such services, and even if replacement services were immediately available, the terms offered could be less favorable than those under our management agreements.

Our ability to compete for and enter into new period time and spot charters and to expand our relationships with our existing charterers will depend largely on our relationship with our commercial manager, Fidelity, and its reputation and relationships in the shipping industry. If Fidelity suffers material damage to its reputation or relationships, it may harm our ability to:

- renew existing charters upon their expiration;
- obtain new charters;
- obtain financing on commercially acceptable terms;
- maintain satisfactory relationships with our charterers and suppliers; and
- successfully execute our business strategies.

If our ability to do any of the things described above is impaired, it could have a material adverse effect on our business, financial condition and results of operations.

Our managers are each privately held companies and there is little or no publicly available information about them. The ability of V.Ships, Fidelity and Seanergy Management to render management services will depend in part on their own financial strength. Circumstances beyond our control could impair their financial strength, and because each is a privately held company, information about their financial strength is not available. As a result, we and our shareholders might have little advance warning of financial or other problems affecting them even though their financial or other problems could have a material adverse effect on us.

Management fees will be payable to our technical manager regardless of our profitability, which could have a material adverse effect on our business, financial condition and results of operations.

Pursuant to our technical management agreements with V.Ships, we paid a monthly fee of \$9,650 per vessel in 2016 and a monthly fee of \$8,000 per vessel starting January 1, 2017 in exchange for V.Ships providing technical, support and administrative services. The management fees do not cover expenses such as voyage expenses, vessel operating expenses, maintenance expenses, crewing costs, which are reimbursed by us to the technical manager. The management fees are payable whether or not our vessels are employed and regardless of our profitability, and we have no ability to require our technical managers to reduce the management fees if our profitability decreases, which could have a material adverse effect on our business, financial condition and results of operations.

The majority of the members of our shipping committee are appointees nominated by Jelco, which could create conflicts of interest detrimental to us.

Our board of directors has created a shipping committee, which has been delegated exclusive authority to consider and vote upon all matters involving shipping and vessel finance, subject to certain limitations. Jelco has the right to appoint two of the three members of the shipping committee and as a result effectively controls all decisions with respect to our shipping operations that do not involve a transaction with our Sponsor. Mr. Stamatiou Tsantanis, Ms. Christina Anagnostara and Mr. Elias Culucundis currently serve on our shipping committee.

We may be classified as a passive foreign investment company, or PFIC, which could result in adverse U.S. federal income tax consequences to U.S. holders of our common stock.

A foreign corporation will be treated as a "passive foreign investment company," or PFIC, for U.S. federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of certain types of "passive income" or (2) at least 50% of the average value of the corporation's assets produce or are held for the production of those types of "passive income." For purposes of these tests, "passive income" includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute "passive income." U.S. shareholders of a PFIC are subject to a disadvantageous U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Based upon our current and anticipated method of operations, we do not believe that we should be a PFIC with respect to any taxable year. In this regard, we intend to treat our gross income from time charters as active services income, rather than rental income. Accordingly, our income from our time chartering activities should not constitute "passive income," and the assets that we own and operate in connection with the production of that income should not constitute passive asset. There is substantial legal authority supporting this position consisting of case law and U.S. Internal Revenue Service, or IRS, pronouncements concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes. However, it should be noted that there is also authority which characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, no assurance can be given that the IRS or a court of law will accept this position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. Moreover, no assurance can be given that we would not constitute a PFIC for any future taxable year if the nature and extent of our operations change.

If the IRS were to find that we are or have been a PFIC for any taxable year, our U.S. shareholders would face adverse U.S. federal income tax consequences and certain information reporting requirements. Under the PFIC rules, unless those shareholders make an election available under the United States Internal Revenue Code of 1986 as amended, or the Code (which election could itself have adverse consequences for such shareholders), such shareholders would be liable to pay U.S. federal income tax at the then prevailing income tax rates on ordinary income plus interest upon excess distributions and upon any gain from the disposition of their shares of our common stock, as if the excess distribution or gain had been recognized ratably over the shareholder's holding period of the shares of our common stock. Similar consequences would apply to holders of our warrants. See "Tax Considerations – U.S. Federal Income Tax Consequences – U.S. Federal Income Taxation of U.S. Holders - Passive Foreign Investment Company Rules" for a more comprehensive discussion of the U.S. federal income tax consequences to U.S. shareholders if we are treated as a PFIC.

We may have to pay tax on U.S. source income, which would reduce our earnings.

Under the Code, 50% of the gross shipping income of a vessel owning or chartering corporation, such as us and our subsidiaries, that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States, exclusive of certain U.S. territories and possessions, ("U.S. source gross shipping income") may be subject to a 4% U.S. federal income tax without allowance for deduction, unless that corporation qualifies for exemption from tax under Section 883 of the Code and the applicable Treasury Regulations promulgated thereunder. We did not qualify for exemption from the 4% tax under Section 883 for our 2016 taxable year as we did not satisfy one of the ownership tests described in "Tax Considerations – U.S. Federal Income Tax Consequences – U.S. Federal Income Taxation of U.S. Holders - Passive Foreign Investment Company Rules" for such taxable year. The ownership tests require us, inter alia, to establish or substantiate sufficient ownership of our common shares by one or more "qualified" shareholders. Some of our charterparties contain clauses that permit us to seek reimbursement from charterers of any U.S. tax paid. We have sought reimbursement from such charterers, though we may not be successful in this regard.

Due to the factual nature of the issues involved, we can give no assurances on the tax-exempt status of ourselves or that of any of our subsidiaries for our 2017 or subsequent taxable year. If we or our subsidiaries are not entitled to exemption under Section 883 for any such taxable year, we or our subsidiaries could be subject for those years to a 4% U.S. federal income tax on any shipping income such companies derived during the year that is attributable to the transport of cargoes to or from the United States. The imposition of this taxation would have a negative effect on our business and would result in decreased earnings available for distribution to our shareholders.

A cyber-attack could materially disrupt our business.

We rely on information technology systems and networks in our operations and administration of our business. Our business operations could be targeted by individuals or groups seeking to sabotage or disrupt our information technology systems and networks, or to steal data. A successful cyber-attack could materially disrupt our operations, including the safety of our operations, or lead to unauthorized release of information or alteration of information in our systems. Any such attack or other breach of our information technology systems could have a material adverse effect on our business and results of operations.

The Public Company Accounting Oversight Board inspection of our independent accounting firm, could lead to findings in our auditors' reports and challenge the accuracy of our published audited consolidated financial statements. Auditors of U.S. public companies are required by law to undergo periodic Public Company Accounting Oversight Board, or PCAOB, inspections that assess their compliance with U.S. law and professional standards in connection with performance of audits of financial statements filed with the SEC. For several years certain European Union countries, including Greece, did not permit the PCAOB to conduct inspections of accounting firms established and operating in such European Union countries, even if they were part of major international firms. Accordingly, unlike for most U.S. public companies, the PCAOB was prevented from evaluating our auditor's performance of audits and its quality control procedures, and, unlike shareholders of most U.S. public companies, we and our shareholders were deprived of the possible benefits of such inspections. During 2015, Greece agreed to allow the PCAOB to conduct inspections of accounting firms operating in Greece. In the future, such PCAOB inspections could result in findings in our auditors' quality control procedures, question the validity of the auditor's reports on our published consolidated financial statements and the effectiveness of our internal control over financial reporting, and cast doubt upon the accuracy of our published audited financial statements.

#### Risks Relating to Our Common Shares and to the Offering

The market price of our common shares has been and may in the future be subject to significant fluctuations. Further, there is no guarantee of a continuing public market for you to resell our common shares.

Our common shares commenced trading on the Nasdaq Global Market on October 15, 2008. Since December 21, 2012, our common shares have traded on the Nasdaq Capital Market. We cannot assure you that an active and liquid public market for our common shares will continue.

The market price of our common shares has been and may in the future be subject to significant fluctuations as a result of many factors, some of which are beyond our control. Among the factors that have in the past and could in the future affect our stock price are:

- quarterly variations in our results of operations;
- changes in market valuations of similar companies and stock market price and volume fluctuations generally;
- changes in earnings estimates or the publication of research reports by analysts;
- speculation in the press or investment community about our business or the shipping industry generally;
- strategic actions by us or our competitors such as acquisitions or restructurings;
- the thin trading market for our common shares, which makes it somewhat illiquid;
- regulatory developments;
- additions or departures of key personnel;
- general market conditions; and
- domestic and international economic, market and currency factors unrelated to our performance.

The stock markets in general, and the markets for drybulk shipping and shipping stocks in particular, have experienced extreme volatility that has sometimes been unrelated to the operating performance of individual companies. These broad market fluctuations may adversely affect the trading price of our common stock.

Additionally, there is no guarantee of a continuing public market for you to resell our common shares. Our common shares now trade on the Nasdaq Capital Market. We cannot assure you that an active and liquid public market for our common shares will continue.

The declaration and payment of dividends will always be subject to the discretion of our board of directors and will depend on a number of factors. Our board of directors may not declare dividends in the future.

The declaration, timing and amount of any dividend is subject to the discretion of our board of directors and will be dependent upon our earnings, financial condition, market prospects, capital expenditure requirements, investment opportunities, restrictions in our loan agreements, the provisions of Marshall Islands law affecting the payment of dividends to shareholders, overall market conditions and other factors. Our board of directors may not declare dividends in the future.

Marshall Islands law generally prohibits the payment of dividends if the company is insolvent or would be rendered insolvent upon payment of such dividend, and dividends may be declared and paid out of our operating surplus. Dividends may also be declared or paid out of net profits for the fiscal year in which the dividend is declared and for the preceding fiscal year. We may be unable to pay dividends in the anticipated amounts or at all.

Anti-takeover provisions in our amended and restated articles of incorporation and by-laws could make it difficult for shareholders to replace or remove our current board of directors or could have the effect of discouraging, delaying or preventing a merger or acquisition, which could adversely affect the market price of our common stock.

Several provisions of our amended and restated articles of incorporation and by-laws could make it difficult for shareholders to change the composition of our board of directors in any one year, preventing them from changing the composition of our management. In addition, the same provisions may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable.

These provisions:

- authorize our board of directors to issue "blank check" preferred stock without shareholder approval;
- provide for a classified board of directors with staggered, three-year terms;
- require a super-majority vote in order to amend the provisions regarding our classified board of directors with staggered, three-year terms;
- permit the removal of any director from office at any time, with or without cause, at the request of the shareholder group entitled to designate such director; and
- prevent our board of directors from dissolving the shipping committee or altering the duties or composition of the shipping committee without an affirmative vote of not less than 80% of the board of directors.

These anti-takeover provisions could substantially impede the ability of shareholders to benefit from a change in control and, as a result, may adversely affect the market price of our common shares and your ability to realize any potential change of control premium.

Issuance of preferred stock may adversely affect the voting power of our shareholders and have the effect of discouraging, delaying or preventing a merger or acquisition, which could adversely affect the market price of our common shares.

Our amended and restated articles of incorporation currently authorize our board of directors to issue preferred shares in one or more series and to determine the rights, preferences, privileges and restrictions, with respect to, among other things, dividends, conversion, voting, redemption, liquidation and the number of shares constituting any series without shareholders' approval. If our board of directors determines to issue preferred shares, such issuance may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable. The issuance of preferred shares with voting and conversion rights may also adversely affect the voting power of the holders of common shares. This could substantially impede the ability of public shareholders to benefit from a change in control and, as a result, may adversely affect the market price of our common shares and your ability to realize any potential change of control premium.

Jelco and Comet Shipholding Inc., are able to control the outcome of all matters requiring a shareholder vote, and their interests could conflict with the interests of our other shareholders.

Based on documents publicly filed with the Commission, Jelco and Comet Shipholding Inc., or Comet, both companies affiliated with our Sponsor, currently collectively own approximately 16,763,774, or approximately 45.3%, of our outstanding common shares. Jelco may also acquire up to 43,016,668 additional common shares upon conversion of the convertible promissory notes issued to it by the Company, in which case our Sponsor would own approximately 74.7 % of our outstanding common shares, based on our current number of common shares outstanding. As a result, they may be able to control the outcome of all matters requiring a shareholder vote. This concentration of ownership may delay, deter or prevent acts that would be favored by our other shareholders or deprive shareholders of an opportunity to receive a premium for their shares as part of a sale of our business, and it is possible that the interests of our Sponsor may in some cases conflict with our interests and the interests of our other holders of shares. For example, conflicts of interest may arise between us, on one hand, and our Sponsor or affiliated entities, on the other hand, which may result in the transactions on terms not determined by market forces. Any such conflicts of interest could adversely affect our business, financial condition and results of operations, and the trading price of our common shares. In addition, this concentration of share ownership may adversely affect the trading price of our shares because investors may perceive disadvantages in owning shares in a company with controlling shareholders.

We may issue additional common shares or other equity securities without shareholder approval, which would dilute our existing shareholders' ownership interests and may depress the market price of our common stock.

We may issue additional common shares or other equity securities of equal or senior rank in the future without shareholder approval in connection with, among other things, future vessel acquisitions, the repayment of outstanding indebtedness, and the conversion of convertible financial instruments.

Our issuance of additional common shares or other equity securities of equal or senior rank in these situations would have the following effects:

- our existing shareholders' proportionate ownership interest in us would decrease;
- the proportionate amount of cash available for dividends payable on our common shares could decrease;
- the relative voting strength of each previously outstanding common share could be diminished; and
- the market price of our common shares could decline.

In addition, we may issue additional common shares upon any conversion of our outstanding convertible promissory notes issued to Jelco. As of November 30, 2017, Jelco had the right to acquire 4,222,223 common shares upon exercise of a conversion option pursuant to the convertible promissory note dated March 12, 2015, as amended issued by the Company to Jelco, 23,516,667 common shares upon exercise of a conversion option pursuant to the revolving convertible promissory note dated September 7, 2015, as amended, issued by the Company to Jelco and 15,277,778 common shares upon exercise of a conversion option pursuant to the convertible promissory note dated September 27, 2017, issued by the Company to Jelco. Under each of the convertible promissory notes, Jelco may, at its option, convert the principal amount under the note at any time into common shares at a conversion price of \$0.90 per share. Our issuance of additional common shares in such instance would cause the proportionate ownership interest in us of our existing shareholders, other than Jelco, to decrease; the relative voting strength of each previously outstanding common share held by our existing shareholders, other than the converting noteholder, to decrease; and the market price of our common shares could decline. In addition, the conversion price may be reduced leading to the issuance of additional common shares.

We are incorporated in the Republic of the Marshall Islands, which does not have a well-developed body of corporate law, which may negatively affect the ability of shareholders to protect their interests.

Our corporate affairs are governed by our amended and restated articles of incorporation, our amended and restated by-laws and by the Marshall Islands Business Corporations Act, or the BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the laws of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain U.S. jurisdictions. Shareholder rights may differ as well. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a U.S. jurisdiction.

36

---

USE OF PROCEEDS

We estimate that we will receive net proceeds of approximately \$      million, and approximately \$      million if the underwriters exercise their option to purchase additional shares in full, after deducting underwriting discounts and commissions and estimated expenses payable by us.

We intend to use all of the net proceeds of this offering for general corporate purposes which may include, among other things, prepaying debt or partially funding the acquisition of modern Capesize drybulk vessels in accordance with our growth strategy. However, we do not currently have definitive plans for any debt prepayments nor have we identified any potential acquisitions, and we can provide no assurance that we will be able to complete any debt prepayment or the acquisition of any vessel that we are able to identify.

37

---

#### DIVIDEND POLICY

The declaration, timing and amount of any dividend is subject to the discretion of our board of directors and will be dependent upon our earnings, financial condition, market prospects, capital expenditure requirements, investment opportunities, restrictions in our loan agreements, the provisions of the Marshall Islands law affecting the payment of dividends to shareholders, overall market conditions and other factors. We have not declared any dividends since our inception. Our board of directors may review and amend our dividend policy from time to time in light of our plans for future growth and other factors. In addition, since we are a holding company with no material assets other than the shares of our subsidiaries and affiliates through which we conduct our operations, our ability to pay dividends will depend on our subsidiaries and affiliates distributing to us their earnings and cash flow. Some of our loan agreements limit our ability to pay dividends and our subsidiaries' ability to make distributions to us. Please see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Indebtedness." in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

## PRICE RANGE OF OUR COMMON SHARES

Our common shares are traded on the Nasdaq Capital Market, under the symbol "SHIP". The following table sets forth the high and low closing prices for each of the periods indicated for our common shares as adjusted for the one-for-fifteen reverse stock split effective June 24, 2011 and the one-for-five reverse stock split effective January 8, 2016:

	High	Low
For the Year ended December 31:		
2016	\$ 7.20	\$ 1.15
2015	6.75	2.75
2014	9.95	4.13
2013	12.30	4.00
2012	21.15	5.20

## For the Quarter Ended:

September 30, 2017	\$ 1.23	\$ 0.71
June 30, 2017	1.20	0.61
March 31, 2017	1.25	0.76
December 31, 2016	7.20	1.15
September 30, 2016	6.20	2.06
June 30, 2016	3.01	2.10
March 31, 2016	5.54	1.58
December 31, 2015	4.35	3.00
September 30, 2015	6.75	3.02
June 30, 2015	4.10	2.75
March 31, 2015	4.50	3.25

## For the Month:

December 2017 (up to December 1, 2017)	\$ 1.06	\$ 1.06
November 2017	1.43	0.93
October 2017	1.25	0.96
September 2017	1.23	1.09
August 2017	1.13	0.71
July 2017	1.07	0.72
June 2017	1.20	0.61

## CAPITALIZATION

The following table sets forth our capitalization as of September 30, 2017:

- on an actual basis;
- on an as adjusted basis, to give effect to (a) an installment repayment of \$1.6 million on October 2, 2017 under our UniCredit Bank AG loan facility, (b) an installment repayment of \$0.4 million on November 27, 2017 under our ATB loan facility; and
- on an as further adjusted basis to give effect to the sale of common shares in this offering.

There have been no significant adjustments to our capitalization since September 30, 2017, other than the adjustments described above. The historical data in the table is derived from, and should be read in conjunction with, our historical financial statements included in this prospectus. You should also read this table in conjunction with the information in the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Indebtedness." in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

(All figures in thousands of U.S. dollars, except for share amounts)	Actual	As Adjusted (unaudited)	As Further Adjusted (unaudited)
<b>Debt:</b>			
Secured long-term debt and due to related parties, net of deferred finance costs	\$217,031	\$ 215,079	\$ 215,079
Unsecured convertible promissory notes	5,988	5,988	5,988
<b>Total Debt</b>	<b>\$223,019</b>	<b>\$ 221,067</b>	<b>\$ 221,067</b>
<b>Shareholders' equity:</b>

## DILUTION

Dilution or accretion is the amount by which the offering price paid by the purchasers of our common shares in this offering will differ from the net tangible book value per common share after the offering. The net tangible book value per common share is equal to the amount of our total tangible assets (total assets less intangible assets) less total liabilities divided by the number of common shares outstanding. The historical net tangible book value as of September 30, 2017 was \$41.4 million in total and \$1.12 per share for the number of shares of the existing shareholders that were outstanding at that date. The as adjusted<sup>(1)</sup> net tangible book value as of September 30, 2017 was \$41.4 million in total and \$0.52 per share for the as adjusted number of shares of the existing shareholders that were outstanding at that date.

The as further adjusted<sup>(2)</sup> net tangible book value as of September 30, 2017 would have been \$ , or \$ per common share after the issuance and sale by us of common shares at \$ per share in this offering, after deducting estimated expenses related to this offering. This represents an immediate increase in net tangible book value of \$ per share to the existing shareholders and an immediate dilution in net tangible book value of \$ per share to new investors.

The following table illustrates the pro forma per share dilution and increase in net tangible book value as of September 30, 2017:

Public offering price per common share	\$
As adjusted <sup>(1)</sup> net tangible book value per share before this offering	\$0.52
Increase in as adjusted net tangible book value attributable to new investors in this offering	\$
As further adjusted <sup>(2)</sup> net tangible book value per share after giving effect to this offering	\$
Dilution per share to new investors	\$

The following table summarizes, as of September 30, 2017, on an as further adjusted basis<sup>(2)</sup> for this public offering, the difference between the number of common shares acquired from us, the total amount paid and the average price per share paid by the existing shareholders and the number of common shares acquired from us, the total amount paid and the average price per share paid by you as a new investor in this offering, based upon the public offering price of \$ per share.

	As Further Adjusted		Total Consideration Amount (In USD)	Average Price Per Share
	Shares Outstanding <sup>(2)</sup>	Percent		
Existing shareholders	%	\$	%	\$
New investors <sup>(*)</sup>	%	\$	%	\$
Total	%	\$	%	\$

(\*) Before deducting estimated expenses of this offering of \$ million.

(1) The "as adjusted" amounts include the adjustments described in the second bullet of the section entitled "Capitalization" and the issuance of 4,222,223 common shares upon exercise of a conversion option pursuant to the convertible promissory note, dated March 12, 2015, as amended, that we issued to Jelco, 23,516,667 common shares upon exercise of a conversion option pursuant to the convertible promissory note, dated September 7, 2015, as amended, that we issued to Jelco and 15,277,778 common shares upon exercise of a conversion option pursuant to the convertible promissory note, dated September 27, 2017, that we issued to Jelco. Under each of the convertible promissory notes, Jelco, an entity affiliated with our Sponsor, may, at its option, convert the principal amount under each note at any time into common shares at a conversion price of \$0.90 per share. As of November 30, 2017, \$3.8 million was outstanding under the convertible promissory note dated March 12, 2015, as amended,

Edgar Filing: Seanergy Maritime Holdings Corp. - Form F-1/A

\$21.2 million was outstanding under the convertible promissory note dated September 7, 2015, as amended, and \$13.75 million was outstanding under the convertible promissory note dated September 27, 2017.

(2) The "as further adjusted" amounts include the adjustments described in (1) above and the adjustment described in the third bullet of the section entitled "Capitalization".

## BUSINESS

This discussion contains forward-looking statements that involve risks, uncertainties, and assumptions. Actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors. See "Cautionary Statement Regarding Forward-Looking Statements" and "Risk Factors".

### Overview

We are an international shipping company specializing in the worldwide seaborne transportation of drybulk commodities. We believe we have established a reputation in the international drybulk shipping industry for operating and maintaining vessels with high standards of performance, reliability and safety. We have assembled a management team comprised of executives who have extensive experience operating large and diversified fleets, and who have strong ties to a number of international charterers.

In 2015, we acquired eight modern drybulk vessels (Capesize and Supramaxes), in 2016, we acquired two Capesize drybulk vessels and in 2017, we acquired an additional Capesize drybulk vessel. We refer to the eleven vessels we presently own as our Fleet. Capesize vessels range in size between 150,000 to 190,000 dwt. Supramax vessels range in size between 40,000 to 65,000 dwt.

In particular, since March 2015, we have invested \$275 million to acquire our Fleet. More specifically, in March 2015, we took delivery of the first vessel in our Fleet, a secondhand Capesize vessel, *Leadership*, from an unaffiliated third party for \$17.1 million. The acquisition was funded with proceeds from a senior secured loan, a convertible promissory note issued to an entity affiliated with our Sponsor, and the sale of common shares to our Sponsor. Between September and December of 2015 we took delivery of seven additional secondhand drybulk vessels, consisting of five Capesize vessels, *Premiership*, *Geniuship*, *Gloriuship*, *Squireship* and *Championship*, and two Supramax vessels, *Gladiatorship*, and *Guardianship*, from entities affiliated with our Sponsor for an aggregate purchase price of \$183.4 million. These acquisitions were funded with proceeds from senior secured loans, a revolving convertible promissory note issued to an entity affiliated with our Sponsor, and the sale of common shares to our Sponsor. During November and December of 2016, we took delivery of two additional secondhand Capesize vessels, *Lordship* and *Knightship* from an unaffiliated third party for an aggregate purchase price of \$41.5 million. The acquisitions were funded with proceeds from a senior secured loan with NSF, and through a loan facility with Jelco, a company affiliated with our principal shareholder. In May 2017, we took delivery of an additional secondhand Capesize vessel, *Partnership*, from an unaffiliated third party for an aggregate purchase price of \$32.65 million. The acquisition was funded with proceeds from a senior secured loan with ATB, and through a new loan facility with Jelco.

### History and Development

We were incorporated under the laws of the Republic of the Marshall Islands, pursuant to the Marshall Islands BCA, on January 4, 2008, originally under the name Seanergy Merger Corp. We changed our name to Seanergy Maritime Holdings Corp. on July 11, 2008.

In August 2012, we began discussions with our former lenders to finalize the satisfaction and release of our obligations under certain of our former loan facility agreements and the amendment of the terms of certain of our loan facility agreements. Between January 2012 and March 2014, we sold all 20 of our former vessels, in some cases by transferring ownership of certain of our vessel-owning subsidiaries to third parties nominated by our former lenders in connection with our restructuring. In March 2014, we completed our restructuring, following which we did not own any vessels and did not have any long-term debt obligations.

On March 12, 2015 we entered into share purchase agreements with Jelco and Stamatios Tsantanis, our Chairman, Chief Executive Officer and Interim Chief Financial Officer, under which we sold 5,000,100 of our common shares to Jelco for \$4.5 million and 333,400 of our common shares to Mr. Tsantanis for \$0.3 million, equal to a price per share of \$0.90. As part of the transaction, the purchasers received customary registration rights.

On March 19, 2015, we acquired a 2001 Capesize, 171,199 DWT vessel, which was renamed Leadership, from an unaffiliated third party. The acquisition of the vessel was financed with proceeds from (i) the convertible promissory note dated March 12, 2015, issued by the Company to Jelco, (ii) a loan agreement dated March 06, 2015 for \$8.75 million with Alpha Bank A.E. and (iii) a share purchase agreement dated March 12, 2015 with Jelco for the issuance of 5,000,100 shares of our common stock in exchange for \$4.5 million, equal to a price per share of \$0.90. This acquisition was made pursuant to a memorandum of agreement between our vessel-owning subsidiary and the seller, dated December 23, 2014.

On August 6, 2015, we entered into a purchase agreement and seven memoranda of agreement with entities affiliated with our Sponsor to acquire seven secondhand drybulk vessels, consisting of five Capesize and two Supramax vessels, for an aggregate purchase price of \$183.4 million. We took delivery of the seven vessels between September and December 2015. The acquisition costs of the seven vessels were funded with proceeds from a \$44.4 million senior secured loan facility with HSH Nordbank AG to finance the acquisition of the Geniuship and Gloriuship, a \$52.7 million secured term loan facility with UniCredit Bank AG to partly finance the acquisition of the Premiership, Gladiatorship and Guardianship, a \$33.8 million secured loan facility with Alpha Bank A.E. to partly finance the acquisition of the Squireship, a \$39.4 million secured term loan facility with Natixis to partly finance the acquisition of the Championship, the Share Purchase Agreement (defined below) and the convertible promissory note dated September 7, 2015, issued by the Company to Jelco.

On September 7, 2015, we entered into a share purchase agreement with Jelco under which we agreed to sell Jelco 10,022,240 of our common shares in three tranches for \$9.0 million, or the Share Purchase Agreement. The common shares were sold at a price of \$0.90 per share. On September 11, 2015, the first tranche of 3,889,980 common shares was sold for \$3.5 million. On September 29, 2015, the second tranche of 2,655,740 common shares was sold for \$2.4 million. On October 21, 2015, the third tranche of 3,476,520 common shares was sold for \$3.1 million. As part of the transaction, the purchaser received customary registration rights.

On January 7, 2016, we effected a one-for-five reverse split of our common stock, which was approved at a special meeting of our shareholders on September 16, 2014. The reverse stock split became effective and the common stock began trading on a split-adjusted basis on the Nasdaq Capital Market at the opening of trading on January 8, 2016. When the reverse stock split became effective, every five shares of our issued and outstanding common stock was automatically combined into one issued and outstanding share of common stock without any change in the par value per share or the total number of authorized shares. This reduced the number of outstanding shares of our common stock from 97,612,971 shares on January 7, 2016, to 19,522,413 shares on January 8, 2016, after adjusting for fractional shares. On January 27, 2016, we received a letter from Nasdaq confirming that we had regained compliance with Nasdaq's minimum bid price requirement.

On August 10, 2016, we sold 1,180,000 of our common shares to an unaffiliated institutional investor at a public offering price of \$4.15 per share, for aggregate gross proceeds of \$4.9 million. The net proceeds from the sale of the common shares, after deducting placement agent fees and related offering expenses, were approximately \$4.1 million. On September 26, 2016, we entered into two memoranda of agreements with an unaffiliated third party for the purchase of Lordship and Knightship, two secondhand Capesize vessels, for an aggregate purchase price of \$41.5 million. We paid an initial security deposit in the amount of \$4.2 million, which was funded through the Jelco Loan Facility. The balance of the purchase price of Lordship was funded with \$8.2 million from the Jelco Loan Facility, \$7.5 million from the NSF Loan Facility and \$3.0 million of cash on hand. The balance of the purchase price of Knightship was funded with \$18.7 million from the NSF Loan Facility.

In a direct offering that was completed on November 23, 2016, we sold 1,305,000 common shares to unaffiliated institutional investors at a public offering price of \$2.75 per share, for aggregate gross proceeds of \$3.6 million. The net proceeds from the sale of the common shares, after deducting fees and expenses, were approximately \$3.2 million.

In a registered public offering that was completed on December 13, 2016, we sold 10,000,000 of our common shares and Class A Warrants to purchase 10,000,000 of our common shares at a combined public offering price of \$1.50 per share and warrant for an aggregate amount of \$15.0 million gross proceeds. In connection with the sale of the securities, we issued to the representative of the underwriters a Representative's Warrant to purchase 500,000 of our common shares.

On December 15, 2016, we issued an aggregate of 772,800 of our common shares to certain of our directors, officers and employees pursuant to our 2011 Equity Incentive Plan.

Pursuant to the exercise of the over-allotment option granted to the underwriters in the public offering that was completed on December 13, 2016, on December 21, 2016, we sold an additional 1,300,000 of our common shares and Class A Warrants to purchase 1,500,000 of our common shares for an aggregate amount of \$2.0 million gross proceeds. In connection with the sale of the securities, we issued to the representative of the underwriters a Representative's Warrant to purchase 65,000 of our common shares.

On April 10, 2017, we issued 125,000 of our common shares in a private placement to a third-party service provider as compensation.

Between February 6, 2017 and April 27, 2017, we sold 2,782,136 of our common shares for an aggregate amount of approximately \$2.9 million gross proceeds in a public at-the-market offering pursuant to the Equity Distribution Agreement, dated February 3, 2017, between us and Maxim Group LLC.

On May 31, 2017, we acquired the Partnership, from an unaffiliated third party. The acquisition of the vessel was financed with proceeds from (i) the Partnership loan facility dated May 24, 2017 and (ii) the ATB Loan Facility. This acquisition was made pursuant to a memorandum of agreement between our vessel-owning subsidiary and the seller, dated March 28, 2017.

On September 27, 2017, we issued a \$13.75 million convertible promissory note to Jelco. As part of the transaction, Jelco received customary registration rights with respect to all common shares beneficially owned by Jelco also providing for customary registration rights for all Jelco notes. Of the \$13.75 million drawn down under the note, \$4.75 million was used to make a mandatory prepayment under the Jelco Loan Facility, \$7.7 million was used to partially fund the refinancing of our Natixis facility and the balance was used for general corporate purposes.

For more information regarding our current loan facilities and convertible promissory notes, please see "Prospectus Summary—Recent Developments" herein and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Indebtedness" in our unaudited interim consolidated financial statements for the nine months ended September 30, 2017 in our Report on Form 6-K filed with the Commission on November 7, 2017, which is incorporated by reference herein.

#### Competitive Strengths

We believe that we possess a number of strengths that provide us with a competitive advantage in the drybulk shipping market, including the following:

**Modern, High Quality Fleet.** Our Fleet has an average age of 8.6 years as of the date of this prospectus, compared to world-wide Supramax and Capesize drybulk market industry average ages of 9.2 and 8.7 years, respectively, as of that date. We believe that owning a young, modern and well-maintained fleet provides us with a competitive advantage in securing favorable time and spot charters. All of our vessels have been built in high quality shipyards that we view as having a longstanding reputation for building such vessels. We expect that the combination of these factors will provide us with a competitive advantage in securing favorable employment for our vessels, although it is possible that the daily rates we receive on future time and spot charters may be lower depending on market fluctuations.

Focus on Capesize Vessels. Our fleet primarily consists of Capesize vessels. We believe that the Capesize sector will benefit significantly from the increase in demand for commodities such as iron ore and coal. According to Karatzas Marine Advisors & Co. seaborne transportation has increased by 1.7% in 2016 and is expected to increase by 4.5% in 2017. In addition, the newbuilding orderbook has seen a significant reduction for Capesize vessels, currently standing at approximately 3% of the current fleet, lowest in history, compared to 35.4% that has been the average ratio of newbuilding orderbook of the fleet for the last 10 years.

Experienced Management. Our Company's leadership has considerable depth of shipping industry expertise. Mr. Tsantanis, our Chairman, Chief Executive Officer and interim Chief Financial Officer, brings more than 19 years of experience in shipping and finance and has held senior management positions in prominent shipping companies.

Access to Attractive Chartering Opportunities. Fidelity, our commercial manager, has established strong global relationships with charterers and brokers. We believe Fidelity's relationships with these counterparties should provide us with access to attractive chartering opportunities.

#### Business Strategy

Our strategy is to manage and expand our fleet in a manner that produces strong cash flows and allows us to build our position as a reliable provider of international seaborne transportation services for drybulk commodities. The key elements of our business strategy include:

Expanding Our Fleet Through Accretive Acquisitions. We intend to acquire drybulk carriers with fuel-efficient specifications and carrying capacities of greater than 170,000 dwt through timely and selective acquisitions, although we may also consider other classes of drybulk carriers as opportunities warrant. We currently view the Capesize vessel class as providing attractive return characteristics given the existing vessel price levels. A key element to our acquisition strategy will be to acquire high-quality vessels at attractive prices. When evaluating acquisitions, we will consider and analyze, among other things, our expectation of fundamental developments in the drybulk shipping industry sector, the level of liquidity in the resale and charter market, the cash flow expected to be earned by a vessel in relation to its value, its condition and technical specifications with particular regard to fuel consumption, expected remaining useful life, the credit quality of the charterer and duration and terms of charter contracts for vessels acquired with charters attached, as well as the overall diversification of our fleet and customers. We believe that these circumstances combined with our management's knowledge of the shipping industry present an opportunity for us to grow our fleet at favorable prices.

Well Positioned to Capitalize on an Improving Rate Environment via Spot Market Exposure. We believe our current eleven-vessel fleet is optimized to capture increasing vessel revenues as a result of an upward trend in spot rates. Currently nine of our eleven vessels are on the spot market and one vessel is employed under an index-linked charter providing us the ability to capture upward movements in rates. The average of the four time charter routes for Baltic Capesize Index, or the BCI TCE, a daily average of charter rates for key Capesize routes published by the Baltic Exchange Limited, which has long been viewed as the main benchmark to monitor the movements of the Capesize vessel charter market, has recently increased significantly by 5,154% from the record low level of \$485 per day on March 17, 2016 to \$25,481 per day on November 30, 2017. The average BCI TCE of the last ten years has been \$27,154 per day. As rates increase we expect to utilize a more balanced portfolio approach for our commercial vessel management. We believe employing a chartering strategy to capture upside opportunities in the spot market with a mixture of fixed-rate time charters as the charter market improves will enable us to reduce downside risks and provide more stability in cash flows. Because the spot market is volatile, there can be no assurance that the recent increases in the drybulk charter market will continue.

Operating a Modern, High-Quality Fleet. Our Fleet had an average age of 8.6 years as of the date of this prospectus, compared to world-wide Supramax and Capesize drybulk market industry average ages of 9.2 and 8.7 years, respectively, as of that date. We believe that owning a young, well-maintained fleet provides us with a competitive advantage in securing favorable time and spot charters. All of our vessels have been built in shipyards that we view as having a longstanding reputation for building quality vessels. We expect that the combination of these factors will provide us with a competitive advantage in securing favorable employment for our vessels.

#### Our Fleet

As of the date of this prospectus, we own a fleet of eleven drybulk carriers, comprised of nine Capesize vessels and two Supramax vessels, with a combined cargo-carrying capacity of approximately 1,682,582 dwt and an average age of approximately 8.6 years. The following table lists the vessels in our fleet as of the date of this prospectus:

#### Fleet

Vessel Name	Year Built	Dwt	Flag	Yard	Type of Employment
Championship	2011	179,238	LIB	Sungdong	Spot
Partnership	2012	179,213	MI	Hyundai	Time Charter <sup>(1)</sup>
Knightship	2010	178,978	LIB	Hyundai	Spot
Lordship	2010	178,838	LIB	Hyundai	Time Charter <sup>(2)</sup>
Gloriuship	2004	171,314	MI	Hyundai	Spot
Leadership	2001	171,199	BA	Koyo - Imabari	Spot
Geniuship	2010	170,057	MI	Sungdong	Spot
Premiership	2010	170,024	IoM	Sungdong	Spot
Squireship	2010	170,018	LIB	Sungdong	Spot
Guardianship	2011	56,884	MI	CSC Jinling	Spot
Gladiatorship	2010	56,819	BA	CSC Jinling	Spot
Average Age/Total dwt:	8.6 years	1,682,582			

This vessel is being chartered by Uniper Global Commodities SE and was delivered to the charterer on June 13, (1)2017 for a period of employment of about 12 months to about 18 months at a gross daily rate of \$16,200.

This vessel is being chartered by Oldendorff Carriers GmbH & Co. KG and was delivered to the charterer on June 28, 2017, in direct continuation of the vessel's previous time charter, for a period of about 18 months to about 22 (2) months. The net daily charter hire is calculated at an index linked rate based on the five time charter routes rate of the Baltic Capesize Index. In addition, the time charter provides us an option for any period of time during the hire to be converted into a fixed rate time charter, between three months and 12 months, with a rate corresponding to the prevailing value of the respective Capesize forward freight agreement.

#### Key to Flags:

BA – Bahamas, IoM – Isle of Man, LIB – Liberia, MI – Marshall Islands

### Management of Our Fleet

We manage our vessels' operations, insurances and bunkering and have the general supervision of our third-party technical and commercial managers.

V.Ships, an independent third party, provides technical management for our vessels that includes general administrative and support services, such as crewing and other technical management, accounting related to vessels and provisions. Pursuant to our technical management agreements with V.Ships we paid a monthly fee of \$9,650 per vessel in 2016 and a monthly fee of \$8,000 per vessel starting from January 1, 2017, in exchange for V.Ships providing these technical, support and administrative services. The management fees do not cover expenses such as voyage expenses, vessel operating expenses, maintenance expenses, crewing costs, which are reimbursed by us to V.Ships. Pursuant to our technical management agreement with V.Ships for the vessel Leadership, if the vessel is laid up for a period of more than two months, we are not obligated to pay a management fee to V.Ships for the period exceeding the two months until we give written notice to re-activate the vessel. However, we are obligated to reimburse V.Ships for any costs that have been approved by us that may arise while Leadership is laid up following the two months. The technical management agreements are for an indefinite period until terminated by either party, giving the other notice in writing, in which event the applicable agreement shall terminate after one month from the date upon which such notice is received.

Seanergy Management Corp., or Seanergy Management, one of our wholly-owned subsidiaries, has entered into a commercial management agreement with Fidelity, an independent third party, pursuant to which Fidelity provides commercial management services for all of the vessels in our fleet. Fidelity serves as commercial broker for Capesize vessels exclusively to us. Under the commercial management agreement, we have agreed to reimburse Fidelity for all reasonable running and/or out-of-pocket expenses, including but not limited to, telephone, fax, stationary and printing expenses, as well as any pre-approved travelling expenses. In addition, we have agreed to pay commission fees to Fidelity equal to 0.5% calculated on the collected gross hire/freight/demurrage payable when the relevant hire/freight/demurrage is collected. The commercial management agreement may be terminated by either party upon giving one month prior written notice to the other party. Seanergy Management also provides certain administrative and managerial services for our vessel-owning subsidiaries.

### Shipping Committee

We have established a shipping committee. The purpose of the shipping committee is to consider and vote upon all matters involving shipping and vessel finance in order to accelerate the pace of our decision making in respect of shipping business opportunities, such as the acquisition of vessels or companies. The shipping industry often demands very prompt review and decision-making with respect to business opportunities. In recognition of this, and in order to best utilize the experience and skills that our directors bring to us, our board of directors has delegated all such matters to the shipping committee. Transactions that involve the issuance of our securities or transactions that involve a related party, however, shall not be delegated to the shipping committee but instead shall be considered by the entire board of directors. The shipping committee consists of three directors. In accordance with the amended and restated charter of the shipping committee, two of the directors on the shipping committee are nominated by Jelco and one of the directors on the shipping committee is nominated by a majority of our board of directors and is an independent member of the board of directors. The members of the shipping committee are Mr. Stamatios Tsantanis and Ms. Christina Anagnostara, who are Jelco's nominees, and Mr. Elias Culucundis, who is the nominee of the board of directors.

In order to assure the continued existence of the shipping committee, our board of directors has agreed that the shipping committee may not be dissolved and that the duties or composition of the shipping committee may not be altered without the affirmative vote of not less than 80% of our board of directors. In addition, the duties of our chief executive officer, who is currently Mr. Tsantanis, may not be altered without a similar vote. These duties and powers include voting the shares of stock that Seanergy owns in its subsidiaries. In addition to these agreements, we have amended certain provisions in our articles of incorporation and by-laws to incorporate these requirements.

As a result of these various provisions, in general, all shipping-related decisions will be made by Jelco's appointees to our board of directors unless 80% of the board members vote to change the duties or composition of the shipping committee.

### Employment of Our Fleet

Our vessels are primarily chartered on the spot charter market, either through trip charter contracts or voyage charter contracts. A spot market voyage charter is generally a contract to carry a specific cargo from a load port to a discharge port for an agreed freight per ton of cargo or a specified total amount. Under spot market voyage charters, we pay specific voyage expenses such as port, canal and bunker costs. Spot charter rates are volatile and fluctuate on a seasonal and year-to-year basis. Fluctuations derive from imbalances in the availability of cargoes for shipment and the number of vessels available at any given time to transport these cargoes. Vessels operating in the spot market generate revenue that is less predictable than those under time charters, but may enable us to capture increased profit margins during periods of improvements in drybulk vessel charter rates. Downturns in the drybulk industry would result in a reduction in profit margins, and could lead to losses.

Two of our vessels are also employed on period time charters. Period time charters provide a fixed and stable cash flow for a known period of time. Period time charters also mitigate in part the volatility and seasonality of the spot market business, which is generally weaker in the second and third quarters of the year. In the future, we may opportunistically look to employ more of our vessels under time charter contracts should rates become more attractive.

### Charter Hire Rates

Charter hire rates fluctuate by varying degrees among drybulk vessel size categories. The volume and pattern of trade in a small number of commodities, referred to as major bulks, affect demand for larger vessels. Therefore, charter rates and vessel values of larger vessels often show greater volatility. Conversely, trade in a greater number of commodities, referred to as minor bulks, drives demand for smaller drybulk carriers. Accordingly, charter rates and vessel values for those vessels are subject to less volatility.

Charter hire rates paid for drybulk carriers are primarily a function of the underlying balance between vessel supply and demand, although at times other factors may play a role. Furthermore, the pattern seen in charter rates is broadly mirrored across the different charter types and the different drybulk carrier categories. However, because demand for larger drybulk vessels is affected by the volume and pattern of trade in a relatively small number of commodities, charter hire rates (and vessel values) of larger ships tend to be more volatile than those for smaller vessels.

In the time charter market, rates vary depending on the length of the charter period and vessel specific factors such as age, speed and fuel consumption.

In the voyage charter market, rates are influenced by cargo size, commodity, port dues and canal transit fees, as well as commencement and termination regions. In general, a larger cargo size is quoted at a lower rate per ton than a smaller cargo size. Routes with costly ports or canals generally command higher rates than routes with low port dues and no canals to transit. Voyages with a load port within a region that includes ports where vessels usually discharge cargo or a discharge port within a region with ports where vessels load cargo also are generally quoted at lower rates, because such voyages generally increase vessel utilization by reducing the unloaded portion (or ballast leg) that is included in the calculation of the return charter to a loading area.

Within the drybulk shipping industry, the charter hire rate references most likely to be monitored are the freight rate indices issued by the Baltic Exchange. These references are based on actual charter hire rates under charters entered into by market participants as well as daily assessments provided to the Baltic Exchange by a panel of major shipbrokers.

### Competition

We operate in markets that are highly competitive and based primarily on supply and demand. We compete for charters on the basis of price, vessel location, size, age and condition of the vessel, as well as on our reputation as ship-owners, -managers and -operators. We compete primarily with other independent drybulk vessel-owners in the Supramax, Panamax, Capesize markets, and with major mining, steel mills and traders that own and operate their own vessels. Ownership of drybulk vessels is highly fragmented and is divided among private shipowners, publicly listed companies and state-controlled owners. While it is generally difficult to know the exact fleet composition of most non-public shipping companies, indicatively, some of our competitors that are listed on the NYSE will include Scorpio Bulkers Inc., Star Bulk Carriers Corp. and Safe Bulkers, Inc., each of which is an operator in any of the Supramax or Capesize vessels in the drybulk market. Our competitors may have more resources than us and may operate vessels that are newer, and therefore more attractive to charterers, than our vessels. According to Karatzas Marine Advisors & Co., worldwide there are approximately 52 owners of Capesize vessels (150,000 dwt – 190,000 dwt) and 716 owners of Supramax drybulk vessels of 45,000 – 60,000 dwt.

### Customers

Our customers include or have included national, regional and international companies, such as Trafigura, Rio Tinto and BHP Billiton. Customers individually accounting for more than 10% of our revenues during the years ended December 31, 2016, 2015 and 2014 were:

Customer	2016	2015	2014
A	18 %	-	-
B	12 %	15 %	-
C	-	47 %	-
D	-	12 %	-
E	-	10 %	-
F	-	-	59 %
G	-	-	29 %
Total	30 %	84 %	88 %

### Seasonality

Coal, iron ore and grains, which are the major bulks of the drybulk shipping industry, are somewhat seasonal in nature. The energy markets primarily affect the demand for coal, with increases during hot summer periods when air conditioning and refrigeration require more electricity and towards the end of the calendar year in anticipation of the forthcoming winter period. The demand for iron ore tends to decline in the summer months because many of the major steel users, such as automobile makers, reduce their level of production significantly during the summer holidays. Grains are completely seasonal as they are driven by the harvest within a climate zone. Because three of the five largest grain producers (the United States of America, Canada and the European Union) are located in the northern hemisphere and the other two (Argentina and Australia) are located in the southern hemisphere, harvests occur throughout the year and grains require drybulk shipping accordingly.

### Environmental and Other Regulations

Government regulation significantly affects the ownership and operation of the vessels we may acquire. We are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which the vessels we may acquire may operate or are registered relating to safety and health and environmental protection including the storage, handling, emission, transportation and discharge of hazardous and non-hazardous materials, and the remediation of contamination and liability for damage to natural resources. Compliance with such laws, regulations and other requirements entails significant expense, including vessel modifications and implementation of certain operating procedures.

A variety of government and private entities subject vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (United States Coast Guard, harbor master or equivalent), classification societies, flag state administrations (country of registry) and charterers, particularly terminal operators. Certain of these entities require us to obtain permits, licenses, certificates or approvals for the operation of the vessels. Failure to maintain necessary permits, licenses, certificates or approvals could require us to incur substantial costs or temporarily suspend the operation of one or more of the vessels we may acquire.

We believe that the heightened level of environmental and operational safety concerns among insurance underwriters, regulators and charterers have led to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the drybulk shipping industry. Increasing environmental concerns have created a demand for vessels that conform to the stricter environmental standards. We are required to maintain operating standards for all of the vessels we may acquire that emphasize operational safety, quality maintenance, continuous training of our officers and crews and compliance with United States and international regulations. However, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these requirements, or the impact of these requirements on the resale value or useful lives of the vessels we may acquire. In addition, a future serious marine incident that causes significant adverse environmental impact, such as the 2010 Deepwater Horizon oil spill, could result in additional legislation or regulation that could negatively affect our profitability.

#### International Maritime Organization

The United Nations' International Maritime Organization, or the IMO, has adopted the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (collectively referred to as MARPOL 73/78 and herein as MARPOL). MARPOL entered into force on October 2, 1983. It has been adopted by over 150 nations, therefore it may include jurisdictions in which the vessels we may acquire operate. MARPOL sets forth pollution-prevention requirements applicable to drybulk carriers, among other vessels, and is broken into six Annexes, each of which regulates a different source of pollution. Annex I relates to oil leakage or spilling; Annexes II and III relate to harmful substances carried, in bulk, in liquid or packaged form, respectively; Annexes IV and V relate to sewage and garbage management, respectively; and Annex VI, lastly, relates to air emissions. Annex VI, which was separately adopted by the IMO in September of 1997, relates to air pollution by ship emissions, including greenhouse gases.

#### Air Emissions

In September of 1997, the IMO adopted Annex VI to MARPOL to address air pollution. Effective May 2005, Annex VI sets limits on nitrogen oxide emissions from ships whose diesel engines were constructed (or underwent major conversions) on or after January 1, 2000. It also prohibits "deliberate emissions" of "ozone depleting substances," defined to include certain halons and chlorofluorocarbons. "Deliberate emissions" are not limited to times when the ship is at sea; they can for example include discharges occurring in the course of the ship's repair and maintenance. Emissions of "volatile organic compounds" from certain tankers, and the shipboard incineration (from incinerators installed after January 1, 2000) of certain substances (such as polychlorinated biphenyls, or PCBs) are also prohibited. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions, known as Emission Control Areas, or ECAs (see below).

The IMO's Maritime Environment Protection Committee, or MEPC, adopted amendments to Annex VI on October 10, 2008, which entered into force on July 1, 2010. The amended Annex VI seeks to further reduce air pollution by, among other things, implementing a progressive reduction of the amount of sulfur contained in any fuel oil used on board ships.

On October 27, 2016 at its 70<sup>th</sup> session, or MEPC 70, MEPC announced its decision concerning the implementation of regulations mandating a reduction in sulfur emissions from 3.5% currently to 0.5% as of the beginning of 2020 rather than pushing the deadline back to 2025. By 2020 ships will now have to either remove sulfur from emissions through the use of emission scrubbers or buy fuel with low sulfur content.

Sulfur content standards are even stricter within certain ECA. As of July 1, 2015, ships operating within an ECA are not permitted to use fuel with sulfur content in excess of 0.10%. Amended Annex VI establishes procedures for designating new ECAs. Currently, the Baltic Sea and the North Sea have been so designated. Effective August 1, 2012, certain coastal areas of North America were also designated ECAs. Effective January 1, 2014, applicable areas of the United States Caribbean Sea, including the coastal waters around Puerto Rico and the U.S. Virgin Islands were also designated ECAs.

Ocean-going vessels in ECAs will be subject to stringent emissions controls and may cause us to incur additional costs. If other ECAs are approved by the IMO or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the U.S. Environmental Protection Agency, or EPA, or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations. For example, Amended Annex VI also establishes new tiers of stringent nitrogen oxide emissions standards for new marine engines, depending on their date of installation. The U.S. Environmental Protection Agency promulgated equivalent (and in some senses stricter) emissions standards in late 2009. At MEPC 70 and MEPC 71, MEPC approved the North Sea and the Baltic Sea as ECAs for nitrogen oxides, effective January 1, 2021. It is expected that these areas will be formally designated after the draft amendments are presented at MEPC's next session. The EPA promulgated equivalent (and in some sense stricter) emissions standards in late 2009. At the MEPC meeting held from March to April 2014, amendments to Annex VI were adopted which address the date on which Tier III Nitrogen Oxide (NOx), standards in ECAs will go into effect. Under the amendments, Tier III NOx standards apply to ships that operate in North American and U.S. Caribbean Sea ECAs designed for the control of NOx with a marine diesel engine installed and constructed on or after January 1, 2016. Tier III requirements could apply to areas that will be designated for Tier III NOx in the future. We cannot assure you that the jurisdictions in which the vessels we may acquire may operate will not adopt more stringent emissions standards independent of the IMO.

As of January 1, 2013, MARPOL made mandatory certain measures relating to energy efficiency for ships. This included the requirement that all new ships utilize the Energy Efficiency Design Index, or EEDI, and all ships use the Ship Energy Efficiency Management Plan, or SEEMP.

#### Safety Management System Requirements

The IMO also adopted the International Convention for the Safety of Life at Sea, or SOLAS, and the International Convention on Load Lines, or the LL Convention, which impose a variety of standards that regulate the design and operational features of ships. The IMO periodically revises the SOLAS and LL Convention standards. May 2012 SOLAS amendments entered into force as of January 1, 2014. Recent amendments to the Convention on Limitation of Liability for Maritime Claims, or LLMC, went into effect on June 8, 2015. The amendments alter the limits of liability for loss of life or personal injury claims and property claims against shipowners.

The operation of our ships is also affected by the requirements set forth in Chapter IX of SOLAS, which sets forth the IMO's International Management Code for the Safe Operation of Ships and Pollution Prevention, or the ISM Code. The ISM Code requires shipowners and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. We rely upon the safety management system that our technical manager has developed for compliance with the ISM Code. The failure of a shipowner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports.

The ISM Code requires that vessel operators obtain a safety management certificate, or SMC, for each vessel they operate. This certificate evidences compliance by a vessel's operators with the ISM Code requirements for a safety management system, or SMS. No vessel can obtain an SMC under the ISM Code unless its manager has been awarded a document of compliance, or DOC, issued in most instances by the vessel's flag state.

Noncompliance with the ISM Code or other IMO regulations may subject the shipowner or bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports.

#### Pollution Control and Liability Requirements

The IMO adopted the International Convention for the Control and Management of Ships' Ballast Water and Sediments, or the BWM Convention, in February 2004. The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits. All ships will also have to carry a ballast water record book and an International Ballast Water Management Certificate. The BWM Convention entered into force on September 8, 2017. As of September 2017, 65 countries, representing 73.92% of world tonnage, have ratified the BWM Convention.

Many of the implementation dates originally written into the BWM Convention have already passed, so now that the BWM Convention has entered into force, the period for installation of mandatory ballast water exchange requirements would be extremely short, with several thousand ships a year needing to install ballast water management systems, or BWMS. For this reason, on December 4, 2013, the IMO Assembly passed a resolution revising the application dates of the BWM Convention so that they are triggered by the entry into force date and not the dates originally in the BWM Convention. This in effect makes all vessels constructed before the entry into force date "existing" vessels, and allows for the installation of BWMS on such vessels at the first International Oil Pollution Prevention renewal survey following entry into force of the Convention. In October 2016, at MEPC 70, MEPC adopted updated "guidelines for approval of ballast water management systems (G8)." At MEPC 71, the schedule regarding the BWM Convention's implementation dates was also discussed and amendments were introduced to extend the date existing vessels are subject to certain ballast water standards. Once mid-ocean ballast exchange ballast water treatment requirements become mandatory, the cost of compliance could increase for ocean carriers and the costs of ballast water treatments may be material. However, many countries already regulate the discharge of ballast water carried by vessels from country to country to prevent the introduction of invasive and harmful species via such discharges. The United States, for example, requires vessels entering its waters from another country to conduct mid-ocean ballast exchange, or undertake some alternate measure, and to comply with certain reporting requirements. The costs of compliance with mandatory mid-ocean ballast exchange could be material, and it is difficult to predict the overall impact of such a requirement on our operations.

The IMO adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage of 2001, or the Bunker Convention, to impose strict liability on shipowners for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker fuel. The Bunker Convention requires registered owners of ships over 1,000 gross tons to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the Convention on Limitation of Liability for Maritime Claims of 1976, as amended). With respect to non-ratifying states, liability for spills or releases of oil carried as fuel in ship's bunkers typically is determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

In March 2006, the IMO amended Annex I to MARPOL, including a new regulation relating to oil fuel tank protection, which became effective August 1, 2007. The new regulation applies to various ships delivered on or after August 1, 2010. It includes requirements for the protected location of the fuel tanks, performance standards for accidental oil fuel outflow, a tank capacity limit and certain other maintenance, inspection and engineering standards. The IMO continues to review and introduce new regulations. It is impossible to predict what additional regulations, if any, may be passed by the IMO and what effect, if any, such regulations might have on our operations. We believe that we are in substantial compliance with all applicable existing IMO requirements. In addition, we intend to comply with all future applicable IMO requirements.

The U.S. Oil Pollution Act of 1990 and Comprehensive Environmental Response, Compensation and Liability Act  
The U.S. Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all "owners and operators" whose vessels trade with the United States, its territories and possessions or whose vessels operate in United States waters, which includes the United States' territorial sea and its 200 nautical mile exclusive economic zone around the United States. The United States has also enacted the Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, which applies to the discharge of hazardous substances other than oil, whether on land or at sea. OPA and CERCLA both define "owner and operator" in the case of a vessel as any person owning, operating or chartering by demise, the vessel. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners and operators are "responsible parties" and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels. OPA defines these other damages broadly to include:

- (i) injury to, destruction or loss of, or loss of use of, natural resources and related assessment costs;
- (ii) injury to, or economic losses resulting from, the destruction of real and personal property;
- (iii) net loss of taxes, royalties, rents, fees or net profit revenues resulting from injury, destruction or loss of real or personal property, or natural resources;
- (iv) loss of subsistence use of natural resources that are injured, destroyed or lost;
- (v) lost profits or impairment of earning capacity due to injury, destruction or loss of real or personal property or natural resources; and
- (vi) net cost of increased or additional public services necessitated by removal activities following a discharge of oil, such as protection from fire, safety or health hazards, and loss of subsistence use of natural resources.

OPA contains statutory caps on liability and damages; such caps do not apply to direct cleanup costs. Effective December 21, 2015, the U.S. Coast Guard adjusted the limits of OPA liability for non-tank vessels (e.g. drybulk) to the greater of \$1,100 per gross ton or \$939,800 (subject to periodic adjustment for inflation). These limits of liability do not apply if an incident was proximately caused by the violation of an applicable U.S. federal safety, construction or operating regulation by a responsible party (or its agent, employee or a person acting pursuant to a contractual relationship), or a responsible party's gross negligence or willful misconduct. The limitation on liability similarly does not apply if the responsible party fails or refuses to (i) report the incident where the responsibility party knows or has reason to know of the incident; (ii) reasonably cooperate and assist as requested in connection with oil removal activities; or (iii) without sufficient cause, comply with an order issued under the Federal Water Pollution Act (Section 311 (c), (e)) or the Intervention on the High Seas Act.

CERCLA contains a similar liability regime whereby owners and operators of vessels are liable for cleanup, removal and remedial costs, as well as damage for injury to, or destruction or loss of, natural resources, including the reasonable costs associated with assessing same, and health assessments or health effects studies. There is no liability if the discharge of a hazardous substance results solely from the act or omission of a third party, an act of God or an act of war. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5.0 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$500,000 for any other vessel. These limits do not apply (rendering the responsible person liable for the total cost of response and damages) if the release or threat of release of a hazardous substance resulted from willful misconduct or negligence, or the primary cause of the release was a violation of applicable safety, construction or operating standards or regulations. The limitation on liability also does not apply if the responsible person fails or refused to provide all reasonable cooperation and assistance as requested in connection with response activities where the vessel is subject to OPA.

OPA and CERCLA both require owners and operators of vessels to establish and maintain with the U.S. Coast Guard evidence of financial responsibility sufficient to meet the maximum amount of liability to which the particular responsible person may be subject. Vessel owners and operators may satisfy their financial responsibility obligations by providing a proof of insurance, a surety bond, qualification as a self-insurer or a guarantee.

The 2010 Deepwater Horizon oil spill in the Gulf of Mexico may also result in additional regulatory initiatives or statutes, including the raising of liability caps under OPA. For example, on August 15, 2012, the U.S. Bureau of Safety and Economic Enforcement, or BSEE, issued a final drilling safety rule for offshore oil and gas operations that strengthens the requirements for safety equipment, well control systems, and blowout prevention practices. The Final Rule took effect on October 22, 2012. On August 21, 2013, the BSEE proposed a rule to revise existing federal regulations regarding oil and gas production safety systems to address technological advances. A new rule issued by the U.S. Bureau of Ocean Energy Management, or BOEM, that increased the limits of liability of damages for offshore facilities under OPA based on inflation took effect in January 2015. In April 2015, it was announced that new regulations are expected to be imposed in the United States regarding offshore oil and gas drilling and the BSEE announced a new Well Control Rule in April 2016. In December 2015, the BSEE announced a new pilot inspection program for offshore facilities. Compliance with any new requirements of OPA may substantially impact our cost of operations or require us to incur additional expenses to comply with any new regulatory initiatives or statutes.

Additional legislation or regulations applicable to the operation of the vessels we may acquire that may be implemented in the future could adversely affect our business. If the damages from a catastrophic spill were to exceed our insurance coverage it could have an adverse effect on our business and results of operation.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, provided they accept, at a minimum, the levels of liability established under OPA, and some states have enacted legislation providing for unlimited liability for oil spills. Furthermore, many U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. These laws may be more stringent than U.S. federal law. Moreover, some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters. Yet, in some cases, states which have enacted this type of legislation have not yet issued implementing regulations defining vessel owners' responsibilities under these laws. We intend to comply with all applicable state regulations in the ports where our vessels may call. We believe that we are in substantial compliance with all applicable existing state requirements. In addition, we intend to comply with all future applicable state regulations in the ports where our vessels may call.

#### Other Environmental Initiatives

The Clean Water Act, or CWA, prohibits the discharge of oil, hazardous substances and ballast water in U.S. navigable waters unless authorized by a duly-issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA. OPA permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, provided they accept, at a minimum, the levels of liability established under OPA. In addition, many U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. These laws may be more stringent than U.S. federal law. Moreover, some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters. Yet, in some cases, states which have enacted this type of legislation have not yet issued implementing regulations defining tanker owners' responsibilities under these laws.

The EPA and USCG have enacted rules relating to ballast water discharge, compliance with which requires the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial costs, and/or otherwise restrict our vessels from entering U.S. waters.

The EPA regulates the discharge of ballast water and other substances in U.S. waters under the CWA. EPA regulations require vessels 79 feet in length or longer (other than commercial fishing and recreational vessels) to comply with a Vessel General Permit, or VGP, authorizing ballast water discharges and other discharges incidental to the operation of vessels. The VGP imposes technology and water-quality based effluent limits for certain types of discharges and establishes specific inspection, monitoring, recordkeeping and reporting requirements to ensure the effluent limits are met. On March 28, 2013, the EPA re-issued the VGP for another five years, which took effect December 19, 2013. The 2013 VGP contains numeric ballast water discharge limits for most vessels to reduce the risk of invasive species in US waters, more stringent requirements for exhaust gas scrubbers and the use of environmentally acceptable lubricants.

U.S. Coast Guard regulations adopted under the U.S. National Invasive Species Act, or NISA, also impose mandatory ballast water management practices for all vessels equipped with ballast water tanks entering or operating in U.S. waters. In 2009 the Coast Guard proposed new ballast water management standards and practices, including limits regarding ballast water releases. As of June 21, 2012, the U.S. Coast Guard implemented revised regulations on ballast water management by establishing standards on the allowable concentration of living organisms in ballast water discharged from ships in U.S. waters. The revised ballast water standards are consistent with those adopted by the IMO in 2004. Compliance with the EPA and the U.S. Coast Guard regulations could require the installation of equipment on vessels we may acquire to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial cost, and/or otherwise restrict vessels from entering U.S. waters.

As of January 1, 2014, vessels are technically subject to the phasing-in of these standards. As a result, the USCG has provided waivers to vessels which cannot install the as-yet unapproved technology. The EPA, on the other hand, has taken a different approach to enforcing ballast discharge standards under the VGP. On December 27, 2013, the EPA issued an enforcement response policy in connection with the new VGP in which the EPA indicated that it would take into account the reasons why vessels do not have the requisite technology installed, but will not grant any waivers. In addition, through the CWA certification provisions that allow U.S. states to place additional conditions on use of the VGP within state waters, a number of states have proposed or implemented a variety of stricter ballast water requirements including, in some states, specific treatment standards. Compliance with these USCG and state regulations could have an adverse impact on the commercial operation of our vessels.

It should also be noted that in October 2015, the Second Circuit Court of Appeals issued a ruling that directed the EPA to redraft the sections of the 2013 VGP that address ballast water. However, the Second Circuit stated that 2013 VGP will remain in effect until the EPA issues a new VGP. In the fall of 2016 sources reported that the EPA indicated it was working on a new VGP. It presently remains unclear how the ballast water requirements set forth by the EPA, the USCG, and IMO BWM Convention, some of which are in effect and some which are pending, will co-exist.

USCG has set up requirements for ships constructed before December 1, 2013 with ballast tanks trading with exclusive economic zones of the U.S. to install water ballast treatment systems as follows: (1) ballast capacity 1,500-5,000m<sup>3</sup>—first scheduled drydock after January 1, 2014; and (2) ballast capacity above 5,000m<sup>3</sup>—first scheduled drydock after January 1, 2016. All our vessels have ballast capacities over 5,000m<sup>3</sup>, and those of our vessels trading in the U.S. will have to install water ballast treatment plants at their first drydock after January 1, 2016.

The U.S. Clean Air Act of 1970 (including its amendments of 1977 and 1990), or the CAA, requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. Vessels we may acquire will be subject to vapor control and recovery requirements for certain cargoes when loading, unloading, ballasting, cleaning and conducting other operations in regulated port areas. Vessels that operate in such port areas with restricted cargoes are equipped with vapor recovery systems that satisfy these requirements. The CAA also requires states to draft State Implementation Plans, or SIPs, designed to attain national health-based air quality standards in each state. Although state-specific, SIPs may include regulations concerning emissions resulting from vessel loading and unloading operations by requiring the installation of vapor control equipment.

It should be noted that the U.S. is currently experiencing changes in its environmental policy, the results of which have yet to be fully determined. For example, in April 2017, the U.S. President signed an executive order regarding the environment that targets the U.S. offshore energy strategy, which affects parts of the maritime industry and may

affect our business operations.

#### European Union Regulations

In October 2009, the European Union amended a directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Aiding and abetting the discharge of a polluting substance may also lead to criminal penalties. Member States were required to enact laws or regulations to comply with the directive by the end of 2010. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims.

The European Union has adopted several regulations and directives requiring, among other things, more frequent inspections of high-risk ships, as determined by type, age, and flag as well as the number of times the ship has been detained. The European Union also adopted and then extended a ban on substandard ships and enacted a minimum ban period and a definitive ban for repeated offenses. The regulation also provided the European Union with greater authority and control over classification societies, by imposing more requirements on classification societies and providing for fines or penalty payments for organizations that failed to comply.

#### Greenhouse Gas Regulations

Currently, the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change, which entered into force in 2005 and pursuant to which adopting countries have been required to implement national programs to reduce greenhouse gas emissions.

International negotiations are continuing with respect to a successor to the Kyoto Protocol, which set emission reduction targets through 2012 and has been extended with new targets through 2020 pending negotiation of a new climate change treaty that would take effect in 2020. Restrictions on shipping emissions may be included in any new treaty. In December 2009, more than 27 nations, including the U.S. and China, signed the Copenhagen Accord, which includes a non-binding commitment to reduce greenhouse gas emissions. The 2015 United Nations Convention on Climate Change Conference in Paris did not result in an agreement that directly limited greenhouse gas emissions from ships. On June 1, 2017, the U.S. President announced that the U.S. would withdraw from the Paris Agreement, but the timing and effect of such action has yet to be determined.

The IMO may implement market-based mechanisms to reduce greenhouse gas emissions from ships at an upcoming MEPC session. On January 1, 2013, two new sets of mandatory requirements to address greenhouse gas emissions from ships adopted by the MEPC as amendments to MARPOL Annex VI, entered into force. Currently operating ships are now required to develop and implement Ship Energy Efficiency Management Plans, or SEEMPs, and the new ships to be designed in compliance with minimum energy efficiency levels per capacity mile as defined by the Energy Efficiency Design Index, or EEDI. Under these measures, by 2025, all new ships built will be 25% more energy efficient than those built in 2014. These requirements could cause us to incur additional compliance costs. In April 2015, a regulation was adopted requiring that large ships (over 5,000 gross tons) calling at European ports from January 2018 collect and publish data on carbon dioxide emissions. Draft amendments, which included guidelines on this data collection system, were approved by the 69<sup>th</sup> session of the MEPC in April 2016, and adopted at MEPC 70. This is expected to be an early step in the analysis of such data for international shipping by MEPC to aid in deciding future steps concerning greenhouse gas emissions and energy efficiency. A roadmap for a "comprehensive IMO strategy on a reduction of GHG emissions from ships" was also approved at MEPC 70.

The MEPC is also considering market-based mechanisms to reduce greenhouse gas emissions from ships. For 2020, the EU made a unilateral commitment to reduce overall greenhouse gas emissions from its member states by 20% of 1990 levels. The EU also committed to reduce its emissions by 20% under the Kyoto Protocol's second period, from 2013 to 2020. In December 2013 the European Union environmental ministers discussed draft rules to implement monitoring and reporting of carbon dioxide emissions from ships. In the United States, the EPA has issued a finding that greenhouse gases endanger the public health and safety and has adopted regulations to limit greenhouse gas emissions from certain mobile sources and large stationary sources. Although the mobile source emissions regulations do not apply to greenhouse gas emissions from vessels, such regulation of vessels is foreseeable, and the EPA has in recent years received petitions from the California Attorney General and various environmental groups seeking such regulation. Any passage of climate control legislation or other regulatory initiatives by the IMO, European Union, the U.S. or other countries where we operate, or any treaty adopted at the international level to succeed the Kyoto Protocol, that restrict emissions of greenhouse gases could require us to make significant financial expenditures which

we cannot predict with certainty at this time.

56

---

On June 29, 2017, the Global Industry Alliance, or the GIA, was officially inaugurated. The GIA is a program, under the Global Environmental Facility-United Nations Development Program- IMO project, which supports shipping, and related industries, as they move towards a low carbon future. Organizations including, but not limited to, shipowners, operators, classification societies, and oil companies, signed to launch the GIA.

Any passage of climate change legislation or other regulatory initiatives by the EU, U.S., IMO or other countries where we operate that restrict emissions of greenhouse gases could require us to make significant financial expenditures, including capital expenditures to upgrade our vessels that we cannot predict with certainty at this time. Even in the absence of climate control legislation and regulations, our businesses may be materially affected to the extent that climate change may result in sea level changes or more intense weather events.

#### International Labour Organization

The International Labour Organization, or ILO, is a specialized agency of the United Nations with headquarters in Geneva, Switzerland. The ILO has adopted the Maritime Labor Convention 2006, or MLC 2006. A Maritime Labor Certificate and a Declaration of Maritime Labor Compliance is required to ensure compliance with the MLC 2006 for all ships above 500 gross tons in international trade. The MLC 2006 entered into force on August 20, 2013. Amendments to MLC 2006 were adopted in 2014 and 2016. The ratification of MLC 2006 requires us to develop new procedures to ensure full compliance with its requirements.

#### Vessel Security Regulations

Since the terrorist attacks of September 11, 2001 in the U.S., there have been a variety of initiatives intended to enhance vessel security such as the Maritime Transportation Security Act of 2002, or MTSA. To implement certain portions of the MTSA, in July 2003, the USCG issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the U.S. The regulations also impose requirements on certain ports and facilities, some of which are regulated by the EPA.

Similarly, in December 2002, amendments to SOLAS created a new chapter of the convention dealing specifically with maritime security. The new Chapter XI-2 became effective in July 2004 and imposes various detailed security obligations on vessels and port authorities, and mandates compliance with the International Ship and Port Facilities Security Code, or the ISPS Code. The ISPS Code is designed to enhance the security of ports and ships against terrorism. To trade internationally, a vessel must attain an International Ship Security Certificate, or ISSC, from a recognized security organization approved by the vessel's flag state. The following are among the various requirements, some of which are found in SOLAS:

- on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including information on a ship's identity, position, course, speed and navigational status;
- on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore;
- the development of vessel security plans;
- ship identification number to be permanently marked on a vessel's hull;
- a continuous synopsis record kept onboard showing a vessel's history including the name of the ship, the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship's identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address;
- and
- compliance with flag state security certification requirements.

Ships operating without a valid certificate may be detained at port until it obtains an ISSC, expelled from port, or refused entry at port.

Furthermore, additional security measures could be required in the future which could have a significant financial impact on us. The USCG regulations, intended to be aligned with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels have on board a valid ISSC that attests to the vessel's compliance with SOLAS security requirements and the ISPS Code. Our vessels are in compliance with the various security measures addressed by SOLAS and the ISPS Code. We do not believe these additional requirements will have a material financial impact on our operations.

#### Inspection by Classification Societies

Every seagoing vessel must be "classed" by a classification society. The classification society certifies that the vessel is "in class", signifying that the vessel has been built and maintained in accordance with the rules of the classification society and complies with applicable rules and regulations of the vessel's country of registry and the international conventions of which that country is a member. In addition, where surveys are required by international conventions and corresponding laws and ordinances of a flag state, the classification society will undertake them on application or by official order, acting on behalf of the authorities concerned.

The classification society also undertakes on request other surveys and checks that are required by regulations and requirements of the flag state. These surveys are subject to agreements made in each individual case and/or to the regulations of the country concerned.

For maintenance of the class certification, regular and occasional surveys of hull, machinery, including the electrical plant, and any special equipment classed are required to be performed as follows:

**Annual Surveys.** For seagoing ships, annual surveys are conducted for the hull and the machinery, including the electrical plant, and where applicable for special equipment classed, within three months before or after each anniversary date of the date of commencement of the class period indicated in the certificate.

**Intermediate Surveys.** Extended annual surveys are referred to as intermediate surveys and typically are conducted two and one-half years after commissioning and each class renewal. Intermediate surveys are to be carried out at or between the occasion of the second or third annual survey.

**Class Renewal Surveys.** Class renewal surveys, also known as special surveys, are carried out for the ship's hull, machinery, including the electrical plant and for any special equipment classed, at the intervals indicated by the character of classification for the hull. At the special survey the vessel is thoroughly examined, including audio-gauging to determine the thickness of the steel structures. Should the thickness be found to be less than class requirements, the classification society would prescribe steel renewals. Substantial amounts of money may have to be spent for steel renewals to pass a special survey if the vessel experiences excessive wear and tear. In lieu of the special survey, a shipowner has the option of arranging with the classification society for the vessel's hull or machinery to be on a continuous survey cycle, in which every part of the vessel would be surveyed within a five year cycle. At an owner's application, the surveys required for class renewal may be split according to an agreed schedule to extend over the entire period of class. This process is referred to as continuous class renewal.

All areas subject to survey as defined by the classification society are required to be surveyed at least once per class period, unless shorter intervals between surveys are prescribed elsewhere. The period between two subsequent surveys of each area must not exceed five years. Vessels under five years of age can waive dry-docking in order to increase available days and decrease capital expenditures, provided the vessel is inspected underwater.

Most vessels are usually dry-docked every 30 to 36 months for inspection of the underwater parts and for repairs related to inspections. If any defects are found, the classification surveyor will issue a "recommendation" which must be rectified by the shipowner within prescribed time limits.

Most insurance underwriters and lenders make it a condition for insurance coverage and lending, respectively, that a vessel be certified as "in class" by a classification society which is a member of the International Association of Classification Societies, or the IACS. All our vessels are certified as being "in class" by American Bureau of Shipping, Bureau Veritas, Korean Register and Nippon Kaiji Kyokai, major classification societies. All new and secondhand vessels that we purchase must be certified prior to their delivery under our standard purchase contracts and memorandum of agreement. If the vessel is not certified on the date of closing, we have no obligation to take delivery of the vessel.

#### Risk of Loss and Liability Insurance Generally

The operation of any cargo vessel includes risks such as mechanical failure, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon owners, operators and demise charterers of any vessel for oil pollution accidents in the United States Exclusive Economic Zone, has made liability insurance more expensive for shipowners and operators trading in the United States market. While we maintain hull and machinery insurance, war risks insurance, protection and indemnity cover and freight, demurrage and defense cover for our fleet in amounts that we believe will be prudent to cover normal risks in our operations, we may not be able to achieve or maintain this level of coverage throughout a vessel's useful life. Furthermore, while we believe that our insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

#### Hull & Machinery and War Risks Insurance

We maintain marine hull and machinery and war risks insurance, which includes the risk of actual or constructive total loss, for all of our vessels. Each of our vessels is covered up to at least fair market value with deductibles of \$150,000 or \$100,000 per vessel per incident for our Capesize and Supramax vessels, respectively. We also maintain increased value coverage for our vessels. Under this increased value coverage, in the event of total loss of a vessel, we will be able to recover the sum insured under the increased value policy in addition to the sum insured under the hull and machinery policy. Increased value insurance also covers excess liabilities which are not recoverable under our hull and machinery policy by reason of under insurance.
