

VanEck Vectors ETF Trust  
Form 497K  
May 02, 2016

**VANECK VECTORS™ INVESTMENT GRADE FLOATING RATE ETF**

Ticker: FLTR®

Principal U.S. Listing Exchange: NYSE Arca, Inc.

**SUMMARY PROSPECTUS**

SEPTEMBER 1, 2015, as revised on FEBRUARY 1, 2016 and MAY 1, 2016

**FLTRSUM**

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 800.826.2333, or by sending an email request to [info@vaneck.com](mailto:info@vaneck.com). The Fund's prospectus and statement of additional information, both dated September 1, 2015, as supplemented, are incorporated by reference into this summary prospectus.

**INVESTMENT OBJECTIVE**

VanEck Vectors Investment Grade Floating Rate ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ US Investment Grade Floating Rate Index (the Floating Rate Index).

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

**Shareholder Fees** (*fees paid directly from your investment*)      None

**Annual Fund Operating Expenses**

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.35%
Other Expenses	0.13%
Total Annual Fund Operating Expenses <sup>(a)</sup>	0.48%
Fee Waivers and Expense Reimbursement <sup>(b)</sup>	-0.34%
Total Annual Fund Operating Expenses After Fee Waiver and Expense	0.14%

Reimbursement<sup>(a)</sup>

- (a) Van Eck Associates Corporation (the Adviser ) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.14% of the Fund's average daily net assets per year until at least September 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.
- (b) The Fee Waivers and Expense Reimbursement line item has been restated to reflect the Fund's current fee waiver and/or expense limitation.

**EXPENSE EXAMPLE**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

**YEAR    EXPENSES**

1	\$	14
3	\$	120
5	\$	235
10	\$	571

## PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 33% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Floating Rate Index is comprised of U.S. dollar-denominated floating rate notes issued by corporate entities or similar commercial entities that are public reporting companies in the United States and rated investment grade by at least one of three rating services: Moody's Investors Service, Inc. (Moody's), Standard & Poor's Rating Services (S&P) or Fitch International Rating Agency (Fitch). Investment grade securities are those rated Baa3 or higher by Moody's or rated BBB- or higher by S&P or Fitch. The Fund may invest a significant portion of its assets in Rule 144A securities. As of June 30, 2015, the Floating Rate Index included 334 notes of 131 issuers and approximately 17% of the Floating Rate Index was comprised of Rule 144A securities. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Floating Rate Index. Because of the practical difficulties and expense of purchasing all of the securities in the Floating Rate Index, the Fund does not purchase all of the securities in the Floating Rate Index. Instead, the Adviser utilizes a sampling methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the bonds in the Floating Rate Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Floating Rate Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Floating Rate Index concentrates in an industry or group of industries. As of April 30, 2015, the Fund was concentrated in the financial services sector.

## PRINCIPAL RISKS OF INVESTING IN THE FUND

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.**

**Credit Risk.** Bonds are subject to credit risk. Credit risk refers to the possibility that the issuer of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honor its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase or the perception of an issuer's credit worthiness may decline, which may adversely affect the value of the security.

**Interest Rate Risk.** Bonds are also subject to interest rate risk. Interest rate risk refers to fluctuations in the value of a bond resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most bonds go down. When the general level of interest rates goes down, the prices of most bonds go up.

The historically low interest rate environment increases the risk associated with rising interest rates, including the potential for periods of volatility and increased redemptions. The Fund may face a heightened level of interest rate risk, since the U.S. Federal Reserve Board recently ended its quantitative easing program and may begin to raise rates. In addition, bonds with longer durations tend to be more sensitive to interest rate changes, usually making them more volatile than bonds with shorter durations.

**Risk of Investing in the Financial Services Sector.** To the extent that the Fund continues to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies

operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

**Restricted Securities Risk.** Rule 144A securities are restricted securities. Restricted securities are securities that are not registered under the Securities Act of 1933, as amended (the Securities Act). They may be less liquid and more difficult to value than other investments because such securities may not be readily marketable. The Fund may not be able to sell a restricted security promptly or at a reasonable time or price. Although there may be a substantial institutional market for these securities, it is not possible to predict exactly how the market for such securities will develop or whether it will continue to exist. A restricted security that was liquid at the time of purchase may subsequently become illiquid and its value may decline as a result. In addition, transaction costs may be higher for restricted securities than for more liquid securities. The Fund may have to bear the expense of registering restricted securities for resale and the risk of substantial delays in effecting the registration.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in bonds, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Sampling Risk.** The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Floating Rate Index. As a result, an adverse development respecting an issuer of securities held by the Fund could result in a greater decline in net asset value (NAV) than would be the case if the Fund held all of the securities in the Floating Rate Index. Conversely, a positive development relating to an issuer of securities in the Floating Rate Index that is not held by the Fund could cause the Fund to underperform the Floating Rate Index. To the extent the assets in the Fund are smaller, these risks will be greater.

**Index Tracking Risk.** The Fund's return may not match the return of the Floating Rate Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Floating Rate Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Floating Rate Index. The Fund also bears the costs and risks associated with buying and selling securities while such costs are not factored into the return of the Floating Rate Index. The Fund may not be fully invested at times either as a result of cash flows into the Fund or reserves of cash held by the Fund to pay expenses. In addition, the Fund's use of a representative sampling approach may cause the Fund to not be as well correlated with the return of the Floating Rate Index as would be the case if the Fund purchased all of the securities in the Floating Rate Index in the proportions in which they are represented in the Floating Rate Index. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Floating Rate Index is based on securities' closing prices (*i.e.*, the value of the Floating Rate Index is not based on fair value prices), the Fund's ability to track the Floating Rate Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Floating Rate Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Floating Rate Index.

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any bond fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Floating Rate Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than mutual funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act ). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Floating Rate Index concentrates in a particular sector or sectors or industry or group of industries. To the extent the Fund's investments continue to be concentrated in the financial services sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

**PERFORMANCE**

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.vaneck.com](http://www.vaneck.com).

**Annual Total Returns (%) Calendar Years**

The year-to-date total return as of June 30, 2015 was 0.36%.

**Best Quarter:** 3.77% 1Q 12

**Worst Quarter:** -0.52% 4Q 14

**Average Annual Total Returns for the Periods Ended December 31, 2014**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	<b>Past One Year</b>	<b>Since Inception (4/25/2011)</b>
VanEck Vectors Investment Grade Floating Rate ETF (return before taxes)	0.37%	0.86%
VanEck Vectors Investment Grade Floating Rate ETF (return after taxes on distributions)	0.10%	0.56%
VanEck Vectors Investment Grade Floating Rate ETF (return after taxes on distributions and sale of Fund Shares)	0.21%	0.54%
MVIS US Investment Grade Floating Rate Index (reflects no deduction for fees, expenses or taxes)	0.81%	1.37%

**PORTFOLIO MANAGEMENT**

**Investment Adviser.** Van Eck Associates Corporation.

**Portfolio Manager.** The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

<b>Name</b>	<b>Title with Adviser</b>	<b>Date Began Managing the Fund</b>
Francis G. Rodillo	Portfolio Manager	September 2012

Eric Isenberg                      Portfolio Manager                      February 2016

**PURCHASE AND SALE OF FUND SHARES**

The Fund issues and redeems Shares at NAV only in a large specified number of Shares, each called a Creation Unit, or multiples thereof. A Creation Unit consists of 100,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

**TAX INFORMATION**

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

**PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
