December 31, 2017 (unaudited)

Dear Shareholder:

VanEck Vectors India Small-Cap Index ETF (NYSE Arca: SCIF) was the star performer in the suite of VanEck Vectors Country/Regional ETFs for 2017, posting a total return for the year of 66.88%.\*

India is an important country for us. While it remains an important part of the world economy, the country's economic output has historically been largely uncorrelated to global economic cycles. In addition to having a powerful, positive, long-term demographic story, we believe India also continues to offer interesting investment opportunities.

In the third quarter of 2017, following two disappointing quarters, the economy bounced back from a three year low, and five preceding quarters of slowing growth, to grow 6.3%.<sup>1</sup>

In May 2014, Prime Minister Narendra Modi swept to power promising "Achhe din aane waale hain," the Hindi electioneering slogan of his Bharatiya Janata Party (BJP), meaning "Good days are coming soon". The jury may still be out on some of his less orthodox approaches to reform, such as the Indian government's demonetization on November 8, 2016 of all rupee 500 (US\$7.90) and rupee 1,000 (US\$16) banknotes.

However, 2017 saw reform progress on two very important fronts. On July 1, 2017, India finally instituted a new system of taxes—the Goods and Services Tax (GST). Instead of a mishmash of duties, fees, and central and state tariffs, all goods and services have now been placed (with one or two exceptions) in one of five different tax brackets, with each product now subject to a single tax rate across the country.<sup>2</sup> Additionally, with the change in tax system, the viability of operating in the "informal" economy and, in particular, on a cash basis, has decreased commensurately. Consequently, "legitimate" smaller companies have benefitted from increased market share as competitors have just closed up shop.

At the end of October, Modi's cabinet approved a \$32.4 billion plan to recapitalize the country's state banks over the next two years.<sup>3</sup> If the plan succeeds, it should help the banks both to address their considerable bad debt problems and to revive the extension of new credit. Growth would, logically, follow.

We still believe SCIF provides not only exposure to India's vibrant market for smaller, non-government owned companies, but also to an increasingly consumption-led economy. It gives investors a liquid, transparent way to gain

access to some of these growing companies.

## Management Discussion (unaudited)

All the funds in the suite of VanEck Vectors Country/Regional ETFs posted positive returns during the 12 month period ending December 31, 2017. The top three performing funds were: VanEck Vectors India Small-Cap ETF (NYSE Arca: SCIF) (66.88%), VanEck Vectors Poland ETF (NYSE Arca: PLND) (54.44%), and VanEck Vectors Brazil Small-Cap ETF (NYSE Arca: BRF) (51.71%).

The two bottom performing funds, both of which, however, recorded positive performance, were Russia-focused: VanEck Vectors Russia ETF (NYSE Arca: RSX) (4.62%) and VanEck Vectors Russia Small-Cap ETF (NYSE Arca: RSXJ) (11.01%).

## Country/Regional Overviews

### *Africa*

The financial sector, followed by the materials sector, were the two greatest contributors to the performance of VanEck Vectors Africa Index ETF (+26.02%) for the 12 month period. Large-cap companies contributed the most to performance. Geographically, a South African media company, a Canadian gold mining company operating in Africa, a mobile network operator in Kenya, and companies in the Egyptian and Nigerian financial sector were among the most significant contributors to positive performance. As a consequence of depressed crude oil prices in the period under review, energy companies detracted by far the most from performance.

***Brazil***

Despite both the economic and political challenges Brazil continues to face, for VanEck Vectors Brazil Small-Cap ETF, 2017 was an excellent year, with the Fund recording a positive total return of 51.71%. On the economic front, third quarter figures appeared to confirm that the country is coming out of the worst recession

3

VANECK VECTORS ETFs

(unaudited) (continued)

in its recent history: GDP recorded a 1.4%<sup>1</sup> annual rise. This was the largest expansion since first quarter 2014 and followed another positive figure in the first quarter, the first such in more than three years. On the political front, although progress appears to have been made over the 12 month period, doubts still surround the prospect of success for the various reform measures, in particular those involving social security that President Temer and his administration have planned.

Perhaps continuing to anticipate a brighter future for the country, Brazilian small-cap companies performed well over the period under review. The consumer discretionary sector delivered by far the healthiest returns. It was followed by the healthcare and materials sectors. Not one sector detracted from performance, but the consumer staples sector contributed the least.

*China*

After the uncertainties faced by the two VanEck Vectors China-focused ETFs in 2016, 2017 reversed the double digit declines seen by both, with VanEck Vectors ChinaAMC SME-ChiNext ETF and VanEck Vectors ChinaAMC CSI 300 ETF returning 19.37% and 31.86% respectively. While China started the year at a fast pace, its annual economic growth rate eased from 6.9% in the second quarter to 6.8% in the third as a result of a cooling property sector “while a government campaign against riskier lending pushes up borrowing costs.”<sup>2</sup> Earlier in the year the IMF had recommended that the country accelerate reforms and rein in credit.<sup>3</sup>

VanEck Vectors ChinaAMC SME-ChiNext ETF seeks to provide exposure primarily to China’s market for innovative, non-government owned companies. It is, therefore, not surprising that approximately half of the Fund’s gains during the 12 month period came from companies in the information technology sector. Companies in the consumer energy sector detracted the most from performance.

All sectors except one (telecommunication services) contributed positively to the performance of VanEck Vectors ChinaAMC CSI 300 ETF. Financial companies contributed by far the most to returns, energy companies contributed the least.

*Egypt*

Following a difficult year in 2016, things started to look up for Egypt in 2017. In contrast with the prior 12 months, VanEck Vectors Egypt Index ETF returned a respectable 27.39%. Having appeared to stabilize in the first quarter of the year, by the end of the year Egypt's economy looked as if it could be back on track. November brought with it good news relating both to its current account deficit and headline inflation. While the former fell by more than 65% in the third quarter, in November the latter rose at its slowest pace in nearly a year.<sup>4</sup> During the third quarter (the first of Egypt's 2017/18 fiscal year), the country's overall balance of payments also rose, from \$1.9 billion to \$5.1 billion.

The top two performing sectors were consumer staples and materials. Only the energy sector detracted from performance. Small-cap companies, with the largest average weighting during the period under review, contributed the most to performance. Only large-cap companies, with the smallest average weighting over the period under review, detracted from performance.

### *India*

2017 was an excellent year for VanEck Vectors India Small-Cap Index, posting a total return for the year of 66.88%. Following two disappointing quarters, third quarter figures brought with them good news. Bouncing back from a three-year low, and five preceding quarters of slowing growth, the economy grew 6.3%.<sup>6</sup> On July 1, 2017, India finally instituted a new system of taxes—the Goods and Services Tax (GST). Instead of a mishmash of duties, fees, and central and state tariffs, all goods and services have now been placed (with one or two exceptions) in one of five different tax brackets, with each product now subject to a single tax rate across the country.<sup>7</sup> With the change in tax system, the viability of operating in the “informal” economy and, in particular, on a cash basis, has decreased commensurately. Consequently, “legitimate” smaller companies have benefitted from increased market share as competitors have just closed up shop.

It is, therefore, perhaps not surprising that companies in the consumer discretionary sector, together with those in the industrial and materials sectors, were the greatest contributors to performance. While both still making positive contributions, the healthcare and energy sectors contributed the least to performance.

### *Indonesia*

VanEck Vectors Indonesia Index ETF enjoyed a constructive 12 months, returning 18.35%. Having described the country's economy as starting the year on a "strong footing," the World Bank went on to describe Indonesia's economic performance as having "strengthened modestly" in the third quarter. This performance was supported by "higher commodity prices, stronger global growth, rebounding international trade, and relatively accommodative monetary and financial conditions". Investment growth was at its highest in four years.<sup>10</sup> In addition, according to the World Bank, "[t]he current account deficit narrowed from 1.9% of GDP in the second quarter to 1.7% of GDP."<sup>11</sup>

All sectors, except consumer discretionary, real estate, industrial, and utilities, contributed positively to performance, with financial companies contributing by far the most. While the utilities sector detracted the most from performance, it did so only minimally.

### *Israel*

Despite a slow first half to the year, accelerating growth in the third quarter helped VanEck Vectors Israel ETF return a strong 14.96% for the 12 months period under review. According to preliminary figures published by the country's Central Bureau of Statistics, on an annualized basis led by consumer spending, Israel's economy grew at 4.1% in the third quarter of the year.<sup>12</sup> Despite the hit the economy is expected to take from plant closures and planned redundancies at Teva Pharmaceutical Industries (10.7% of Fund net assets), the country's largest company, Israel is still on track to grow approximately 3% in 2017.<sup>13</sup> (In early August, having reported massive losses (\$6.04 billion net) for the second quarter of the year, Teva's stock plummeted on the New York Stock Exchange and dragged down the Fund.)<sup>14</sup>

Over the period under review, the performances of all sectors, except healthcare and telecommunication services, contributed positively to performance. Healthcare companies detracted the most from performance. By far the greatest contribution came from companies in the information technology sector with the largest average weighting over the period under review. Mid-cap companies made the greatest contribution to the Fund's performance.

### *Poland*

VanEck Vectors Poland ETF had an excellent 12 months, returning 54.44% in 2017. Poland's economy had a good year, as well. Even as the year drew to a close, revised figures for the third quarter recorded economic growth of 4.9%

year-on-year.<sup>15</sup> The country's PMI (purchasing managers index—a measure of manufacturing activity) in November was the highest in eight months.<sup>16</sup> Poland's continuing disagreements with the EU over its government's judiciary reforms seem to have had little effect on it economically. While twenty-eight months of deflation came to an end in 2016, there are now signs that inflation is creeping higher. At the end of November, the consumer price index cruised past the central bank's target of 2.5% for the first time since 2012!<sup>17</sup> Consumption continues to boom, exports are solid, and the third quarter also saw an improvement, importantly, in investment. All sectors contributed positively to performance. The financial sector was by far the greatest contributor to total returns. The consumer staples sector contributed the least.

### ***Russia***

After recording exceptional positive returns for calendar year 2016, 2017 was not only difficult for VanEck Vectors Russia Small-Cap ETF and its peer investing in larger cap Russian stocks, VanEck Vectors Russia ETF, but also for Russia as its economy returned to modest growth.<sup>18</sup> The former fund returned a positive 11.01% for the year, while the latter returned 4.62% over the same period. The World Bank positioned the country's growth “amidst positive global growth, a recovery in trade, rising oil prices, and growing macroeconomic stability”<sup>19</sup> As the business environment improved, both consumer demand and consumption itself rose.

Information technology, financial, and materials companies were by far the most significant contributors to performance in the large-cap fund. The consumer staples sector was the largest detractor from performance. For the small-cap fund, companies in the industrial sector performed particularly well. However, similarly sized companies in the telecommunications services and real estate sectors were the largest detractors from performance.

VANECK VECTORS ETFs

(unaudited) (continued)

*Vietnam*

In welcome contrast to its performance in 2016, VanEck Vectors Vietnam ETF returned a very favorable 35.76% for the 12 month period under review. Figures published at the end of June for the second quarter of the year showed that, on the back of a surge in exports, Vietnam had rejoined the group of countries with a GDP growth of 6% or more.<sup>20</sup> Over the first nine months of 2017, with a gradual recovery of the agriculture sector, robust export-oriented manufacturing, and stronger domestic demand,<sup>21</sup> the country's economy grew by 6.4% compared to the same period in 2016.<sup>22</sup> For the whole year, the World Bank expects the pace of growth in the country to increase to 6.7%.

Mid-cap companies, with the second greatest average weighting, performed far better than either large- or small-cap companies over the reporting period. The consumer staples sector was the largest positive contributor to total returns. The energy sector was the only sector to detract from performance.

ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.** Performance information for each Fund reflects temporary waivers of expenses and/or fees. Had each Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect reinvestment of dividends and capital gains distributions. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.**

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The net asset value (NAV) of each VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of each fund; it is calculated by taking the total assets of each fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAVs are not necessarily the same as each ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Certain indices may take into account withholding taxes. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

EXPLANATION OF EXPENSES

(unaudited)

**Hypothetical \$1,000 investment at beginning of period**

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2017 to December 31, 2017.

**Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

**Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

## NOTES TO FINANCIAL STATEMENTS

December 31, 2017

**Note 1—Fund Organization**—VanEck Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2017, offers fifty-six investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF and Vietnam ETF (each a “Fund” and, together, the “Funds”). China Asset Management (Hong Kong) Limited (the “Sub-Adviser”) is the sub-adviser to ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF seek to achieve their investment objectives by primarily investing directly in A-shares through the Hong Kong-Shanghai Stock Connect program and via the A-share quota granted to the Sub-Adviser. India Small-Cap Index ETF makes its investments through the India Small-Cap Mauritius Fund (the “Subsidiary”), a wholly owned subsidiary organized in the Republic of Mauritius. Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the China Securities Index Co. Ltd., Shenzhen Securities Information Co., Ltd., BlueStar Global Investors LLC or MV Index Solutions GmbH, a wholly owned subsidiary of Van Eck Associates Corporation (the “Adviser”).

**Note 2—Significant Accounting Policies**—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services—Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

**A. Security Valuation**—The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds’ pricing time (4:00 p.m. Eastern Time) but after the last close of the securities’ primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees,

75

## NOTES TO FINANCIAL STATEMENTS

(continued)

considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as when a particular foreign market is closed but the Fund is open. Debt securities are valued on the basis of evaluated prices furnished by an independent pricing service approved by the Funds' Board of Trustees or provided by securities dealers. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and/or (ii) quotations from bond dealers to determine current value and are categorized as Level 2 in the fair value hierarchy. Short-term debt securities with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. The Pricing Committee of the Adviser provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments or other assets. If market quotations for a security or other asset is not readily available, or if the Adviser believes it does not otherwise reflect the fair value of a security or asset, the security or asset will be fair valued by the Pricing Committee in accordance with the Funds' valuation policies and procedures. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, periodic comparisons to valuations provided by other independent pricing services, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 — Quoted prices in active markets for identical securities.

Level 2 — Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Basis for Consolidation**—The Subsidiary, an Indian exempted company, was incorporated on February 25, 2010 and acts as an investment vehicle for the India Small-Cap Index ETF (the "SCIF") in order to effect certain investments on behalf of the SCIF. The SCIF is the sole shareholder of the Subsidiary, and it is intended that the SCIF will remain the sole shareholder and will continue to control the Subsidiary. The consolidated financial statements of the SCIF include the financial results of its wholly owned subsidiary. All material interfund account balances and transactions have been eliminated in consolidation.

76

**Federal Income Taxes**—It is each Fund’s policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

**Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

**Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day as quoted by one or more sources. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

**Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund’s Schedule of Investments.

**Repurchase Agreements**—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2017 are reflected in the Schedules of Investments.

**H. Use of Derivative Instruments**—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments

in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the year ended December 31, 2017.

**Offsetting Assets and Liabilities**—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes,

## NOTES TO FINANCIAL STATEMENTS

(continued)

the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2017 is presented in the Schedules of Investments. Refer to related disclosures in Note 2G (Repurchase Agreements) and Note 9 (Securities Lending).

**Other**—Security transactions are accounted for on trade date. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

At December 31, 2017, ChinaAMC CSI 300 and ChinaAMC SME-ChiNext included \$8,354 and \$6,305, respectively, in cash denominated in foreign currency, at value on the Statements of Assets and Liabilities, which represents foreign investor minimum settlement reserve funds required by China Securities Depository and Clearing Corporation Limited.

**Note 3—Investment Management and Other Agreements**—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets. The Adviser has agreed, until at least May 1, 2018, to waive management fees and assume expenses to prevent each Fund's total annual operating expenses (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses; and for Russia ETF and Russia Small-Cap ETF, depository receipt fees up to 0.10% and 0.08% of average daily net assets, respectively) from exceeding the expense limitations as listed in the table below. During the year ended December 31, 2017, \$951,177 and \$349,754,000 of Africa Index ETF and Russia ETF's capital loss carryovers available from prior years expired unutilized.

Additionally, Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF, India Small-Cap ETF, and Russia Small-Cap ETF utilized \$153,970, \$13,901,444, \$174,374, \$25,984,491, and \$5,231,203 of their capital loss carryovers available from prior years.

During the year ended December 31, 2017, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, investments in partnerships, the expiration of capital loss carryforwards, and the tax treatment of in-kind redemptions, the Funds incurred differences that affected undistributed net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2017, the Funds did not incur any interest or penalties.

Uncertainties in the Chinese tax rules governing taxation of income and gains from investments in A-Shares could result in unexpected tax liabilities for the ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. China generally imposes withholding income tax (“WHT”) at a rate of 10% on dividends and interest (excluding government bond interest) derived by non-PRC resident enterprises (including a Qualified Foreign Institutional Investor (“QFII”) and a Renminbi Qualified Foreign Institutional Investor (“RQFII”)) from issuers resident in China. China also imposes WHT at a rate of 10% on capital gains derived by non-PRC resident enterprises from the disposal in shares of PRC enterprises. Effective November 17, 2014, investments through the Hong Kong-Shanghai Stock Connect program, QFIIs and RQFIIs, which includes these Funds, are exempted temporarily from WHT with respect to gains derived from the trading of equity investments (including A-shares).

The Finance Act, 2012 introduced a general anti-avoidance rule (“GAAR”), which became effective from April 1, 2017. GAAR is applicable where the main purpose of an arrangement is tax avoidance and empowers Indian tax authorities to declare such an arrangement as an impermissible avoidance arrangement. Additionally, on May 10, 2016, the Governments of India and Mauritius signed the Protocol for amending the tax treaty between India and Mauritius. As per the Protocol, India commenced taxation on capital gains arising from disposition of shares acquired on or after April 1, 2017 in a company resident in India, with shares acquired on or before March 31, 2017 being grandfathered as exempt from capital gains taxation. The Protocol could reduce the return to the Fund on its investments made after April 1, 2017 and the return received by Fund shareholders.

**Note 6—Capital Share Transactions**—As of December 31, 2017, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Fund shares are not individually redeemable and are issued and redeemed at their net asset value per share only through certain authorized broker-dealers (“Authorized Participants”) in blocks of shares (“Creation Units”), consisting of 50,000 shares or multiples thereof.

The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index (“Deposit Securities”) plus a balancing cash component to equate the transaction to the net asset value per share of the Fund on the transaction date. Cash may also be substituted in an amount equivalent to the value of certain Deposit Securities, generally as a result of market circumstances, or when the securities are not available in sufficient quantity for delivery, or are not eligible for trading by the Authorized Participant. The Funds may issue Creation Units in advance of receipt of Deposit Securities

subject to various conditions, including a requirement to maintain on deposit at the Custodian for the benefit of the Funds, collateral consisting of cash in the form of U.S. dollars at least equal to 115% of the daily marked to market value of the missing Deposit Securities.

Authorized Participants purchasing and redeeming Creation Units may pay transaction fees directly to The Bank of New York Mellon. In addition, the Funds may impose certain variable fees for creations and redemptions with respect to transactions in Creation Units for cash, or on transactions effected outside the clearing process, which are treated as increases in capital. These variable fees, if any, are reflected in share transactions in the Statements of Changes in Net Assets.

For the year ended December 31, 2017, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Africa Index ETF	\$754,219	\$4,764,796
Brazil Small-Cap ETF	1,670,305	2,482,813
ChinaAMC CSI 300 ETF	—	—
ChinaAMC SME-ChiNext ETF	—	—
Egypt Index ETF	7,365,199	1,257,144
India Small-Cap Index ETF	1,328,593	277,219
Indonesia Index ETF	—	35,640,845
Israel ETF	2,926,737	1,434,594
Poland ETF	5,951,890	7,859,356
Russia ETF	476,787,987	1,137,671,919
Russia Small-Cap ETF	11,873,692	34,828,914
Vietnam ETF	4,581,534	4,709,924

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund's daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect shareholder transactions including any cash component of the transactions.

**Note 7—Concentration of Risk**—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund's investment objective by

investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds (except Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF and India Small-Cap Index ETF) is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers. In addition, for Africa Index ETF and Egypt Index ETF there may be limitations or delays in the convertibility or repatriation of certain African currencies, which would adversely affect the U.S. dollar value and/or liquidity of the Fund's investments denominated in such African currencies, may impair the Fund's ability to achieve its investment objective and/or may impede the Fund's ability to satisfy redemption requests in timely manner.

As a result of certain events, the United States and the European Union ("EU") have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers' held by the Funds.

In March 2017, the United Kingdom triggered Article 50, and is now scheduled to leave the EU by the end of March 2019. Significant uncertainty exists on how the withdrawal will take place, the terms of the withdrawal and the effects such withdrawal will have on the EU and the United Kingdom. This may further impact the value of the Euro and the British pound sterling, and has caused volatility and uncertainty in European and global markets.

Should the Chinese government impose restrictions on the ability of ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF to repatriate funds associated with direct investment in A-Shares, the Funds may be unable to satisfy distribution requirements applicable to regulated investment companies (“RICs”) under the Internal Revenue Code of 1986, as amended, and the Funds may therefore be subject to Fund-level U.S. federal taxes.

A more complete description of risks is included in each Fund’s prospectus and Statement of Additional Information.

**Note 8—Trustee Deferred Compensation Plan**—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

**Note 9—Securities Lending**—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at December 31, 2017 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

**Note 10—Share Split**—On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Russia Small-Cap ETF, and 1 for 4 reverse share splits for Egypt Index ETF and India Small-Cap Index ETF. Fund shares began trading on the split adjusted NAV on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the Funds have been adjusted to reflect these reverse share splits.

**Note 11—Bank Line of Credit**—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2017, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Outstanding Loan Balance as of December 31, 2017
Africa Index ETF	324	\$2,121,843	2.37 %	\$1,062,733
Brazil Small-Cap ETF	299	435,351	2.41	195,786
ChinaAMC CSI 300 ETF	358	2,228,391	2.40	2,153,524
ChinaAMC SME-ChiNext ETF	332	443,129	2.41	222,719
Egypt Index ETF	55	597,433	2.39	—
India Small-Cap Index ETF	233	2,855,508	2.43	—
Indonesia Index ETF	27	408,048	2.42	—
Israel ETF	114	133,218	2.50	—
Poland ETF	325	423,444	2.38	—
Russia ETF	212	9,597,008	2.47	4,799,504
Russia Small-Cap ETF	109	256,632	2.41	230,216
Vietnam ETF	318	3,732,714	2.41	955,493

**Note 12—Custodian Fees**—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2017, there were offsets to custodian fees and these amounts are reflected in custody expense in the Statements of Operations.

**Note 13—Foreign Withholding Tax Claims**—In 2015, the VanEck Vectors Poland ETF (the “Fund”) filed claims to recover taxes withheld by Poland on dividend income received during calendar years 2010 through 2014 on the basis that Poland had violated certain provisions in the Treaty on the Functioning of the European Union. In October 2016 through June 2017, the Fund received favorable rulings from various local Polish tax offices. The Fund later received cash refunds of \$153,952 and \$413,347, and during calendar years 2016 and 2017 recorded them as an offset to foreign withholding tax expense. The Fund continues to accrue Polish foreign withholding taxes due to the need to file

further claims in order to potentially recover any additional amounts. Professional fees associated with the filing of claims in Poland that resulted in the recovery of these taxes were approved by the Board as appropriate expenses of the Fund.

For calendar years 2010 through 2014, the Fund elected to pass through the Polish withholding taxes as foreign tax credits to its shareholders. The Fund's shareholders benefitted from the tax savings generated from foreign tax credits claimed on their tax returns in prior years. Accordingly, the Fund is obligated to return a portion of the Polish refund received to the Internal Revenue Service ("IRS") to compensate for prior years' U.S. income tax liabilities attributable to the foreign taxes refunded. The IRS has stated that they are willing to enter into closing agreements with funds in order to satisfy these obligations. A closing agreement would result in the Fund paying a compliance fee to the IRS, on behalf of its shareholders, representing the estimated tax savings generated from foreign tax credits claimed by the Fund's shareholders on their tax returns in prior years. The Fund has accrued a liability of \$320,945 for the estimated IRS compliance fee, which is recorded in the Statement of Operations as "IRS compliance fee for foreign withholding tax claims". The actual IRS compliance fee may differ from the estimate and that difference may be material.

**Note 14—Subsequent Event Review**—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

On January 18, 2018, the Indian Finance Minister presented the Union Budget 2018 to the Indian Parliament. One of the key proposed amendments is the levy of a long-term capital gains tax at 10% on the sale on a listed Indian Company held one year or more. These new amendments, if passed, would be effective for sales occurring after April 1, 2018, with certain relief provisions available under the existing Mauritius tax treaty and for securities purchased prior to January 31, 2018. If signed into law, this could reduce the return to the Fund on investments sold after April 1, 2018 and the return received by Fund shareholders.

**Basis for Opinion**

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on each of the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2017, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as

evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the auditor of one or more of the VanEck investment companies since 1999.

\* Expressed as a percentage of the ordinary income distribution grossed up for foreign taxes.

The foreign taxes paid represent taxes incurred by the Fund on income received by the Fund from foreign sources.

\*\* Foreign taxes paid may be included in taxable income with an offsetting deduction from gross income or may be taken as a credit for taxes paid to foreign governments. You should consult your tax adviser regarding the appropriate treatment of foreign taxes paid.

A return of capital is not considered taxable income to shareholders. The portion of a distribution which is a dividend is includable in gross income while the portion of the distribution which is not a dividend shall be applied (a) against and reduces the adjusted basis of the stock. Accordingly, shareholders who received these distributions should not include these amounts in taxable income, but instead should treat them as a reduction of the cost basis of the applicable shares upon which these distributions were paid.

December 31, 2017 (unaudited)

Dear Shareholder:

Electric vehicles (and their batteries), together with solar and wind power generation, were of great interest to investors in 2017. Of special interest were the metals they use, in particular, cobalt, copper, lithium, nickel, and certain rare earths. As a result, VanEck Vectors Rare Earth/Strategic Metals ETF (NYSE Arca: REMX) ended the 12 month period as the best performing fund in the suite of VanEck Vectors Hard Assets ETFs, gaining 81.43%.\*

As the prices of the metals rose during the year, companies either mining or refining lithium or cobalt (both used in batteries) benefitted. So, too, did some of the companies involved either in extracting and/or refining rare earths. (Certain rare earths, for example, neodymium, are used in the permanent magnets found in wind turbines.)

In the context of electric vehicles, no one yet knows which particular battery technologies are going to “win”. We may even see a variety of technologies “winning” – used in different types of batteries in different vehicles in different environments. When it comes to electrical storage, there could be a similar situation, with different technologies being used for different purposes. However, whichever battery technologies eventually come out on top, we still expect to see a continuing rise in demand, among other metals, for both cobalt and lithium.

Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor’s shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.*

For those focusing not only on the metals used in electric vehicles and renewable energy, but also modern-day electronics, REMX should be considered. Also, depending upon their outlook, investors with a focus on alternative energy will find that VanEck Vectors Global Alternative Energy ETF (NYSE Arca: GEX) may offer interesting opportunities.

**Management Discussion** (unaudited)**Hard Assets Market Overview**

The VanEck® Natural Resources Index (RVEIT)<sup>‡</sup> tracked by VanEck Vectors Natural Resources ETF (NYSE Arca: HAP), which includes equities of the world's largest and most prominent hard assets producers, remains the most comprehensive index in this space. For the 12 month period ending December 31, 2017, the index returned +17.42%.

The table below shows average sector weightings within this index and the total return of each sector for the 12 month period ending December 31, 2017.

<b>RVEIT Sector<sup>‡</sup></b>	<b>Average</b>	<b>12 Month Total Return for Period Ending December 31, 2017</b>
Agriculture	41.59 %	19.53 %
Energy	29.50 %	7.92 %
Base/Industrial Metals	13.42 %	34.04 %
Precious Metals	7.11 %	6.61 %
Alternatives	4.39 %	20.55 %
Paper & Forest Products	4.00 %	32.41 %

All six sectors had positive returns over the 12 months ending December 31, 2017. While the base/industrial metals sector, with the third largest average weighting, posted the highest return for the 12 month period, the paper and forest products sector, with the smallest average weighting, posted the second highest total return. The two sectors posting the lowest returns were precious metals, with the third smallest average weighting and energy with the second highest average weighting.

## Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

Ten of the suite of 12 VanEck Vectors Hard Assets ETFs posted positive total returns during the 12 month period, with VanEck Vectors Rare Earth/Strategic Metals ETF (NYSE Arca: REMX) (81.43%) and VanEck Vectors Oil Refiners ETF (NYSE Arca: CRAK) (47.91%), as the two top performing funds. VanEck Vectors Oil Services ETF (NYSE Arca: OIH) (-19.95%) and the VanEck Vectors Unconventional Oil and Gas ETF (NYSE Arca: FRAK) (-13.20%) were the two worst performing Hard Assets ETFs.

VANECK VECTORS ETFs

(unaudited) (continued)

*Agribusiness*

The performance of the agribusiness industry during 2017 remained firm, with the Fund returning a respectable 21.68%. The primary drivers of positive performance were companies in the industrial sector and, in particular, those in the machinery segment, for example, Deere & Company (8.1% of Fund net assets) and Kubota Corp. (5.9% of Fund net assets). The greatest positive returns came from companies in the U.S., while the greatest negative returns came from those in Singapore, for example, Wilmar International Ltd. (2.6% of Fund net assets) and Golden Agri-Resources Ltd. (0.4% of Fund net assets). The consumer discretionary sector was the only sector to detract from performance.

*Coal*

While the performance of coal stocks was lackluster in the first six months of 2017, there was more shine to their performance in the second half of the year and the Fund returned 34.42% for the 12 month period under review. In the first 11 months of the year, according to the U.S. Energy Information Agency, not only was estimated U.S. coal production 8% higher than production for the same period in 2016, but also U.S. coal exports for the first three quarters of 2017 were 68% higher than exports for the same period in 2016.<sup>1</sup> Coal remains the world's most important fuel for making cement, producing steel, and generating energy.<sup>2</sup> China was the single largest contributor to returns, followed by Australia. Only one country, the U.S., detracted from performance.

*Global Alternative Energy*

The performance of global alternative energy stocks during the 12 month period was healthy and the Fund recorded a positive return of 21.90%. Companies in the information technology, industrial, and consumer discretionary sectors contributed the most to performance. Companies in the U.S. contributed by far the most positively to performance, while those from Germany detracted from performance.

*Gold Miners*

Both major gold miners and their junior peers had a roller coaster 12 months. Despite the price of gold having risen 13.1% during the period, the larger gold miners (VanEck Vectors Gold Miners ETF) posted a positive return of

11.99%; junior gold miners (VanEck Vectors Junior Gold Miners ETF) posted a return of 7.89% for the period.

Among the larger mining stocks, Canadian companies, with the largest average sector weighting, were the strongest contributors to performance. Companies in China contributed the least to performance.

The situation was similar among the juniors, with Australia the strongest contributor, followed by Canada. The U.S. and South Africa were the two countries to detract from performance.

### *Oil Refiners*

Refining stocks had an excellent year and the Fund ended the 12 month period up 47.91%. In the first half of the year much of this was related to the changes that occurred in the crude oil market. Refiners were helped by the fall in crude oil prices, especially in the four months from March through June, and benefited from lower refinery feedstock prices. In the second half of the year, margins remained robust and the performance of refiners remained solid. Exposure to refiners in the U.S., Japan, and India contributed most to performance. Not one country detracted from performance.

### *Oil Services*

Suffering from the fall in oil prices during the first half of the year, oil services stocks declined steadily from early January through June. Thereafter, as oil prices improved through the rest of the year, they moved sideways and slightly up, albeit with some noticeable ups and downs. While onshore drilling activity in the U.S. during 2017 may have picked up, at the end of 2016 the U.S. rig count stood at 658 and at the end of 2017 it had hit 929,<sup>3</sup> any benefit failed to flow through to oil services companies. The Fund declined 19.95% for the 12 month period. Oil service stocks in the U.S., with the largest average weighting in the sector, detracted the most from performance. Companies in the U.K., the Netherlands, and Bermuda also all detracted from performance.

### *Rare Earth and Strategic Metals*

After an uneventful first half to the year, the Fund had a spectacular second half and recorded a notable gain of 81.43% for the full 12 month period. One of the most significant drivers of Fund performance was the growing interest in electric vehicles, the batteries that power them, and lithium, the most important component in many of these batteries. The greatest contributors to performance were companies with mining operations and/or production involving lithium, rare earths, and cobalt in Argentina, Australia, China, and the Democratic Republic of Congo. The greatest detractors included companies involved in molybdenum. Small-cap companies performed better than their large- and mid-cap peers during the period under review.

### *Natural Resources*

The Fund returned 17.14% over the 12 month period under review. All six sectors contributed positively to performance. The agriculture sector, with the largest average weighting during the period, provided the largest positive returns. While no sector detracted from performance, precious metals and alternatives contributed the least to performance during the period under review.

### *Steel*

Having hit a high in mid-February, steel stocks gave back those gains as they dropped to a low toward the middle of June. Thereafter, they rose steadily, if fitfully through the end of December. The Fund recorded a positive total return for the 12 month period of 23.86%. On the whole, 2017 was a good year for steel producers.<sup>4</sup> However, despite Chinese efforts to cut capacity, the imposition of restrictions on imports in many regions, and firmer steel prices, serious concerns for the industry remain: it is too big and suffers from severe overcapacity.<sup>5</sup> Brazil, with the second largest average sector weighting during the period under review, followed by the U.K., were the greatest contributors to total return. Steel companies in Russia detracted from performance.

### *Unconventional Oil & Gas*

Even with firmer oil prices and despite the various deals to reduce production that OPEC and non-OPEC producers struck during 2017 and that now extend through to the end of 2018, the Fund still had a poor year, losing 13.20% over the 12 month period under review. Unconventional oil and gas, particularly shale oil, companies suffered accordingly. U.S. stocks (on average approximately 84% of the Fund by weight during the period under review) detracted the most

from performance.

*Uranium and Nuclear Energy*

The Fund returned 8.27%. Utility companies, with the largest average weighting over the period, produced the vast majority of the Fund's positive total return, with only the energy sector detracting from performance. Geographically, companies in the U.S. contributed the most to performance, while Japan was the greatest detractor from performance. According to the World Nuclear Association in December 2017, there were some 447 operable nuclear power reactors in 30 countries and 57 power reactors currently under construction in 14 countries, notably China, Russia, India, and the UAE.<sup>6</sup>

ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.** Performance information for certain Funds reflect temporary waivers of expenses and/or fees. Had these Funds incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect reinvestment of dividends and capital gains distributions. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.**

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The net asset value (NAV) of each VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of each fund; it is calculated by taking the total assets of each fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAVs are not necessarily the same as each ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. Certain indices may take into account withholding taxes. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

VANECK VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

**Hypothetical \$1,000 investment at beginning of period**

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2017 to December 31, 2017.

**Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

**Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

During the year ended December 31, 2017, transfers of securities from Level 2 to Level 1 were \$14,609,997. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2017:

	<b>Common Stocks China / Hong Kong</b>

**Note 2—Significant Accounting Policies**—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services — Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

**Security Valuation**—The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, **A.** whose values may be affected by market direction or events occurring before the Funds’ pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities’ primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR’s and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term debt securities with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at

(continued)

net asset value and are considered to be Level 1 in the fair value hierarchy. The Pricing Committee of the Adviser provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments or other assets. If market quotations for a security or other asset are not readily available, or if the Adviser believes it does not otherwise reflect the fair value of a security or asset, the security or asset will be fair valued by the Pricing Committee in accordance with the Funds' valuation policies and procedures. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, periodic comparisons to valuations provided by other independent pricing services, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis, which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 – Quoted prices in active markets for identical securities.

Level 2 – Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Federal Income Taxes**—It is each Fund's policy to comply with the provisions of the Internal Revenue Code B. applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

**Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

**Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day as quoted by one or more sources. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

72

**Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

**Repurchase Agreements**—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2017 are reflected in the Schedules of Investments.

**Use of Derivative Instruments**—The Funds may invest in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the year ended December 31, 2017.

**Offsetting Assets and Liabilities**—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2017 is presented in the Schedules of Investments. Refer to related disclosures in Note 2F (Repurchase Agreements) and Note 9 (Securities Lending).

**Other**—Security transactions are accounted for on trade date. Realized gains and losses are calculated on the specific identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

**Note 3—Investment Management and Other Agreements**—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%. The Adviser has agreed, until at least May 1, 2018, to waive management fees and assume expenses to

During the year ended December 31, 2017, \$257,031,280, \$155,793,705, \$158,919,596, \$388,612,074, \$1,722,348, \$79,176,906, \$49,042,636 of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Natural Resources ETF, Steel ETF, and Uranium+Nuclear Energy ETF's capital loss carryovers available from prior years expired unutilized.

Additionally, Agribusiness ETF, Oil Refiners ETF, Rare Earth/Strategic Metals ETF, and Uranium+Nuclear Energy ETF utilized \$458,313, \$18,083, \$469,561, and \$585,204 of their capital loss carryovers available from prior years.

During the year ended December 31, 2017, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, book/tax differences in the treatment of distributions from underlying investments, the expiration of capital loss carryforwards, and the tax treatment of in-kind redemptions, the Funds incurred differences that affected undistributed net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2017, the Funds did not incur any interest or penalties.

**Note 6—Capital Share Transactions**—As of December 31, 2017, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Fund shares are not individually redeemable and are issued and redeemed at their net asset value per share only through certain authorized broker-dealers (“Authorized Participants”) in blocks of shares (“Creation Units”), consisting of 50,000 shares, or multiples thereof.

The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index (“Deposit Securities”) plus a balancing cash component to equate the transaction to the net asset value per share of the Fund on the transaction date. Cash may also be substituted in an amount equivalent to the value of certain Deposit Securities, generally as a result of market circumstances, or when the securities are not available in sufficient quantity for delivery, or are not eligible for trading by the Authorized Participant. The Funds may issue Creation Units in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit at the Custodian for the benefit of the Funds, collateral consisting of cash in the form of U.S. dollars at least equal to 115% of the daily marked to market value of the missing Deposit Securities.

Authorized Participants purchasing and redeeming Creation Units may pay transaction fees directly to The Bank of New York Mellon. In addition, the Funds may impose certain variable fees for creations and redemptions with respect to transactions in Creation Units for cash, or on transactions effected outside the clearing process, which are treated as increases in capital. These variable fees, if any, are reflected in share transactions in the Statements of Changes in Net Assets.

For the year ended December 31, 2017 the Funds had in-kind contributions and redemptions as follows:

<u>Fund</u>	In-Kind Contributions	In-Kind Redemptions
Agribusiness ETF	\$54,979,741	\$147,431,658
Coal ETF	73,060,327	96,603,711
Global Alternative Energy ETF	11,927,982	2,718,950

Steel ETF	50,386,260	111,454,719
Unconventional Oil & Gas ETF	27,841,801	11,856,285
Uranium+Nuclear Energy ETF	—	7,572,705

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund’s daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect gross shareholder transactions including any cash component of the transactions.

**Note 7—Concentration of Risk**—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Funds’ index. Each of the Funds (except for Natural Resources ETF) is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

NOTES TO FINANCIAL STATEMENTS

(continued)

In March 2017, the United Kingdom triggered Article 50, and is now scheduled to leave the European Union (“EU”) by the end of March 2019. Significant uncertainty exists on how the withdrawal will take place, the terms of the withdrawal and the effects such withdrawal will have on the EU and the United Kingdom. This may further impact the value of the Euro and the British pound sterling, and has caused volatility and uncertainty in European and global markets.

As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers held by the Funds.

At December 31, 2017, the Adviser owned 2,500 shares of Gold Miners ETF.

A more complete description of risks is included in each Fund’s prospectus and Statement of Additional Information.

**Note 8—Trustee Deferred Compensation Plan**—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

**Note 9—Securities Lending**—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest

or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders', administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at December 31, 2017 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

The following table presents repurchase agreements held as collateral by type of security on loan as of December 31, 2017:

<u>Fund</u>	Gross Amount of Recognized Liabilities for Securities Loaned in the Statements of Assets and Liabilities* Equity Securities
Agribusiness ETF	\$22,788,771

Uranium+Nuclear Energy ETF	2,190,849

\*Remaining contractual maturity of the agreements: overnight and continuous

**Note 10—Share Split**—On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Global Alternative Energy ETF and Uranium+Nuclear Energy ETF, and 1 for 4 reverse share split for Junior Gold Miners ETF and Rare Earth/Strategic Metals ETF. Fund shares began trading on a split-adjusted basis on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the respective Funds have been adjusted to reflect the reverse share splits.

**Note 11—Bank Line of Credit**—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended December 31, 2017, the following Funds borrowed under this Facility:

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

<u>Fund</u>	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Outstanding Loan Balance as of December 31, 2017

Uranium+Nuclear Energy ETF	188	119,698	2.32	—

**Note 12—Custodian Fees**—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended December 31, 2017, there were offsets to custodian fees and these amounts are reflected in custody expense in the Statements of Operations, unless shown separately under the caption “Expense offset arrangements.”

**Note 13—Subsequent Event Review**—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

## **Basis for Opinion**

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on each of the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2017, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the auditor of one or more of the VanEck investment companies since 1999.

## APPROVAL OF INVESTMENT MANAGEMENT AGREEMENT

December 31, 2017 (unaudited)

At a meeting held on June 9, 2017 (the “Renewal Meeting”), the Board of Trustees (the “Board”) of VanEck Vectors ETF Trust (the “Trust”), including all of the Trustees that are not interested persons of the Trust (the “Independent Trustees”), approved the continuation of the investment management agreement between the Trust and Van Eck Absolute Return Advisers Corporation (the “Adviser”) (the “Investment Management Agreement”) with respect to the VanEck Vectors Long/Flat Commodity ETF (the “Fund”).

The Board’s approval of the Investment Management Agreement was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees’ deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In preparation for the Renewal Meeting, the Trustees held a meeting on May 8, 2017. At that meeting, the Trustees received materials from the Adviser, including expense information for other funds. The Independent Trustees’ consideration of the Investment Management Agreement was based, in part, on information obtained through discussions with the Adviser and its affiliates at the Renewal Meeting and the May 8, 2017 meeting regarding the management of the Fund and information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser and its affiliates, including the background and experience of the portfolio managers and others proposed to be involved in the management and administration of the Fund. In evaluating the terms of the Investment Management Agreement at each Meeting, the Trustees considered the terms and scope of services that the Adviser would provide under the Investment Management Agreement, including the Adviser’s agreement to pay all of the direct expenses of the Fund (excluding interest expense, trading expenses, taxes, accrued deferred tax liability and extraordinary expenses). The Trustees concluded that the Adviser and its personnel have the requisite expertise and skill to manage the Fund’s portfolio.

The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability of the Fund to the Adviser because the Fund has not yet commenced operations. The Trustees could not consider the historical performance or the quality of services previously provided to the Fund by the Adviser, although they concluded that the nature, quality, and extent of the services to be provided by the Adviser were appropriate based on the Trustees’ knowledge of the Adviser and its personnel and the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the Renewal Meeting and at their May 8, 2017 meeting as part of their consideration of the Investment Management Agreement.

In voting to approve the continuation of the Investment Management Agreement, the Trustees, including the Independent Trustees, concluded that the terms of the Investment Management Agreement are reasonable and fair in light of the services to be performed, the fees paid by certain other funds, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that the Investment Management Agreement is in the best interest of the Fund and its shareholders.

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a VanEck Vectors ETF Trust (the "Trust") Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus contains this and other information about the investment company. Please read the prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information.
