1. The Group's business and general information

IRSA Inversiones y Representaciones Sociedad Anónima ("IRSA", "the Company" / "Us" or "the Society") was founded in 1943 and is engaged in a diversified range of real estate activities in Argentina since 1991.

IRSA and its subsidiaries are collectively referred to hereinafter as "the Group".

As of March 31, 2014, the Group operates in six business segments. See Note 7 to the Condensed Consolidated Financial Statements as of June 30, 2013 for a description of such segments.

Group's real estate business operations are conducted primarily through IRSA and IRSA's principal subsidiary, Alto Palermo S.A. ("APSA"). Through APSA and IRSA, the Group owns, manages and develops shopping centers across Argentina, a portfolio of office and other rental properties in the Autonomous City of Buenos Aires, and it entered the United States of America ("USA") real estate market in 2009, mainly through the acquisition of non-controlling interests in office buildings and hotels. Through IRSA or APSA, the Group also develops residential properties for sale. The Group, through IRSA, is also involved in the operation of branded hotels. The Group uses the term "real estate" indistinctively in these consolidated financial statements to denote investment, development and/or trading properties activities.

The activities of the Group's segment "Financial operations and others" are carried out mainly through Banco Hipotecario S.A. ("BHSA"), where IRSA has a 29.77% interest (without considering treasury shares of our own). BHSA is a commercial bank offering a wide variety of banking activities and related financial services to individuals, small and medium-sized companies and large corporations, including the provision of mortgaged loans. BHSA's shares are listed on the Buenos Aires Stock Exchange ("BASE"). Besides that, the Group has a 42.95% interest in Tarshop S.A ("Tarshop"), a company which main activities are credit card and loan origination transactions.

IRSA's shares are listed and traded on both the BASE and the New York Stock Exchange ("NYSE"). APSA's shares are listed and traded on both the BASE and the NASDAQ of USA.

Cresud S.A.C.I.F y A. is our ultimate parent company and is a corporation incorporated and domiciled in Argentina. The address of its registered office is Moreno 877, Floor 23, Autonomous City of Buenos Aires, Argentina.

These Unaudited Condensed Interim Consolidated Financial Statements have been approved for issuance by the Board of Directors on May 12, 2014.

The principal accounting policies applied in the presentation of these Unaudited Condensed Interim Consolidated Financial Statements are consistent with those applied in the preparation of the information under IFRS as of June 30, 2013, which are described in Note 2 of the Annual Consolidated Financial Statements.

2.3. Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual future results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Consolidated Financial Statements, the significant judgments made by Management in applying the Group’s accounting policies and the main sources of uncertainty were the same applied by the Group in the preparation of the Annual Consolidated Financial Statements for the year ended June 30, 2013, save for changes in accrued income tax, provision for legal claims, allowance for bad debts and accrued supplementary rental.

2.4. Comparative Information

Balance items as of March 31, 2013 and June 30, 2013 shown in these financial statements for comparative purposes arise from Unaudited Condensed Interim Consolidated Financial Statements then ended. Certain reclassifications have been made in order to present figures comparatively with those of this period.

During the period, the Argentine Peso devalued against the US\$ and other currencies by around 32%, which has an impact in comparative information presented in these Financial Statements, due mainly to the currency exposure of our income from offices rental, and our net assets and liabilities in foreign currency as detailed in Note 39.

3. Seasonal effects on operations

The operations of the Group's shopping centers are also subject to seasonal effects, which affect the level of sales recorded by lessees. During summer time (January and February), the lessees of shopping centers experience the lowest sales levels in comparison with the winter holidays (July) and year-end holidays (December) when they tend to record peaks of sales. Apparel stores generally change their collections during the spring and the fall, which impacts positively on shopping mall sales. Sale discounts at the end of each season also affect the business. As a consequence, a higher level of revenues is generally expected in the second half of the year rather than the first in shopping center operations.

In November, 2012, the Group took control over Ribgy 183 LLC ("Rigby"), a company that owns a rental office building located in New York, US (see Note 4 to the annual consolidated financial statements). Therefore, balances as of March 31, 2013 include Rigby's operations from the mentioned date.

5. Financial risk management and fair value estimates

5.1 Financial risk

The group's diverse activities are exposed to a variety of financial risk: market risk (including foreign currency risk, interest rate risk and price risk) credit risk, liquidity risk and capital risk.

The Unaudited Condensed Interim Consolidated Financial Statements do not include all the information and disclosures on financial risk management; therefore they should be read along with the annual consolidated financial statements for the year ended June 30, 2013. There have been no changes in the risk management or risk management policies applied by the Group since year end.

5.2 Fair value estimates

Since June 30, 2013 to the date of these financial statements, there have been no significant changes in business or economic circumstances affecting the fair value of the Company's financial assets and liabilities (either measured at fair value or amortized cost), except for our investment in Supertel Hospitality Inc. ("Supertel"), which fair value was affected by the decrease in the market value of its common shares, because of the suspension of dividends' payment. This had been decided in order to fortify its financial situation. Furthermore, there have been no transfers between the different hierarchies used to assess the fair value of the Company's financial instrument.

6. Segment information (Continued)

Operating results of the Cyrsa S.A., Nuevo Puerto Santa Fe S.A. ("NPSF"), Canteras Natal Crespo S.A. (for the comparative period), Puerto Retiro S.A., Baicom Networks S.A. and Quality Invest S.A. joint ventures have been presented under the method of proportionate consolidation. Under this method, the income/loss generated by joint businesses is reported in the income statements line-by-line, rather than in a single item as required by IFRS. Management believes that the proportional consolidation method provides more useful information to understand the business return, because the assets and income/loss generated by consolidated operations are similar to the assets and income/loss booked under the equity method. This is due to the fact that under the proportional consolidation method, revenues and expenses are reported separately, instead of offsetting and reporting them as a single item in the statement of income. Therefore, the proportional consolidation method is used by the Group's Executive Committee to assess and understand the return and the results of operations of the business as a whole.

The following tables present a reconciliation between the total results of segment operations and the results of operations as per the statements of income. The adjustments relate to the presentation of the results of operations of joint ventures accounted for under the equity method under IFRS and the non-elimination of the inter-segment transactions.

15. Financial instruments by category

Determination of fair values

IFRS 9 defines the fair value of a financial instrument as the amount for which an asset could be exchanged, or a financial liability settled, between knowledgeable, willing parties in an arm's length transaction. All financial instruments recognized at fair value are allocated to one of the valuation hierarchy levels of IFRS 7. This valuation hierarchy provides for three levels.

In the case of Level 1, valuation is based on unadjusted quoted prices in active markets for identical financial assets or liabilities that the Group can refer to at the date of ended. A market is deemed active if transactions take place with sufficient frequency and in sufficient quantity for price information to be available on an ongoing basis. Since a quoted price in an active market is the most reliable indicator of fair value, this should always be used if available. The financial instruments the Group has allocated to this level mainly comprise equity investments, mutual funds and mortgage bonds for which quoted prices in active markets are available. In the case of shares, the Group allocates them to this level when either a stock market price is available or prices are provided by a price quotation on the basis of actual market transactions.

In the case of Level 2, fair value is determined by using valuation methods based on inputs directly or indirectly observable in the market. If the financial instrument concerned has a fixed contract period, the inputs used for valuation must be observable for the whole of this period. The financial instruments the Group has allocated to this level mainly comprise interest rate swaps and foreign currency future contracts.

15. Financial instruments by category (Continued)

In the case of Level 3, the Group uses valuation techniques not based on inputs observable in the market. This is only permissible insofar as no market data are available. The inputs used reflect the Group's assumptions regarding the factors which market players would consider in their pricing. The Group uses the best available information for this, including internal company data. The Group has allocated to this level shares and warrants of Supertel and the Arcos del Gourmet S.A.'s stock option (with a fair value of zero at the end of the period).

The Group's Finance Division has a team in place in charge of estimating valuation of financial assets required to be reported in the financial statements, including the fair value of Level-3 instruments. The team directly reports to the Chief Financial Officer "CFO".

The CFO and the valuation team discuss the valuation methods and results upon the acquisition of an asset and, if necessary, on a quarterly basis, in line with the Group's quarterly reports.

According to the Group's policy, transfers among the several categories of valuation tiers are recognized when occurred, or when there are changes in the prevailing circumstances requiring the transfer.

15. Financial instruments by category (Continued)

Upon initial recognition (January, 2012), the consideration paid for the Shares and Warrants of Supertel was assigned to both instruments based on the relative fair values of those instruments upon acquisition. The fair value of these instruments exceeded the transaction price and were determined using a valuation technique that uses inputs not observable in the market. As a result of the use of this technique, the Group has not recognized a gain at the time of initial recognition in the amount of US\$ 7.9 million. As of March 31, 2014, the fair value of the Warrants of Supertel determined using the mentioned technique was minor than the gain not recognized at the time of initial recognition; remaining thus the Warrants remain valued at an amount of 0.

According to Group estimates, all things being constant, a 10% decline in the price of the underlying assets of Shares and Warrants of Supertel (data observed in the market) of Level 3 as of March 31, 2014, would reduce pre-tax income by Ps. 2.6 million.

According to Group estimates, all things being constant, a 10% increase in the credit spread (data which is not observable in the market) of the Shares and Warrants of Supertel used in the valuation model applied to Level 3 financial instruments as of March 31, 2014, would reduce pre-tax income by Ps. 7.5 million. The rate used as of March 31, 2014 was 14.25%.

When no quoted prices in an active market are available, fair values (particularly with derivatives) are based on recognized valuation methods. The Group uses a range of valuation models for the measurement of Level 2 and Level 3 instruments, details of which may be obtained from the following table:

Description	Pricing model	Pricing method	Parameters
Foreign currency-contracts	Present value method	Theoretical price	Money market Interest-Rate curve; Foreign exchange curve.
Interest rate swaps	Discounted cash flow	Theoretical price	Interest rate forward contract and flows of funds.
Shares of Supertel	Binomial tree	Theoretical price	Underlying asset price (Market price); share price volatility (historical) and money market interest-rate curve (Libor curve).
Warrants of Supertel	Black-Scholes	Theoretical price	Underlying asset price (Market price); share price volatility (historical) and money market interest-rate curve (Libor curve).
Call option of Arcos	Discounted cash flow	-	Projected income and discounted interest rate.
Investment in Supertel convertible loan	Discounted cash flow	-	Discount interest rate.

1. General information and company's business

IRSA Inversiones y Representaciones Sociedad Anónima ("IRSA" or the "Company") was founded in 1943, primarily engaged in managing real estate holdings in Argentina since 1991.

IRSA is a corporation incorporated and domiciled in Argentina. The registered office is Bolívar 108, 1st Floor, Buenos Aires, Argentina.

The Company owns, manages and develops a portfolio of office and other rental properties in Buenos Aires. In addition, IRSA through its subsidiaries, associates and joint ventures manages and develops shopping centers and branded hotels across Argentina, and also office properties in the United States of America.

These Unaudited Condensed Interim Separate Financial Statements have been approved for issue by the Board of Directors on May 12, 2014.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statements

2.1. Basis of preparation

The Unaudited Condensed Interim Financial Statements have been prepared in accordance with the Technical Resolution No. 26 of the Argentine Federation of Professional Councils of Economic Science ("FACPCE", as per its Spanish acronym) and with IAS 34 "Interim Financial Reporting". Furthermore, some additional issues were included as required by the Business Companies Act and/or regulations of the CNV, including supplementary information provided in the last paragraph of section 1, Chapter III, Title IV of General Ruling 622/13 of the CNV. Such information is included in the Notes to these Unaudited Condensed Interim Separate Financial Statements according to IFRS.

These Financial Statements should be read together with the annual separate financial statements of the Company as of June 30, 2013 prepared in accordance with the Technical Resolution No. 26. These Unaudited Condensed Interim Separate Financial Statements are presented in Argentine Pesos.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statements (Continued)

These Condensed Interim Separate Financial Statements corresponding to the nine and three-month periods ended March 31, 2014 and 2013 have not been audited. The Company's Management believes they include all necessary adjustments to fairly present the results of each period. The Company's nine and three-month periods ended March 31, 2014 and 2013 results do not necessarily reflect the proportion of the Company's full-year results.

2.2. Significant accounting policies

The principal accounting policies adopted for the preparation of these Unaudited Condensed Interim Financial Statements are consistent with those applied in the preparation of the information under RT 26 as of June 30, 2013, and are based on those IFRS in force as of June 30, 2013 (except for the accounting of investments in subsidiaries, associates and joint ventures, which are accounted for under the equity method as required in RT 26). In addition, the most significant accounting policies are described in the Annual Separate Financial Statements.

2.3. Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimates and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Separate Financial Statements, the main significant judgments made by Management in applying the Company's accounting policies and the major sources of uncertainty were the same that the Company used in the preparation of financial statements as of and for the fiscal year ended June 30, 2013, save for changes in accrued income tax, provision for legal claims, allowance for bad debts and accrued supplementary rental.

2.4. Comparative Information

Balance items as of March 31, 2013 and June 30, 2013 shown in these financial statements for comparative purposes arise from financial statements then ended. Certain reclassifications have been made in order to present figures comparatively with those of this period.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statements (Continued)

During the period, the Argentine Peso devalued against the US\$ and other currencies by around 32%, which has an impact in comparative information presented in these Financial Statements, mainly due to the currency exposure of our income from offices rental, and our net assets and liabilities in foreign currency as detailed in Note 34.

3. Acquisitions and disposals

See acquisitions and disposals made by the Company for the nine-month period ended March 31, 2014 in Note 4 to the Unaudited Condensed Interim Consolidated Financial Statements.

4. Financial risk management

4.1 Financial risks

The Company's activities are exposed to a variety of financial risks: market risk (including foreign currency risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

„ Revenues grew by 31.1% in the third quarter of 2014 compared to the same quarter of 2013, and recorded a cumulative growth of 28.5% for the nine-month period, mainly explained by the performance of the Shopping Center, Offices and other and the Hotel segments.

„ Revenues from the Offices segment increased by 28.3% in the quarter under review compared to the same period of the previous fiscal year and 13.6% compared to the first nine months of the previous fiscal year. This growth is explained by the evolution of the exchange rate during the quarter under analysis, which favors the segment, offset by a 14,000 sqm decrease in gross leaseable area, due to the sales of investment properties made during the year.

„ Operating income and EBITDA grew by 34.8% and 25.2%, respectively, for the first nine months and the EBITDA/Revenue margin, excluding revenues from common maintenance expenses, stood at 67.0%, higher than the 65.0% recorded in the same period of 2013.

IV. Sales and Developments

The Sales and Developments segment shows residual operations from projects developed in previous quarters. Revenues have fallen on a year-on-year basis due to higher results from the sale of units of “Horizons” and “Torres Rosario” in the same quarter of the previous year. However, operating income and EBITDA have grown strongly during the third quarter, explained by the recent partial sale of “La Nación” building.

Evolution of Exchange Rate

During the last months, the depreciation of the Argentine Peso to the U.S. Dollar accelerated as compared to the previous months. In the third quarter of fiscal year 2014 the Argentine currency depreciated 22.7%, whereas in the period between December 2012 and March 2013, it had depreciated 4.1%. Accumulating a depreciation of 48.5% in the nine-month period while in the same period last year accumulated depreciation had been 13.1%. During the past month of January the Argentine peso/U.S. dollar exchange rate suffered a reduction of 22.8% compared to the last figure recorded in December 2013. Given that a significant portion of our debt is denominated in USD, this process had an adverse impact on our Financial Results. Most of our assets are favorably positioned vis-à-vis the dollar; however, in our financial statements they are valued at historical cost plus investments, and are not affected by any kind of revaluation due to the fluctuation of market prices.

XI. Brief comment on prospects for the next period

Our shopping centers have maintained their growth rate and have continued to exhibit sound invoicing figures and occupancy rates close to 100%. During the fourth quarter of this fiscal year we expect to maintain the sales, visitors' traffic and occupancy levels recorded in the first nine months, so as to continue consolidating our position as the leading shopping center company in Argentina.

Moreover, we expect to open our "Arcos District" shopping center located in the neighborhood of Palermo, in the City of Buenos Aires. This project consists in an urban model, offering a variety of premium brands in an open-air environment, with approximately 16,000 sqm of gross leaseable area and 65 stores. While it was expected to be opened in December 2013, on December 10, 2013 the judicial branch confirmed an injunction order that suspended the opening of the shopping center on the grounds that it failed to have certain governmental permits. Although the construction works have obtained all the governmental permits required, the Company is taking various steps, including the filing of an appeal against the resolution and a request to have the injunction released, with favorable expectations. On April 1, 2014, the Government of the City of Buenos Aires issued a new favorable environmental certificate. We trust that we will soon be able to open the fourteenth shopping center in our portfolio.

On the other hand, during the coming quarter and the first semester of fiscal year 2015 we will continue working on the development of our next shopping center in the City of Neuquén. Shopping Neuquén, the gross leaseable area of which is about 10,000 sqm, will be our sixth development located in the inner regions of our country, and in view of the progress shown by the city in the last years, we expect that this project will achieve the same success as other developments of this nature in the provinces where we operate. It is scheduled to open in the spring of this year. In addition, we continue evaluating the best timing to launch other projects on the large extent of lands reserved by the company for future business developments.

In addition, we will continue making efforts to provide better services in our shopping centers, aimed at maintaining our successful occupancy rates and number of visitors. We hope to keep on adding new top brands among our tenants and devising new ways to continue offering the best commercial proposals to our public.

Regarding the Offices and Hotels business, we have recorded better results during the last quarter due to the evolution of the exchange rate in Argentina. During the next quarter we expect to continue our sales of non-strategic portfolio assets for attractive prices as we have actively done during the past year. In addition, we will strive to achieve maximum occupancy in our buildings and the best possible lease agreements, trying to attract new firms wishing to relocate in the spaces we offer. Moreover, we are deciding on the most suitable timing for launching our "Catalinas Norte" project, which is strategically located and will add approximately 35,000 sqm of gross leaseable area to our portfolio.

Regarding the Sales and Developments segment, we expect to continue selling non-strategic assets and small land reserves and to make progress in the execution of title deeds for the last available units in the residential projects "Caballito Nuevo", "Torres Rosario" and "El Encuentro".

As concerns our investments outside Argentina, we will continue to work towards optimizing occupancy and income levels in our Lipstick and Madison buildings. Moreover, we expect to complete the announced transaction to acquire, through our investment in Dolphin and together with other investors, about 53.3% in the Israeli company IDBD, one of the largest and most diversified investment groups in Israel, which is engaged through its subsidiaries in various markets and businesses such as real estate, retail, agricultural business, oil and gas production, insurance, telecommunications, etc.

Given the quality of the real estate assets in our portfolio, the Company's financial position and low indebtedness level, its experience in taking advantage of market opportunities and its credentials in the capital markets, we are confident that that we will remain on the growth track, consolidating the best real estate portfolio of Argentina and taking advantage of opportunities that may arise abroad.
