Title: Chief Executive Officer

For Immediate Release
Bennett Environmental Announces First Quarter Results

Loss of \$3.6mm (\$0.17 per share)
6,000 tonnes in New Business orders from the US

Oakville, Ontario, May 11, 2005 Bennett Environmental Inc. today announced operating and financial results for the three months ended March 31, 2005.

The consolidated net loss for the quarter was \$3.6 million (\$0.17 per share) on revenues of \$3.9 million, compared to a net loss \$0.3 million (\$0.02 per share) on revenues of \$8.9 million in the first quarter of 2004.

Approximately 4,200 tonnes of soil were processed at the Company's Saint Ambroise, Quebec facility and 201,000 kilograms of material were processed at the MRR Cornwall facility. In addition, Bennett disposed of approximately 5,000 tonnes of non-hazardous soil directly from customers to landfills. Revenue for the Quebec facility was approximately \$2.5 million, for the Cornwall facility was approximately \$0.6 million and revenue from the disposal of non-hazardous soil was \$0.8 million.

In the first quarter of 2004, approximately 19,500 tonnes of soil was processed at the Quebec facility, while 256,000 kilograms of material was processed in Cornwall and the Company disposed of approximately 7,800 tonnes of non-hazardous soil directly to landfills in the first quarter of 2004. Revenue was \$6.6 million from the Quebec facility, \$0.9 million for the Cornwall facility and \$1.4 million from the disposal of non-hazardous soil in the first quarter of 2004.

Average revenue per tonne for soil processing was approximately \$595 per tonne in 2005, compared to \$338 per tonne in 2004. Revenue per tonne recorded in 2004 included 15,900 tonnes of low value material from the Saglek project which was recorded at \$264 per tonne.

For the first quarter, contribution margins (defined as revenue less operating expenses) were flat compared to a positive contribution of \$3.2 million in the same period a year earlier. Overall contribution margins for the first quarter were negatively impacted by high transportation costs, low volumes of soil including material requiring additional processing time.

Operating costs in the first quarter of 2005 were \$4.0 million compared to \$5.7 million for the same period a year ago, chiefly as a result of lower volumes. Higher per ton costs were related to two main factors: transportation and low volumes. Higher fuel charges and related fuel surcharges on transportation added approximately 16% to freight costs. Lower volumes accounted for the balance of the additional costs. Administration and Business Development costs totalled \$4.7 million in the first quarter of 2005 compared to \$3.1 million for the same period a year earlier. Professional fees and higher insurance costs accounted for the increase. Costs associated with the class action litigation, the related OSC and SEC investigations increased \$0.8 million compared with the first quarter of 2004. Higher insurance costs accounted for approximately \$0.3 million and higher professional fees associated with accounting, auditing and accounted for approximately \$0.3 million.

For Immediate Release

Amortization for the first quarter of 2005 was \$1.0 million compared to \$0.7 million a year ago. The increase relates to the amortization of certain assets and licenses purchased from Eli-Ecologic in late 2003.

In the first quarter of 2005, cash used for operating activities before changes in operating working capital amounted to \$4.3 million. Cash used by operating working capital was approximately \$1.4 million, for a net use of cash from operations of approximately \$5.7 million for the quarter. The principal use of cash from operating working capital was a pre-payment of insurance premiums for the year. Cash used for accounts receivable was principally offset by cash generated by accounts payable.

At the end of the quarter, the Company had cash and equivalents of \$8.2 million and working capital totalled \$20.8 million.

Outlook

While shipments were slow in the quarter, I'm encouraged that we secured approximately 6,000 tonnes of new U.S. orders that arrived in the first quarter or were scheduled to arrive in the early part of the second quarter from new customers, said Al Bulckaert, President and CEO. As well, I've just returned from a site visit at the New Jersey Federal Creosote project and officials there expect to commence excavation activities in July. We expect to receive approximately 5,000 - 10,000 tonnes of soil from Federal Creosote for the balance of 2005.

Bennett expects to process 10,000 tonnes of soil in the second quarter and will shut its operations in Saint Ambroise, Quebec for the month of June.

The Company and the Quebec Ministry of Sustainable Development, Environment and Parks of Quebec are continuing their discussions towards developing an action plan for Récupère Sol on air emissions that is acceptable for the Ministry. The Company believes that its plant will comply with the norms established by the Ministry. Discussions are progressing and the Company hopes that the discussions will be completed during the next quarter.

It's too early to provide a detailed outlook, but our objective for 2005 is to process approximately 50,000 tons of soil at Saint Ambroise. We are encouraged by our progress, particularly in the US market, however, there is no assurance we will reach this objective in what remains a difficult and competitive market. We look forward to discussing our plans in more detail at the Annual Meeting on May 11th, and thereafter, concluded Mr. Bulckaert.

Bennett Environmental Inc. will hold its Annual General Meeting (AGM) on Wednesday, May 11th, 2005 at 4:00 PM at the Toronto Stock Exchange, The Exchange Tower, 130 King Street West, Toronto, Ontario. At the AGM, management will discuss results for the first quarter of 2005 together with its progress and plans for 2005. A webcast of the AGM will be broadcast live on the Company's website at www.bennettenv.com on May 11th, 2005. Investors who are unable to
