PRESS RELEASE

DENISON UPDATES CANADIAN MINING AND PRODUCTION PLANS

Toronto, ON May 16, 2007... Denison Mines Corp. (Denison or the Company) (TSX:DML) (AMEX:DNN) announced today that AREVA Resources Canada Inc. (AREVA), the operator of the McClean Lake Joint Venture, has provided an updated estimate of 2007 production of 1.8 million pounds of U₃O₈, a reduction from the previously reported level of 2.2 million to 3 million pounds. The reduction in estimated 2007 production is a result of delays in obtaining regulatory approval and implementing planned mill modifications to increase leaching capacity, later than expected completion of revisions to the tailings distribution system and the suspension of further jet boring drilling at the McClean North deposit.

The McClean Lake joint venture management committee decided yesterday to suspend further jet boring on McClean North and to focus on and proceed expeditiously to obtain the necessary regulatory approvals and place this deposit into production using underground mining methods. The ability to recover a much higher quantity of U₃O₈ using underground mining than would have been the case with jet boring has become much more important with the rapidly rising price of U₃O₈ and prompted the decision at this time. The environmental assessment on underground mining at McClean North has been approved, so development and mining could commence as soon as the Canadian Nuclear Safety Commission has approved the mine plan. The McClean North deposit has an indicated resource estimate of 11.48 million pounds at a grade of 2.80% U₃O₈.¹ Ore from McClean North could be available for milling as early as 2009.

AREVA continues to expect that the mining of the Sue E pit will be completed this year and expects to begin stripping the Sue B deposit this summer with mining scheduled for completion in 2008. An environmental assessment for the mining of the Caribou deposit is expected to be filed with the regulatory authorities before the end of the year. Midwest is continuing through the approval process with ore production scheduled for 2011. Production levels at McClean are expected to steadily increase, reaching about 9 million pounds per year by 2011 when Midwest is in production and another mill expansion is completed.

About Denison

Denison Mines Corp. is the premier intermediate uranium producer in North America, with mining assets in the Athabasca Basin Region of Saskatchewan, Canada and the southwest United States including Colorado, Utah, and Arizona. Further, the Company has ownership interests in two of the four uranium mills operating in North America today. The combination of a diversified mining asset base with parallel ownership of milling

infrastructure in highly politically stable jurisdictions has uniquely positioned the Company for growth and development into the future. The Company also has a strong exploration portfolio with large land positions in the United States, Canada and Mongolia. Correspondingly, the Company has one of the largest uranium exploration teams among intermediate uranium companies.

Cautionary Statements

This news release contains forward-looking statements, within the meaning of the United States Private Securities Litigation Reform Act of 1995 and similar Canadian legislation, concerning the business, operations and financial performance and condition of Denison Mines Corp. (Denison).

Forward-looking statements include, but are not limited to, statements with respect to estimated production, the expected effects of possible corporate transactions and the development potential of Denison's properties; the future price of uranium and vanadium; the estimation of mineral reserves and resources; the realization of mineral reserve estimates; the timing and amount of estimated future production; costs of production; capital expenditures; success of exploration activities; permitting time lines and permitting, mining or processing issues; currency exchange rate fluctuations; government regulation of mining operations; environmental risks; unanticipated reclamation expenses; title disputes or claims; and limitations on insurance coverage. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as plans, expects or does not expect, is expected, budget scheduled, estimates, forecasts, intends, anticipates or does not anticipate, or believes, or variations of such phrases or state that certain actions, events or results may, could, would, might or will be taken, occur or be. Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made, and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Denison to be materially different from those expressed or implied by such forward-looking statements, including but not limited to risks related to: unexpected events during construction, expansion and start-up; variations in ore grade, tonnes mined, crushed or milled; delay or failure to receive board or government approvals; timing and availability of external financing on acceptable terms; risks related to international operations; actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of uranium and vanadium; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in the completion of development or construction activities, as well as those factors discussed in or referred to under the heading RISK FACTORS in Denison's Annual Information Form dated March 27, 2007 available at www.sedar.com and its Form 40-F available at www.sec.gov. Although management of Denison has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended.

There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Denison does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws. Mineral resources, which are not mineral reserves, do not have demonstrated economic viability. Readers should refer to the Annual Information Form and Form 40-F of Denison Mines Corp. and other continuous disclosure documents since December 31, 2006 available at www.sedar.com for further information relating to their mineral resources and mineral reserves.

Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred

Resources: This news release uses the terms Measured , Indicated and Inferred Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. Inferred Mineral Resources have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. **United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable.**
