Forward-looking statements

Certain sections in this document contain ‘forward-looking statements’ as that term is defined in the United States Private Securities Litigation Reform Act of 1995, such as statements that include the words ‘expect’, ‘estimate’, ‘project’, ‘anticipate’, ‘believes’, ‘should’, ‘intend’, ‘plan’, ‘could’, ‘probability’, ‘risk’, ‘Value-at-Risk (VaR)’, ‘target’, ‘goal’, ‘objective’, ‘endeavour’, ‘outlook’, ‘optimistic’, ‘prospects’ and similar expressions or variations on such expressions.

In particular, this document includes forward-looking statements relating, but not limited to: the Group’s restructuring plans, capitalisation, portfolios, net interest margin, capital ratios, liquidity, risk weighted assets, return on equity (ROE), cost:income ratios, leverage and loan:deposit ratios, funding and risk profile; the Group’s future financial performance; the level and extent of future impairments and write-downs; the protection provided by the Asset Protection Scheme (APS); and the Group’s potential exposures to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity and equity price risk. These statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements. For example, certain of the market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and, as a result, actual future gains and losses could differ materially from those that have been estimated.

Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: the full nationalisation of the Group or other resolution procedures under the Banking Act 2009; the global economy and instability in the global financial markets, and their impact on the financial industry in general and on the Group in particular; the financial stability of other financial institutions, and the Group’s counterparties and borrowers; the ability to complete restructurings on a timely basis, or at all, including the disposal of certain Non-Core assets and assets and businesses required as part of the EC State Aid restructuring plan; organisational restructuring; the ability to access sufficient funding to meet liquidity needs; the extent of future write-downs and impairment charges caused by depressed asset valuations; the inability to hedge certain risks economically; costs or exposures borne by the Group arising out of the origination or sale of mortgages or mortgage-backed securities in the United States; the value and effectiveness of any credit protection purchased by the Group; unanticipated turbulence in interest rates, yield curves, foreign currency exchange rates, credit spreads, bond prices, commodity prices, equity prices and basis, volatility and correlation risks; changes in the credit ratings of the Group; ineffective management of capital or changes to capital adequacy or liquidity requirements; changes to the valuation of financial instruments recorded at fair value; competition and consolidation in the banking sector; HM Treasury exercising influence over the operations of the Group; the ability of the Group to attract or retain senior management or other key employees; regulatory or legal changes (including those requiring any restructuring of the Group’s operations) in the United Kingdom, the United States and other countries in which the Group operates or a change in United Kingdom Government policy; changes to regulatory requirements relating to capital and liquidity; changes to the monetary and interest rate policies of the Bank of England, the Board of Governors of the Federal Reserve System and other G7 central banks; impairments of goodwill; pension fund shortfalls; litigation and government and regulatory investigations; general operational risks; insurance claims; reputational risk; general geopolitical and economic conditions in the UK and in other countries in which the Group has significant business activities or investments, including the United States; the ability to achieve revenue benefits and cost savings from the integration of certain of RBS Holdings N.V.’s (formerly ABN AMRO Holding N.V.) businesses and assets; changes in UK and foreign laws, regulations, accounting standards and taxes, including changes in regulatory capital regulations and liquidity requirements; the recommendations made by the UK Independent Commission on Banking and their potential implications; the participation of the Group in the APS and the effect of the APS on the Group’s financial and capital position; the ability to access the contingent capital arrangements with HM Treasury; the conversion of the B Shares in accordance with their terms; limitations on, or additional

requirements imposed on, the Group's activities as a result of HM Treasury's investment in the Group; and the success of the Group in managing the risks involved in the foregoing.

The forward-looking statements contained in this document speak only as of the date of this announcement, and the Group does not undertake to update any forward-looking statement to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or an offer to sell or solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or other financial instruments.

Presentation of information

Statutory results

RFS Holdings is the entity that acquired ABN AMRO and is now 98% owned by RBS and is fully consolidated in its financial statements. The interests of Fortis, and its successor the State of the Netherlands, and Santander in RFS Holdings are included in non-controlling interests. Following legal separation on 1 April 2010, the interests of other Consortium Members in RFS Holdings relate only to shared assets.

Non-GAAP financial information

IFRS requires the Group to consolidate those entities that it controls, including RFS Holdings as described above. However, discussion of the Group's performance focuses on performance measures that exclude the RFS Holdings minority interest as the Group believes that such measures allow a more meaningful analysis of the Group's financial condition and the results of its operations. These measures are non-GAAP financial measures. A body of generally accepted accounting principles such as IFRS is commonly referred to as 'GAAP'. A non-GAAP financial measure is defined as one that measures historical or future financial performance, financial position or cash flows but which excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. Reconciliations of these non-GAAP measures are presented throughout this document. These non-GAAP financial measures are not a substitute for GAAP measures, for which management has responsibility. RBS has divided its operations into "Core" and "Non-Core" for internal reporting purposes. RBS has further divided parts of the Core business into "Retail & Commercial" consisting of UK Retail, UK Corporate, Wealth, Global Transaction Services, Ulster Bank and US Retail & Commercial divisions. This is a non-GAAP financial measure.

Net interest margin

The basis of calculating the net interest margin (NIM) has been refined and now reflects the actual number of days in each quarter. Group and divisional NIMs for prior periods have been re-computed on the new basis.

Recent Developments

Payment Protection Insurance (PPI)

Following unsuccessful negotiations with the industry, the UK Financial Services Authority (FSA) issued consultation papers on PPI complaint handling and redress in September 2009 and again in March 2010. The FSA published its final policy statement on 10 August 2010 and instructed firms to implement the measures contained in it by 1 December 2010. The new rules impose significant changes with respect to the handling of mis-selling PPI complaints. On 8 October 2010, the British Bankers' Association (BBA) filed an application for judicial review of the FSA's policy statement and of related guidance issued by the Financial Ombudsman Service (FOS). The application was heard in January 2011.

On 20 April 2011, the High Court issued judgment in favour of the FSA and the FOS. The BBA announced on 9 May 2011 that it would not appeal that judgment and the Group supports this position. On 9 May 2011, the Group announced that, although the costs of PPI redress and its administration are subject to a degree of uncertainty, the Group will record an additional provision of £850 million in the second quarter of 2011. To date, the Group has paid compensation to customers of approximately £100 million and the Group has an existing provision of approximately £100 million.

The Group is currently discussing with the FSA how the FSA's policy statement should be implemented and what its requirements are. As part of these discussions, the Group will review its PPI complaint handling processes to ensure that redress is offered to any customers identified as having suffered detriment.

Condensed consolidated income statement
for the quarter ended 31 March 2011

Comment

Stephen Hester, Group Chief Executive, commented:

“RBS first quarter results show progress continuing.

We are strongly focused on serving customers well while building capabilities to improve further. Financial strength and resilience continue to show sharp improvement as Core business profitability broadens and Non-Core risks are reduced. This recovery is also allowing us to absorb higher Irish impairments and substantially increased regulatory demands, and to self-fund other “bills from the past” such as restructuring, disposals and the cost of APS support. As we work through these items the Group’s regained strength and Core profitability should be the enduring gain, becoming increasingly available to drive shareholder returns.

Looking ahead we see the macro environment in which we and our customers operate as constructive, despite the continuing challenges of economic recovery in core markets. The strategic goals we have set out for RBS remain our primary focus. There are some headwinds, challenging growth and increasing capital intensity for our industry, that have a shareholder and broader read across. But despite that context RBS expects continued progress.”

Highlights

First quarter results summary

The Royal Bank of Scotland Group (RBS or the Group) reported an operating loss before tax of £116 million in the first quarter of 2011, compared with a loss of £8 million in the fourth quarter of 2010 and a loss of £5 million in the first quarter of 2010.

In the Core business operating profit rose to £2,093 million, up 25% from Q4 2010. The Core Retail & Commercial divisions maintained good momentum, with income holding up well despite fewer days in Q1 compared with Q4 and the consequent impact on net interest income, and after adjusting for the disposal in Q4 2010 of Global Merchant Services (GMS) of £115 million. GBM took advantage of a rebound in investor activity during the quarter. RBS Insurance returned to profit, as the benefits of underwriting actions started to come through.

The Non-Core division made further progress in reducing risk, with funded assets falling by £13 billion and impairments continuing to moderate. Non-Core operating loss was £1,040 million, down 36% from Q4 2010.

An improvement in the Group's credit spreads resulted in a charge of £480 million in relation to movements in fair value of own debt (FVOD), compared with a gain of £582 million in the previous quarter. Improving credit spreads on assets covered by the Asset Protection Scheme resulted in a further pre-tax charge of £469 million related to this protection, which is accounted for as a credit derivative with any movement in the fair value taken as 'income from trading activities'. Note that cumulative APS charges are now £2 billion relative to the minimum fee required under the scheme of £2.5 billion. RBS recorded a pre-tax loss of £116 million. After a tax charge of £423 million and non-controlling interests, there was a £528 million loss attributable to ordinary and B shareholders, compared with a small attributable profit in Q4 2010.

Income

Group income fell 10% compared with Q4 2010 to £7,058 million, with a decline in Retail & Commercial following the disposal of GMS in Q4 2010 and movements in FVOD offset by seasonally strong results in GBM.

Net interest income was 8% lower, reflecting the continued run-off of Non-Core assets, higher funding costs and the shorter calendar quarter. Group net interest margin, adjusted for the number of days in the quarter, fell by 15 basis points to 2.04% compared with Q4 2010, primarily due to a one-off credit of £225 million in Q4 2010, with Core Retail & Commercial NIM up 6 basis points to 3.27%.

Non-interest income fell by 11% largely driven by a charge of £480 million in relation to movements in FVOD, compared with a gain of £582 million in the prior quarter, offset by lower charges in the fair value of the Asset Protection Scheme credit default swap and strong trading activity in GBM following a seasonally subdued Q4 2010. Non-Core results also showed a strong improvement, with lower disposal losses and fair value write-downs.

Highlights (continued)

First quarter results summary (continued)

Compared with Q1 2010, during which GBM benefited from favourable market conditions, Group income was 17% lower. Core Retail & Commercial income, adjusting for the disposal of GMS of £115 million, was up 5% on the same period.

Expenses

Group expenses were 4% lower than in Q4 2010. Continuing benefits from the cost reduction programmes undertaken across the divisions continue to drive good overall expense performance. Core Retail & Commercial expenses were down 2% from the fourth quarter, principally reflecting the GMS disposal, and were 6% lower than in Q1 2010.

GBM expenses rose by 23% from Q4 2010 (up 1% from Q1 2010), primarily due to variable compensation driven by the 50% increase in revenue, while Non-Core expenses were 33% lower (49% down from Q1 2010), benefiting from the reduction in its cost base following a number of disposals completed in Q4 2010 and Q1 2011.

As a result, the Group cost:income ratio fell to 61% while Core cost:income ratio was stable at 50%.

Impairments

Impairments continued on a downward trajectory, falling 9% during the quarter to £1,947 million, despite a charge of £1,300 million in relation to Ulster Bank Core and Non-Core portfolios.

Non-Core impairments were 11% lower, relative to Q4, reflecting the improving corporate environment, but with continued high impairment levels in Ulster Bank and in certain other commercial real estate books. Core impairments also fell, with improvements in UK Retail and in UK Corporate which benefited from a £108 million release of latent loss provisions, reflecting improving book quality and credit metrics. This more than offset higher Core Ulster Bank impairments.

Overall, customer loan impairments represented 1.5% of gross customer loans and advances, compared with 1.6% in Q4 2010 and 1.8% in Q1 2010.

Balance sheet

The Group balance sheet continued to strengthen in Q1 2011.

Non-Core third party assets (excluding derivatives) declined by £13 billion to £125 billion and the division is on track to reduce funded assets to below £100 billion by year-end. As at 31 March 2011, the division had a total of £7 billion of transactions agreed but not yet completed, with a strong pipeline of transactions under discussion.

Funding and liquidity

The Group loan:deposit ratio improved further to 115%, compared with 117% at 31 December 2010 and 131% at 31 March 2010, with deposit balances remaining steady while loans have declined, principally in GBM and Non-Core. The Core loan:deposit ratio remained at 96%.

Highlights (continued)

First quarter results summary (continued)

Short-term wholesale funding excluding derivative collateral increased from £129 billion to £145 billion during the first quarter of 2011 due to the inclusion of £16 billion of medium-term notes issued under the Credit Guarantee Scheme which will mature in Q1 2012. Utilisation of central bank funding was reduced from £26 billion to £19 billion over the course of the quarter. The liquidity portfolio remained slightly above target at £151 billion at 31 March 2011.

The Group issued £10 billion of term funding in Q1 2011, £3 billion higher than was issued in Q4 2010.

Capital

The Group's Core Tier 1 ratio at 31 March 2011 strengthened to 11.2%, up 50 basis points on 31 December 2010 and 170 basis points higher than a year earlier. The increase largely reflected a £33 billion reduction in gross risk-weighted assets (RWAs), excluding the relief provided by the Asset Protection Scheme, to £538 billion, driven by asset run-off, disposals and restructurings and a reclassification of markets assets in Non-Core. The APS provides a benefit to the Core Tier 1 ratio of approximately 1.3% percentage points.

Regulation

RBS continues to embrace higher regulatory standards that will reinforce the higher benchmarks that banks themselves, and RBS specifically, are moving to worldwide. The impact of change will be substantial. Its direction is clear though important issues remain to be fully worked through. While the outcome will be a safer industry better serving society overall, the costs are also significant – these reduce bank returns for shareholders, increase bank costs and force savings elsewhere, and impact cost and availability of credit and other services to customers and the economy.

Regulatory change is marked in both areas of financial stability/safety and in conduct matters where modern regulatory requirements are driving increased exposures to fines and other conduct and customer sales costs. In the area of payment protection insurance (PPI), RBS continues to settle claims where we believe that the customer has not been treated fairly or has suffered some detriment. However, a decision on appeal of the court case, led by the BBA, has not yet been made as it relates to important other issues of retrospective regulation. The uncertainties around the outcome of the PPI action mean that, at this time, the Group is unable reliably to estimate any potential financial liability, although it could prove to be material.

The interim report of the UK Independent Commission on Banking (ICB), recently published, has thoughtful analysis and, in its passages supporting the global trends to greater capital, liquidity and resolution resilience, is in line with RBS thinking as well as with these global trends. The specific emerging recommendations will need much detailed work and discussion. Those around subsidiarisation, which are not in line with regulatory developments in other major economies, are likely to add to bank costs – impacting both customers and shareholders – without the safety gains that the broader global Basel process is delivering. The extent of the impact cannot be securely estimated until the ICB recommendations are finalised. RBS continues to engage constructively with those involved to find the best avenues to meet the ICB terms of reference.

Highlights (continued)

First quarter results summary (continued)

Customer franchises

In 2010 the Group focus on serving our customers better began to gain momentum, with many tangible examples of our businesses introducing new and refreshed customer-centric initiatives and investment strategies. This effort continues.

During the quarter UK Retail published the first externally assessed, six-monthly review of its RBS and NatWest Customer Charters. The report highlighted that the division delivered on 80% of the 25 goals outlined and although recognising this as a positive start, UK Retail is not complacent.

Both UK Corporate and Global Transaction Services (GTS) focussed on adding value to their customer proposition through the provision of additional support and advice. For instance, UK Corporate increased lending under the UK Government's Enterprise Finance Guarantee (EFG) scheme and accounted for over 40% of these government-supported loans by the end of the quarter. Meanwhile, GTS maintained its commitment to helping UK businesses abroad, with the launch of an exporter hotline service providing customers with expert advice on the practicalities and opportunities of expanding in foreign markets.

Over the last year Wealth has invested in and developed technology solutions driven by a desire to improve customer service to its clients. The Q1 2011 launch of a new IT platform in Adam & Company was an important milestone in achieving this, and will be rolled out across the other Wealth businesses in the UK during the remainder of the year.

Ulster Bank's support of customers who found themselves facing financial difficulty continued – with over 4,000 mortgage arrangements put in place through its 'Flex' initiative which offers customers practical solutions to their money problems and in some cases can include temporary reductions to repayments or loan extensions if appropriate.

In the US, Citizens enhanced its commitment to providing banking services suited to its customers' needs by offering free internet security software to online bank users, providing peace of mind to customers who value the convenience of banking from home or office.

GBM continues to invest to improve the customer experience. Q1 2011 saw the completion of GBM's programme to refresh RBSMarketplace, delivering a globally standardised, next generation internet and eCommerce platform, the foundation of a re-vitalised electronic trading and eCommerce proposition for its clients. In addition, GBM launched its research platform on both iPad and playbook allowing clients to access high-quality analysis, commentary and strategic trade ideas on the move.

Highlights (continued)

First quarter results summary (continued)

UK Lending

RBS exceeded all its lending targets for the March 2010 to February 2011 Lending Commitments period, with gross new facilities totalling £56.9 billion extended to UK businesses during the 12 month period, £6.9 billion above target. Net mortgage lending was £1.4 billion above target at £9.4 billion.

RBS will maintain its efforts to support UK customers and, along with four other banks, has agreed to seek to foster additional credit demand and to make available the capital and resources to support additional lending capacity in 2011, if demand should materialise beyond current expectations.

During Q1 2011, RBS extended £15.0 billion of gross new facilities to UK businesses. Although January and February saw comparatively weak volumes, with many companies in closed periods, larger corporates increased their borrowing activity in March, taking advantage of attractive rates available in the market to refinance existing loan facilities.

SME credit demand remained more muted, with £6.7 billion of gross new facilities extended during the quarter, down 7% from Q4 2010.

Repayments remain high, with many companies continuing to deleverage. However, drawn business lending balances at 31 March 2011 totalled £120.9 billion overall, compared with £118.8 billion at 31 December 2010. In the SME segment, drawn balances in RBS's Core Business & Commercial operation were £1.5 billion higher at £51.3 billion, though this benefited from a transfer of portfolios from Non-Core in preparation for the sale of the RBS England & Wales branch-based business to Santander.

Applications for credit have continued to decline, with 72,000 applications received during Q1, down 18% from Q1 2010 and 27% below the levels recorded in Q1 2009. Survey evidence indicates that uncertainty about customer demand remains by far the most significant constraint to growth among SMEs, with 69% of SMEs citing orders or sales as the factor most likely to limit output over the next three months, according to the Confederation of British Industry SME Trends Report, compared with only 8% citing credit or finance.

Outlook

We expect continued progress in our Retail & Commercial businesses during the balance of 2011 through modest NIM expansion, positive operating leverage and gradual normalisation of impairments.

In Ireland, we expect total Ulster Bank Core and Non-Core impairments to remain elevated in the second quarter of 2011 before gradually declining in the second half.

GBM is off to a good start, although markets remain unpredictable.

Our Non-Core division continues to perform in line with its accelerated run-down objectives, while balancing the need to preserve shareholder capital.

Analysis of results

| | Quarter ended | |
|---------------------------------|------------------------|------------------------------|
| | 31 March 2011 £m | 31 December 2010 £m |
| Net interest income | | |
| Net interest income (1) | 3,301 | 3,578 |
| Average interest-earning assets | 657,610 | 661,808 |
| Net interest margin (2) | | |
| - Group | 2.04% | 2.19% |
| - Core | | |
| - Retail & Commercial (3) | 3.27% | 3.21% |
| - Global Banking & Markets | 0.76% | 0.93% |
| - Non-Core | 0.90% | 1.09% |

Notes:

- (1) For further analysis refer to page 87.
- (2) The basis of calculating the net interest margin has been refined and is now based on daily averages rather than quarterly averages. Prior periods have been re-computed on the new basis.
- (3) Retail & Commercial comprises the UK Retail, UK Corporate, Wealth, Global Transaction Services, Ulster Bank and US Retail & Commercial divisions.

Key points

Q1 2011 compared with Q4 2010

- Net interest income was 8% lower, reflecting the continued run-off of Non-Core assets, higher funding costs and the shorter calendar quarter.
- Group NIM fell by 15 basis points to 2.04% compared with the prior quarter, primarily due to a one-off credit of £225 million in Q4 2010. Excluding this NIM benefitted from improving asset margins in Retail & Commercial and the reduction of low margin assets in Non-Core. These were also offset by tighter margins in GBM, and higher funding costs.
- Core Retail & Commercial NIM improved to 3.27% from 3.21% in Q4 2010. UK Retail asset margins declined marginally, with lower front book margins reflecting the increasing proportion of higher quality, lower loan to value mortgage lending. UK Corporate NIM improved. Deposit margins were stable at low levels in all Retail & Commercial divisions.

Analysis of results (continued)

| | Quarter ended | | |

| Insurance net premium income | 1,149 | 1,272 | 1,289 |
| Total non-interest income | 3,757 | 4,242 | 4,981 |

Key points

Q1 2011 compared with Q4 2010

- Non-interest income decreased by 11%. The substantial increase in non-interest income in Q1 2011, excluding the impact of fair value of own debt, £480 million, was largely driven by strong trading results from GBM, where a rebound in credit markets activity, particularly in the early part of the quarter, followed a seasonally subdued Q4 2010. Non-Core non-interest income improved, with lower fair value write-downs on asset portfolios and reduced disposal losses.
- UK Retail fees and commissions were lower, reflecting the absence of the profit share income received in Q4 and the restructuring of the division's financial planning joint venture.
- A tightening of the Group's credit spreads resulted in a charge of £480 million in relation to movements in FVOD, compared with a gain of £582 million in the prior quarter.
- Q4 2010 included a £502 million gain largely from the strategic disposal of Global Merchant Services.
- APS is accounted for as a credit derivative, and movements in the fair value of the contract are taken as an 'other' item. The charge of £469 million in Q1 2011 primarily reflects a reduction in covered assets as well as improvement in credit

spreads. The cumulative charge on APS now stands at £2,019 million.

Q1 2011 compared with Q1 2010

- Although GBM trading results were strong during the quarter, income was lower than in the buoyant market conditions of Q1 2010.
- The FVOD charge was £311 million higher than in Q1 2010.
- Strategic disposals in Q1 2010 included the disposal of a segment of the Group's asset management business.

Analysis of results (continued)

| | Quarter ended | | |
|--|---------------|----------|----------|
| | 31 March | December | 31 March |
| | 2011 | 2010 | 2010 |
| | £m | £m | £m |
| Operating expenses | | | |
| Staff costs | 2,399 | 2,194 | 2,689 |
| Premises and equipment | 571 | 709 | 535 |
| Other | 921 | 1,048 | 1,011 |
| Administrative expenses | 3,891 | 3,951 | 4,235 |
| Depreciation and amortisation | | | |
| - amortisation of purchased intangible assets | 44 | 96 | 65 |
| - other | 380 | 450 | 417 |
| Write-down of goodwill and other intangible assets | - | 10 | - |
| Operating expenses | 4,315 | 4,507 | 4,717 |
| General insurance | 912 | 1,151 | 1,107 |
| Bancassurance | - | 31 | 29 |
| Insurance net claims | 912 | 1,182 | 1,136 |

Key points

Q1 2011 compared with Q4 2010

- Group operating expenses decreased by 4% from Q4 2010, as continued benefits from the Group's cost reduction programme have kept expense growth in check.
- There was a 9% rise in staff costs, largely reflecting an increase in GBM expenses driven by income 50% higher than in Q4 2010, partially offset by a fall in premises, equipment and other costs.
- Insurance net claims fell to £912 million from £1,182 million largely driven by more benign weather conditions experienced during Q1 2011 and a return to more normalised claims levels on Non-Core legacy business.
- Integration and restructuring costs decreased by 52% as costs in relation to business and country exits remain somewhat lumpy.

Q1 2011 compared with Q1 2010

- Operating expenses fell by 9% compared with Q1 2010 reflecting the realisation of cost saving benefits from the Group cost reduction programme and various country exits throughout 2010.

- Staff expenses decreased by 11% largely driven by the country and business exits in Non-Core since Q1 2010, and lower variable compensation in GBM in the quarter.
- Insurance net claims decreased by 20% as bodily injury reserving stabilised and the severe weather experienced in Q1 2010 was not repeated.
- Integration and restructuring costs reduced from Q1 2010 as costs relating to the ABN AMRO integration in 2009 were replaced with comparatively smaller business and country exit costs.

Note:

- (1) Customer loan impairment charge as a percentage of gross loans and advances to customers including disposal groups and excluding reverse repurchase agreements.

Key points

Q1 2011 compared with Q4 2010

- Total impairments fell by 9% in Q1 2011 despite a £135 million increase in Ulster Bank (Core and Non-Core). The decrease was driven by improvements in UK Retail and in UK Corporate which benefited from a £108 million release of latent loss provisions, reflecting improving book quality and credit metrics. Non-Core impairments were 11% lower reflecting the improving corporate environment.
- Ulster Bank (Core and Non-Core) impairments continued to rise from Q4 2010, from £1,165 million to £1,300 million (12%). The Core increase was driven by continued deterioration in mortgage credit metrics together with a higher level of defaults recorded in the corporate investment and SME portfolios.

Q1 2011 compared with Q1 2010

.

Group impairments fell by 27% from Q1 2010 levels as the overall economic environment continued to improve.

- In the Core business impairments fell by 10%. A 50% decrease in UK Retail, primarily reflecting lower arrears volumes on the unsecured portfolio, was offset by an increase in Ulster Bank impairments where the economic environment remains challenging. Both UK Corporate and US Retail & Commercial impairments fell, by 44% and 23% respectively.
- Non-Core impairments decreased from £1,704 million to £1,075 million as the corporate environment improved, but with continued high impairment levels in Ulster Bank and certain other real estate portfolios.

Analysis of results (continued)

| | 31 | | |
|--|------------------|------------------|------------------|
| Capital resources and ratios | 31 March 2011 | December 2010 | 31 March 2010 |
| Core Tier 1 capital | £49bn | £50bn | £54bn |
| Tier 1 capital | £60bn | £60bn | £71bn |
| Total capital | £64bn | £65bn | £82bn |
| Risk-weighted assets | | | |
| - gross | £538bn | £571bn | £692bn |
| - benefit of the Asset Protection Scheme | (£98bn) | (£106bn) | (£125bn) |
| Risk-weighted assets | £440bn | £465bn | £567bn |
| Core Tier 1 ratio (1) | 11.2% | 10.7% | 9.5% |
| Tier 1 ratio | 13.5% | 12.9% | 12.5% |
| Total capital ratio | 14.5% | 14.0% | 14.5% |

Notes

- (1) Benefit of APS in Core Tier 1 ratio is 1.3% at 31 March 2011 (31 December 2010 - 1.2%; 31 March 2010 - 1.4%).

Key points

Q1 2011 compared with Q4 2010

- The Core Tier 1 ratio improved by 50 basis points to 11.2% in Q1 2011, principally reflecting a £33 billion reduction in gross RWAs, excluding the benefit provided by the APS, driven by asset run-off, disposals and restructurings, and a reclassification of certain trades in Non-Core.
- The APS provided relief equivalent to 1.3% of Core Tier 1.

Q1 2011 compared with Q1 2010

- The Core Tier 1 ratio increased by 170 basis points from Q1 2010 levels, primarily due to a reduction of £154 billion in gross RWAs.
- Non-Core RWAs fell by over £36 billion in the year driven by disposals, asset run-off and risk reduction.

Analysis of results (continued)

| | | 31 | |
|-------------------------------------|------------------|------------------|------------------|
| Balance sheet | 31 March 2011 | December 2010 | 31 March 2010 |
| Total assets | £1,413bn | £1,454bn | £1,766bn |
| Funded balance sheet (1) | £1,052bn | £1,026bn | £1,303bn |
| Loans and advances to customers (2) | £494bn | £503bn | £554bn |
| Customer deposits (3) | £428bn | £429bn | £425bn |

Notes:

- (1) Total assets excluding derivatives.
- (2) Excluding reverse repurchase agreements and stock borrowing.
- (3) Excluding repurchase agreements and stock lending.

Key points

- Group funded assets, excluding derivatives, increased by £26 billion during the quarter to £1,052 billion at 31 March 2011. Non-Core funded assets continued to decline, falling by £13 billion to £125 billion. GBM assets increased by £27 billion from a seasonally low level at the end of 2010, but remain within the targeted range, and there has been modest growth in Retail & Commercial.
- Loans and advances fell by £9 billion during the quarter, with portfolio run-off in Non-Core and GBM only partially offset by growth in Core UK Retail & Commercial lending. With deposits holding steady, the Group loan:deposit ratio improved to 115% while the Core loan:deposit ratio was stable at 96%.
- Compared with 31 March 2010, funded assets fell by £251 billion, driven by the run-off of Non-Core.

Further discussion of the Group's funding and liquidity position is included on pages 91 to 96.

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 9% of the monthly average of divisional RWAs, adjusted for capital deductions); Q4 2010 adjusted for timing of intra-quarter items.

Key points

UK Retail is committed to rebuilding customer trust and the reputation of its brands by becoming the most helpful and sustainable bank in the UK. During Q1 2011 the division developed increased online functionality and simplified the product offering as part of a continued effort to achieve this goal.

In March 2011 the first externally assessed, six-monthly review of the RBS and NatWest Customer Charters was published with UK Retail having delivered on 80% of the 25 goals outlined. Although this was a positive start, the division recognises that there is still far to go and will not be complacent. Already, further feedback is being sought from customers to ensure the Charters continue to really focus on delivering for our customers throughout 2011.

UK Retail has also continued with a major investment programme that began in 2010. This programme aims to support the improvement in customer service embodied by the Customer Charters by providing the division and its staff with the training and tools necessary to achieve the strategic goals of the division.

UK Retail (continued)

Key points (continued)

The economic environment in the UK remains challenging for the division's customers and, while UK Retail remains focussed on providing support to customers who do find themselves in difficulty, the division also recognises the need for continued commitment to responsible lending - including first time buyers in the mortgage market.

Overall, Q1 2011 demonstrates continued progress towards achieving the business and strategic goals of the UK Retail division.

Q1 2011 compared with Q4 2010

- Operating profit of £508 million in Q1 2011 was £50 million lower than in the previous quarter. Excluding the lower Financial Services Compensation Scheme levy cost recognised in Q4 2010 and profit share payment received in the same quarter, operating profit increased £51 million in Q1 2011. Impairment losses improved by £28 million to £194 million.
- UK Retail continued to drive strong growth in secured lending.
 - o Mortgage balances increased 3% on Q4 2010. RBS lending volumes showed signs of recovery in the quarter, with more new mortgages written at lower loan to value ratios. Market share of new mortgage lending increased to 14% in the quarter, well above the Group's 8% share of stock.
 - o Unsecured lending fell by 4% in the quarter, in line with the Group's continued focus on lower risk secured lending.
 - o Total deposits remained flat in the quarter after a strong period of growth in Q4 2010.
 - o The loan to deposit ratio at 31 March 2011 was 112%, slightly higher than the prior quarter ratio of 110%.
- Net interest income fell by 1%, with net interest margin at 4.04%, a 1 basis point decline on Q4 2010. Asset margins fell marginally on Q4 2010, with rate upside offset by increased mortgage volumes written at lower loan to value ratios. Liability margins continued to contract in the quarter, largely reflecting the reduction in yield on current account hedges. Savings margins were broadly flat on Q4 2010.
- Non-interest income fell by 24% from the prior quarter. Excluding the one-off profit share received in Q4 2010 and the impact of restructuring the division's Bancassurance Joint Venture, fee income growth was 1% driven by an increase in transactional fees.
- Overall expenses remained flat quarter on quarter. Excluding the lower Financial Services Compensation Scheme cost recognised in Q4 2010 and the effect of restructuring our Bancassurance Joint Venture, costs improved by 1%, with continued management focus on process re-engineering and technology investment. The cost:income ratio increased marginally from 46% to 49%.

UK Retail (continued)

Q1 2011 compared with Q4 2010 (continued)

- Impairment losses improved by 13% in Q1 2011. Impairments are expected to stabilise subject to normal seasonal fluctuations and broad stability within the economic environment.
 - o Mortgage impairment losses were £61 million on a total book of £93 billion. The quarter on quarter increase of £31 million primarily reflects the continued impact of difficult housing market conditions on the recovery of already defaulted debt. Arrears rates, which continue to be supported by low interest rates and good book growth, were stable and remained below the Council of Mortgage Lenders industry average.
 - o The unsecured portfolio impairment charge fell 31% to £133 million, on a book of £17 billion, with lower default volumes and improved collections performance. Industry benchmarks for cards arrears remain stable, with RBS continuing to perform better than the market.
- Risk-weighted assets increased in the quarter, primarily reflecting business growth.

Q1 2011 compared with Q1 2010

- Operating profit increased by £368 million, with income up 8%, costs down 6% and impairments 50% lower than in Q1 2010.
- Net interest income was 15% higher than Q1 2010, with strong mortgage balance growth and recovering asset margins across all products but with continual competitive pressure on liability margins.
- Costs were 6% lower than in Q1 2010, driven by careful management of process efficiencies within the branch network and operational centres. The cost:income ratio improved from 57% to 49%.
- Impairment losses decreased by 50% on Q1 2010 primarily reflecting lower arrears on the unsecured portfolio.
- Savings balances were up 11% on Q1 2010, significantly outperforming the market which remains intensely competitive. Personal current account balances remained largely flat over the same period.

UK Corporate (continued)

Key points

UK Corporate has made good progress in enhancing the ways in which it services and adds value to its corporate and SME customers.

During Q1 2011, the division exceeded its overall business lending targets. The SME Customer Charter, introduced in 2009, underscores UK Corporate's determination to service its business customers fairly and transparently. This has brought real advantages to customers, with more than 80,000 SMEs benefiting from the Charter's overdraft price promise during the quarter.

UK Corporate has engaged in a £300 million investment programme over five years to strengthen its customer proposition, delivery channels, data analytics and risk discipline, and is increasing the number of experienced business managers in branches. The development of tailored propositions for targeted segments has delivered initial success, with strong customer recruitment among, for example, businesses run by women and start-ups.

Q1 2011 compared with Q4 2010

- Operating profit increased by 48% to £493 million, driven by lower impairments and a revision to deferred income recognition assumptions which boosted income in the quarter.
- Net interest income rose by 6% as a result of this revision to income deferral assumptions. Adjusting for this, (£50 million), net interest income was stable with net interest margin holding up well despite the continuing pressure on deposit margins. Customer deposits continued to grow. The growth in lending in Q1 2011 resulted from a transfer from Non-Core in preparation for the sale of the RBS England & Wales branch-based business to Santander. Underlying net lending was slightly down as customer deleveraging persisted.
- Non-interest income was broadly in line with Q4 2010 with fee accelerations from refinancing in the quarter offsetting lower Global Banking & Markets related income and lower operating lease activity.
- Total costs remain under control, down 2%, despite a small number of fraud cases costing £15 million in Q1 2011.
- Impairments of £105 million were £114 million lower than Q4 2010. This was primarily driven by a release of latent provisions reflecting improving book quality and credit metrics. In addition specific provisions fell, following the small number of specific, significant impairments recorded in Q4 2010.

Q1 2011 compared with Q1 2010

- Operating profit was up £175 million or 55%, primarily driven by lower impairments, widening asset margins and revised deferred income recognition assumptions implemented in Q1 2011.
-

Excluding the deferred fee impact (£50 million), net interest income rose 5% and net interest margin increased 22 basis points, reflecting re-pricing of the lending portfolio. Customer deposits saw significant growth, up £9.2 billion (10%), through successful deposit-gathering initiatives. This contributed to an improvement in the loan to deposit ratio from 124% to 110%.

- Non-interest income increased 1% as a result of strong refinancing activity largely offset by lower sales of financial market products.
- Total costs decreased by 3% compared with Q1 2010, which included an OFT penalty of £29 million.
- Impairments were 44% lower, reflecting improved book quality and credit metrics.

Wealth (continued)

Key points

In Q1 2011 Wealth announced a new set of goals and strategic plans, which have been accompanied by significant management change. The new strategy focuses on a narrower range of territories, balancing mature and growth markets, where the Coutts brand is strong and resonant. Wealth is already making progress in the UK with an increased focus on investment advisory services, while internationally cash management services are receiving increasing attention.

The new Wealth strategy is underpinned by technology. A new IT platform, already in place within Wealth International was launched in Adam & Company during Q1 2011 and will be rolled out to the rest of the UK businesses during the year. This new platform will enhance the customer service provided to Wealth clients and allow for an integrated banking platform throughout the division. It is only the first of a number of planned technology investments to improve customer connectivity and take advantage of the growth opportunity the division represents.

Q1 2011 compared with Q4 2010

- Operating profit decreased 8% to £80 million in the first quarter with an increase in income being more than offset by increased expenses as the division continues to invest in enhancing its strategic proposition.
- Income increased 4% in Q1 2011, with net interest income up 4% primarily reflecting increased treasury income. As a result, net interest margin improved by 16 basis points. Non-interest income rose 3% reflecting growth in assets under management and improved brokerage income.
- Expenses grew by 10% to £196 million reflecting significant investment to support strategic initiatives.
- Lending volumes maintained strong momentum in the quarter with balances up a further 2%. Assets under management experienced strong growth of 7%.

Q1 2011 compared with Q1 2010

- Q1 2011 operating profit of £80 million was 29% higher than Q1 2010 as a result of strong income growth reflecting continued increases in client assets and liabilities managed by the division.
- Income increased by 10%, driven by a 17% increase in net interest income. Strong growth in lending margins and lending volumes was supported by increased deposit balances.
- Expenses grew by 4% reflecting additional strategic investment offset by phasing of bonus expense.
- Client assets and liabilities managed by the division increased by 7%. This reflects the success of attracting new customer deposits and sustained lending growth within the UK. There was continued recovery in assets under management as underlying balances grew 3% despite the impact of client losses in the international businesses, resulting from the private banker attrition previously experienced.

Global Transaction Services (continued)

Key points

Global Transaction Services (GTS) delivered a strong deposit-gathering performance over the past year and, with the reinforcement of the management of the business in January, the division is poised to take further advantage of its strong position as a liquidity manager and provider of working capital solutions to its customers.

During the first quarter success was achieved with innovative supply chain finance services, among other product developments, and GTS has continued its support of UK exporters in growing their businesses in new markets.

Q1 2011 compared with Q4 2010

- Operating profit fell 30%, in part reflecting the sale of GMS, which completed on 30 November 2010. Adjusting for the disposal (£30 million), operating profit decreased 21% significantly driven by a specific impairment provision recognised in Q1 2011.
- Excluding GMS (£80 million), income was 3% lower as a result of volume and pricing pressure in the International Cash Management and Trade businesses.
- Expenses, excluding GMS (£50 million), increased by 5%, driven by higher technology and support infrastructure costs, partly offset by tight cost control of discretionary expenditure.
- Q1 2011 impairment losses of £20 million included a single large provision.
- Third party assets increased by £1.9 billion due to an increase in UK Domestic Cash Management lending. This affected the loan to deposit ratio, which increased by 400 basis points to 25%.
- For the two months in Q4 2010 before completion of the disposal, GMS recorded income of £80 million, expenses of £50 million and an operating profit of £30 million. Q1 2011 includes £3 million of income from the ongoing investment that GTS holds in WorldPay.

Q1 2011 compared with Q1 2010

- Operating profit decreased 20%, primarily reflecting the sale of GMS which completed on 30 November 2010. Adjusting for the disposal (£54 million), operating profit increased 5%.
- Excluding GMS (£115 million), income was 10% higher, with a strong increase in income from Domestic and International Cash Management products driven by growth in interest-bearing balances.
- Customer deposits increased by 7% to £69.3 billion as a result of higher international cash management balances reflecting further strengthening of deposit gathering initiatives.

- Third party assets, excluding GMS (£1.4 billion), increased by £2.9 billion, driven by an increase in trade finance balances and the impact of Yen clearing activities brought in-house during 2010. The loan to deposit ratio increased by 300 basis points to 25%.
- During Q1 2010, GMS recorded income of £115 million, total expenses of £61 million and an operating profit of £54 million.

Key points

Ulster Bank's results for Q1 2011 continue to be overshadowed by the challenging economic climate in Ireland, with impairments remaining elevated. Key priorities are the further development of Ulster Bank's deposit-gathering franchise combined with cost control. Nonetheless, the early restructuring measures undertaken by Ulster Bank have left it in position to capitalise on those growth opportunities that are starting to emerge in the significantly more consolidated Irish banking market, particularly in export-oriented sectors.

Q1 2011 compared with Q4 2010

- Operating loss for the quarter was £377 million, a deterioration of £106 million compared with the previous quarter. The key driver was an increase in impairment losses of £85 million.
- Net interest income declined by 10% (9% in constant currency terms). Higher funding costs in both the wholesale and deposit markets more than offset actions to improve lending margins. Non-interest income fell 9% (11% in constant currency terms), partially reflecting the loss of income from the Merchant Services business, disposed of in Q4 2010.

Ulster Bank (continued)

Key points (continued)

Q1 2011 compared with Q4 2010 (continued)

- Direct costs remained relatively flat, reflecting continued tight expense management.
- Impairment losses were £461 million, an increase of 23% (22% on a constant currency basis), driven by the continued deterioration in retail mortgage credit metrics. Higher levels of default were also recorded in the Corporate Investment and SME portfolio. The credit quality of customers has continued to decline in line with market trends.
- Deposits remained resilient in the period, up 3% (1% at constant exchange rates), with continued steady growth in both retail and business banking deposits.
- Loans to customers increased by 1% (down 1% at constant exchange rates) as repayments continued to exceed demand for new lending, off set by movements in exchange rates.

Q1 2011 compared with Q1 2010

- Income fell over the period reflecting the impact of higher funding costs and the continued high cost of deposit raising.
- Expenses decreased by 15%, driven by the impact of the restructuring programme initiated in late 2009 and the continued focus on cost management.
- Impairments rose by 111% (119% on a constant currency basis), reflecting the significant deterioration in customer credit quality combined with asset price deflation over the period.
- Loans and advances to customers reduced by 4% reflecting the impact of muted new business demand and continued customer deleveraging.
- Customer deposits have increased slightly over the period with strong growth in current and savings accounts offset by lower wholesale balances.

Key points

Despite operating in a challenging market and regulatory environment, US Retail & Commercial's "back-to-basics" strategy has made good progress in developing the division's customer franchise.

US Retail & Commercial has taken a market leading role in providing transparency around overdraft fees, communicating to its customers what new regulations mean and how they will affect their banking. In February, Citizens received external recognition for superior customer experience.

Citizens has continued to expand its branch network selectively and increased ATM distribution through partnerships, enhancing convenience for its customers. It has also invested in innovative technology channels such as mobile banking through an iPhone and iPad application. Citizens' active online banking penetration of households - a key driver of retention - continues to grow and remains superior to peers.

Consumer Finance has continued to strengthen its alignment with branch banking, further increasing the penetration of products to deposit households, particularly branch-based credit cards. The Commercial Banking business has achieved good momentum, expanding specialised lines of business such as franchise and health care lending, and expanding its cross-sales of capital markets and Global Transaction Services (GTS) products.

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

Q1 2011 compared with Q4 2010

- US Retail & Commercial posted an operating profit of £80 million (\$129 million) compared with £64 million (\$102 million) in the prior quarter. The Q1 2011 operating environment remained challenging, marked by low absolute interest rates, high but stable unemployment, a soft housing market and the impact of legislative changes.
- Net interest income was down 3%. Product net interest income was up slightly from the previous quarter and net interest margin increased by 1 basis point. Loans and advances were flat, with continued run-off of fixed rate consumer products offset by commercial loan growth.
- Non-interest income was up 5% driven by higher securities gains partially offset by lower mortgage banking income.
- Total expenses were 5% lower than Q4 2010, which included a number of specific items such as higher litigation costs.
- Impairment losses were up 5% reflecting higher impairments related to securities, partially offset by improving credit conditions across the portfolio. Excluding the impact of the securities impairments, credit costs generally remained stable or improved across the entire portfolio.

Q1 2011 compared with Q1 2010

- Operating profit increased to £80 million (\$129 million) from £40 million (\$63 million), as impairments fell and expenses were reduced.
- Net interest income was down 4%, as a result of a smaller balance sheet. Net interest margin improved by 29 basis points to 3.01% reflecting changes in deposit mix and continued discipline around deposit pricing, combined with the positive impact of the balance sheet restructuring programme carried out during Q3 2010.
- Customer deposits were down 4% reflecting the impact of a changed pricing strategy on low margin term and time products partially offset by strong checking balance growth. Consumer checking balances grew by 7% while small business checking balances grew by 9%.
- Non-interest income was in line with Q1 2010 reflecting lower deposit fees which were impacted by Regulation E legislative changes offset by higher gains on sales of securities. Regulation E prohibits financial institutions from charging consumers fees for paying overdrafts on automated teller machine (ATM) and one-off debit card transactions, unless a consumer consents, or opts in, to the overdraft service for those types of transactions.

- Total expenses were down 6% primarily reflecting a change in accrual methodology relating to the annual incentive plan and lower Federal Deposit Insurance Corporation (FDIC) deposit insurance levies.
- Impairment losses declined by 23% reflecting a gradual improvement in the underlying credit environment partially offset by higher impairments related to securities. Loan impairments as a percentage of loans and advances have declined to 0.7% from 1.0%.

- (2) Compensation ratio is based on staff costs as a percentage of total income.

Key points

Q1 2011 witnessed a strong rebound in investor activity, compared with the prior quarter, which benefited GBM's credit and mortgage franchises. This rebound lessened over the course of the quarter with the re-emergence of sovereign debt concerns and global economic uncertainty compounded by events in the Middle East and Japan. Specific exposure to these regions is limited, but these events had a dampening effect on overall client activity in the quarter.

Nevertheless, GBM continued to deliver on its strategic plan, focusing on its chosen client franchises and achieving its targeted return and efficiency metrics while investing for the future.

Global Banking & Markets (continued)

Key points (continued)

Q1 2011 compared with Q4 2010

- Operating profit increased to £1,098 million with strong growth in income.

- Revenue increased 50% on a slow Q4 2010, although investor confidence remained fragile:

The underlying Money Markets business was profitable but, as in Q4 2010, this was more than offset by the cost of the division's funding activities.

Rates Flow and Currencies benefited from a rebound in market opportunities early in the quarter.

Credit and Mortgage Markets were well positioned to take advantage of higher activity driven by increased client risk appetite coupled with limited issuance.

The underlying Portfolio Management and Origination business remained broadly flat; the decline in revenue was driven by movements in market derivative values.

Equities had a solid quarter and improved sharply in comparison to a quiet Q4 2010.

- The fall in net interest margin from 0.93% to 0.76% reflected a lengthening of the GBM funding profile and continuing margin compression on the portfolio as markets normalised and loans were booked or refinanced at finer margins.
- Total costs increased £241 million in the quarter, primarily reflecting higher performance-related pay driven by the increase in revenue. This was partially offset by lower non-staff costs.
- Impairments generated a net gain of £24 million in Q1 2011 as a small number of specific impairments were offset by a release of latent loss provision.
- Third party assets increased by £27 billion from a seasonally low Q4 2010 level, but remained comfortably within the targeted range of £400 - £450 billion.
- Risk-weighted assets remained flat, reflecting continued focus on the balance sheet and a prudent approach to risk management.
- Return on equity of 20.8% was driven by the improved revenue performance on unchanged risk-weighted assets.

Q1 2011 compared with Q1 2010

- Operating profit declined by 27% driven by a fall in revenue.

- Although Q1 2011 began strongly, activity across all business lines was more restrained than Q1 2010 which benefitted from more buoyant client demand.
- Total costs remained flat, with lower staff costs but an increase in non-staff costs, primarily driven by increased depreciation charges reflecting previous strategic investment.
- Q1 impairments were minimal in both periods.

Notes:

- (1) Other is predominantly made up of the discontinued personal lines broker business.
- (2) Total in-force policies include travel and creditor policies sold through RBS Group. These comprise travel policies included in bank accounts e.g. Royalties Gold Account, and creditor policies sold with bank products including mortgage, loan and card repayment payment protection.
- (3) Divisional return on equity is based on divisional operating profit/(loss) after tax, divided by divisional average notional equity (based on regulatory capital).
- (4) Loss ratio is based on net claims divided by net premium income for the UK businesses.

- (5) Commission ratio is based on fees and commissions divided by gross written premium for the UK businesses.
- (6) Expense ratio is based on expenses (excluding fees and commissions) divided by gross written premium for the UK businesses.
- (7) Combined operating ratio is expenses (including fees and commissions) divided by gross written premium added to the loss ratio, for the UK businesses.

Key points

RBS Insurance returned to profit in the first quarter of 2011 with an operating profit of £67 million. RBS Insurance continues on a significant programme of investment designed to achieve a substantial improvement in operational and financial performance, ahead of the planned divestment of the business, with a current target date of the second half of 2012. New pricing models and business selection criteria have been the main drivers of the turnaround, coupled with early benefits from new claims processes.

RBS Insurance (continued)

Key points (continued)

While overall motor volumes have been deliberately reduced over recent months, new business continues to be grown in selected areas. In March 2011, negotiations started with Sainsbury's Finance with the intention of forming a long-term strategic partnership for the supply of car insurance under the Sainsbury's brand. RBS Insurance also entered the premium insurance market with the launch of Select Insurance from Direct Line.

Initiatives to grow ancillary income, implemented during 2010, continued to deliver into 2011.

Claims and underwriting profit showed strong improvement due to pricing methodology and underwriting selection which resulted in lower claims in the personal and commercial motor business. Overall prior year reserve impact was broadly neutral with a modest release from 2010 accident year motor reserves, which compensated for some adverse development in reserves for the end-December 2010 severe weather event.

Overall underwriting profit at £222 million was substantially better than recent quarters and the highest quarterly figure since Q2 2009.

The actions being taken to improve claims processes and operating efficiency, together with continued focus on pricing and underwriting, are intended to achieve major increases to profitability in future periods.

In the home business, gross written premiums and total income were stable compared with Q4 2010 and Q1 2010.

The International business continued to grow in Q1 2011 with gross written premium for the quarter up 28% on the same quarter in 2010. The Italian business performed strongly due largely to the Fiat partnership and the German business also increased gross written premium by 4% against Q1 2010 in a flat market.

Q1 2011 compared with Q4 2010

- There was a return to profitability with an operating profit of £67 million in Q1 2011, compared with a Q4 2010 operating loss of £9 million, driven by lower claims.
- Claims fell by £114 million, 13%, largely because there was no repeat of December 2010's severe weather.
- The total number of in-force policies increased marginally due to new travel policy business from the Nationwide Building Society partnership.

Q1 2011 compared with Q1 2010

- The operating profit of £67 million for Q1 2011 was a significant improvement from the loss of £50 million in Q1 2010. A £67 million decrease in income was more than offset by a £182 million reduction in claims.
- Net claims were 19% lower reflecting the de-risking of the portfolio and improved performance in motor.

RBS Insurance (continued)

Key points (continued)

Q1 2011 compared with Q1 2010 (continued)

- Total income was down 6% compared with Q1 2010, driven by the managed reduction in the risk of the UK motor book throughout 2010 and into 2011 and the exit of the motor broker business. The fall in in-force policies was partially offset by significant premium increases, in line with industry trends. Average motor premiums for RBS Insurance were up 9% in Q1 2011 compared with Q1 2010.
- Total expenses of £219 million were broadly stable. However, as RBS Insurance prepares to reshape for divestment, certain functions and capability (including systems development) are being developed to replace services provided by RBS Group. This results in a switch from indirect expenses to staff and other direct expenses.

Central items

| | Quarter ended | | |
|-----------------------------|---------------|----------|----------|
| | 31 March | December | 31 March |
| | 2011 | 2010 | 2010 |
| | £m | £m | £m |
| Central items not allocated | (43) | 115 | 337 |
| Operating profit/(loss) | (43) | 115 | 337 |

Note:

(1) Costs/charges are denoted by brackets.

Funding and operating costs have been allocated to operating divisions based on direct service usage, the requirement for market funding and other appropriate drivers where services span more than one division.

Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

Key points

Q1 2011 compared with Q4 2010

- Central items not allocated represented a charge of £43 million versus a credit of £115 million in the previous quarter. This movement was primarily due to lower net gains and adverse IFRS volatility and other volatile Treasury items.

Q1 2011 compared with Q1 2010

- Central items not allocated represented a net charge of £43 million versus a credit of £337 million in Q1 2010. This movement is primarily driven by a £170 million VAT recovery in Q1 2010 which was not repeated as well as unallocated Group Treasury items, including the impact of economic hedges that do not qualify for IFRS hedge accounting.

Non-Core (continued)

Key points

Non-Core continues to make good progress in balance sheet reduction and is on track to reduce funded assets to below £100 billion by the end of 2011. 24 of 30 country/whole business exits have been agreed or completed, and so far this year Non-Core has signed and/or completed over 190 portfolio asset disposals and run-off.

Momentum continues from the previous year - Non-Core has now realised £6 billion of the £12 billion of transactions signed but not completed by the end of 2010, which included assets totalling £3 billion which were returned to Core in preparation for the sale of the RBS England and Wales branch-based business to Santander.

Overall Q1 2011 saw a reduction of £13 billion in assets and Non-Core continues to develop a healthy pipeline of transactions, typically with a six to nine month execution cycle. At the end of Q1 2011 there were signed but not completed transactions totalling £7 billion, including those remaining from end 2010.

Since December 2009, headcount has fallen from 15,100 to 6,700, largely as a result of the completion of country exits.

The division is central to the strategy which will return RBS Group to standalone strength, and Non-Core continues to deliver results in what is a challenging and complex environment with significant regulatory headwinds.

As Non-Core continues to reduce, income and expenses are falling in line with expectations. Impairments remain high, driven by continued difficulties in Ireland, where high impairment charges are expected to persist. Non-Core is also still experiencing higher impairment charges in real estate. Across the remaining book impairment losses have eased as fewer cases flow into restructuring units.

Q1 2011 compared with Q4 2010

- Non-Core made further progress in its asset reduction programme, with third party assets (excluding derivatives) declining by £13 billion to £125 billion, driven by disposals of £5 billion and run-off of £7 billion which included £3 billion of assets transferred to Core in preparation for the sale of the RBS England and Wales branch-based business to Santander.
- Risk-weighted assets decreased by £25 billion driven principally by asset run-off, changes in certain asset reclassifications, and foreign exchange movements.
- Non-Core operating loss was £1,040 million in the first quarter, compared with £1,616 million in Q4 2010. This primarily reflects:

Continued decrease in net interest income, reflecting ongoing balance sheet reduction.

Higher trading losses of £296 million, reflecting costs of portfolio de-risking and net losses, after CVA, on monoline related structures.

Fair value gains arising from equity positions held in restructured assets.

Lower expenses following exits from a number of countries in 2010.

Impairments were lower, reflecting the improving corporate environment, but with continued high impairment levels in Ulster Bank.

Non-Core (continued)

Key points (continued)

Q1 2011 compared with Q1 2010

- Third party assets have declined £69 billion (36%) since Q1 2010 reflecting run-off (£30 billion) and disposals (£37 billion).
- Risk-weighted assets were £36 billion lower, driven principally by disposals and run-offs, offset by increases from regulatory changes.
- In addition to the impact of continuing balance sheet reduction on net interest income, non-interest income was lower as a result of higher disposal losses, increased trading losses and a fall in associated income following the sale of the RBS Sempra Commodities joint venture in the second half of 2010.

Condensed consolidated income statement

Note:

(1) Analysis provided on page 62.

Key point

- The Q1 2011 currency translation movement represents the net charge on retranslating net investments in foreign operations and related currency hedging, following the weakening of the US dollar against sterling since the year end.

Commentary on condensed consolidated balance sheet

Total assets of £1,413.3 billion at 31 March 2011 were down £40.3 billion, 3%, compared with 31 December 2010. This principally reflects the reduction in the mark-to-market value of derivatives within Global Banking & Markets and the continuing planned disposal of Non-Core assets, offset in part by higher settlement balances as a result of increased customer activity from seasonal year-end lows.

Loans and advances to banks increased by £3.9 billion, 4%, to £104.5 billion including reverse repurchase agreements and stock borrowing ('reverse repos'), up £2.5 billion, 6%, to £45.2 billion and bank placings up £1.4 billion, 2%, to £59.3 billion.

Loans and advances to customers declined £0.6 billion to £554.7 billion. Within this, reverse repurchase agreements were up £8.0 billion, 15%, to £60.5 billion. Customer lending decreased by £8.6 billion to £494.1 billion, or £513.3 billion before impairments. This reflected planned reductions in Non-Core of £7.3 billion along with declines in Global Banking & Markets, £4.7 billion and Ulster Bank, £0.4 billion. These were partially offset by growth in Global Transaction Services, £2.7 billion, UK Retail, £1.6 billion, UK Corporate, £0.8 billion and Wealth, £0.3 billion, together with the effect of exchange rate and other movements.

Debt securities were up £13.9 billion, 6%, to £231.4 billion, driven mainly by increased holdings of government bonds within Global Banking & Markets.

Settlement asset balances rose £11.4 billion, 98%, to £23.0 billion as a result of increased customer activity from seasonal year-end lows.

Movements in the value of derivative assets, down £66.0 billion, 15%, to £361.0 billion, and liabilities, down £63.3 billion 15% to £360.6 billion, primarily reflect decreases in interest rate contracts, higher interest rates and the net effect of currency movements, with Sterling strengthening against the US dollar but weakening against the Euro.

The reduction in assets and liabilities of disposal groups primarily resulted from the completion of parts of the RBS Sempra Commodities JV business disposal.

Deposits by banks increased £4.7 billion, 5%, to £103.4 billion, with higher repurchase agreements and stock lending ('repos'), up £6.9 billion, 21%, to £39.6 billion offset by reduced inter-bank deposits, down £2.2 billion, 3%, to £63.8 billion.

Customer accounts increased £8.2 billion, 2%, to £518.9 billion. Within this, repos increased £8.3 billion, 10%, to £90.4 billion. Excluding repos, customer deposits were down £0.1 billion at £428.5 billion, reflecting decreases in Global Banking & Markets, £2.2 billion, offset by growth in Wealth, £1.1 billion, UK Corporate, £0.6 billion, Non-Core £0.4 billion and Ulster Bank £0.3 billion, together with exchange and other movements.

Settlement liability balances were up £10.4 billion, 95%, to £21.4 billion and short positions rose £6.9 billion, 16% to £50.1 billion due to increased customer activity from seasonal year-end lows.

Commentary on condensed consolidated balance sheet

Subordinated liabilities decreased by £0.5 billion, 2% to £26.5 billion. This reflected the redemption of £0.2 billion US dollar subordinated notes, together with the effect of exchange rate movements and other adjustments of £0.3 billion.

Owner's equity decreased by £1.1 billion, 1%, to £74.1 billion, driven by the £0.5 billion attributable loss for the period together with movements in foreign exchange reserve, £0.4 billion and cash flow hedging reserves, £0.2 billion.

Notes

1. Basis of preparation

Having reviewed the Group's forecasts, projections and other relevant evidence, the directors have a reasonable expectation that the Group will continue in operational existence for the foreseeable future. Accordingly, the results for the quarter ended 31 March 2011 have been prepared on a going concern basis.

2. Accounting policies

The annual accounts are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB as adopted by the European Union (EU) (together IFRS). The Group's Financial Statements are prepared in accordance with IFRS as issued by the IASB. There have been no significant changes to the Group's principal accounting policies as set out on pages 275 to 283 of the 2010 Annual Report and Accounts.

Notes (continued)

4. Loan impairment provisions

Operating profit/(loss) is stated after charging loan impairment losses of £1,898 million (31 December 2010 - £2,155 million). The balance sheet loan impairment provisions increased in the quarter ended 31 March 2011 from £18,182 million to £19,258 million and the movements thereon were:

| | Quarter ended 31 March 2011 | | | Quarter ended 31 December 2010 | | |
|--|--------------------------------|----------------|-------------|-----------------------------------|----------------|-------------|
| | Core £m | Non-Core £m | Total £m | Core £m | Non-Core £m | Total £m |
| At beginning of period | 7,866 | 10,316 | 18,182 | 7,791 | 9,879 | 17,670 |
| Transfers to disposal groups | - | (9) | (9) | - | (5) | (5) |

| Adjustments in respect of prior periods | (5) | 74 | 172 |
| Actual tax (charge)/credit | (423) | 3 | (107) |

The high charge in the first three months of 2011 reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland and the Netherlands) and the effect of the reduction of 1% in the rate of UK Corporation Tax enacted in March 2011 on the net deferred tax balance.

The combined effect of the Irish tax losses and the 1% change in the standard rate of UK corporation tax accounts for £331 million (73%) of the difference between the actual tax charge and the tax credit derived from applying the standard UK Corporation Tax rate to the results for the period.

The Group has recognised a deferred tax asset at 31 March 2011 of £6,299 million (31 December 2010 - £6,373 million), of which £3,770 million (31 December 2010 - £3,849 million) relates to carried forward trading losses in the UK. Under UK tax legislation, these UK losses can be carried forward indefinitely to be utilised against profits arising in the future. The Group has considered the carrying value of this asset as at 31 March 2011 and concluded that it is recoverable based on future profit projections.

Note:

(1) Held for trading derivatives include hedging derivatives.

Notes (continued)

10. Financial instruments (continued)

Financial instruments carried at fair value

Refer to Note 12 Financial instruments - valuation of the 2010 Annual Report and Accounts for valuation techniques.

Certain aspects relating to the valuation of financial instruments carried at fair value are discussed below.

Valuation reserves

When valuing financial instruments in the trading book, adjustments are made to mid-market valuations to cover bid-offer spread, liquidity and credit risk.

The table below shows the valuation reserves and adjustments.

| | 31 March 2011 £m | 31 December 2010 £m |
|---|------------------------|------------------------------|
| Credit valuation adjustments (CVA) | | |
| Monoline insurers | 2,178 | 2,443 |
| Credit derivative product companies (CDPCs) | 445 | 490 |
| Other counterparties | 1,629 | 1,714 |
| | 4,252 | 4,647 |
| Bid-offer, liquidity and other reserves | 2,931 | 2,797 |
| | 7,183 | 7,444 |

CVA represent an estimate of the adjustment to fair value that a market participant would make to incorporate the credit risk inherent in counterparty derivative exposures.

Key points

- The decrease in monoline CVA was driven by a reduction in exposure mainly due to higher prices of underlying reference instruments (see page 108).
- The CDPC CVA reduced as exposure decreased reflecting decline in relative value of senior tranches partially offset by wider credit spreads of the underlying portfolios (see page 108).
- CVA held against exposures to other counterparties decreased due to tighter credit spreads (specifically European names), changes to risk parameters and realised defaults.

Own credit

| Debt Subordinated securities | liabilities | Total £m | Derivatives £m | Total £m |
|---------------------------------|-------------|-------------|-------------------|-------------|
|---------------------------------|-------------|-------------|-------------------|-------------|

| Cumulative own credit adjustment | in issue £m | £m | | | |

Notes (continued)

10. Financial instruments (continued)

Valuation hierarchy (continued)

Key points

- Total assets carried at fair value decreased by £44.5 billion in the quarter to £741.6 billion, principally in derivatives (£66.1 billion) and collateral (£1.4 billion), partially offset by higher debt securities (£14.2 billion) and reverse repos (£9.5 billion).
- Total liabilities carried at fair value decreased by £48.3 billion to £592.1 billion, mainly in derivatives (£63.4 billion) and collateral (£4.9 billion) offset by higher debt securities in issue (£1.9 billion), repos (£9.8 billion) and short positions (£7.0 billion).
- Level 3 assets decreased by £1.6 billion to £14.1 billion, mainly reflecting French bank bond disposals and increased observability and liquidity in debt securities and credit derivatives. The APS derivative decreased from £550 million to £81 million primarily due to reduction in covered assets.
- Level 3 liabilities increased by £0.6 billion to £5.4 billion primarily due to refinements to structured note classifications in RBS N.V..
- The favourable and unfavourable effects of reasonably possible alternative assumptions on level 3 instruments were £1,730 million and £1,190 million respectively excluding £660 million and £400 million relating to the APS derivative. These sensitivities are calculated at sub-portfolio level and hence these aggregated figures do not reflect the correlation between some of the sensitivities.

81

Notes (continued)

11. Available-for-sale financial assets

During Q1 2011 gains were realised, mainly in Group Treasury (£163 million), which were offset by adverse movements relating to IFRS volatility and other volatile Treasury items.

| | Quarter ended | |
|----------------------------|------------------|---------------------|
| | 31 March 2011 | 31 December 2010 |
| | £m | £m |
| Available-for-sale reserve | | |
| At beginning of period | (2,037) | (1,242) |
| Unrealised gains/(losses) | 162 | (1,148) |
| Realised (gains)/losses | (197) | 16 |
| Tax | 9 | 337 |
| At end of period | (2,063) | (2,037) |

The above table excludes gains attributable to non-controlling interests of £2 million (Q4 2010 - £1 million loss).

12. Contingent liabilities and commitments

| | 31 March 2011 | | | 31 December 2010 | | |
|--|---------------|----------------|-------------|------------------|----------------|-------------|
| | Core £m | Non-Core £m | Total £m | Core £m | Non-Core £m | Total £m |
| Contingent liabilities | | | | | | |
| Guarantees and assets pledged as | | | | | | |
| collateral security | 26,849 | 3,156 | 30,005 | 28,859 | 2,242 | 31,101 |
| Other contingent liabilities | 11,407 | 469 | 11,876 | 11,833 | 421 | 12,254 |
| | 38,256 | 3,625 | 41,881 | 40,692 | 2,663 | 43,355 |
| Commitments | | | | | | |
| Undrawn formal standby facilities, credit lines and other commitments to lend | 236,096 | 18,460 | 254,556 | 245,425 | 21,397 | 266,822 |
| Other commitments | 953 | 2,494 | 3,447 | 1,560 | 2,594 | 4,154 |
| | 237,049 | 20,954 | 258,003 | 246,985 | 23,991 | 270,976 |
| Total contingent liabilities and commitments | 275,305 | 24,579 | 299,884 | 287,677 | 26,654 | 314,331 |

Additional contingent liabilities arise in the normal course of the Group's business. It is not anticipated that any material loss will arise from these transactions.

Notes (continued)

13. Litigation and investigations developments

Except for the developments noted below, there have been no material changes to the litigation or investigations as disclosed in the Annual Results for the year ended 31 December 2010.

Personal current accounts

On 29 March 2011, the Office of Fair Trading (OFT) published its update report in relation to personal current accounts. This noted further progress in improving consumer control over the use of unarranged overdrafts. In particular, the Lending Standards Board has led on producing standards and guidance included in a revised Lending Code published on 31 March 2011. The OFT will continue to monitor the market and will consider the need for, and appropriate timing of, further update reports in light of other developments, in particular the work of the Independent Commission on Banking. The OFT intends to conduct a more comprehensive review of the market in 2012.

Independent Commission on Banking

On 16 June 2010, HM Treasury published the terms of reference for the Government's Independent Commission on Banking (ICB). The ICB is considering the structure of the United Kingdom banking sector and is looking at structural and non-structural measures to reform the banking system and to promote competition. It is mandated to formulate policy recommendations with a view to: (i) reducing systemic risk in the banking sector, exploring the risk posed by banks of different size, scale and function; (ii) mitigating moral hazard in the banking system; (iii) reducing the likelihood and impact of a bank's failure; and (iv) promoting competition in retail and investment banking with a view to ensuring that the needs of banks' customers are served efficiently and considering the extent to which large banks can gain competitive advantage from being perceived as "too big to fail".

The ICB published its Interim Report on 11 April 2011 which contains the ICB's suggestions for changes to the UK banking sector. The report is complex, and while its proposals have potential implications for the Group and many of its stakeholders, they require further clarification and elaboration if they are to be implemented. At this stage it is not possible to estimate the effect of the ICB's report and recommendations upon the Group, if any.

The ICB reports to the Cabinet Committee on Banking Reform and is required to produce a final report by the end of September 2011.

83

Notes (continued)

13. Litigation and investigations developments (continued)

US dollar clearing activities

In May 2010, following a criminal investigation by the United States Department of Justice (DoJ) into its dollar clearing activities, Office of Foreign Assets Control compliance procedures and other Bank Secrecy Act compliance matters, RBS NV formally entered into a Deferred Prosecution Agreement (DPA) with the DoJ resolving the investigation. The investigation was in relation to activities before the Consortium Members acquired ABN AMRO Holding N.V. (now known as RBS Holdings N.V.). The agreement was signed by RBS NV and is binding on that entity and its subsidiaries. Pursuant to the DPA, RBS NV paid a penalty of US\$500 million and agreed that it will comply with the terms of the DPA and continue to co-operate fully with any further investigations. Payment of the penalty was made from a provision established in April 2007 when an agreement in principle to settle was first announced. At the joint request of the DoJ and RBS NV, in order to allow RBS NV sufficient time to fulfil its obligations, the U.S. District Court, on 6 April 2011, extended the duration of the DPA until 31 December 2011. Upon satisfaction of the conditions of the DPA within that period, the matter will be fully resolved. Failure to comply with the terms of the DPA could result in the DoJ recommencing its investigations, the outcome of which would be uncertain and could result in public censure and fines or have an adverse effect on RBS Holdings N.V.'s operations, any of which could have a material adverse effect on its business, reputation, results of operation and financial condition.

Payment Protection Insurance (PPI)

Following unsuccessful negotiations with the industry, the Financial Services Authority (FSA) issued consultation papers on PPI complaint handling and redress in September 2009 and again in March 2010. The FSA published its final policy statement on 10 August 2010 and instructed firms to implement the measures contained in it by 1 December 2010. The new rules impose significant changes with respect to the handling of mis-selling PPI complaints. On 8 October 2010, the British Bankers' Association (BBA) filed an application for judicial review of the FSA's policy statement and of related guidance issued by the Financial Ombudsman Service (FOS). The application was heard in January 2011. On 20 April 2011 the High Court issued judgment in favour of the FSA and the FOS. The BBA is considering whether to appeal the judgment. At this time, the Group is unable reliably to estimate any potential financial liability, although it could prove to be material.

LIBOR Investigation

The US Commodity Futures Trading Commission, the US Securities and Exchange Commission and the European Commission are conducting investigations into the submission of various LIBOR rates by relevant panel banks. As a panel bank in each instance, RBS Group is co-operating with these investigations and is keeping other relevant regulators informed. It is not possible to estimate with any certainty what effect these investigations and any related developments may have on the Group.

14. Other developments

Bank levy

The UK bank levy announced in the June 2010 Budget has been included in the Finance Bill 2011 published in March 2011. The levy is an annual charge based on period-end equity and liabilities. The legislation has yet to be enacted and no amounts have been accrued for the levy in the Group's Q1 2011 results. The estimated cost for 2011 is in the region of £350 million to £400 million.

Notes (continued)

14. Other developments (continued)

Proposed transfers of a substantial part of the business activities of RBS N.V. to The Royal Bank of Scotland plc (RBS plc)

On 19 April 2011, the Group announced its intention to transfer a substantial part of the business activities of RBS N.V. to RBS plc (the "Proposed Transfers"), subject, amongst other matters, to regulatory and other approvals, further tax and other analysis in respect of the assets and liabilities to be transferred and employee consultation procedures.

The Proposed Transfers will streamline the manner in which the GBM and GTS businesses of the Group interact with clients with simplified access to the GBM and GTS product suites.

It is expected that the Proposed Transfers will be implemented on a phased basis over a period ending 31 December 2013. A large part of the Proposed Transfers (including the transfers of certain securities issued by RBS N.V.) is expected to have taken place by the end of 2012.

Rating agencies

The Group and RBS plc's long term and short term ratings have remained unchanged in the quarter. On 9 March 2011, Standard & Poor's affirmed the A+ counterparty rating of RBS plc and upgraded its standalone credit profile from BBB+ to A-. The agency highlighted that they expect RBS plc's standalone credit profile to move toward the A+ counterparty rating by 2012 if continued progress is made, following the strategic plan. The counterparty rating contains 2 notches of uplift to account for the systemic importance of RBS.

Gender equality in insurance contracts

On 1 March 2011, the European Court of Justice (ECJ) upheld a ruling that insurers are no longer allowed to use gender as a rating factor across the insurance industry. This will have a significant impact on the insurance industry in calculating premiums and determining benefits. The Group is currently working through the findings, and any consequences arising will be rectified by December 2012 in line with the ruling from the ECJ. At this stage, it is not possible to estimate the impact which the ECJ's ruling may have on the Group's businesses, financial position or profitability.

15. Post balance sheet events

There have been no significant events between 31 March 2011 and the date of approval of this announcement which would require a change to or additional disclosure in the announcement.

Average balance sheet

| | Quarter ended | |
|---|------------------|------------------------|
| | 31 March 2011 | 31 December 2010 |

Risk and balance sheet management

Balance sheet management

Capital

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements as capital adequacy and risk management are closely aligned. The Group's regulatory capital resources and risk asset ratios calculated in accordance with FSA definitions are set out below.

| | 31 March 2011 | 31 December 2010 |
|------------------------------------|------------------|------------------------|
| | £bn | £bn |
| Risk-weighted assets (RWAs) | | |
| Credit risk | 367.9 | 385.9 |
| Counterparty risk | 62.8 | 68.1 |
| Market risk | 69.5 | 80.0 |
| Operational risk | 37.9 | 37.1 |
| | 538.1 | 571.1 |
| Benefit of Asset Protection Scheme | (98.4) | (105.6) |
| | 439.7 | 465.5 |
| Risk asset ratio | % | % |
| Core Tier 1 | 11.2 | 10.7 |
| Tier 1 | 13.5 | 12.9 |
| Total | 14.5 | 14.0 |

Key points

- Credit and counterparty RWAs fell by £23.3 billion principally driven by asset run-off, disposals and restructurings, and a reclassification of certain trades in Non-Core.
- Market risk decreased by £10.5 billion reflecting a lower event risk charge and reductions in VaR.
- The reduction in APS RWA benefit reflects the run-off of covered assets.
- The benefit of the APS to the Core Tier 1 was 1.3% compared with 1.2% at 31 December 2010.

Risk and balance sheet management (continued)

Balance sheet management: Capital (continued)

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk

The Group's balance sheet composition is a function of the broad array of product offerings and diverse markets served by its Core divisions. The structural composition of the balance sheet is augmented as needed through active management of both asset and liability portfolios. The objective of these activities is to optimise liquidity transformation in normal business environments while ensuring adequate coverage of all cash requirements under extreme stress conditions.

Diversification of the Group's funding base is central to its liquidity management strategy. The Group's businesses have developed large customer franchises based on strong relationship management and high quality service. These customer franchises are strongest in the UK, US and Ireland but extend into Europe, Asia and Latin America. Customer deposits provide large pools of stable funding to support the majority of the Group's lending. It is a strategic objective to improve the Group's loan to deposit ratio to 100%, or better, by 2013.

The Group also accesses professional markets funding by way of public and private debt issuances on an unsecured and secured basis. These debt issuance programmes are spread across multiple currencies and maturities to appeal to a broad range of investor types and preferences around the world. This market based funding supplements the Group's structural liquidity needs and in some cases achieves certain capital objectives.

The table below shows the Group's primary funding sources, excluding repurchase agreements.

| | 31 March 2011 | | 31 December 2010 | |
|-------------------------------------|---------------|------|------------------|------|
| | £m | % | £m | % |

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk (continued)

The table below shows the Group's debt securities in issue and subordinated liabilities by remaining maturity.

| | 31 March 2011 | | | | 31 December 2010 | | | | |
|-------------------|-----------------|--------|--------------------------|-------|------------------|--------|--------------------------|-------|--|
| | Debt securities | | Subordinated liabilities | Total | Debt securities | | Subordinated liabilities | Total | |
| | in issue | | | | in issue | | | | |
| | £m | £m | £m | % | £m | £m | £m | % | |
| Less than 1 year | 107,110 | 826 | 107,936 | 44.5 | 94,048 | 964 | 95,012 | 38.7 | |
| 1-3 years | 35,801 | 2,247 | 38,048 | 15.7 | 49,149 | 754 | 49,903 | 20.3 | |
| 3-5 years | 23,613 | 7,217 | 30,830 | 12.7 | 22,806 | 8,476 | 31,282 | 12.8 | |
| More than 5 years | 49,444 | 16,225 | 65,669 | 27.1 | 52,369 | 16,859 | 69,228 | 28.2 | |
| | 215,968 | 26,515 | 242,483 | 100.0 | 218,372 | 27,053 | 245,425 | 100.0 | |

Key points

- The proportion of funding from customer deposits, excluding cash collateral, improved marginally from 56.5% to 57.1%.
- Short-term wholesale funding excluding derivative collateral increased from £129.4 billion to £144.7 billion during the first quarter of 2011 due to the inclusion of £15.6 billion of medium-term notes issued under the Credit Guarantee Scheme which will mature in Q1 2012. Short-term wholesale instruments (excluding repos and cash collateral) declined by £1.6 billion in Q1 2011.

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk (continued)

Long-term debt issuances

The table below shows debt securities issued by the Group with an original maturity of one year or more. The Group also executes other long-term funding arrangements (predominately term repos) not reflected in the tables below.

| | Quarter ended | | | | Year ended | |
|-----------------------|---------------|--------------|---------------|--------------|--------------|---------------|
| | 31 March | 31 | 30 | 30 June | 31 March | 31 |
| | 2011 | December | September | 2010 | 2010 | December |
| | £m | £m | £m | £m | £m | £m |
| Public | | | | | | |
| - unsecured | 3,277 | 775 | 6,254 | 1,882 | 3,976 | 12,887 |
| - secured | 2,652 | 1,725 | 5,286 | 1,030 | - | 8,041 |
| Private | | | | | | |
| - unsecured | 4,251 | 4,623 | 6,299 | 2,370 | 4,158 | 17,450 |
| Gross issuance | 10,180 | 7,123 | 17,839 | 5,282 | 8,134 | 38,378 |

The table below shows the original maturity and currency breakdown of long-term debt securities issued in Q1 2011 and Q4 2010.

| | Quarter ended | | | |
|--------------------------|---------------|--------------|------------------|--------------|
| | 31 March 2011 | | 31 December 2010 | |
| | £m | % | £m | % |
| Original maturity | | | | |
| 1-2 years | 438 | 4.3 | 433 | 6.1 |
| 2-3 years | 184 | 1.8 | 618 | 8.6 |
| 3-4 years | 2,474 | 24.3 | 697 | 9.8 |
| 4-5 years | 248 | 2.5 | 290 | 4.1 |
| 5-10 years | 5,001 | 49.1 | 2,321 | 32.6 |
| > 10 years | 1,835 | 18.0 | 2,764 | 38.8 |
| | 10,180 | 100.0 | 7,123 | 100.0 |
| Currency | | | | |
| GBP | 483 | 4.7 | 264 | 3.7 |
| EUR | 4,069 | 40.0 | 3,935 | 55.2 |
| USD | 3,310 | 32.5 | 1,280 | 18.0 |
| Other | 2,318 | 22.8 | 1,644 | 23.1 |

| | | | |
|--------|-------|-------|-------|
| 10,180 | 100.0 | 7,123 | 100.0 |
|--------|-------|-------|-------|

Key points

- Term issuances in Q1 2011 were £10.2 billion, including £2.7 billion of euro denominated covered bonds, of which £0.9 billion had original maturity of 7 years and the balance had original maturity of 5 years.
- Issuances in Q1 2011 were £3.1 billion higher than in Q4 2010, of which £2.0 billion related to US dollar denominated instruments.
- The Group issued a further £3.8 billion of term debt in April 2011.

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk (continued)

Liquidity portfolio

The table below shows the composition of the Group's liquidity portfolio.

| | 31 March 2011 | 31 December 2010 |
|---|------------------|------------------------|
| | £m | £m |
| Liquidity portfolio | | |
| Cash and balances at central banks | 58,936 | 53,661 |
| Treasury bills | 9,859 | 14,529 |
| Central and local government bonds (1) | | |
| - AAA rated governments (2) | 40,199 | 41,435 |
| - AA- to AA+ rated governments | 1,408 | 3,744 |
| - governments rated below AA | 1,052 | 1,029 |
| - local government | 4,771 | 5,672 |
| | 47,430 | 51,880 |
| Unencumbered collateral (3) | | |
| - AAA rated | 21,328 | 17,836 |
| - below AAA rated and other high quality assets | 13,637 | 16,693 |
| | 34,965 | 34,529 |
| Total liquidity portfolio | 151,190 | 154,599 |

Notes:

- (1) Includes FSA eligible government bonds of £30.1 billion at 31 March 2011 (31 December 2010 - £34.7 billion).
- (2) Includes AAA rated US government guaranteed agencies.
- (3) Includes secured assets eligible for discounting at central banks, comprising loans and advances and debt securities.

Key points

- The Group's liquidity portfolio was £151.2 billion, a decline of £3.4 billion from 31 December 2010.
- The strategic target of £150 billion is unchanged.
- The liquidity portfolio is actively managed and as such its composition varies over time. Actions initiated in March 2011 to alter the maturity and currency mix resulted in a higher proportion of cash and central bank balances at the end of the quarter.

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk (continued)

Net stable funding

The table below shows the Group's net stable funding ratio estimated by applying the Basel III guidance issued in December 2010. This measure seeks to show the proportion of structural term assets which are funded by stable funding including customer deposits, long-term wholesale funding, and equity. The Group's net stable funding ratio calculation will continue to be refined over time in line with regulatory developments.

| | 31 March 2011 | | 31 December 2010 | | Weighting % |
|--|---------------|-------------|------------------|-------------|-------------|
| | £bn | ASF (1) £bn | £bn | ASF (1) £bn | |
| Equity | 76 | 76 | 76 | 76 | 100 |
| Wholesale funding > 1 year | 138 | 138 | 154 | 154 | 100 |
| Wholesale funding < 1 year | 168 | - | 157 | - | - |
| Derivatives | 361 | - | 424 | - | - |
| Repurchase agreements | 130 | - | 115 | - | - |
| Deposits | | | | | |
| - Retail and SME - more stable | 171 | 154 | 172 | 155 | 90 |
| - Retail and SME - less stable | 26 | 21 | 51 | 41 | 80 |
| - Other | 231 | 116 | 206 | 103 | 50 |
| Other (2) | 112 | - | 98 | - | - |
| Total liabilities and equity | 1,413 | 505 | 1,453 | 529 | |
| Cash | 60 | - | 57 | - | - |
| Inter bank lending | 59 | - | 58 | - | - |
| Debt securities > 1 year | | | | | |
| - central and local governments AAA to AA- | 83 | 4 | 89 | 4 | 5 |
| - other eligible bonds | 79 | 16 | 75 | 15 | 20 |
| - other bonds | 16 | 16 | 10 | 10 | 100 |
| Debt securities < 1 year | 53 | - | 43 | - | - |
| Derivatives | 361 | - | 427 | - | - |
| Reverse repurchase agreements | 106 | - | 95 | - | - |
| Customer loans and advances > 1 year | | | | | |
| - residential mortgages | 143 | 93 | 145 | 94 | 65 |
| - other | 200 | 200 | 211 | 211 | 100 |
| Customer loans and advances < 1 year | | | | | |
| - retail loans | 19 | 16 | 22 | 19 | 85 |
| - other | 132 | 66 | 125 | 63 | 50 |
| Other (3) | 102 | 102 | 96 | 96 | 100 |
| Total assets | 1,413 | 513 | 1,453 | 512 | |

| | | | | | |
|--------------------------------------|-------|-----|-------|------|---|
| Undrawn commitments | 255 | 13 | 267 | 13 | 5 |
| Total assets and undrawn commitments | 1,668 | 526 | 1,720 | 525 | |
| Net stable funding ratio | | 96% | | 101% | |

Notes:

- (1) Available stable funding.
- (2) Deferred tax, insurance liabilities and other liabilities.
- (3) Prepayments, accrued income, deferred tax and other assets.

Key point

- The Group's net stable funding ratio reduced to 96% at 31 March 2011, from 101% at 31 December 2010, primarily due to an increase in the wholesale funding with maturity of less than one year arising from the inclusion of £15.6 billion medium-term notes issued under the Credit Guarantee Scheme maturing during Q1 2012.

Risk and balance sheet management (continued)

Balance sheet management: Funding and liquidity risk (continued)

Loan deposit ratio and funding gap

The table below shows quarterly trends in the loan to deposit ratio and customer funding gap.

| | Loan to deposit ratio (1) | | Customer funding gap (1) |
|-------------------|------------------------------|-----------|--------------------------------|
| | Group % | Core % | Group £bn |
| 31 March 2011 | 115 | 96 | 66 |
| 31 December 2010 | 117 | 96 | 74 |
| 30 September 2010 | 126 | 101 | 107 |
| 30 June 2010 | 128 | 102 | 118 |
| 31 March 2010 | 131 | 102 | 131 |
| 31 December 2009 | 135 | 104 | 142 |

Note:

- (1) Excludes repurchase agreements and bancassurance deposits to 31 March 2010 and loans are net of provisions.

Key points

- The Group's loan to deposit ratio improved by 200 basis points in Q1 2011 to 115%. The customer funding gap narrowed by £8 billion to £66 billion in Q1 2011, primarily due to a reduction in Non-Core customer loans.
- The loan to deposit ratio for the Group's Core business at 31 March 2011 remained stable at 96%.

Sensitivity of net interest income

The Group seeks to mitigate the effect of prospective interest rate movements which could reduce future net interest income through its management of market risk in the Group's businesses, whilst balancing the cost of such hedging activities on the current net revenue stream. Hedging activities also consider the impact on market value sensitivity under stress.

The following table shows the sensitivity of net interest income over the next twelve months to an immediate up and down 100 basis points change to all interest rates.

| | 31 March 2011 £m | 31 December 2010 £m |
|-------------------------------|------------------------|------------------------------|
| + 100bp shift in yield curves | 266 | 232 |
| - 100bp shift in yield curves | (302) | (352) |

Key points

- In aggregate, the Group's interest rate exposure continues to reflect a slight asset sensitive bias in Q1 2011.
- There were no material actions taken to alter the position during the quarter. Certain assumptions used for modelling customer pricing have been modified to show greater opportunity for margin expansion as and when short-term interest rates begin to rise.

Risk and balance sheet management (continued)

Risk management: Credit risk

Credit risk is the risk of financial loss due to the failure of customers or counterparties to meet payment obligations. The quantum and nature of credit risk assumed across the Group's different businesses varies considerably, while the overall credit risk outcome usually exhibits a high degree of correlation with the macroeconomic environment.

Loans and advances to customers by geography and industry

The table below analyses loans and advances to customers excluding reverse repos and disposal groups.

| | 31 March 2011 | | | 31 December 2010 | | |
|---|---------------|----------------|-------------|------------------|----------------|-------------|
| | Core £m | Non-Core £m | Total £m | Core £m | Non-Core £m | Total £m |
| Central and local government | 5,650 | 1,514 | 7,164 | 6,781 | 1,671 | 8,452 |
| Finance | 47,797 | 7,559 | 55,356 | 46,910 | 7,651 | 54,561 |
| Residential mortgages | 142,920 | 5,678 | 148,598 | 140,359 | 6,142 | 146,501 |
| Personal lending | 32,362 | 3,482 | 35,844 | 33,581 | 3,891 | 37,472 |

| Manufacturing | 24,621 | 6,295 | 30,916 | 25,797 | 6,520 | 32,317 |
| Service industries and business activities | 92,623 | 20,712 | 113,335 | 95,127 | 22,383 | 117,510 |
| Agriculture, forestry and fishing | 3,741 | 130 | 3,871 | 3,758 | 135 | 3,893 |
| Finance leases and instalment credit | 8,061 | 8,119 | 16,180 | 8,321 | 8,529 | 16,850 |
| Interest accruals | 673 | 193 | 866 | 831 | 278 | 1,109 |
| Gross loans | 412,497 | 100,779 | 513,276 | 412,600 | 108,203 | 520,803 |
| Loan impairment provisions | (8,287) | (10,841) | (19,128) | (7,740) | (10,315) | (18,055) |
| Net loans | 404,210 | 89,938 | 494,148 | 404,860 | 97,888 | 502,748 |

Key points

- Gross loans reduced by £7.5 billion in the quarter principally due to disposals, run-offs and transfers in Non-Core, partially offset by increased mortgage lending in UK Retail.
- The movement between Non-Core and Core property-related lending primarily reflected Non-Core returning loans to UK Corporate in preparation for the sale of the RBS England and Wales branch-based business to Santander.

| Total REIL | 17,018 | 24,023 | 41,041 | 15,207 | 23,391 | 38,598 |
| PPL (3) | 324 | 202 | 526 | 473 | 160 | 633 |
| Total REIL and PPL | 17,342 | 24,225 | 41,567 | 15,680 | 23,551 | 39,231 |
| REIL as a % of gross loans and advances (4) | 4.1% | 23.0% | 7.9% | 3.7% | 20.7% | 7.3% |
| REIL and PPL as a % of gross loans and advances (4) | 4.2% | 23.2% | 8.0% | 3.8% | 20.8% | 7.4% |
| Provisions as a % of total REIL | 49% | 45% | 47% | 51% | 44% | 47% |
| Provisions as a % of total REIL & PPL | 49% | 45% | 46% | 49% | 44% | 46% |

Notes:

- (1) Loans against which an impairment provision is held.
- (2) Loans where an impairment event has taken place but no impairment provision recognised. This category is used for fully collateralised non-revolving credit facilities.
- (3) Loans for which an impairment event has occurred but no impairment provision is necessary. This category is used for advances and revolving credit facilities where the past due concept is not applicable.
- (4) Gross loans and advances to customers including disposal groups and excluding reverse repos.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairment provisions

Movement in REIL and PPL

The table below details the movement in REIL and PPL for the quarter ended 31 March 2011.

| | REIL | | | PPL | | | Total | | |
|--|------------|--------------------|-------------|------------|--------------------|-------------|------------|--------------------|-------------|
| | Core £m | Non- Core £m | Total £m | Core £m | Non- Core £m | Total £m | Core £m | Non- Core £m | Total £m |
| At 1 January 2011 | 15,207 | 23,391 | 38,598 | 473 | 160 | 633 | 15,680 | 23,551 | 39,231 |
| Intra-group transfers | 369 | (369) | - | - | - | - | 369 | (369) | - |
| Currency translation and other adjustments | 68 | 98 | 166 | 1 | 4 | 5 | 69 | 102 | 171 |
| Additions | 3,119 | 2,866 | 5,985 | 305 | 152 | 457 | 3,424 | 3,018 | 6,442 |
| Transfers | 81 | (53) | 28 | (137) | (39) | (176) | (56) | (92) | (148) |
| Disposals, restructurings and repayments | (1,286) | (1,334) | (2,620) | (318) | (75) | (393) | (1,604) | (1,409) | (3,013) |
| Amounts written-off | (540) | (576) | (1,116) | - | - | - | (540) | (576) | (1,116) |
| At 31 March 2011 | 17,018 | 24,023 | 41,041 | 324 | 202 | 526 | 17,342 | 24,225 | 41,567 |

Key points

- REIL increased by £2.4 billion predominantly due to growth in Ulster Bank Group of £2.2 billion (Core - £1.0 billion; Non-Core - £1.2 billion).
- The Group's provision coverage was stable at 47% (see page 100); Core coverage reduced from 51% to 49% and Non-Core coverage increased marginally from 44% to 45%. The Core coverage is typically higher at 49%, due to a greater weighting of unsecured retail products within REIL and the proportion of latent provision on performing portfolios. Lower coverage of Non-Core reflects secured wholesale lending, particularly commercial real estate portfolios.
- The intra-group transfer of REIL relates to Non-Core returning loans to UK Corporate as part of the preparation for the sale of the RBS England and Wales branch-based business to Santander.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairment provisions (continued)

Movement in loan impairment provisions

The following table shows the movement in impairment provisions for loans and advances to customers and banks.

| | Quarter ended | | | | | |
|--|---------------|----------------|-------------|------------------|----------------|-------------|
| | 31 March 2011 | | | 31 December 2010 | | |
| | Core £m | Non-Core £m | Total £m | Core £m | Non-Core £m | Total £m |
| At beginning of period | 7,866 | 10,316 | 18,182 | 7,791 | 9,879 | 17,670 |
| Transfers to disposal groups | - | (9) | (9) | - | (5) | (5) |
| Intra-group transfers | 177 | (177) | - | (217) | 217 | - |

| Unwind of discount | (60) | (71) | (131) | (51) | (76) | (127) |
| At end of period | 8,416 | 10,842 | 19,258 | 7,866 | 10,316 | 18,182 |

Loan impairment provisions on loans and advances

| | 31 March 2011 | | | 31 December 2010 | | |
|-----------------------|---------------|----------------|-------------|------------------|----------------|-------------|
| | Core £m | Non-Core £m | Total £m | Core £m | Non-Core £m | Total £m |
| Latent loss | 1,583 | 963 | 2,546 | 1,653 | 997 | 2,650 |
| Collectively assessed | 4,375 | 1,112 | 5,487 | 4,139 | 1,157 | 5,296 |
| Individually assessed | 2,329 | 8,766 | 11,095 | 1,948 | 8,161 | 10,109 |
| Customer loans | 8,287 | 10,841 | 19,128 | 7,740 | 10,315 | 18,055 |
| Bank loans | 129 | 1 | 130 | 126 | 1 | 127 |
| Total loans | 8,416 | 10,842 | 19,258 | 7,866 | 10,316 | 18,182 |
| % of loans (1) | 2.01% | 10.42% | 3.71% | 1.88% | 9.14% | 3.44% |

Note:

(1)

Customer provisions as a % of gross customer loans including disposal groups and excluding reverse repurchase agreements.

Key points

- Loan impairment provisions increased by £1.1 billion, primarily in Ulster Bank Group (Core - £0.5 billion; Non-Core - £0.9 billion) reflecting the deteriorating economic environment in Ireland with lower asset values and consumer spending. Of the increase in Ulster Bank Group, £0.8 billion related to commercial real estate portfolios, £0.3 billion to other corporate lending and £0.2 billion to mortgage lending.
- The decrease in latent loss provision was primarily due to improved book quality and credit metrics in UK Corporate.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairment provisions (continued)

Impairment charge

| | Quarter ended | | |

Key points

- The proportion of AAA rated securities remained stable at 67% as did non-investment grade and unrated securities at 7%.
- During Q1 2011, Japan was downgraded resulting in the decrease in AA to AA+ and increase in A to AA- other government holdings. Japanese government held-for-trading securities at 31 March 2011 amounted to £8.4 billion (31 December 2010 - £10.7 billion).

Risk and balance sheet management (continued)

Risk management: Credit risk: Derivatives

The Group's derivative assets by internal grading scale and residual maturity are set out below. Master netting arrangements in respect of mark-to-market (mtm) values and collateral do not result in a net presentation in the Group's balance sheet under IFRS.

| Asset quality | Probability of default range | 31 March 2011 | | | | | Total £m | 31 |
|---|------------------------------|---------------|---------------|----------------|--------------|-----------------|-----------|------------------------|
| | | 0-3 months £m | 3-6 months £m | 6-12 months £m | 1-5 years £m | Over 5 years £m | | December 2010 Total £m |

| AQ7 | 2.153% - 6.089% | 177 | 63 | 47 | 498 | 1,095 | 1,880 | 857 |
| AQ8 | 6.089% - 17.222% | 2 | 5 | 9 | 121 | 649 | 786 | 403 |
| AQ9 | 17.222% - 100% | 433 | 13 | 38 | 189 | 322 | 995 | 450 |
| AQ10 | 100% | 19 | 56 | 17 | 518 | 594 | 1,204 | 1,581 |
| | | 31,940 | 12,458 | 18,309 | 113,945 | 184,396 | 361,048 | 427,077 |
| Counterparty mtm netting | | | | | | | (290,462) | (330,397) |
| Cash collateral held against derivative exposures | | | | | | | (25,363) | (31,096) |
| Net exposure | | | | | | | 45,223 | 65,584 |

At 31 March 2011, the Group also held collateral in the form of securities of £3.3 billion (31 December 2010 - £2.9 billion) against derivative positions.

The table below analyses the fair value of the Group's derivatives by type of contract.

| Contract type | 31 March 2011 | | 31 December 2010 | |
|--------------------------------|---------------|----------------|------------------|----------------|
| | Assets £m | Liabilities £m | Assets £m | Liabilities £m |
| Exchange rate contracts | 73,552 | 79,045 | 83,253 | 89,375 |
| Interest rate contracts | 259,006 | 250,515 | 311,731 | 299,209 |
| Credit derivatives | 22,704 | 21,689 | 26,872 | 25,344 |
| Equity and commodity contracts | 5,786 | 9,376 | 5,221 | 10,039 |
| | 361,048 | 360,625 | 427,077 | 423,967 |

Key points

- Net exposure, after taking account of mark-to-market and collateral netting arrangements, reduced by 31% to £45.2 billion.
- Exchange rate contracts decreased due to trading fluctuations and movements in forward rates.
- Interest rate contracts decreased due to greater use of over-the-counter contract compression through third party intermediaries, higher interest rate yields and sterling strengthening against the US dollar. These effects were partially offset by reduced use of clearing houses which resulted in the netting benefit declining from 60% to 57%.
- Credit derivative fair values declined mainly due to trade unwinds together with contract compressions and reduction in Non-Core relating to monolines (see below) and other index hedges, as credit spreads tightened across five and ten year maturities. The APS derivative decreased by £0.5 billion principally reflecting lower covered assets as well as market factors.
- The increase in derivative contracts against AQ3 rated counterparties reflected a combination of rating down grades and new deals.

Risk and balance sheet management (continued)

Risk and balance sheet management (continued)

Risk management: Credit risk: Country risk

Under the Group's country risk framework, country exposures are actively managed both for countries that represent a larger concentration and which, using the Group's country watchlist process, have been identified as exhibiting signs of actual or potential stress.

The table below shows the Group's exposure in terms of credit risk assets, to countries where the total exposure for borrowers domiciled in that country exceed £1 billion; where the country had an external rating of A+ or below from Standard & Poor's, Moody's or Fitch at 31 March 2011; and selected other countries. The numbers are stated gross of mitigating action which may have been taken to reduce or eliminate exposure to country risk events.

Credit risk assets consist of:

- Lending: cash and balances at central banks, loans and advances to banks and customers (including overdraft facilities, instalment credit and finance leases);
- Rate risk management (RRM); and
- Contingent obligations, primarily letters of credit and guarantees.

Reverse repurchase agreements and issuer risk (primarily debt securities - see page 105) are excluded. Where relevant, and unless otherwise stated, the data reflect the effect of credit mitigation techniques.

Key points

· Credit risk assets relating to most of the countries above have remained broadly stable during the first quarter of 2011. Currency movements increased euro-denominated lending by 2.5% and reduced US dollar-denominated exposures by 3.4%. Reductions were seen in exposure to governments as well as in RRM exposures. This contrasted with financial institution and corporate exposures which increased in a number of countries. The increases in Non-Core exposures in some countries resulted primarily from drawings under committed facilities. In addition to credit risk asset components above, debt securities represent the main concentration for Japan and Greece.

· Granular portfolio reviews continue to be undertaken with a view to adjusting the risk profile and to align to the Group's country risk appetite in light of the evolving economic and political developments.

Republic of Ireland - lending increased by almost £1.0 billion in the first quarter (increases in lending to corporate clients by £0.7 billion and personal lending by £0.3 billion), primarily due to exchange rate movements. In euro terms, lending was largely unchanged. RRM exposure fell by £0.7 billion.

Risk and balance sheet management (continued)

Risk management: Credit risk: Country risk (continued)

Key points (continued)

- Italy - lending exposure increased by £0.6 billion as a result of increases in corporate activity (oil & gas) of £0.4 billion, largely caused by drawings under committed facilities, and financial institutions (banks and funds) of £0.2 billion.
- Portugal - lending exposure was stable, with reductions in exposure to the government and financial institutions alongside a very small increase in corporate lending. RRM exposure decreased by almost £0.1 billion.
- Spain - lending exposure fell slightly due to a reduction in corporate exposure of £0.2 billion which was partially offset by an increase in exposure to financial institutions. RRM exposure decreased by £0.3 billion.
- Japan - lending exposure is £2.6 billion and has reduced by £0.3 billion since 31 December 2010 due to a reduction in government exposure. RRM accounts for an additional £2.2 billion of total exposure. Following the tsunami, impairment charges totalled approximately £77 million, of which £44 million relates to debt securities.
- Greece - lending exposure rose by £0.2 billion to £0.5 billion, due to an increase in the Core corporate portfolio.
- Limit controls are being applied on a risk-differentiated basis and exposure to most countries in North Africa and the Middle East reduced during the first quarter of 2011. Of the countries experiencing varying degrees of social and political unrest in North Africa and the Middle East, Bahrain accounted for lending exposure of £302 million (total credit risk assets - £338 million), Oman for £160 million (total credit risk assets - £237 million) and Egypt for £101 million (total credit risk assets - £130 million).

Risk and balance sheet management (continued)

Risk management: Credit risk: Commercial real estate

The commercial real estate lending portfolio totalled £85 billion at 31 March 2011, a 2% decrease over the quarter, from £87 billion at 31 December 2010. The Non-Core portion of the portfolio totalled £42 billion (50% of the portfolio) at 31 March 2011 (31 December 2010 - £46 billion, or 52% of the portfolio) and includes exposures in Ulster Bank Group as discussed on page 115. The analysis below excludes RRM and contingent obligations.

| | 33,355 | 33,149 | 8,206 | 12,660 | 87,370 |

Key points

- The decrease in exposure occurred primarily in the UK and US investment books. The asset mix has remained broadly unchanged since the end of 2010.
- The increase in Core UK Corporate exposures reflected Non-Core returning commercial real estate assets in preparation for the sale of the RBS England and Wales branch-based business to Santander. Excluding this transfer, Core UK Corporate exposure remained broadly stable.
- Of the total portfolio at 31 March 2011, £42.1 billion (31 December 2010 - £45.5 billion) is managed within the Group's standard credit risk processes, £8.7 billion (31 December 2010 - £9.2 billion) is receiving heightened credit oversight under the Group watchlist process ("watch") and £34.5 billion (31 December 2010 - £32.6 billion) is managed within Global Restructuring Group (GRG).
- Short-term lending to property developers without firm long-term financing in place is characterised as speculative. Speculative lending at origination continues to represent less than 2% of the portfolio. The Group's appetite for originating speculative commercial real estate lending is very limited. Current market conditions have resulted in some borrowers experiencing difficulty in procuring long-term finance. These borrowers are managed within the problem debt

management process in “watch” or GRG.

- Tighter risk appetite criteria for new business origination were implemented during 2010 but will take time to be reflected in the performance of the portfolio. Whilst there has been some recovery in the value of prime properties in the UK, the Group observes that it has been selective. To date this improvement has not fed through into lower quality properties in the UK and has not been evident in other regions, notably the eurozone, Republic of Ireland and the US.
- Commercial real estate will remain challenging for key markets, such as UK, Ireland and US; new business will be accommodated by running-off existing exposure. Liquidity in the market remains low with the focus on refinancing and support for the existing client base.

Risk and balance sheet management (continued)

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core)

Overview

Ulster Bank Group accounts for 10% of the Group's total gross customer loans or 9% of the Group's Core gross customer loans. The impairment charge of £1,294 million for Q1 2011 was £135 million higher than the £1,159 million impairment charge for Q4 2010. This was driven by continued deterioration across most portfolios during the quarter. High unemployment coupled with higher taxation and less liquidity in the economy continues to depress housing market confidence and consumer spending.

Core

Impairment losses for Q1 2011 of £461 million were £85 million higher than Q4 2010 losses of £376 million, reflecting the deteriorating economic environment in Ireland with rising default levels across both mortgage and other corporate non-property portfolios. Lower asset values together with pressure on borrowers with a dependence on consumer spending have resulted in higher corporate loan losses while higher unemployment, lower incomes and increased taxation have driven mortgage impairment increases.

Ulster Bank Group is helping customers in this difficult environment. Forbearance policies which are deployed through the 'Flex' initiative are aimed at assisting customers in financial difficulty. These policies were reviewed at the end of 2010 given the structural problem that exists in Ireland with the scale and duration of customers in financial difficulty. There were 9,200 customer accounts in a forbearance arrangement at 31 March 2011. This represents 5.5% (by volume) of the Ulster Bank Group mortgage portfolio, with 75% of these customers in amortising or interest only agreements.

Non-Core

The impairment charge increased from £783 million for Q4 2010 to £833 million for Q1 2011, primarily reflecting the deterioration in the development property portfolio.

Note:

(1) Funded loans.

Key points

- The increase in REIL reflects continuing difficult conditions in both commercial and residential sectors in the Republic of Ireland. Of the REIL at 31 March 2011, 71% was in Non-Core (Q4 2010 - 74%).
- Provisions, including foreign currency effects, increased in the quarter from £6.0 billion to £7.4 billion and the coverage ratio increased to 46.4% from 43.8% at 31 December 2010. 68% of the provision at 31 March 2011 (31 December 2010 - 69%) relates to commercial real estate.

Risk and balance sheet management (continued)

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core) (continued)

Residential mortgages

The table below shows how the continued decrease in property values has affected the distribution of residential mortgages by loan-to-value (LTV) (indexed). LTV is based upon gross loan amounts and, whilst including defaulted loans, does not account for impairments already taken.

| | 31 March 2011 | 31 December 2010 |
|---|------------------|------------------------|
| | % | % |
| By average LTV (1) | | |
| <= 50% | 34.7 | 35.9 |
| > 50% and <= 70% | 13.0 | 13.5 |
| > 70% and <= 90% | 13.0 | 13.5 |
| > 90% | 39.3 | 37.1 |
| Total portfolio average LTV | 73.7 | 71.2 |
| Average LTV on new originations during the period | 69.0 | 75.9 |

Note:

(1) LTV averages calculated by transaction volume.

Key points

- The residential mortgage portfolio across Ulster Bank Group totalled £21.5 billion at 31 March 2011 - with 90% in the Republic of Ireland and 10% in Northern Ireland. At constant exchange rates, the portfolio remained at similar levels to 31 December 2010 (£21.2 billion) with little growth due to very low new business volumes. To date in 2011, 596 new mortgages were originated, of which 85% were in Northern Ireland.
- The 90 days arrears rate continues to increase due to the continued challenging economic environment. At 31 March 2011, the arrears rate was 6.6% (by volume) compared with 6.0% at 31 December 2010. The impairment charge for Q1 2011 was £233 million compared with £159 million for Q4 2010. Repossession levels remain low totalling 37 properties at 31 March 2011 (76 for full year 2010). 78% of repossessions during the quarter were through voluntary surrender or abandonment of the property.
- Ulster Bank Group has a number of initiatives in place aimed at increasing the level of support to customers experiencing temporary financial difficulties. At 31 March 2011, 7.4% (by value) of the mortgage book (£1.6 billion) was on forbearance

arrangements, the majority of these are performing (77%) and not 90 days past due.

Risk and balance sheet management (continued)

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core) (continued)

Commercial real estate

The commercial real estate lending portfolio in Ulster Bank Group increased marginally during the quarter to £18.1 billion at 31 March 2011, primarily due to exchange rate movements. The Non-Core portion of the portfolio totalled £12.8 billion (71% of the portfolio). Of the total Ulster Bank Group commercial real estate portfolio 25% relates to Northern Ireland, 61% to the Republic of Ireland and 14% to the rest of the UK.

| Exposure by geography | Development | | Investment | | Total £m |
|---------------------------------|-------------------|------------------|-------------------|------------------|-------------|
| | Residential £m | Commercial £m | Residential £m | Commercial £m | |
| 31 March 2011 | | | | | |
| Island of Ireland | 2,848 | 6,556 | 5,090 | 1,143 | 15,637 |
| UK (excluding Northern Ireland) | 112 | 362 | 1,835 | 129 | 2,438 |
| RoW | - | 17 | 22 | 1 | 40 |
| | 2,960 | 6,935 | 6,947 | 1,273 | 18,115 |
| 31 December 2010 | | | | | |
| Island of Ireland | 2,785 | 6,578 | 5,072 | 1,098 | 15,533 |
| UK (excluding Northern Ireland) | 110 | 359 | 1,831 | 115 | 2,415 |
| RoW | - | 17 | 22 | 1 | 40 |
| | 2,895 | 6,954 | 6,925 | 1,214 | 17,988 |

Key points

- Commercial real estate remains a key driver of the increase in the defaulted loan book for Ulster Bank Group. The outlook remains challenging with limited liquidity in the marketplace to support refinancing.
- Ongoing reviews of the portfolio have led to a greater portion of the portfolio moving to specialised management in GRG.

Risk and balance sheet management (continued)

Market risk

Market risk arises from changes in interest rates, foreign currency, credit spread, equity prices and risk related factors such as market volatilities. The Group manages market risk centrally within its trading and non-trading portfolios through a comprehensive market risk management framework. This framework includes limits based on, but not limited to, value-at-risk (VaR), stress testing, position and sensitivity analyses.

VaR is a technique that produces estimates of the potential change in the market value of a portfolio over a specified time horizon at given confidence levels. For internal risk management purposes, the Group's VaR assumes a time horizon of one trading day and a confidence level of 99%. The Group's VaR model is based on a historical simulation model, utilising data from the previous two years trading results.

The VaR disclosure is broken down into trading and non-trading where trading VaR relates to the main trading activities of the Group and non-trading reflects the VaR associated with reclassified assets, money market business and the management of internal funds flow within the Group's businesses.

The Group's VaR should be interpreted in the light of the limitations of the methodology used, as follows:

- Historical simulation VaR may not provide the best estimate of future market movements. It can only provide a prediction of the future based on events that occurred in the 500 trading day time series. Therefore, events more severe than those in the historical data series cannot be predicted.
- The use of a 99% confidence level does not reflect the extent of potential losses beyond that percentile.
- The use of a one day time horizon will not fully capture the profit and loss implications of positions that cannot be liquidated or hedged within one day.
- The Group computes the VaR of trading portfolios at the close of business. Positions may change substantially during the course of the trading day and intra-day profits and losses will be incurred.

These limitations mean that the Group cannot guarantee that profits or losses will not exceed the VaR.

Risk and balance sheet management (continued)

Market risk: GBM traded revenue

Note:

- (1) The effect of any month end adjustments, not attributable to a specific daily market move, is spread evenly over the days in the month in question.

Key points

- The average daily revenue earned from GBM's trading, balance sheet management and other trading activities in Q1 2011 was £33.9 million, compared with £15.5 million in Q4 2010 and £39.7 million in Q1 2010. The standard deviation of these daily revenues was £19.9 million in Q1 2011, compared with £20.7 million in Q4 2010 and £19.7 million in Q1 2010. The standard deviation measures the variation of daily revenues about the mean value of those revenues.
- An analysis of the frequency distribution of daily revenue shows that there were two days with negative revenue during Q1 2011, compared with eleven days in Q4 2010 and no days in Q1 2010. The most frequent result in Q1 2011 is a daily revenue of between £25 million and £30 million with ten occurrences compared with five occurrences in Q4 2010 and six occurrences during Q1 2010.

Risk and balance sheet management (continued)

Market risk (continued)

The table below details VaR for the Group's trading portfolio, segregated by type of market risk exposure, and between Core and Non-Core, Counterparty Exposure Management (CEM) and Core excluding CEM.

| Trading VaR | 31 March 2011 | | | | Quarter ended 31 December 2010 | | | | 31 March 2010 | | | |
|--------------------------|---------------|--------------|--------------|--------------|-----------------------------------|--------------|--------------|--------------|---------------|--------------|--------------|--------------|
| | Average | end | Maximum | Minimum | Average | end | Maximum | Minimum | Average | end | Maximum | Minimum |

| Non-Core | 113.9 | 109.4 | 128.6 | 104.1 | 105.5 | 101.4 | 119.7 | 92.3 | 84.6 | 87.1 | 98.8 | 98.8 |

Key points

- The credit spread VaR for Q1 2011 was lower than Q1 2010 primarily due to the exceptional volatility of the market data from the period of the financial crisis dropping out of the 500 days of time series data used in the VaR calculation. Credit spread VaR also reduced as the quality of the market data time series used in the ABS Mortgage Trading business was improved, moving from interpolated weekly data to daily observed time series. This change has improved the accuracy of the correlation between the different time series in the daily data. Additionally, the basis modelling between the cash and derivatives has been refined by introducing additional time series for the subprime and subordinated residential bonds, reducing the over-reliance on the commercial mortgage basis which was used as a conservative proxy.
- CEM trading VaR reduced during Q1 2011 due to lower volatility combined with reduced exposures.
- Non-Core VaR was slightly higher in Q1 2011 than for Q4 2010 due to increases in the market value of the exposures within the Structured Credit Portfolio (SCP) trading book, as credit indices continued to rally over the quarter.
- The commodity VaR in Q1 2011 has reduced to a minimal level when compared with 2010 due to the sale of the Group's interest in the RBS Sempra Commodities joint venture.

Risk and balance sheet management (continued)

Market risk (continued)

The table below details VaR for the Group's non-trading portfolio, excluding the SCP and loans and receivables (LAR), segregated by type of market risk exposure and between Core and Non-Core.

| | 31 March 2011 | | | | Quarter ended 31 December 2010 | | | | 31 March 2010 | |
|--------------------|---------------|------------|---------|---------|-----------------------------------|------------|---------|---------|---------------|------------|
| | Average | Period end | Maximum | Minimum | Average | Period end | Maximum | Minimum | Average | Period end |
| Non-trading VaR | £m | £m | £m | £m | £m | £m | £m | £m | £m | £m |
| Interest rate | 7.8 | 7.0 | 10.8 | 6.5 | 8.0 | 10.4 | 10.8 | 5.3 | 10.1 | 10.4 |
| Credit spread | 23.8 | 22.5 | 39.3 | 14.2 | 17.0 | 16.1 | 21.8 | 15.4 | 55.1 | 40.2 |
| Currency | 0.6 | 0.6 | 1.8 | 0.1 | 2.3 | 3.0 | 3.7 | 1.3 | 1.4 | 0.9 |
| Equity | 2.5 | 2.3 | 3.1 | 2.2 | 2.9 | 3.1 | 4.6 | 0.3 | 1.2 | 0.3 |
| Diversification | | (5.4) | | | | (15.9) | | | | (15.0) |
| Total | 26.5 | 27.0 | 41.6 | 13.4 | 16.2 | 16.7 | 21.3 | 13.7 | 52.0 | 36.8 |
| Core | 25.5 | 26.1 | 38.9 | 13.5 | 15.6 | 15.6 | 21.3 | 12.8 | 51.5 | 36.5 |
| Non-Core | 2.6 | 2.4 | 3.4 | 2.2 | 2.8 | 2.8 | 4.1 | 0.2 | 1.4 | 0.3 |

Note:

(1) Revised to exclude SCP and LAR portfolios, implemented in Q2 2010 and Q4 2010 respectively.

Key points

- The general increase in total, Core and credit spread VaR is primarily due to a change in the time series used for the Dutch RMBS portfolio in RBS N.V. as more relevant and granular market data became available.
- The total VaR at 31 March 2011 is lower than at 31 March 2010, due primarily to the disposal of a large portfolio of illiquid available-for-sale securities during 2010, and also due to the exceptional volatility of the market data from the period of the financial crisis dropping out of the 500 days of time series data used in the VaR calculation, which in particular impacted the credit spread VaR.

| | 611 | 1,189 | 959 | 1,337 | 4,096 | 344 | 992 | 673 | 1,075 | 3,084 |

Note:

(1) Mortgage-backed securities (MBS) include sub-prime residential mortgage-backed securities with a notional amount of £455 million (31 December 2010 - £471 million) and a fair value of £330 million (31 December 2010 - £329 million), all with residual maturities of greater than 10 years.

The SCP is within Non-Core. The risk on this portfolio is not measured or disclosed using VaR, as the Group believes this is not an appropriate tool for the banking book portfolio comprising illiquid debt securities. The main driver of the reduction in drawn notional is the depreciation of the US dollar and the amortisation of assets.

Additional information

Selected financial data

The dollar financial information included below has been translated for convenience at a rate of £1.00 to US\$1.6048, being the Noon Buying Rate on 31 March 2010.

Capitalisation of the Group

The following table shows the Group's issued and fully paid share capital, owners' equity and indebtedness on an unaudited consolidated basis in accordance with IFRS as at 31 March 2011.

| | As at 31 March 2011 £m |
|--|---------------------------------|
| Share capital - allotted, called up and fully paid | |
| Ordinary shares of 25p | 14,645 |
| B shares of £0.01 | 510 |
| Dividend access share of £0.01 | - |
| Non-cumulative preference shares of US\$0.01 | 1 |
| Non-cumulative preference shares of €0.01 | - |
| Non-cumulative preference shares of £1.00 | - |
| | 15,156 |
| Retained income and other reserves | 58,920 |
| Owners' equity | 74,076 |
| Group indebtedness | |
| Subordinated liabilities | 26,515 |
| Debt securities in issue | 215,968 |
| Total indebtedness | 242,483 |
| Total capitalisation and indebtedness | 316,559 |

Under IFRS, certain preference shares are classified as debt and are included in subordinated liabilities in the table above.

Issuances of debt securities net of maturities in the period since 31 March 2011 totalled £3.6 billion.

Other than as disclosed above, the information contained in the table above has not changed materially since 31 March 2011.

Additional information (continued)

Ratio of earnings to fixed charges

| | Quarter ended 31 March 2011(3) | Year ended 31 December | | | | |
|--|--------------------------------------|------------------------|---------|---------|------|------|
| | | 2010 | 2009(4) | 2008(4) | 2007 | 2006 |
| Ratio of earnings to combined fixed charges and preference share dividends (1,2) | | | | | | |
| - including interest on deposits | 0.95 | 0.94 | 0.75 | -0.05 | 1.45 | 1.62 |
| - excluding interest on deposits | 0.54 | 0.38 | - | - | 5.73 | 6.12 |
| Ratio of earnings to fixed charges only (1,2) | | | | | | |
| - including interest on deposits | 0.95 | 0.95 | 0.80 | -0.05 | 1.47 | 1.64 |
| - excluding interest on deposits | 0.54 | 0.44 | - | - | 6.53 | 6.87 |

Notes:

- (1) For this purpose, earnings consist of income before tax and minority interests, plus fixed charges less the unremitted income of associated undertakings (share of profits less dividends received). Fixed charges consist of total interest expense, including or excluding interest on deposits and debt securities in issue, as appropriate, and the proportion of rental expense deemed representative of the interest factor (one third of total rental expenses).
- (2) The earnings for the quarter ended 31 March 2011 and for the years ended 31 December 2010, 2009 and 2008, were inadequate to cover total fixed charges and preference share dividends. The coverage deficiency for total fixed charges and preference share dividends for the quarter ended 31 March 2011 was £116 million and for the years ended 31 December 2010, 2009 and 2008 was £523 million, £3,582 million and £26,287 million, respectively. The coverage deficiency for fixed charges only for the quarter ended 31 March 2011 was £116 million and for the years ended December 31, 2010, 2009 and 2008 was £399 million, £2,647 million and £25,691 million, respectively.
- (3) Based on unaudited numbers.
- (4) Negative ratios have been excluded.

Appendix 1
Asset Protection Scheme

Appendix 1 Asset Protection Scheme

Covered assets roll forward

The table below shows the movement in covered assets.

| | Covered amount £bn |
|--|--------------------------|
| Covered assets at 30 September 2010 | 205.4 |
| Disposals | (3.0) |
| Maturities, amortisation and early repayments | (8.3) |
| Effect of foreign currency movements and other adjustments | 0.6 |
| Covered assets at 31 December 2010 | 194.7 |
| Disposals | (1.4) |
| Maturities, amortisation and early repayments | (10.6) |
| Effect of foreign currency movements and other adjustments | (0.9) |
| Covered assets at 31 March 2011 | 181.8 |

Key points

- The reduction in covered assets was due to run-off of the portfolio, disposals, early repayments, maturing loans and the amortisation of consumer finance assets in line with the Scheme rules.
- The Group took advantage of market conditions and executed sales from a number of its portfolios.

Credit impairments and write downs

The table below analyses the cumulative credit impairment losses and adjustments to par value (including available-for-sale reserves) relating to the covered assets.

| | 31 March 2011 £m | 31 December 2010 £m |
|--------------------|------------------------|------------------------------|
| Loans and advances | 18,799 | 18,033 |
| Debt securities | 11,085 | 11,747 |
| Derivatives | 1,826 | 2,043 |
| | 31,710 | 31,823 |
| By division: | | |
| UK Retail | 3,053 | 2,964 |
| UK Corporate | 1,703 | 1,382 |
| Ulster Bank | 1,040 | 804 |

| | | |
|--------------------------|--------|--------|
| Retail & Commercial | 5,796 | 5,150 |
| Global Banking & Markets | 1,445 | 1,496 |
| Core | 7,241 | 6,646 |
| Non-Core | 24,469 | 25,177 |
| | 31,710 | 31,823 |

Key point

- Cumulative credit impairments and write-downs decreased by £0.1 billion in the quarter, primarily reflecting a decrease due to exchange rate movements (£0.4 billion) and Non-Core disposals (£0.1 billion) partially offset by an increase in further impairments and write-downs (£0.4 billion).

Appendix 1 Asset Protection Scheme (continued)

First loss utilisation

Definitions of triggered amounts and other related aspects are set out in the Group's 2010 Annual Report and Accounts. The table below summarises the triggered amount and related cash recoveries by division.

| | 31 March 2011 | | | 31 December 2010 | | |
|--------------------------|-----------------------------|---------|------------------|-----------------------------|---------|------------------|
| | Cash | | Net | Cash | | Net |
| | Triggered recoveries amount | to date | triggered amount | Triggered recoveries amount | to date | triggered amount |
| | £m | £m | £m | £m | £m | £m |
| UK Retail | 3,789 | 514 | 3,275 | 3,675 | 455 | 3,220 |
| UK Corporate | 5,573 | 1,404 | 4,169 | 4,640 | 1,115 | 3,525 |
| Ulster Bank | 1,659 | 216 | 1,443 | 1,500 | 160 | 1,340 |
| Retail & Commercial | 11,021 | 2,134 | 8,887 | 9,815 | 1,730 | 8,085 |
| Global Banking & Markets | 2,692 | 808 | 1,884 | 2,547 | 749 | 1,798 |
| Core | 13,713 | 2,942 | 10,771 | 12,362 | 2,479 | 9,883 |
| Non-Core | 31,991 | 5,269 | 26,722 | 32,138 | 4,544 | 27,594 |
| | 45,704 | 8,211 | 37,493 | 44,500 | 7,023 | 37,477 |
| Loss credits | | | 1,468 | | | 1,241 |
| | | | 38,961 | | | 38,718 |

Key points

- The Group received loss credits in relation to some of the withdrawals and disposals of £0.2 billion during Q1 2011. The Group and the Asset Protection Agency remain in discussion with regard to loss credits in relation to the withdrawal of £0.5 billion of derivative assets during Q2 2010 and the disposal of £0.6 billion of structured finance and leveraged finance assets.
- The Group currently expects recoveries on triggered amounts to be approximately 45% over the life of the relevant assets. On this basis, the expected loss on triggered assets at 31 March 2011 is approximately £25 billion (42%) of the £60 billion first loss threshold under APS.

Risk-weighted assets

The table below analyses by division, risk-weighted assets (RWAs) covered by APS.

| | |
|----------|----------|
| 31 March | 31 |
| 2011 | December |

| | £bn | 2010 £bn |
|--------------------------|------|-------------|
| UK Retail | 11.4 | 12.4 |
| UK Corporate | 21.5 | 22.9 |
| Ulster Bank | 7.4 | 7.9 |
| Retail & Commercial | 40.3 | 43.2 |
| Global Banking & Markets | 11.1 | 11.5 |
| Core | 51.4 | 54.7 |
| Non-Core | 47.0 | 50.9 |
| APS RWAs | 98.4 | 105.6 |

Key point

- The decrease of £7.2 billion in APS RWAs principally reflects pool movements, partially offset by changes in risk parameters.

Appendix 2
Businesses outlined for
disposal

Appendix 2 Businesses outlined for disposal

To comply with EC State Aid requirements the Group agreed to make a series of divestments by the end of 2013: the sale of RBS Insurance, Global Merchant Services and its interest in RBS Sempra Commodities JV. The Group also agreed to dispose of its RBS England and Wales and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK ('UK branch-based businesses'). The disposals of Global Merchant Services and RBS Sempra Commodities JV businesses have now effectively been completed.

On 4 August 2010, the Group announced its agreement to sell 318 branches and associated assets and liabilities to Santander UK plc for a premium of £350 million to net assets at closing. The consideration will be paid in cash and is subject to certain closing adjustments. The transaction includes 311 Royal Bank of Scotland branches in England and Wales; seven NatWest branches in Scotland; the retail and SME customer accounts attached to these branches; the Direct SME business; and certain mid-corporate businesses. EC/UK merger control and HMRC clearances were received during Q4 2010. The separation and transfer process is underway, and a joint transition plan is being developed.

Preparations for the disposal of RBS Insurance, by way of a trade sale or public flotation targeted for the second half of 2012, continue. External advisors were appointed during Q4 2010 and the process of separation is proceeding on plan. However, the business continues to be managed and reported as a separate core division.

The table below shows Total income and Operating profit of RBS Insurance, and the UK branch-based businesses.

| | Total income | | Operating profit/(loss) before impairments | | Operating profit/(loss) | |
|--------------------------------|--------------|---------|--|---------|-------------------------|---------|
| | Q1 2011 | FY 2010 | Q1 2011 | FY 2010 | Q1 2011 | FY 2010 |
| | £m | £m | £m | £m | £m | £m |
| RBS Insurance (1) | 1,070 | 4,369 | 67 | (295) | 67 | (295) |
| UK branch-based businesses (2) | 241 | 902 | 128 | 439 | 129 | 160 |
| Total | 1,311 | 5,271 | 195 | 144 | 196 | (135) |

The table below shows the estimated risk-weighted assets, total assets and capital of the businesses identified for disposal.

| | RWAs | | Total assets | | Capital | |
|--------------------------------|----------|-------------|--------------|-------------|----------|-------------|
| | 31 March | 31 December | 31 March | 31 December | 31 March | 31 December |
| | 2011 | 2010 | 2011 | 2010 | 2011 | 2010 |
| | £bn | £bn | £bn | £bn | £bn | £bn |
| RBS Insurance (1) | n/m | n/m | 12.5 | 12.4 | 4.0 | 4.0 |
| UK branch-based businesses (2) | 11.5 | 13.2 | 19.9 | 19.9 | 1.0 | 1.2 |
| Total | 11.5 | 13.2 | 32.4 | 32.3 | 5.0 | 5.2 |

Notes:
