IMPORTANT INFORMATION: The Royal Bank of Scotland plc ("RBS plc") and The Royal Bank of Scotland Group plc ("RBS Group") (collectively, the "RBS Entities") have filed a registration statement (including a prospectus) with the Securities and Exchange Commission (SEC) for the offering of RBS ETNs to which this communication may relate. Before you invest in any RBS ETNs, you should read the relevant prospectus in such registration statement and other documents that have been filed with the SEC for more complete information about the relevant RBS Entities and offerings. You may get these documents for free by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, RBS plc, RBS Securities Inc. or any dealer participating in the relevant offering will arrange to send you the relevant prospectus and pricing supplements if you request by calling 1-855-RBS-ETPS (toll-free).

The RBS ETNs are complex and not suitable for all investors. You should carefully read the relevant pricing supplement and prospectus, including the more detailed explanation of the risks involved in any investment in the RBS ETNs as described in the 'Risk Factors' section of the pricing supplement, before investing.

**The pricing supplements, including a description of the applicable index methodology, can be found here: www.rbs.com/etnus and we can provide them to you upon request. The RBS ETNs are relatively new products and any performance prior to the live date of the index which the RBS ETN tracks is hypothetical and does not reflect actual returns. No actual investment which allowed tracking of the performance of any RBS index was possible before its live date. The retrospectively calculated index performance contained herein is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected its performance, and cannot account for all financial risk that may affect the actual performance of the RBS ETNs. The actual performance of the RBS ETNs may vary significantly from the retrospectively calculated index performance data contained herein. Neither the retrospectively calculated nor the historical index performance should be taken as any indication of future performance of any index or any related RBS ETNs. An investment in the RBS ETNs involves significant risks. The applicable pricing supplement and prospectus for the RBS ETNs will describe material risks related to an investment in RBS ETNs. These risks include the following:

RISK CONSIDERATIONS

Credit risk of the issuer and guarantor

RBS ETNs are unsecured and unsubordinated obligations of RBS plc and are fully and unconditionally guaranteed by RBS Group(1). If RBS plc fails to make any required payments on the RBS ETNs, your receipt of such payment will depend on the ability of RBS Group to pay its obligations as they become due.

In addition, unlike ordinary debt securities, the RBS ETNs are not principal protected and do not pay interest. The RBS ETNs are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other government agency.

Market risk

The return on an RBS ETN will depend on the performance of the underlying market measure(s) to which the RBS ETNs is linked. You may lose all or a significant amount of your investment in the RBS ETNs if the level(s) of the underlying market measure(s) were to decrease substantially.

Investor fees

The daily redemption value is the amount payable at maturity or upon early repurchase or redemption of your RBS ETNs and is reduced by the aggregate

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

investor fee applicable to your RBS ETNs. As a result, the level of the underlying market measure(s) to which your RBS ETNs are linked must increase by an amount sufficient to offset the aggregate investor fee in order for you to receive at least the face amount of your investment at maturity or upon early repurchase or redemption. If the level(s) of the underlying market measure(s) were to decrease or not increase sufficiently, you would receive less, and possibly significantly less, than your initial investment at maturity or upon early repurchase or redemption.

Liquidity risk

Even though RBS ETNs are expected to be listed on a US securities exchange, there is no guarantee that the listing will be maintained or that a secondary market will develop. The liquidity of the RBS ETNs may therefore be limited and/or vary over time. RBS plc is not required to maintain any listing of RBS ETNs on any securities exchange.

Restrictions on your ability to offer RBS ETNs for repurchase by RBS plc. Through your broker, you may offer RBS ETNs for repurchase by RBS plc subject to certain restrictions and procedures described in the applicable pricing supplement.

Call risk

RBS plc also has the right to redeem your RBS ETNs, in its sole discretion. If RBS plc elects to redeem your RBS ETNs, you may not be able to reinvest your proceeds in a comparable investment. Pursuant to our announced plan to exit the structured retail investor products business, the likelihood that we will redeem the ETNs prior to maturity has increased. See "Recent Developments" for more information.

RECENT DEVELOPMENTS

On June 13, 2013, we announced that we would be exiting the structured retail investor products business that is responsible for issuing and maintaining the RBS ETNs, and that we expect to move such business into a runoff organization which will go through a process of restructuring and / or business sales (the "RBS Retail Investor Products Exit Plan"). The implementation of the RBS Retail Investor Products Exit Plan increases the likelihood that the RBS ETNs will be redeemed by us prior to maturity. We plan to continue to maintain and issue the RBS ETNs, but our plans could change. We cannot give you any assurances as to any minimum period of time that you may hold the RBS ETNs before we redeem them at our option.

DEFINITIONS OF CERTAIN DEFINED TERMS USED HEREIN

Annualized Average represents the calculated hypothetical rate of return that, if cumulatively applied to each relevant annual period during the time period indicated, would result in the actual cumulative rate of return for the entire period.

Maximum Drawdown represents the maximum percentage loss that the relevant index incurred from its peak level to its lowest level during the time period indicated. Maximum Performance represents the highest one-year returns, as measured from 12/31 to 12/31 of each year during the period indicated.

Minimum Performance represents the lowest one-year returns, as measured from 12/31 to 12/31 of each year during the period indicated.

5-Year Volatility: Based on monthly returns over the last five years unless stated otherwise (from most recent date indicated on slide) and expressed as standard deviation percentage. Standard deviation is a measure of volatility, and illustrates the extent of variation (whether higher or lower) that exists from the average given set of results. A low standard deviation indicates that the results tend to be very close to the average result (a low degree of volatility). In contrast, a high standard deviation indicates that the results are spread out over a large range of outcomes (a high degree of volatility). Because the standard deviation is based on historical data, it may not predict variability in annualized performance of the RBS ETNs in the future.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

(1) Certain RBS ETNs were originally issued by The Royal Bank of Scotland N.V. ("RBS N.V."); however, as of December 10, 2012, RBS plc assumed the obligations of RBS N.V. under those RBS ETNs and became the issuer of them.

Our trend-following strategies:

[] Track the return of a specific benchmark index or cash rate

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

[] Use a 100- or 200-Index business day simple moving average

[] Use a 3- or 5-Index business day period for trend confirmation

This graph illustrates the Trendpilot[] methodology based on hypothetical movements in a Benchmark Index and its 100- or 200-Index business day simple moving average. This slide does not demonstrate historical data, and is not an indication of how any Index or Trendpilot[] methodology will perform in the future. If neither of the conditions mentioned in the graph is satisfied, the trend of the Benchmark Index will be the same as the trend of the Benchmark Index on the immediately preceding Index business day. The Index will implement any trend reversal at the open of trading on the second Index business day immediately following the Index business day on which the Benchmark Index trend switches from positive to negative or from negative to positive, as the case may be.

(1) Determined as of the most recent weekly auction.

(2) With respect to RBS Trendpilot[] ETNs, the fees are either 1.10% or 1.00% per annum (as set forth above) when tracking the Benchmark Index, and 0.50% per annum when tracking the Cash Rate.

A negative trend is established:

The Index will track the Cash Rate

If the closing level of the relevant Benchmark Index is below its historical 100- or 200-Index business day simple moving average for three or five consecutive Index business days, as applicable

Hypothetical 100- or 200-Index Business Day Moving Average

Level of Hypothetical Benchmark Index

A positive trend is established:

The Index will track the relevant Benchmark Index

If the closing level of the relevant Benchmark Index is at or above its historical 100- or 200-Index business day simple moving average for three or five consecutive Index business days, as applicable

FOR MORE INFORMATION PLEASE SEE THE RBS US LARGE CAP TRENDPILOT[] PRICING SUPPLEMENT. Source: Bloomberg. The above, with respect to the RBS US Large Cap Trendpilot[] Index, reflects the deduction of the annual investor fee for the RBS US Large Cap Trendpilot[] ETNs, which is equal to 1.00% per annum when the RBS US Large Cap Trendpilot[] Index tracks the SandP 500 [R] Total Return Index and 0.50% per annum when the RBS US Large Cap Trendpilot[] Index[] tracks the Cash Rate. The RBS US Large Cap Trendpilot[] Index was created on November 16, 2010. Therefore, the graph reflects actual RBS US Large Cap Trendpilot[] Index performance from November 16, 2010 through December 31, 2013 and reflects a retrospectively calculated RBS US Large Cap Trendpilot[] Index performance from May 22, 1991 through November 15, 2010 which is based on the index methodology published by the index sponsor and described in the applicable pricing supplement. See also Slide 1 **.

PAST PERFORMANCE (WHETHER RETROSPECTIVELY CALCULATED OR ACTUAL HISTORICAL) IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST DIRECTLY IN AN INDEX.

RBS US Large Cap Trendpilot[] Index

Index Returns: 1-, 5- and 10-Year Annualized Rolling Returns as of December 31, 2013

1-Year

Annual Returns (Dec. 31, 1993 - Dec. 31, 2013)

5-Year

Annualized Returns (Dec. 31, 1997 - Dec. 31, 2013)

10-Year

Annualized Returns (Dec. 31, 2002 - Dec. 31, 2013)

Source: Bloomberg. The graphs, with respect to the RBS US Large Cap Trendpilot[] Index, reflect the deduction of the annual investor fee for the RBS US Large Cap Trendpilot[] ETNs, which is equal to 1.00% per annum when the RBS US Large Cap Trendpilot[] Index tracks the SandP 500[R] Total Return Index and 0.50% per annum when the RBS US Large Cap Trendpilot[] Index[] tracks the Cash Rate.

The 1-year Annual Returns above illustrate the retrospectively calculated annual returns (and historical annual returns for the annual periods after the index live date) of the RBS US Large Cap Trendpilot[] Index less investor fees, and historical returns of the SandP 500[R] Total Return Index for the period presented. Annualized Returns in the graphs above illustrate the geometric average annualized return of each of the RBS US Large Cap Trendpilot[] Index and the SandP 500[R] Total Return Index, based on the cumulative returns of the applicable index over the relevant period. Geometric average annualized return is the calculated hypothetical rate of return that, if cumulatively applied to each relevant annual period would result in the actual cumulative rate of return for the entire 5- or 10-year period, as applicable. For example in the 5-Year graph, 12/31/13 data reflects the annual return required to be received in each annual period from 12/31/08 - 12/31/13 in order to provide the total return that hypothetically could have resulted from an investment bought on 12/31/08 and sold on 12/31/13, assuming annual compounding. Please note that because the RBS US Large Cap Trendpilot[] Index did not exist until 11/16/2010, an investment in such Index was not possible prior to that date. The SandP 500[R] data presented above is based on actual historical returns. See also Slide 1 **.

PAST PERFORMANCE (WHETHER RETROSPECTIVELY CALCULATED OR ACTUAL HISTORICAL) IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST DIRECTLY IN AN INDEX.

FOR MORE INFORMATION PLEASE SEE THE RBS NASDAQ-100 TRENDPILOT[] PRICING SUPPLEMENT OR RBS CHINA TRENDPILOT[] PRICING SUPPLEMENT, AS APPROPRIATE. Source: Bloomberg. The above, with respect to the RBS NASDAQ-100 Trendpilot[] Index and the RBS China Trendpilot[] Index, reflects the deduction of the annual investor fee for the related RBS ETNs which is equal to 1.00% or 1.10%, respectively, per annum when the RBS NASDAQ -100[R] Trendpilot[] ETN and RBS China Trendpilot[] ETN track, respectively, the NASDAQ-100[R] Total Return Index(SM) and BNY Mellon China Select ADR Total Return Index(SM), and 0.50% per annum when such ETNs track the Cash Rate. The RBS NASDAQ-100[R] Trendpilot[] Index (USD) was created on November 28, 2011. Therefore, the graph reflects the actual RBS NASDAQ-100[R] Trendpilot[] Index performance from November 28, 2011 through December 31, 2013 and reflects the retrospectively calculated RBS NASDAQ-100[R] Trendpilot[] Index performance from July 27, 1999 through November 27, 2011, based on the index methodology published by the index sponsor and described in the applicable pricing supplement. The RBS China Trendpilot[] Index (USD) (the "Index") was created on February 27, 2012. Therefore, for that Index, the graph reflects the actual Index closing levels from February 27, 2012 through December 31, 2013 and reflects the retrospectively calculated Index performance from September 10, 2002 through February 26, 2012, based on the index methodology published by the index sponsor and described in the applicable pricing supplement. The graph starts at September 10, 2002 because that was the inception date for the BNY Mellon China Select ADR Total Return Index(SM). See also Slide 1 **.

PAST PERFORMANCE (WHETHER RETROSPECTIVELY CALCULATED OR ACTUAL HISTORICAL) IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST IN AN INDEX.

FOR MORE INFORMATION PLEASE SEE THE RBS GOLD TRENDPILOT[] PRICING SUPPLEMENT OR RBS OIL TRENDPILOT[] PRICING SUPPLEMENT, AS APPROPRIATE. Source: Bloomberg. The above, with respect to the RBS Gold Trendpilot[] Index and the RBS Oil Trendpilot[] Index, reflects the deduction of the annual investor fee for the related RBS ETNs, which is equal to 1.00% or 1.10%, respectively, per annum when the RBS Gold Trendpilot[] ETN and RBS Oil Trendpilot[] ETN track, respectively, the Price of Gold Bullion and RBS 12-Month Oil Total Return Index, and 0.50% per annum when such ETNs track the Cash Rate. The RBS Gold Trendpilot[] Index (USD) was created on January 24, 2011. Therefore, the graph reflects the actual RBS Gold Trendpilot[] Index performance from January 24, 2011 through December 31, 2013 and reflects the retrospectively calculated RBS Gold Trendpilot[] Index performance from October 20, 1975 through January 23, 2011, based on the index methodology published by the index sponsor and described in the applicable pricing supplement. The RBS Oil Trendpilot[] Index (USD) (the "Index") was created on September 13, 2011. Therefore, the graph reflects the actual Index closing levels from September 13, 2011 through December 31, 2013 and reflects the retrospectively calculated Index performance from July 13, 1989 through September 12, 2011, based on the index methodology published by the index sponsor and described in the applicable pricing supplement. Similarly, the RBS 12-Month Oil Total Return Index was created on September 8, 2011. Therefore, for the RBS 12-Month Oil Total Return Index, the graph above reflects the actual RBS 12-Month Oil Total Return Index closing levels from September 8, 2011 through December 31, 2013 and reflects the retrospectively calculated RBS 12-Month Oil Total Return Index performance from July 13, 1989 through September 7, 2011, based on the index methodology published by the index sponsor and described in the applicable pricing supplement. Features and Benefits: Simple

- Broad index provides exposure to 36 different commodities
- Sector indices for targeted exposure
- Trades daily
- Highly liquid

Enhanced Design

- Reset to target weights annually based on expected economic global demand
- Rebalances semi-annually
- Roll-strategy

Expected U. S. Federal Income Tax Treatment

- Holders of these ETNs should, assuming they are treated for U. S. federal income tax purposes as prepaid financial contracts, generally not be required to include amounts in income prior to sale, redemption or maturity.

IRS and U. S. Treasury are actively considering the tax treatment of instruments such as these ETNs, which could change. See the pricing supplement for more information.

Low Cost

- Annual investor fee of 95 basis points

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

Determining the rollover calendar for individual commodities(1):

All available futures contracts

Filtering criteria applied based on seasonal patterns and cycles
(only for energy and grains)

Liquidity
(except for precious metals, rubber and palm oil)

Contracts are selected according to the individual rollover calendar for each commodity. Rollover based on liquidity and futures curves.
(term structure)

(1)Target weights determined annually in February

| RICI Enhanced(SM) Agriculture Total Return Index | 10/31/08 | -14.28 | -7.12 | 2.7 |
| RICI Enhanced(SM) Precious Metals Total Return Index | 10/31/08 | -25.85 | -8.28 | 12.1 |
| RICI Enhanced(SM) Industrial Metals Total Return Index | 10/31/08 | -12.27 | -9.29 | 2.6 |

The table above presents the actual performance of the RBS ETNs and the indices, over the specified periods, in each case, less investor fees of 0.95% per annum.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST DIRECTLY IN AN INDEX.

CERTAIN RISK CONSIDERATIONS: The RBS ETNs involve risks not associated with an investment in conventional debt securities, including a possible loss of some or all of your investment. The level of the relevant Index must increase by an amount sufficient to offset the aggregate investor fee applicable to the RBS ETNs in order for you to receive at least the principal amount of your investment back at maturity or upon early repurchase or redemption. The RBS Oil Trendpilot(TM) ETNs, the RBS Rogers Enhanced ETNs and the respective indices that those ETNs track do not provide exposure to spot prices of the relevant commodities and, consequently, may not be representative of an investment that provides exposure to the relevant commodities or buying and holding the relevant commodities. The prices of commodities are volatile and are affected by numerous factors. Each Trendpilot[] Index may underperform its respective Benchmark Index, and is expected to perform poorly in volatile markets. The RBS China Trendpilot[] ETNs involve risks associated with an investment in emerging markets, as well as currency exchange risk. The RBS US Large Cap Alternator Index(TM) may underperform the SandP 500[R] Index or any Underlying Index. Even though the RBS ETNs are listed on the NYSE Arca, a trading market may not develop and the liquidity of the RBS ETNs may be limited and/or vary over time, as RBS plc is not required to maintain any listing of the RBS ETNs. The intraday indicative value and the daily redemption value are not the same as the trading price or market price of the RBS ETNs in the secondary market. The RBS ETNs are not principal protected and do not pay interest. Any payment on the RBS ETNs is subject to the ability of RBS plc and RBS Group to pay their respective obligations when they become due. You should carefully consider whether the RBS ETNs are suited to your particular circumstances before you decide to purchase them. We urge you to consult with your investment, legal, accounting, tax and other advisors with respect to any investment in the RBS ETNs.

The RBS ETNs are complex and not suitable for all investors. You should carefully read the relevant pricing supplement and prospectus, including the more detailed explanation of the risks involved in any investment in the RBS ETNs as described in the "Risk Factors" section of the applicable pricing supplement, before investing. The intraday indicative value and the daily redemption value are not the same as the trading price or market price of the RBS ETNs in the secondary market.

IMPORTANT INFORMATION: The Royal Bank of Scotland plc (RBS plc) and The Royal Bank of Scotland Group plc (RBS Group) have filed a registration statement (including a prospectus) with the U.S. Securities and Exchange Commission (SEC) for the offering of RBS ETNs to which this communication relates. Before you invest in any RBS ETNs, you should read the prospectus in that registration statement and other documents that have been filed by RBS plc and RBS Group with the SEC for more complete information about RBS plc and RBS Group, and the offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, RBS plc, RBS Securities Inc. (RBSSI) or any dealer participating in the offering will arrange to send you the prospectus and the pricing supplement at no charge if you request it by calling 1-855-RBS-ETPS (toll-free).

RBS China Trendpilot(TM) Index, RBS US Large Cap Trendpilot(TM) Index (USD), RBS US Mid Cap Trendpilot(TM) Index (USD), RBS Gold Trendpilot(TM) Index (USD) and RBS US Large Cap Alternator(TM) Index (USD) are the property of RBS plc, which has contracted with SandP Opco, LLC (a subsidiary of SandP Dow Jones Indices LLC) ("SandP Dow Jones Indices") to maintain and calculate these indices.
