Semi-Annual Report June 30, 2010

Nuveen Diversified Dividend and Income Fund JDD

#### NUVEEN INVESTMENTS ANNOUNCES STRATEGIC COMBINATION WITH FAF ADVISORS

On July 29, 2010, Nuveen Investments, Inc. announced that U.S. Bancorp will receive a 9.5% stake in Nuveen Investments and cash consideration in exchange for the long-term asset business of U.S. Bancorp s FAF Advisors (FAF). Nuveen Investments is the parent of Nuveen Asset Management (NAM), the investment adviser for the Funds included in this report.

FAF Advisors, which currently manages about \$25 billion of long-term assets and serves as the advisor of the First American Funds, will be combined with NAM, which currently manages about \$75 billion in municipal fixed income assets. Upon completion of the transaction, Nuveen Investments, which currently manages about \$150 billion of assets across several high-quality affiliates, will manage a combined total of about \$175 billion in institutional and retail assets.

This combination will not affect the investment objectives, strategies or policies of this Fund. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors, Winslow Capital and Nuveen HydePark.

The transaction is expected to close late in 2010, subject to customary conditions.

Chairman s Letter to Shareholders

#### Dear Shareholder,

The economic environment in which your Fund operates reflects continuing but uneven economic recovery. The U.S. and other major industrial countries are experiencing steady but comparatively low levels of economic growth, while emerging market countries are seeing a resumption of relatively strong economic expansion. The potential impact of steps being considered by many governments to counteract the extraordinary governmental spending and credit expansion to deal with the recent financial and economic crisis is injecting uncertainty into global financial markets. The implications for future tax rates, government spending, interest rates and the pace of economic recovery in the U.S. and other leading economies are extremely difficult to predict at the present time. The long term health of the global economy depends on restoring some measure of fiscal discipline around the world, but since all of the corrective steps require economic pain, it is not surprising that governments are reluctant to undertake them.

In the near term, governments remain committed to furthering economic recovery and realizing a meaningful reduction in their national unemployment rates. Such an environment should produce continued economic growth and, consequently, attractive investment opportunities. Over the longer term, the larger uncertainty mentioned earlier carries the risk of unexpected potholes in the road to sustained recovery. For this reason, Nuveen s investment management teams are working hard to balance return and risk by building well-diversified portfolios, among other strategies. I encourage you to read the following commentary on the management of your Fund. As always, I also encourage you to contact your financial consultant if you have any questions about your Nuveen Fund investment. Please consult the Nuveen website for the most recent information on your Nuveen Fund at: www.nuveen.com.

On behalf of the other members of your Fund s Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely, Robert P. Bremner Chairman of the Board August 17, 2010

Portfolio Managers Comments

Nuveen Diversified Dividend and Income Fund (JDD)

JDD features portfolio management by teams at four separate sub-advisers.

NWQ Investment Management Company, LLC, an affiliate of Nuveen Investments, invests its portion of the Fund s assets primarily in dividend-paying common stocks. Jon Bosse, Chief Investment Officer of NWQ, leads the Fund s management team at that firm. He has more than 27 years of corporate finance and investment management experience.

The real estate portion of the Fund s investment portfolio is managed by a team at Security Capital Research & Management Incorporated, a wholly-owned subsidiary of JPMorgan Chase & Co. Anthony R. Manno Jr., Kenneth D. Statz and Kevin Bedell, who each have more than 20 of years experience in managing real estate investments, lead the team.

Symphony Asset Management, LLC, an affiliate of Nuveen Investments, invests its portion of the Fund s assets primarily in senior loans. The Symphony team is led by Gunther Stein, Symphony s Chief Investment Officer. Gunther has more than 20 years of investment management experience.

Wellington Management Company, LLP, invests its portion of the Fund s assets in emerging markets sovereign debt. James W. Valone, who has more than 18 years of investment management experience, heads the team.

Here representatives from NWQ, Security Capital, Symphony and Wellington Management talk about their management strategies and the performance of the Fund for the six-month period ending June 30, 2010.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Fund disclaims any obligation to update publicly or revise any forward-looking statements or views expressed herein.

#### What key strategies were used to manage the Fund over this reporting period?

The Fund s investment objectives are high current income and total return. The Fund seeks to achieve these objectives by investing primarily in 1) U.S. and foreign dividend-paying common stocks, 2) dividend-paying common stocks issued by real estate companies, 3) senior secured loans, and 4) emerging markets sovereign debt. Under normal circumstances, the Fund s target weighting is approximately 50% equity and 50% debt.

For the dividend-paying equity portion of the Fund s portfolio managed by NWQ, we continued to employ an opportunistic, bottom-up strategy that focused on identifying undervalued companies possessing favorable risk/reward characteristics as well as emerging catalysts that can unlock value or improve profitability. These catalysts included

management changes, restructuring efforts, recognition of hidden assets, or a positive change in the underlying fundamentals. We also focused on downside protection, and paid a great deal of attention to a company s balance sheet and cash flow statement, not just the income statement. We believed that cash flow analysis offered a more objective and truer picture of a company s financial position than an evaluation based on earnings alone.

Coming into this period, we had expected to profit significantly from recapitalization opportunities that began to develop over the course of 2009. However, the magnitude of the increase in the equity markets, particularly in most finance stocks from March to mid-May, made further investments in these shares much less attractive. Prior to the spring 2010 rally, the market viewed any company needing capital as almost un-investable. We saw this disconnect as an opportunity that we could turn to our advantage. In fact, the finance sector has been among the poorest performing groups since the initial rally in the spring of 2009, with many companies—shares trading below the prices of their secondary offerings. We opportunistically made several investments in financial companies in the second half of 2009, and adjusted our position in 2010 as these stocks reached our targets or circumstances changed.

We also continued to benefit from a change in the Fund s investment policies. In February 2009, the Fund s Board approved allowing NWQ to invest up to 5% of its portion of the Fund s assets in emerging market equity securities. Shortly before, several Fund holdings had been reclassified as emerging market securities, and this change allowed the Fund to retain these positions.

In managing the real estate portion of the portfolio managed by Security Capital, we sought to maintain significant property type and geographic diversification while taking into account company credit quality, sector, and security-type allocations. Investment decisions were based on a multi-layered analysis of the company, the real estate it owned, its management, and the relative price of the security, with a focus on securities that we believed would be best positioned to generate sustainable income and potential price appreciation over the long run. Across all real estate sectors, we favored companies with properties located in the strongest urban locations. These high barrier to entry markets often have constraints that limit new construction, a quality that we believe over the long-term has the potential to provide superior value enhancement and a real inflation hedge.

In the senior loan and other debt portion of the Fund s portfolio managed by Symphony, we focused on macro, technical and fundamental factors. While the market consensus is that fundamentals will remain stable for the next several quarters, with below-average default rates and some level of growth in the economy, we will continue to look at the whole picture to assess risk. In second half of 2012 and into 2013, the senior loan market will see significant maturities. How companies deal with this wall of maturities will be a function both of the general economic environment as well as company-specific factors. Monitoring both will be critical to navigating the market, which we believe may hold significant value potential for income-seeking investors who are concerned about rising interest rates. Regardless, floating rate senior loans will continue to play a critical role in the credit market as companies look to refinance, de-leverage, or in some cases expand their businesses.

In the emerging market debt portion of the Fund managed by Wellington Management, we the period by increasing our allocation to select lower-quality countries with improving fundamentals and favorable valuations. However, as concerns about European sovereign risk and the sustainability of the global economic recovery heightened, we adopted a more defensive portfolio posture, increasing our cash allocation moderately and emphasizing higher-quality names likely to outperform in a tumultuous environment.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the Performance Overview page in this report.

- 1 Comparative Benchmark performance is a blended return consisting of: 1) 18.75% of the return of the Russell 3000 Value Index, which measures the performance of those Russell 3000 Index companies with lower price-to book ratios and lower forecasted growth values, 2) 6.25% of the return of the MSCI EAFE ex-Japan Value Index, a capitalization weighted index that selects the lower 50% of the price-to-book ranked value stocks traded in the developed markets of Europe, Asia and the Far East, excluding Japan, 3) 25% of the return of the Dow Jones Wilshire Real Estate Securities Index, an unmanaged, market capitalization-weighted index comprised of publicly traded REITs and real estate companies, 4) 25% of the return of the JPMorgan EMBI Global Diversified Index, which tracks total returns for U.S.-dollar-denominated debt instruments issued by emerging markets sovereign and quasi sovereign entities, and 5) 25% of the return of the CSFB Leveraged Loan Index, which consists of approximately \$150 billion of tradable term loans with at least one year to maturity and rated BBB or lower. Benchmark returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in a benchmark.
- 2 The S&P 500 Stock Index is an unmanaged Index generally considered representative of the U.S. Stock Market. Index returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in an index.

#### How did the Fund perform over the six-month period?

The performance of JDD, as well as a comparative benchmark and general market index, is presented in the accompanying table.

#### **Average Annual Total Returns on Common Share Net Asset Value**

For periods ended 6/30/10

|                                    | 6-Month | 1-Year | 5-Year |
|------------------------------------|---------|--------|--------|
| JDD                                | 2.50%   | 34.39% | .57%   |
| Comparative Benchmark <sup>1</sup> | 1.60%   | 26.44% | 3.17%  |
| S&P 500 Stock Index <sup>2</sup>   | -6.65%  | 14.43% | -0.79% |

Six-month returns are cumulative; all other returns are annualized.

For the six-month period ended June 30, 2010, the total return on common share net asset value for the Fund outperformed both its comparative benchmark and the general market index.

Within the dividend-paying equity portion of the Fund, Biovail Corp., a specialty pharmaceutical firm that we added to the portfolio in May, rose sharply as the company agreed to merge with Valeant Pharmaceutical. The deal significantly expands the asset base for Biovail, thus reducing the risk of any single pipeline asset derailing its growth trajectory. Valeant brings with it a strong portfolio of growing pharmaceutical assets with extremely limited patent expiration risk.

Our insurance investments MetLife Inc. and Genworth Financial Inc. also outperformed, although the stocks were pressured late in the period on concerns that increased volatility in the equity markets and the sovereign debt crisis in Europe could have significant negative implications on capital and liquidity ratios.

Gold bullion hit a new nominal high above \$1,250 per ounce during the period, spurred by the sovereign debt crisis and a flight to safety into gold on fears over the future of the European currency. Our gold mining equities benefited from the rising bullion price as well as stable input costs, particularly energy costs, which translated into higher margins.

Negatively impacting performance were our energy investments, which declined given the weak outlook for natural gas, and concerns about increased regulation and the cost of doing business given the tragic accident and oil spill that occurred in the Gulf of Mexico on April 20, 2010. Natural gas prices have been pressured this year due to rising gas rig counts, productivity gains, and a more sluggish recovery in demand than had originally been expected. Our energy investments are levered more towards international oil drilling activity (versus the domestic natural gas markets) where we believe the fundamentals are more attractive. None of our energy investments have a significant presence in the Gulf of Mexico.

Fears of potential pricing pressure in Europe as a result of fiscal tightening weighed on our large cap pharmaceutical investments, an industry we have made significant purchases recently. Large pharmaceutical companies generally operate with healthy margins and it is expected that the European governments will look towards these companies to help offset some of their budget deficits through increased taxes and/or price reductions.

Microsoft Corp. performed poorly in a weak technology sector. Microsoft reported better than expected earnings; however, its shares declined on investor concern that its product cycle may have peaked, removing a catalyst for the upward momentum in the stock price.

Positions added during the period included Occidental Petroleum Corp., one of the largest integrated oil companies in the U.S., Amgen Inc. and Biovail Corp. in the health care sector, Unum Group, the largest writer of disability income products in the U.S. and U.K., and freight railcar manufacturer Trinity Industries Inc.

We eliminated investments in cable operator Comcast Corp., AT&T Inc. and ConocoPhillips, Banco Santander S.A., Energias de Portugal S.A., Northrup Grumman Corp., and Reinsurance Group of America Inc.

In the real estate portion of the Fund, our relatively large exposure to multi-family companies contributed positively to comparative performance. Our research indicated multi-family companies would experience improving fundamentals relative to other property types. Our research was confirmed as management of these companies raised growth estimates early in 2010 as occupancy rates improved earlier than many in the market expected and rents began to recover. On the negative side, the Fund s performance was held back by investments in office and industrial companies.

The senior loan portion of the Fund performed well largely as a result of the higher quality profile of the Fund s senior loan assets. Some of the higher quality names that performed well during the period on a relative basis were Warner Chilcott and Reynolds Brands. Market performance over this period was mixed, with selling pressure focused primarily on higher beta names, which are often lower quality and are debt of companies which were targets of leveraged buyout offers in 2005-2007. We did not believe that these assets represented buying opportunities, and had relatively small amounts invested in these types of positions. However, these higher beta names represented roughly half of the secondary market and were difficult to completely avoid. During the reporting period, our exposure to issuers such as Univision and TXU hindered performance.

In the emerging markets debt portion of the portfolio, country rotation decisions were the primary driver of positive relative results. Security selection also had a modest favorable impact, as did a combination of higher-quality and lower-quality issues. Each of these strategies, guided by our top-down outlook and our bottom-up research, aided results.

Overall, the Fund benefited from its underweight positioning in Hungary and Egypt, because these countries were among the worst performing Index constituents. Favorable security selection in Colombia and Russia also provided a boost to results. A lack of exposure in Bulgaria aided performance, as the debt underperformed during the period.

Conversely, a lack of exposure in Jamaica, a relative outperformer, detracted from relative returns. An overweight allocation and less favorable security selection in Argentina and Ukraine also weighed on results. In addition, less favorable security selection in U.S. dollar-denominated debt in Pakistan hurt on relative returns. An allocation to Croatia, including exposure to a euro-denominated sovereign issue, hindered returns as well.

#### IMPACT OF THE FUND S CAPITAL STRUCTURE LEVERAGE STRATEGY ON PERFORMANCE

One important factor impacting the return of the Fund relative to the comparative benchmark and general market index was the Fund s use of financial leverage, primarily through bank borrowings. The Fund uses leverage because its managers believe that, over time, leveraging provides opportunities for additional income and total returns for

common shareholders. However, use of leverage also can expose common shareholders to additional risk especially when market conditions are unfavorable. For example, as the prices of securities held by the Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of portfolio holdings generally are rising.

Over the course of this period, the use of financial leverage contributed positively to the performance of the Fund.

# RECENT EVENTS CONCERNING THE FUND S REDEMPTION OF AUCTION RATE PREFERRED SHARES

Shortly after its inception, the Fund issued auction rate preferred shares (ARPS) to create financial leverage. As noted in past shareholder reports, the weekly auctions for those ARPS shares began in February 2008 to consistently fail, causing the Fund to pay the so-called maximum rate to ARPS shareholders under the terms of the ARPS in the Fund s charter documents. With the goal of lowering the relative cost of leverage over time for common shareholders and providing liquidity at par for preferred shareholders, the Fund sought to refinance all of its outstanding ARPS beginning shortly thereafter. The Fund completed this refinancing process during 2009 and since then has relied upon bank borrowings to create financial leverage.

In April and May 2010, 30 Nuveen leveraged closed-end funds, including this Fund, received a demand letter from a law firm on behalf of a purported holder of common shares of each fund, alleging that Nuveen and the funds officers and Board of Directors/Trustees breached their fiduciary duties related to the redemption at par of the funds ARPS. In response, the Board established an ad hoc Demand Committee consisting of disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation.

Upon completion of its review, the Demand Committee found that it was not in the best interests of the Fund or its shareholders to take the actions suggested in the demand letters and recommended that the full Board reject the demands made in the demand letter. After reviewing the findings and recommendations of the Demand Committee, the Board of Trustees for the Fund unanimously adopted the Demand Committee s recommendation to reject the demands contained in the letters. At the time this report was produced, lawsuits pursuing claims made in the demand letter had been filed on behalf of shareholders of several funds, including this Fund, against Nuveen Asset Management, the Nuveen holding company, the majority owner of the holding company, the lone interested trustee, and current and former officers of the various funds. Nuveen Investments and the other named defendants believe these lawsuits to be without merit, and all named parties intend to defend themselves vigorously. The Fund believes that these lawsuits will not have a material effect on the Fund or on Nuveen Asset Management s ability to serve as investment adviser to the Fund.

Common Share Distribution and Share Price Information

The following information regarding your Fund s distributions is current as of June 30, 2010, and likely will vary over time based on the Fund s investment activities and portfolio investment value changes.

During the six-month reporting period, the Fund did not make any changes to its quarterly distribution to common shareholders. Some of the important factors affecting the amount and composition of these distributions are summarized below.

The Fund employs financial leverage through the use of bank borrowings. Financial leverage provides the potential for higher earnings (net investment income), total returns and distributions over time, but as noted earlier also increases the variability of common shareholders net asset value per share in response to changing market conditions. During the current reporting period, the Fund s financial leverage contributed positively to common share income and common share net asset value price return.

The Fund has a managed distribution program. The goal of this program is to provide common shareholders with relatively consistent and predictable cash flow by systematically converting the Fund s expected long-term return potential into regular distributions. As a result, regular common share distributions throughout the year are likely to include a portion of expected long-term gains (both realized and unrealized), along with net investment income.

Important points to understand about the managed distribution program are:

The Fund seeks to establish a relatively stable common share distribution rate that roughly corresponds to the projected total return from its investment strategy over an extended period of time. However, you should not draw any conclusions about the Fund s past or future investment performance from its current distribution rate.

Actual common share returns will differ from projected long-term returns (and therefore the Fund s distribution rate), at least over shorter time periods. Over a specific timeframe, the difference between actual returns and total distributions will be reflected in an increasing (returns exceed distributions) or a decreasing (distributions exceed returns) Fund net asset value.

Each distribution is expected to be paid from some or all of the following sources:

net investment income (regular interest and dividends),

realized capital gains, and

unrealized gains, or, in certain cases, a return of principal (non-taxable distributions).

A non-taxable distribution is a payment of a portion of the Fund s capital. When the Fund s returns exceed distributions, it may represent portfolio gains generated, but not realized as a taxable capital gain. In periods when the Fund s returns fall short of distributions, the shortfall will represent a portion of your original principal, unless the

shortfall is offset during other time periods over the life of your investment (previous or subsequent) when the Fund s total return exceeds distributions.

Because distribution source estimates are updated during the year based on the Fund s performance and forecast for its current fiscal year (which is the calendar year for the Fund), estimates on the nature of your distributions provided at the time the distributions are paid may differ from both the tax information reported to you in your Fund s IRS Form 1099 statement provided at year end, as well as the ultimate economic sources of distributions over the life of your investment.

The following table provides estimated information regarding the Fund s common share distributions and total return performance for the six months ended June 30, 2010. The distribution information is presented on a tax basis rather than a generally accepted accounting principles (GAAP) basis. This information is intended to help you better understand whether the Fund s returns for the specified time period were sufficient to meet the Fund s distributions.

3 The Fund elected to retain a portion of its realized long-term capital gains for the tax years ended December 31, 2007 and December 31, 2006, and pay required federal corporate income taxes on these amounts. As reported on Form 2439, Common shareholders on record date must include their pro-rata share of these gains on their applicable federal tax returns, and are entitled to take offsetting tax credits, for their pro-rata share of the taxes paid by the Fund. The total returns Including retained gain tax credit/refund include the economic benefit to Common shareholders on record date of these tax credits/refunds. The Fund had no retained capital gains for the tax years ended December 31, 2009 and December 31, 2008.

#### **Common Share Repurchases and Share Price Information**

As of June 30, 2010 and since the inception of the Fund s repurchase program, the Fund has cumulatively repurchased common shares as shown in the accompanying table.

Common Shares Repurchased % of Outstanding Common Shares

240,001

During the six-month reporting period, the Fund repurchased common shares at a weighted average price and a weighted average discount per common share as shown in the accompanying table.

| Weighted Average                 | Weighted Average              |                      |  |
|----------------------------------|-------------------------------|----------------------|--|
| <b>Discount Per Common Share</b> | <b>Price Per Common Share</b> | <b>Common Shares</b> |  |
| Repurchased                      | Repurchased                   | Repurchased          |  |
|                                  |                               |                      |  |
| 14.97%                           | \$9.81                        | 30,100               |  |

As of June 30, 2010, the Fund s common share price was trading at a -9.95% discount to its common share net asset value, compared with an average discount of -10.89% for the entire six-month period.

2009-2010 Distributions Per Common Share

#### **Common Share Price Performance Weekly Closing Price**

- 1 Current Distribution Rate is based on the Fund s current annualized quarterly distribution divided by the Fund s current market price. The Fund s quarterly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the calendar year the Fund s cumulative net ordinary income and net realized gains are less than the amount of the investments in Fund s distributions, a return of capital for tax purposes.
- 2 Excluding investments in derivatives.
- 3 As previously explained in the Common Share Distribution and Share Price Information section of this report, the Fund elected to retain a portion of its realized long-term capital gains for the tax years ended December 31, 2007 and December 31, 2006, and pay required federal corporate income taxes on these amounts. These standardized total returns include the economic benefit to Common shareholders of record of this tax credit/refund. The Fund had no retained capital gains for the tax years ended December 31, 2009 and December 31, 2008.
- 12 Nuveen Investments

#### Shareholder Meeting Report

The annual meeting of shareholders was held in the offices of Nuveen Investments on April 6, 2010; at this meeting the shareholders were asked to vote on the election of Board Members.

\$ (91,528)

- For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.
- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Ratings: Using the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investor Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade.
- (3) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.
- (4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate ( LIBOR ), or (ii) the prime rate offered by one or more major United States banks. Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
- (5) At or subsequent to June 30, 2010, this issue was under the protection of the Federal Bankruptcy Court.
- (6) Non-income producing; denotes that the issuer has defaulted on the payment of principal or interest.
- (7) At or subsequent to June 30, 2010, the Fund s Adviser concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income and write-off any remaining recorded balances on the Fund s records.
- (8) Principal Amount (000) denominated in U.S. Dollars, unless otherwise noted.
- (9) Market of issuance for this investment is Euro. Euro par equals 77,469.
- (10) Non-income producing; issuer has not declared a dividend within the past twelve months
- (11) Borrowings as a percentage of Total Investments is 22.8%.
- (12) For disclosure purposes, Notional Amount is calculated by multiplying the Number of Contracts by the Strike Price by 100.
- (13) Investment, or portion of investment, has been pledged as collateral for call options written.
- N/A Not applicable.
- N/R Not rated.
- 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration which are normally those transactions with qualified institutional buyers.
- ADR American Depositary Receipt.

Reg S Regulation S allows U.S. companies to sell securities to persons or entities located outside of the United States without registering those securities with the Securities and Exchange Commission. Specifically, Regulation S provides a safe harbor from the registration requirements of the Securities Act for the offers and sales of securities by both foreign and domestic issuers that are made outside the United States.

# **Supplemental Disclosure of Cash Flow Information**

Cash paid for interest on borrowings during the six months ended June 30, 2010, was \$398,210.

See accompanying notes to financial statements.

Notes to FINANCIAL STATEMENTS (Unaudited)

#### 1. General Information and Significant Accounting Policies

Nuveen Diversified Dividend and Income Fund (the Fund) is a closed-end management investment company registered under the Investment Company Act of 1940, as amended. The Fund's Common shares are listed on the New York Stock Exchange (NYSE) and trade under the ticker symbol JDD. The Fund was organized as a Massachusetts business trust on July 18, 2003.

The Fund s investment objectives are high current income and total return. The Fund invests primarily in U.S. and foreign dividend-paying common stocks, dividend-paying common stocks issued by Real Estate Investment Trusts (REITs), debt securities and other non-equity instruments that are issued by, or that are related to, government, government-related and supernational issuers located, or conducting their business, in emerging market countries (emerging markets debt and foreign corporate bonds) and senior loans.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP).

#### **Investment Valuation**

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1. Securities primarily traded on the NASDAQ National Market (NASDAQ) are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the mean between the quoted bid and ask prices. Prices of certain American Depository Receipts (ADR) held by the Fund that trade in only limited volume in the United States are valued based on the mean between the most recent bid and ask prices of the underlying non-U.S.-traded stock, adjusted as appropriate for the underlying-to-ADR conversion ratio and foreign exchange rate, and from time-to-time may also be adjusted further to take into account material events that may take place after the close of the local non-U.S. market but before the close of the NYSE. These securities generally represent a transfer from a Level 1 to a Level 2 security.

Prices of fixed-income securities, senior loans and derivative instruments are provided by a pricing service approved by the Fund s Board of Trustees. Fixed-income securities are valued by a pricing service that values portfolio securities at the mean between the quoted bid and ask prices or the yield equivalent when quotations are readily available. These securities are generally classified as Level 2. Securities for which quotations are not readily available are valued at fair value as determined by the pricing service using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor s credit characteristics considered relevant. The pricing service may employ electronic data processing techniques and/or a matrix system to determine valuations. These securities are generally classified as Level 2. Highly rated zero coupon fixed-income securities, like U.S. Treasury Bills, issued with maturities of one year or less, are valued using the amortized cost method when 60 days or less remain until maturity. With amortized cost, any discount or premium is amortized each day, regardless of the impact of fluctuating rates on the market value of the security. These securities will generally be classified as Level 1 or Level 2.

Like most fixed income instruments, the senior loans in which the Fund invests are not listed on an organized exchange. The secondary market of senior loans may be less liquid relative to markets for other fixed-income securities. Consequently, the value of senior loans, determined as described above, may differ significantly from the value that would have been determined had there been an active market for that senior loan. These securities are generally classified as Level 2.

The value of exchange-traded options are based on the last sale price or, in the absence of such a price, at the mean of the bid and ask prices. Exchange-traded options are generally classified as Level 1. Options traded in the over-the-counter market are valued using market implied volatilities and are generally classified as Level 2.

Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value. These securities are generally classified as Level 1.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Fund s Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; fixed-income securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund s net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security s fair value. As a general principle, the fair value of an issue of securities would appear to be the amount that the owner might reasonably expect to receive for them in a current sale. A variety of factors may be considered in determining the fair value of these securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor s credit characteristics considered relevant. These securities are classified as Level 2 or as Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Fund s Board of Trustees or its designee.

Refer to Footnote 2 Fair Value Measurements for further details on the leveling of securities held by the Fund as of the end of the reporting period.

#### **Investment Transactions**

Investment transactions are recorded on a trade date basis. Trade date for senior loans purchased in the primary market is considered the date on which the loan allocations are determined. Trade date for senior loans purchased in the secondary market is the date on which the transaction is entered into. Realized gains and losses from investment transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Fund has instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At June 30, 2010, the Fund had no such outstanding purchase commitments.

#### Investment Income

Dividend income is recorded on the ex-dividend date or, for foreign securities, when information is available. Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also includes paydown gains and losses and fee income, if any. Fee income consists primarily of amendment fees. Amendment fees are earned as compensation for evaluating and accepting changes to an original senior loan agreement and are recognized when received.

#### Income Taxes

The Fund intends to distribute substantially all of its investment company taxable income to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. In any year when the Fund realizes net capital gains, the Fund may choose to distribute all or a portion of its net capital gains to shareholders, or alternatively, to retain all or a portion of its net capital gains and pay federal corporate income taxes on such retained gains.

For all open tax years and all major taxing jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period

since then). Furthermore, management of the Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Distributions to Common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal corporate income tax regulations, which may differ from U.S. GAAP.

The Fund makes quarterly cash distributions to Common shareholders of a stated dollar amount per share. Subject to approval and oversight by the Fund sead of Trustees, the Fund seeks to maintain a stable distribution level designed to deliver the long-term return potential of the Fund s investment strategy through regular quarterly distributions (a Managed Distribution Program). Total distributions during a calendar year generally will be made from the Fund s net investment income, net realized capital gains and net unrealized capital gains in the Fund s portfolio, if any. The portion of distributions paid from net unrealized gains, if any, would be distributed from the Fund s assets and would be treated by shareholders as a non-taxable distribution for tax purposes. In the event that total distributions during a calendar year exceed the Fund s total return on net asset value, the difference will be treated as a return of capital for tax purposes and will reduce net asset value per share. If the Fund s total return on net asset value exceeds total distributions during a calendar year, the excess will be reflected as an increase in net asset value per share. The final determination of the source and character of all distributions for the fiscal year are made after the end of the fiscal year and are reflected in the financial statements contained in the annual report as of December 31 each year.

Notes to FINANCIAL STATEMENTS (Unaudited) (continued)

REIT distributions received by the Fund are generally comprised of ordinary income, long-term and short-term capital gains, and a return of REIT capital. The actual character of amounts received during the period are not known until after the fiscal year end. For the fiscal year ended December 31, 2009, the character of distributions to the Fund from the REITs was 67.63% ordinary income, 20.67% long-term and short-term capital gains, and 11.70% return of REIT capital.

For the fiscal year ended December 31, 2009, the Fund applied the actual character of distributions reported by the REITs in which the Fund invests to its receipts from the REITs. If a REIT held in the portfolio of investments did not report the actual character of its distributions during the period, the Fund treated the distributions as ordinary income.

For the six months ended June 30, 2010, the Fund applied the actual percentages for the fiscal year ended December 31, 2009, described above, to its receipts from the REITs and treated as income on the Statement of Operations only the amount of ordinary income so calculated. The Fund adjusts that estimated breakdown of income type (and consequently its net investment income) as necessary early in the following calendar year when the REITs inform their shareholders of the actual breakdown of income type.

The actual character of distributions made by the Fund during the fiscal year ended December 31, 2009, is reflected in the accompanying financial statements.

The distributions made by the Fund during the six months ended June 30, 2010, are provisionally classified as being From and in excess of net investment income, and those distributions will be classified as being from net investment income, net realized capital gains and/or a return of capital for tax purposes after the fiscal year end, based upon the income type breakdown information conveyed at the time by the REITs whose securities are held in the Fund s portfolio. For purposes of calculating Undistributed (Over-distribution of) net investment income as of June 30, 2010, the distribution amounts provisionally classified as From and in excess of net investment income were treated as being entirely from net investment income. Consequently, the financial statements at June 30, 2010, reflect an over-distribution of net investment income.

#### FundPreferred Shares

The Fund is authorized to issue FundPreferred shares. As of December 31, 2009, the Fund redeemed all \$120,000,000 of its outstanding FundPreferred shares, at liquidation value.

#### Foreign Currency Transactions

The Fund is authorized to engage in foreign currency exchange transactions, including foreign currency forward, futures, options and swap contracts. To the extent that the Fund invests in securities and/or contracts that are denominated in a currency other than U.S. dollars, the Fund will be subject to currency risk, which is the risk that an increase in the U.S. dollar relative to the foreign currency will reduce returns or portfolio value. Generally, when the U.S. dollar rises in value against a foreign currency, the Fund s investments denominated in that currency will lose value because its currency is worth fewer U.S. dollars; the opposite effect occurs if the U.S. dollar falls in relative value. Investments and other assets and liabilities denominated in foreign currencies are converted into U.S. dollars on a spot (i.e. cash) basis at the spot rate prevailing in the foreign currency exchange market at the time of valuation. Purchases and sales of investments and income denominated in foreign currencies are translated into U.S. dollars on the respective dates of such transactions.

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at 4:00 p.m. Eastern time. Investments and income and expenses are translated on the respective dates of such transactions. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date of the transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received.

The realized and unrealized gains or losses resulting from changes in foreign currency exchange rates are recognized as a component of Net realized gain (loss) from investments and foreign currency and Change in net unrealized appreciation (depreciation) of investments and foreign currency on the Statement of Operations, when applicable.

#### Forward Foreign Currency Exchange Contracts

The Fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives and is authorized to enter into forward foreign currency exchange contracts in an attempt to manage such risk under two circumstances: (i) when the Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency to lock in the U.S. exchange rate of the transaction, with such period being a short-dated contract covering the period between transaction date and settlement date; or (ii) when Wellington Management Company LLP (Wellington), one of the Fund s sub-advisors, believes that the currency of a particular foreign country may experience a substantial movement against the U.S. dollar or against another foreign currency. Forward foreign currency exchange contracts are valued daily at the forward rate and are recognized as Unrealized appreciation or depreciation on forward foreign currency exchange contracts on the Statement of Assets and Liabilities. The change in value of the contracts during the reporting period is recognized as a component of Change in net unrealized appreciation (depreciation) of forward foreign currency exchange contracts on the Statement of Operations. When the contract is closed or offset with the same

counterparty, the Fund recognizes the difference between the value of the contract at the time it was opened and the value at the time it was closed or offset as Net realized gain (loss) from forward foreign currency exchange contracts on the Statement of Operations.

Forward foreign currency contracts will generally not be entered into for terms greater than three months, but may have maturities of up to six months or more. The use of forward foreign currency contracts does not eliminate fluctuations in the underlying prices of the Fund s investment securities; however, it does establish a rate of exchange that can be achieved in the future. The use of forward foreign currency exchange contracts involves the risk that anticipated currency movements will not be accurately predicted. A forward foreign currency exchange contract would limit the risk of loss due to a decline in the value of a particular currency; however, it also would limit any potential gain that might result should the value of the currency increase instead of decrease. These contracts may involve market risk in excess of the unrealized gain or loss reflected on the Statement of Assets and Liabilities.

The average number of forward foreign currency exchange contracts outstanding during the six months ended June 30, 2010, was 30. Refer to Footnote 3 - Derivative Instruments and Hedging activities for further details on forward foreign currency exchange contract activity.

#### **Options Transactions**

The Fund is subject to equity price risk in the normal course of pursuing its investment objectives and is authorized to purchase and write (sell) call and put options on securities, futures, swaps ( swaptions ) or currencies in an attempt to manage this and other possible risks. The purchase of put options involves the risk of loss of all or a part of the cash paid for the options. Put options purchased are accounted for in the same manner as portfolio securities. The market risk associated with purchasing put options is limited to the premium paid. The counterparty credit risk of purchasing options, however, needs also to take into account the current value of the option, as this is the performance expected from the counterparty. When the Fund writes an option, an amount equal to the net premium received (the premium less commission) is recognized as a component of Call options written, at value on the Statement of Assets and Liabilities and is subsequently adjusted to reflect the current value of the written option until the option expires or the Fund enters into a closing purchase transaction. The changes in value of options written during the fiscal period are recognized as Change in net unrealized appreciation (depreciation) of call options written on the Statement of Operations. When a written call or put option expires or the Fund enters into a closing purchase transaction, the difference between the net premium received and any amount paid at expiration or on the closing purchase transaction, including commission, is recognized as Net realized gain (loss) from call options written on the Statement of Operations. The Fund, as a writer of an option, has no control over whether the underlying instrument may be sold (called) or purchased (put) and as a result bears the risk of an unfavorable change in the market value of the instrument underlying the written option. There is the risk a Fund may not be able to enter into a closing transaction because of an illiquid market.

The Fund did not purchase put or call options during the six months ended June 30, 2010. The average notional amount of call options written during the six months ended June 30, 2010, was \$(5,103,667). Refer to Footnote 3 - Derivative Instruments and Hedging Activities for further details on call options written.

#### Market and Counterparty Credit Risk

In the normal course of business the Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose the Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of the Fund s exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to

minimal counterparty credit risk as they are exchange traded and the exchange s clearing house, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

The Fund helps manage counterparty credit risk by entering into agreements only with counterparties Nuveen Asset Management (the Adviser), a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen) believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of the Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when the Fund has an unrealized loss, the Fund has instructed the custodian to pledge assets of the Fund as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

#### Repurchase Agreements

In connection with transactions in repurchase agreements, it is the Fund s policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

Notes to

FINANCIAL STATEMENTS (Unaudited) (continued)

#### Zero Coupon Securities

The Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### Custodian Fee Credit

The Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on the Fund s cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which the Fund overdraws its account at the custodian bank.

#### Indemnifications

Under the Fund s organizational documents, its officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Fund enters into contracts that provide general indemnifications to other parties. The Fund s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

#### 2. Fair Value Measurements

In determining the value of the Fund s investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

- Level 1 Quoted prices in active markets for identical securities.
- Level 2 Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 Significant unobservable inputs (including management s assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of the Fund s fair value measurements as of June 30, 2010:

|                                     |                   |                | Level |                |
|-------------------------------------|-------------------|----------------|-------|----------------|
|                                     | Level 1           | Level 2        | 3     | Total          |
| Investments:                        |                   |                |       |                |
| Common Stocks                       | \$<br>68,300,443  | \$             | \$    | \$ 68,300,443  |
| REIT Common Stocks                  | 71,231,189        |                |       | 71,231,189     |
| Preferred Securities *              |                   | 1,606,875      |       | 1,606,875      |
| Variable Rate Senior Loan Interests |                   | 69,290,383     |       | 69,290,383     |
| Emerging Markets Debt and Foreign   |                   |                |       |                |
| Corporate Bonds                     |                   | 54,708,109     |       | 54,708,109     |
| Short-Term Investments              | 19,831,560        |                |       | 19,831,560     |
| Derivatives:                        |                   |                |       |                |
| Call Options Written                | (348,763)         |                |       | (348,763)      |
| Forward Foreign Currency Exchange   |                   |                |       |                |
| Contracts **                        |                   | (91,528)       | )     | (91,528)       |
| Total                               | \$<br>159,014,429 | \$ 125,513,839 | \$    | \$ 284,528,268 |

<sup>\*</sup> Preferred Securities includes Convertible Preferred Securities, \$25 Par (or similar) Preferred Securities and Capital Preferred Securities held by the Fund at the end of the reporting period, if any.

The following is a reconciliation of the Fund s Level 3 investments held at the beginning and end of the measurement period:

| Balance at the beginning of period   | Level 3 Emerging Markets Debt and Foreign Corporate Bonds \$ 229,331 |
|--|--|
| Gains (losses): Net realized gains (losses) Net change in unrealized appreciation (depreciation) Net purchases at cost (sales at proceeds) | (51,562)<br>43,296<br>(221,065)                                      |

<sup>\*\*</sup> Represents net unrealized appreciation (depreciation).

Net discounts (premiums)

Net transfers into (out of) at end of period fair value

Balance at the end of period \$

#### 3. Derivative Instruments and Hedging Activities

The Fund records derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Fund s investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. For additional information on the derivative instruments in which the Fund was invested during and at the end of the reporting period, refer to the Portfolio of Investments, Financial Statements and Footnote 1 - General Information and Significant Accounting Policies.

The following table presents the fair value of all derivative instruments held by the Fund as of June 30, 2010, the location of these instruments on the Statement of Assets and Liabilities, and the primary underlying risk exposure.

|                                 | Location on the Statement of Assets and |                  |           | nent of Assets and Liabi | lities     |
|---------------------------------|---|------------------|-----------|--------------------------|------------|

N/A The Fund redeemed all \$120,000,000 of its outstanding FundPreferred shares as of December 31, 2009.

#### 5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments and derivative transactions) during the six months ended June 30, 2010, aggregated \$98,835,976 and \$115,312,067, respectively.

Transactions in call options written during the six months ended June 30, 2010, were as follows:

|   | Number of<br>Contracts | Premiums<br>Received |
|---|------------------------|----------------------|
| Outstanding, beginning of period                                    | 1,540                  | \$ 259,037           |
| Options written   | 5,205                  | 612,662              |
| Options terminated in closing purchase transactions Options expired | (1,540)                | (259,037)            |
| Outstanding, end of period  | 5,205                  | \$ 612,662           |

#### 6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, recognition of premium amortization and timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset value of the Fund.

At June 30, 2010, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives), as determined on a federal income tax basis, were as follows:

Cost of investments \$ 284,536,150

Gross unrealized:

Appreciation \$ 26,846,068 Depreciation \$ (26,413,659)

Net unrealized appreciation (depreciation) of investments \$\\$432,409

The tax components of undistributed net ordinary income and net long-term capital gains at December 31, 2009, the Fund s last tax year end, were as follows:

Undistributed net ordinary income \* Undistributed net long-term capital gains

\$

\* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

The tax character of distributions paid during the Fund s last tax year ended December 31, 2009, was designated for purposes of the dividends paid deduction as follows:

Distributions from net ordinary income \*
Distributions from net long-term capital gains
Tax return of capital

\$ 9,554,083

8,145,997

\* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

At December 31, 2009, the Fund s last tax year end, the Fund had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

Expiration:

| December 31, 2016 | \$ 39,039,775 |
|-------------------|---------------|
| December 31, 2017 | 32,452,667    |
|                   |               |

Total \$ 71,492,442

The Fund elected to defer net realized losses from investments incurred from November 1, 2009 through December 31, 2009, the Fund s last tax year end, (post-October losses) in accordance with federal income tax regulations. Post-October capital losses of \$181,707 were treated as having arisen on the first day of the current fiscal year.

#### 7. Management Fees and Other Transactions with Affiliates

The Fund s management fee is separated into two components a fund-level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within the Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee, payable monthly, is calculated according to the following schedule:

|                                     | Fund-Level Fee |
|-------------------------------------|----------------|
| Average Daily Managed Assets *      | Rate           |
| For the first \$500 million         | .7000%         |
| For the next \$500 million          | .6750          |
| For the next \$500 million          | .6500          |
| For the next \$500 million          | .6250          |
| For Managed Assets over \$2 billion | .6000          |

Notes to FINANCIAL STATEMENTS (Unaudited) (continued)

The annual complex-level fee, payable monthly, is calculated according to the following schedule:

|  | Effective Rate at Breakpoint |
|--|------------------------------|
| Complex-Level Managed Asset Breakpoint Level * | Level                        |
| \$55 billion                                   | .2000%                       |
| \$56 billion                                   | .1996                        |
| \$57 billion                                   | .1989                        |
| \$60 billion                                   | .1961                        |
| \$63 billion                                   | .1931                        |
| \$66 billion                                   | .1900                        |
| \$71 billion                                   | .1851                        |
| \$76 billion                                   | .1806                        |
| \$80 billion                                   | .1773                        |
| \$91 billion                                   | .1691                        |
| \$125 billion                                  | .1599                        |
| \$200 billion                                  | .1505                        |
| \$250 billion                                  | .1469                        |
| \$300 billion                                  | .1445                        |

\* The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen funds, with such daily managed assets defined separately for each fund in its management agreement, but excluding assets attributable to investments in other Nuveen funds. For the complex-level and fund-level fees, daily managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds—use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust—s issuance of floating rate securities, subject to an agreement by the Adviser to limit the amount of such assets for determining managed assets in certain circumstances. As of June 30, 2010, the complex-level fee rate was .1857%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Adviser has entered into Sub-Advisory Agreements with NWQ Investment Management Company, LLC (NWQ), Security Capital Research & Management Incorporated (Security Capital), Symphony Asset Management, LLC (Symphony) and Wellington. NWQ and Symphony are both subsidiaries of Nuveen. NWQ manages the portion of the Funds investment portfolio allocated to dividend-paying common stocks including American Depositary Receipts (ADRs), and the Funds call option strategy. Security Capital manages the portion of the Funds investment portfolio allocated to securities issued by real estate companies. Symphony manages the portion of the Funds investment portfolio allocated to senior loans. Wellington manages the portion of the Funds investment portfolio allocated to emerging markets debt and foreign corporate bonds, and the Funds foreign currency forward strategy. NWQ, Security Capital, Symphony and Wellington are compensated for their services to the Fund from the management fee paid to the Adviser.

The Fund pays no compensation directly to those of its trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Fund from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first eight years of the Fund s operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

| Year Ending   |      | Year Ending   |      |  |  |
|---------------|------|---------------|------|--|--|
| September 30, |      | September 30, |      |  |  |
| 2003 *        | .32% | 2008          | .32% |  |  |
| 2004          | .32  | 2009          | .24  |  |  |
| 2005          | .32  | 2010          | .16  |  |  |
| 2006          | .32  | 2011          | .08  |  |  |
| 2007          | .32  |               |      |  |  |

<sup>\*</sup> From the commencement of operations.

The Adviser has not agreed to reimburse the Fund for any portion of its fees and expenses beyond September 30, 2011.

### 8. Senior Loan Commitments

### **Unfunded Commitments**

Pursuant to the terms of certain of the variable rate senior loan agreements, the Fund may have unfunded senior loan commitments. The Fund will maintain with its custodian, cash, liquid securities and/or liquid senior loans having an aggregate value at least equal to the amount of unfunded senior loan commitments. At June 30, 2010, the Fund had no unfunded senior loan commitments.

### Participation Commitments

With respect to the senior loans held in the Fund s portfolio, the Fund may: 1) invest in assignments; 2) act as a participant in primary lending syndicates; or 3) invest in participations. If the Fund purchases a participation of a senior loan interest, the Fund would typically enter into a contractual agreement

with the lender or other third party selling the participation, rather than directly with the Borrower. As such, the Fund not only assumes the credit risk of the Borrower, but also that of the Selling Participant or other persons interpositioned between the Fund and the Borrower. At June 30, 2010, there were no such outstanding participation commitments.

### 9. Borrowing Arrangements

The Fund has entered into \$65 million senior committed secured 364-day secured line of credit (the Facility), renewable annually, with its custodian bank. Amounts drawn on the Facility are recognized as Borrowings on the Statement of Assets and Liabilities. As of June 30, 2010, the Fund's outstanding balance on the Facility was \$65 million. For the six months ended June 30, 2010, the average daily balance outstanding on the Facility and average interest rate were \$65 million and 1.25%, respectively.

Inter-bank Offered Rate (LIBOR) rate plus 1.00% and (ii) the Federal Funds rate plus 1.00% or (b) the 1-week, 30, 60, or 90-day LIBOR plus 1.00%. In addition to interest expense, the Fund pays a per annum commitment fee based on the total amount of the Facility. Interest expense and commitment fees are recognized as Interest expense and Fees on borrowings, respectively, on the Statement of Operations.

### 10. New Accounting Pronouncements

Fair Value Measurements

On January 21, 2010, Financial Accounting Standards Board issued changes to the authoritative guidance under U.S. GAAP for fair value measurements. The objective of which is to provide guidance on how investment assets and liabilities are to be valued and disclosed. Specifically, the amendment requires reporting entities disclose Level 3 activity for purchases, sales, issuances and settlements in the Level 3 roll-forward on a gross basis rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2010. At this time, management is evaluating the implications of this guidance and the impact it will have to the financial statement amounts and footnote disclosures, if any.

### 11. Subsequent Events

Other Matters

As discussed in the Portfolio Managers Comments section of this report, lawsuits pursuing claims made in the demand letter alleging that the Fund s Board of Trustees breached their fiduciary duties related to the redemption at par of the Fund s FundPreferred shares had been filed on behalf of shareholders of the Fund, against the Adviser, the Nuveen holding company, the majority owner of the holding company, the lone interested trustee, and current and former officers of the Fund. Nuveen and the other named defendants believe these lawsuits to be without merit, and all named parties intend to defend themselves vigorously. The Fund believes that these lawsuits will not have a material effect on the Fund or on the Adviser s ability to serve as investment adviser to the Fund.

(d) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period takes place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common Share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund s market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

The Fund elected to retain a portion of its realized long-term capital gains for the following tax years ended December 31, (which is the fiscal year end for the Fund) and pay required federal corporate income taxes on these amounts. As reported on Form 2439, Common shareholders on record date must include their pro-rata share of these gains on their applicable federal tax returns, and are entitled to take offsetting tax credits, for their pro-rata share of the taxes paid by the Fund. The standardized total returns shown above do not include the economic benefit to Common shareholders on record date of these tax credits/refunds. The Fund s corresponding Total Returns Based on Market Value and Common Share Net Asset Value when these benefits are included are as follows:

Total Returns
Common Based on

- \* Rounds to less than \$.01 per share.
- \*\* Represents distributions paid From and in excess of net investment income for the six months ended June 30, 2010.
- \*\*\* Annualized.

See accompanying notes to financial statements.

Annual Investment Management Agreement Approval Process

The Investment Company Act of 1940, as amended (the 1940 Act), provides, in substance, that each investment advisory agreement between a fund and its investment adviser (including sub-advisers) will continue in effect from year to year only if its continuance is approved at least annually by the fund s board members, including by a vote of a majority of the board members who are not parties to the advisory agreement or interested persons of any parties (the *Independent Board Members* ), cast in person at a meeting called for the purpose of considering such approval. In connection with such approvals, the fund s board members must request and evaluate, and the investment adviser is required to furnish, such information as may be reasonably necessary to evaluate the terms of the advisory agreement. Accordingly, at a meeting held on May 25-26, 2010 (the May Meeting), the Board of Trustees (the Board, and each Trustee, a Board Member ) of the Fund, including a majority of the Independent Board Members, considered and approved the continuation of the advisory and sub-advisory agreements for the Fund for an additional one-year period. These agreements include the investment advisory agreement between Nuveen Asset Management ( NAM ) and the Fund and the sub-advisory agreements between NAM and NWQ Investment Management Company, LLC ( NWO ), NAM and Symphony Asset Management LLC ( Symphony ), NAM and Wellington Management Company, LLP ( Wellington ), and NAM and Security Capital Research & Management Incorporated ( Security Capital and, together with NWO, Symphony and Wellington, the Sub-Advisers ). In preparation for their considerations at the May Meeting, the Board also held a separate meeting on April 21-22, 2010 (the April Meeting ). Accordingly, the factors considered and determinations made regarding the renewals by the Independent Board Members include those made at the April Meeting.

In addition, in evaluating the advisory agreement (the *Investment Management Agreement* ) and sub-advisory agreements (each, a Sub-advisory Agreement, and the Investment Management Agreement and Sub-advisory Agreements are each an Advisory Agreement ), the Independent Board Members reviewed a broad range of information relating to the Fund, NAM and the Sub-Advisers (NAM and the Sub-Advisers are each a Fund Adviser ), including absolute and comparative performance, fee and expense information for the Fund (as described in more detail below), the profitability of Nuveen for its advisory activities (which includes its wholly owned subsidiaries), and other information regarding the organization, personnel, and services provided by the respective Fund Adviser. The Independent Board Members also met quarterly as well as at other times as the need arose during the year and took into account the information provided at such meetings and the knowledge gained therefrom. Prior to approving the renewal of the Advisory Agreements, the Independent Board Members reviewed the foregoing information with their independent legal counsel and with management, reviewed materials from independent legal counsel describing applicable law and their duties in reviewing advisory contracts, and met with independent legal counsel in private sessions without management present. The Independent Board Members considered the legal advice provided by independent legal counsel and relied upon their knowledge of the Fund Adviser, its services and the Fund resulting from their meetings and other interactions throughout the year and their own business judgment in determining the factors to be considered in evaluating the Advisory Agreements. Each Board Member may have accorded different weight to the various factors in reaching his or her conclusions with respect to the Fund s Advisory Agreements. The Independent Board Members did not identify any single factor as all-important or controlling. The Independent Board Members considerations were instead based on a comprehensive consideration of all the information presented. The principal factors considered by the Board and its conclusions are described below.

## A. Nature, Extent and Quality of Services

In considering renewal of the Advisory Agreements, the Independent Board Members considered the nature, extent and quality of the Fund Adviser s services, including advisory services and administrative services. The Independent Board Members reviewed materials outlining, among other things, the Fund Adviser s organization

and business; the types of services that the Fund Adviser or its affiliates provide and are expected to provide to the Fund; the performance record of the Fund (as described in further detail below); and any initiatives Nuveen had taken for the applicable fund product line, including continued activities to refinance auction rate preferred securities, manage leverage during periods of market turbulence and implement an enhanced leverage management process, modify investment mandates in light of market conditions and seek shareholder approval as necessary, maintain the fund share repurchase program and maintain shareholder communications to keep shareholders apprised of Nuveen's efforts in refinancing preferred shares. In addition to the foregoing, the Independent Board Members also noted the additional services that NAM or its affiliates provide to closed-end funds, including, in particular, Nuveen's continued commitment to supporting the secondary market for the common shares of its closed-end funds through a variety of programs designed to raise investor and analyst awareness and understanding of closed-end funds. These efforts include maintaining an investor relations program to provide timely information and education to financial advisers and investors; providing marketing for the closed-end funds; maintaining and enhancing a closed-end fund website; participating in conferences and having direct communications with analysts and financial advisors.

As part of their review, the Independent Board Members also evaluated the background, experience and track record of the Fund Adviser's investment personnel. In this regard, the Independent Board Members considered any changes in the personnel, and the impact on the level of services provided to the Fund, if any. The Independent Board Members also reviewed information regarding portfolio manager compensation arrangements to evaluate the Fund Adviser's ability to attract and retain high quality investment personnel, preserve stability, and reward performance but not provide an incentive for taking undue risks.

In addition to advisory services, the Independent Board Members considered the quality of administrative services provided by NAM and its affiliates including product management, fund administration, oversight of service providers, shareholder services, administration of Board relations, regulatory and portfolio compliance and legal support. Given the importance of compliance, the Independent Board Members also considered NAM s compliance program, including the report of the chief compliance officer regarding the Fund s compliance policies and procedures.

The Independent Board Members also considered NAM s oversight of the performance, business activities and compliance of the Sub-Advisers. In that regard, the Independent Board Members reviewed an evaluation of each Sub-Adviser from NAM. The evaluation also included information relating to the respective Sub-Adviser s organization, operations, personnel, assets under management, investment philosophy, strategies and techniques in managing the Fund, developments affecting each Sub-Adviser, and an analysis of each Sub-Adviser. As described in further detail below, the Board also considered the performance of the portion of the investment portfolio for which each Sub-Adviser is responsible. In addition, the Board recognized that the Sub-advisory Agreements were essentially agreements for portfolio management services only and the Sub-Advisers were not expected to supply other significant administrative services to the Fund. As part of their oversight, the Independent Board Members also continued their program of seeking to visit each sub-adviser to the Nuveen funds at least once over a multiple year rotation, meeting with key investment and business personnel. In this regard, the Independent Board Members met with Symphony in 2010 and NWQ in 2009 and 2010. The Independent Board Members noted that NAM recommended the renewal of the Sub-advisory Agreements and considered the basis for such recommendations.

Based on their review, the Independent Board Members found that, overall, the nature, extent and quality of services provided (and expected to be provided) to the Fund under the respective Investment Management Agreement or Sub-advisory Agreement, as applicable, were satisfactory.

### B. The Investment Performance of the Fund and Fund Advisers

The Board considered the performance results of the Fund over various time periods. The Board reviewed, among other things, the Fund s historic investment performance as well as information comparing the Fund s performance information with that of other funds (the *Performance Peer Group*) based on data provided by an independent

provider of mutual fund data and with recognized and/or customized benchmarks. In this regard, the performance information the Board reviewed included the Fund s total return information compared to the returns of its Performance Peer Group and recognized and/or customized benchmarks for the quarter, one-, three- and five-year periods ending December 31, 2009 and for the same periods ending March 31, 2010. In addition, the Independent Board Members also reviewed, among other things, the returns of each sleeve of the Fund relative to the benchmark of such sleeve for the quarter, one- and three-year periods ending December 31, 2009 and for the same periods

Annual Investment Management Agreement Approval Process (continued)

ending March 31, 2010. Moreover, the Board reviewed the peer ranking of the Nuveen funds sub-advised by Symphony and NWQ, respectively, in the aggregate. The Independent Board Members also reviewed historic premium and discount levels, including a summary of actions taken to date for the Fund. This information supplemented the Fund performance information provided to the Board at each of its quarterly meetings.

In reviewing peer comparison information, the Independent Board Members recognized that the Performance Peer Group of certain funds may not adequately represent the objectives and strategies of the funds, thereby limiting the usefulness of comparing a fund s performance with that of its Performance Peer Group. In this regard, the Independent Board Members considered that the Performance Peer Groups of certain funds (including the Fund) were classified as having significant differences from such funds based on considerations such as special fund objectives, potential investable universe and the composition of the peer set (*e.g.*, the number and size of competing funds and number of competing managers).

Based on their review, the Independent Board Members determined that the Fund s investment performance over time had been satisfactory. The Independent Board Members noted that although the Fund underperformed the performance of its benchmark for the three-year period, it outperformed the performance of its benchmark for the one-year period.

### C. Fees, Expenses and Profitability

## 1. Fees and Expenses

The Board evaluated the management fees and expenses of the Fund reviewing, among other things, the Fund s gross management fees, net management fees and net expense ratios in absolute terms as well as compared to the fee and expenses of a comparable universe of funds based on data provided by an independent fund data provider (the *Peer Universe*) and in certain cases, to a more focused subset of funds in the Peer Universe (the *Peer Group*) and any expense limitations.

The Independent Board Members further reviewed the methodology regarding the construction of the applicable Peer Universe and/or Peer Group. In reviewing the comparisons of fee and expense information, the Independent Board Members took into account that in certain instances various factors such as: the asset level of a fund relative to peers; the limited size and particular composition of the Peer Universe or Peer Group; the investment objectives of the peers; expense anomalies; changes in the funds comprising the Peer Universe or Peer Group from year to year; levels of reimbursement; the timing of information used; and the differences in the type and use of leverage may impact the comparative data, thereby limiting the ability to make a meaningful comparison with peers, including for the Fund.

In reviewing the fee schedule for the Fund, the Independent Board Members also considered the fund-level and complex-wide breakpoint schedules (described in further detail below) and any fee waivers and reimbursements provided by Nuveen (applicable, in particular, for certain closed-end funds launched since 1999). The Independent Board Members noted that the Fund had a net management fee and/or net expense ratio below the peer average of its Peer Group or Peer Universe.

Based on their review of the fee and expense information provided, the Independent Board Members determined that the Fund s management fees were reasonable in light of the nature, extent and quality of services provided to the Fund.

### 2. Comparisons with the Fees of Other Clients

The Independent Board Members further reviewed information regarding the nature of services and fee rates offered by NAM to other clients. Such clients include separately managed accounts (both retail and institutional accounts),

foreign investment funds offered by Nuveen and funds that are not offered by Nuveen but are sub-advised by one of Nuveen's investment management teams. In evaluating the comparisons of fees, the Independent Board Members noted that the fee rates charged to the Fund and other clients vary, among other things, because of the different services involved and the additional regulatory and compliance requirements associated with registered investment companies, such as the Fund. Accordingly, the Independent Board Members considered the differences in the product types, including, but not limited to, the services provided, the structure and operations, product distribution and costs thereof, portfolio investment policies, investor profiles, account sizes and regulatory requirements. The Independent Board Members noted, in particular, that the range of services provided to the Fund (as discussed above) is much

more extensive than that provided to separately managed accounts. Given the inherent differences in the products, particularly the extensive services provided to the Fund, the Independent Board Members believe such facts justify the different levels of fees.

In considering the fees of the Sub-Advisers, the Independent Board Members also considered the pricing schedule or fees that each Sub-Adviser charges for similar investment management services for other fund sponsors or clients (such as retail and/or institutional managed accounts) as applicable. With respect to Symphony, the Independent Board Members also reviewed the fees it assesses for equity and taxable fixed-income hedge funds it manages, which include a performance fee. The Independent Board Members noted that with respect to Security Capital and Wellington, the Sub-Advisers that are unaffiliated with Nuveen, such fees were the result of arm s-length negotiations.

### 3. Profitability of Fund Advisers

In conjunction with its review of fees, the Independent Board Members also considered the profitability of Nuveen for its advisory activities (which incorporated Nuveen s wholly-owned affiliated sub-advisers) and its financial condition. The Independent Board Members reviewed the revenues and expenses of Nuveen s advisory activities for the last two years, the allocation methodology used in preparing the profitability data and an analysis of the key drivers behind the changes in revenues and expenses that impacted profitability in 2009. The Independent Board Members noted this information supplemented the profitability information requested and received during the year to help keep them apprised of developments affecting profitability (such as changes in fee waivers and expense reimbursement commitments). In this regard, the Independent Board Members noted that they had also appointed an Independent Board Member as a point person to review and keep them apprised of changes to the profitability analysis and/or methodologies during the year. The Independent Board Members also considered Nuveen s revenues for advisory activities, expenses, and profit margin compared to that of various unaffiliated management firms with similar amounts of assets under management and relatively comparable asset composition prepared by Nuveen.

In reviewing profitability, the Independent Board Members recognized the subjective nature of determining profitability which may be affected by numerous factors including the allocation of expenses. Further, the Independent Board Members recognized the difficulties in making comparisons as the profitability of other advisers generally is not publicly available and the profitability information that is available for certain advisers or management firms may not be representative of the industry and may be affected by, among other things, the adviser s particular business mix, capital costs, types of funds managed and expense allocations. Notwithstanding the foregoing, the Independent Board Members reviewed Nuveen s methodology and assumptions for allocating expenses across product lines to determine profitability. In reviewing profitability, the Independent Board Members recognized Nuveen s investment in its fund business.

Based on their review, the Independent Board Members concluded that Nuveen s level of profitability for its advisory activities was reasonable in light of the services provided. In addition, with respect to Security Capital and Wellington, which are unaffiliated with Nuveen, the Independent Board Members also considered each such Sub-Adviser s revenues, expenses and profitability margins (pre- and post-tax). Based on their review, the Independent Board Members were satisfied that each such Sub-Adviser s level of profitability was reasonable in light of the services provided.

In evaluating the reasonableness of the compensation, the Independent Board Members also considered other amounts paid to a Fund Adviser by the Fund as well as any indirect benefits (such as soft dollar arrangements, if any) the Fund Adviser and its affiliates receive, or are expected to receive, that are directly attributable to the management of the Fund, if any. See Section E below for additional information on indirect benefits a Fund Adviser may receive as a result of its relationship with the Fund. Based on their review of the overall fee arrangements of the Fund, the Independent Board Members determined that the advisory fees and expenses of the Fund were reasonable.

## D. Economies of Scale and Whether Fee Levels Reflect These Economies of Scale

With respect to economies of scale, the Independent Board Members have recognized the potential benefits resulting from the costs of a fund being spread over a larger asset base, although economies of scale are difficult to measure and predict with precision, particularly on a fund-by-fund basis. One method to help ensure the shareholders share in

Annual Investment Management Agreement Approval Process (continued)

these benefits is to include breakpoints in the advisory fee schedule. Generally, management fees for funds in the Nuveen complex are comprised of a fund-level component and a complex-level component, subject to certain exceptions. Accordingly, the Independent Board Members reviewed and considered the applicable fund-level breakpoints in the advisory fee schedules that reduce advisory fees as asset levels increase. Further, the Independent Board Members noted that although closed-end funds may from time to time make additional share offerings, the growth of their assets will occur primarily through the appreciation of such funds investment portfolio.

In addition to fund-level advisory fee breakpoints, the Board also considered the Fund s complex-wide fee arrangement. Pursuant to the complex-wide fee arrangement, the fees of the funds in the Nuveen complex are generally reduced as the assets in the fund complex reach certain levels. The complex-wide fee arrangement seeks to provide the benefits of economies of scale to fund shareholders when total fund complex assets increase, even if assets of a particular fund are unchanged or have decreased. The approach reflects the notion that some of Nuveen s costs are attributable to services provided to all its funds in the complex and therefore all funds benefit if these costs are spread over a larger asset base.

Based on their review, the Independent Board Members concluded that the breakpoint schedules and complex-wide fee arrangement were acceptable and reflect economies of scale to be shared with shareholders when assets under management increase.

### E. Indirect Benefits

In evaluating fees, the Independent Board Members received and considered information regarding potential fall out or ancillary benefits the respective Fund Adviser or its affiliates may receive as a result of its relationship with the Fund. In this regard, the Independent Board Members considered any revenues received by affiliates of NAM for serving as agent at Nuveen s trading desk and as co-manager in initial public offerings of new closed-end funds.

In addition to the above, the Independent Board Members considered whether each Fund Adviser received any benefits from soft dollar arrangements whereby a portion of the commissions paid by the Fund for brokerage may be used to acquire research that may be useful to the Fund Adviser in managing the assets of the Fund and other clients. With respect to NAM, the Independent Board Members noted that NAM does not currently have any soft dollar arrangements; however, to the extent certain bona fide agency transactions that occur on markets that traditionally trade on a principal basis and riskless principal transactions are considered as generating commissions, NAM intends to comply with the applicable safe harbor provisions.

With respect to NWQ and Security Capital, the Independent Board Members considered that such Sub-Advisers may benefit from their soft dollar arrangements pursuant to which the respective Sub-Adviser receives research from brokers that execute the Fund s portfolio transactions. With respect to Wellington, the Independent Board Members noted that while Wellington does have some soft dollar arrangements with respect to some of its agency trades, the trades in fixed income securities held by the Fund are done on a principal basis and do not generate soft dollar credits. For NWQ, Security Capital and Wellington, the Independent Board Members further noted that such Sub-Advisers profitability may be lower if they were required to pay for this research with hard dollars. With respect to Symphony, the Board considered that Symphony currently does not enter into soft dollar arrangements; however, it has adopted a soft dollar policy in the event it does so in the future.

Based on their review, the Independent Board Members concluded that any indirect benefits received by a Fund Adviser as a result of its relationship with the Fund were reasonable and within acceptable parameters.

### F. Other Considerations

The Independent Board Members did not identify any single factor discussed previously as all-important or controlling. The Board Members, including the Independent Board Members, unanimously concluded that the terms of the Investment Management Agreement and Sub-advisory Agreements are fair and reasonable, that the respective Fund Adviser s fees are reasonable in light of the services provided to the Fund and that the Investment Management Agreement and the Sub-advisory Agreements be renewed.

Reinvest Automatically Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

### **Nuveen Closed-End Funds Automatic Reinvestment Plan**

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you Il be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

### Easy and convenient

To make recordkeeping easy and convenient, each quarter you ll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

### How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund s shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares net asset value or 95% of the shares market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the distribution payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### **Flexible**

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your financial advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

## Call today to start reinvesting distributions

Glossary of Terms Used in this Report

- n Average Annual Total Return: This is a commonly used method to express an investment s performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment s actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- n *Collateralized Debt Obligations (CDOs):* Collateralized debt obligations are a type of asset-backed security constructed from a portfolio of fixed-income assets. CDOs usually are divided into different tranches having different ratings and paying different interest rates. Losses, if any, are applied in reverse order of seniority and so junior tranches generally offer higher coupons to compensate for added default risk.
- n *Current Distribution Rate:* Current distribution rate is based on the Fund s current annualized quarterly distribution divided by the Fund s current market price. The Fund s quarterly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the calendar year the Fund s cumulative net ordinary income and net realized gains are less than the amount of the Fund s distributions, a tax return of capital.
- n *Net Asset Value (NAV):* A Fund s NAV per common share is calculated by subtracting the liabilities of the Fund (including any debt or preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of common shares outstanding. Fund NAVs are calculated at the end of each business day.

### ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Registrant s Board implemented after the registrant last provided disclosure in response to this item.

### ITEM 11. CONTROLS AND PROCEDURES.

- (a) The registrant s principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (the Exchange Act) (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting.

### ITEM 12. EXHIBITS.

File the exhibits listed below as part of this Form.

- (a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable to this filing. (a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT attached hereto.
- (a)(3) Any written solicitation to purchase securities under Rule 23c-1 under the 1940 Act (17 CFR 270.23c-1) sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons: Not applicable. (b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certifications required by Rule 30a-2(b) under the 1940 Act (17 CFR 270.30a-2(b)); Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b)), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed filed for purposes of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.
