LIFE TECHNOLOGIES CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation

Financial Statement Preparation

The unaudited consolidated financial statements have been prepared by Life Technologies Corporation according to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted. The Company has evaluated subsequent events through the date the financial statements were issued.

In the opinion of management, the accompanying unaudited consolidated financial statements for the periods presented reflect all adjustments, which are normal and recurring, necessary to fairly state the financial position, results of operations and cash flows. These unaudited consolidated financial statements should be read in conjunction with the audited financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 filed with the SEC on February 25, 2011.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of Consolidation

The consolidated financial statements include the accounts of Life Technologies Corporation and its majority owned or controlled subsidiaries, collectively referred to as Life Technologies (the Company). All significant intercompany accounts and transactions have been eliminated in consolidation. When there is a portion of equity in an acquired subsidiary not attributable, directly or indirectly, to the parent, the Company records the fair value of the noncontrolling interests at the acquisition date and classifies the amounts attributable to noncontrolling interests separately in equity in the Company's Consolidated Financial Statements. Any subsequent changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary are accounted for as equity transactions. For details on the noncontrolling interests, refer to Note 2 Reconciliation of Equity.

For purposes of these Notes to Consolidated Financial Statements, gross profit is defined as revenues less cost of revenues and purchased intangibles amortization and gross margin is defined as gross profit divided by revenues. Operating income is defined as gross profit less operating expenses and operating margin is defined as operating income divided by revenues.

Long-Lived Assets

The Company periodically re-evaluates the original assumptions and rationale utilized in the establishment of the carrying value and estimated lives of its long-lived assets. The criteria used for these evaluations include management's estimate of the asset's continuing ability to generate income from operations and positive cash flow in future periods as well as the strategic significance of any intangible asset to the Company's business objectives. If assets are considered to be impaired, the impairment recognized is the amount by which the carrying value of the assets exceeds the fair value of the assets, which is determined by applicable market prices, when available. The Company did not recognize a significant impairment during the period.

Fair Value of Financial Instruments

We account for our financial instruments at fair value based on *ASC Topic 820, Fair Value Measurements and Disclosures* and *ASC Topic 815, Derivatives and Hedging*. In determining fair value, we consider both the credit risk of our counterparties and our own creditworthiness. *ASC Topic 820, Fair Value Measurements and Disclosures*, defines fair value and establishes a framework for measuring fair value. The framework requires the valuation of investments using a three tiered approach. The Company applies the valuation techniques consistently, and reviews and evaluates the adequacy of the valuation techniques periodically.

Table of Contents

A derivative is an instrument whose value is derived from an underlying instrument or index, such as interest rates, equity securities, currencies, commodities or credit spreads. Derivatives include futures, forwards, swaps, or option contracts, or other financial instruments with similar characteristics. Derivative contracts often involve future commitments to exchange interest payment streams or currencies based on a notional or contractual amount (e.g., interest rate swaps or currency forwards).

The accounting for changes in fair value of a derivative instrument depends on the nature of the derivative and whether the derivative qualifies as a hedging instrument in accordance with *ASC Topic 815, Derivatives and Hedging*. Those hedging instruments that qualify for hedge accounting are included as an adjustment to revenue or interest expense, depending upon the underlying transactions the Company is hedging for. Those hedges that do not qualify for hedge accounting are included in non-operating income. The Company does not engage in speculative hedging.

For further details on the assets and liabilities subject to fair value measurements and the related valuation techniques used, and for details on derivative instruments, refer to Note 10 of the Notes to Consolidated Financial Statements.

Computation of Earnings Per Share

Basic earnings per share was computed by dividing net income attributable to Life Technologies by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur from the following items:

Convertible senior notes where the effect of those securities is dilutive;

Dilutive stock options and restricted stock units;

Dilutive performance awards; and

Dilutive Employee Stock Purchase Plan (ESPP).

Computations for basic and diluted earnings per share are as follows:

(in thousands, except per share data) (unaudited)	Net Income Attributable to Life Technologies	Shares	Earnings Per Share
	(Numerator)	(Denominator)	
Three Months Ended March 31, 2011			
Basic earnings per share:

Potentially dilutive securities not included above since they are antidilutive:

Antidilutive stock options		3,889	
----------------------------	--	-------	--

Table of Contents***Share-Based Compensation***

Under the Life Technologies Corporation 2009 Equity Incentive Plan (the 2009 Plan), the Company has the ability to grant stock options, stock appreciation rights, restricted stock units, restricted stock awards, performance awards, and deferred stock awards with 11.0 million shares of the Company's common stock reserved for granting of new awards. Stock option awards are granted to eligible employees and directors at an exercise price equal to the fair market value of such stock on the date of grant, generally vest over four years, and are exercisable in whole or in installments and expire ten years from the date of grant. Restricted stock awards and restricted stock units are granted to eligible employees and directors and represent rights to receive shares of common stock at a future date, generally vesting over three or four years. An exercise price and monetary payment are not required for receipt or issuance of restricted stock awards and restricted stock units, instead, consideration is furnished in the form of the participant's services to the Company. The compensation cost for these awards is valued based on the estimated fair value of such award on the date of grant.

Effective February 1, 2010 the Company's qualified employee stock purchase plan (the 2010 Plan) covers all eligible employees of the Company. Eligible employees may elect to withhold up to 15% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase. The 2010 Plan replaced the 1999 Plan acquired as a result of the AB acquisition and the 2004 Plan. Prior to February 1, 2010, the Company had a qualified (the 2004 Plan) employee stock purchase plan (purchase rights) whereby eligible employees of Life Technologies (previously known as Invitrogen Corporation) could elect to withhold up to 15% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase. The Company also had a qualified (the 1999 Plan) employee stock purchase plan whereby eligible legacy Applied Biosystems Inc. (AB) employees could elect to withhold up to 10% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase.

The Company uses the Black-Scholes option-pricing model (Black-Scholes model) to value share-based employee stock option and purchase right awards. The determination of fair value of stock-based payment awards using an option-pricing model requires the use of certain estimates and assumptions that affect the reported amount of share-based compensation cost recognized in the Consolidated Statements of Operations. Among these include the expected term of options, estimated forfeitures, expected volatility of the Company's stock price, expected dividends and the risk-free interest rate.

The expected term of share-based awards represents the weighted-average period the awards are expected to remain outstanding and is an input in the Black-Scholes model. In determining the expected term of options, the Company considered various factors including the vesting period of options granted, employees' historical exercise and post-vesting employment termination behavior, expected volatility of the Company's stock and aggregation by homogeneous employee groups. The Company used a combination of the historical volatility of its stock price and the implied volatility of market-traded options of the Company's stock with terms of up to approximately one year to estimate the expected volatility assumption input to the Black-Scholes model in accordance with *ASC Topic 718, Compensation - Stock Compensation*. The Company's decision to use a combination of historical and implied volatility was based upon the availability of actively traded options of its stock and its assessment that such a combination was more representative of future expected stock price trends. The risk-free interest rate is based upon United States Treasury securities with remaining terms similar to the expected term of the share-based awards. The expected dividend yield assumption is based on the Company's expectation of future dividend payouts. The Company has never declared or paid any cash dividends on its common stock and currently does not anticipate paying such cash dividends.

Table of Contents*Stock Options and Purchase Rights*

The underlying assumptions used to value employee stock options and purchase rights granted during the three months ended March 31, 2011 and 2010 were as follows:

(unaudited)	Three months ended	
	2011	March 31, 2010
Stock Options		
Weighted average risk free interest rate	2.06%	1.99%
Expected term of share-based awards	4.3 yrs	4.4 yrs
Expected stock price volatility	31%	31%
Expected dividend yield	0%	0%
Weighted average fair value of share-based awards granted	\$ 15.93	\$ 14.77
Purchase Rights		
Weighted average risk free interest rate	0.70%	0.59%
Expected term of share-based awards	1.5 yrs	0.8 yrs
Expected stock price volatility	36%	44%
Expected dividend yield	0%	0%
Weighted average fair value of share-based awards granted	\$ 9.73	\$ 9.06

The Company is required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods on a cumulative basis in the period the estimated forfeiture rate changes. The Company considered its historical experience of pre-vesting option forfeitures as the basis to arrive at its estimated annual pre-vesting option forfeiture rate of 5.7% and 5.7% per year for the three months ended March 31, 2011 and 2010, respectively. All option awards, including those with graded vesting, were valued as a single award with a single average expected term and are amortized on a straight-line basis over the requisite service period of the awards, which is generally the vesting period. At March 31, 2011, there was \$42.7 million remaining in unrecognized compensation cost related to employee stock options, which is expected to be recognized over a weighted average period of 1.6 years. No compensation cost was capitalized in inventory during the three months ended March 31, 2011 as the amounts involved were not material.

Total share-based compensation expense for employee stock options and purchase rights for the three months ended March 31, 2011 and 2010 was comprised of the following:

(in thousands, except per share amounts) (unaudited)	Three months ended	
	2011	March 31, 2010
Cost of revenues	\$ 1,147	\$ 1,305
Selling, general and administrative	7,218	7,581
Research and development	1,207	1,622
Share-based compensation expense before taxes	9,572	10,508
Related income tax benefits	3,249	2,840
Share-based compensation expense, net of taxes	\$ 6,323	\$ 7,668
Net share-based compensation expense per common share:		
Basic	\$ 0.04	\$ 0.04
Diluted	\$ 0.03	\$ 0.04
<i>Restricted Stock Units</i>		

Restricted stock units represent a right to receive shares of common stock at a future date determined in accordance with the participant's award agreement. An exercise price and monetary payment are not required for receipt of restricted stock units or the shares issued in settlement of the award. Instead, consideration is furnished in the form of the participant's services to the Company. Restricted stock units have cliff vesting terms which range from one to five years; however, these units generally vest over three to four years. Compensation cost for these awards is based on the estimated fair value on the date of grant and recognized as compensation expense on a straight-line basis over the requisite service period. There were no pre-vesting forfeitures estimated for the three months ended March 31, 2011 and 2010, respectively. At March 31, 2011, there was a \$63.9 million amount remaining in unrecognized compensation cost related to these awards, which is expected to be recognized over a weighted average period of 1.8 years. The weighted average fair value of restricted stock units granted during the three months ended March 31, 2011 and 2010 was \$55.69 and \$51.99, respectively.

Table of Contents

Total share-based compensation expense for restricted stock units for the three months ended March 31, 2011 and 2010 was composed of the following:

(in thousands, except per share amounts) (unaudited)	Three months ended March 31,	
	2011	2010
Cost of revenues	\$ 782	\$ 631
Selling, general and administrative	7,840	6,555
Research and development	1,036	905
Share-based compensation expense before taxes	9,658	8,091
Related income tax benefits	3,510	3,127
Share-based compensation expense, net of taxes	\$ 6,148	\$ 4,964
Net share-based compensation expense per common share:		
Basic	\$ 0.03	\$ 0.03
Diluted	\$ 0.03	\$ 0.03

Deferred Stock Awards and Restricted Stock Awards

Deferred stock awards are fully vested and expensed when issued, but shares are placed in a deferral account under the Life Technologies Corporation Deferred Compensation Plan (the Deferred Compensation Plan), at an eligible employee's or director's discretion, until distributed to the employee or director at a future date. The Deferred Compensation Plan allows eligible directors and employees to defer, on a pre-tax basis, a portion or all of their compensation, bonuses, or director's fees in the form of cash or deferred stock awards. The deferred compensation plan provides matching contributions by the Company to the participants, based on the deferred compensation plan agreement, in the form of restricted stock awards. During the three months ended March 31, 2011, the Company granted restricted stock awards with a total deferred compensation value of \$1.4 million, which will be recognized over the requisite service period of 3 years. The restricted stock awards, issued but unvested, are also held in the deferral account, and are subject to a three year cliff vesting. Refer to Note 10 Fair Value of Financial Instruments for further information on the fair market valuation of the deferred compensation plan assets.

Recent Accounting Pronouncements

In October 2009, FASB issued ASU 2009-14, *Revenue Arrangements Containing Software Elements*, updating ASC Topic 605, *Revenue Recognition*. This guidance amends ASU 2009-13 to exclude from its scope all tangible products containing both software and non-software components that operate together to deliver the product's essential functionality. This guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted; therefore, the Company has adopted this pronouncement in the fiscal year beginning January 1, 2010 along with other related pronouncements. Upon adoption, the pronouncement did not have a material impact on its consolidated financial statements and is not expected to have a material impact on our future operating results.

In October 2009, FASB issued ASU 2009-13, *Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*, updating ASC Topic 605, *Revenue Recognition*. ASU 2009-13 requires multiple-deliverable arrangements to be separated using a selling price hierarchy for determining the selling price of a deliverable and significantly expands disclosure requirements of such arrangements. The selling price for each deliverable will be based on vendor-specific objective evidence (VSOE) if available, the third-party evidence if VSOE is not available, or estimated selling price if VSOE and third-party evidence are not available. Arrangement consideration will be allocated at the inception of the arrangement to all deliverables using the relative selling price method. The relative selling price method allocates any discount in the arrangement proportionally to each deliverable on the basis of each deliverable's estimated selling price. This guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted; therefore,

the Company has adopted this pronouncement in the fiscal year beginning January 1, 2010 along with other related pronouncements. Upon adoption, the pronouncement did not have a material impact on its consolidated financial statements and is not expected to have a material impact on our future operating results.

Table of Contents**2. Composition of Certain Financial Statement Items*****Inventories***

Inventories consisted of the following:

(in thousands)	March 31, 2011 (unaudited)	December 31, 2010
Raw materials and components	\$ 95,284	\$ 87,557
Work in process (materials, labor and overhead)	69,535	63,772
Finished goods (materials, labor and overhead)	175,581	171,989
Total inventories, net	\$ 340,400	\$ 323,318

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consisted of the following:

(in thousands)	March 31, 2011 (unaudited)	December 31, 2010
Hedge assets	\$ 7,378	\$ 15,189
Prepaid expenses	75,243	70,395
Other current assets	93,297	104,419
Total prepaid expenses and other current assets	\$ 175,918	\$ 190,003

Property and Equipment

Property and equipment consisted of the following:

(in thousands)	Estimated useful life	March 31, 2011 (unaudited)	December 31, 2010
Land		\$ 139,770	\$ 139,638
Building and improvements	1-50 years	464,833	449,962

Goodwill and Other Intangible Assets

The \$21.8 million increase in goodwill on the Consolidated Balance Sheet from December 31, 2010 to March 31, 2011 was primarily the result of \$23.2 million in foreign currency translation adjustments, offset by \$1.4 million in recent immaterial business combination activities.

Table of Contents

Intangible assets consisted of the following:

(in thousands)	March 31, 2011			December 31, 2010		
	Weighted average Life	Gross carrying Amount (unaudited)	Accumulated Amortization	Weighted average Life	Gross carrying Amount	Accumulated Amortization
Amortized intangible assets:						
Purchased technology	7 years	\$ 1,230,358	\$ (826,870)	7 years	\$ 1,227,942	\$ (797,694)
Purchased tradenames and trademarks	9 years	326,220	(129,038)	9 years	323,863	(120,573)
Purchased customer base	11 years	1,445,872	(338,433)	12 years	1,441,781	(305,865)
Other intellectual property	6 years	301,106	(125,170)	6 years	299,586	(111,216)
Total intangible assets		\$ 3,303,556	\$ (1,419,511)		\$ 3,293,172	\$ (1,335,348)
Intangible assets not subject to amortization:						
Purchased tradenames and trademarks		\$ 7,451			\$ 7,451	
In-process research and development		74,900			74,900	

Amortization expense related to purchased intangible assets for the three months ended March 31, 2011 and 2010 was \$76.2 million and \$70.1 million, respectively. Estimated aggregate amortization expense is expected to be \$227.7 million for the remainder of fiscal year 2011. Estimated aggregate amortization expense for fiscal years 2012, 2013, 2014 and 2015 is \$288.3 million, \$275.8 million, \$234.2 million, and \$217.0 million, respectively. During the three months ended March 31, 2011, there were no assets identified for impairment.

The Company capitalized \$74.9 million of acquired in-process research and development and assigned it an indefinite life according to *ASC Topic 805, Business Combinations*. Such assets are accounted for as indefinite life intangible assets subject to annual impairment testing, or earlier if an event or circumstance indicates that impairment may have occurred, until completion or abandonment of the acquired projects. Upon reaching the end of the research and development project, the Company will amortize the acquired in-process research and development over its estimated useful life, or expense the acquired in-process research and development should the research and development project be unsuccessful with no future alternative use.

Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following:

(in thousands)	March 31, 2011 (unaudited)	December 31, 2010
Accrued hedge liabilities	\$ 47,202	\$ 46,290
Accrued royalties	63,769	64,552
Accrued warranty	6,261	7,177
Accrued other	140,689	139,968
Total accrued expenses and other current liabilities	\$ 257,921	\$ 257,987

Table of Contents**Reconciliation of Equity**

The following table provides a reconciliation of the beginning and ending carrying amounts of total equity, equity attributable to the Company, and equity attributable to noncontrolling interests:

(in thousands)(unaudited)	Total	Common Stock	Additional Paid-in-Capital	Treasury Stock	Accumulated Other Comprehensive Income	Retained Earnings	Non- Controlling Interests
Balance at December 31, 2010	\$ 4,438,029	\$ 2,072	\$ 5,222,859	\$ (1,419,966)	\$ 96,612	\$ 532,499	\$ 3,953

Foreign currency translation adjustment, net of related tax effects	16,791				16,523		268
Net income / (loss)	93,579					93,687	(108)
Balance at March 31, 2011	\$ 4,385,375	\$ 2,086	\$ 5,287,557	\$ (1,653,807)	\$ 119,240	\$ 626,186	\$ 4,113

There was no change in the Company's ownership interest in its subsidiaries during the three months ended March 31, 2011 or 2010.

Comprehensive Income

Total comprehensive income consisted of the following and is shown net of related tax effects:

(in thousands)(unaudited)	Three months ended March 31,	
	2011	2010
Net income, as reported	\$ 93,579	\$ 91,507
Realized loss on hedging transactions, reclassified into earnings	14,069	2,481

Edgar Filing: Life Technologies Corp - Form 10-Q

Unrealized gain (loss) on hedging transactions	(10,448)	13,974
Pension liability adjustment	2,484	(2,523)
Foreign currency translation adjustment	16,791	(5,228)
Total comprehensive income	\$ 116,475	\$ 100,211
Less comprehensive income attributable to noncontrolling interest	(160)	
Total comprehensive income attributable to the Company	\$ 116,315	\$ 100,211

Table of Contents**3. Business Combinations and Divestitures***Business Combinations*

The Company completed several acquisitions that were not individually or collectively considered material to the overall consolidated financial statements and the results of the Company's operations. These acquisitions have been included in the consolidated financial statements from the respective dates of the acquisitions. Certain acquisitions, including Ion Torrent which was consummated in October 2010, contained contingent consideration arrangements that require the Company to continuously assess and adjust the fair value of the contingent consideration liabilities, if necessary, until the settlement or expiration of the contingency occurs.

In October 2010, the Company acquired all outstanding equity shares of Ion Torrent with an upfront payment of \$375.0 million, and time and technology based milestones of \$350.0 million. The merger agreement stipulates that payments are made in a combination of cash and the Company's common stock for the upfront payment and any milestone payments. During 2010, the Company issued, as part of the upfront payment and satisfaction of the \$50.0 million milestone, which was earned and paid in November 2010, 3.4 million shares of common stock, or the equivalent of \$159.3 million, and paid cash in the aggregate of \$263.2 million. If earned, the technology based milestone of \$300.0 million will be paid in January 2012 with a combination of cash and Company common stock. Under ASC Topic 805, *Business Combinations*, the Company is required to fair value contingent consideration at the date of acquisition. The Company considered the \$300.0 million milestone a contingent consideration and fair valued this contingent consideration at \$260.8 million at the date of acquisition by applying a weighted average probability on the achievement of the technological milestones based on the assessment developed during the valuation process, then deriving the present value of the outcome from the time at which the obligation is settled by applying a discount rate that incorporated a market participant's view of the risk associated with the expected milestone payment. The Company will assess the fair value of contingent consideration periodically with subsequent revisions reflected in the Consolidated Statement of Operations. The \$50.0 million milestone was assessed at 100% probability of occurring, and therefore considered a financing arrangement and accrued at the acquisition date. Refer to Note 10 Fair Value of Financial Instruments for additional information on the fair market valuation of the contingent consideration liabilities and subsequent adjustments.

Divestiture of Equity Investment

In January 2010, the Company completed the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture for \$435.9 million in cash, excluding transactions costs, and recorded a gain of \$45.1 million in other income in the Consolidated Statement of Operations for the three months ended March 31, 2010.

The Company finalized the transaction during the second quarter of 2010, and received total cash of \$428.1 million, excluding taxes and transaction costs, and recorded a gain of \$37.3 million as result of conventional working capital adjustments. Included in the sale was the carrying value of the equity investment of \$330.4 million, accounts receivable of \$71.3 million, net inventory of \$55.1 million, other current assets of \$17.6 million, long-term assets of \$13.7 million, accounts payable of \$9.8 million, other current liabilities of \$80.8 million, and long-term liabilities of \$6.7 million.

Business Consolidation Costs

The Company continues to integrate recent and pending acquisitions and divestitures into its operations and recorded approximately \$14.7 million and \$25.3 million for the three months ended March 31, 2011 and 2010, respectively. The expenses were primarily related to severance and other costs associated with the integration of acquired and existing businesses.

Table of Contents**4. Long-Term Debt**

Long-term debt consisted of the following:

(in thousands)	March 31, 2011 (unaudited)	December 31, 2010
3.375% Senior Notes (principal due 2013), net of unamortized discount	\$ 249,924	\$ 249,914
4.400% Senior Notes (principal due 2015), net of unamortized discount	498,669	498,592
3.500% Senior Notes (principal due 2016), net of unamortized discount	399,389	399,360
6.000% Senior Notes (principal due 2020), net of unamortized discount	748,595	748,565
5.000% Senior Notes (principal due 2021), net of unamortized discount	398,258	398,224
1 1/2% Convertible Senior Notes (principal due 2024), net of unamortized discount	433,230	428,356
3 1/4% Convertible Senior Notes (principal due 2025), net of unamortized discount	347,663	345,360
Capital leases	6,508	7,002
Total debt	3,082,236	3,075,373
Less current portion	(783,395)	(347,749)
Total long-term debt	\$ 2,298,841	\$ 2,727,624

Senior Notes

On February 10, 2010, the Company filed a prospectus that allows the Company to issue in one or more offerings, senior or subordinated debt securities covered by the prospectus by filing a prospectus supplement that contains specific information about the securities and specific terms being offered. In aggregate, the Company has issued a principal amount of \$2,300.0 million of fixed unsecured and unsubordinated Senior Notes (the Notes) as of March 31, 2011, of which \$1,500.0 million were offered in February 2010 and \$800.0 million were offered in December 2010. During February 2010, the Company issued \$1,500.0 million of fixed rate unsecured notes which consisted of an aggregate principal amount of \$250.0 million of 3.375% Senior Notes due 2013 (the 2013 Notes) at an issue price of 99.95%, an aggregate principal amount of \$500.0 million of 4.40% Senior Notes due 2015 (the 2015 Notes) at an issue price of 99.67% and an aggregate principal amount of \$750.0 million of 6.00% Senior Notes due 2020 (the 2020 Notes) at an issue price of 99.80%. During December 2010, the Company issued an additional \$800.0 million of fixed rate unsecured notes which consisted of an aggregate principal amount of \$400.0 million of 3.50% Senior Notes due 2016 (the 2016 Notes) at an issue price of 99.84% and an aggregate principal amount of \$400.0 million of 5.00% Senior Notes due 2021 (the 2021 Notes) at an issue price of 99.56%.

As a result, the Company recorded an aggregate \$3.3 million of debt discounts for the 2013 Notes, 2015 Notes and 2020 Notes at the time of issuance in February 2010, and an aggregate \$2.4 million of debt discounts for the 2016 Notes and 2021 Notes at the time of issuance in December 2010. At March 31, 2011, the unamortized debt discount balance was \$2.8 million for the 2013 Notes, 2015 Notes, and 2020 Notes, and \$2.4 million for the 2016 Notes and 2021 Notes. The debt discounts are amortized over the lives of the associated Notes using the effective interest method.

The aggregate net proceeds from the offering in February 2010 were \$1,484.8 million after deducting the debt discount as well as an underwriting discount of \$11.9 million. Total deferred financing costs associated with the issuance of these senior notes were \$14.4 million, including the \$11.9 million underwriting discount and \$2.5 million of legal and accounting fees. The aggregate net proceeds from the offering in December 2010 were \$791.6 million after deducting the debt discount as well as underwriting discounts of \$6.0 million. Total deferred financing costs were \$7.4 million, including the \$6.0 million underwriting discount and \$1.4 million of legal and accounting fees.

Edgar Filing: Life Technologies Corp - Form 10-Q

At March 31, 2011, the unamortized issuance costs for the Senior Notes were \$12.2 million for the February 2010 offering, which are expected to be recognized over a weighted average period of 6.7 years, and \$7.0 million for the December 2010 offering, which are expected to be recognized over a weighted average period of 7.5 years. The Company recognized aggregate interest expense, net of hedging transactions, of \$18.9 million and \$8.5 million for the February 2010 offering and December 2010 offering, respectively, for the three months ended March 31, 2011 based on the effective interest rates of 3.39%, 4.47%, 3.53%, 6.03%, and 5.06% for the 2013, 2015, 2016, 2020 and 2021 Notes, respectively, with interest payments due semi-annually. The Company recognized total interest expense of \$8.4 million for the three months ended March 31, 2010 for the February 2010 offering.

Table of Contents

The Company, at its option, may redeem the Notes (prior to October 15, 2020 for the 2021 Notes) in whole or in part at any time at a redemption price equal to the greater of 100% of the principal amount of the notes to be redeemed and the sum of the present values of the remaining scheduled payments of the notes to be redeemed discounted on a semi-annual basis at a treasury rate equal to a comparable United States Treasury Issue at the redemption date plus 25 basis points for the 2016 Notes, 30 basis points for the 2013 Notes, the 2015 Notes, and the 2021 Notes, and 35 basis points for the 2020 Notes, plus accrued and unpaid interest through the date of redemption, if any. Commencing on October 15, 2020, the Company may redeem the 2021 Notes, in whole or in part, at any time, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest through the redemption date. Upon the occurrence of a change of control of the Company that results in a downgrade of the notes below an investment grade rating, the indenture requires under certain circumstances that the Company makes an offer to purchase then outstanding Senior Notes equal to 101% of the principal amount plus any accrued and unpaid interest to the date of repurchase.

The indentures governing the Senior Notes contain certain covenants that, among other things, limit the Company's ability to create or incur certain liens and engage in sale and leaseback transactions. In addition, the indenture limits the Company's ability to consolidate, merge, sell, convey, transfer, lease or otherwise dispose of all or substantially all of its property and assets. These covenants are subject to certain exceptions and qualifications.

During the year ended December 31, 2010, the Company entered into forward interest rate swap agreements for a notional amount totaling \$1,500.0 million for a certain part of Senior Notes issuances. These agreements were to hedge the variability in future probable interest payments attributable to changes in the benchmark interest rate from the date the Company entered into the forward interest rate swap agreements to the date the Company issued the Senior Notes. These agreements effectively hedged a series of semi-annual future interest payments to the fixed interest rates for forecasted debt issuances. The Company recorded total proceeds of \$4.3 million from the forward interest rate swaps in accumulated other comprehensive income, which will be reclassified to interest expense in the same period during which the hedged transactions affect interest expense.

The entire net proceeds from the 2013, 2015, and 2020 Notes offering in February 2010 were used to repay the outstanding balance of term loan A and term loan B, together with the net of tax proceeds from the sale of our 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, and cash on hand. The net proceeds from the 2016 and 2021 Notes offering in December 2010 will be used for general corporate purposes, which may include the repayment of existing indebtedness.

The Credit Agreement

In November 2008, the Company entered into a \$2,650.0 million credit agreement (the Credit Agreement) consisting of a revolving credit facility of \$250.0 million, a term loan A facility of \$1,400.0 million, and a term loan B facility of \$1,000.0 million to fund a portion of the cash consideration paid for the AB merger. During February 2010, the Company used the proceeds from the issuance of the Senior Notes, the net of tax proceeds from the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, along with cash on hand to pay off the entire outstanding term loan principal of \$1,972.5 million, which consisted of the carrying value of \$1,330.0 million of term loan A and \$642.5 million of term loan B, plus respective accrued interest due on the date of repayment. The Company recognized a loss of \$54.2 million on unamortized deferred financing costs associated with the repayments of term loan A and term loan B during the three months ended March 31, 2010. After the repayment of the term loans, the Credit Agreement was amended and restated related to the revolving credit facility. For details on the revolving credit facility, refer to Note 5 – Lines of Credit .

The Company entered into interest rate swaps with a \$1,000.0 million notional amount in January 2009 to convert a portion of variable rate interest payments of term loan A to fixed rate interest payments. As a result of the repayment of term loan A in February 2010, the Company de-designated and terminated the interest rate swaps in accordance with *ASC Topic 815, Derivatives and Hedging*, as the underlying transaction was no longer probable of occurring. The Company recognized a \$12.9 million loss in conjunction with the termination of the interest rate swaps during the three months ended March 31, 2010.

Edgar Filing: Life Technologies Corp - Form 10-Q

The contractual interest rates the Company made the interest payments on from the inception of the loan to the date of retirement were from 2.75% to 3.91% on term loan A based on LIBOR plus 2.5%, and from 5.25% to 6.00% on term loan B based on the base rate plus 2.0%. The Company recognized aggregate interest expense, net of hedging transactions, of \$11.0 million during the three months ended March 31, 2010 on the term loans.

Table of Contents*Convertible Senior Notes*

Effective January 1, 2009, the Company adopted a bifurcation requirement prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options*, with the retrospective application for our then outstanding \$1,150.0 million of Convertible Senior Notes, which consisted of \$350.0 million related to the 2% Convertible Senior Note (2023 Note), \$450.0 million related to the 1 1/2% Convertible Senior Note (2024 Note) and \$350.0 million related to the 3 1/4% Convertible Senior Note (2025 Note). Upon adoption of the provision, the Company retroactively recognized the carrying amount of \$100.0 million, \$129.8 million, and \$47.6 million for the equity components of the 2023, 2024 and 2025 Notes, respectively, with deferred tax impacts of \$39.1 million, \$50.7 million and \$18.6 million for the 2023, 2024 and 2025 Notes, respectively, and a liability component classified in long-term debt of \$250.0 million, \$320.2 million and \$302.4 million for the 2023, 2024 and 2025 Notes, respectively. The terms of the 2023 Notes, 2024 Notes, and 2025 Notes require the Company to settle the par value of such notes in cash and deliver shares only for the excess, if any, of the notes' conversion value based on conversion prices of \$34.12, \$51.02, and \$49.13 per share, respectively, over their par values.

In conjunction with the adoption of the provision, the Company applied the guidance to the Company's debt issuance costs. As a result, the Company allocated the underlying issuance costs associated with the Convertible Senior Notes to equity in the same ratio as when determining the appropriate debt discount. The Company allocated \$6.9 million to equity with a deferred tax impact of \$2.7 million, and reduced the amount of the debt issuance costs by \$6.9 million.

At March 31, 2011, the Company carried unamortized debt discounts of \$16.8 million and \$2.3 million for the 2024 and 2025 Notes, respectively, which are expected to be recognized over a weighted average period of 1.0 year. At December 31, 2010 the Company carried unamortized debt discounts of \$21.6 million and \$4.6 million for the 2024 and 2025 Notes, respectively. The Company recognized total interest cost of \$11.7 million for the three months ended March 31, 2011 based on the effective interest rates of 6.10% and 5.95% for the 2024 and 2025 Notes, respectively. The Company recognized total interest cost of \$17.4 million for the three months ended March 31, 2010 based on the effective interest rates of 7.21%, 6.10% and 5.95% for the 2023, 2024 and 2025 Notes, respectively. The interest expense consisted of \$4.5 million and \$6.3 million of contractual interest based on the stated coupon rate and \$7.2 million and \$11.1 million of amortization of the discount on the liability component for the three months ended March 31, 2011 and 2010, respectively.

The indenture allowed holders of our 2023 Notes to require the Company to purchase all or a portion of the 2023 Notes at par plus accrued and unpaid interest at the earliest on August 1, 2010 and it also permitted the Company to redeem, in whole or in part, the 2023 Notes at the Company's option on or after August 1, 2010. During July 2010, the Company notified the holders of 2023 Notes its intention to redeem all of the outstanding 2023 Notes on August 6, 2010 at par value. In response to the Company's announcement and prior to the August 6, 2010 redemption date, Note holders holding a total principal value of \$347.8 million exercised their option to exercise the redemption and conversion feature. As a result, total cash consideration of \$347.8 million and 2.4 million shares of the Company's common stock was issued to settle the par value and the excess of the Notes' conversion value based on a conversion price of \$34.12 per share. On August 6, 2010, the Company redeemed all of the remaining outstanding 2023 Notes for cash at par value. The amortization of debt discount and the issuance cost for the 2023 Notes was completed in July 2010, commensurate with the holder conversion option date. The Company did not recognize any gain or loss on the settlement of the 2023 Notes.

At March 31, 2011, the Company held the carrying value of \$433.2 million of 2024 Notes and \$347.7 million of 2025 Notes in current liabilities. The respective indenture allows our holders of the 2024 Notes and the 2025 Notes to require the Company to purchase all or a portion of the Notes at par plus any accrued and unpaid interest at the earliest on February 15, 2012 or June 15, 2011, respectively. In the event that the holders do not exercise such rights, the remaining balance of the Notes will be reclassified back to long-term debt. The indenture also permits the Company to redeem, in whole or in part, 2024 Notes and the 2025 Notes at the Company's option on or after February 15, 2012 or June 15, 2011, respectively.

5. Lines of Credit

Under the Credit Agreement, the Company entered into a revolving credit facility of \$250.0 million (the Revolving Credit Facility) with Bank of America, N.A. in November 2008. In May 2010, the Company amended and restated the Credit Agreement, expanding the Revolving Credit Facility to \$500.0 million for the purpose of general working capital, capital expenditures, and/or other capital needs. Fees associated with the Revolving Credit Facility include a commitment fee for unused funds ranging from 25.0 to 50.0 basis points; letter of credit fees ranging from 150.0 to 250.0 basis points; and interest on borrowings accrued at the Company's election based on base rate borrowing or Eurocurrency rate borrowing. The base rate borrowing rate is a margin of 50.0 to 150.0 basis points plus the higher of a) the Federal Funds Rate plus 50.0 basis points, b) Bank of America's prime rate, or c) the Eurocurrency rate plus 100.0 basis points. The Eurocurrency borrowing rate is a margin of 150.0 to 250.0 basis points plus the Eurocurrency borrowing rate.

Table of Contents

Margins and fees are based on a rate table specified in the agreement and determined by the Company's consolidated leverage ratio for the period. As of March 31, 2011, the Company has issued \$12.7 million of letters of credit under the Revolving Credit Facility and accordingly, the remaining available credit is \$487.3 million. The applicable borrowing rate would have been 2.55% and 1.80% at March 31, 2011 and December 31, 2010, respectively.

As of March 31, 2011 foreign subsidiaries in China, India, Mexico and Japan had available bank lines of credit denominated in local currency to meet short-term working capital requirements. The credit facilities bear interest at fixed rates or based on the TIBOR rate. Under these lines of credit, the United States dollar equivalent of these facilities totaled \$13.0 million at March 31, 2011, of which \$0.5 million was outstanding at March 31, 2011.

6. Commitments and Contingencies***Letters of Credit***

The Company had outstanding letters of credit totaling \$37.4 million at March 31, 2011, of which \$20.8 million was to support performance bond agreements, \$9.5 million was to support liabilities associated with the Company's self-insured worker's compensation programs, \$3.5 million was to support its building lease requirements, and \$3.6 million was to support duty on imported products.

Executive Employment Agreements

The Company has employment contracts with key executives that provide for the continuation of salary if terminated for reasons other than cause, as defined in those agreements. At March 31, 2011, future employment contract commitments for such key executives were approximately \$31.3 million. In certain circumstances, the employment agreements call for the acceleration of equity vesting. The non-cash financial impact of the acceleration of equity vesting is not reflected in the above information.

Acquisition-Related Contingent Obligations

The Company may have future payment obligations due to the contingent consideration arrangements agreed to between the Company and the respective sellers in conjunction with business combinations entered into. Such payments are based on certain technological milestones, patent milestones or the achievement of targeted sales milestones. According to the *ASC Topic 805, Business Combinations*, the Company records these obligations at fair value at the time of acquisition with subsequent fair value adjustments to the contingent consideration reflected in the line items of the Consolidated Statement of Operations commensurate with the nature of the contingent consideration. At March 31, 2011 and December 31, 2010, the total amount accrued for contingent consideration liabilities were \$264.5 million and \$263.3 million, respectively, of which \$263.9 million and zero were included in current liabilities, respectively. During the three months ended March 31, 2011, a \$1.9 million favorable adjustment to contingent consideration liabilities was recorded in cost of revenues, offset by a \$3.1 million time value accretion recorded in interest expense on previously recognized contingent consideration. The Company could be required to make additional contingent payments based on currently existing purchase agreements through 2012. For more information on business combination accounting, refer to Note 3 Business Combinations.

For the acquisitions the Company accounted for as asset purchases, contingent consideration liabilities are recorded and become an additional element of cost of the acquired assets when the contingency is resolved.

Environmental Liabilities

As a result of previous mergers and acquisitions, the Company assumed certain environmental exposure liabilities. At March 31, 2011, aggregate undiscounted environmental reserves were \$8.0 million, including current reserves of \$3.3 million. Based upon currently available information, the Company believes that it has adequately provided for these environmental exposures and that the outcome of these matters will not have a material adverse effect on its Consolidated Statement of Operations.

Litigation

We are subject to potential liabilities under government regulations and various claims and legal actions that are pending or may be asserted. These matters arise in the ordinary course and conduct of our business, and, at times, as a result of our acquisitions and dispositions. They include, for example, commercial, intellectual property, environmental, securities, and employment matters. Some are expected to be covered, at least partly, by insurance. We intend to continue to defend ourselves vigorously in such matters. We

Table of Contents

regularly assess contingencies to determine the degree of probability and range of possible loss for potential accrual in our financial statements. An estimated loss contingency is accrued in our financial statements if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Based on our assessment, we currently have accrued an immaterial amount in our financial statements for contingent liabilities associated with these legal actions and claims. Litigation is inherently unpredictable, and unfavorable resolutions could occur. As a result, assessing contingencies is highly subjective and requires judgment about future events. The amount of ultimate loss may exceed our current accruals, and it is possible that our cash flows or results of operations could be materially affected in any particular period by the unfavorable resolution of one or more of these contingencies.

Indemnifications

In the normal course of business, we enter into some agreements under which we indemnify third-parties for intellectual property infringement claims or claims arising from breaches of representations or warranties. In addition, from time to time, we provide indemnity protection to third-parties for claims relating to past performance arising from undisclosed liabilities, product liabilities, environmental obligations, representations and warranties, and other claims. In these agreements, the scope and amount of remedy, or the period in which claims can be made, may be limited. It is not possible to determine the maximum potential amount of future payments, if any, due under these indemnities due to the conditional nature of the obligations and the unique facts and circumstances involved in each agreement. Historically, payments made related to these indemnifications have not been material to our consolidated financial position.

Guarantees

The Company is a guarantor of a pension plan benefit that was assumed in conjunction with the AB merger, that is accounted for under *the ASC Topic 460, Guarantees*. As part of the divestiture of the Analytical Instruments business in 1999 by AB, the purchaser of the Analytical Instruments business has agreed to pay for the pension benefits for employees of a former German subsidiary. However, the Company was required to guarantee payment of these pension benefits should the purchaser fail to do so, because these payment obligations were not transferable to the buyer under German law. The guaranteed payment obligation is not expected to have a material adverse effect on the Consolidated Financial Statements.

7. Pension Plans and Postretirement Health and Benefit Program

The Company has several defined benefit pension plans covering its United States employees and employees in several foreign countries.

The components of net periodic pension cost (income) for the Company's pension plans and postretirement benefits plans for the three months ended March 31, 2011 and 2010 were as follows:

(in thousands) (unaudited)	Domestic Plans	
	Three months ended March 31	
	2011	2010
Service cost	\$ 261	\$ 8,861
Interest cost	9,958	8,861
Expected return on plan assets	(10,798)	(8,558)
Amortization of prior service cost	15	15
Amortization of actuarial loss	437	477
Settlement gain*		(5,473)
Net periodic pension income	\$ (127)	\$ (4,678)

Postretirement Plans
Three months ended March 31

Edgar Filing: Life Technologies Corp - Form 10-Q

(in thousands) (unaudited)	2011	2010
Service cost	\$ 16	\$ 46
Interest cost	451	329
Expected return on plan assets	(119)	(98)
Amortization of prior service cost (benefit)	(474)	60
Amortization of actuarial loss	183	197
Total periodic pension cost	\$ 57	\$ 534

Table of Contents

(in thousands) (unaudited)	Foreign Plans	
	Three months ended March 31	
	2011	2010
Service cost	\$ 861	\$ 986
Interest cost	1,342	1,419
Expected return on plan assets	(1,153)	(1,094)
Amortization of actuarial loss	46	58
Settlement (gain)/loss	(43)	18
Net periodic pension cost	\$ 1,053	\$ 1,387

* A settlement gain related to the lump sum benefit that the Company paid out during the three months ended March 31, 2010 in conjunction with the restructuring efforts that occurred upon the merger with AB as permitted by the plan provision upon termination.

8. Income Taxes

Income taxes are determined using an estimated annual effective tax rate applied against income, and then adjusted for the tax impacts of certain significant and discrete items. For the three months ended March 31, 2011, the Company treated the tax impact related to the following as discrete events for which the tax effect was recognized separately from the application of the estimated annual effective tax rate: (i) expenses related to foreign return to provision adjustments and reduced Medicare subsidies; offset by (ii) benefits related to the release of reserves for uncertain tax positions and disqualifying dispositions of qualified stock grants. The Company's effective tax rate recorded for the three months ended March 31, 2011 was 18.7%. Excluding the impact of the discrete items discussed above, the effective tax rate would have been 20.3%.

In accordance with the disclosure requirements as described in *ASC Topic 740, Income Taxes*, the Company has classified uncertain tax positions as non-current income tax liabilities, or a reduction in non-current deferred tax assets, unless expected to be paid in one year. The Company's continuing practice is to recognize interest and/or penalties related to income tax matters in income tax expense. It is reasonably possible that there will be a reduction to the balance of unrecognized tax benefits up to \$46.0 million in the next twelve months.

9. Stock Repurchase Programs

In December 2010, the Board of Directors of the Company approved a program (the December 2010 program), authorizing management to repurchase up to \$500.0 million of common stock. During the three months ended March 31, 2011, the Company repurchased 2.9 million shares of its common stock under the December 2010 program at a total cost of approximately \$150.4 million. The cost of repurchased shares is included in treasury stock and reported as a reduction in total equity when a repurchase occurs. No shares were repurchased under this program in 2010.

In July 2010, the Board of Directors of the Company approved a program (the July 2010 program) authorizing management to repurchase up to \$520.0 million of common stock over the next two years. As of December 31, 2010, the Company completed repurchasing 8.4 million shares at a total cost of \$436.6 million which was included in treasury stock and reported as a reduction in total equity. During the three months ended March 31, 2011, the Company repurchased an additional 1.5 million shares of its common stock at a total cost of \$83.4 million, thereby completing the July 2010 program by repurchasing an aggregate of 9.9 million shares at a total cost of \$520.0 million, the maximum amount authorized.

10. Fair Value of Financial Instruments*Cash and Cash Equivalents and Marketable Securities*

The carrying amounts of financial instruments such as cash equivalents, foreign cash accounts, accounts receivable, prepaid expenses, other current assets, accounts payable, accrued expenses, and other current liabilities approximate

the related fair values due to the short-term maturities of these instruments. The Company invests its excess cash into financial instruments which are readily convertible into cash, such as marketable securities, money market funds, corporate notes, government securities, highly liquid debt instruments, time deposits, and certificates of deposit with original maturities of three months or less at the date of purchase. The

Table of Contents

Company considers all highly liquid investments with maturities of three months or less from the date of purchase to be cash equivalents. The Company has established guidelines to maintain safety and liquidity for our financial instruments, and the cost of securities sold is based on the specific identification method.

Investments consisted of the following:

(in thousands)	March 31, 2011 (unaudited)	December 31, 2010
Short-term		
Bank time deposits	\$ 20,973	\$ 20,425
Foreign bonds	2,836	2,654
Total short-term investments	23,809	23,079
Long-term		
Equity securities	22,368	22,448
Total long-term investments	22,368	22,448
Total investments	\$ 46,177	\$ 45,527

ASC Topic 820, Fair Value Measurements and Disclosures has redefined fair value and has required the Company to establish a framework for measuring fair value and expand disclosures about fair value measurements. The framework requires the valuation of assets and liabilities subject to fair value measurements using a three tiered approach and fair value measurement be classified and disclosed in one of the following three categories:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices for similar assets and liabilities in active markets, quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

The following table represents the financial instruments measured at fair value on a recurring basis in the financial statements of the Company subject to *ASC Topic 820, Fair Value Measurements and Disclosures* and the valuation approach applied to each class of financial instruments:

(in thousands)(unaudited)	Fair Value Measurements at Reporting Date Using			
	Balance at March 31, 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Description				
Bank time deposits	\$ 20,973	\$ 20,973	\$	\$
Foreign bonds	2,836	2,836		
Money market funds	332,459	332,459		
Deferred compensation plan assets	29,068	29,068		

Edgar Filing: Life Technologies Corp - Form 10-Q

Assets-derivative forward exchange contracts	7,378		7,378	
Total assets	\$ 392,714	\$ 385,336	\$ 7,378	\$
Liabilities-derivative forward exchange contracts	47,202		47,202	
Contingent considerations	264,506			264,506
Total liabilities	\$ 311,708	\$	\$ 47,202	\$ 264,506

At March 31, 2011, the carrying value of the financial instruments measured and classified within Level 1 was based on quoted prices and marked to market.

The Company held foreign bonds which were classified as available-for-sale securities with a fair value of \$2.8 million as of March 31, 2011. During the three months ended March 31, 2011, there was no material gain or loss recorded in accumulated other comprehensive income, and there were no gains or losses reclassified out of accumulated other comprehensive income to earnings as a result of the sales of available-for-sale securities.

Table of Contents

The Company manages the Life Technologies Corporation Deferred Compensation Plan (the Deferred Compensation Plan) which allows eligible directors and employees to defer, on a pre-tax basis, a portion or all of their compensation, bonuses, or director's fees. As of March 31, 2011, the Company held \$29.1 million in deferred compensation plan assets which was invested in mutual funds. The fair market value of the assets held in the Deferred Compensation Plan was based on unadjusted quoted prices in active markets. The Company carries a corresponding deferred compensation liability of \$29.1 million as of March 31, 2011 in other long-term liabilities in its Consolidated Balance Sheet.

Exchange traded derivatives are valued using quoted market prices and classified within Level 1 of the fair value hierarchy. Level 2 derivatives include foreign currency forward contracts for which fair value is determined by using observable market spot rates and forward points adjusted by risk-adjusted discount rates. The risk-adjusted discount rate is derived by United States dollar zero coupon yield bonds for the corresponding duration of the maturity of derivatives, then adjusted with a counter party default risk for the value of our derivative assets or our credit risk for the value of our derivative liabilities. Credit risk is derived by observable credit default swaps (CDS) spreads. Because CDS spreads information is not available for our Company, our credit risk is determined by analyzing CDS spreads of similar size public entities in the same industry with similar credit ratings. The value of our derivatives discounted by risk-adjusted discount rates represents the present value of amounts estimated to be received for the assets or paid to transfer the liabilities at the measurement date from a marketplace participant in settlement of these instruments.

Contingent consideration arrangements obligate the Company to pay former owners of an acquired entity if specified future events occur or conditions are met such as the achievement of certain technological milestones, patent milestones or the achievement of targeted revenue milestones. The Company measures such liabilities using level 3 unobservable inputs, applying the income approach, such as the discounted cash flow technique, or the probability-weighted scenario method. The Company used various key assumptions, such as the probability of achievement on the agreed milestones arrangement and the discount rate, to represent the non-performing risk factors and time value when applying the income approach. The Company continuously monitors the fair value of the contingent considerations, with subsequent revisions reflected in the Statement of Operations in the line items commensurate with the underlying nature of milestone arrangements. For a further discussion on contingent consideration accounting, refer to Note 3 Business Combinations and Note 6 Commitments and Contingencies.

For financial instrument liabilities with significant Level 3 inputs, the following table summarizes the activity for the three months ended March 31, 2011:

(in thousands) (unaudited)	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)	
	Contingent Considerations	Total
Beginning balance at January 1, 2011	\$ 263,311	\$ 263,311
Total unrealized losses included in earnings	1,195	1,195
Ending balance at March 31, 2011	\$ 264,506	\$ 264,506
Total amount of unrealized losses for the period included in other comprehensive loss attributable to the change in fair market value of related liabilities still held at the reporting date	\$	\$

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Non-financial assets and liabilities are recognized at fair value subsequent to initial recognition when they are deemed to be other-than-temporarily impaired. There were no material non-financial assets and liabilities deemed to be other-than-temporarily impaired and measured at fair value on a nonrecurring basis for the three months ended March 31, 2011.

The Company evaluates its investments in equity and debt securities that are accounted for using the equity method or cost method to determine whether an other-than-temporary impairment or a credit loss exists at period end. At March 31, 2011, the Company held an aggregate \$22.4 million of long-term investments in non-publicly traded companies that are accounted for under the cost method. The Company assesses these investments for impairment each quarter, but does not calculate a fair value. Due to the nature of these investments, mainly non-public and early stage companies, the Company believes calculating a fair value not to be practicable. In the event the Company identified an indicator of impairment, the assessment of fair value would be based on all available factors, and may include valuation methodologies using level 3 unobservable inputs, which include discounted cash flows, estimates of sales proceeds and appraisals, as appropriate. At March 31, 2011, the Company determined that there was no event or change in

Table of Contents

circumstances that occurred which had a significant adverse effect on the fair value of the cost method investments during the three months ended March 31, 2011, and accordingly no material impairment charges were recorded during the period.

Foreign Currency and Derivative Financial Instruments

The Company translates the financial statements of its foreign subsidiaries using end-of-period exchange rates for assets and liabilities and average exchange rates during each reporting period for results of operations. Net gains or losses resulting from the translation of foreign financial statements and the effect of exchange rate changes on intercompany receivables and payables of a long-term investment nature are recorded as a separate component of stockholders' equity. These adjustments will affect net income only upon sale or liquidation of the underlying investment in a foreign subsidiary.

Some of the Company's reporting entities conduct a portion of their business in currencies other than the entity's functional currency. These transactions give rise to receivables and payables that are denominated in currencies other than the entity's functional currency. The value of these receivables and payables is subject to changes in currency exchange rates from the point in which the transactions are originated until the settlement in cash. Both realized and unrealized gains and losses in the value of these receivables and payables are included in the determination of net income. Net currency exchange gains (losses) recognized on business transactions, net of hedging transactions, were \$(2.1) million and \$3.8 million for the three months ended March 31, 2011 and March 31, 2010, respectively, and such gains and losses are included in other income/(expense) in the Consolidated Statements of Operations.

To manage the foreign currency exposure risk, the Company uses derivatives for activities in entities that have receivables and payables denominated in a currency other than the entity's functional currency. Realized and unrealized gains or losses on the value of financial contracts entered into to hedge the exchange rate exposure of these receivables and payables are also included in the determination of net income as they have not been designated for hedge accounting under *ASC Topic 815, Derivatives and Hedging*. These contracts, which settle in April 2011 through January 2012, effectively fix the exchange rate at which these specific receivables and payables will be settled in, so that gains or losses on the forward contracts offset the gains or losses from changes in the value of the underlying receivables and payables. At March 31, 2011, the Company had a notional principal amount of \$957.1 million in foreign currency forward contracts outstanding to hedge currency risk relative to our foreign receivables and payables.

The Company's international operating units conduct business in, and have functional currencies that differ from the parent entity, and therefore, the ultimate conversion of these sales to cash in United States dollars is subject to fluctuations in foreign currency. The Company's intent is to limit this exposure on the Company's Consolidated Statements of Operations and Consolidated Statements of Cash Flows from changes in currency exchange rates through hedging. Upon entering derivative transactions, when the United States dollar strengthens significantly against foreign currencies, the decline in the United States dollar value of future foreign currency revenue is offset by gains in the value of the forward contracts designated as hedges. Conversely, when the United States dollar weakens, the opposite occurs. The Company's currency exposures vary, but are primarily concentrated in the euro, British pound sterling, Japanese yen and Canadian dollar. The Company uses foreign currency forward contracts to mitigate foreign currency risk on forecasted foreign currency intercompany sales that are expected to be settled through July 2011. The change in fair value prior to their maturity is accounted for as cash flow hedges, and recorded in other comprehensive income, net of tax, in the Consolidated Balance Sheets according to *ASC Topic 815, Derivatives and Hedging*. To the extent any portion of the forward contracts is determined to not be an effective hedge, the increase or decrease in value prior to the maturity is recorded in other income/(expense) in the Consolidated Statements of Operations.

At March 31, 2011, the Company had a notional principal amount of \$280.6 million in foreign currency forward contracts outstanding to hedge foreign currency revenue risk under *ASC Topic 815, Derivatives and Hedging*. During the three months ended March 31, 2011, the Company did not have any material losses or gains related to the ineffective portion of its hedging instruments in other expense in the Consolidated Statements of Operations. No hedging relationships were terminated as a result of ineffective hedging or forecasted transactions no longer probable of occurring for foreign currency forward contracts. The Company continuously monitors the probability of forecasted transactions as part of the hedge effectiveness testing. The Company reclasses deferred gains or losses reported in accumulated other comprehensive income into revenue when the consolidated earnings are impacted, which for

intercompany sales are when the inventory is sold to a third party. For intercompany sales hedging, the Company uses an inventory turnover ratio for each international operating unit to align the timing of a hedged item and a hedging instrument to impact the Consolidated Statements of Operations during the same reporting period. At March 31, 2011, the Company expects to recognize \$36.0 million of net losses on derivative instruments currently classified under accumulated other comprehensive income to revenue, offsetting the change in revenue due to foreign currency translation, during the next twelve months.

Table of Contents

In January of 2009, the Company entered into interest rate swap agreements that effectively converted variable rate interest payments to fixed rate interest payments for a notional amount of \$1,000.0 million (a portion of term loan A) of which \$300.0 million of swap payment arrangements would have expired in January of 2012 and \$700.0 million of swap payment arrangements would have expired in January of 2013. During February 2010, term loan A and term loan B were fully repaid in conjunction with the new senior notes issuance. As a result, the Company de-designated the hedging relationship due to the forecasted transactions no longer being probable of occurring and recognized a \$12.9 million loss during the three months ended March 31, 2010 as a discontinuance of the cash flow hedges in accordance with *ASC Topic 815, Derivatives and Hedging*. During the three months ended March 31, 2011 and 2010, respectively, the Company recognized de minimus gain or loss related to the ineffective portion of its designated hedging instruments in other expense in the Consolidated Statements of Operations.

During the year ended December 31, 2010, the Company entered into forward interest rate swap agreements for a notional amount totaling \$1,500.0 million for a certain part of Senior Notes issuances. These agreements were to hedge the variability in future probable interest payments attributable to changes in the benchmark interest rate from the date the Company entered into the forward interest rate swap agreements to the date the Company issued the Senior Notes. These agreements effectively hedged a series of semi-annual future interest payments to the fixed interest rates for forecasted debt issuances. The Company recorded total proceeds of \$4.3 million from the forward interest rate swaps in accumulated other comprehensive income, which will be reclassified to interest expense in the same period during which the hedged transactions affect interest expense.

The following table summarizes the fair values of derivative instruments at March 31, 2011 and December 31, 2010:

	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value		Balance Sheet Location	Fair Value	
		March 31, 2011	December 31, 2010		March 31, 2011	December 31, 2010

** \$7.8 million was a part of the \$12.9 million loss on discontinuance of cash flow hedge related to term loan A interest rate swaps. The difference of \$5.1 million was recognized in other comprehensive income in 2009. The entire \$12.9 million was reclassified from accumulated other comprehensive income into other income/(expense) during the first quarter of 2010.

Concentration of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk are cash and cash equivalents, investments, and accounts receivable. We attempt to minimize the risks related to cash and cash equivalents and investments by using highly-rated financial institutions that invest in a broad and diverse range of financial instruments. We have established guidelines relative to credit ratings and maturities intended to maintain safety and liquidity. Concentration of credit risk with respect to accounts receivable is limited due to our large and diverse customer base, which is dispersed over different geographic areas. Allowances are maintained for potential credit losses and such losses have historically been within our expectations. Our investment portfolio is maintained in accordance with our investment policy that defines allowable investments, specifies credit quality standards and limits

the credit exposure of any single issuer.

Our derivatives instruments have an element of risk in that the counterparties may be unable to meet the terms of the agreements. We attempt to minimize this risk by limiting the counterparties to a diverse group of highly-rated domestic and international financial institutions. In the event of non-performance by these counterparties, the asset position carrying values of our financial instruments represent the maximum amount of loss we could incur as of March 31, 2011. However, we do not expect to record any losses as a result of counterparty default in the foreseeable future. We do not require and are not required to pledge collateral for these financial instruments. The Company does not use derivative financial instruments for speculation or trading purposes or for activities other than risk management and we are not a party to leveraged derivatives. In addition, we do not carry any master netting arrangements to mitigate the credit risk. The Company continually evaluates the costs and benefits of its hedging program.

Table of Contents*Debt Obligations*

The Company has certain financial instruments in which the carrying value does not equal the fair value. The estimated fair value of the senior notes and the convertible senior notes was determined by using observable market information.

The fair value and carrying amounts of the Company's debt obligations were as follows:

	Fair Value		Carrying Amounts	
	March 31, 2011 (unaudited)	December 31, 2010	March 31, 2011 (unaudited)	December 31, 2010
(in thousands)				
3.375% Senior Notes (principal due 2013)	\$257,385	\$254,663	\$249,924	\$249,914
4.400% Senior Notes (principal due 2015)	524,845	520,380	498,669	498,592
3.500% Senior Notes (principal due 2016)	400,832	396,492	399,389	399,360
6.000% Senior Notes (principal due 2020)	812,190	805,815	748,595	748,565
5.000% Senior Notes (principal due 2021)	402,144	396,664	398,258	398,224
1 1/2% Convertible Senior Notes (principal due 2024)	518,625	545,909	433,230	428,356
3 1/4% Convertible Senior Notes (principal due 2025)	387,464	413,000	347,663	345,360

For details on the carrying amounts of the debt obligations, refer to Note 4 Long-Term Debt.

11. Subsequent Events

In April 2011, the Company repurchased 1.0 million shares of its common stock under the December 2010 share repurchase program at a total cost of \$52.6 million. The cost of all repurchased shares is included in treasury stock and reported as a reduction in total equity when a repurchase occurs.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the Unaudited Consolidated Financial Statements and Notes thereto included elsewhere in this report and the Consolidated Financial Statements and Notes thereto included in our annual report on Form 10-K for the fiscal year ended December 31, 2010.

Forward-Looking Statements

Any statements in this Quarterly Report on Form 10-Q about our expectations, beliefs, plans, objectives, prospects, financial condition, assumptions or future events or performance are not historical facts and are forward-looking statements. These statements are often, but not always, made through the use of words or phrases such as believe, anticipate, should, intend, plan, will, expect(s), estimate(s), project(s), positioned, strategy, outlook, expressions. Additionally, statements concerning future matters, such as the development of new products, enhancements of technologies, sales levels and operating results and other statements regarding matters that are not historical facts are forward-looking statements. Accordingly, all such forward-looking statements involve estimates, assumptions and relate to uncertainties that could cause our actual results to differ materially from the results expressed in the statements. Any forward-looking statements are qualified in their entirety by reference to the factors discussed throughout this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010. Among the key factors that could cause our actual results to differ materially from those projected in our forward-looking statements, include our ability to:

continually develop and offer new products and services that are commercially successful;

successfully compete and maintain the pricing of its products and services;

maintain our revenue and profitability during periods of adverse economic and business conditions;

successfully integrate and develop acquired businesses and technologies;

Table of Contents

successfully acquire new products, services, and technologies through additional acquisitions;

Successfully procure our products and supplies from our existing supply chain;

successfully secure and deploy capital;

satisfy our debt obligations; and

the additional risks and other factors described under the caption **Risk Factors** under Item 1A of the Annual Report on Form 10-K for the fiscal year ended December 31, 2010, filed with the Securities and Exchange Commission on February 25, 2011.

Because the factors referred to above could cause our actual results or outcomes to differ materially from those expressed in any forward-looking statements made by us, you should not place undue reliance on any such forward-looking statements. Further, any forward-looking statement speaks only as of the date of this Quarterly Report on Form 10-Q, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after such date to reflect the occurrence of unanticipated events.

OVERVIEW

Revenues for the three months ended March 31, 2011 were \$895.9 million, with net income attributable to the Company of \$93.7 million. Revenues for the three months ended March 31, 2010 were \$884.9 million, with net income attributable to the Company of \$91.5 million.

Our Business

We are a global life sciences company dedicated to improving the human condition. Our systems, reagents, and services enable scientific researchers to accelerate scientific exploration, leading to discoveries and developments that improve the quality of life. Life Technologies customers do their work across the biological spectrum, working to advance genomic medicine, regenerative science, molecular diagnostics, agricultural and environmental research, and 21st century forensics. The Company had a workforce of approximately 11,000 people, had a presence in more than 160 countries, and possessed a rapidly-growing intellectual property estate of over 4,000 patents and exclusive licenses.

The Company's systems and reagents enable, simplify and improve a broad spectrum of biological research of genes, proteins and cells within academic and life science research and commercial applications. Our scientific know-how is making biodiscovery research techniques more effective and efficient to pharmaceutical, biotechnology, agricultural, government and academic researchers with backgrounds in a wide range of scientific disciplines.

The Company offers many different products and services, and is continually developing and/or acquiring others. Some of our specific product categories include the following:

Capillary electrophoresis, SOLiD[™], and Ion Torrent[™] DNA sequencing systems and reagents, which are used to discover sources of genetic and epigenetic variation, to catalog the DNA structure of organisms *de novo*, to verify the composition of genetic research material, and to apply these genetic analysis discoveries in markets such as forensic human identification.

High-throughput gene cloning and expression technology, which allows customers to clone and expression-test genes on an industrial scale.

Pre-cast electrophoresis products, which improve the speed, reliability and convenience of separating nucleic acids and proteins.

Antibodies, which allow researchers to capture and label proteins, visualize their location through use of Molecular Probes dyes and discern their role in disease.

Edgar Filing: Life Technologies Corp - Form 10-Q

Magnetic beads, which are used in a variety of settings, such as attachment of molecular labels, nucleic acid purification, and organ and bone marrow tissue type testing.

Molecular Probes fluorescence-based technologies, which facilitate the labeling of molecules for biological research and drug discovery.

Table of Contents

Transfection reagents, which are widely used to transfer genetic elements into living cells enabling the study of protein function and gene regulation.

PCR and Real Time PCR systems and reagents, which enable researchers to amplify and detect targeted nucleic acids (DNA and RNA molecules) for a host of applications in molecular biology.

Cell culture media and reagents used to preserve and grow mammalian cells, which are used in large scale cGMP bio-production facilities to produce large molecule biologic therapies.

RNA Interference reagents, which enable scientists to selectively turn off genes in biology systems to gain insight into biological pathways.

The Company aligns our products and services into the following three divisions: Molecular Biology Systems (MBS), Genetic Systems (GS) and Cell Systems (CS). The MBS division includes the molecular biology based technologies including basic and real-time PCR, RNAi, DNA synthesis, thermo-cycler instrumentation, cloning and protein expression profiling and protein analysis. The CS division includes all product lines used in the study of cell function, including cell culture media and sera, stem cells and related tools, cellular imaging products, antibodies, drug discovery services, and cell therapy related products. The GS division includes sequencing systems and reagents, including capillary electrophoresis, the SOLiDtm system, and Ion Torrenttm sequencing systems, as well as reagent kits developed specifically for applied markets, such as forensics, food safety and pharmaceutical quality monitoring.

The principal arenas for our products include the life sciences research industry and the biopharmaceutical production industry. We divide our customer base into three principal categories:

Life science researchers. The life sciences research market consists of laboratories generally associated with universities, medical research centers, government institutions (such as the United States National Institutes of Health, or the NIH), and other research institutions as well as biotechnology, pharmaceutical, diagnostic, energy, agricultural, and chemical companies. Researchers at these institutions are using our products and services in a broad spectrum of scientific activities, such as searching for pharmaceutical or other techniques to combat a wide variety of diseases (including, cancer and viral and bacterial diseases); researching diagnostics for disease identification or for improving the efficacy of drugs to targeted patient groups; and assisting in vaccine design, bioproduction, and agriculture. Our products and services provide the research tools needed for genomics studies, proteomics studies, gene splicing, cellular analysis, and other key research applications that are required by these life science researchers. In addition, our research tools are important in the development of diagnostics for disease determination as well as identification of patients for more targeted therapy.

Commercial producers of biopharmaceutical and other high valued proteins. The Company serves industries that apply genetic engineering to the research and commercial production of useful but otherwise rare or difficult to obtain substances, such as proteins, interferons, interleukins, t-PA and monoclonal antibodies. Once a discovery has been proven, the manufacturers of these materials require larger quantities of the same sera and other cell growth media that the Company provides in smaller quantities to researchers. Industries involved in the commercial production of genetically engineered products include the biotechnology, pharmaceutical, food processing and agricultural industries.

Users who apply our technologies to enable or improve particular activities. We provide tools that apply our technology to enable or improve activities in particular markets, which we refer to as *applied markets*. The current focus of our products for these industries is in the areas of: forensic analysis, which is used to identify individuals based on their DNA; quality and safety testing, such as testing required to measure food, beverage, or environmental quality, and pharmaceutical manufacturing quality and safety; and biosecurity, which refers to products needed in response to the threat of biological terrorism and other malicious, accidental, and natural biological dangers. The Applied Biosystems branded forensic testing and human identification products and services are innovative and market-leading tools that have been widely accepted by investigators and laboratories in connection with criminal investigations, the exoneration of individuals wrongly accused or convicted of crimes, identifying victims of disasters, and paternity testing.

Table of Contents**CRITICAL ACCOUNTING POLICIES**

Our critical accounting policies are those that require significant judgment. There have been no material changes to the critical accounting policies previously reported in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010. In 2010 we adopted ASU 2009-14, *Revenue Arrangements Containing Software Elements*, and ASU 2009-13, *Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*. For additional information on the recent accounting pronouncements impacting our business, see Note 1 of the Notes to Consolidated Financial Statements.

RESULTS OF OPERATIONS**First Quarter of 2011 Compared to the First Quarter of 2010**

The following table compares revenues and gross margin for the first quarter of 2011 and 2010:

	Three months ended		\$ Increase/ (Decrease)	% Increase/ (Decrease)
	March 31, 2011	2010		
(in millions) (unaudited)				
Molecular Biology Systems	\$ 425.7	\$ 431.5	\$ (5.8)	(1)%
Cell Systems	237.7	213.8	23.9	11%
Genetic Systems	227.6	237.6	(10.0)	(4)%
Corporate and other	4.9	2.0	2.9	NM
 Total revenues	 \$ 895.9	 \$ 884.9	 \$ 11.0	 1%
Total gross profit	\$ 519.0	\$ 533.1	\$ (14.1)	(3)%
Total gross profit margin %	57.9%	60.2%		

Revenue

The Company's revenues increased by \$11.0 million or 1% for the first quarter of 2011 compared to the first quarter of 2010. The increase in revenue is driven primarily by an increase of \$20.6 million associated with acquisitions, partially offset by a decrease of \$3.2 million in volume and pricing and \$7.6 million in unfavorable currency impacts including hedging. Volume and pricing relates to the impact on revenue due to existing and new product total unit sales as well as year over year change in unit pricing and its impact on gross revenue. Included in the impact of volume in pricing is reduced volume as a result of the natural disasters which occurred in Japan during the quarter, primarily associated with the Company's Genetic Systems division.

The Company operates our business under three divisions: Molecular Biology Systems, Cell Systems, and Genetic Systems. The Molecular Biology Systems (MBS) division includes the molecular biology based technologies including basic and real-time PCR, RNAi, DNA synthesis, thermo-cycler instrumentation, cloning and protein expression profiling and protein analysis. Revenue in this division decreased by \$5.8 million or 1% in the first quarter of 2011 compared to the first quarter 2010. This decrease was driven primarily by \$13.7 million in decreased volume and pricing and \$3.4 million in unfavorable currency impacts including hedging, partially offset by an increase of \$11.3 million associated with acquisitions. The Cell Systems (CS) division includes all product lines used in the study of cell function, including cell culture media and sera, stem cells and related tools, cellular imaging products, antibodies, drug discovery services, and cell therapy related products. Revenue in this division increased \$23.9 million or 11% for the first quarter of 2011 compared to the first quarter of 2010. This increase was driven primarily by \$25.5 million in increased volume and pricing, partially offset by \$1.5 million in unfavorable foreign currency impacts including hedging. The Genetic System (GS) division includes sequencing systems and reagents, including capillary electrophoresis, Ion Torrent™ and the SOLiD™ sequencing systems, as well as reagent kits developed specifically for applied markets, such as forensics and food safety and animal health. Revenue in this division decreased by \$10.0 million or 4% for the first quarter of 2011 compared to the first quarter of 2010. This decrease was driven primarily by \$16.3 million in decreased volume and pricing and \$2.5 million in unfavorable currency impacts

including hedging, partially offset by \$8.7 million associated with acquisitions. As previously mentioned, the impacts from the natural disaster which occurred in Japan contributed to the decline in volume and pricing year over year.

Changes in exchange rates of foreign currencies, especially the Japanese yen, the British pound sterling, the euro and the Canadian dollar, can significantly increase or decrease our reported revenue on sales made in these currencies and could result in a material positive or negative impact on our reported results. In addition to currency exchange rates, we expect that future revenues will be affected by, among other things, new product introductions, competitive conditions, customer research budgets, government research funding, the rate of expansion of our customer base, price increases, product discontinuations and acquisitions or dispositions of businesses or product lines.

Table of Contents**Gross Profit**

Gross profit decreased \$14.1 million or 3% in the first quarter of 2011 compared to the first quarter of 2010. The decrease in gross profit was primarily driven by \$11.6 million of unfavorable currency impacts including hedging, a \$9.2 million decrease in price, volume and product mix, a \$6.1 million increase in purchased intangible amortization, partially offset by \$10.1 million associated with acquisitions.

Operating Expenses

The following table compares operating expenses for the first quarter of 2011 and 2010:

(in millions) (unaudited)	Three months ended March 31, 2011		2010		\$ Increase/ (decrease)	% Increase/ (decrease)
	Operating expense	As a percentage of revenues	Operating expense	As a percentage of revenues		
Operating Expenses:						
Selling, general and administrative	\$252.8	28%	\$259.7	29%	\$ (6.9)	(3)%
Research and development	92.8	10%	86.4	10%	6.4	7%
Business consolidation costs	14.7	2%	25.3	3%	(10.6)	(42)%
Selling, general and administrative						

For the first quarter of 2011, selling, general and administrative expenses decreased \$6.9 million, or 3%, compared to the first quarter of 2010. This decrease was driven primarily by a decrease of \$7.3 million in compensation, bonuses, and benefits, and a decrease of \$3.0 million in facilities, general overhead and infrastructure costs, partially offset by \$2.5 million in unfavorable currency impacts. As a percentage of revenue, the costs are down from the prior year as a result of the restructuring activities executed during 2009 and 2010 which have contributed to the reduction of overhead costs year over year.

Research and development

For the first quarter of 2011, research and development expenses increased \$6.4 million or 7% compared to the first quarter of 2010. This increase was driven primarily by an increase of \$2.4 million in facilities, general overhead and infrastructure costs, and a \$2.3 million increase in compensation, bonuses, and benefits. The Company continues to invest in research and development programs and as a percentage of revenue, the costs are comparable period over period.

Business Consolidation Costs

Business consolidation costs for the first quarter of 2011 were \$14.7 million, compared to \$25.3 million in the first quarter of 2010, and represent costs to integrate recent and pending acquisitions and divestitures into the Company's operations. The expenses for both quarters related primarily to integration and restructuring efforts, including severance and site consolidation, currently underway related to various mergers, acquisitions and divestitures.

Other Income (Expense)**Interest Income**

Interest income was \$0.9 million for the first quarter of 2011 compared to \$1.3 million for the first quarter of 2010.

Interest income in the future will be affected by changes in short-term interest rates and changes in cash balances, which may materially increase or decrease as a result of acquisitions, debt repayment, stock repurchase programs and other financing activities.

Interest Expense

Interest expense was \$43.1 million for the first quarter of 2011 compared to \$41.5 million for the first quarter of 2010. The increase in interest expense was primarily driven by higher debt balances driven by the \$1,500.0 million of fixed rate unsecured notes

Table of Contents

issued in February 2010 and the \$800.0 million of fixed rate unsecured notes issued in December 2010, partially offset with the pay off of the term loans in February 2010 and the 2023 Convertible Senior Notes in August 2010.

The Company adopted a bifurcation requirement on our convertible debt prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options* in the first quarter of 2009 and as a result has incurred an additional \$7.2 million in expense in the first quarter of 2011 and \$11.1 million in the first quarter of 2010.

Other Expense, Net

Other expense, net, was \$1.4 million for the first quarter of 2011 compared to \$4.0 million for the same period of 2010. Included in the first quarter of 2011 were foreign currency losses of \$2.1 million, net of hedging activities, driven by a fluctuation in major currencies. Included in the first quarter of 2010 was a loss on the discontinuance of cash flow hedges of \$12.9 million, a \$1.2 million expense related to the amortization of purchased intangibles and amortization of deferred revenue fair market value adjustments attributable to the Mass Spectrometry joint venture, partially offset with a gain from the recovery of an impaired security of \$6.7 million and foreign currency gains of \$3.8 million.

Provision for Income Taxes

The provision for income taxes as a percentage of pre-tax income from continuing operations was 18.7% for the first quarter of 2011 compared with 15.7% for the first quarter of 2010. The lower first quarter 2010 effective tax rate was primarily driven by tax impacts of the sale of the Mass Spectrometry division, early extinguishment of debt and benefits related to certain prior year acquisitions all of which did not occur in 2011. The first quarter 2011 effective tax rate of 18.7% was lower than the estimated rate for the year of 20.3% primarily due to tax benefits associated with the release of reserves for uncertain tax positions and disqualifying dispositions of qualified stock grants offset by tax expense associated with foreign return to provision adjustments and reduced Medicare subsidies.

The differences between the U.S. federal statutory tax rate and the Company's effective tax rate without the discrete items are as follows:

Statutory U.S. federal income tax rate	35.0%
State income tax	1.3
Foreign earnings taxed at non-U.S. rates	(14.2)
Repatriation of foreign earnings	0.2
Change in uncertain tax benefit reserves	0.4
Credits and incentives	(3.5)
Non-deductible compensation & other adjustments	0.9
Other	0.2
Effective income tax rate	20.3%

LIQUIDITY AND CAPITAL RESOURCES

Our future capital requirements and the adequacy of our available funds will depend on many factors, including future business acquisitions, debt repayment, share repurchases, scientific progress in our research and development programs and the magnitude of those programs, our ability to establish collaborative and licensing arrangements, the cost involved in preparing, filing, prosecuting, maintaining and enforcing patent claims and competing technological and market developments. We intend to continue our strategic investment activities in new product development, in-licensing technologies and acquisitions that support our platforms. We believe that our annual positive cash flow generation and existing revolving credit facility will enable the company to fund current working capital requirements and continued operations.

The Company has been able to, and expects to continue to generate positive cash flow from operations. Future debt repayment, share repurchases, future acquisitions or additional payments for the contingent consideration upon the achievement of milestones pertaining to previous acquisitions may be financed by a combination of cash on hand, our positive cash flow generation, existing revolving credit facility, or the issuance of new debt or stock. In the next twelve months, the Company, upon the achievement of technological milestones, will have the obligation to complete

its milestone payment in the acquisition of Ion Torrent. Additionally, the Company will have the opportunity to settle its outstanding convertible senior notes prior to the stated maturity. Such decision will

Table of Contents

be made based on the prevailing market conditions in effect at the time the opportunity is available. The Company, at the election of the holder of the convertible senior note, could be obligated to repurchase the note. In order to meet these obligations and opportunities, the Company will consider whether additional external financing would be required. While conditions of the credit market at any given time may impact our ability to obtain credit, the Company believes that it has the ability to raise funding through public and private markets at reasonable rates based on the Company's risk profile, along with its history of strong cash generation and timely debt repayments. The Company will continuously assess the most appropriate method of financing the Company's short and long term operations.

Our working capital factors, such as inventory turnover and days sales outstanding, are seasonal and, on an interim basis during the year, may require an influx of short-term working capital. We believe our current cash and cash equivalents, investments, cash provided by operations and cash available from bank loans and lines of credit will satisfy our working capital requirements, debt obligations and capital expenditures for the foreseeable future.

Cash and cash equivalents were \$693.7 million at March 31, 2011, a decrease of \$119.9 million from December 31, 2010, primarily due to cash used in financing activities of \$194.7 million and cash used in investing activities of \$50.9 million, offset by cash provided by operating activities of \$115.1 million and the effect of exchange rates on cash of \$10.7 million. Further discussion surrounding the makeup of each cash flow component movement for the first quarter of 2011 is listed below.

Operating Activities

Operating activities provided net cash of \$115.1 million during the first quarter of 2011 primarily from net income of \$93.6 million and net non-cash charges of \$118.3 million, offset by a decrease in cash from operating assets and liabilities of \$96.8 million. Non-cash charges were primarily comprised of amortization of intangibles of \$77.4 million, depreciation of \$30.3 million, stock-based compensation expense of \$19.3 million, and non-cash interest expense of \$7.2 million resulting from the retrospective adoption of a bifurcation requirement on our convertible debt as prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options*, offset by a change in deferred income taxes which resulted in the use of cash of \$15.2 million. The decrease of \$96.8 million in cash within operating assets and liabilities was mainly due to a \$78.8 million decrease in accounts payable and accrued expenses and other liabilities, a \$16.8 million increase in trade accounts receivable, a \$16.4 million increase in inventories, and a \$15.5 million impact from hedging activities, partially offset by a \$21.1 million net increase in income tax liabilities and a \$8.9 million decrease in other assets. The movement in cash as a result of changes in operating assets and liabilities is consistent with normal ongoing operations.

As of March 31, 2011, we had cash and cash equivalents of \$693.7 million, restricted cash of \$17.7 million, and short-term investments of \$23.8 million. Our working capital was \$104.1 million as of March 31, 2011 including restricted cash. Our funds for cash and cash equivalents are currently primarily invested in marketable securities, money market funds, and bank deposits with maturities of less than three months. A majority of the Company's cash and cash equivalents are held in the United States. Repatriation of funds outside of the United States is subject to local laws, customs and related tax consequences.

The Company's pension plans and post retirement benefit plans are funded in accordance with local statutory requirements or by voluntary contributions. The funding requirement is based on the funded status, which is measured by using various actuarial assumptions, such as interest rate, rate of compensation increase, or expected return on plan assets. The Company's future contribution may change when new information is available or local statutory requirement is changed. Any large funding requirements would be a reduction to operating cash flow. At the current time, the Company is in compliance with all funding requirements.

Investing Activities

Net cash used in investing activities during the first quarter of 2011 was \$50.9 million. The primary drivers were \$34.1 million cash outflow associated with the divestiture of the joint venture, which related primarily to tax payments, and \$16.6 million for the purchases of property and equipment.

In October 2010, the Company completed the acquisition of Ion Torrent for a total purchase price of \$683.3 million, comprised of \$263.2 million paid in cash and \$159.3 million paid in the Company's common stock in the fourth quarter of 2010, and a contingent consideration liability of \$260.8 million, which was recorded at the date of acquisition. The \$260.8 million contingent consideration, which will be satisfied if the milestone is achieved, will

be paid in a combination of cash and the issuance of the Company's common stock and would be due in the first quarter of 2012. The results of operations from Ion Torrent have been included in the Company's

Table of Contents

results from the date of acquisition. In addition, pursuant to the purchase agreements for certain acquisitions the Company completed, the Company could be required to make additional contingent payments in cash or a combination of cash and equity based on certain technological milestones, patent milestones or the achievement of future gross sales of the acquired companies. The Company has sufficient cash on hand, positive cash flow generation and an existing revolving credit facility to fund such contingent payments if they become due.

In January 2010, the Company sold its 50% investment stake in the Applied Biosystems/MDS Analytical Technology Instruments joint venture, and net of tax proceeds from the sale, along with the proceeds from the Senior Note issuance in February 2010 and cash on hand was used to pay off outstanding balance of the term loans.

Financing Activities

Net cash used in financing activities during the first quarter of 2011 was \$194.7 million. The primary driver was \$233.8 million for the purchase of treasury stock, partially offset by proceeds from the exercise of employee stock options and purchase rights of \$36.1 million.

Senior Notes

On February 10, 2010, the Company filed a prospectus that allows the Company to issue, in one or more offerings, senior or subordinated debt securities covered by the prospectus by filing a prospectus supplement that contains specific information about the securities and specific terms being offered. In aggregate, the Company has issued a principal amount of \$2,300.0 million of fixed unsecured and unsubordinated Senior Notes (the Notes) as of March 31, 2011, of which \$1,500.0 million were offered in February 2010 and \$800.0 million were offered in December 2010.

The aggregate net proceeds from the offering in February 2010 were \$1,484.8 million after deducting debt discounts as well as an underwriting discount of \$11.9 million. Total deferred financing costs associated with the issuance of these senior notes were \$14.4 million, including the \$11.9 million underwriting discount and \$2.5 million of legal and accounting fees. The aggregate net proceeds from the offering in December 2010 were \$791.6 million after deducting debt discounts, as well as underwriting discounts of \$6.0 million. Total deferred financing costs were \$7.4 million, including the \$6.0 million underwriting discount and \$1.4 million of legal and accounting fees.

The Company, at its option, may redeem the Notes (prior to October 15, 2020 for the 2021 Notes) in whole or in part at any time at a redemption price equal to the greater of 100% of the principal amount of the notes to be redeemed and the sum of the present values of the remaining scheduled payments of the notes to be redeemed discounted on a semi-annual basis at a treasury rate equal to a comparable United States Treasury Issue at the redemption date plus 25 basis points for the 2016 Notes, 30 basis points for the 2013 Notes, the 2015 Notes, and the 2021 Notes, and 35 basis points for the 2020 Notes, plus accrued and unpaid interest through the date of redemption, if any. Commencing on October 15, 2020, the Company may redeem the 2021 Notes, in whole or in part, at any time, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest through the redemption date. Upon the occurrence of a change of control of the Company that results in a downgrade of the notes below an investment grade rating, the indenture requires under certain circumstances that the Company makes an offer to purchase then outstanding Senior Notes equal to 101% of the principal amount plus any accrued and unpaid interest to the date of repurchase upon the occurrence of a change of control.

The indentures governing the Senior Notes contain certain covenants that, among other things, limit the Company's ability to create or incur certain liens and engage in sale and leaseback transactions. In addition, the indenture limits the Company's ability to consolidate, merge, sell, convey, transfer, lease or otherwise dispose of all or substantially all of its property and assets. These covenants are subject to certain exceptions and qualifications.

The entire net proceeds from the 2013, 2015, and 2020 Notes offering in February 2010 were used to repay the outstanding balance of term loans, together with the net of tax proceeds from the sale of our 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, and cash on hand. The net proceeds from the 2016 and 2021 Notes offering in December 2010 will be used for general corporate purposes, which may include the repayment of existing indebtedness.

Table of Contents*The Credit Agreement*

In November 2008, the Company entered into a \$2,650.0 million credit agreement (the Credit Agreement) consisting of a revolving credit facility of \$250.0 million, a term loan A facility of \$1,400.0 million, and a term loan B facility of \$1,000.0 million to fund a portion of the cash consideration paid for the AB merger. During February 2010, the Company used the proceeds from the issuance of the Senior Notes, the net of tax proceeds from the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, along with cash on hand to pay off the entire outstanding term loan principal of \$1,972.5 million. After the repayment of the term loans, the Credit Agreement was amended and restated to increase the revolving credit facility to \$500.0 million with modified terms. The Company has issued \$12.7 million in letters of credit through the Revolving Credit Facility, and accordingly, the remaining credit available under that facility is \$487.3 million at March 31, 2011. For details on the revolving credit facility as well as the Company's other lines of credit, refer to Note 5 Lines of Credit.

Convertible Senior Notes

At March 31, 2011, the Company has classified the carrying value of \$347.7 million of the 3 1/4% Convertible Senior Notes (the 2025 Notes) in current liabilities according to the respective indenture, which allows the holders of the 2025 Notes to require the Company to purchase all or a portion of the 2025 Notes at par plus any accrued and unpaid interest on specified dates, the earliest on June 15, 2011. In the event that the holders do not exercise such rights, the remaining balance of the 2025 Notes will be reclassified back to long-term debt. The indenture also permits the Company to redeem, in whole or in part, the 2025 Notes at the Company's option on or after June 15, 2011. Should the Company be required by the holders to repurchase the 2025 Notes or if the Company chooses to redeem them, the Company anticipates making this payment by using cash generated from operating activities, the existing Revolving Credit Facility, the proceeds from the Senior Notes issuance in December 2010, or a combination of sources.

Also at March 31, 2011, the Company has classified the carrying value of \$433.2 million of the 1 1/2% Convertible Senior Notes (the 2024 Notes) in current liabilities according to the respective indenture, which allows our holders of the 2024 Notes to require the Company to purchase all or a portion of the 2024 Notes at par plus any accrued and unpaid interest on specified dates, the earliest on February 15, 2012. The indenture also permits the Company to redeem, in whole or in part, the 2024 Notes at the Company's option on or after February 15, 2012. Should the Company be required by the holders to repurchase the 2024 Notes or if the Company chooses to redeem them, the Company anticipates making this payment by using cash generated from operating activities, the existing Revolving Credit Facility, the proceeds from Senior Notes issuance in December 2010, or a combination of sources.

In the event of a change of control of the Company, the holders of the 2025 Notes and the 2024 Notes have the right to require the Company to repurchase all or a portion of their notes at a purchase price equal to 100% of the principal amount of the notes plus all accrued and unpaid interest.

During the third quarter of 2010, the Company repaid the remaining outstanding balance of the 2% Convertible Senior Notes (2023 Notes). Total cash consideration of approximately \$347.8 million and 2.4 million shares of the Company's common stock were issued to settle the par value and the excess of the Notes' conversion value based on a conversion price of \$34.12 per share. The Company funded the repayment of the 2023 notes by using cash on hand and cash generated from operating activities.

For more details of the Company's long-term debt obligations, refer to Note 4 Long-Term Debt.

Stock Repurchase Program

In December 2010, the Board of Directors of the Company approved a program (the December 2010 program), authorizing management to repurchase up to \$500.0 million of common stock. During the three months ended March 31, 2011, the Company repurchased 2.9 million shares of its common stock under the December 2010 program at a total cost of approximately \$150.4 million. No shares were repurchased under this program in 2010.

In July 2010, the Board of Directors of the Company approved a program (the July 2010 program) authorizing management to repurchase up to \$520.0 million of common stock over the next two years. As of December 31, 2010, the Company completed repurchasing 8.4 million shares at a total cost of 436.6 million which was included in treasury stock and reported as a reduction in total equity. During the three months ended March 31, 2011, the Company repurchased additional 1.5 million shares of its common

Table of Contents

stock at a total cost of \$83.4 million, thereby completing the July 2010 program by repurchasing an aggregate of 9.9 million shares at a total cost of \$520.0 million, the maximum amount authorized.

OFF BALANCE SHEET ARRANGEMENTS

The Company does not have any material off balance sheet arrangements. For further discussion on the Company's commitments and contingencies, refer to Note 6 Commitments and Contingencies in the Notes to the Consolidated Financial Statements.

CONTRACTUAL OBLIGATIONS

The Company did not enter into any material contractual obligations during the three months ended March 31, 2011. The Company has no material contractual obligations not fully recorded on our Consolidated Balance Sheets or fully disclosed in the Notes to our Consolidated Financial Statements.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risk related to changes in foreign currency exchange rates, commodity prices and interest rates, and we selectively use financial instruments to manage these risks. We do not enter into financial instruments for speculation or trading purposes. These financial exposures are monitored and managed by us as an integral part of our overall risk management program, which recognizes the unpredictability of financial markets and seeks to reduce potentially adverse effects on our results.

Foreign Currency Exchange Rates and Transactions

We translate the financial statements of each foreign subsidiary with a functional currency other than the United States dollar into the United States dollar for consolidation using end-of-period exchange rates for assets and liabilities and average exchange rates during each reporting period for results of operations. Net gains or losses resulting from the translation of foreign financial statements and the effect of exchange rate changes on intercompany receivables and payables of a long-term investment nature are recorded as a separate component of stockholders' equity. These adjustments will affect net income only upon sale or liquidation of the underlying investment in foreign subsidiaries.

We have operations through legal entities in Europe, Asia-Pacific and the Americas. As a result, our financial position, results of operations and cash flows can be affected by fluctuations in foreign currency exchange rates. As of March 31, 2011, the Company had \$444.4 million of accounts receivable and \$41.1 million of accounts payable, respectively, denominated in a foreign currency. These accounts receivables and payables are denominated either in the functional currency of the legal entity or in a currency that differs from the functional currency of the legal entity owning the receivable or payable. For receivables and payables denominated in the legal entity's functional currency, the Company does not have financial statement risk, and therefore does not hedge such transactions. For those receivables and payables denominated in a currency that differs from the functional currency of the legal entity, the Company hedges such transactions to prevent financial statement risk. As a result, a hypothetical movement in foreign currency rates would not be expected to have a material financial statement impact on the settlement of these outstanding receivables and payables.

Both realized and unrealized gains and losses on the value of these receivables and payables were included in other income and expense in the Consolidated Statements of Operations. Net currency exchange losses recognized on business transactions, net of hedging transactions, were \$2.1 million for the three months ended March 31, 2011 and are included in other income and expense in the Consolidated Statements of Operations. These gains and losses arise from the timing of cash collections compared to the hedged transactions, which can vary based on timing of actual customer payments.

The Company's intercompany foreign currency receivables and payables are primarily concentrated in the euro, British pound sterling, Canadian dollar and Japanese yen. Historically, we have used foreign currency forward contracts to mitigate foreign currency risk on these intercompany foreign currency receivables and payables. At March 31, 2011, the Company had a notional principal amount of \$957.1 million in foreign currency forward contracts outstanding, predominantly to hedge currency risk on specific intercompany receivables and payables denominated in a currency that differs from the legal entity's functional currency. These foreign currency forward contracts, as of March 31, 2011, which settle in April 2011 through January 2012, effectively fix the exchange rate at which these specific receivables and payables will be settled, so that gains or losses on the forward contracts offset the losses or gains from changes in the value of the underlying receivables and payables. At March 31, 2011, the

Company does not expect there will be a significant impact from unhedged foreign currency intercompany transactions in the foreseeable future.

Table of Contents

The notional principal amounts provide one measure of the transaction volume outstanding as of period end, but do not represent the amount of our exposure to market loss. In many cases, outstanding principal amounts offset assets and liabilities and the Company's exposure is less than the notional amount. The estimates of fair value are based on applicable and commonly used pricing models using prevailing financial market information. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

Cash Flow Hedges

The ultimate United States dollar value of future foreign currency sales generated by our reporting units is subject to fluctuations in foreign currency exchange rates. The Company's intent is to limit this exposure from changes in currency exchange rates through hedging. When the dollar strengthens significantly against the foreign currencies, the decline in the United States dollar value of future foreign currency revenue is offset by gains in the value of the forward contracts designated as hedges. Conversely, when the dollar weakens, the opposite occurs. The Company uses foreign currency forward contracts to mitigate foreign currency risk on forecasted foreign currency sales that are expected to be settled within the next twelve months. The change in fair value prior to their maturity was accounted for as cash flow hedges, and recorded in other comprehensive income, net of tax, in the Consolidated Balance Sheets according to *ASC Topic 815, Derivatives and Hedging*. To the extent any portion of the forward contracts is determined to not be an effective hedge, the increase or decrease in value prior to the maturity was recorded in other income or expense in the Consolidated Statements of Operations.

During the three months ended March 31, 2011, the Company did not recognize any material ineffective portion of its hedging instruments, and no hedging relationships were terminated as a result of ineffective hedging or forecasted transactions no longer probable of occurring for foreign currency forward contracts. The Company continually monitors the probability of forecasted transactions as part of the hedge effectiveness testing. At March 31, 2011, the Company had a notional principal amount of \$280.6 million in foreign currency forward contracts outstanding to hedge foreign currency revenue risk under *ASC Topic 815, Derivatives and Hedging*, and the fair value of foreign currency forward contracts is reported in other current assets or other current liabilities in the Consolidated Balance Sheet as appropriate. The Company reclasses deferred gains or losses reported in accumulated other comprehensive income into revenue when the underlying foreign currency sales occur and are recognized in consolidated earnings. The Company uses an inventory turnover ratio for each international operating unit to align the timing of a hedged item and a hedging instrument to impact the Consolidated Statements of Operations during the same reporting period. At March 31, 2011, the Company expects to reclass \$36.0 million of net losses on derivative instruments from accumulated other comprehensive income to earnings during the next twelve months. At March 31, 2011, a hypothetical 10% change in foreign currency rates against the United States dollar would result in a decrease or an increase of approximately \$26.0 million in the fair value of foreign currency derivatives accounted for under cash flow hedges. Actual gains or losses could differ materially from this analysis based on changes in the timing and amount of currency rate movements.

During the three months ended March 31, 2010, the Company recognized a \$12.9 million loss as a result of the discontinuance of swap payment arrangements related to the term loan A payoff in February 2010 as the forecasted transactions were no longer probable of occurring.

Refer to Note 10 in the Notes to the Consolidated Financial Statements for more information on the Company's hedging programs.

Commodity Prices

Our exposure to commodity price changes relates to certain manufacturing operations that utilize certain commodities as raw materials. We manage our exposure to changes in those prices primarily through our procurement and sales practices.

Interest Rates

Our investment portfolio is maintained in accordance with our investment policy that defines allowable investments, specifies credit quality standards and limits the credit exposure of any single issuer. The fair value of our cash equivalents, marketable securities, short-term investments, and derivatives is subject to change as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness or our own credit risk. The

Company uses credit default swap spread to derive risk-

36

Table of Contents

adjusted discount rate to measure the fair value of some of our financial instruments. At March 31, 2011 we had \$735.2 million in cash, cash equivalents, restricted cash and short-term investments, all of which approximated the fair value. Changes in market interest rates would not be expected to have a material impact on the fair value of these assets at March 31, 2011 as the assets consisted of highly liquid securities with short-term maturities. The Company accounts for the \$22.4 million of its long-term investments in non-publicly traded companies under the cost method, thus, changes in market interest rates would not be expected to have an impact on these investments.

As of March 31, 2011, the Company had a carrying value of \$3,075.7 million in debt with fixed interest rates, thus, the variability in market interest rates would not be expected to have a material impact on our scheduled interest payments. The Company will continuously assess the most appropriate method of financing the Company's short and long term operations.

See Note 10 in the Notes to the Consolidated Financial Statements for more information on the Company's financial instruments.

ITEM 4. Controls and Procedures

We are responsible for maintaining disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Disclosure controls and procedures are controls and other procedures designed to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Based on our management's evaluation (with the participation of our Chief Executive Officer and Chief Financial Officer) of our disclosure controls and procedures as required by Rule 13a-15 under the Securities Exchange Act, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to achieve their stated purpose as of March 31, 2011, the end of the period covered by this report.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

We are subject to potential liabilities under government regulations and various claims and legal actions that are pending or may be asserted. These matters arise in the ordinary course and conduct of our business, and, at times, as a result of our acquisitions and dispositions. They include, for example, commercial, intellectual property, environmental, securities, and employment matters. Some are expected to be covered, at least partly, by insurance. We intend to continue to defend ourselves vigorously in such matters. We regularly assess contingencies to determine the degree of probability and range of possible loss for potential accrual in our financial statements. An estimated loss contingency is accrued in our financial statements if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Based on our assessment, we currently have accrued an immaterial amount in our financial statements for contingent liabilities associated with these legal actions and claims. Litigation is inherently unpredictable, and unfavorable resolutions could occur. As a result, assessing contingencies is highly subjective and requires judgment about future events. The amount of ultimate loss may exceed our current accruals, and it is possible that our cash flows or results of operations could be materially affected in any particular period by the unfavorable resolution of one or more of these contingencies.

ITEM 1A. Risk Factors

You should consider the risks and uncertainties described under Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, which we filed with the Securities and Exchange Commission on February 25, 2011, together with the risks and uncertainties discussed under the heading "Forward-Looking Statements" in Item 2 of this Quarterly Report on Form 10-Q when evaluating our business and our prospects.
