Table of Contents**IVANHOE ENERGY INC.****Notes to the Unaudited Condensed Consolidated Financial Statements**

(tabular amounts in US\$000s, except share and per share amounts)

1. NATURE OF OPERATIONS AND GOING CONCERN

Ivanhoe Energy Inc. (the Company or Ivanhoe) is a publicly listed company incorporated in Canada, with limited liability under the legislation of the Yukon. Ivanhoe's common shares are listed on the Toronto Stock Exchange (TSX) and the NASDAQ Stock Market (NASDAQ). The head office, principal address and registered and records office of the Company are located at 999 Canada Place, Suite 654, Vancouver, British Columbia, V6C 3E1.

Ivanhoe is an independent international heavy oil development and production company focused on pursuing long term growth in its reserves and production. Ivanhoe plans to utilize advanced technologies, such as its HTL™ technology, that are designed to significantly improve recovery of heavy oil resources. In addition, the Company seeks to expand its reserve base and production through conventional exploration and production of oil and gas.

The September 30, 2011 unaudited condensed consolidated interim financial statements (Financial Statements) have been prepared using International Financial Reporting Standards (IFRS) applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due and assumes that Ivanhoe will be able to meet its obligations and continue operations for at least its next fiscal year. Realization values may be substantially different from carrying values as shown and these Financial Statements do not give effect to adjustments that may be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material.

At September 30, 2011, Ivanhoe had an accumulated deficit of \$292.6 million and working capital of \$43.6 million excluding derivative financial liabilities. For the nine months ended September 30, 2011, cash used in operating activities was \$18.7 million and the Company expects to incur further losses in the development of its business. Continuing as a going concern is dependent upon attaining future profitable operations to repay liabilities arising in the normal course of operations and accessing additional capital to develop the Company's properties. Ivanhoe intends to finance its future funding requirements through a combination of strategic investors and/or public and private debt and equity markets, either at a parent company level or at the project level. There is no assurance that Ivanhoe will be able to obtain such financing or obtain it on favorable terms. Without access to additional financing or other cash generating activities in 2012, there is significant doubt that the Company will be able to continue as a going concern.

The September 30, 2011 Financial Statements were approved by the Board of Directors and authorized for issue on October 25, 2011.

The Financial Statements are presented in US dollars and all values are rounded to the nearest thousand dollars, except where otherwise indicated.

2. BASIS OF PRESENTATION**2.1 Statement of Compliance**

The Financial Statements have been prepared in accordance with IAS 34, Interim Financial Reporting, using accounting policies consistent with IFRS as issued by the International Accounting Standards Board (IASB) that the Company expects to adopt in its consolidated financial statements for the year ending December 31, 2011. The Financial Statements are not subject to qualification relating to the application of IFRS as issued by the IASB.

2.2 Basis of Presentation

The Company adopted IFRS on January 1, 2011, with a transition date of January 1, 2010. Comparative financial information has been restated to comply with IFRS as detailed in Note 17. The accounting policies adopted by Ivanhoe as a result of IFRS may be found in Note 3 of the Company's March 31, 2011 financial statements.

The Financial Statements have been prepared on an historical cost basis, except derivative instruments, which are measured at fair value.

The Company has reviewed new and revised accounting pronouncements listed below, that have been issued, but are not yet effective. The Company has not yet evaluated the impact of these changes on its financial statements.

Table of Contents**IFRS 9 Financial Instruments (IFRS 9)**

IFRS 9 was issued in November 2009 and is intended to replace IAS 39, *Financial Instruments: Recognition and Measurement* (IAS 39) in phases. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, as opposed to the multiple rules in IAS 39. The approach is based on how an entity manages its financial instruments given its business model and the contractual cash flow characteristics of the financial assets. The standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for reporting periods beginning on or after January 1, 2013. On 4 August 2011, the IASB issued an exposure draft proposing to change the mandatory effective date of IFRS 9 to annual periods beginning on or after January 1, 2015.

IFRS 10 Consolidated Financial Statements (IFRS 10)

IFRS 10 was issued in May 2011 and sets a single basis for consolidation, that being control of an entity. IFRS 10 replaces portions of IAS 27, *Consolidated and Separate Financial Statements* that address how entities should prepare consolidated financial statements. This standard is effective for reporting periods on or after January 1, 2013, with earlier adoption permitted.

IFRS 11 Joint Arrangements (IFRS 11)

IFRS 11, issued in May 2011, establishes principles for financial reporting by entities involved in a joint arrangement. IFRS 11 supersedes the current IAS 31, *Interests in Joint Ventures* and *Standing Interpretations Committee (SIC) 13, Jointly Controlled Entities-Non Monetary Contributions by Venturers* and is effective for reporting periods beginning on or after January 1, 2013. Earlier application is permitted.

IFRS 12 Disclosure of Interests in Other Entities (IFRS 12)

IFRS 12, issued in May 2011, establishes a single set of disclosure objectives, and requires minimum disclosures designed to meet those objectives, regarding interests in subsidiaries, joint arrangements, associates or unconsolidated structured entities. IFRS 12 is intended to combine the disclosure requirements on interests in other entities currently located throughout different standards. This standard is effective for reporting periods on or after January 1, 2013, with earlier adoption permitted.

IFRS 13 Fair Value Measurements (IFRS 13)

IFRS 13, issued in May 2011, defines fair value, sets out a single IFRS framework for measuring fair value and requires disclosures about fair value measurements. IFRS 13 applies to IFRS that require or permit fair value measurements or related disclosures, except in specified circumstances. IFRS 13 is to be applied for reporting periods beginning on or after January 1, 2013. Earlier application is permitted.

IAS 12 Income Taxes (IAS 12)

IAS 12 was amended in December 2010 to remove subjectivity in determining on which basis an entity measures the deferred tax relating to an asset. The amendment introduces a presumption that an entity will assess whether or not the carrying value of an asset will be recovered through the sale of the asset. The amendment to IAS 12 is effective for reporting periods beginning on or after January 1, 2012.

IAS 28 Investments in Associates and Joint Ventures (IAS 28)

IAS 28 was amended in 2011 which prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. IAS 28 is effective for reporting periods beginning on or after January 1, 2013. Earlier application is permitted.

There are no other standards or interpretations in issue, but not yet adopted, that are anticipated to have a material effect on the reported loss or net assets of the Company.

Table of Contents**3. CASH AND CASH EQUIVALENTS**

	September 30, 2011	December 31, 2010	January 1, 2010
Cash at banks and on hand	57,145	10,147	6,797

As at September 30, 2011	35,726			35,726	11,240	46,966

Oil and Gas Property and Equipment

In the nine months ended September 30, 2011, nil (year ended December 31, 2010 \$0.1 million) in employee benefits directly attributable to property, plant and equipment (PP&E) were capitalized.

Other Assets

Other assets include the Company's Feedstock Test Facility (FTF) at the Southwest Research Institute in San Antonio, Texas, and general furniture and fixtures.

6. DEBT**6.1 Convertible Note**

	September 30, 2011	December 31, 2010	January 1, 2010
Convertible note		40,217	38,005

Unamortized discount	(385)	(1,071)
Carrying amount	39,832	36,934

In connection with the acquisition of the Tamarack leases in July 2008 from Talisman Energy Canada (Talisman), the Company issued a Cdn\$40.0 million convertible promissory note (the Convertible Note). The Convertible Note matured on July 11, 2011 and was repaid in full.

In the nine months ended September 30, 2011, \$1.5 million (year ended December 31, 2010 \$2.5 million) of interest from the Convertible Note was capitalized to E&E assets. No interest from the Convertible Note was recorded as interest expense in the three months and nine months ended September 30, 2011 (three months and nine months ended September 30, 2010 nil).

Table of Contents**6.2 Convertible Debentures**

	September 30, 2011	December 31, 2010	January 1, 2010
Convertible debentures	70,565		
Unamortized financing costs and derivative instrument	(10,419)		
Carrying amount	60,146		

On June 9, 2011, the Company issued Cdn\$73.3 million in 5.75% convertible unsecured subordinated debentures (Convertible Debentures) at a price of \$1,000 per debenture. The issuance included a bought deal of Cdn\$50.0 million. The issuance also included Cdn\$23.3 million in privately placed debentures with the same terms as the public offering.

The Convertible Debentures mature on June 30, 2016, pay interest semi-annually on June 30 and December 31 and are convertible at a price of Cdn\$3.36 per share. They are redeemable after June 30, 2014 at Ivanhoe's option.

The carrying amount of the Convertible Debentures at September 30, 2011 was \$60.1 million. The Canadian dollar denominated debt is considered an embedded derivative since the functional currency of the Company is the US dollar and, as such, the option was separated and recognized at fair value as a long term derivative liability as further described in Note 8. The remaining unamortized financing costs in the table above include \$8.7 million related to the option as well as \$1.7 million in transaction costs. Transaction costs of \$0.3 million were allocated to the derivative and charged to earnings in the period.

In the three and nine months ended September 30, 2011, \$0.3 million and \$0.7 million, respectively, was recorded as interest expense (three and nine months ended September 30, 2010 nil). In the nine months ended September 30, 2011, \$1.0 million (year ended December 31, 2010 nil) of interest from the Convertible Debentures was capitalized to E&E assets and \$0.1 million (year ended December 31, 2010 nil) was capitalized to PP&E assets.

7. FINANCIAL INSTRUMENTS

The following table presents the Company's derivative financial instruments measured at fair value through profit and loss (FVTPL):

	Level 1	Level 2	Level 3			
	2006 Purchase	2009 & 2010 Purchase	2008 Convertible Component of Debt	2011 Convertible Component of Debentures	Level 3 Subsidiary Option	Total Fair Value
Balance January 1, 2010	7,582	667	4,774			13,023
Issuance of purchase warrants		13,999				13,999
Exercise of purchase warrants	(3)					(3)
Derivative gains through profit and loss	(1,964)	(13,050)	(3,558)			(18,572)
Balance December 31, 2010	5,615	1,616	1,216			8,447
Issuance of convertible debentures				9,852		9,852
Exercise of options	(2)	(3,107)				(3,109)

Expiration of purchase warrants through profit and loss	(2,346)	(1,477)				(3,823)
Derivative (gains) losses through profit and loss	(3,267)	2,968	(1,216)	(7,577)	286	(8,806)
Foreign exchange gains				(465)		(465)
Balance September 30, 2011				1,810	286	2,096

The gain on derivative instruments of \$12.6 million for the nine months ended September 30, 2011, (nine months ended September 30, 2010 \$20.4 million, year ended December 31, 2010 \$18.6 million) originated from the expiration and revaluation of derivative financial instruments measured at FVTPL.

Table of Contents**8. DERIVATIVE INSTRUMENTS**

The Company's derivative instruments are comprised of the convertible component of the Convertible Debentures and the Subsidiary Option.

8.1 Purchase Warrants

The following table reflects the changes in the Company's purchase warrants outstanding:

(000s)	Purchase Warrants	Shares Issuable
Balance January 1, 2010	12,135	12,135
Private placements	12,500	12,500
Exercised	(2)	(2)
 Balance December 31, 2010	 24,633	 24,633
Exercised	(8,620)	(8,620)
Expired	(16,013)	(16,013)

Balance September 30, 2011

All of the Company's purchase warrants have expired in 2011 and no purchase warrants remain outstanding at September 30, 2011.

At December 31, 2010, the following purchase warrants were exercisable:

Year of Issue	Price Per Special Warrant	Outstanding ⁽¹⁾ (000s)	Fair Value (\$US000s)	Expiry Date	Exercise Price Per Share	Cash Value	
						Exercise (\$US000s)	Valuation Method
2006	US\$2.23	11,398	5,615	May 2011	Cdn\$2.93 ⁽²⁾	33,577	Quoted Market Price
2009	N/A	735	11	Feb 2011	Cdn\$4.05	2,993	Black-Scholes
2010	Cdn\$3.00	10,417	1,326	Feb 2011	Cdn\$3.16	33,095	Black-Scholes
2010	Cdn\$3.00	2,083	279	Feb 2011	Cdn\$3.16	6,619	Black-Scholes
		24,633	7,231			76,284	

(1) One common share is issuable for each purchase warrant upon exercise.

(2) Each common share purchase warrant originally entitled the holder to purchase one common share at a price of \$2.63 per share until the fifth anniversary date of the closing. In September 2006, these warrants were listed on the TSX and the exercise price was changed to Cdn\$2.93.

At December 31, 2010, the fair value of the purchase warrants issued in 2009 and 2010 was calculated using a weighted average risk-free interest rate of 1.0%, a dividend yield of 0.0%, a weighted average volatility factor of 66.6% and an expected life of two months. If the volatility used to fair value the purchase warrants decreased by 10%,

the fair value would decrease by \$0.4 million. Increasing the volatility by 10% would have had the opposite, but approximately equal, impact.

8.2 Convertible Note

The Company issued a Cdn\$40.0 million Convertible Note, as described in Note 6.1. The outstanding principal amount was convertible, at Talisman's option, into common shares of the Company. The fair value of the convertible component was nil at September 30, 2011 (December 31, 2010 \$1.2 million) as the Convertible Note was paid in full on July 11, 2011.

8.3 Convertible Debentures

The Company issued Cdn\$73.3 million in Convertible Debentures in the second quarter of 2011, as described in Note 6.2. The outstanding principal amount is convertible into common shares of the Company. The fair value of the convertible component was \$1.8 million at September 30, 2011 (December 31, 2010 nil), calculated with the Black-Scholes valuation method using a weighted average risk-free interest rate of 1.39%, a dividend yield of 0.0%, a weighted average volatility factor of 40% and an expected life of approximately 5 years.

If the volatility used to fair value the convertible debt decreased by 10%, the fair value would decrease by \$1.2 million. Increasing the volatility by 10% would increase the fair value by \$1.7 million.

Table of Contents**8.4 Subsidiary Option**

In January 2010, one of the Company's subsidiaries granted a private investor an option (the Subsidiary Option) to acquire an equity interest in the subsidiary representing 20% of the subsidiary's currently issued share capital (16.67% of the enlarged share capital immediately following the exercise of the Subsidiary Option) for Cdn\$25.0 million. If the Subsidiary Option is exercised, Cdn\$25 million of existing inter-corporate indebtedness owed by the subsidiary to the Company (through an intermediate subsidiary) will be converted into additional common shares of the subsidiary, thereby diluting the private investor's equity interest to 14.286%. The Subsidiary Option is valid for one year and did not become exercisable until the first quarter of 2011. The option was determined to have a nominal value on the date of grant.

The fair value of the Subsidiary Option at September 30, 2011 was \$0.3 million, calculated with the Black Scholes valuation method using an estimated share value of \$17.13, an exercise price of \$30.00 per share, a risk-free interest rate of 0.90%, a dividend yield of 0.0%, an expected life of approximately five months and an estimated volatility of 65.6%, which is similar to Ivanhoe.

If the estimated volatility used to fair value the Subsidiary Option decreased by 10%, the fair value would decrease by \$0.1 million. Increasing the volatility by 10% would have had the opposite, but approximately equal, impact.

9. COMMITMENTS AND CONTINGENCIES**9.1 Income Taxes**

The Company has an uncertain tax position in China related to when it is entitled to take tax deductions on capitalized development costs that are amortized on a straight-line basis. To the extent that there is a different interpretation in the timing of the deductibility of development costs, this could potentially result in an increase in the current tax expense of \$0.9 million.

The Company has an uncertain tax position related to the calculation of a gain on the consideration received from two farm-out transactions. To the extent that the calculation of the gain is interpreted differently and the amounts are subject to withholding tax, there would be an additional current tax expense of approximately \$0.7 million.

No amounts have been recorded in the Financial Statements related to the above mentioned uncertain tax positions as management has determined the likelihood of an unfavorable outcome to the Company to be remote.

9.2 Operating Lease Arrangements

In the three months and nine months ended September 30, 2011, the Company expended \$0.4 million and \$1.3 million, respectively, (three months and nine months ended September 30, 2010 \$0.3 million and \$0.9 million, respectively) on operating leases relating to the rental of office space, which expire between 2011 and 2013.

At September 30, 2011, future net minimum payments for operating leases were:

Remainder of 2011	428
2012-2013	1,133
	1,561

9.3 Other

Should Ivanhoe receive government and other approvals necessary to develop the northern border of one of the Tamarack leases, the Company will be required to make a cash payment to Talisman of up to Cdn\$15.0 million, as a conditional, final payment for the 2008 purchase transaction.

From time to time, Ivanhoe enters into consulting agreements whereby a success fee may be payable if and when either a definitive agreement is signed or certain other contractual milestones are met. Under the agreements, the consultant may receive cash, common shares, stock options or some combination thereof. Similarly, agreements entered into by the Company may contain cancellation fees or liquidated damages provisions for early termination. These fees are not considered to be material.

Exercisable, end of period	7,370	2.12	7,324	2.19
----------------------------	--------------	-------------	-------	------

The weighted average share price at the date of exercise for stock options exercised in the nine months end September 30, 2011 was Cdn\$3.15 (nine months ended September 30, 2010 Cdn\$3.50).

Table of Contents

The weighted average fair value of stock options granted from the stock option plan during the nine months ended September 30, 2011 was Cdn\$1.58 (nine months ended September 30, 2010 Cdn\$1.99) per option at the grant date using the Black Scholes option pricing model. The weighted average assumptions used for the calculation were:

Nine months ended September 30,	2011	2010
Expected life (in years)	6.3	6.1
Volatility ⁽¹⁾	74.4%	98.5%
Dividend yield		
Risk-free rate	2.7%	3.0%
Estimated forfeiture rate	6.0%	5.2%

(1) Expected volatility factor based on historical volatility of the Company's publicly traded common shares. The following table summarizes information in respect of stock options outstanding and exercisable at September 30, 2011:

Range of Exercise Prices (Cdn\$)	Outstanding (000s)	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price (Cdn\$)
1.51 to 2.06	5,223	2.2	1.71
2.15 to 2.71	8,526	4.8	2.39
2.77 to 3.44	1,613	5.1	3.21
	15,362	3.9	2.25

11.2 Restricted Share Unit Plan

The Company adopted a restricted share unit (RSU) plan in the second quarter of 2011 under which it may issue restricted share units to directors and eligible employees. RSUs vest evenly over three years and are settled in shares or cash on the anniversary date. RSUs do not entitle the holder to voting rights until they have vested and shares have been provided to the participant.

Details of transactions under the Company's RSU plan are as follows:

	September 30, 2011
	Weighted Average
	Number of RSUs (000s)⁽¹⁾
	Fair Value (Cdn\$)
Outstanding, beginning of period	
Granted	1,115
Forfeited	(132)
Outstanding, end of period	983
	1.59

(1) Includes RSUs that will be withheld on behalf of employees to satisfy statutory tax withholding requirements.

Table of Contents

The weighted average fair value of RSU s granted during the nine months ended September 30, 2011 was Cdn\$1.62 per RSU at the grant date using the Black Scholes option pricing model. The weighted average assumptions used for the calculation were:

	Nine months ended September 30, 2011
Expected life (in years)	3.0
Volatility ⁽¹⁾	62.9%
Dividend yield	
Risk-free rate	1.7%
Estimated forfeiture rate	6.1%

(1) Expected volatility factor based on historical volatility of the Company s publicly traded common shares. The liabilities arising from the RSUs to be settled by way of cash payments and the intrinsic value of those liabilities are:

	September 30, 2011
Current liabilities related to RSUs	90
Long term liabilities related to RSUs	69
Intrinsic value of vested RSUs	

12. SEGMENT INFORMATION

Ivanhoe s organizational structure reflects its various operating activities and the geographic areas in which it operates. Oil and gas operations are divided into three geographic segments: Asia, Canada and Latin America. Asian operations capture the Company s oil production in Dagang and Daqing and exploration at Zitong in China as well as exploration in Mongolia. The Canadian segment comprises activities from Ivanhoe s oil sands development project at Tamarack in Alberta, Canada. Latin America consists of exploration and development of Block 20 in Ecuador.

The Technology Development area captures costs incurred to develop, enhance and identify improvements in the application of the Company s HTL technology. The Corporate area consists of costs that are not directly allocable to operating projects, such as executive officers, corporate financings and other general corporate activities.

In prior years, the Company s business development activities were included in a combined Business and Technology Development segment. The comparative information below has been restated to reclassify business development activities to the Corporate segment.

The accounting policies of the segments are the same as the Company s accounting policies. Segment results include transactions between business segments. Corporate activities undertaken on behalf of a segment are allocated at cost. Oil revenue is classified according to the geographic location of the production.

Table of Contents

The following table presents the Company's segment assets, segment income (loss) and segment revenues reconciled to the Company's Financial Statements.

	Asia	Canada	America	Latin Technology Development	Corporate	Total
Segment revenue ⁽¹⁾						
For the three months ended September 30, 2011	10,770				218	10,988
For the three months ended September 30, 2010	4,177				88	4,265
For the nine months ended September 30, 2011	28,281				425	28,706
For the nine months ended September 30, 2010	15,559				125	15,684
Segment income (loss)						
For the three months ended September 30, 2011	(3,485)	(625)	(2,070)	(2,839)	4,862	(4,157)
For the three months ended September 30, 2010	(2,218)	(875)	(2,917)	(953)	(2,642)	(9,605)
For the nine months ended September 30, 2011	(5,196)	(2,911)	(5,937)	(7,846)	2,496	(19,394)

As at September 30, 2011	142,265	141,988	58,507	85,151	(318,636)	109,275
As at December 31, 2010	114,980	131,277	42,162	76,747	(271,232)	93,934
As at January 1, 2010	81,047	98,262	13,145	56,909	(162,821)	86,542
Capital investments Intangible						
For the three months ended September 30, 2011	7,649	1,451	3,268			12,368
For the three months ended September 30, 2010	8,907	2,752	4,995			16,654
For the nine months ended September 30, 2011	21,755	5,298	9,087			36,140
For the nine months ended September 30, 2010	13,395	24,094	13,305			50,794
Capital investments Property, plant and equipment						
For the three months ended September 30, 2011	4,713		(2)	(236)		4,475
For the three months ended September 30, 2010	592		176	70	(17)	821
For the nine months ended September 30, 2011	11,014		55	869		11,938
For the nine months ended September 30, 2010	2,043	3	263	376	371	3,056

(1) All oil revenues in Asia are generated from the sale of oil production in China to one customer.

(2) Segment assets include investments in subsidiaries that are eliminated for consolidation under Corporate.

(3)

Liabilities for Corporate include intercompany receivables of \$411.6 million at September 30, 2011 (December 31, 2010 \$352.5 million; January 1, 2010 \$216.7 million) resulting in a negative balance.

13. OPERATING EXPENSES

Operating expenses for the Company are comprised of the following:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Asia				
Field operating	1,695	1,244	5,010	3,908
Windfall levy	2,584	637	6,343	2,317
Engineering support	126	135	339	375
	4,405	2,016	11,692	6,600
Technology Development FTF operating costs	1,084	980	3,659	3,102
Total operating costs	5,489	2,996	15,351	9,702

Table of Contents

The windfall levy is imposed by China's Ministry of Finance at the progressive rates from 20% to 40% on the portion of the monthly weighted average sales price of the crude oil lifted in China exceeding US\$40.00 per barrel.

14. SUPPLEMENTAL CASH FLOW INFORMATION**Changes in Non-Cash Activities**

	Three months ended		Nine months ended	
	September 30,		September 30,

	(5,212)	1,465	1,297	4,087

15. RELATED PARTY TRANSACTIONS

Ivanhoe is party to cost sharing agreements with other companies which are related or controlled through common directors or shareholders. Through these agreements, we share office space, furnishings, equipment, air travel and communications facilities in various international locations. We also share the costs of employing administrative and non-executive management personnel at these offices. The Company is billed on a cost recovery basis in most cases. These transactions have been measured at their exchange amount.

The breakdown of the related party expenses is as follows:

Related Party	Nature of Transaction	Three months ended		Nine months ended	
		September 30,		September 30,	
		2011	2010	2011	2010
Global Mining Management Corp.	Administration	117	313	446	954

		139	207	72

16. REMUNERATION OF KEY MANAGEMENT PERSONNEL

The remuneration of directors and other key members of management was:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Base salaries or fees and other cash payments	743	737	3,123	2,925
Employer's contributions to retirement plan	11	17	37	50
Share-based compensation expense	753	581	2,289	1,615
	1,507	1,335	5,449	4,590

17. FIRST-TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Company adopted IFRS on January 1, 2011, with a transition date of January 1, 2010. The accounting policies adopted by Ivanhoe as a result may be found in Note 3 of the Company's March 31, 2011 financial statements.

Under IFRS 1, First-time Adoption of International Financial Reporting Standards, the standards are applied retrospectively at the transition date with all adjustments to assets and liabilities taken to retained earnings unless certain exemptions are applied.

17.1 Exemptions from Full Retrospective Application

IFRS 1 outlines specific guidelines that a first-time adopter must adhere to under certain circumstances. None of the mandatory exemptions from retrospective application were applicable to Ivanhoe. The Company has made the following exemptions to its opening statement of financial position dated January 1, 2010:

i. Deemed Cost

The Company elected to report oil and gas properties, recorded in PP&E and E&E assets, at a deemed cost instead of the actual cost as though IFRS had been adopted retroactively. The deemed cost will be the amounts previously reported under Canadian GAAP.

ii. Decommissioning Provisions Included in the Cost of Property, Plant and Equipment

The exemption provided in IFRS 1 from the full retrospective application of International Financial Reporting Committee 1, Changes in Existing Decommissioning, Restoration and Similar Liabilities, was applied to decommissioning liabilities associated with the Company's oil and gas properties recorded in PP&E and intangible assets. The Company elected to re-measure its FTF decommissioning provision under IFRS.

iii. Share-Based Payment

The Company elected to apply the share-based payment exemption and has applied IFRS 2, Share-based Payments, only to those stock options that were issued after November 7, 2002, but that had not vested by the January 1, 2010 transition date.

Table of Contents

iv. Business Combinations

The Company applied the business combinations exemption in IFRS 1 and has not restated business combinations that took place prior to the January 1, 2010 transition date.

v. Leases

The Company applied the lease exemption in IFRS 1 for contracts and agreements entered into before January 1, 2010. Where Ivanhoe has, under Canadian GAAP, made the same determination of whether an arrangement contains a lease as required by IFRIC 4, Determining whether an Arrangement contains a Lease, but that assessment was made at a date other than that required by IFRIC 4, the Company elected not to reassess that determination.

17.2 Reconciliations to IFRS

IFRS employs a conceptual framework that is similar to Canadian GAAP. While the adoption of IFRS has not changed the actual cash flows of the Company, the adoption has resulted in significant changes to the reported financial position and results of operations of the Company. Presented below are reconciliations prepared by the Company to reconcile to IFRS the consolidated statement of financial position and consolidated statement of loss and comprehensive loss of the Company from those reported under Canadian GAAP.

Changes made to the statements of financial position and statements of (loss) income have resulted in reclassifications of various amounts on the statements of cash flows. Due to the reclassification of capitalized overhead under Canadian GAAP to operating costs or general and administrative expenses under IFRS, cash used in investing activities under Canadian GAAP was reclassified to cash used in operating activities under IFRS. Since there was no change to the total increase in cash and cash equivalents, no reconciliation for the statements of cash flows was presented.

Certain amounts previously reported under Canadian GAAP have been reclassified to conform with IFRS presentation standards. Restricted cash was combined with cash and cash equivalents and asset retirement obligations were combined with other long term provisions. Other name changes have been made to certain financial statement line items to conform with the IFRS format standards.

Table of Contents**Reconciliation of Consolidated Statements of Financial Position**

Table of Contents

Notes to reconciliation

a. Reclassification of Intangible Assets

Under Canadian GAAP, oil and gas properties in the exploration and evaluation stage were classified as oil and gas properties and development costs. In accordance with IFRS 6 Exploration for and evaluation of mineral resources, these properties were reclassified as intangible assets.

b. Adjustment for Capitalized Overhead

Under Canadian GAAP, the Company capitalized employee benefits and overhead that were directly attributable to E&E assets and PP&E. A portion of the amounts capitalized under Canadian GAAP do not meet the threshold for capitalization under IAS 16, Property, Plant and Equipment, and therefore have been reclassified as operating costs or general and administrative expenses, as appropriate.

c. Decommissioning Provisions

Under Canadian GAAP, the present value of the Company's estimated future decommissioning costs was calculated using a credit-adjusted risk-free discount rate. The discount rate under IFRS does not permit company specific credit adjustments and therefore the decommissioning provision has been recalculated using a risk-free discount rate.

d. Derivative Financial Instruments

Under Canadian GAAP, the equity component of the Company's Convertible Note and the purchase warrants were classified as shareholders' equity. In accordance with IAS 32, Financial Instruments: Presentation, financial instruments with an exercise price denominated in a currency other than the Company's functional currency are accounted for as derivatives. As a result, the equity component and purchase warrants have been reclassified as derivative financial instruments.

This resulted in the reclassification of the convertible portion of the Convertible Note and purchase warrants from shareholders' equity to liabilities under IFRS. Additionally, IFRS requires these items to be recorded at fair value with changes in their fair value recognized in the income statement.

e. Share-Based Payments

Stock options were accounted for using the fair value method under Canadian GAAP and charged to operations on a straight-line basis. Under IFRS 2, Share-Based Payment, share-based payments are charged to operations on a graded vesting basis thereby accelerating the compensation expense recognized in earnings.

f. Depletion

Under Canadian GAAP, the Company depleted its oil and gas assets using the unit-of-production method, based on proved reserves. For IFRS purposes, the Company is depleting its oil and gas assets using the unit-of-production method, based on proved plus probable reserves. This has resulted in a deferral of depletion expense.

g. Exploration and Evaluation Expense

Under Canadian GAAP, capitalization of unsuccessful exploration activities was permitted if the carrying value of the Company's total capitalized oil and gas properties and development was not impaired. Under IFRS, unsuccessful exploration and evaluation wells and impaired geological and geophysical assets will be charged to earnings as E&E expense.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

With the exception of historical information, certain matters discussed in this Quarterly Report on Form 10-Q (Form 10-Q), including those within this Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), are forward-looking statements that involve risks and uncertainties.

Statements that contain words such as could , should , can , anticipate , estimate , propose , plan , expect , may and similar expressions and statements relating to matters that are not historical facts constitute forward-looking statements within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. In particular, forward-looking statements contained in this Form 10-Q include, but are not limited to statements relating to or associated with individual wells, regions or projects. Any statements as to possible future crude oil prices; future production levels; future royalty and tax levels; future capital expenditures, their timing and their allocation to exploration and development activities; future earnings; future asset acquisitions or dispositions; future sources of funding for the Company's capital programs; future debt levels; availability of future credit facilities; possible commerciality of the Company's projects; development plans or capacity expansions; future ability to execute dispositions of assets or businesses; future sources of liquidity, cash flows and their uses; future drilling of new wells; ultimate recoverability of current and long-term assets; ultimate recoverability of reserves or resources; expected operating costs; the expectation of negotiating of an extension to certain of the Company's production sharing agreements; the expectation of the Company's ability to comply with the newly enacted safety and environmental rules; estimates on a per share basis; future foreign currency exchange rates, future expenditures and future allowances relating to environmental matters and the Company's ability to comply therewith; dates by which certain areas will be developed, come on-stream or reach expected operating capacity; and changes in any of the foregoing are forward-looking statements.

Statements relating to reserves are forward-looking statements, as they involve the implied assessment, based on estimates and assumptions that the reserves described exist in the quantities predicted or estimated and can be profitably produced in the future.

The forward-looking statements contained in this Form 10-Q are based on certain assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances. By their nature, forward-looking statements involve inherent risks and uncertainties including the risk that the outcome that they predict will not be achieved. Undue reliance should not be placed on forward-looking statements as a number of important factors could cause the actual results to differ materially from the beliefs, plans, objectives, expectations and anticipations, estimates and intentions expressed in the forward-looking statements, including those set out below and those detailed in Item 1A, Risk Factors, and Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010 (2010 Form 10-K). Such factors include, but are not limited to: the Company's short history of limited revenue, losses and negative cash flow from its current exploration and development activities in Canada, Ecuador, China, Mongolia and the United States; the Company's limited cash resources and consequent need for additional financing; the ability to raise capital as and when required, or to raise capital on acceptable terms; the timing and extent of changes in prices for oil and gas; competition for oil and gas exploration properties from larger, better financed oil and gas companies; environmental risks; title matters; drilling and operating risks; uncertainties about the estimates of reserves and the potential success of the Company's Heavy-to-light (HTL) technology; the potential success of the Company's oil and gas properties in Canada, Ecuador, China and Mongolia; the prices of goods and services; the availability of drilling rigs and other support services; legislative and government regulations; political and economic factors in countries in which the Company operates; and implementation of the Company's capital investment program.

The forward-looking statements contained in this Form 10-Q are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable securities laws. The forward-looking statements contained herein are expressly qualified in their entirety by this cautionary statement.

Special Note to Canadian Investors

The Company is a registrant under the Securities Exchange Act of 1934, as amended (the Exchange Act) and voluntarily files reports with the United States Securities and Exchange Commission (SEC) on Form 10-K, Form 10-Q and other forms used by registrants that are US domestic issuers. Therefore, the Company s reserves estimates and securities regulatory disclosures generally follow SEC requirements. *National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities* (NI 51-101), adopted by the Canadian Securities Administrators (CSA), prescribes certain standards for the preparation, and disclosure of reserves and related information by Canadian issuers. The Company has been granted certain exemptions from NI 51-101. Please refer to the *Special Note to Canadian Investors* in the 2010 Form 10-K.

Table of Contents**Advisories**

This Form 10-Q should be read in conjunction with the Company's September 30, 2011 unaudited condensed consolidated financial statements (the "Financial Statements") contained herein, and the audited consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the 2010 Form 10-K. The Financial Statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). A reconciliation of the previously disclosed comparative periods' financial statements, prepared in accordance with Canadian generally accepted accounting principles ("GAAP"), to IFRS is set out in Note 17 to the Financial Statements.

As a foreign private issuer in the US, Ivanhoe is permitted to file with the SEC financial statements prepared under IFRS, as issued by the International Accounting Standards Board, without a reconciliation to US GAAP. The Company will no longer prepare a reconciliation of its results to US GAAP. It is possible that some of the Company's accounting policies under IFRS could be different from US GAAP.

Non-IFRS Financial Measures

Oil revenue per barrel is calculated by dividing oil revenue by the Company's total production for the respective periods presented. Net operating revenue per barrel is calculated by dividing oil revenue less related operating costs by total production for the respective periods presented. Net revenue (loss) from operations per barrel is calculated by subtracting depletion from net operating revenue and dividing by total production for the respective periods presented. The Company believes oil revenue per barrel, net operating revenue per barrel and net revenue (loss) from operations per barrel are important to investors to evaluate operating results and the Company's ability to generate cash. Each of the components used in these calculations can be reconciled directly to the unaudited interim condensed consolidated statements of loss. The calculations of oil revenue per barrel, net operating revenue per barrel and net revenue (loss) from operations per barrel may differ from similar calculations of other companies in the oil and gas industry, thereby limiting their usefulness as comparative measures.

THE DISCUSSION AND ANALYSIS OF THE COMPANY'S OIL AND GAS ACTIVITIES, WITH RESPECT TO OIL AND GAS VOLUMES, RESERVES AND RELATED PERFORMANCE MEASURES, PRESENT THE COMPANY'S NET WORKING INTEREST AFTER ROYALTIES. ALL TABULAR AMOUNTS ARE EXPRESSED IN THOUSANDS OF U.S. DOLLARS, EXCEPT PER SHARE AND PRODUCTION DATA INCLUDING REVENUES AND COSTS PER BOE.

As generally used in the oil and gas business and throughout this Form 10-Q, the following terms have the following meanings:

bbl	=	barrel	mmbbls/d	=	thousand barrels per day
bbls/d	=	barrels per day	mboe	=	thousands of barrels of oil equivalent
boe	=	barrel of oil equivalent	mboe/d	=	thousands of barrels of oil equivalent per day
boe/d	=	barrels of oil equivalent per day	mmbbls	=	million barrels
mmbbls	=	thousand barrels	mmbbls/d	=	million barrels per day

Oil equivalents compare quantities of oil with quantities of gas or express these different commodities in a common unit. In calculating barrel of oil equivalents (boe), the generally recognized industry standard is one bbl is equal to six mcf. Boes may be misleading, particularly if used in isolation. The conversion ratio is based on an energy equivalent conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

Electronic copies of the Company's filings with the SEC and the CSA are available, free of charge, through the Company's website (www.ivanhoeenergy.com) or, upon request, by contacting its investor relations department at (403) 261-1700. Alternatively, the SEC and the CSA each maintains a website (www.sec.gov and www.sedar.com) from which the Company's periodic reports and other public filings with the SEC and the CSA can be obtained. Copies of the charters for each of the committees of the Company's board of directors are available through the Company's website at www.ivanhoeenergy.com/index.php?page=mandate_of_the_boardcommittee_overview.

Table of Contents**INTERNATIONAL FINANCIAL REPORTING STANDARDS**

The Company adopted IFRS on January 1, 2011, with a transition date of January 1, 2010. IFRS employs a conceptual framework that is similar to Canadian GAAP, however, significant differences exist in certain matters of recognition, measurement and disclosure. The accounting policies and financial statement accounts of the Company that were materially affected by the adoption of IFRS, as well as the IFRS 1, First-Time Adoption of International Financial Reporting Standards, exemptions utilized by the Company, were described in the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2011.

The adoption of IFRS resulted in changes to the reported financial position and earnings of the Company and the 2010 comparative periods have been restated under IFRS. Reconciliations of the statements of financial position and statements of loss presented under Canadian GAAP to IFRS is included in Note 17 to the Financial Statements. Changes made to the statements of financial position and statements of loss resulted in reclassifications of various amounts on the statements of cash flows. Due to the reclassification of capitalized overhead under Canadian GAAP to operating costs or general and administrative (G&A) expenses under IFRS, cash used in investing activities under Canadian GAAP was reclassified to cash used in operating activities under IFRS. Since there was no change to the total increase in cash and cash equivalents, no reconciliation for the statements of cash flows was presented.

HIGHLIGHTS

(\$000, except as stated)	Three months		Nine months	
	ended September 30, 2011	2010	ended September 30, 2011	2010
Average daily production (bbls/d)	1,029	610	992	760
Realized oil prices (\$/bbl)	113.74	74.41	104.40	74.92
Oil revenue	10,769	4,177	28,277	15,554
Capital expenditures	16,843	17,475	48,078	53,850
Cash flow used in operating activities	(5,214)	(7,913)	(18,678)	(19,620)
Net loss	(4,157)	(9,605)	(19,394)	(7,151)
Net loss per share, basic and diluted	(0.01)	(0.03)	(0.06)	(0.02)

Oil production increased in the nine months ended September 30, 2011 as Ivanhoe received additional volumes to offset capital expenditures incurred at Dagang in 2011. Additional production in combination with stronger realized prices, resulted in higher oil revenue for the Company. The net loss in the nine months ended September 30, 2011 was \$19.4 million compared to a \$7.2 million net loss in the prior period. Although oil revenue increased in 2011, net income was impacted by higher operating and general and administrative expenses as well as lower non-cash foreign currency exchange and derivative instrument gains in comparison to 2010.

Capital expenditures totaled \$16.8 million in the three months ended September 30, 2011. In China, the Yixin-2 and Zitong-1 gas wells were gas flow tested and down hole electronic recorders were run until late July. Analysis of the data collected is ongoing and results will provide critical information for completion and stimulation techniques for future exploitation programs on the Zitong Block. At Dagang, two wells were drilled in the third quarter and one well was completed, in addition to the continuation of the Company's fracture stimulation program.

In the Nyalga basin of Mongolia, drilling was concluded at the Company's first exploration well at N16-1E-1A. The well was plugged and abandoned as it did not encounter oil shows in the reservoir. However, the well provided information that will be used in combination with seismic data to guide future drilling. The drilling rig was subsequently mobilized to a second site, N16-2E-B, located approximately 12 kilometres from the first well. Drilling commenced in the middle of September.

In Canada, regulators completed their initial review of the Company's Environmental Impact Assessment for the Tamarack project and Ivanhoe received expected Supplemental Information Requests in the third quarter of 2011. Ivanhoe anticipates submitting the additional information to the regulators in the fourth quarter of 2011.

Table of Contents

In Ecuador, the Company continued internal processing and interpretation of the seismic data acquired during the second quarter of 2011 from the Company's 190-kilometre 2-D survey of Block 20. Early interpretation indicates deeper faulting, with the potential to trap lighter oil resources which could prove beneficial for blending purposes and overall project economics. Additionally, initial internal interpretations may also suggest an extension of the field beyond what was originally estimated.

RESULTS OF OPERATIONS

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Asia (net bbls)				
Dagang	92,576	52,420	261,105	195,424
Daqing	2,098	3,711	9,749	12,173
Total production	94,674	56,131	270,854	207,597
Average daily production (bbls/d)	1,029	610	992	760
Pricing				
Average realized oil price (\$/bbl)	113.74	74.41	104.40	74.92
West Texas Intermediate (WTI) (\$/bbl)	89.40	76.06	95.31	77.54

Oil Revenue

Ivanhoe's oil revenue in the three and nine months ended September 30, 2011, increased from the prior periods due to a combination of higher production volumes and stronger realized prices. Oil production from the Dagang field in China was relatively constant. However, the terms of the Company's production sharing contract at Dagang with China National Petroleum Corporation (CNPC) stipulate that capital expenditures are to be funded 100% by Ivanhoe and CNPC's portion of the costs are reimbursed through the receipt of additional oil sales. Due to capital activity at Dagang in the three and nine months ended September 30, 2011, additional oil production was allocated to Ivanhoe.

Net Revenue from Operations

	Three months ended September 30,		Nine months ended September 30,	
(\$/bbl)	2011	2010	2011	2010
Oil revenue ⁽¹⁾	113.74	74.41	104.40	74.92
Less operating costs				
Field operating	(17.91)	(22.15)	(18.50)	(18.82)
Windfall Levy	(27.30)	(11.34)	(23.42)	(11.16)
Engineering and support costs	(1.34)	(2.42)	(1.25)	(1.81)
Net operating revenue ⁽¹⁾	67.19	38.50	61.23	43.13
Depletion	(19.53)	(23.41)	(18.56)	(23.55)
Net revenue from operations ⁽¹⁾	47.66	15.09	42.67	19.58

(1) Oil revenue per barrel, net operating revenue per barrel and net revenue (loss) from operations per barrel do not have standardized meanings prescribed by IFRS and therefore may not be comparable to similar measures used by other companies. Please refer to the Non-IFRS Financial Measures under the Advisories section in this MD&A for more details.

Table of Contents**Operating Costs**

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Asia				
Field operating	1,695	1,244	5,010	3,908
Windfall Levy	2,584	637	6,343	2,317
Engineering support	126	135	339	375
	4,405	2,016	11,692	6,600
Technology Development				
FTF operating costs	1,084	980	3,659	3,102
Total operating costs	5,489	2,996	15,351	9,702

Operating costs in China rose \$2.4 million and \$5.1 million, respectively, in the three and nine months ended September 30, 2011, over the comparable periods of 2010. The increase is primarily attributable to the additional Windfall Levy administered by the People's Republic of China, which rises with higher oil prices.

Field operating costs in total increased over the prior periods due to additional production volumes. On a per barrel basis, field operating costs were \$4.24/bbl lower in the three months ended September 30, 2011 compared to the prior year as field staff focused their efforts on drilling and completion activities in the Company's Dagang field. On a per barrel basis, year to date field operating costs in the nine months ended September 30, 2011 were consistent with the prior year.

Operating costs in the Technology Development segment are incurred at the Company's Feedstock Test Facility (FTF) at the Southwest Research Institute in San Antonio, Texas. FTF operating costs in the three months ended September 30, 2011 were consistent with costs sustained during the third quarter of 2010. FTF operating costs to date in 2011 are higher than in 2010 due to activities associated with assay and analyses related to the successful upgrading of the heavy oil recovered from the Pungarayacu IP-5B well in Ecuador and planned maintenance costs associated with enhancements implemented at the FTF unit in the second quarter of 2011.

Exploration and Evaluation

Costs of exploring for, and evaluating, oil and gas properties are initially capitalized as intangible exploration and evaluation assets and charged to exploration and evaluation (E&E) expense only if sufficient reserves cannot be established. In the three and nine months ended September 30, 2011, \$2.1 million of drilling costs were expensed in connection with the exploration well in Mongolia that was plugged and abandoned.

Following the drilling of the Zitong-1 and Yixin-2 wells, areas excluding those identified for development and future production were to be relinquished at the end of 2010. As a result, \$0.8 million and \$2.4 million of geological costs incurred in prior periods were expensed as E&E costs in the three and nine months ended September 30, 2010.

General and Administrative

G&A expenses were higher in the three and nine months ended September 30, 2011, than in the comparable periods. In the third quarter of 2011, professional fees rose due to higher legal costs incurred in connection with the proceedings described in Part II of this Form 10-Q and increasing contract engineering costs related to Ivanhoe's HTL™ technology. The Company also incurred additional staff, office and travel costs in the third quarter of 2011.

In the nine months ended September 30, 2011, G&A increased over the prior period due to additional staff, office and travel costs. Professional fees rose in comparison to the prior year as a result of higher legal costs, contract engineering costs related to Ivanhoe's HTE™ technology and other services. G&A in 2011 also included financing and filing fees associated with the Cdn\$73.3 million convertible unsecured subordinated debentures (Convertible Debentures) issued in the second quarter of 2011.

Table of Contents

Depletion and Depreciation

Depletion and depreciation expense in the three months ended September 30, 2011 was higher than in the third quarter of 2010 due to additional production in Asia during the current quarter.

Depletion and depreciation expense in the nine month ended September 30, 2011 increased in comparison to 2010 due to a combination of factors. Depletion in Asia rose \$0.2 million in 2011 due to higher year to date production, despite a lower depletion rate from additional Dagang reserves. The depreciation expense associated with the de-activated and dismantled Commercial Demonstration Facility (CDF) and FTF was \$0.6 million higher in the current year due to revisions to the CDF salvage values reducing depreciation in 2010.

On a per barrel basis, depletion in Asia decreased in the three and nine months ended September 30, 2011 in comparison to the prior periods due to additional proved and probable reserves booked at Dagang at January 1, 2011.

Foreign Exchange

The Company incurred a lower foreign exchange gain in the third quarter of 2011 compared to the third quarter of 2010. The Canadian dollar weakened in comparison to the US dollar during the current quarter. As a result, foreign exchange gains on the Company's Convertible Debentures were offset by foreign exchange losses incurred on the translation of Canadian dollar cash. The Canadian dollar strengthened against the US dollar during the third quarter of 2010 resulting in a higher net foreign exchange gain than in the current quarter.

In the nine months ended September 30, 2011, the foreign exchange gain was less than in the prior comparable period. In the prior year, the Company incurred a large foreign exchange gain in the first quarter of 2010 due to the Canadian dollar strengthening against the US dollar in the first quarter of 2010, which was partially offset by a loss incurred in the second quarter of 2010 when the Canadian dollar weakened.

Derivative Instruments

In the third quarter of 2011, the Company incurred an unrealized gain of \$5.4 million on the revaluation of the convertible component of its Convertible Debentures. The unrealized gain of \$0.6 million in the third quarter of 2010 resulted from the revaluation of the Company's share purchase warrants issued in 2006, 2009 and 2010 (Purchase Warrants).

In the nine months ended September 30, 2011, the unrealized gain on derivative instruments was less than in the prior comparable period. The unrealized gain on the Convertible Debentures totaled \$7.6 million to date in 2011. A combination of the expiry and revaluation of the Company's Purchase Warrants resulted in a gain of \$4.1 million and a gain of \$1.2 million was recognized on the revaluation of the convertible portion of the Cdn\$40.0 million convertible promissory note (Convertible Note). The revaluation of an option granted to a private investor in January 2010 to acquire an equity interest in one of the Company's subsidiaries created a loss of \$0.3 million.

The \$20.4 million unrealized gain recognized in the nine months ended September 30, 2010 stemmed from a \$16.0 million and \$4.3 million gain, respectively, on the revaluation of the Purchase Warrants and Convertible Note.

Provision for Income Taxes

Current taxes in China increased in both the three and nine months ended September 30, 2011, due to higher oil revenue than in the comparable periods. Ivanhoe incurred a future tax expense of \$0.7 million to date in 2011 due to increases in the deferred tax liability in China net of operating loss carryforwards, which was partially offset by continuing operating loss carryforwards in the US.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES****Contractual Obligations**

The following information about the Company's contractual obligations and other commitments summarizes certain liquidity and capital resource requirements. The information presented in the table below does not include planned, but not legally committed, capital expenditures or obligations that are discretionary and/or being performed under contracts which can be terminated on 30 days notice.

	Total	2011	2012	2013	2014	After 2014
Long term debt	69,939					69,939
Interest	20,349	2,259	4,021	4,021	4,021	6,027
Decommissioning provisions ⁽¹⁾	2,111			317		1,794
Lease commitments	1,561	428	867	266		
	93,960	2,687	4,888	4,604	4,021	77,760

(1) Represents undiscounted asset retirement obligations after inflation. The discounted value of these estimated obligations is provided for in the Financial Statements.

Long Term Debt and Interest

As described in the Financial Statements, the Company issued Cdn\$73.3 million of Convertible Debentures, maturing on June 30, 2016. The Convertible Debentures bear interest at an annual rate of 5.75%, payable semi-annually on the last day of June and December of each year, commencing on December 31, 2011.

Decommissioning Provisions

The Company is required to remedy the effect of our activities on the environment at its operating sites by dismantling and removing production facilities and remediating any damage caused. At September 30, 2011, Ivanhoe estimated the total undiscounted, inflated cost to settle its asset retirement obligations in Canada, for the FTF and in Ecuador was \$2.1 million. These costs are expected to be incurred in 2013, 2029 and 2038, respectively. Ivanhoe does not make such a provision for decommissioning costs in connection with its oil and gas operations in China as dry holes are abandoned as they occur and productive wells will not be abandoned while the Company has an economic interest in the field.

Operating Leases

The Company has long term operating leases for office space, which expire between 2011 and 2013.

Other

Should Ivanhoe receive government and other approvals necessary to develop the northern border of one of the Tamarack project leases, the Company will be required to make a cash payment to Talisman Energy Canada (Talisman) of up to Cdn\$15.0 million, as a conditional, final payment for the 2008 purchase transaction.

From time to time, Ivanhoe enters into consulting agreements whereby a success fee may be payable if and when either a definitive agreement is signed or certain other contractual milestones are met. Under the agreements, the consultant may receive cash, common shares, stock options or some combination thereof. Similarly, agreements entered into by the Company may contain cancellation fees or liquidated damages provisions for early termination. These fees are not considered to be material.

The Company may provide indemnities to third parties, in the ordinary course of business, that are customary in certain commercial transactions, such as purchase and sale agreements. The terms of these indemnities will vary based upon the contract, the nature of which prevents Ivanhoe from making a reasonable estimate of the maximum potential amounts that may be required to be paid. The Company's management is of the opinion that any resulting settlements relating to indemnities are not likely to be material.

In the ordinary course of business, the Company is subject to legal proceedings being brought against it. While the final outcome of these proceedings is uncertain, the Company believes that these proceedings, in the aggregate, are not reasonably likely to have a material effect on its financial position or earnings.

Table of Contents**Sources and Uses of Cash**

The Company's cash flows from operating, investing and financing activities, as reflected in the unaudited condensed consolidated statements of cash flows, are summarized in the following table:

	Three months		Nine months	
	ended September 30,		ended September 30,	
	2011	2010	2011	2010
Cash used in operating activities	(5,214)	(7,913)	(18,678)	(19,620)
Cash used in investing activities	(22,981)	(17,853)	(51,104)	(53,063)
Cash provided by (used in) financing activities	(41,317)	(102)	61,423	137,796

Ivanhoe's cash flow from operating activities is not sufficient to meet its operating and capital obligations over the next twelve months. The Company intends to use its working capital to meet its commitments. However, additional sources of funding will be required to grow the Company's major projects and fully develop its oil and gas properties. Historically, Ivanhoe has used external sources of funding such as public and private equity and debt markets. However, there is no assurance that these sources of funding will be available to the Company in the future or available on acceptable terms.

Operating Activities

In the three and nine months ended September 30, 2011, cash used in operating activities was lower than in 2010 as growth in revenue exceeded increases in operating costs and G&A expenses.

Investing Activities**E&E Expenditures**

E&E capital expenditures in the nine months ended September 30, 2011 totaled \$36.1 million. The Yixin-2 and Zitong-1 gas wells at the Company's Zitong project in China were drilled and fracture stimulated. Subsequent to post-fracture gas flow tests, down-hole electronic recorders were installed to gather additional pressure data during an extended shut-in period and analysis of the data collected is ongoing.

In the Nyalga basin of Mongolia, expenditures incurred on the Company's first exploration well at N16-1E-1A were expensed when the well did not encounter oil shows in the reservoir. The drilling rig was mobilized to a second site, N16-2E-B, and drilling commenced in the middle of September.

In Canada, regulators completed their initial review of the Company's Environmental Impact Assessment for the Tamarack project and, as is customary, provided the Company with an initial set of Supplemental Information Requests in the third quarter of 2011. Ivanhoe anticipates submitting the additional information to the regulators in the fourth quarter of 2011.

In Ecuador, the Company concluded its 190-kilometre 2-D seismic survey of Block 20 initiated during the second quarter of 2011. The initial phase of shooting was completed in July and analysis of the data is ongoing.

PP&E Expenditures

In the nine months ended September 30, 2011, PP&E additions totaled \$11.9 million. At Dagang, four wells were drilled, of which three were completed and fracture stimulated in 2011. A well drilled in 2010 was completed in early 2011. In addition, the fracture stimulation program at Dagang has been ongoing throughout 2011.

Financing Activities

Cash provided by financing activities was higher in the nine months ended September 30, 2011 than in the prior periods. In June 2011, the Company raised \$72.9 million, net of issuance costs, through the issuance of the Convertible Debentures. The net proceeds were used to repay the Convertible Note due to Talisman Energy Canada on July 11, 2011, as well as operating expenses and capital expenditures. In the first quarter of 2011, cash proceeds of \$29.9 million were raised through the exercise of purchase warrants and stock options.

In comparison, the Company raised \$135.7 million, net of issuance costs, through a private placement of 50 million special warrants at a price of Cdn\$3.00 per special warrant in the nine months ended September 30, 2010.

Table of Contents**Capital Structure**

As at	September 30, 2011	December 31, 2010
Debt		39,832
Long term debt	60,146	
Shareholders' equity	319,172	300,484

Ivanhoe intends to use its cash and cash equivalent balance to fulfill its commitments and partially fund operations in 2011. Cash flow may be insufficient to meet operating requirements in the next twelve months and additional sources of funding, either at a parent company level or at a project level, will be required to grow the Company's major projects and fully develop its oil and gas properties. Historically, Ivanhoe has used external sources of funding, such as public and private equity and debt markets. There is no assurance that the Company will be able to obtain such financing, or obtain it on favorable terms, and any future equity issuances may be dilutive to current investors. If Ivanhoe cannot secure additional financing, the Company may have to delay its capital programs and forfeit or dilute its rights in existing oil and gas property interests.

Outlook

In China, upon acceptance by CNPC, Ivanhoe will proceed with a 150-square-kilometre 3-D seismic program covering certain areas of the Zitong Block. The seismic program will assist in planning and designing a horizontal well-path for three wells in the Guan and Wen structures. It is anticipated that this program will be executed in the next 24 to 30 months and will provide the groundwork for the eventual development of the Zitong Block.

Following the drilling and abandonment of the Company's first exploration well in Mongolia, the Company mobilized the rig to a second location in east-central Mongolia. Drilling of the second well began in mid-September and is targeting a total depth of approximately 2,500 metres.

In Canada, Alberta Environment (AENV) and the Energy Resources Conservation Board (ERCB) have completed their initial review of Ivanhoe Energy's Application for the Tamarack integrated oil sands project, which is comprised of a two-phased 40,000 bbl/d steam-assisted gravity drainage thermal recovery (SAGD) and Heavy-to-Light (HTL) facility. The first round of Supplementary Information Requests (SIRS) was received from the regulators in the third quarter of 2011 and the Company will submit responses to these SIRs in the fourth quarter of 2011. It is anticipated that the regulatory approval process will be complete later in 2012. Project advancement, as currently envisaged, is subject to regulatory approval and financing.

Ivanhoe completed its 190-kilometre 2-D seismic survey over the southern portion of Block 20 in Ecuador and processing is ongoing. Internal interpretation suggests the heavy oil field may extend further southward than previously expected and geologic evidence suggests that a deeper, lighter oil play may also exist on the block. This internal analysis will be followed by expert external interpretation in the fourth quarter of 2011. The Company anticipates securing the necessary drilling licenses and environmental permits by the end of 2011 for wells to be drilled as part of the appraisal phase of the project.

Minor expenditures may be necessary for development costs relating to the enhancement of the Company's HTLTM upgrading process. The Company is continuing to pursue ongoing discussions related to other HTLTM heavy oil and selected conventional oil opportunities in North and South America, the Middle East and North Africa.

Management's plans for financing future expenditures include traditional project financing, debt and mezzanine financing or the sale of equity securities as well as the potential for alliances or other arrangements with strategic partners. Discussions with potential strategic partners are focused primarily on national oil companies and other sovereign or government entities that have approached Ivanhoe and expressed interest in participating in the Company's heavy oil activities in Ecuador, Canada and around the world. However, no assurances can be given that Ivanhoe will be able to enter into one or more strategic business alliances with third parties or that the Company will be able to raise sufficient additional capital. If the Company is unable to enter into such business alliances or obtain adequate additional financing, the Company may be required to curtail its operations, which may include the sale of assets.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There has been no material change in the Company's assessment of its sensitivity to market risk since its presentation set forth in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," in the 2010 Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, including its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of September 30, 2011. Based upon this evaluation, management concluded that these controls and procedures were (1) designed to ensure that material information relating to the Company is made known to the Company's Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding disclosure and (2) effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

It should be noted that while the Company's Chief Executive Officer and Chief Financial Officer believe that the Company's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that the Company's disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

There were no changes in the Company's internal control over financial reporting in the quarter ended September 30, 2011, that have materially affected, or are reasonably likely to have a material effect on the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is a defendant in a lawsuit filed on November 20, 2008, in the United States District Court for the District of Colorado by Jack J. Grynberg and three affiliated companies. The suit alleged bribery and other misconduct and challenged the propriety of a contract awarded to the Company's wholly-owned subsidiary Ivanhoe Energy Ecuador Inc. to develop Ecuador's Pungarayacu heavy oil field. The plaintiffs' claims were for unspecified damages or ownership of the Company's interest in the Pungarayacu field. The Company and related defendants filed motions to dismiss the lawsuit for lack of jurisdiction. The Court granted the motion and dismissed the case without prejudice. The Court granted Mr. Robert Friedland's request to sanction plaintiffs and plaintiffs' counsel for their conduct related to bringing the suit by awarding Mr. Friedland fees and costs. The Ivanhoe corporate defendants, including the Company, also have been awarded costs and fees as the prevailing parties in the trial court.

On August 13, 2010, the plaintiffs filed a notice of appeal challenging the district court's judgment and some of its related orders. The appeal is currently pending in the United States Court of Appeals for the Tenth Circuit. Briefing on the appeal is complete and the Court heard oral arguments on May 9, 2011, in Denver, Colorado. There has been no ruling as of yet on the appeal. The likelihood of loss or gain resulting from the lawsuit, and the estimated amount of ultimate loss or gain, are not determinable or reasonably estimable at this time.

On December 30, 2010, the Company received a demand for arbitration from GAR Energy and Associates, Inc. (GAR Energy) and Gonzalo A. Ruiz and Janis S. Ruiz as successors in interest to and assignees of GAR Energy. GAR Energy subsequently abandoned its demand for arbitration and filed suit against the Company and subsidiaries in the Superior Court for Kern County, California on March 11, 2011. The lawsuit alleges breach of contract, fraud and other misconduct arising from a consulting agreement and various other agreements between GAR Energy and the Company relating to the Pungarayacu heavy oil field. The plaintiffs seek actual damages of \$250,000, a portion of the Company's interest in the Pungarayacu field and other miscellaneous relief. On June 2, 2011, the Company filed its Answer to the Complaint and on June 3, 2011 removed the lawsuit to the United States District Court for the Eastern District of California. After the lawsuit was removed to federal court, the plaintiffs filed their First Amended Complaint and a motion asking the district court to remand the action to state court. The Company filed its Answer to the First Amended Complaint including a counterclaim for attorneys' fees and a motion asking the court to dismiss some of the claims against it on July 11, 2011. Plaintiffs' motion to remand remains pending, as do Company's defendants' motion to dismiss and a motion to compel arbitration of certain claims. The likelihood of loss or gain resulting from this dispute, and the estimated amount of ultimate loss or gain, are not determinable or reasonably estimable at this time.
