**WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

1. General

The condensed consolidated financial statements of Weatherford International Ltd. and all majority-owned subsidiaries (the Company) included herein are unaudited; however, they include all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly the Company's Condensed Consolidated Balance Sheet at September 30, 2007, Condensed Consolidated Statements of Income and Condensed Consolidated Statements of Comprehensive Income for the three and nine months ended September 30, 2007 and 2006, and Condensed Consolidated Statements of Cash Flows for the nine months ended September 30, 2007 and 2006. Although the Company believes the disclosures in these financial statements are adequate to make the interim information presented not misleading, certain information relating to the Company's organization and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to Securities and Exchange Commission rules and regulations. These financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2006 and the notes thereto included in the Company's Annual Report on Form 10-K and updated on the Company's Current Report on Form 8-K filed October 9, 2007. The results of operations for the three and nine months ended September 30, 2007 are not necessarily indicative of the results expected for the full year.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period and disclosure of contingent liabilities. On an ongoing basis, the Company evaluates its estimates, including those related to bad debts, inventories, investments, intangible assets and goodwill, property, plant and equipment, income taxes, insurance, employment benefits and contingent liabilities. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Certain reclassifications have been made to conform prior year financial information to the current period presentation.

The Company reviewed the presentation of its reporting segments during the first quarter of 2007. Based on this review, the Company determined that its operational performance would be segmented and reviewed on a geographic basis. As a result, the Company realigned its financial reporting segments and will now report the following regions as separate, distinct reporting segments: (1) North America, (2) Latin America, (3) Europe/West Africa/the Commonwealth of Independent States (CIS) and (4) Middle East/North Africa/Asia. The Company's historical segment data previously reported under the Evaluation, Drilling & Intervention Services and Completion & Production Systems divisions have been restated for all periods to conform to the new presentation (See Notes 6 and 16).

2. Critical Accounting Policies

There have been no material changes or developments in the Company's evaluation of accounting estimates and underlying assumptions or methodologies that the Company believes to be Critical Accounting Policies and Estimates as disclosed in our Form 10-K, for the year ended December 31, 2006.

3. Business Combinations

The Company has acquired businesses critical to its long-term growth strategy. Results of operations for acquisitions are included in the accompanying Condensed Consolidated Statements of Income from the date of acquisition. The balances included in the Condensed Consolidated Balance Sheets related to recent acquisitions are based on preliminary information and are subject to change when final asset valuations are obtained and the potential for liabilities has been evaluated. Acquisitions are accounted for using the purchase method of accounting

Table of Contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(UNAUDITED)

and the purchase price is allocated to the net assets acquired based upon their estimated fair values at the date of acquisition. Final valuations of assets and liabilities are obtained and recorded within one year from the date of the acquisition.

During the three and nine months ended September 30, 2007, the Company effected various acquisitions that were integrated into the Company's operations for total consideration of \$12.5 million and \$204.1 million, respectively.

In August of 2005, the Company acquired Precision Energy Services and Precision Drilling International. In association with the acquisition, the Company identified pre-acquisition contingencies related to duties and taxes associated with the importation of certain equipment assets to foreign jurisdictions. The Company calculated a range of reasonable estimates of the costs associated with these duties. As no amount within the range appeared to be a better estimate than any other, the Company used the amount that is the low end of the range in accordance with Statement of Financial Accounting Standards (SFAS) No. 5, *Accounting for Contingencies*, and its interpretations. At September 30, 2007, the Company has recorded a liability in the amount of approximately \$20 million for this matter. If the Company used the high end of the range, the aggregate potential liability would be approximately \$27 million higher. It is reasonably possible that the actual amount paid to settle these items could be materially different from the Company's estimate and could have a material adverse effect on its consolidated financial statements.

4. Inventories

Inventories by category are as follows:

	September 30, 2007	December 31, 2006
	<i>(In thousands)</i>	
Raw materials, components and supplies	\$ 350,739	\$ 330,006
Work in process	123,767	98,920
Finished goods	1,164,589	810,108
	\$ 1,639,095	\$ 1,239,034

Inventories are stated at the lower of cost or market. Work in process and finished goods inventories include the cost of materials, labor and plant overhead.

5. Discontinued Operation

In June 2007, the Company's management approved a plan to sell its oil and gas development and production business. The Company expects the sale of this business to be finalized within the next nine months. The business was historically included in the Company's North America and Europe/West Africa/CIS segments. In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS No. 144), the results of operations, financial position and cash flows of the business have been reflected in the condensed consolidated financial statements and notes as a discontinued operation for all periods presented. The Current Assets Held for Sale and Current Liabilities Held for Sale are included in Other Current Assets and Other Current Liabilities, respectively, in the Condensed Consolidated Balance Sheets.

The \$15.6 million loss from discontinued operation for the nine months ended September 30, 2007, includes non-cash asset impairment charges of \$9.2 million.

Interest charges have been allocated to the discontinued operation in accordance with Emerging Issues Task Force (EITF) Issue No. 87-24, *Allocation of Interest to Discontinued Operations*. The interest was allocated based on a pro rata calculation of the net assets of the discontinued business to the Company's consolidated net assets.

Table of Contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(UNAUDITED)

Operating results of the discontinued operation are as follows:

	Three Months		Nine Months	
	Ended September 30,		Ended September 30,	
	2007	2006	2007	2006
	<i>(In thousands)</i>			
Revenues	\$ 856	\$ 34	\$ 2,062	\$ 34

Accounts Payable	\$ 732	\$ 2,553
Other Current Liabilities	1,373	4,826
Other Liabilities	262	34
Current Liabilities Held for Sale	\$ 2,367	\$ 7,379

6. Goodwill

Goodwill is evaluated for impairment in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142), which requires that such assets be tested for impairment on at least an annual basis. The Company performs its annual goodwill impairment test as of October 1. The Company performed a goodwill impairment test as of January 1, 2007 due to the change in its reporting segments (See Notes 1 and 16). This impairment test indicated goodwill was not impaired.

The Company's goodwill impairment test involves a comparison of the fair value of each of the Company's reporting units, as defined under SFAS No. 142, with its carrying amount. The fair value is determined using discounted cash flows. The Company will continue to test its goodwill annually as of October 1 unless events occur or circumstances change between annual tests that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

In connection with the June 2007 approval of the plan to sell its discontinued operation (See Note 5), \$6.9 million of goodwill was allocated to the discontinued business based on a relative fair value approach.

Edgar Filing: WEATHERFORD INTERNATIONAL LTD - Form 10-Q

As of January 1, 2007, the Company recorded an adjustment of \$1.4 million to its goodwill balance as a result of the adoption of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an Interpretation of FASB Statement No. 109 (FIN No. 48) (See Note 10).

	September 30, 2007	December 31, 2006
	<i>(In thousands)</i>	
Revolving credit facility	\$ 224,000	\$ 75,321
Commercial paper program	69,865	490,808
Other short-term bank borrowings	122,158	66,864
Total Short-term Borrowings	416,023	632,993
Current Portion of Long-term Debt	15,028	15,743
Short-term Borrowings and Current Portion of Long-term Debt	\$ 431,051	\$ 648,736

On June 18, 2007, the Company completed a \$1.5 billion long-term debt offering comprised of (i) \$600 million senior notes at a coupon rate of 5.95% with a maturity in June 2012 (5.95% Senior Notes), (ii) \$600 million senior notes at a coupon rate of 6.35% with a maturity in June 2017 (6.35% Senior Notes) and (iii) \$300 million senior notes at a coupon rate of 6.80% with a maturity in June 2037 (6.80% Senior Notes). Net proceeds of approximately \$1.486 billion were used to repay outstanding borrowings on our commercial paper program and for general corporate purposes.

The Company maintains a revolving credit agreement with a syndicate of banks of which JPMorgan Chase Bank is the Administrative Agent (Revolving Credit Facility). The aggregate lending commitment of this facility is \$1.5 billion and allows for a combination of borrowings, support of the Company's commercial paper program and issuances of letters of credit. There were borrowings of \$224.0 million and \$74.6 million in outstanding letters of credit under the Revolving Credit Facility at September 30, 2007. The weighted average interest rate on the outstanding borrowings of this facility was 5.7% at September 30, 2007. The Revolving Credit Facility requires the Company to maintain a debt-to-capitalization ratio of less than 60% and contains other covenants and representations customary for an investment-grade commercial credit. The Company was in compliance with these covenants at September 30, 2007.

The Company maintained a committed Canadian dollar facility to support operations in that country prior to July 20, 2007, when it was converted to an uncommitted facility.

The Company has a \$1.5 billion commercial paper program under which it may from time to time issue short-term unsecured notes. The commercial paper program is supported by the Company's Revolving Credit Facility. The weighted average interest rate related to outstanding commercial paper issuances at September 30, 2007 was 5.5%.

The Company has short-term borrowings with various domestic and international institutions pursuant to uncommitted facilities. At September 30, 2007, the Company had \$122.2 million in short-term borrowings under these arrangements with a weighted average interest rate of 5.7%. In addition, the Company had \$118.2 million of letters of credit and bid and performance bonds outstanding under these uncommitted facilities.

9. Derivative Instruments*Interest Rate Swaps*

The Company may use interest rate swaps to take advantage of available short-term interest rates. Amounts received or paid upon termination of the swaps represent the fair value of the swaps at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction to interest expense over the remaining term of the debt.

Edgar Filing: WEATHERFORD INTERNATIONAL LTD - Form 10-Q

As of September 30, 2007 and December 31, 2006, the Company had net unamortized gains of \$12.6 million and \$14.3 million, respectively, associated with interest rate swap terminations. The Company's interest expense was reduced by \$0.6 million and \$1.7 million for the three and nine months ended September 30, 2007, respectively, and \$0.5 million and \$3.5 million for the three and nine months ended September 30, 2006, respectively, as a result

Table of Contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(UNAUDITED)

of the Company's interest rate swap activity. There were no interest rate swaps outstanding as of September 30, 2007.

Cash Flow Hedges

The Company may utilize interest rate derivatives to hedge projected exposures to interest rates in anticipation of future debt issuances. Amounts received or paid upon termination of these hedges represent the fair value of the hedges at the time of termination and are recorded as an adjustment to Other Comprehensive Income. These amounts are being amortized as an adjustment to interest expense over the remaining term of the related debt. There were no interest rate derivative hedges outstanding as of September 30, 2007.

Other Derivative Instruments

As of September 30, 2007, the Company had several foreign currency forward contracts and one option contract with notional amounts aggregating \$554.1 million, which were entered into to hedge exposure to currency fluctuations in various foreign currencies, including the Argentine peso, the Australian dollar, the Brazilian real, the British pound sterling, the Canadian dollar, the Colombian peso, the euro, the Hungarian forint, the Indonesian rupiah, the Kazakhstani tenge, the New Zealand dollar, the Norwegian krone, the Russian ruble, the Singapore dollar and the Thai baht. The total estimated change in fair value of these contracts compared to the original notional amount at September 30, 2007 resulted in an asset of \$1.5 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

In addition, after the closing of the acquisition of Precision Energy Services and Precision Drilling International on August 31, 2005, the Company entered into a series of cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar created as a result of the acquisition. At September 30, 2007, the Company had notional amounts outstanding of \$364.3 million. The total estimated change in fair value of these contracts at September 30, 2007 compared to the original notional amount resulted in a liability of \$78.3 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

10. Income Taxes

The Company's effective tax rates were 19.0% and 25.8% for the three and nine months ended September 30, 2007, respectively, and 28.0% and 28.6% for the three and nine months ended September 30, 2006, respectively. The decrease in the effective tax rate was primarily due to the benefits realized from the refinement of the Company's international tax structure and changes in geographic earnings mix. This decrease was partially offset by a \$50.0 million withholding tax payment required to be paid on a distribution made to one of the Company's foreign subsidiaries.

The Company adopted the provisions of FIN No. 48 on January 1, 2007. The total amount of unrecognized tax benefits as of the date of adoption was \$33.9 million. As a result of the implementation of FIN No. 48, the Company recognized a \$1.1 million increase in the liability for unrecognized benefits accounted for as a \$0.3 million increase to retained earnings (cumulative effect) and a \$1.4 million increase to goodwill.

Included in the balance of unrecognized tax benefits as January 1, 2007, were \$27.6 million of tax benefits that, if recognized in future periods, would impact the Company's effective tax rate. Also included in the balance of unrecognized tax benefits at January 1, 2007 were \$6.3 million of tax benefits that, if recognized, would result in a decrease to goodwill in purchase business combinations.

To the extent penalties and interest would be assessed on any underpayment of income tax, such amounts have been accrued and classified as a component of income tax expense in the financial statements. This is an accounting policy election made by the Company that is a continuation of the Company's historical policy and will continue to be consistently applied in the future. As of January 1, 2007, the Company had accrued \$6.8 million of interest and penalties related to unrecognized tax benefits.

At September 30, 2007, the Company had a \$39.5 million liability recorded for unrecognized tax benefits. The Company has accrued \$9.4 million of interest and penalties related to unrecognized tax benefits. The amount of unrecognized tax benefits that, if recognized in future periods, would affect the Company's effective tax rate is

Table of Contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(UNAUDITED)

\$30.7 million. The balance of unrecognized tax benefits also includes \$8.8 million of tax benefits that, if recognized in future periods, would result in a decrease to goodwill in purchase business combinations.

The Company is subject to income tax in many of the approximately 100 countries where it operates including major operations in the United States, the United Kingdom, and Canada. Many of the Company's subsidiaries are open to examination in the United Kingdom and Canada dating from 1998 and 1999, respectively through December 31, 2006. The Company is open to examination in the United States for tax years ended December 31, 2004 through December 31, 2006.

11. Earnings Per Share

Basic earnings per share for all periods presented equals net income divided by the weighted average number of the Company's common shares, \$1.00 par value (Common Shares) outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of Common Shares outstanding during the period as adjusted for the dilutive effect of the Company's stock option and restricted share plans and warrant.

The diluted earnings per share calculation for the nine months ended September 30, 2007 excludes 80 thousand stock options that were anti-dilutive. There were no anti-dilutive stock options during the three months ended September 30, 2007. The diluted earnings per share calculation for the three and nine months ended September 30, 2006 excludes 57 thousand and 24 thousand stock options that were anti-dilutive, respectively.

The following reconciles basic and diluted weighted average shares outstanding (in thousands):

	Three Months		Nine Months	
	Ended September30, 2007	2006	Ended September 30, 2007	2006
Basic weighted average shares outstanding	338,176	345,733	338,506	347,915
Dilutive effect of:				
Warrant	3,125	2,251	2,557	2,307
Stock option and restricted share plans	6,947	6,487	6,395	6,683
Diluted weighted average shares outstanding	348,248	354,471	347,458	356,905

12. Supplemental Cash Flow Information

The following summarizes investing activities relating to acquisitions integrated into the Company's operations for the periods shown:

	Nine Months	
	Ended September 30,	
	2007	2006
	<i>(In thousands)</i>	
Fair value of assets, net of cash acquired	\$ 109,907	\$ 87,178
Goodwill	169,339	119,770
Consideration paid related to prior year acquisitions	20,797	6,539
Total liabilities	(75,165)	(51,295)
Cash consideration, net of cash acquired	\$ 224,878	\$ 162,192

Non-cash Activities

During the nine months ended September 30, 2007 there were non-cash investing activities of \$20.0 million related to a note received in exchange for the sale of an equity investment of the Company.

13. Share-Based Compensation

The Company recognized employee share-based compensation expense of \$19.9 million and \$57.1 million during the three and nine months ended September 30, 2007, respectively, and \$14.6 million and \$43.0 million during the three and nine months ended September 30, 2006, respectively. The related income tax benefit recognized was \$7.0 million and \$20.0 million for the three and nine months ended September 30, 2007, respectively, and \$5.1 million and \$15.1 million for the three and nine months ended September 30, 2006, respectively. The Company capitalized share-based compensation during the three and nine months ended September 30, 2007 in the amount of \$0.2 million and \$0.5 million, respectively, and \$0.2 million and \$2.5 million for the three and nine months ended September 30, 2006, respectively.

The unrecognized compensation cost related to the Company's unvested stock options and restricted share grants as of September 30, 2007 was \$8.0 million and \$168.6 million, respectively, and are expected to be recognized over a weighted-average period of 2.9 years and 2.2 years, respectively.

14. Retirement and Employee Benefit Plans

The Company has defined benefit pension and other post-retirement benefit plans covering certain U.S. and international employees. Plan benefits are generally based on factors such as age, compensation levels and years of service. During the second quarter of 2007, one of the U.S. plans was remeasured to incorporate significant events that occurred within the plan. The largest impact of the remeasurement was a \$23.7 million loss generated as a result of compensation changes. The loss was recorded on the balance sheet as an increase to Other Liabilities with a corresponding decrease to Other Comprehensive Income, net of tax. The components of net periodic benefit cost for the three and nine months ended September 30, 2007 and 2006 are as follows:

	Three Months Ended September 30,			
	2007		2006	
	United		United	
	States	International	States	International
	<i>(In thousands)</i>			
Service cost	\$ 660	\$ 2,798	\$ 610	\$ 2,408

Settlement loss			2,770	
Net periodic benefit cost	\$ 12,054	\$ 8,413	\$ 10,292	\$ 7,568

The Company previously disclosed in its financial statements for the year ended December 31, 2006, that it expected to contribute \$1.1 million in the U.S. and \$9.7 million internationally to its pension and other postretirement

benefit plans during 2007. As of September 30, 2007, approximately \$0.9 million of contributions have been made in the U.S. and \$6.9 million of contributions have been made internationally. Currently, the Company anticipates total contributions in the U.S. and internationally to approximate the original estimates previously disclosed.

15. Variable Interest Entities

The Company acquired a 33% ownership interest in Premier Business Solutions (PBS) in June 2007. PBS conducts business in Russia and is the world s largest electric submersible pump manufacturer by volume. PBS is considered to be a variable interest entity. For purposes of applying FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities*, the Company is not the primary beneficiary of PBS. As such, the Company accounts for this investment under the equity method of accounting and does not consolidate PBS. The Company s maximum exposure to loss as a result of its involvement with PBS is approximately \$337 million at September 30,

Table of Contents

(UNAUDITED)

2007. The Company's investment in PBS is included in Equity Investments in Unconsolidated Affiliates in the accompanying Condensed Consolidated Balance Sheet at September 30, 2007.

16. Segment Information**Products and Services**

The Company is a diversified international energy service and manufacturing company that provides a variety of services and equipment to the exploration, production and transmission sectors of the oil and natural gas industry. The Company operates in virtually every oil and natural gas exploration and production region in the world. The composition of the Company's consolidated revenues by product-line is as follows:

	Three Months		Nine Months	
	Ended September 30,		Ended September 30,	
	2007	2006	2007	2006

Total	100%	100%	100%	100%

Reporting Segments

The Company reviewed the presentation of its reporting segments during the first quarter of 2007. Based on this review, the Company determined that its operational performance would be segmented and reviewed on a geographic basis. As a result, the Company realigned its financial reporting segments and now reports the following regions as separate, distinct reporting segments as defined by the chief operating decision maker: (1) North America, (2) Latin America, (3) Europe/West Africa/CIS and (4) Middle East/North Africa/Asia. The Company's historical segment data previously reported under the Evaluation, Drilling & Intervention Services and Completion & Production Systems divisions has been restated for all periods to conform to the new presentation.

Financial information by segment is summarized below. Total assets at September 30, 2007 and December 31, 2006 do not include the assets of the Company's discontinued operation. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

	Three Months Ended September 30, 2007			Total Assets at September 30, 2007

had intersegment revenues of approximately \$272 million, \$72 million, \$168 million and \$153 million for North America, Latin America, Europe/West Africa/CIS and Middle East/North Africa/Asia, respectively.

17. New Accounting Pronouncements

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (SFAS No. 157), which defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles (GAAP) and expands disclosures about fair value measurements. SFAS No. 157 applies to other accounting pronouncements that require or permit fair value measurements. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those fiscal years. The Company is currently evaluating the potential impact, if any, of the adoption of SFAS No. 157 on its consolidated financial position, results of operations and cash flows.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS No. 159). This standard allows companies to elect to follow fair value accounting for certain financial assets and liabilities in an effort to mitigate volatility in earnings without having to apply complex hedge accounting provisions. SFAS No. 159 is applicable only to certain financial instruments and is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the potential impact, if any, of the adoption of SFAS No. 159 on its consolidated financial position, results of operations and cash flows.

18. Condensed Consolidating Financial Statements

The following obligations of Weatherford International, Inc. (Issuer) were guaranteed by Weatherford International Ltd. (Parent) as of September 30, 2007: (i) \$350.0 million of 6 5/8% senior notes due 2011 (6 5/8% Senior Notes), (ii) the 5.95% Senior Notes, (iii) the 6.35% Senior Notes, and (iv) the 6.80% Senior Notes. As of December 31, 2006, the 6 5/8% Senior Notes of the Issuer were guaranteed by the Parent.

The following obligations of the Parent were guaranteed by the Issuer as of September 30, 2007 and December 31, 2006: (i) the Revolving Credit Facility, (ii) \$250.0 million of 4.95% senior notes due 2013 (4.95% Senior Notes), (iii) \$350.0 million of 5.50% senior notes due 2016 (5.50% Senior Notes), (iv) \$600.0 million of 6.50% senior notes due 2036 (6.50% Senior Notes) and (v) issuances of notes under the commercial paper program.

As a result of these guarantee arrangements, the Company is required to present the following condensed consolidating financial information. The accompanying guarantor financial information is presented on the equity method of accounting for all periods presented. Under this method, investments in subsidiaries are recorded at cost and adjusted for the Company's share in the subsidiaries' cumulative results of operations, capital contributions and distributions and other changes in equity. Elimination entries relate primarily to the elimination of investments in subsidiaries and associated intercompany balances and transactions. Certain prior year amounts have been reclassified to conform to the current year presentation.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

We begin Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) with an executive level overview. This overview provides a general description of our company today, a discussion of industry market trends, insight into management's perspective of the opportunities and challenges we face and our outlook for the remainder of 2007 and into 2008. Next, we analyze the results of our operations for the three and nine months ended September 30, 2007 and 2006, including the trends in our overall business and our operating segments. Then we review our cash flows and liquidity, capital resources and contractual obligations. We close with a discussion of new accounting pronouncements and an update, when applicable, to our critical accounting judgments and estimates.

Overview**General**

The following discussion should be read in conjunction with our financial statements included with this report and our financial statements and related Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2006 included in our Annual Report on Form 10-K and updated on our Current Report on Form 8-K filed on October 9, 2007. Our discussion includes various forward-looking statements about our markets, the demand for our products and services and our future results. These statements are based on certain assumptions we consider reasonable. For information about these assumptions, you should refer to the section below entitled Forward-Looking Statements.

We provide equipment and services used for drilling, completion and production of oil and natural gas wells throughout the world. We conduct operations in approximately 100 countries and have service and sales locations in nearly all of the oil and natural gas producing regions in the world. Our offerings include drilling services, well construction services, wireline services, fishing and intervention services, completion systems, and all forms of artificial lift. We operate under four segments: (1) North America (2) Latin America (3) Europe/West Africa/the Commonwealth of Independent States (CIS) and (4) Middle East/North Africa/Asia.

Industry Trends

Changes in the current price and expected future prices of oil and natural gas influence the level of energy industry spending. Changes in expenditures result in an increased or decreased demand for our products and services. Rig count is an indicator of the level of spending for the exploration for and production of oil and natural gas reserves.

The following chart sets forth certain statistics that reflect historical market conditions:

	WTI Oil (1)	Henry Hub Gas (2)	North American Rig Count (3)	International Rig Count (3)
September 30, 2007	\$81.66	\$6.87	2,128	1,114
December 31, 2006	61.05	6.30	2,178	1,029
September 30, 2006	62.91	5.62	2,185	949

Rig Count and
other third-party
data

Oil prices have increased during the first nine months of 2007 ranging from a low of \$50.48 per barrel in mid-January to a high of \$83.32 per barrel towards the end of September. Natural gas prices have increased approximately 9% since December 31, 2006, with prices ranging from a high of \$8.19 MM/BTU in early June and a low of \$5.38 MM/BTU at the end of August. Factors influencing oil and natural gas prices during the period include persistent hydrocarbon inventory levels, realized and expected economic growth, levels of spare production capacity within the Organization of Petroleum Exporting Countries (OPEC), weather and geopolitical uncertainty.

North America rig count has declined approximately 2% since the end of 2006, as a reduction in Canadian activity more than offset an increase in U.S. activity. International rig count has increased approximately 8% since the end of 2006.

Table of Contents

During 2006, drilling and completion spending continued to increase in both North America and the international markets. Drilling and completion spending growth during 2007 is anticipated to be driven by the international markets. According to Spears & Associates, drilling and completion spending during 2007 is anticipated to increase approximately 19% in international markets while remaining essentially flat in North America markets as compared to 2006 levels.

Opportunities and Challenges

The nature of our industry offers many opportunities and challenges. We have created a long-term strategy aimed at growing our business, servicing our customers, and most importantly, creating value for our shareholders. The success of our long-term strategy will be determined by our ability to manage effectively any industry cyclicality, respond to industry demands and successfully maximize the benefits from our acquisitions.

The cyclicality of the energy industry impacts the demand for our products and services. Certain of our products and services, such as drilling and evaluation services, well installation services and well completion services, depend on the level of exploration and development activity and the completion phase of the well life cycle. Other products and services, such as our production optimization and artificial lift systems, are dependent on production activity. We believe that decline rates, a measure of the fall in production from a well over time, are accelerating. We also believe that there has been, and will continue to be, a deterioration in the quality of incremental hydrocarbon formations that our customers develop and that these formations will require more of our products and services than higher quality formations. The market for oilfield services will grow year-on-year relative to the decline rates and the implicit rate of demand growth. We are aggressively, but methodically, growing our employee base, manufacturing capacity and equipment base to meet the demands of the industry.

2007 and 2008 Outlook

We believe the outlook for our businesses is favorable. As decline rates accelerate and reservoir productivity complexities increase, our clients will face growing challenges securing desired rates of production growth. Assuming the demand for hydrocarbons does not weaken, we believe this provides us with a robust outlook. The acceleration of decline rates and the increasing complexity of the reservoirs increase our customers' requirements for technologies that enable and improve productivity.

Looking into the remainder of 2007 and 2008, we expect average worldwide rig activity to grow as compared to third quarter 2007 levels, and we expect our business to continue to grow at a faster rate than the underlying rig count. We expect the Eastern Hemisphere to be our highest growth market during 2007, followed by the Latin America market. We expect our growth in 2007 and 2008 to be broad based, with all of our product and service lines continuing to build on 2006 achievements. These improvements should be driven by the strength of our technology and our global infrastructure. We expect our newer technologies to continue to gain traction across a wider breadth of geographic markets, similar to our performance in 2006.

Geographic Markets. Climate, natural gas storage levels and commodity prices will dictate the rate of oilfield service activity growth in North America for the remainder of 2007 and 2008. While these factors are difficult to predict with any certainty over short periods of time, we believe that the North American market has positive secular growth attributes over the longer term. Over the next three to nine months, North America activity is likely to remain at or around current levels, on average. In October 2007, the Alberta provincial government adopted a new royalty regime applicable to hydrocarbon production in this province of Canada. Although the new program does not begin until 2009, we believe our customers have already begun to factor the increased costs imposed by the program into their economic planning process. The details of the new program have yet to be finalized or widely disseminated, but we believe the net effect of the program will be a negative factor weighing on Canadian oil and gas activity. We expect most of our growth for the remainder of 2007 and 2008 will come out of the international markets. Eastern Hemisphere growth will be driven by year-over-year increases in the Middle East, North Africa, West Africa, China, Russia and Central Europe. In addition, we expect volume increases in Latin America with improvements stemming from Brazil, Mexico, Colombia, Venezuela and Argentina.

Pricing. The overall pricing outlook is positive. Pricing is trending upwards, concurrently with raw material and labor cost inflation. We expect pricing to remain strong for the remainder of 2007. Price improvements are being realized on a contract-by-contract basis and are occurring in different classes of products and service lines depending

upon the region.

Overall, the level of market improvements for our businesses for the remainder of 2007 and throughout 2008 will continue to depend heavily on our ability to gain market share, primarily in the Eastern Hemisphere, recruit and

Table of Contents

retain personnel and secure further acceptance of our new technologies. The continued strength of the industry will be highly dependent on many external factors, such as world economic and political conditions, member country quota compliance within OPEC and weather conditions. The extreme volatility of our markets makes predictions regarding future results difficult.

Results of Operations

We reviewed the presentation of our reporting segments during the first quarter of 2007. Based on this review, we determined that our operational performance would be segmented and reviewed on a geographic basis. As a result, we realigned our financial reporting segments and now report the following regions as separate, distinct reporting segments as defined by our chief operating decision maker: (1) North America, (2) Latin America, (3) Europe/West Africa/CIS and (4) Middle East/North Africa/Asia. Our historical segment data previously reported under our Evaluation, Drilling & Intervention Services and Completion & Production Systems divisions have been restated for all periods to conform to the new presentation.

Table of Contents

The following charts contain selected financial data comparing our consolidated and segment results from operations for the three and nine months ended September 30, 2007 and 2006. Prior period amounts have been restated to reflect the impact of our discontinued operation.

Comparative Financial Data

Company Results**Revenues**

Consolidated revenues increased \$275.2 million, or 16.2%, in the third quarter of 2007 as compared to the third quarter of 2006. The increase resulted primarily from organic growth as our businesses continued to benefit from increasing market activity and share gains. Approximately 85% of our revenue growth was derived from outside of North America. International revenues increased \$235.4 million, or 31.7%, in the third quarter of 2007 as compared to the third quarter of 2006. This increase outpaced the 8.3% increase in average international rig count over the comparable period. Revenues from our drilling services, well construction and artificial lift systems service lines were strong contributors during the quarter.

Consolidated revenues for the first nine months of 2007 increased \$868.9 million, or 18.2%, over the first nine months of 2006. Approximately 81% of our revenue growth was derived from outside of North America. International revenues increased \$701.3 million, or 34.1%, in the first nine months of 2007 as compared to the first nine months of 2006. This increase outpaced the 9.1% increase in average international rig count. Revenues from our well construction, drilling services and drilling tools service lines were strong contributors to the increase for the period.

Gross Profit

Our gross profit as a percentage of revenues decreased from 36.5% in the third quarter of 2006 to 35.4% in the third quarter of 2007. The decline in gross margin in the current quarter as compared to the third quarter of 2006 was primarily attributable to the decline experienced in our Canadian market, particularly in our service businesses which typically contribute higher margins. Our gross profit as a percentage of revenues decreased slightly to 35.6% during the nine months ended September 30, 2007, as compared to 35.9% during the nine months ended September 30, 2006.

Selling, General and Administrative Attributable to Segments

Selling, general and administrative expenses attributable to segments increased \$19.2 million, or 10.0%, during the three months ended September 30, 2007, as compared to the same period of the prior year. The increase is due primarily to increased salaries and benefits associated with increased headcount to support our growth. The increase was partially offset by a gain recognized from the divestiture of an equity investment. This transaction represents approximately 8% of selling, general and administrative expenses attributable to the segments for the three months ended September 30, 2007. Excluding this transaction, selling, general and administrative expenses attributable to segments as a percentage of revenues were approximately 11.5% and 11.3% for the three months ended September 30, 2007 and 2006, respectively.

Selling, general and administrative expenses attributable to segments increased \$77.3 million, or 13.9%, during the nine months ended September 30, 2007, as compared to the same period of the prior year. The increase is due

primarily to increased salaries and benefits associated with increased headcount to support our growth. The increase

Table of Contents

was partially offset by gains recognized from the divestiture of equity investments. These transactions represent approximately 5% of selling, general and administrative expenses attributable to segments for the nine months ended September 30, 2007. Excluding these transactions, selling, general and administrative expenses attributable to segments as a percentage of revenues were approximately 11.9% and 11.7% for the nine months ended September 30, 2007 and 2006, respectively.

Corporate General and Administrative

Corporate general and administrative expenses increased \$3.9 million, or 15.6%, and \$22.9 million, or 32.2%, during the three and nine months ended September 30, 2007, respectively, as compared to the same periods of the prior year. Severance charges of approximately \$15 million were incurred during the nine months ended September 30, 2007. The remainder of the increase is primarily related to higher employee compensation expense.

Interest Expense, Net

Interest expense, net, increased \$22.7 million, or 82.6%, and \$49.2 million, or 70.2%, during the three and nine months ended September 30, 2007, respectively, as compared to the same periods of the prior year. The increase in interest expense was primarily attributable to our additional long-term debt issuances during June 2007 and higher average debt balances.

Income Taxes

Our effective tax rates for the third quarter of 2007 and 2006 were 19.0% and 28.0%, respectively. The decrease in our effective tax rate quarter-over-quarter was due to benefits realized from the refinement of our international tax structure and changes in our geographic earnings mix. Our effective tax rates for the nine months ended 2007 and 2006 were 25.8% and 28.6%, respectively. The decrease in our effective tax rate was due to refinements in our international tax structure and changes in our geographic earnings mix. This decrease was partially offset by a \$50.0 million withholding tax payment required to be paid in the second quarter of 2007 on a distribution made to one of our foreign subsidiaries.

Discontinued Operation

Our discontinued operation consists of our oil and gas development and production company. We had a loss from the discontinued operation, net of taxes, for the three and nine months ended September 30, 2007, of \$2.2 million and \$15.6 million, respectively. Included in the loss for the nine months ended September 30, 2007, were non-cash asset impairment charges of \$9.2 million, net of taxes.

Segment Results***North America***

North America revenues increased \$39.8 million, or 4.2%, in the third quarter of 2007 as compared to the third quarter of 2006. This increase occurred despite a 3.3% decline in average North America rig count over the comparable period. The increase in North America revenues was attributable to the U.S., which increased \$94.1 million, or 14.3%, over the same period of the prior year. This increase was partially offset by a decline in Canadian revenues of \$54.3 million, or 18.4%, over the same period of the prior year. A significant portion of our growth in the U.S. was generated by our drilling services and artificial lift systems service lines. This growth was partially offset by the decline experienced in Canada.

North America revenues increased \$167.6 million, or 6.2%, in the first nine months of 2007 as compared to the first nine months of 2006 against a backdrop of flat rig count year-over-year. Our chemicals and stimulation, well construction and drilling services lines were significant contributors to the year-over-year growth.

Operating income decreased \$17.3 million, or 6.1%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 26.6% in the third quarter of 2007 compared to 29.5% in the same period of the prior year. The decrease in operating income and margins was due primarily to the adverse conditions experienced in the Canadian market during the current quarter, particularly in our service businesses which typically contribute higher margins.

Operating income decreased \$10.5 million, or 1.4%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 26.2% for the nine months ended September

Table of Contents

30, 2007 compared to 28.2% in the same period of the prior year. The decreases in operating margins were primarily the result of the decline experienced in our Canadian market during 2007.

Middle East/North Africa/Asia

Revenues in our Middle East/North Africa/Asia segment increased \$102.4 million, or 29.0%, in the third quarter of 2007 as compared to the same quarter of the prior year. This increase exceeded the average rig count increase of 8.4% for this region. Revenue increases were highest in the Saudi Arabia, Australia and China markets. Our revenues increased in all service lines.

Revenues increased \$343.1 million, or 36.4%, during the first nine months of 2007 as compared to the same period of the prior year. This increase exceeded the average rig count increase of 10.4% during the period. The increase in revenues resulted primarily from organic growth as our businesses continued to benefit from increasing market activity and share gains in the region. Our drilling services, well construction and re-entry & fishing service lines were all strong contributors to the increase.

Operating income increased \$32.6 million, or 45.8%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 22.7% in the third quarter of 2007 compared to 20.1% in the same period of the prior year. Operating income increased \$108.7 million, or 62.0%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 22.1% for the nine months ended September 30, 2007 compared to 18.6% in the same period of the prior year. The increase in operating income and margins was primarily due to additional incremental revenues generated during the current period to cover our fixed costs.

Europe/West Africa/CIS

Revenues in our Europe/West Africa/CIS region increased \$93.3 million, or 43.3%, in the third quarter of 2007 as compared to the same quarter of the prior year. This increase outpaced a 4.2% increase in average rig count over the same period. Our well construction, completion systems and drilling services service lines were the strongest contributors to the growth.

Revenues increased \$246.6 million, or 41.3%, in the first nine months of 2007 as compared to the first nine months of 2006 against a backdrop of a 2.0% decrease in rig count over the comparable period. The increase in revenues resulted primarily from organic growth as our businesses continued to benefit from increasing market activity and share gains in the region. Our well construction, completion systems and drilling services service lines were all strong contributors to the increase.

Operating income increased \$27.8 million, or 60.4%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 23.9% in the third quarter of 2007 compared to 21.4% in the same period of the prior year. Operating income increased \$72.0 million, or 57.4%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 23.4% for the nine months ended September 30, 2007 compared to 21.0% in the same period of the prior year. The improvements in operating income and margins during the three and nine months ended September 30, 2007 as compared to the same periods of the prior year are primarily the result of the increase in revenues to further absorb the region's fixed cost base.

Latin America

Revenues in our Latin America region increased \$39.7 million, or 22.8%, in the third quarter of 2007 as compared to the same quarter of the prior year. This increase exceeded the 9.2% increase in average rig count over the same period. Our drilling services and artificial lift systems service lines were strong contributors to the quarter-over-quarter increase. The highest revenue growth was experienced in Brazil, Colombia and Argentina.

Revenues increased \$111.5 million, or 21.7%, in the first nine months of 2007 as compared to the first nine months of 2006. This increase exceeded the 9.9% increase in rig count over the same period. Our drilling services and artificial lift systems service lines were strong contributors to the increase.

Operating income increased \$17.6 million, or 63.0%, during the three months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 21.3% in the third quarter of 2007 compared to 16.0% in the same period of the prior year. Operating income increased \$51.8 million, or 59.8%, during the nine months ended September 30, 2007 as compared to the same period of the prior year. Operating margins were 22.1%

Table of Contents

for the nine months ended September 30, 2007 compared to 16.8% in the same period of the prior year. The increase in operating income and margins was due primarily to the higher revenue base combined with a change in product mix.

Equity Investment Acquisition

We acquired a 33% ownership interest in Premier Business Solutions (PBS) in June 2007. PBS conducts business in Russia and is the world's largest electric submersible pump manufacturer by volume. PBS is considered to be a variable interest entity. For purposes of applying Financial Accounting Standards Board Interpretation No. 46(R), *Consolidation of Variable Interest Entities*, we are not the primary beneficiary of PBS. As such, we account for this investment under the equity method of accounting and do not consolidate PBS. Our maximum exposure to loss as a result of our investment in PBS is approximately \$337 million at September 30, 2007.

Liquidity and Capital Resources***Historical Cash Flows***

At September 30, 2007, our cash and cash equivalents were \$126.0 million, a net decrease of \$0.3 million from December 31, 2006, which was primarily attributable to the following:

cash inflows from operating activities of \$521.4 million;

capital expenditures from continuing operations for property, plant and equipment of \$1,097.5 million;

acquisition of businesses of approximately \$224.9 million, net of cash acquired;

acquisition of equity investments of \$334.5 million;

acquisition of intellectual property of \$17.7 million;

borrowings, net of repayments, on long-term debt and short-term facilities of \$1,246.5 million;

proceeds from the sale of assets and business, net of \$59.9 million;

proceeds from stock option activity of \$30.8 million; and

treasury share purchases of \$179.3 million.

Sources of Liquidity and Borrowings

Our sources of liquidity include current cash and cash equivalent balances, cash generated from operations, and committed availabilities under our Revolving Credit Facility (defined below). We maintain a shelf registration statement covering the future issuance of various types of securities, including debt, common shares, preferred shares and warrants.

Committed Borrowing Facility

We maintain a revolving credit agreement with a syndicate of banks of which JPMorgan Chase Bank is the Administrative Agent (Revolving Credit Facility). This facility allows for a combination of borrowings, support for our commercial paper program and issuances of letters of credit and expires in May 2011. The weighted average interest rate on the outstanding borrowings of this facility was 5.7% at September 30, 2007. The Revolving Credit Facility requires us to maintain a debt-to-capitalization ratio of less than 60% and contains other covenants and representations customary for an investment-grade commercial credit. We were in compliance with these covenants at September 30, 2007. The following is a recap of our availability under the Revolving Credit Facility at September 30, 2007 (in millions):

Facility amount	\$ 1,500.0
-----------------	------------

Less uses of facility:

Edgar Filing: WEATHERFORD INTERNATIONAL LTD - Form 10-Q

Amount drawn	224.0
Commercial paper support	69.9
Letters of credit	74.6

Availability \$ 1,131.5

Table of Contents*Uncommitted Borrowing Arrangements*

We have short-term borrowings with various domestic and international institutions pursuant to uncommitted facilities. At September 30, 2007, we had \$122.2 million in short-term borrowings outstanding under these arrangements with a weighted average interest rate of 5.7%. In addition, we had \$118.2 million of letters of credit and bid and performance bonds outstanding under these uncommitted facilities.

Commercial Paper

We have a \$1.5 billion commercial paper program under which we may from time to time issue short-term unsecured notes. The commercial paper program is supported by our Revolving Credit Facility. The weighted average interest rate related to outstanding commercial paper issuances at September 30, 2007 was 5.5%.

Debt Offering

On June 18, 2007, we completed a \$1.5 billion long-term debt offering comprised of (i) \$600 million of 5.95% senior notes due 2012 (5.95% Senior Notes), (ii) \$600 million of 6.35% senior notes due 2017 (6.35% Senior Notes) and (iii) \$300 million of 6.80% senior notes due 2037 (6.80% Senior Notes). Net proceeds of approximately \$1.486 billion were used to repay outstanding borrowings on our commercial paper program and for general corporate purposes.

Cash Requirements

Our cash requirements and contractual obligations at September 30, 2007, and the effect these obligations are expected to have on our liquidity and cash flow in future periods are as follows:

We project that our capital expenditures for 2007 will be approximately \$1.4 billion. We expect to use these expenditures primarily to support the growth of our business and operations. Capital expenditures during the nine months ended September 30, 2007 were \$1,047.5 million, net of proceeds from tools lost down hole of \$50.0 million.

Our board authorized us to repurchase up to \$1.0 billion of our outstanding common shares. We may from time to time repurchase our common shares depending upon the price of our common shares, our liquidity and other considerations. During the nine months ended September 30, 2007, we repurchased 4.1 million of our common shares at an aggregate price of \$179.3 million. At September 30, 2007, we had approximately \$272.2 million remaining availability under our share repurchase program.

Derivative Instruments

From time to time, we enter into derivative transactions to hedge existing or projected exposures to changes in interest rates and foreign currency exchange rates. We do not enter into derivative transactions for speculative or trading purposes.

We manage our debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps as a tool to achieve that goal. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions. The counterparties to our interest rate swaps are creditworthy multinational commercial banks. We believe that the risk of counterparty nonperformance is immaterial.

Interest Rate Swaps

We may use interest rate swaps to take advantage of available short-term interest rates. Amounts received or paid upon termination of the swaps represent the fair value of the swaps at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction to interest expense over the remaining term of the debt.

As of September 30, 2007 and December 31, 2006, we had net unamortized gains of \$12.6 million and \$14.3 million, respectively, associated with interest rate swap terminations. Our interest expense was reduced by \$0.6 million and \$1.7 million for the three and nine months ended September 30, 2007, respectively, and \$0.5 million and \$3.5 million for the three and nine months ended September 30, 2006, respectively, as a result of our interest rate swap activity. There were no interest rate swaps outstanding as of September 30, 2007.

Table of Contents*Cash Flow Hedges*

We may utilize interest rate derivatives to hedge projected exposures to interest rates in anticipation of future debt issuances. Amounts received or paid upon termination of these hedges represent the fair value of the agreements at the time of termination and are recorded as an adjustment to Other Comprehensive Income. These amounts are amortized as an adjustment to interest expense over the remaining term of the related debt. There were no interest rate derivative agreements outstanding as of September 30, 2007.

Other Derivative Instruments

As of September 30, 2007, we had several foreign currency forward contracts and one option contract with notional amounts aggregating \$554.1 million, which were entered into to hedge exposure to currency fluctuations in various foreign currencies, including the Argentine peso, the Australian dollar, the Brazilian real, the British pound sterling, the Canadian dollar, the Colombian peso, the euro, the Hungarian forint, the Indonesian rupiah, the Kazakhstani tenge, the New Zealand dollar, the Norwegian krone, the Russian ruble, the Singapore dollar and the Thai baht. The total estimated change in fair value of these contracts compared to the original notional amount at September 30, 2007 resulted in an asset of \$1.5 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

In addition, after the closing of the acquisition of Precision Energy Services and Precision Drilling International on August 31, 2005, we entered into a series of cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar created as a result of the acquisition. At September 30, 2007, we had notional amounts outstanding of \$364.3 million. The total estimated change in fair value of these contracts at September 30, 2007 compared to the original notional amount resulted in a liability of \$78.3 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

*Off Balance Sheet Arrangements**Guarantees*

The following obligations of Weatherford International, Inc. (Issuer) were guaranteed by Weatherford International Ltd. (Parent) as of September 30, 2007: (i) \$350.0 million of 6 5/8% senior notes due 2011 (6 5/8% Senior Notes), (ii) the 5.95% Senior Notes, (iii) the 6.35% Senior Notes, and (iv) the 6.80% Senior Notes.

The following obligations of the Parent were guaranteed by the Issuer as of September 30, 2007: (i) the Revolving Credit Facility, (ii) \$250.0 million of 4.95% senior notes due 2013 (4.95% Senior Notes), (iii) \$350.0 million of 5.50% senior notes due 2016 (5.50% Senior Notes), (iv) \$600.0 million of 6.50% senior notes due 2036 (6.50% Senior Notes) and (v) issuances of notes under the commercial paper program.

Letters of Credit

We execute letters of credit in the normal course of business. While these obligations are not normally called, these obligations could be called by the beneficiaries at any time before the expiration date should we breach certain contractual or payment obligations. As of September 30, 2007, we had \$192.8 million of letters of credit and bid and performance bonds outstanding, consisting of \$118.2 million outstanding under various uncommitted credit facilities and \$74.6 million letters of credit outstanding under our committed facility. If the beneficiaries called these letters of credit, the called amount would become an on-balance sheet liability, and our available liquidity would be reduced by the amount called under our various uncommitted facilities.

Operating Leases

We are committed under various operating lease agreements primarily related to office space and equipment. Generally, these leases include renewal provisions as well as provisions which permit the adjustment of rental payments for taxes, insurance and maintenance related to the property.

Table of Contents

New Accounting Pronouncements

See Note 17 to our condensed consolidated financial statements included elsewhere in this report.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements. We prepare these financial statements in conformity with U.S. generally accepted accounting principles. As such, we are required to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. We base our estimates on historical experience, available information and various other assumptions we believe to be reasonable under the circumstances. On an on-going basis, we evaluate our estimates; however, actual results may differ from these estimates under different assumptions or conditions. There have been no material changes or developments in our evaluation of the accounting estimates and the underlying assumptions or methodologies that we believe to be Critical Accounting Policies and Estimates as disclosed in our Form 10-K, for the year ended December 31, 2006.

Goodwill Impairment Test

As previously discussed, we changed our reporting segments during the first quarter of 2007. In connection with this change, we performed an impairment test on our goodwill balances as of January 1, 2007. Based on the results of this test, we determined that no impairment existed as of this date.

Exposures

An investment in our common shares involves various risks. When considering an investment in our Company, you should consider carefully all of the risk factors described in our most recent Annual Report on Form 10-K under the heading Item 1A. *Risk Factors* as well as the information below and other information included and incorporated by reference in this report.

U.S. Government Investigations

We participated in the United Nations oil-for-food program governing sales of goods and services into Iraq. The SEC has subpoenaed certain documents in connection with an investigation into our participation in the oil-for-food program. The U.S. Department of Justice is also conducting an investigation of our participation in the oil-for-food program. We are cooperating fully with these investigations. We have retained legal counsel, reporting to our audit committee, to investigate this matter. These investigations are ongoing, and we cannot anticipate the timing, outcome or possible impact of these investigations, financial or otherwise.

The U.S. Department of Commerce, Bureau of Industry & Security and the U.S. Department of Justice are investigating allegations of improper sales of products and services by us and our subsidiaries in sanctioned countries. We are cooperating fully with this investigation. We have retained legal counsel, reporting to our audit committee, to investigate this matter. This investigation is ongoing, and we cannot anticipate the timing, outcome or possible impact of the investigation, financial or otherwise.

In light of this investigation and of the current U.S. and foreign policy environment and the inherent uncertainties surrounding these countries, we decided in September 2007 to direct our foreign subsidiaries to discontinue doing business in countries that are subject to U.S. economic and trade sanctions, including Cuba, Iran, Sudan and Syria. Effective September 2007, we ceased entering into any new contracts relating to these countries. We have begun an orderly discontinuation and winding down of our existing business in these sanctioned countries.

The DOJ, the SEC and other agencies and authorities have a broad range of civil and criminal penalties they may seek to impose against corporations and individuals in appropriate circumstances including, but not limited to, injunctive relief, disgorgement, fines, penalties and modifications to business practices and compliance programs. In recent years, these agencies and authorities have entered into agreements with, and obtained a range of penalties against, several public corporations and individuals in similar investigations, under which civil and criminal penalties were imposed, including in some cases multi-

Table of Contents

million dollar fines and other penalties and sanctions. Under trading sanctions laws, the DOJ may also seek to impose modifications to business practices, including immediate cessation of all business activities in sanctioned countries, and modifications to compliance programs, which may increase compliance costs. In addition, our activities in sanctioned countries, such as Sudan and Iran, could result in certain investors, such as government sponsored pension funds, divesting or not investing in our common shares. Based on available information, we cannot predict what, if any, actions the DOJ, SEC or other authorities may take in our situation or the effect any such actions may have on our consolidated financial position or results of operations.

Currency Exposure

As of September 30, 2007, approximately 36.6% of our net assets were located outside the U.S. and are carried on our books in local currencies. Changes in those currencies in relation to the U.S. dollar result in translation adjustments, which are reflected as accumulated other comprehensive income in the shareholders' equity section of our Condensed Consolidated Balance Sheets. We recognize remeasurement and transactional gains and losses on currencies in our Condensed Consolidated Statements of Income, which may adversely impact our results of operations. We enter into foreign currency forward contracts and other derivative instruments in an effort to reduce our exposure to currency fluctuations; however, there can be no assurance that these hedging activities will be effective in reducing or eliminating foreign currency risks.

In certain foreign countries, a component of our cost structure is U.S. dollar denominated, whereas our revenues are partially local currency based. In those cases, a devaluation of the local currency would adversely impact our operating margins.

Acquisition Exposure

In August of 2005, we acquired Precision Energy Services and Precision Drilling International. In association with the acquisition, we identified pre-acquisition contingencies related to duties and taxes associated with the importation of certain equipment assets to foreign jurisdictions. We calculated a range of reasonable estimates of the costs associated with these duties. As no amount within the range appeared to be a better estimate than any other, we used the amount that is the low end of the range in accordance with Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, and its interpretations. At September 30, 2007, we have recorded a liability in the amount of approximately \$20 million for this matter. If we used the high end of the range, the aggregate potential liability would be approximately \$27 million higher. It is reasonably possible that the actual amount paid to settle these items could be materially different from our estimate and could have a material adverse effect on our consolidated financial statements.

Forward-Looking Statements

This report, as well as other filings made by us with the Securities and Exchange Commission (SEC), and our releases issued to the public contain various statements relating to future results, including certain projections and business trends. We believe these statements constitute Forward-Looking Statements as defined in the Private Securities Litigation Reform Act of 1995.

From time to time, we update the various factors we consider in making our forward-looking statements and the assumptions we use in those statements. However, we undertake no obligation to publicly update or revise any forward-looking events or circumstances that may arise after the date of this report. The following sets forth the various assumptions we use in our forward-looking statements, as well as risks and uncertainties relating to those statements. Certain of the risks and uncertainties may cause actual results to be materially different from projected results contained in forward-looking statements in this report and in our other disclosures. These risks and uncertainties include, but are not limited to, the following:

A downturn in market conditions could affect projected results. Any material changes in oil and natural gas supply and demand, oil and natural gas prices, rig count or other market trends would affect our results and would likely affect the forward-looking information we provide. The oil and natural gas industry is extremely volatile and subject to change based on political and economic factors outside our control. During 2004, 2005 and 2006, worldwide drilling activity increased; however, if an extended regional and/or worldwide recession were to occur, it would result in lower demand and lower prices for oil and natural gas, which would adversely affect drilling and production activity and therefore would affect our revenues and income. We have assumed

increases in worldwide demand will continue throughout 2007.

Availability of a skilled workforce could affect our projected results. Due to the high activity in the exploration and production and oilfield service industries there is an increasing shortage of available skilled

Table of Contents

labor. Our forward-looking statements assume we will be able to recruit and maintain a sufficient skilled workforce for activity levels.

Increases in the prices and availability of our raw materials could affect our results of operations. We use large amounts of raw materials for manufacturing our products. The price of these raw materials has a significant impact on our cost of producing products for sale or producing fixed assets used in our business. We have assumed that the prices of our raw materials will remain within a manageable range and will be readily available. If we are unable to attain necessary raw materials or if we are unable to minimize the impact of increased raw materials costs through our supply chain initiatives or by passing through these increases to our customers, our margins and results of operations could be adversely affected.

Our long-term growth depends upon technological innovation and commercialization. Our ability to deliver our long-term growth strategy depends in part on the commercialization of new technology. A central aspect of our growth strategy is to innovate our products and services, to obtain technologically advanced products through internal research and development and/or acquisitions, to protect proprietary technology from unauthorized use and to expand the markets for new technology through leverage of our worldwide infrastructure. The key to our success will be our ability to commercialize the technology that we have acquired and demonstrate the enhanced value our technology brings to our customers' operations. Our major technological advances include, but are not limited to, those related to controlled pressure drilling and testing systems, expandable solid tubulars, expandable sand screens and intelligent well completion. Our forward-looking statements have assumed successful commercialization of, and above-average growth from, these new products and services.

Nonrealization of expected benefits from our 2002 corporate reincorporation could affect our projected results. We are incorporated in Bermuda and we operate through our various subsidiaries in numerous countries throughout the world including the United States. Consequently, we are subject to changes in tax laws, treaties or regulations or the interpretation or enforcement thereof in the U.S., Bermuda or jurisdictions in which we or any of our subsidiaries operates or is resident. Our income tax expense is based upon our interpretation of the tax laws in effect in various countries at the time that the expense was incurred. If the U.S. Internal Revenue Service or other taxing authorities do not agree with our assessment of the effects of such laws, treaties and regulations, this could have a material adverse effect on us including the imposition of a higher effective tax rate on our worldwide earnings or a reclassification of the tax impact of our significant corporate restructuring transactions.

Nonrealization of expected benefits from our acquisitions could affect our projected results. We expect to gain certain business, financial and strategic advantages as a result of business acquisitions we undertake, including synergies and operating efficiencies. Our forward-looking statements assume that we will successfully integrate our business acquisitions and realize the benefits of that. An inability to realize expected strategic advantages as a result of the acquisition would negatively affect the anticipated benefits of the acquisition.

The cyclical nature of or a prolonged downturn in our industry could affect the carrying value of our goodwill. As of September 30, 2007, we had approximately \$3.3 billion of goodwill. Our estimates of the value of our goodwill could be reduced in the future as a result of various factors, some of which are beyond our control. Any reduction in the value of our goodwill may result in an impairment charge and therefore adversely affect our results.

Currency fluctuations could have a material adverse financial impact on our business. A material change in currency rates in our markets could affect our future results as well as affect the carrying values of our assets. World currencies have been subject to much volatility. Our forward-looking statements assume no material

impact from future changes in currency exchange rates.

Adverse weather conditions in certain regions could adversely affect our operations. In the summer of 2005, the Gulf of Mexico suffered several significant hurricanes. These hurricanes and associated hurricane threats reduced the number of days on which we and our customers could operate, which resulted in lower revenues than we otherwise would have achieved. In parts of 2006, and particularly in the second quarter of 2007, climatic conditions in Canada were not as favorable to drilling as we anticipated, which limited our results in that region. Similarly, unusually rough weather in the North Sea could reduce our operations and revenues from that area during the relevant period. Our forward-looking statements assume weather patterns in our primary areas of operations will not deviate significantly from historical patterns.

Political disturbances, war, or terrorist attacks and changes in global trade policies could adversely impact our operations. We have assumed there will be no material political disturbances or terrorist attacks

Table of Contents

and there will be no material changes in global trade policies. Any further military action undertaken by the U.S. or other countries could adversely affect our results of operations.

Finally, our future results will depend upon various other risks and uncertainties, including, but not limited to, those detailed in our other filings with the SEC. For additional information regarding risks and uncertainties, see our other filings with the SEC under the Securities Exchange Act of 1934, as amended, and the Securities Act of 1933, as amended, available free of charge at the SEC's website at www.sec.gov. We will generally update our assumptions in our filings as circumstances require.

Available Information

We make available, free of charge, on our website (www.weatherford.com) our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file or furnish them to the SEC.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We are currently exposed to market risk from changes in foreign currency and changes in interest rates. From time to time, we may enter into derivative financial instrument transactions to manage or reduce our market risk, but we do not enter into derivative transactions for speculative purposes. A discussion of our market risk exposure in financial instruments follows.

Foreign Currency Exposures

We operate in virtually every oil and natural gas exploration and production region in the world. In some parts of the world, such as the Middle East and Southeast Asia, the currency of our primary economic environment is the U.S. dollar. We use this as our functional currency. In other parts of the world, we conduct our business in currencies other than the U.S. dollar and the functional currency is the applicable local currency. In those countries in which we operate in the local currency, the effects of foreign currency fluctuations are largely mitigated because local expenses of such foreign operations are also generally denominated in the same currency.

Assets and liabilities of which the functional currency is the local currency are translated into U.S. dollars using the exchange rates in effect at the balance sheet date, resulting in translation adjustments that are reflected as Accumulated Other Comprehensive Income in the shareholders' equity section on our Condensed Consolidated Balance Sheets. At September 30, 2007, approximately 36.6% of our net assets are impacted by changes in foreign currencies in relation to the U.S. dollar. We recorded a \$255.7 million adjustment to increase our equity account for the nine months ended September 30, 2007 to reflect the net impact of the strengthening of various foreign currencies against the U.S. dollar.

As of September 30, 2007, we had entered into several foreign currency forward contracts and one option contract with notional amounts aggregating \$554.1 million to hedge exposure to currency fluctuations in various foreign currencies, including the Argentine peso, the Australian dollar, the Brazilian real, the British pound sterling, the Canadian dollar, the Colombian peso, the euro, the Hungarian forint, the Indonesian rupiah, the Kazakhstani tenge, the New Zealand dollar, the Norwegian krone, the Russian ruble, the Singapore dollar and the Thai baht. The total estimated change in fair value of these contracts compared to the original notional amount at September 30, 2007 resulted in an asset of \$1.5 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

In addition, after the closing of the acquisition of Precision Energy Services and Precision Drilling International, we entered into a series of cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar created as a result of the acquisition. At September 30, 2007, we had notional amounts outstanding of \$364.3 million. The estimated change in fair value of these contracts at September 30, 2007 compared to the original notional amount resulted in a liability of \$78.3 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

Interest Rates

We are subject to interest rate risk on our fixed-interest and variable-interest rate borrowings. Variable rate debt, where the interest rate fluctuates periodically, exposes us to short-term changes in market interest rates. Fixed

Table of Contents

rate debt, where the interest rate is fixed over the life of the instrument, exposes us to changes in market interest rates reflected in the fair value of the debt and to the risk that we may need to refinance maturing debt with new debt at a higher rate. All other things being equal, the fair value of our fixed rate debt will increase or decrease as interest rates change.

Our long-term borrowings that were outstanding at September 30, 2007 subject to interest rate risk consist of the following:

	September 30, 2007		December 31, 2006	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	<i>(In millions)</i>			
6 5/8% Senior Notes	\$355.9	\$365.2	\$356.9	\$368.8
5.95% Senior Notes	598.9	604.7		
4.95% Senior Notes	254.9	238.1	255.4	245.2
5.50% Senior Notes	348.7	336.1	348.6	339.9
6.35% Senior Notes	599.5	602.2		
6.50% Senior Notes	595.8	586.1	595.7	619.5
6.80% Senior Notes	298.1	305.7		

We have various other long-term debt instruments of \$23.1 million, but believe the impact of changes in interest rates in the near term will not be material to these instruments. Short-term borrowings of \$431.1 million at September 30, 2007 approximate fair value.

As it relates to our variable rate debt, if market interest rates average 1% more for the remainder of 2007 than the rates as of September 30, 2007, interest expense for the remainder of 2007 would increase by approximately \$1.1 million. This amount was determined by calculating the effect of the hypothetical interest rate on our variable rate debt. This sensitivity analysis assumes there are no changes in our financial structure.

Interest Rate Swaps and Derivatives

We manage our debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps as a tool to achieve that goal. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions. The counterparties to our interest rate swaps are creditworthy multinational commercial banks. We believe that the risk of counterparty nonperformance is immaterial.

We may use interest rate swaps to take advantage of available short-term interest rates. Amounts received or paid upon termination of the swaps represent the fair value of the swaps at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction to interest expense over the remaining term of the debt. There were no interest rate swaps outstanding at September 30, 2007.

We may utilize interest rate derivatives to hedge projected exposures to interest rates in anticipation of future debt issuances. Amounts received or paid upon termination of these hedges represent the fair value of the agreements at the time of termination. These amounts are amortized as an adjustment to interest expense over the remaining life of the debt. There were no interest rate derivative agreements outstanding at September 30, 2007.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this Quarterly Report on Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of the Company s disclosure controls and procedures (as defined in Rules 13a-15 (e) and 15d-15 (e) under the Exchange Act). Based upon that evaluation, the Company s CEO and CFO have concluded the Company s disclosure controls and procedures are effective as of the end of the period covered by this report to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms and that information relating to the Company (including its consolidated subsidiaries) required to be disclosed is accumulated and communicated to management, including the CEO and CFO, to allow timely decisions regarding required disclosure. The Company s management, including the CEO and CFO, identified no change in the Company s internal control over financial reporting that occurred during the Company s fiscal quarter ended September 30, 2007, that has materially affected, or is reasonably likely to materially affect, the Company s internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business, we become the subject of various claims and litigation. We maintain insurance to cover many of our potential losses, and we are subject to various self-retention limits and deductibles with respect to our insurance.

See Item 1. Business Other Business Data Federal Regulation and Environmental Matters beginning on page 16 of our Annual Report on Form 10-K for the year ended December 31, 2006, which is incorporated by reference into this item.

See Item 2. Management s Discussion And Analysis Of Financial Condition And Results Of Operations U.S. Government Investigations beginning on page 33 of this report, which is incorporated by reference into this item.

Although we are subject to various ongoing items of litigation, we do not believe any of the items of litigation to which we are currently subject will result in any material uninsured losses to us. It is possible, however, an unexpected judgment could be rendered against us in the cases in which we are involved that could be uninsured and beyond the amounts we currently have reserved.

ITEM 1A. RISK FACTORS

Except as described below, there have been no material changes during the quarter ended September 30, 2007 to the risk factors set forth in Part I, Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2006 filed with the SEC on February 23, 2007 (Annual Report).

We have updated the percentage of our net assets located outside the U.S. and carried on our books in local currencies on page 34 of this report from 38.9% as of December 31, 2006 to 36.6% as of September 30, 2007.

We have replaced the risk factor titled Trading Sanctions Exposure with the following risk factor titled U.S. Government Investigations :

We participated in the United Nations oil-for-food program governing sales of goods and services into Iraq. The SEC has subpoenaed certain documents in connection with an investigation into our participation in the oil-for-food program. The U.S. Department of Justice is also conducting an investigation of our participation in the oil-for-food program. We are cooperating fully with these investigations. We have retained legal counsel, reporting to our audit committee, to investigate this matter. These investigations are ongoing, and we cannot anticipate the timing, outcome or possible impact of these investigations, financial or otherwise.

The U.S. Department of Commerce, Bureau of Industry & Security and the U.S. Department of Justice are investigating allegations of improper sales of products and services by us and our subsidiaries in sanctioned countries. We are cooperating fully with this investigation. We have retained legal counsel, reporting to our audit committee, to investigate this matter. This investigation is ongoing, and we cannot anticipate the timing, outcome or possible impact of the investigation, financial or otherwise.

In light of this investigation and of the current U.S. and foreign policy environment and the inherent uncertainties surrounding these countries, we decided in September 2007 to direct our foreign subsidiaries to discontinue doing business in countries that are subject to U.S. economic and trade sanctions, including Cuba, Iran, Sudan and Syria. Effective September 2007, we ceased entering into any new contracts relating to these countries. We have begun an orderly discontinuation and winding down of our existing business in these sanctioned countries.

The DOJ, the SEC and other agencies and authorities have a broad range of civil and criminal penalties they may seek to impose against corporations and individuals in appropriate circumstances including, but not limited to, injunctive relief, disgorgement, fines, penalties and modifications to business practices and compliance programs. In recent years, these agencies and authorities have entered into agreements with, and obtained a range of penalties against, several public corporations and individuals

Table of Contents

in similar investigations, under which civil and criminal penalties were imposed, including in some cases multi-million dollar fines and other penalties and sanctions. Under trading sanctions laws, the DOJ may also seek to impose modifications to business practices, including immediate cessation of all business activities in sanctioned countries, and modifications to compliance programs, which may increase compliance costs. In addition, our activities in sanctioned countries, such as Sudan and Iran, could result in certain investors, such as government sponsored pension funds, divesting or not investing in our common shares. Based on available information, we cannot predict what, if any, actions the DOJ, SEC or other authorities may take in our situation or the effect any such actions may have on our consolidated financial position or results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY IN SECURITIES AND USE OF PROCEEDS

In December 2005, our Board of Directors approved a share repurchase program under which up to \$1 billion of our outstanding common shares could be purchased. Future purchases of our shares can be made in the open market or privately negotiated transactions, at the discretion of management and as market conditions warrant. There were no share repurchases during the quarter ended September 30, 2007. At September 30, 2007, we have \$272.2 million remaining availability under the Plan.

In addition, under our restricted share plan, employees may elect to have us withhold common shares to satisfy minimum statutory federal, state and local tax withholding obligations arising on the vesting of restricted stock awards and exercise of options. When we withhold these shares, we are required to remit to the appropriate taxing authorities the market price of the shares withheld, which could be deemed a purchase of the common shares by us on the date of withholding. During the quarter ended September 30, 2007, we withheld common shares to satisfy these tax withholding obligations as follows:

	Period	No. of Shares	Average Price
July 1	July 31, 2007	45,049	\$ 56.51
August 1	August 31, 2007		
September 1	September 30, 2007	32,120	61.95
