ITEM 2.02. RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

Upon the filing of this current report on Form 8-K, the Company will post on its website "Supplemental Segment Information", attached hereto as Exhibit 99.1.

This information represents reclassification of the 2004 segment information in order to conform to the Company's 2005 segment presentation. Effective January 1, 2005, the Company began accounting for all sourcing between its segments as affiliate sales and directed the segment selling to external customers to recognize total operating margin as opposed to prior years when the segment only recognized margin applicable to the selling effort. The Company made this change as a result of increased affiliate transactions, largely resulting from the merger. The Company believes this change provides useful information regarding the performance of each segment and is consistent with how the company assesses internally the performance of the segments. The information reported under this new method is provided to the chief executive officer and chief financial officer for purposes of making decisions about allocating resources to the segments and assessing their performance.
