PART I

ITEM 1. BUSINESS

CNA Financial Corporation (CNAF) was incorporated in 1967 and is an insurance holding company. Collectively, CNAF and its subsidiaries are referred to as CNA or the Company. References to CNA, the Company, we, our, like terms refer to the business of CNA and its subsidiaries. Our property and casualty insurance operations are conducted by Continental Casualty Company (CCC), incorporated in 1897, and its affiliates, and The Continental Insurance Company (CIC), organized in 1853, and its affiliates. CIC became a subsidiary of ours in 1995 as a result of the acquisition of The Continental Corporation (Continental). Loews Corporation (Loews) owned approximately 89% of our outstanding common stock as of December 31, 2006.

We serve a wide variety of customers, including small, medium and large businesses, associations, professionals, and groups and individuals with a broad range of insurance and risk management products and services.

Our insurance products primarily include property and casualty coverages. Our services include risk management, information services, warranty and claims administration. Our products and services are marketed through independent agents, brokers, managing general agents and direct sales.

Our core business, property and casualty insurance operations, is reported in two business segments: Standard Lines and Specialty Lines. Our non-core operations are managed in two segments: Life and Group Non-Core and Corporate and Other Non-Core. These segments are managed separately because of differences in their product lines and markets. Discussions of each segment including the products offered, the customers served, the distribution channels used and competition are set forth in the Management's Discussion and Analysis (MD&A) included under Item 7 and in Note N of the Consolidated Financial Statements included under Item 8.

Competition

The property and casualty insurance industry is highly competitive both as to rate and service. Our consolidated property and casualty subsidiaries compete not only with other stock insurance companies, but also with mutual insurance companies, reinsurance companies and other entities for both producers and customers. We must continuously allocate resources to refine and improve our insurance products and services.

Rates among insurers vary according to the types of insurers and methods of operation. We compete for business not only on the basis of rate, but also on the basis of availability of coverage desired by customers, ratings and quality of service, including claim adjustment services.

There are approximately 2,400 individual companies that sell property and casualty insurance in the United States. Our consolidated property and casualty subsidiaries ranked as the 13th largest property and casualty insurance organization and we are the seventh largest commercial insurance writer in the United States based upon 2005 statutory net written premiums.

Regulation

The insurance industry is subject to comprehensive and detailed regulation and supervision throughout the United States. Each state has established supervisory agencies with broad administrative powers relative to licensing insurers and agents, approving policy forms, establishing reserve requirements, fixing minimum interest rates for accumulation of surrender values and maximum interest rates of policy loans, prescribing the form and content of statutory financial reports and regulating solvency and the type and amount of investments permitted. Such regulatory powers also extend to premium rate regulations, which require that rates not be excessive, inadequate or unfairly discriminatory. In addition to regulation of dividends by insurance subsidiaries, intercompany transfers of assets may be subject to prior notice or approval by the state insurance regulators, depending on the size of such transfers and payments in relation to the financial position of the insurance affiliates making the transfer or payment.

Insurers are also required by the states to provide coverage to insureds who would not otherwise be considered eligible by the insurers. Each state dictates the types of insurance and the level of coverage that must be provided to such involuntary risks. Our share of these involuntary risks is mandatory and generally a function of our respective share of the voluntary market by line of insurance in each state.

Table of Contents

Further, insurance companies are subject to state guaranty fund and other insurance-related assessments. Guaranty fund and other insurance-related assessments are levied by the state departments of insurance to cover claims of insolvent insurers.

Reform of the U.S. tort liability system is another issue facing the insurance industry. Over the last decade, many states have passed some type of reform. In recent years, for example, significant state general tort reforms have been enacted in Georgia, Ohio, Mississippi and South Carolina. Specific state legislation addressing state asbestos reform has been passed in Ohio, Georgia, Florida and Texas. A few more states will be considering such legislation in the coming year. Although these states' legislatures have begun to address their litigious environments, some reforms are being challenged in the courts and it will take some time before they are finalized. Even though there has been some tort reform success, new causes of action and theories of damages continue to be proposed in state court actions or by legislatures. As a result of this unpredictability in the law, insurance underwriting and rating is expected to continue to be difficult in commercial lines, professional liability and some specialty coverages.

Although the federal government and its regulatory agencies do not directly regulate the business of insurance, federal legislative and regulatory initiatives can impact the insurance industry in a variety of ways. These initiatives and legislation include tort reform proposals; proposals addressing natural catastrophe exposures; terrorism risk mechanisms; and various tax proposals affecting insurance companies. In 1999, Congress passed the Financial Services Modernization or Gramm-Leach-Bliley Act (GLB Act), which repealed portions of the Glass-Steagall Act and enabled closer relationships between banks and insurers. Although functional regulation was preserved by the GLB Act for state oversight of insurance, additional financial services modernization legislation could include provisions for an alternate federal system of regulation for insurance companies.

In addition, our domestic insurance subsidiaries are subject to risk-based capital requirements. Risk-based capital is a method developed by the National Association of Insurance Commissioners (NAIC) to determine the minimum amount of statutory capital appropriate for an insurance company to support its overall business operations in consideration of its size and risk profile. The formula for determining the amount of risk-based capital specifies various factors, weighted based on the perceived degree of risk, which are applied to certain financial balances and financial activity. The adequacy of a company's actual capital is evaluated by a comparison to the risk-based capital results, as determined by the formula. Companies below minimum risk-based capital requirements are classified within certain levels, each of which requires specified corrective action. As of December 31, 2006 and 2005, all of our domestic insurance subsidiaries exceeded the minimum risk-based capital requirements.

Subsidiaries with insurance operations outside the United States are also subject to regulation in the countries in which they operate. We have operations in the United Kingdom, Canada and other countries.

Employee Relations

As of December 31, 2006, we had approximately 9,800 employees and have experienced satisfactory labor relations. We have never had work stoppages due to labor disputes.

We have comprehensive benefit plans for substantially all of our employees, including retirement plans, savings plans, disability programs, group life programs and group healthcare programs. See Note J of the Consolidated Financial Statements included under Item 8 for further discussion of our benefit plans.

Table of Contents**Supplementary Insurance Data**

The following table sets forth supplementary insurance data:

Supplementary Insurance Data**Years ended December 31**

(In millions, except ratio information)

to the treatment
of active life
reserves
(ALR) related to
long term care
insurance
products written
in property and
casualty
insurance
subsidiaries. For
GAAP, ALR is
classified as
claim and claim
adjustment

expense reserves whereas for SAP, ALR is classified as unearned premium reserves. The expense ratio, using amounts determined in accordance with GAAP, is the percentage of underwriting and acquisition expenses (including the amortization of deferred acquisition expenses) to net earned premiums. The expense ratio, using amounts determined in accordance with SAP, is the percentage of acquisition and underwriting expenses (with no deferral of acquisition expenses) to net written premiums. The dividend ratio, using amounts determined in accordance with GAAP, is the ratio of dividends incurred to net earned premiums. The dividend ratio, using amounts determined in

accordance with SAP, is the ratio of dividends paid to net earned premiums. The combined ratio is the sum of the loss and loss adjustment expense, expense and dividend ratios.

- (b) Other data is determined in accordance with SAP. Life and group statutory capital and surplus as a percent of total liabilities is determined after excluding separate account liabilities and reclassifying the statutorily required Asset Valuation Reserve to surplus.
- (c) Surplus includes the property and casualty companies equity ownership of the life company's capital and surplus.

Table of Contents

The following table displays the distribution of gross written premiums for our operations by geographic concentration.

Gross Written Premiums

Years ended December 31	Percent of Total		
	2006	2005	2004
California	9.6%	9.0%	9.3%
Florida	7.9	7.1	7.1
New York	7.3	7.9	7.9
Texas	5.9	5.7	5.4
New Jersey	4.4	3.8	5.3
Illinois	4.1	4.2	5.1
Pennsylvania	3.4	4.2	4.7
United Kingdom	3.2	2.8	2.3
Missouri	3.0	2.8	1.4
Massachusetts	2.4	3.3	3.2
All other states, countries or political subdivisions (a)	48.8	49.2	48.3
 Total	 100.0%	 100.0%	 100.0%

(a) No other individual state, country or political subdivision accounts for more than 3.0% of gross written premiums.

Approximately 7.1%, 6.1% and 5.0% of our gross written premiums were derived from outside of the United States for the years ended December 31, 2006, 2005 and 2004. Premiums from any individual foreign country excluding the United Kingdom were not significant.

Property and Casualty Claim and Claim Adjustment Expenses

The following loss reserve development table illustrates the change over time of reserves established for property and casualty claim and claim adjustment expenses at the end of the preceding ten calendar years for our property and casualty insurance operations. The table excludes our life subsidiary(ies), and as such, the carried reserves will not agree to the Consolidated Financial Statements included under Item 8. The first section shows the reserves as originally reported at the end of the stated year. The second section, reading down, shows the cumulative amounts paid as of the end of successive years with respect to the originally reported reserve liability. The third section, reading down, shows re-estimates of the originally recorded reserves as of the end of each successive year, which is the result of our property and casualty insurance subsidiaries' expanded awareness of additional facts and circumstances that pertain to the unsettled claims. The last section compares the latest re-estimated reserves to the reserves originally established, and indicates whether the original reserves were adequate or inadequate to cover the estimated costs of unsettled claims.

The loss reserve development table for property and casualty companies is cumulative and, therefore, ending balances should not be added since the amount at the end of each calendar year includes activity for both the current and prior years. Additionally, the development amounts in the table below are the amounts prior to consideration of any related

reinsurance bad debt allowance impacts.

Table of Contents

- (a) Ceded recoverable includes reserves transferred under retroactive reinsurance agreements of \$784 million as of December 31, 1999.

- (b) Effective January 1, 2001, we established a new life insurance company, CNA Group Life Assurance Company (CNAGLA). Further, on January 1, 2001 approximately \$1,055 million of reserves were transferred from CCC to CNAGLA.

- (c) Effective October 31, 2002, we sold CNA Reinsurance Company Limited (CNA Re U.K.). As a result of the sale, net reserves were reduced by approximately \$1,316 million.

Additional information regarding our property and casualty claim and claim adjustment expense reserves and reserve development is set forth in the MD&A included under Item 7 and in Notes A and F of the Consolidated Financial

Statements included under Item 8.

Investments

Information on our investments is set forth in the MD&A included under Item 7 and in Notes A, B, C and D of the Consolidated Financial Statements included under Item 8.

Available Information

We file annual, quarterly and current reports, proxy statements and other documents with the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934 (Exchange Act). The public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers, including CNA, that file electronically with the SEC. The public can obtain any documents that we file with the SEC at <http://www.sec.gov>.

We also make available free of charge on or through our internet website (<http://www.cna.com>) our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Copies of these reports may also be obtained, free of charge, upon written request to: CNA Financial Corporation, 333 S. Wabash Avenue, Chicago, IL 60604, Attn. Jonathan D. Kantor, Executive Vice President, General Counsel and Secretary.

ITEM 1A. RISK FACTORS

Our business faces many risks. We have described below some of the more significant risks which we face. There may be additional risks that we do not yet know of or that we do not currently perceive to be significant that may also impact our business. Each of the risks and uncertainties described below could lead to events or circumstances that have a material adverse effect on our business, results of operations, financial condition or equity. You should carefully consider and evaluate all of the information included in this Report and any subsequent reports we may file with the Securities and Exchange Commission or make available to the public before investing in any securities we issue.

If we determine that loss reserves are insufficient to cover our estimated ultimate unpaid liability for claims, we may need to increase our loss reserves.

We maintain loss reserves to cover our estimated ultimate unpaid liability for claims and claim adjustment expenses for reported and unreported claims and for future policy benefits. Reserves represent our best estimate at a given point in time. Insurance reserves are not an exact calculation of liability but instead are complex estimates derived by us, generally utilizing a variety of reserve estimation techniques from numerous assumptions and expectations about future events, many of which are highly uncertain, such as estimates of claims severity, frequency of claims, mortality, morbidity, expected interest rates, inflation, claims handling, case reserving policies and procedures, underwriting and pricing policies, changes in the legal and regulatory environment and the lag time between the occurrence of an insured event and the time of its ultimate settlement. Many of these uncertainties are not precisely quantifiable and require significant judgment on our part. As trends in underlying claims develop, particularly in so-called "long tail" or long duration coverages, we are sometimes required to add to our reserves. This is called unfavorable development and results in a charge to our earnings in the amount of the added reserves, recorded in the

Table of Contents

period the change in estimate is made. These charges can be substantial and can have a material adverse effect on our results of operations and equity. Additional information on our reserves is included in Management's Discussion and Analysis (MD&A) under Item 7 and Note F to the Consolidated Financial Statements included under Item 8.

We are subject to the uncertain effects of emerging or potential claims and coverages issues that arise as industry practices and legal, judicial, social and other environmental conditions change. These issues have had, and may continue to have, a negative effect on our business by either extending coverage beyond the original underwriting intent or by increasing the number or size of claims, resulting in further increases in our reserves which can have a material adverse effect on our results of operations and equity. The effects of these and other unforeseen emerging claim and coverage issues are extremely hard to predict. Examples of emerging or potential claims and coverage issues include:

- increases in the number and size of claims relating to injuries from medical products;

- the effects of accounting and financial reporting scandals and other major corporate governance failures, which have resulted in an increase in the number and size of claims, including director and officer and errors and omissions insurance claims;

- class action litigation relating to claims handling and other practices;

- construction defect claims, including claims for a broad range of additional insured endorsements on policies;

- clergy abuse claims, including passage of legislation to reopen or extend various statutes of limitations; and

- mass tort claims, including bodily injury claims related to silica, welding rods, benzene, lead and various other chemical exposure claims.

In light of the many uncertainties associated with establishing the estimates and making the assumptions necessary to establish reserve levels, we review and change our reserve estimates in a regular and ongoing process as experience develops and further claims are reported and settled. In addition, we periodically undergo state regulatory financial examinations, including review and analysis of our reserves. If estimated reserves are insufficient for any reason, the required increase in reserves would be recorded as a charge against our earnings for the period in which reserves are determined to be insufficient. These charges can be substantial and can materially adversely affect our results of operations and equity.

Loss reserves for asbestos, environmental pollution and mass torts are especially difficult to estimate and may result in more frequent and larger additions to these reserves.

Our experience has been that establishing reserves for casualty coverages relating to asbestos, environmental pollution and mass tort (which we refer to as APMT) claim and claim adjustment expenses is subject to uncertainties that are greater than those presented by other claims. Estimating the ultimate cost of both reported and unreported asbestos, environmental pollution and mass tort claims is subject to a higher degree of variability due to a number of additional factors including, among others, the following:

- coverage issues including whether certain costs are covered under the policies and whether policy limits apply;

- inconsistent court decisions and developing legal theories;

- increasingly aggressive tactics of plaintiffs' lawyers;

- the risks and lack of predictability inherent in major litigation;

- changes in the volume of asbestos, environmental pollution and mass tort claims which cannot now be anticipated;

- continued increases in mass tort claims relating to silica and silica-containing products;

the impact of the exhaustion of primary limits and the resulting increase in claims on any umbrella or excess policies we have issued;

the number and outcome of direct actions against us;

9

Table of Contents

our ability to recover reinsurance for these claims; and

changes in the legal and legislative environment in which we operate.

As a result of this higher degree of variability, we have necessarily supplemented traditional actuarial methods and techniques with additional estimating techniques and methodologies, many of which involve significant judgment on our part. Consequently, we may periodically need to record changes in our claim and claim adjustment expense reserves in the future in these areas in amounts that may be material. Additional information on APMT is included in MD&A under Item 7 and Note F to the Consolidated Financial Statements included under Item 8.

Environmental pollution claims. The estimation of reserves for environmental pollution claims is complicated by the assertion by many policyholders of claims for defense costs and indemnification. We and others in the insurance industry are disputing coverage for many such claims. Key coverage issues in these claims include the following:

whether cleanup costs are considered damages under the policies (and accordingly whether we would be liable for these costs);

the trigger of coverage and the allocation of liability among triggered policies;

the applicability of pollution exclusions and owned property exclusions;

the potential for joint and several liability; and

the definition of an occurrence.

To date, courts have been inconsistent in their rulings on these issues, thus adding to the uncertainty of the outcome of many of these claims.

Further, the scope of federal and state statutes and regulations determining liability and insurance coverage for environmental pollution liabilities have been the subject of extensive litigation. In many cases, courts have expanded the scope of coverage and liability for cleanup costs beyond the original intent of our insurance policies. Additionally, the standards for cleanup in environmental pollution matters are unclear, the number of sites potentially subject to cleanup under applicable laws is unknown, and the impact of various proposals to reform existing statutes and regulations is difficult to predict.

Asbestos claims. The estimation of reserves for asbestos claims is particularly difficult for many of the same reasons discussed above for environmental pollution claims, as well as the following:

inconsistency of court decisions and jury attitudes, as well as future court decisions;

specific policy provisions;

allocation of liability among insurers and insureds;

missing policies and proof of coverage;

the proliferation of bankruptcy proceedings and attendant uncertainties;

novel theories asserted by policyholders and their legal counsel;

the targeting of a broader range of businesses and entities as defendants;

uncertainties in predicting the number of future claims and which other insureds may be targeted in the future;

volatility in claim numbers and settlement demands;

increases in the number of non-impaired claimants and the extent to which they can be precluded from making claims;

the efforts by insureds to obtain coverage that is not subject to aggregate limits;

the long latency period between asbestos exposure and disease manifestation, as well as the resulting potential for involvement of multiple policy periods for individual claims;

medical inflation trends;

Table of Contents

the mix of asbestos-related diseases presented; and

the ability to recover reinsurance.

In addition, a number of our insureds have asserted that their claims for insurance are not subject to aggregate limits on coverage. If these insureds are successful in this regard, our potential liability for their claims would be unlimited. Some of these insureds contend that their asbestos claims fall within the so-called non-products liability coverage within their policies, rather than the products liability coverage, and that this non-products liability coverage is not subject to any aggregate limit. It is difficult to predict the extent to which these claims will succeed and, as a result, the ultimate size of these claims.

Catastrophe losses are unpredictable.

Catastrophe losses are an inevitable part of our business. Various events can cause catastrophe losses, including hurricanes, windstorms, earthquakes, hail, explosions, severe winter weather, and fires, and their frequency and severity are inherently unpredictable. In addition, longer-term natural catastrophe trends may be changing and new types of catastrophe losses may be developing due to climate change, a phenomenon that has been associated with extreme weather events linked to rising temperatures, and includes effects on global weather patterns, greenhouse gases, sea, land and air temperatures, sea levels, rain, and snow. For example, in 2005, we experienced substantial losses from Hurricanes Katrina, Rita and Wilma and in 2004, we experienced substantial losses from Hurricanes Charley, Frances, Ivan and Jeanne. The extent of our losses from catastrophes is a function of both the total amount of our insured exposures in the affected areas and the severity of the events themselves. In addition, as in the case of catastrophe losses generally, it can take a long time for the ultimate cost to us to be finally determined. As our claim experience develops on a particular catastrophe, we may be required to adjust our reserves, or take additional unfavorable development, to reflect our revised estimates of the total cost of claims. We believe we could incur significant catastrophe losses in the future. Additional information on catastrophe losses is included in the MD&A under Item 7 and Note F to the Consolidated Financial Statements included under Item 8.

Our key assumptions used to determine reserves and deferred acquisition costs for our long term care product offerings could vary significantly.

Our reserves and deferred acquisition costs for our long term care product offerings are based on certain key assumptions including morbidity, which is the frequency and severity of illness, sickness and diseases contracted, policy persistency, which is the percentage of policies remaining in force, interest rates and/or future health care cost trends. If actual experience differs from these assumptions, the deferred acquisition costs may not be fully recovered and the reserves may not be adequate, requiring us to add to reserves, or take unfavorable development. Therefore, our financial results could be adversely impacted.

We continue to face exposure to losses arising from terrorist acts, despite the passage of the Terrorism Risk Insurance Extension Act of 2005.

We may bear substantial losses from future acts of terrorism. The Terrorism Risk Insurance Extension Act of 2005 (TRIEA) extended, until December 31, 2007, the program established by the Terrorism Risk Insurance Act of 2002. Under this program, insurers are required to offer terrorism insurance and the federal government will share the risk of loss by commercial property and casualty insurers arising from future terrorist attacks. TRIEA does not provide complete protection for future losses derived from acts of terrorism. Additional information on TRIEA is included in the MD&A under Item 7.

High levels of retained overhead expenses associated with business lines in run-off negatively impact our operating results.

During the past few years, we ceased offering certain insurance products relating principally to our life, group and reinsurance segments. Many of these business lines were sold, others have been placed in run-off and, as a result, revenue will progressively decrease. Our results of operations have been materially, adversely affected by the high levels of retained overhead expenses associated with these run-off operations, and will continue to be so affected if we are not successful in eliminating or reducing these costs.

Our premium writings and profitability are affected by the availability and cost of reinsurance.

We purchase reinsurance to help manage our exposure to risk. Under our reinsurance arrangements, another insurer assumes a specified portion of our claim and claim adjustment expenses in exchange for a specified portion of policy premiums. Market conditions determine the availability and cost of the reinsurance protection we purchase,

Table of Contents

which affects the level of our business and profitability, as well as the level and types of risk we retain. If we are unable to obtain sufficient reinsurance at a cost we deem acceptable, we may be unwilling to bear the increased risk and would reduce the level of our underwriting commitments. Additional information on Reinsurance is included in the MD&A under Item 7 and Note H to the Consolidated Financial Statements included under Item 8.

We may not be able to collect amounts owed to us by reinsurers.

We have significant amounts recoverable from reinsurers which are reported as receivables in our balance sheets and are estimated in a manner consistent with claim and claim adjustment expense reserves or future policy benefits reserves. The ceding of insurance does not, however, discharge our primary liability for claims. As a result, we are subject to credit risk relating to our ability to recover amounts due from reinsurers. Certain of our reinsurance carriers have experienced deteriorating financial conditions or have been downgraded by rating agencies. In addition, reinsurers could dispute amounts which we believe are due to us. If we are not able to collect the amounts due to us from reinsurers, our claims expenses will be higher which could materially adversely affect our results of operations or equity. Additional information on reinsurance is included in the MD&A under Item 7 and Note H to the Consolidated Financial Statements included under Item 8.

Rating agencies may downgrade their ratings of us and thereby adversely affect our ability to write insurance at competitive rates or at all.

Ratings are an increasingly important factor in establishing the competitive position of insurance companies. Our insurance company subsidiaries, as well as our public debt, are rated by four major rating agencies, namely, A.M. Best Company, Inc., Standard & Poor's Rating Services, Moody's Investors Service, Inc. and Fitch, Inc. Ratings reflect the rating agency's opinions of an insurance company's financial strength, capital adequacy, operating performance, strategic position and ability to meet its obligations to policyholders and debtholders. Agency ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization. Each agency's rating should be evaluated independently of any other agency's rating.

Due to the intense competitive environment in which we operate, the uncertainty in determining reserves and the potential for us to take material unfavorable development in the future, and possible changes in the methodology or criteria applied by the rating agencies, the rating agencies may take action to lower our ratings in the future. If our property and casualty insurance financial strength ratings are downgraded below current levels, our business and results of operations could be materially adversely affected. The severity of the impact on our business is dependent on the level of downgrade and, for certain products, which rating agency takes the rating action. Among the adverse effects in the event of such downgrades would be the inability to obtain a material volume of business from certain major insurance brokers, the inability to sell a material volume of our insurance products to certain markets, and the required collateralization of certain future payment obligations or reserves.

In addition, we believe that a lowering of the debt ratings of Loews Corporation by certain of the rating agencies could result in an adverse impact on our ratings, independent of any change in our circumstances. We have entered into several settlement agreements and assumed reinsurance contracts that require collateralization of future payment obligations and assumed reserves if our ratings or other specific criteria fall below certain thresholds. The ratings triggers are generally more than one level below our current ratings. Additional information on our ratings is included in the MD&A under Item 7.

We are subject to extensive federal, state and local governmental regulations that restrict our ability to do business and generate revenues.

The insurance industry is subject to comprehensive and detailed regulation and supervision throughout the United States. Most insurance regulations are designed to protect the interests of our policyholders rather than our investors. Each state in which we do business has established supervisory agencies that regulate the manner in which we do business. Their regulations relate to, among other things, the following:

- standards of solvency including risk-based capital measurements;

- restrictions on the nature, quality and concentration of investments;

- restrictions on our ability to withdraw from unprofitable lines of insurance;

the required use of certain methods of accounting and reporting;

12

Table of Contents

the establishment of reserves for unearned premiums, losses and other purposes;

potential assessments for funds necessary to settle covered claims against impaired, insolvent or failed insurance companies;

licensing of insurers and agents;

approval of policy forms; and

limitations on the ability of our insurance subsidiaries to pay dividends to us.

Regulatory powers also extend to premium rate regulations which require that rates not be excessive, inadequate or unfairly discriminatory. The states in which we do business also require us to provide coverage to persons whom we would not otherwise consider eligible. Each state dictates the types of insurance and the level of coverage that must be provided to such involuntary risks. Our share of these involuntary risks is mandatory and generally a function of our respective share of the voluntary market by line of insurance in each state.

We are subject to capital adequacy requirements and, if we do not meet these requirements, regulatory agencies may restrict or prohibit us from operating our business.

Insurance companies such as us are subject to risk-based capital standards set by state regulators to help identify companies that merit further regulatory attention. These standards apply specified risk factors to various asset, premium and reserve components of our statutory capital and surplus reported in our statutory basis of accounting financial statements. Current rules require companies to maintain statutory capital and surplus at a specified minimum level determined using the risk-based capital formula. If we do not meet these minimum requirements, state regulators may restrict or prohibit us from operating our business. If we are required to record a charge against earnings in connection with a change in estimates or circumstances, we may violate these minimum capital adequacy requirements unless we are able to raise sufficient additional capital. Examples of events leading us to record a charge against earnings include impairment of our investments or unexpectedly poor claims experience.

Our insurance subsidiaries, upon whom we depend for dividends in order to fund our working capital needs, are limited by state regulators in their ability to pay dividends.

We are a holding company and are dependent upon dividends, loans and other sources of cash from our subsidiaries in order to meet our obligations. Dividend payments, however, must be approved by the subsidiaries' domiciliary state departments of insurance and are generally limited to amounts determined by formula which varies by state. The formula for the majority of the states is the greater of 10% of the prior year statutory surplus or the prior year statutory net income, less the aggregate of all dividends paid during the twelve months prior to the date of payment. Some states, however, have an additional stipulation that dividends cannot exceed the prior year's earned surplus. If we are restricted, by regulatory rule or otherwise, from paying or receiving inter-company dividends, we may not be able to fund our working capital needs and debt service requirements from available cash. As a result, we would need to look to other sources of capital which may be more expensive or may not be available at all.

We are responding to subpoenas, interrogatories and inquiries relating to insurance brokers and agents, contingent commissions and bidding practices, and certain finite-risk insurance products.

Along with other companies in the industry, we have received subpoenas, interrogatories and inquiries from: (i) California, Connecticut, Delaware, Florida, Hawaii, Illinois, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, West Virginia and the Canadian Council of Insurance Regulators concerning investigations into practices including contingent compensation arrangements, fictitious quotes, and tying arrangements; (ii) the Securities and Exchange Commission (SEC), the New York State Attorney General, the United States Attorney for the Southern District of New York, the Connecticut Attorney General, the Connecticut Department of Insurance, the Delaware Department of Insurance, the Georgia Office of Insurance and Safety Fire Commissioner and the California Department of Insurance concerning reinsurance products and finite insurance products purchased and sold by us; (iii) the Massachusetts Attorney General and the Connecticut Attorney General concerning investigations into anti-competitive practices; and (iv) the New York State Attorney General concerning declinations

of attorney malpractice insurance. We continue to respond to these subpoenas, interrogatories and inquiries to the extent they are still open.

Subsequent to receipt of the SEC subpoena, we produced documents and provided additional information at the SEC's request. In addition, the SEC and representatives of the United States Attorney's Office for the Southern District of New York conducted interviews with several of our current and former executives relating to the

Table of Contents

restatement of our financial results for 2004, including our relationship with and accounting for transactions with an affiliate that were the basis for the restatement. The SEC also requested information relating to our restatement in 2006 of prior period results. It is possible that our analyses of, or accounting treatment for, finite reinsurance contracts or discontinued operations could be questioned or disputed by regulatory authorities. As a result, further restatements of our financial results are possible.

In prior years, we restated our financial results and identified material weaknesses in our internal control over financial reporting.

In May of 2005 we restated our financial results for prior years to correct our accounting for several reinsurance contracts, primarily with a former affiliate, and to correct our equity accounting for that affiliate. In February of 2006 we restated our financial results for prior years to correct the accounting for discontinued operations acquired in our merger with The Continental Corporation in 1995. Additionally, in March of 2006, we restated our financial results for prior years to correct classification errors within our Consolidated Statements of Cash Flows.

As a result of the foregoing restatements, we identified material weaknesses in our internal control over financial reporting as of December 31, 2004 and 2005, respectively. We also determined that our internal control over financial reporting as of such dates was not effective. Our system of internal control over financial reporting is a process designed to provide reasonable assurance to our management, Audit Committee and Board of Directors regarding the reliability of our financial reporting and the preparation and fair presentation of our published financial statements. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, and the implementing rules of the Securities and Exchange Commission, the periodic reports we file with the SEC include information on our system of disclosure controls and procedures, as well as our overall internal control over financial reporting.

While we have remediated the referenced material weaknesses, if we fail to maintain effective internal control over financial reporting, we could be scrutinized by regulators in a manner that extends beyond the SEC's requests for information relating to the restatements (as further described in the prior risk factor). We could also be scrutinized by securities analysts and investors. As a result of this scrutiny, we could suffer a loss of public confidence in our financial reporting capabilities and thereby face adverse effects on our business and the market price of our securities.

Our investment portfolio, which is a key component of our overall profitability, may suffer reduced returns or losses, especially with respect to our equity in various limited partnership net assets which are often subject to greater leverage and volatility.

Investment returns are an important part of our overall profitability. General economic conditions, stock market conditions, fluctuations in interest rates, and many other factors beyond our control can adversely affect the returns and the overall value of our equity investments and our ability to control the timing of the realization of investment income. In addition, any defaults in the payments due to us for our investments, especially with respect to liquid corporate and municipal bonds, could reduce our investment income and realized investment gains or could cause us to incur investment losses. Further, we invest a portion of our assets in equity investments, primarily through limited partnerships, which are subject to greater volatility than our fixed income investments. In some cases, these limited partnerships use leverage and are thereby subject to even greater volatility. Although limited partnership investments generally provide higher expected return, they present greater risk and are more illiquid than our fixed income investments. As a result of these factors, we may not realize an adequate return on our investments, may incur losses on sales of our investments and may be required to write down the value of our investments.

We may be adversely affected by the cyclical nature of the property and casualty business.

The property and casualty market is cyclical and has experienced periods characterized by relatively high levels of price competition, less restrictive underwriting standards and relatively low premium rates, followed by periods of relatively lower levels of competition, more selective underwriting standards and relatively high premium rates.

We face intense competition in our industry.

All aspects of the insurance industry are highly competitive and we must continuously allocate resources to refine and improve our insurance products and services. Insurers compete on the basis of factors including products, price, services, ratings and financial strength. We may lose business to competitors offering competitive insurance products at lower prices. We compete with a large number of stock and mutual insurance companies and other entities for both distributors and customers. In addition, the Graham-Leach-Bliley Act of 1999 has encouraged

Table of Contents

growth in the number, size and financial strength of our potential competitors by removing barriers that previously prohibited holding companies from simultaneously owning commercial banks, insurers and securities firms.

We may suffer losses from non-routine litigation and arbitration matters which may exceed the reserves we have established.

We face substantial risks of litigation and arbitration beyond ordinary course claims and APMT matters, which may contain assertions in excess of amounts covered by reserves that we have established. These matters may be difficult to assess or quantify and may seek recovery of very large or indeterminate amounts that include punitive or treble damages. Accordingly, unfavorable results in these proceedings could have a material adverse impact on our results of operations.

Additional information on litigation is included in the MD&A under Item 7 and Note G to the Consolidated Financial Statements included under Item 8.

We are dependent on a small number of key executives and other key personnel to operate our business successfully.

Our success substantially depends upon our ability to attract and retain high quality key executives and other employees. We believe there are only a limited number of available qualified executives in the business lines in which we compete. We rely substantially upon the services of our executive officers to implement our business strategy. The loss of the services of any members of our management team or the inability to attract and retain other talented personnel could impede the implementation of our business strategies. We do not maintain key man life insurance policies with respect to any of our employees.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The 333 S. Wabash Avenue building, located in Chicago, Illinois and owned by Continental Assurance Company (CAC), a wholly-owned subsidiary of CCC, serves as our home office. Our subsidiaries own or lease office space in various cities throughout the United States and in other countries. The following table sets forth certain information with respect to our principal office locations:

Location	Amount (Square Feet) of Building Owned and Occupied or Leased and Occupied by CNA	Principal Usage
333 S. Wabash Avenue, Chicago, Illinois	904,990	Principal executive offices of CNAF
401 Penn Street, Reading, Pennsylvania	171,406	Property and casualty insurance offices
2405 Lucien Way, Maitland, Florida	147,815	Property and casualty insurance offices
40 Wall Street, New York, New York	110,131	Property and casualty insurance offices
675 Placentia Avenue, Brea, California	78,655	Property and casualty insurance offices
600 N. Pearl Street, Dallas, Texas	75,544	Property and casualty insurance offices
1100 Cornwall Road, Monmouth Junction, New Jersey	74,067	Property and casualty insurance offices
3175 Satellite Boulevard, Duluth, Georgia	48,696	Property and casualty insurance offices
	47,195	

405 Howard Street, San Francisco,
California

4150 N. Drinkwater Boulevard, Scottsdale,
Arizona

37,799

Property and casualty insurance
offices

Property and casualty insurance
offices

We lease our office space described above except for the Chicago, Illinois building and the Reading, Pennsylvania building, which are owned. We consider that our properties are generally in good condition, are well maintained and are suitable and adequate to carry on our business.

ITEM 3. LEGAL PROCEEDINGS

Information on our legal proceedings is set forth in Notes F and G of the Consolidated Financial Statements included under Item 8.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed on the New York Stock Exchange, the Chicago Stock Exchange, the NYSE Arca and is traded on the Philadelphia Stock Exchange, under the symbol CNA.

As of February 16, 2006, we had 271,406,984 shares of common stock outstanding. Approximately 89% of our outstanding common stock is owned by Loews. We had 2,094 stockholders of record as of February 16, 2006 according to the records maintained by our transfer agent.

The table below shows the high and low closing sales prices for our common stock based on the New York Stock Exchange Composite Transactions.

Common Stock Information

	2006		2005	
	High	Low	High	Low
Quarter:				
Fourth	\$40.32	\$36.19	\$34.91	\$28.52
Third	36.04	33.05	30.46	28.40
Second	33.20	30.90	28.90	26.21
First	33.60	29.88	29.79	25.84

No dividends have been paid on our common stock in 2006 or 2005. Our ability to pay dividends is limited by regulatory dividend restrictions on our principal operating insurance subsidiaries.

The following graph compares the total return of our common stock, the Standard & Poor's 500 Composite Stock Index (S&P 500) and the Standard & Poor's 500 Property & Casualty Insurance Index for the five years ended December 31, 2006. The graph assumes that the value of the investment in our common stock and for each index was \$100 on December 31, 2001 and that dividends were reinvested.

Stock Price Performance Graph

<u>Company Index</u>	2001	2002	2003	2004	2005	2006

Table of Contents**2006 Compared with 2005**

Net income increased \$844 million in 2006 as compared with 2005. This increase was primarily due to increased net operating income and net realized investment results. These favorable impacts were partially offset by unfavorable results from discontinued operations. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Net operating income from continuing operations increased \$817 million in 2006 as compared with 2005. Favorably impacting net operating income was increased net investment income and significantly decreased unfavorable net prior year development as discussed below. The 2005 results included a \$334 million after-tax impact of catastrophes resulting from Hurricanes Katrina, Wilma, Rita, Dennis and Ophelia, net of anticipated reinsurance recoveries. Additionally, the 2005 results included a \$115 million benefit related to a federal income tax settlement and release of federal income tax reserves.

Unfavorable net prior year development of \$185 million was recorded in 2006, including \$251 million of unfavorable claim and allocated claim adjustment expense reserve development and \$66 million of favorable premium development. Unfavorable net prior year development of \$807 million, including \$945 million of unfavorable claim and allocated claim adjustment expense reserve development and \$138 million of favorable premium development, was recorded in 2005. Further information on Net Prior Year Development for 2006 and 2005 is included in Note F of the Consolidated Financial Statements included under Item 8.

During 2006 and 2005, we commuted several significant reinsurance contracts that resulted in unfavorable development of \$110 million and \$433 million, which is included in the development above, and which were partially offset by the release of previously established allowance for uncollectible reinsurance. These commutations resulted in an unfavorable impact of \$31 million after-tax and \$259 million after-tax in 2006 and 2005. These contracts contained interest crediting provisions and maintenance charges. Interest charges associated with the reinsurance contracts commuted were \$9 million after-tax and \$55 million after-tax in 2006 and 2005. The 2005 amount includes the interest charges associated with the contract commuted in 2006. There will be no further interest crediting charges or other charges related to these commuted contracts in future periods.

Net earned premiums increased \$34 million in 2006 as compared with 2005, including an \$80 million increase related to the Specialty Lines segment and a \$3 million increase related to the Standard Lines segment. Net earned premiums for the Life and Group Non-Core segment decreased \$63 million. See the Segment Results section of this MD&A for further discussion.

Loss from discontinued operations was \$29 million for the year ended December 31, 2006. Results in 2006 reflect a \$29 million impairment loss on the anticipated sale of a portion of the run-off business. Further information on this impairment loss is included in Note Q of the Consolidated Financial Statements included under Item 8. Also, the 2006 results were impacted by an increase in unallocated loss adjustment expense reserves and bad debt provision for reinsurance receivables. These items were partially offset by the release of tax reserves and net investment income.

2005 Compared with 2004

Net income decreased \$161 million in 2005 as compared with 2004, due to decreased net operating income partially offset by improved net investment results. See the Investments section of this MD&A for further discussion of net investment results.

Net operating income from continuing operations decreased \$346 million in 2005 as compared with 2004. This decrease in net operating income was primarily driven by increased unfavorable net prior year development of \$437 million after-tax which includes the impact of significant commutations in 2005 and 2004, decreased earned premiums, and increased catastrophe impacts in 2005. Partially offsetting these impacts were increased net investment income, a \$115 million after-tax benefit related to a federal income tax settlement and release of federal income tax reserves, and lower insurance acquisition and operating expenses.

Unfavorable net prior year development of \$807 million was recorded in 2005, including \$945 million of unfavorable claim and allocated claim adjustment expense reserve development and \$138 million of favorable premium development. Unfavorable net prior year development of \$134 million, including \$250 million of unfavorable claim and allocated claim adjustment expense reserve development and \$116 million of favorable premium development, was recorded in 2004. Further information on Net Prior Year Development for 2005 and 2004 is included in Note F of

the Consolidated Financial Statements included under Item 8.

20

Table of Contents

During 2005 and 2004, we commuted several significant reinsurance contracts that resulted in unfavorable development of \$433 million and \$76 million, which is included in the development above, and which was partially offset by the release of previously established allowance for uncollectible reinsurance. These commutations resulted in an unfavorable impact of \$259 million after-tax and favorable impact of \$18 million after-tax in 2005 and 2004. These contracts contained interest crediting provisions and maintenance charges. Interest charges associated with the reinsurance contracts commuted were \$47 million after-tax and \$86 million after-tax in 2005 and 2004. There will be no further interest crediting charges or other charges related to these commuted contracts in future periods.

Unfavorable net prior year development was also recorded related to our assumed reinsurance operations which are in run-off, workers compensation and excess workers compensation lines, primarily in accident years 2003 and prior, the architects and engineers book of business, pollution exposures and large directors and officers (D&O) claims.

The impact of catastrophes was \$334 million after-tax and \$196 million after-tax in 2005 and 2004. This increase was primarily due to 2005 catastrophe impacts resulting from Hurricanes Katrina, Wilma, Rita, Dennis and Ophelia and 2004 catastrophe impacts primarily resulting from Hurricanes Charley, Frances, Ivan and Jeanne. These impacts are net of anticipated reinsurance recoveries, and include the effect of reinstatement premiums and estimated insurance assessments.

Net realized investment results, after-tax, improved \$143 million in 2005 as compared with 2004. Net results in 2004 included a loss on the sale of the individual life insurance business of \$389 million after-tax, which was partly offset by the 2004 gain of \$105 million after-tax on the sale of our investment in Canary Wharf Group PLC (Canary Wharf), a London-based real estate company.

Net earned premiums decreased \$640 million in 2005 as compared with 2004. Net earned premiums from the core property and casualty operations decreased by \$309 million, as discussed in more detail in the segment discussions below. The remainder of the decrease in earned premiums was primarily due to the sale of the individual life business on April 30, 2004, as well as decreased premiums from CNA Re which exited the reinsurance market in 2003.

Income from discontinued operations increased \$42 million in 2005 as compared to 2004, primarily due to a decrease in unfavorable net prior year development, including the effects of commutations of assumed and ceded reinsurance, increased foreign exchange gains and improved investment results primarily related to realized investment gains.

Critical Accounting Estimates

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the amounts of revenues and expenses reported during the period. Actual results may differ from those estimates.

Our Consolidated Financial Statements and accompanying notes have been prepared in accordance with GAAP applied on a consistent basis. We continually evaluate the accounting policies and estimates used to prepare the Consolidated Financial Statements. In general, our estimates are based on historical experience, evaluation of current trends, information from third party professionals and various other assumptions that are believed to be reasonable under the known facts and circumstances.

The accounting estimates discussed below are considered by us to be critical to an understanding of our Consolidated Financial Statements as their application places the most significant demands on our judgment. Note A of the Consolidated Financial Statements included under Item 8 should be read in conjunction with this section to assist with obtaining an understanding of the underlying accounting policies related to these estimates. Due to the inherent uncertainties involved with these types of judgments, actual results could differ significantly from estimates and may have a material adverse impact on our results of operations and/or equity.

Insurance Reserves

Insurance reserves are established for both short and long-duration insurance contracts. Short-duration contracts are primarily related to property and casualty insurance policies where the reserving process is based on actuarial estimates of the amount of loss, including amounts for known and unknown claims. Long-duration contracts typically include traditional life insurance and long term care products and are estimated using actuarial estimates about mortality and morbidity, as well as assumptions about expected investment returns. The reserve for unearned premiums on property and casualty and accident and health contracts represents the portion of premiums written related to the unexpired terms of coverage. The inherent risks associated with the reserving process are discussed in the Reserves Estimates and Uncertainties section below.

Reinsurance

Amounts recoverable from reinsurers are estimated in a manner consistent with claim and claim adjustment expense reserves or future policy benefits reserves and are reported as receivables in the Consolidated Balance Sheets. The ceding of insurance does not discharge us of our primary liability under insurance contracts written by us. An exposure exists with respect to property and casualty and life reinsurance ceded to the extent that any reinsurer is unable to meet its obligations or disputes the liabilities assumed under reinsurance agreements. An estimated allowance for doubtful accounts is recorded on the basis of periodic evaluations of balances due from reinsurers, reinsurer solvency, our past experience and current economic conditions.

Reinsurance accounting allows for contractual cash flows to be reflected as premiums and losses, as compared to deposit accounting, which requires cash flows to be reflected as assets and liabilities. To qualify for reinsurance accounting, reinsurance agreements must include risk transfer. Considerable judgment by management may be necessary to determine if risk transfer requirements are met. We believe we have appropriately applied reinsurance accounting principles in our evaluation of risk transfer. However, our evaluation of risk transfer and the resulting accounting could be challenged in connection with regulatory reviews or possible changes in accounting and/or financial reporting rules related to reinsurance, which could materially adversely affect our results of operations and/or equity. Further information on our reinsurance program is included in the Reinsurance section below and Note H of the Consolidated Financial Statements included under Item 8.

Table of Contents***Valuation of Investments and Impairment of Securities***

Invested assets are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain invested assets and the level of uncertainty related to changes in the value of these assets, it is possible that changes in risks in the near term could have an adverse material impact on our results of operations or equity.

Our investment portfolio is subject to market declines below book value that may be other-than-temporary. We have an Impairment Committee, which reviews the investment portfolio on a quarterly basis, with ongoing analysis as new information becomes available. Any decline that is determined to be other-than-temporary is recorded as an other-than-temporary impairment loss in the results of operations in the period in which the determination occurred. Further information on our process for evaluating impairments is included in Note B of the Consolidated Financial Statements included under Item 8.

Long Term Care Products

Reserves and deferred acquisition costs for our long term care products are based on certain assumptions including morbidity, policy persistency and interest rates. The recoverability of deferred acquisition costs and the adequacy of the reserves are contingent on actual experience related to these key assumptions and other factors such as future health care cost trends. If actual experience differs from these assumptions, the deferred acquisition costs may not be fully recovered and the reserves may not be adequate, requiring us to add to reserves, or take unfavorable development. Therefore, our financial results could be adversely impacted.

Pension and Postretirement Benefit Obligations

We make a significant number of assumptions in estimating the liabilities and costs related to our pension and postretirement benefit obligations to employees under our benefit plans. The assumptions that most impact these costs are the discount rate, the expected return on plan assets and the rate of compensation increases. These assumptions are evaluated relative to current market factors such as inflation, interest rates and fiscal and monetary policies. Changes in these assumptions can have a material impact on pension obligations and pension expense.

In determining the discount rate assumption, we utilized current market information, including a discounted cash flow analysis of our pension and postretirement obligations and general movements in the current market environment. In particular, the basis for our discount rate selection was fixed income debt securities that receive one of the two highest ratings given by a recognized rating agency. In 2006 and historically, the Moody's Aa Corporate Bond Index was the benchmark for discount rate selection. The index is used as the basis for the change in discount rate from the last measurement date. Additionally, we have supplemented our discount rate decision with a yield curve analysis. The yield curve was applied to expected future retirement plan payments to adjust the discount rate to reflect the cash flow characteristics of the plans. The yield curve is a hypothetical double A yield curve represented by a series of annualized discount rates reflecting bond issues having a rating of Aa or better by Moody's Investors Service, Inc. or a rating of AA or better by Standard & Poor's. Based on all available information, it was determined that 5.750% and 5.625% were the appropriate discount rates as of December 31, 2006 to calculate our accrued pension and postretirement liabilities, respectively. Accordingly, the 5.750% and 5.625% rates will also be used to determine our 2007 pension and postretirement expense. At December 31, 2005, the discount rates used to calculate our accrued pension and postretirement liabilities were 5.625% and 5.500% respectively.

Further information on our pension and postretirement benefit obligations is included in Note J of the Consolidated Financial Statements included under Item 8.

Legal Proceedings

We are involved in various legal proceedings that have arisen during the ordinary course of business. We evaluate the facts and circumstances of each situation, and when we determine it is necessary, a liability is estimated and recorded. Further information on our legal proceedings and related contingent liabilities is provided in Notes F and G of the Consolidated Financial Statements included under Item 8.

Reserves - Estimates and Uncertainties

We maintain reserves to cover our estimated ultimate unpaid liability for claim and claim adjustment expenses, including the estimated cost of the claims adjudication process, for claims that have been reported but not yet settled

Table of Contents

(case reserves) and claims that have been incurred but not reported (IBNR). Claim and claim adjustment expense reserves are reflected as liabilities and are included on the Consolidated Balance Sheets under the heading Insurance Reserves. Adjustments to prior year reserve estimates, if necessary, are reflected in the results of operations in the period that the need for such adjustments is determined. The carried case and IBNR reserves are provided in the Segment Results section of this MD&A and in Note F of the Consolidated Financial Statements included under Item 8.

The level of reserves we maintain represents our best estimate, as of a particular point in time, of what the ultimate settlement and administration of claims will cost based on our assessment of facts and circumstances known at that time. Reserves are not an exact calculation of liability but instead are complex estimates that we derive, generally utilizing a variety of actuarial reserve estimation techniques, from numerous assumptions and expectations about future events, both internal and external, many of which are highly uncertain.

Our experience has been that establishing reserves for casualty coverages relating to asbestos, environmental pollution and mass tort (APMT) claim and claim adjustment expenses is subject to uncertainties that are greater than those presented by other claims. Estimating the ultimate cost of both reported and unreported APMT claims is subject to a higher degree of variability due to a number of additional factors, including among others:

- coverage issues, including whether certain costs are covered under the policies and whether policy limits apply;
- inconsistent court decisions and developing legal theories;
- continuing aggressive tactics of plaintiffs' lawyers;
- the risks and lack of predictability inherent in major litigation;
- changes in the volume of APMT claims which cannot now be anticipated;
- the impact of the exhaustion of primary limits and the resulting increase in claims on any umbrella or excess policies we have issued;
- the number and outcome of direct actions against us; and
- our ability to recover reinsurance for APMT claims.

It is also not possible to predict changes in the legal and legislative environment and the impact on the future development of APMT claims. This development will be affected by future court decisions and interpretations, as well as changes in applicable legislation. It is difficult to predict the ultimate outcome of large coverage disputes until settlement negotiations near completion and significant legal questions are resolved or, failing settlement, until the dispute is adjudicated. This is particularly the case with policyholders in bankruptcy where negotiations often involve a large number of claimants and other parties and require court approval to be effective. A further uncertainty exists as to whether a national privately financed trust to replace litigation of asbestos claims with payments to claimants from the trust will be established and approved through federal legislation, and, if established and approved, whether it will contain funding requirements in excess of our carried loss reserves.

Traditional actuarial methods and techniques employed to estimate the ultimate cost of claims for more traditional property and casualty exposures are less precise in estimating claim and claim adjustment reserves for APMT, particularly in an environment of emerging or potential claims and coverage issues that arise from industry practices and legal, judicial and social conditions. Therefore, these traditional actuarial methods and techniques are necessarily supplemented with additional estimation techniques and methodologies, many of which involve significant judgments that are required of management. For APMT, we regularly monitor our exposures, including reviews of loss activity, regulatory developments and court rulings. In addition, we perform a comprehensive ground up analysis on our exposures annually. Our actuaries, in conjunction with our specialized claim unit, use various modeling techniques to estimate our overall exposure to known accounts. We use this information and additional modeling techniques to develop loss distributions and claim reporting patterns to determine reserves for accounts that will report APMT exposure in the future. Estimating the average claim size requires analysis of the impact of large losses and claim cost trend based on changes in the cost of repairing or replacing property, changes in the cost of legal fees, judicial decisions, legislative changes, and other factors. Due to the inherent uncertainties in estimating reserves for APMT claim and claim adjustment expenses and the degree of variability due to, among other things, the factors described above, we may be required to record material changes in our claim and claim adjustment expense reserves in the future, should new information become available or other developments emerge.

Table of Contents

See the APMT Reserves section of this MD&A and Note F of the Consolidated Financial Statements included under Item 8 for additional information relating to APMT claims and reserves.

In addition, we are subject to the uncertain effects of emerging or potential claims and coverage issues that arise as industry practices and legal, judicial, social and other environmental conditions change. These issues have had, and may continue to have, a negative effect on our business by either extending coverage beyond the original underwriting intent or by increasing the number or size of claims. Examples of emerging or potential claims and coverage issues include:

- increases in the number and size of claims relating to injuries from medical products;
- the effects of accounting and financial reporting scandals and other major corporate governance failures, which have resulted in an increase in the number and size of claims, including director and officer and errors and omissions insurance claims;
- class action litigation relating to claims handling and other practices;
- construction defect claims, including claims for a broad range of additional insured endorsements on policies;
- clergy abuse claims, including passage of legislation to reopen or extend various statutes of limitations; and
- mass tort claims, including bodily injury claims related to silica, welding rods, benzene, lead and various other chemical exposure claims.

The impact of these and other unforeseen emerging or potential claims and coverage issues is difficult to predict and could materially adversely affect the adequacy of our claim and claim adjustment expense reserves and could lead to future reserve additions. See the Segment Results sections of this MD&A and Note F of the Consolidated Financial Statements included under Item 8 for a discussion of changes in reserve estimates and the impact on our results of operations.

Establishing Reserve Estimates

In developing claim and claim adjustment expense (loss or losses) reserve estimates, our actuaries perform detailed reserve analyses that are staggered throughout the year. The data is organized at a product level. A product can be a line of business covering a subset of insureds such as commercial automobile liability for small and middle market customers, it can encompass several lines of business provided to a specific set of customers such as dentists, or it can be a particular type of claim such as construction defect. Every product is analyzed at least once during the year, and many products are analyzed multiple times. The analyses generally review losses gross of ceded reinsurance and apply the ceded reinsurance terms to the gross estimates to establish estimates net of reinsurance. In addition to the detailed analyses, we review actual loss emergence for all products each quarter.

The detailed analyses use a variety of generally accepted actuarial methods and techniques to produce a number of estimates of ultimate loss. We determine a point estimate of ultimate loss by reviewing the various estimates and assigning weight to each estimate given the characteristics of the product being reviewed. The reserve estimate is the difference between the estimated ultimate loss and the losses paid to date. The difference between the estimated ultimate loss and the case incurred loss (paid loss plus case reserve) is IBNR. IBNR calculated as such includes a provision for development on known cases (supplemental development) as well as a provision for claims that have occurred but have not yet been reported (pure IBNR).

Most of our business can be characterized as long-tail. For long tail business, it will generally be several years between the time the business is written and the time when all claims are settled. Our long-tail exposures include commercial automobile liability, workers compensation, general liability, medical malpractice, other professional liability coverages, assumed reinsurance run-off and products liability. Short-tail exposures include property, commercial automobile physical damage, marine and warranty. Each of our property/casualty segments, Standard Lines, Specialty Lines and Corporate and Other Non-Core, contain both long-tail and short-tail exposures.

The methods used to project ultimate loss for both long-tail and short-tail exposures include, but are not limited to, the following:

- Paid Development,
- Incurred Development,

Table of Contents

Loss Ratio,
 Bornhuetter-Ferguson Using Premiums and Paid Loss,
 Bornhuetter-Ferguson Using Premiums and Incurred Loss, and
 Average Loss.

The paid development method estimates ultimate losses by reviewing paid loss patterns and applying them to accident years with further expected changes in paid loss. Selection of the paid loss pattern requires analysis of several factors including the impact of inflation on claims costs, the rate at which claims professionals make claim payments and close claims, the impact of judicial decisions, the impact of underwriting changes, the impact of large claim payments and other factors. Claim cost inflation itself requires evaluation of changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors. Because this method assumes that losses are paid at a consistent rate, changes in any of these factors can impact the results. Since the method does not rely on case reserves, it is not directly influenced by changes in the adequacy of case reserves.

For many products, paid loss data for recent periods may be too immature or erratic for accurate predictions. This situation often exists for long-tail exposures. In addition, changes in the factors described above may result in inconsistent payment patterns. Finally, estimating the paid loss pattern subsequent to the most mature point available in the data analyzed often involves considerable uncertainty for long-tail products such as workers' compensation.

The incurred development method is similar to the paid development method, but it uses case incurred losses instead of paid losses. Since the method uses more data (case reserves in addition to paid losses) than the paid development method, the incurred development patterns may be less variable than paid patterns. However, selection of the incurred loss pattern requires analysis of all of the factors above. In addition, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place, and the use of case incurred losses may not eliminate the issues associated with estimating the incurred loss pattern subsequent to the most mature point available.

The loss ratio method multiplies premiums by an expected loss ratio to produce ultimate loss estimates for each accident year. This method may be useful if loss development patterns are inconsistent, losses emerge very slowly, or there is relatively little loss history from which to estimate future losses. The selection of the expected loss ratio requires analysis of loss ratios from earlier accident years or pricing studies and analysis of inflationary trends, frequency trends, rate changes, underwriting changes, and other applicable factors.

The Bornhuetter-Ferguson using premiums and paid loss method is a combination of the paid development approach and the loss ratio approach. The method normally determines expected loss ratios similar to the approach used to estimate the expected loss ratio for the loss ratio method and requires analysis of the same factors described above. The method assumes that only future losses will develop at the expected loss ratio level. The percent of paid loss to ultimate loss implied from the paid development method is used to determine what percentage of ultimate loss is yet to be paid. The use of the pattern from the paid development method requires consideration of all factors listed in the description of the paid development method. The estimate of losses yet to be paid is added to current paid losses to estimate the ultimate loss for each year. This method will react very slowly if actual ultimate loss ratios are different from expectations due to changes not accounted for by the expected loss ratio calculation.

The Bornhuetter-Ferguson using premiums and incurred loss method is similar to the Bornhuetter-Ferguson using premiums and paid loss method except that it uses case incurred losses. The use of case incurred losses instead of paid losses can result in development patterns that are less variable than paid patterns. However, the inclusion of case reserves can lead to distortions if changes in case reserving have taken place, and the method requires analysis of all the factors that need to be reviewed for the loss ratio and incurred development methods.

The average loss method multiplies a projected number of ultimate claims by an estimated ultimate average loss for each accident year to produce ultimate loss estimates. Since projections of the ultimate number of claims are often less variable than projections of ultimate loss, this method can provide more reliable results for products where loss development patterns are inconsistent or too variable to be relied on exclusively. In addition, this method can more directly account for changes in coverage that impact the number and size of claims. However, this method can be difficult to apply to situations where very large claims or a substantial number of unusual claims result in volatile average claim sizes. Projecting the ultimate number of claims requires analysis of several factors including the rate

Table of Contents

at which policyholders report claims to us, the impact of judicial decisions, the impact of underwriting changes and other factors. Estimating the ultimate average loss requires analysis of the impact of large losses and claim cost trend based on changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors.

For other more complex products where the above methods may not produce reliable indications, we use additional methods tailored to the characteristics of the specific situation. Such products include construction defect losses and APMT.

For construction defect losses, our actuaries organize losses by report year. Report year groups claims by the year in which they were reported. To estimate losses from claims that have not been reported, various extrapolation techniques are applied to the pattern of claims that have been reported to estimate the number of claims yet to be reported. This process requires analysis of several factors including the rate at which policyholders report claims to us, the impact of judicial decisions, the impact of underwriting changes and other factors. An average claim size is determined from past experience and applied to the number of unreported claims to estimate reserves for these claims.

For many exposures, especially those that can be considered long-tail, a particular accident year may not have a sufficient volume of paid losses to produce a statistically reliable estimate of ultimate losses. In such a case, our actuaries typically assign more weight to the incurred development method than to the paid development method. As claims continue to settle and the volume of paid loss increases, the actuaries may assign additional weight to the paid development method. For most of our products, even the incurred losses for accident years that are early in the claim settlement process will not be of sufficient volume to produce a reliable estimate of ultimate losses. In these cases, we will not assign any weight to the paid and incurred development methods. We will use loss ratio, Bornhuetter-Ferguson and average loss methods. For short-tail exposures, the paid and incurred development methods can often be relied on sooner primarily because our history includes a sufficient number of years to cover the entire period over which paid and incurred losses are expected to change. However, we may also use loss ratio, Bornhuetter-Ferguson and average loss methods for short-tail exposures.

Periodic Reserve Reviews

The reserve analyses performed by our actuaries result in point estimates. Each quarter, the results of the detailed reserve reviews are summarized and discussed with our senior management to determine the best estimate of reserves. This group considers many factors in making this decision. The factors include, but are not limited to, the historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and incurred loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Our recorded reserves reflect our best estimate as of a particular point in time based upon known facts, current law and our judgment. The carried reserve may differ from the actuarial point estimate as the result of our consideration of the factors noted above as well as the potential volatility of the projections associated with the specific product being analyzed and other factors impacting claims costs that may not be quantifiable through actuarial analysis. This process results in management's best estimate which is then recorded as the loss reserve.

Currently, our reserves are slightly higher than the actuarial point estimate. We do not establish a specific provision for uncertainty. For Standard and Specialty Lines, the difference between our reserves and the actuarial point estimate is due to the two most recent complete accident years. The claim data from these accident years is very immature. We believe it is prudent to wait until actual experience confirms that the loss reserves should be adjusted. For Corporate and Other Non-Core, the carried reserve is slightly higher than the actuarial point estimate. While the actuarial estimates for APMT exposures reflect current knowledge, we feel it is prudent, based on the history of developments in this area, to reflect some margin in the carried reserve until the ultimate outcome of the issues associated with these exposures is clearer.

The key assumptions fundamental to the reserving process are often different for various products and accident years. Some of these assumptions are explicit assumptions that are required of a particular method, but most of the assumptions are implicit and cannot be precisely quantified. An example of an explicit assumption is the pattern employed in the paid development method. However, the assumed pattern is itself based on several implicit assumptions such as the impact of inflation on medical costs and the rate at which claim professionals close claims.

Table of Contents

As a result, the effect on reserve estimates of a particular change in assumptions usually cannot be specifically quantified, and changes in these assumptions cannot be tracked over time.

Our recorded reserves are management's best estimate. In order to provide an indication of the variability associated with our net reserves, the following discussion provides a sensitivity analysis that shows the approximate estimated impact of variations in the most significant factor affecting our reserve estimates for particular types of business. These significant factors are the ones that could most likely materially impact the reserves. This discussion covers the major types of business for which we believe a material deviation to our reserves is reasonably possible. There can be no assurance that actual experience will be consistent with the current assumptions or with the variation indicated by the discussion. In addition, there can be no assurance that other factors and assumptions will not have a material impact on our reserves.

Within Standard Lines, the two types of business for which we believe a material deviation to our net reserves is reasonably possible are workers' compensation and general liability.

For Standard Lines workers' compensation, since many years will pass from the time the business is written until all claim payments have been made, claim cost inflation on claim payments is the most significant factor affecting workers' compensation reserve estimates. Workers' compensation claim cost inflation is driven by the cost of medical care, the cost of wage replacement, expected claimant lifetimes, judicial decisions, legislative changes and other factors. If estimated workers' compensation claim cost inflation increases by one point for the entire period over which claim payments will be made, we estimate that our net reserves would increase by approximately \$500 million. If estimated workers' compensation claim cost inflation decreases by one point for the entire period over which claim payments will be made, we estimate that our net reserves would decrease by approximately \$450 million. Our net reserves for Standard Lines workers' compensation were approximately \$4.4 billion at December 31, 2006.

For Standard Lines general liability, the predominant method used for estimating reserves is the incurred development method. Changes in the cost to repair or replace property, the cost of medical care, the cost of wage replacement, judicial decisions, legislation and other factors all impact the pattern selected in this method. The pattern selected results in the incurred development factor that estimates future changes in case incurred loss. If the estimated incurred development factor for general liability increases by 15%, we estimate that our net reserves would increase by approximately \$370 million. If the estimated incurred development factor for general liability decreases by 13%, we estimate that our net reserves would decrease by approximately \$320 million. Our net reserves for Standard Lines general liability were approximately \$4.0 billion at December 31, 2006.

Within Specialty Lines, we believe a material deviation to our net reserves is reasonably possible for the US Specialty Lines group. This group provides professional liability coverages to various professional firms, including architects, realtors, small and mid-sized accounting firms, law firms and technology firms. US Specialty Lines also provide D&O, employment practices, fiduciary and fidelity coverages. US Specialty Lines also offers insurance products to serve the healthcare delivery system. The most significant factor affecting US Specialty Lines reserve estimates is claim severity. Claim severity for US Specialty Lines is driven by the cost of medical care, the cost of wage replacement, legal fees, judicial decisions, legislation and other factors. Underwriting and claim handling decisions such as the classes of business written and individual claim settlement decisions can also impact claim severity. If the estimated claim severity for US Specialty Lines increases by 7%, we estimate that US Specialty Lines net reserves would increase by approximately \$270 million. If the estimated claim severity for US Specialty Lines decreases by 3%, we estimate that US Specialty net reserves would decrease by approximately \$110 million. Our net reserves for US Specialty Lines were approximately \$3.9 billion at December 31, 2006.

Within Corporate and Other Non-Core, the two types of business for which we believe a material deviation to our net reserves is reasonably possible are CNA Re and APMT.

For CNA Re, the predominant method used for estimating reserves is the incurred development method. Changes in the cost to repair or replace property, the cost of medical care, the cost of wage replacement, the rate at which ceding companies report claims, judicial decisions, legislation and other factors all impact the incurred development pattern for CNA Re. The pattern selected results in the incurred development factor that estimates future changes in case incurred loss. If the estimated incurred development factor for CNA Re increases by 21%, we estimate that our net reserves for CNA Re would increase by approximately \$150 million. If the estimated incurred development factor for

CNA Re decreases by 21%, we estimate that our net reserves would decrease by approximately \$150 million. Our net reserves for CNA Re were approximately \$1.2 billion at December 31, 2006.

Table of Contents

For APMT, the most significant factor affecting reserve estimates is overall account size trend. Overall account size trend for APMT reflects the combined impact of economic trends (inflation), changes in the types of defendants involved, the expected mix of asbestos disease types, judicial decisions, legislation and other factors. If the estimated overall account size trend for APMT increases by 4 points, we estimate that our APMT net reserves would increase by approximately \$700 million. If the estimated overall account size trend for APMT decreases by 4 points, we estimate that our APMT net reserves would decrease by approximately \$400 million. Our net reserves for APMT were approximately \$1.9 billion at December 31, 2006.

Given the factors described above, it is not possible to quantify precisely the ultimate exposure represented by claims and related litigation. As a result, we regularly review the adequacy of our reserves and reassess our reserve estimates as historical loss experience develops, additional claims are reported and settled and additional information becomes available in subsequent periods.

In light of the many uncertainties associated with establishing the estimates and making the assumptions necessary to establish reserve levels, we review our reserve estimates on a regular basis and make adjustments in the period that the need for such adjustments is determined. These reviews have resulted in our identification of information and trends that have caused us to increase our reserves in prior periods and could lead to the identification of a need for additional material increases in claim and claim adjustment expense reserves, which could materially adversely affect our results of operations, equity, business and insurer financial strength and debt ratings. See the Ratings section of this MD&A for further information regarding our financial strength and debt ratings.

Reinsurance

Due to significant catastrophes during 2005, the cost of our catastrophe reinsurance program has increased. Our catastrophe reinsurance protection cost us premiums of approximately \$64 million in 2005, including reinstatement premiums and cost us approximately \$79 million in 2006, which did not include any reinstatement premiums. During 2007, our catastrophe reinsurance program will cost us \$89 million before the impact of any reinstatement premiums.

The terms of our 2007 catastrophe programs are different than those of our 2006 programs. The Corporate Property Catastrophe treaty provides coverage for the accumulation of losses between \$300 million and \$1 billion arising out of a single catastrophe occurrence in the United States, its territories and possessions, and Canada. Our co-participation is 50% of the first \$100 million layer and 10% of the remaining layer. In addition, we previously purchased an aggregate property catastrophe treaty to obtain reinsurance protection against the aggregation of losses from multiple catastrophic events. We did not purchase an aggregate property catastrophe treaty for 2007.

In certain circumstances, including significant deterioration of a reinsurer's financial strength ratings, we may engage in commutation discussions with individual reinsurers. The outcome of such discussions may result in a lump sum settlement that is less than the recorded receivable, net of any applicable allowance for doubtful accounts. Losses arising from commutations could have an adverse material impact on our results of operations.

In 2001, we entered into a one-year corporate aggregate reinsurance treaty related to the 2001 accident year covering substantially all property and casualty lines of business in the Continental Casualty Company pool (the CCC Cover). The CCC Cover was fully utilized in 2003. In 2006, we commuted our CCC Cover. This commutation had no impact on the Consolidated Statements of Operations for the year ended December 31, 2006.

Also, in 2006, we commuted several reinsurance treaties, including several finite treaties, with a European reinsurance group. This commutation resulted in a pretax loss, net of allowance for uncollectible reinsurance, of \$48 million. We received \$35 million of cash in connection with this significant commutation.

As of December 31, 2006 and 2005, there were one and thirteen ceded reinsurance treaties in force respectively that we consider to be finite reinsurance. In 2003, we discontinued purchases of such contracts. The remaining treaty at December 31, 2006 provides reinsurance protection for the 1999 accident year on specified portions of our domestic property and casualty business and is fully utilized. Therefore, we do not expect to cede any additional losses under finite reinsurance contracts in future periods nor incur interest costs.

Further information on our reinsurance program is included in Note H of the Consolidated Financial Statements included under Item 8.

Table of Contents**Terrorism Insurance**

We and the insurance industry incurred substantial losses related to the 2001 World Trade Center event. The Terrorism Risk Insurance Act of 2002 (TRIA) established a program within the Department of the Treasury under which insurers are required to offer terrorism insurance and the federal government will share the risk of loss by commercial property and casualty insurers arising from future terrorist attacks. Although TRIA expired on December 31, 2005, the Terrorism Risk Insurance Extension Act of 2005 (TRIEA) extended this program through December 31, 2007 with changes such as the lines of business covered, the deductible amount that must be paid by the insurance company and the aggregate industry loss prior to federal government assistance becoming available.

While TRIEA provides the property and casualty industry with an increased ability to withstand the effect of a terrorist event through 2007, given the unpredictability of the nature, targets, severity or frequency of potential terrorist events, our results of operations or equity could nevertheless be materially adversely impacted by them. We are attempting to mitigate this exposure through our underwriting practices, as well as policy terms and conditions (where applicable). Under the laws of certain states, we are generally prohibited from excluding terrorism exposure from our primary workers' compensation policies. Further, in those states that mandate property insurance coverage of damage from fire following a loss, we are prohibited from excluding terrorism exposure.

Over the past several years, we have been underwriting our business to manage our terrorism exposure through strict underwriting standards, risk avoidance measures and conditional terrorism exclusions where permitted by law. There is substantial uncertainty as to our ability to effectively contain our terrorism exposure since, notwithstanding our efforts described above, we continue to issue forms of coverage, in particular, workers' compensation, that are exposed to risk of loss from a terrorism event.

Restructuring

In 2001, we finalized and approved a plan related to restructuring the property and casualty segments and Life and Group Non-Core segment, discontinuation of the variable life and annuity business and consolidation of real estate locations. During 2006, we reevaluated the sufficiency of the remaining accrual, which related to lease termination costs, and determined that the liability is no longer required as we have completed our lease obligations. As a result, the excess remaining accrual was released in 2006, resulting in income of \$8 million after-tax for the year ended December 31, 2006.

Further information on the restructuring plan is included in Note O of the Consolidated Financial Statements included under Item 8.

SEGMENT RESULTS

The following discusses the results of continuing operations for our operating segments. We utilize the net operating income financial measure to monitor our operations. Net operating income is calculated by excluding from net income the after-tax effects of 1) net realized investment gains or losses, 2) income or loss from discontinued operations and 3) cumulative effects of changes in accounting principles. See further discussion regarding how we manage our business in Note N of the Consolidated Financial Statements included under Item 8. In evaluating the results of the Standard Lines and Specialty Lines, we utilize the combined ratio, the loss ratio, the expense ratio and the dividend ratio. These ratios are calculated using GAAP financial results. The loss ratio is the percentage of net incurred claim and claim adjustment expenses to net earned premiums. The expense ratio is the percentage of insurance underwriting and acquisition expenses, including the amortization of deferred acquisition costs, to net earned premiums. The dividend ratio is the ratio of policyholders' dividends incurred to net earned premiums. The combined ratio is the sum of the loss, expense and dividend ratios.

STANDARD LINES**Business Overview**

Standard Lines works with an independent agency distribution system and network of brokers to market a broad range of property and casualty insurance products and services to small, middle-market and large businesses

Table of Contents

domestically and abroad. The Standard Lines operating model focuses on underwriting performance, relationships with selected distribution sources and understanding customer needs.

Standard Lines includes Property, Casualty and CNA Global.

Property provides standard and excess property coverage, as well as marine coverage and boiler and machinery to a wide range of businesses.

Casualty provides standard casualty insurance products such as workers' compensation, general and product liability and commercial auto coverage through traditional products to a wide range of businesses. Most insurance programs are provided on a guaranteed cost basis; however, Casualty has the capability to offer specialized, loss-sensitive insurance programs to those customers viewed as higher risk and less predictable in exposure.

Excess & Surplus (E&S) is included in Casualty. E&S provides specialized insurance and other financial products for selected commercial risks on both an individual customer and program basis. Customers insured by E&S are generally viewed as higher risk and less predictable in exposure than those covered by standard insurance markets. E&S products are distributed throughout the United States through specialist producers, program agents and Property and Casualty agents and brokers.

Property and Casualty's (P&C) field structure consists of 33 branch locations across the country organized into 4 regions. Each branch provides the marketing, underwriting and risk control expertise on the entire portfolio of products. The Centralized Processing Operation for small and middle-market customers, located in Maitland, Florida, handles policy processing and accounting, and also acts as a call center to optimize customer service. The claims structure consists of a centralized claim center designed to efficiently handle property damage and medical only claims and 18 claim office locations around the country handling the more complex claims. Also, Standard Lines provides total risk management services relating to claim and information services to the large commercial insurance marketplace, through a wholly-owned subsidiary, ClaimsPlus, Inc., a third party administrator.

CNA Global consists of subsidiaries operating in Europe, Latin America, Canada and Hawaii. These affiliates offer property and casualty insurance to small and medium size businesses and capitalize on strategic indigenous opportunities.

The following table details results of operations for Standard Lines.

Results of Operations

Years ended December 31 (In millions)	2006	2005	2004
Net written premiums	\$ 4,433	\$ 4,382	\$ 4,582
Net earned premiums	4,413	4,410	4,917
Net investment income	991	767	496
Net operating income (loss)	617	(41)	220
Net realized investment gains, after-tax	55	9	139
Net income (loss)	672	(32)	359
Ratios			
Loss and loss adjustment expense Expense	70.1%	87.5%	70.8%
Dividend	31.1	32.4	34.6
	0.4	0.4	0.2
 Combined	 101.6%	 120.3%	 105.6%

2006 Compared with 2005

Net written premiums for Standard Lines increased \$51 million in 2006 as compared with 2005. This increase was primarily driven by favorable new business, rate and retention in the Property lines of business. Net earned premiums increased \$3 million in 2006 as compared with 2005. Net earned premiums were impacted by decreased favorable

premium development in 2006 as compared to 2005, as discussed below. We continue to focus on portfolio optimization.

Table of Contents

Standard Lines averaged flat rates for 2006, as compared to average rate decreases of 1% for 2005 for the contracts that renewed during those periods. Retention rates of 81% and 77% were achieved for those contracts that were up for renewal in each period.

Net results increased \$704 million in 2006 as compared with 2005. This increase was attributable to increases in net operating results and net realized investment gains. See the Investments section of this MD&A for further discussion of net investment income and net realized investment gains.

Net operating results increased \$658 million in 2006 as compared with 2005. This increase was primarily driven by significantly reduced catastrophe losses in 2006, an increase in net investment income and a decrease in unfavorable net prior year development as discussed below. The 2006 net operating results included catastrophe impacts of \$31 million after-tax. The 2005 net operating results included catastrophe impacts of \$318 million after-tax related to Hurricanes Katrina, Wilma, Rita, Dennis and Ophelia, net of reinsurance recoveries.

The combined ratio improved 18.7 points in 2006 as compared with 2005. The loss ratio improved 17.4 points due to decreased unfavorable net prior year development as discussed below and decreased catastrophe losses in 2006. The 2006 and 2005 loss ratios included 1.3 and 11.1 points related to the impact of catastrophes.

The expense ratio improved 1.3 points in 2006 as compared with 2005. This improvement was primarily due to a decrease in the provision for insurance bad debt. In addition, the 2005 ratio included increased ceded commissions as a result of an unfavorable arbitration ruling related to two reinsurance treaties. Changes in estimates for premium taxes partially offset these favorable impacts.

Unfavorable net prior year development of \$69 million was recorded in 2006, including \$157 million of unfavorable claim and allocated claim adjustment expense reserve development and \$88 million of favorable premium development. Unfavorable net prior year development of \$452 million, including \$559 million of unfavorable claim and allocated claim adjustment expense reserve development and \$107 million of favorable premium development, was recorded in 2005. Further information on Standard Lines Net Prior Year Development for 2006 and 2005 is included in Note F of the Consolidated Financial Statements included under Item 8.

During 2006 and 2005, we commuted several significant reinsurance contracts that resulted in unfavorable development of \$110 million and \$285 million, which is included in the development above, and which was partially offset by the release of previously established allowance for uncollectible reinsurance. These commutations resulted in an unfavorable after-tax impact of \$31 million and \$173 million in 2006 and 2005. Several of the commuted contracts contained interest crediting provisions. The interest charges associated with the reinsurance contracts commuted were \$9 million after-tax and \$35 million after-tax in 2006 and 2005. The 2005 amount includes the interest charges associated with the contract commuted in 2006. There will be no further interest crediting charges related to these commuted contracts in future periods.

The following table summarizes the gross and net carried reserves as of December 31, 2006 and 2005 for Standard Lines.

Gross and Net Carried**Claim and Claim Adjustment Expense Reserves**

December 31	2006	2005
(In millions)		
Gross Case Reserves	\$ 6,746	\$ 7,033
Gross IBNR Reserves	8,188	8,051
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$ 14,934	\$ 15,084
Net Case Reserves	\$ 5,234	\$ 5,165
Net IBNR Reserves	6,632	6,081

Total Net Carried Claim and Claim Adjustment Expense Reserves	\$ 11,866	\$ 11,246
--	-----------	-----------

2005 Compared with 2004

Net written premiums for Standard Lines decreased \$200 million in 2005 as compared with 2004. This decrease was primarily driven by decreased premium writings in our casualty lines of business, increased reinstatement

Table of Contents

premium in 2005 related to catastrophe losses and decreased rates as discussed further below. Net earned premiums decreased \$507 million in 2005 as compared with 2004. This decrease was primarily driven by the decline in premiums written. The lower premium is consistent with our strategy of portfolio optimization. Our priority is a diversified portfolio in profitable classes of business.

Standard Lines averaged rate decreases of 1% for 2005, as compared to average rate increases of 4% for 2004 for the contracts that renewed during those periods. Retention rates of 77% and 70% were achieved for those contracts that were up for renewal in each period.

Net results decreased \$391 million in 2005 as compared with 2004. This decrease was attributable to declines in both net operating results and net realized investment results. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Net operating results decreased \$261 million in 2005 as compared with 2004. This decrease was due primarily to increased unfavorable net prior year development of \$282 million after-tax including \$185 million after-tax related to significant commutations in 2005, a \$135 million after-tax increase in catastrophe losses, the decreased earned premium as discussed above and decreased current accident year results. These unfavorable items were partially offset by a \$271 million increase in net investment income and a decrease in the provision for insurance bad debt.

Unfavorable net prior year development of \$452 million was recorded in 2005, including \$559 million of unfavorable claim and allocated claim adjustment expense reserve development and \$107 million of favorable premium development. Unfavorable net prior year development of \$18 million, including \$115 million of unfavorable claim and allocated claim adjustment expense reserve development and \$97 million of favorable premium development, was recorded in 2004. Further information on Standard Lines Net Prior Year Development for 2005 and 2004 is included in Note F of the Consolidated Financial Statements included under Item 8.

During 2005 and 2004, we commuted several significant reinsurance contracts that resulted in unfavorable development of \$285 million and \$5 million, which is included in the development above, and which was partially offset by the release of previously established allowance for uncollectible reinsurance. These commutations resulted in an unfavorable impact of \$173 million after-tax and favorable impact of \$4 million after-tax in 2005 and 2004. These contracts contained interest crediting provisions. The interest charges associated with the reinsurance contracts commuted were \$42 million and \$110 million in 2005 and 2004. There will be no further interest crediting charges related to these commuted contracts in future periods.

The impact of catastrophes was \$318 million after-tax and \$183 million after-tax for 2005 and 2004, net of anticipated reinsurance recoveries.

The combined ratio increased 14.7 points in 2005 as compared with 2004. The loss ratio increased 16.7 points in 2005 as compared with 2004. These increases were primarily due to increased net prior year development, increased catastrophe losses and decreased current accident year results. Catastrophe losses of \$470 million and \$260 million were recorded in 2005 and 2004.

The expense ratio improved 2.2 points in 2005 as compared with 2004. This improvement was primarily due to a decrease in the provision for insurance bad debt.

The dividend ratio increased 0.2 points in 2005 as compared with 2004. The 2004 ratio was impacted by favorable dividend development, partially offset by decreased participation in dividend plans and lower dividend amounts related to the current accident year.

SPECIALTY LINES**Business Overview**

Specialty Lines provides professional, financial and specialty property and casualty products and services through a network of brokers, managing general underwriters and independent agencies. Specialty Lines provides solutions for managing the risks of its clients, including architects, lawyers, accountants, healthcare professionals, financial intermediaries and public and private corporations. Product offerings also include surety and fidelity bonds and vehicle and equipment warranty services.

Specialty Lines includes the following business groups: US Specialty Lines, Surety and Warranty.

Table of Contents

US Specialty Lines provides management and professional liability insurance and risk management services, primarily in the United States. This group provides professional liability coverages to various professional firms, including architects, realtors, small and mid-sized accounting firms, law firms and technology firms. US Specialty Lines also provides directors and officers (D&O), employment practices, fiduciary and fidelity coverages. Specific areas of focus include small and mid-size firms as well as privately held firms and not-for-profit organizations where tailored products for this client segment are offered. Products within US Specialty Lines are distributed through brokers, agents and managing general underwriters.

US Specialty Lines, through CNA HealthPro, also offers insurance products to serve the healthcare delivery system. Products, which include professional liability as well as associated standard property and casualty coverages, are distributed on a national basis through a variety of channels including brokers, agents and managing general underwriters. Key customer segments include long term care facilities, allied healthcare providers, life sciences, dental professionals and mid-size and large healthcare facilities and delivery systems.

Surety consists primarily of CNA Surety and its insurance subsidiaries and offers small, medium and large contract and commercial surety bonds. CNA Surety provides surety and fidelity bonds in all 50 states through a combined network of independent agencies. CNA owns approximately 63% of CNA Surety.

Warranty provides vehicle warranty service contracts that protect individuals and businesses from the financial burden associated with mechanical breakdown or maintenance.

The following table details results of operations for Specialty Lines.

Results of Operations

Years ended December 31 (In millions)	2006	2005	2004
Net written premiums	\$ 2,596	\$ 2,463	\$ 2,391
Net earned premiums	2,555	2,475	2,277
Net investment income	403	281	246
Net operating income	464	336	324
Net realized investment gains, after-tax	18	12	54
Net income	482	348	378
Ratios			
Loss and loss adjustment expense Expense	60.5%	65.3%	63.3%
Dividend	26.7	26.1	26.1
	0.2	0.2	0.2
 Combined	 87.4%	 91.6%	 89.6%

2006 Compared with 2005

Net written premiums for Specialty Lines increased \$133 million in 2006 as compared with 2005. This increase was primarily due to improved production across certain lines of business. Net earned premiums increased \$80 million in 2006 as compared with 2005, consistent with the increased premium written.

Specialty Lines averaged flat rates for 2006, as compared to average rate increases of 1% for 2005 for the contracts that renewed during those periods. Retention rates of 87% and 86% were achieved for those contracts that were up for renewal in each period.

Net income increased \$134 million in 2006 as compared with 2005. This increase was attributable to increases in net operating income and realized investment gains. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Net operating income increased \$128 million in 2006 as compared with 2005. This improvement was primarily driven by an increase in net investment income, a decrease in net prior year development as discussed below and reduced

catastrophe impacts in 2006. Catastrophe impacts were \$1 million after-tax for the year ended December 31, 2006, as compared to \$16 million after-tax for the year ended December 31, 2005. Also, the 2005 results included a \$59 million loss, after the impact of taxes and minority interests, in the surety line of business related to a large national contractor. Further information related to the large national contractor is included in Note S of the Consolidated Financial Statements included under Item 8.

Table of Contents

The combined ratio improved 4.2 points in 2006 as compared with 2005. The loss ratio improved 4.8 points, due to improved current accident year impacts and decreased net prior year development as discussed below. The 2005 loss ratio was unfavorably impacted by surety losses of \$110 million, before the impacts of minority interest, related to a national contractor as discussed above. Partially offsetting this favorable impact was less favorable current accident year loss ratios across several other lines of business in 2006.

Unfavorable net prior year development of \$15 million was recorded in 2006, including \$10 million of favorable claim and allocated claim adjustment expense reserve development and \$25 million of unfavorable premium development. Unfavorable net prior year development of \$54 million, including \$47 million of unfavorable claim and allocated claim adjustment expense reserve development and \$7 million of unfavorable premium development, was recorded in 2005. Further information on Specialty Lines Net Prior Year Development for 2006 and 2005 is included in Note F of the Consolidated Financial Statements included under Item 8.

The following table summarizes the gross and net carried reserves as of December 31, 2006 and 2005 for Specialty Lines.

**Gross and Net Carried
Claim and Claim Adjustment Expense Reserves**

December 31 (In millions)	2006	2005
Gross Case Reserves	\$ 1,715	\$ 1,907
Gross IBNR Reserves	3,814	3,298
 Total Gross Carried Claim and Claim Adjustment Expense Reserves	 \$ 5,529	 \$ 5,205
 Net Case Reserves	 \$ 1,350	 \$ 1,442
Net IBNR Reserves	2,921	2,352
 Total Net Carried Claim and Claim Adjustment Expense Reserves	 \$ 4,271	 \$ 3,794

2005 Compared with 2004

Net written premiums for Specialty Lines increased \$72 million in 2005 as compared with 2004. This increase was primarily due to improved retention across most professional liability insurance lines of business. These favorable impacts were partially offset by increased ceded premiums for certain professional liability lines of business and decreased premiums for the warranty business. Due to a change in 2005 in the warranty product offering, fees related to the new warranty product are included within other revenues. Written premiums for the warranty line of business decreased \$70 million in 2005 as compared to 2004. Net earned premiums increased \$198 million in 2005 as compared with 2004, which reflects the increased premium written trend over several prior quarters in Specialty Lines.

Specialty Lines averaged rate increases of 1% and 9% in 2005 and 2004 for the contracts that renewed during those periods. Retention rates of 86% and 83% were achieved for those contracts that were up for renewal in each period.

Net income decreased \$30 million in 2005 as compared with 2004. This decrease was due primarily to a \$42 million decrease in net realized investment gains partially offset by increased net operating income. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Net operating income increased \$12 million in 2005 as compared with 2004. This increase was primarily driven by an increase in net investment income and increased earned premiums. These increases to operating income were partially offset by decreased current accident year results. Additionally, 2004 results were favorably impacted by the release of a previously established reinsurance bad debt allowance as the result of a significant commutation. Catastrophe

impacts were \$16 million after-tax and \$11 million after-tax for the years ended December 31, 2005 and 2004.

Table of Contents

The combined ratio increased 2.0 points in 2005 as compared with 2004. The loss ratio increased 2.0 points. The 2004 loss ratio was favorably impacted by the release of reinsurance bad debt reserve as discussed above. Additionally, the 2005 loss ratio was unfavorably impacted by increased current year accident losses. This was driven by increased surety losses of \$110 million related to a national contractor, before the impacts of minority interest, as discussed in further detail in Note S of the Consolidated Financial Statements included under Item 8, partially offset by improved current accident year loss ratios in several professional liability lines of business.

Unfavorable net prior year development of \$54 million was recorded in 2005, including \$47 million of unfavorable claim and allocated claim adjustment expense reserve development and \$7 million of unfavorable premium development. Unfavorable net prior year development of \$30 million, including \$58 million of unfavorable claim and allocated claim adjustment expense reserve development and \$28 million of favorable premium development, was recorded in 2004. Further information on Specialty Lines Net Prior Year Development for 2005 and 2004 is included in Note F of the Consolidated Financial Statements included under Item 8.

The expense ratio was the same in 2005 as compared with 2004. The 2005 ratio was impacted by a change in estimate related to profit commissions in the warranty line of business, which was offset by the impact of the increased earned premium base.

LIFE AND GROUP NON-CORE**Business Overview**

The Life and Group Non-Core segment primarily includes the results of the life and group lines of business that have either been sold or placed in run-off. We sold our individual life business on April 30, 2004 and our specialty medical business on January 6, 2005. The segment includes operating results for these businesses in periods prior to the sales, the realized gain/loss from the sales and the effects of the shared corporate overhead expenses which continue to be allocated to the segment. We continue to service our existing individual long term care commitments, our payout annuity business and our pension deposit business. We also manage a block of group reinsurance and life settlement contracts. These businesses are being managed as a run-off operation. Our group long term care and Index 500 products, while considered non-core, continue to be actively marketed.

The following table summarizes the results of operations for Life and Group Non-Core.

Results of Operations

Years ended December 31	2006	2005	2004
(In millions)			
Net earned premiums	\$641	\$704	\$ 921
Net investment income	698	593	692
Net operating loss	(14)	(51)	(29)
Net realized investment losses, after-tax	(33)	(19)	(385)
Net loss	(47)	(70)	(414)

2006 Compared with 2005

Net earned premiums for Life and Group Non-Core decreased \$63 million in 2006 as compared with 2005. The 2006 and 2005 net earned premiums relate primarily to the group and individual long term care businesses.

Net results increased \$23 million in 2006 as compared with 2005, driven by increased net investment income. A significant portion of the increase in net investment income was offset by a corresponding increase in the policyholders' funds reserves supported by the trading portfolio. The portion not offset by the policyholders' funds reserves increased by \$25 million. Also impacting net results was \$15 million of income related to the resolution of contingencies and the absence of a \$17 million provision recorded in 2005 for estimated indemnification liabilities related to the sold individual life business. Partially offsetting these favorable impacts were increased net realized investment losses and the absence of income related to agreements with buyers of sold businesses which ended as of December 31, 2005. In addition, the 2005 net results included a change in estimate, which reduced a prior accrual of state premium taxes. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Table of Contents**2005 Compared with 2004**

Net earned premiums for Life and Group Non-Core decreased \$217 million in 2005 as compared with 2004. The premiums in 2004 include \$115 million from the individual life business and \$165 million from the specialty medical business.

Net results improved by \$344 million in 2005 as compared with 2004. The improvement in net results related primarily to a \$389 million realized loss on the sale of the individual life business in 2004. Also contributing to the improvement in net results was the reduction in 2005 of significant 2004 items related to certain assumed reinsurance exposures. Additionally, 2005 results included \$13 million income related to a service agreement with a purchaser for sold businesses. These agreements have expired. These results were partially offset by a decline in net investment income of \$99 million. This included a decrease of approximately \$64 million from the trading portfolio which was largely offset by a corresponding decrease in the policyholders' funds reserves supported by the trading portfolio. In addition, it included the absence of favorable results from sold insurance operations. Also unfavorably impacting the 2005 results was a \$17 million provision increase for estimated indemnification liabilities related to the sold individual life business and unfavorable results related to the long term care business. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

CORPORATE AND OTHER NON-CORE**Overview**

Corporate and Other Non-Core includes the results of certain property and casualty lines of business placed in run-off. CNA Re, formerly a separate property and casualty operating segment, is in run-off and is included in the Corporate and Other Non-Core segment. This segment also includes the results related to the centralized adjusting and settlement of APMT claims, as well as the results of our participation in voluntary insurance pools and various non-insurance operations. Other operations also include interest expense on corporate borrowings and intercompany eliminations. The following table summarizes the results of operations for the Corporate and Other Non-Core segment, including APMT and intrasegment eliminations.

Results of Operations

Years ended December 31 (In millions)	2006	2005	2004
Net investment income	\$320	\$251	\$246
Revenues	305	311	358
Net operating income	3	9	84
Net realized investment gains (losses), after-tax	27	(12)	39
Net income (loss)	30	(3)	123

2006 Compared with 2005

Revenues decreased \$6 million in 2006 as compared with 2005. Revenues in 2006 and 2005 included interest income related to federal income tax settlements of \$4 million and \$121 million as further discussed in Note E to the Consolidated Financial Statements included under Item 8. This decrease was substantially offset by increased net investment income and improved realized investment results. See the Investments section of this MD&A for further discussion of net investment income and net realized investment results.

Net results increased \$33 million in 2006 as compared with 2005. The improvement was primarily driven by a decrease in unfavorable net prior year development as discussed further below. Offsetting this favorable impact was an increase in current accident year losses related to mass torts, discontinuation of royalty income related to a sold business and increased interest costs related to the issuance of \$750 million of senior notes in August 2006.

Unfavorable net prior year development of \$88 million was recorded during 2006, including \$86 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development and \$2 million of unfavorable premium development. Unfavorable net prior year development of \$306 million was recorded in 2005, including \$291 million of unfavorable net prior year claim and allocated claim adjustment expense reserve

Table of Contents

development and \$15 million of unfavorable premium development. Further information on Corporate and Other Non-Core's Net Prior Year Development for 2006 and 2005 is included in Note F of the Consolidated Financial Statements included under Item 8.

The following table summarizes the gross and net carried reserves as of December 31, 2006 and 2005 for Corporate and Other Non-Core.

Gross and Net Carried**Claim and Claim Adjustment Expense Reserves**

December 31 (In millions)	2006	2005
Gross Case Reserves	\$ 2,511	\$ 3,297
Gross IBNR Reserves	3,528	4,075
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$ 6,039	\$ 7,372
Net Case Reserves	\$ 1,453	\$ 1,554
Net IBNR Reserves	1,999	1,902
Total Net Carried Claim and Claim Adjustment Expense Reserves	\$ 3,452	\$ 3,456

2005 Compared with 2004

Revenues decreased \$47 million in 2005 as compared with 2004. The decrease in revenues was primarily due to reduced net earned premiums in CNA Re of \$134 million due to the exit from the assumed reinsurance business in 2003 and decreased net realized investment results. Partially offsetting these decreases was \$121 million of interest income related to a federal income tax settlement. See Note E to the Consolidated Financial Statements included under Item 8 for further information.

Net results decreased \$126 million in 2005 as compared with 2004. The decrease in net results was primarily due to a \$139 million after-tax increase in unfavorable net prior year development related primarily to commutations and reserve strengthening, a \$51 million decrease in net realized investment results and a decrease in the provision recorded for uncollectible reinsurance. Net realized investment results for the year ended December 31, 2005 and 2004 included a \$22 million after-tax and \$36 million after-tax impairment related to a national contractor. See Note S to the Consolidated Financial Statements included under Item 8 for additional information regarding the national contractor. Partially offsetting these decreases was a \$115 million after-tax benefit related to a federal income tax settlement and release of federal income tax reserves.

Unfavorable net prior year development of \$306 million was recorded during 2005, including \$291 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development and \$15 million of unfavorable premium development. Unfavorable net prior year development of \$93 million was recorded in 2004, including \$84 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development and \$9 million of unfavorable premium development. Further information on Corporate and Other Non-Core's Net Prior Year Development for 2005 and 2004 is included in Note F of the Consolidated Financial Statements included under Item 8.

During 2005 and 2004, we commuted several significant reinsurance contracts that resulted in unfavorable development of \$118 million and \$39 million, which is included in the development above, and which was partially offset by the release in 2004 of a previously established allowance for uncollectible reinsurance. These commutations resulted in unfavorable impacts of \$71 million after-tax and \$5 million after-tax in 2005 and 2004. These contracts contained interest crediting provisions and maintenance charges. Interest charges associated with the reinsurance

contracts commuted were \$13 million after-tax and \$11 million after-tax in 2005 and 2004. There will be no further interest crediting charges or other charges related to these commuted contracts in future periods.

Table of Contents

APMT Reserves

Our property and casualty insurance subsidiaries have actual and potential exposures related to asbestos, environmental pollution and mass tort (APMT) claims.

Establishing reserves for APMT claim and claim adjustment expenses is subject to uncertainties that are greater than those presented by other claims. Traditional actuarial methods and techniques employed to estimate the ultimate cost of claims for more traditional property and casualty exposures are less precise in estimating claim and claim adjustment expense reserves for APMT, particularly in an environment of emerging or potential claims and coverage issues that arise from industry practices and legal, judicial, and social conditions. Therefore, these traditional actuarial methods and techniques are necessarily supplemented with additional estimating techniques and methodologies, many of which involve significant judgments that are required on our part. Accordingly, a high degree of uncertainty remains for our ultimate liability for APMT claim and claim adjustment expenses.

In addition to the difficulties described above, estimating the ultimate cost of both reported and unreported APMT claims is subject to a higher degree of variability due to a number of additional factors, including among others: the number and outcome of direct actions against us; coverage issues, including whether certain costs are covered under the policies and whether policy limits apply; allocation of liability among numerous parties, some of whom may be in bankruptcy proceedings, and in particular the application of joint and several liability to specific insurers on a risk; inconsistent court decisions and developing legal theories; continuing aggressive tactics of plaintiffs lawyers; the risks and lack of predictability inherent in major litigation; enactment of state and federal legislation to address asbestos claims; the potential for increases and decreases in asbestos, environmental pollution and mass tort claims which cannot now be anticipated; the potential for increases and decreases in costs to defend asbestos, pollution and mass tort claims; the possibility of expanding theories of liability against our policyholders in environmental and mass tort matters; possible exhaustion of underlying umbrella and excess coverage; and future developments pertaining to our ability to recover reinsurance for asbestos, pollution and mass tort claims.

Due to the inherent uncertainties in estimating claim and claim adjustment expense reserves for APMT and due to the significant uncertainties described related to APMT claims, our ultimate liability for these cases, both individually and in aggregate, may exceed the recorded reserves. Any such potential additional liability, or any range of potential additional amounts, cannot be reasonably estimated currently, but could be material to our business, results of operations, equity, and insurer financial strength and debt ratings. Due to, among other things, the factors described above, it may be necessary for us to record material changes in our APMT claim and claim adjustment expense reserves in the future, should new information become available or other developments emerge.

We have annually performed ground up reviews of all open APMT claims to evaluate the adequacy of our APMT reserves. In performing our comprehensive ground up analysis, we consider input from our professionals with direct responsibility for the claims, inside and outside counsel with responsibility for our representation and our actuarial staff. These professionals consider, among many factors, the policyholder's present and predicted future exposures, including such factors as claims volume, trial conditions, prior settlement history, settlement demands and defense costs; the impact of asbestos defendant bankruptcies on the policyholder; facts or allegations regarding the policies we issued or are alleged to have issued, including such factors as aggregate or per occurrence limits, whether the policy is primary, umbrella or excess, and the existence of policyholder retentions and/or deductibles; the policyholders' allegations; the existence of other insurance; and reinsurance arrangements.

Further information on APMT Net Prior Year Development is included in Note F of the Consolidated Financial Statements included under Item 8.

Table of Contents

The following table provides data related to our APMT claim and claim adjustment expense reserves.

APMT Reserves

	December 31, 2006		December 31, 2005	
	Asbestos	Environmental Pollution and Mass Tort	Asbestos	Environmental Pollution and Mass Tort
(In millions)				
Gross reserves	\$ 2,635	\$ 647	\$ 2,992	\$ 680
Ceded reserves	(1,183)	(231)	(1,438)	(257)
Net reserves	\$ 1,452	\$ 416	\$ 1,554	\$ 423

Asbestos

In the past several years, we experienced, at certain points in time, significant increases in claim counts for asbestos-related claims. The factors that led to these increases included, among other things, intensive advertising campaigns by lawyers for asbestos claimants, mass medical screening programs sponsored by plaintiff lawyers and the addition of new defendants such as the distributors and installers of products containing asbestos. In recent years, the rate of new filings has decreased. Various challenges to mass screening claimants have been successful. Historically, the majority of asbestos bodily injury claims have been filed by persons exhibiting few, if any, disease symptoms. Studies have concluded that the percentage of unimpaired claimants to total claimants ranges between 66% and up to 90%. Some courts and some state statutes mandate that so-called unimpaired claimants may not recover unless at some point the claimant's condition worsens to the point of impairment. Some plaintiffs classified as unimpaired continue to challenge those orders and statutes. Therefore, the ultimate impact of the orders and statutes on future asbestos claims remains uncertain.

Several factors are, in our view, negatively impacting asbestos claim trends. Plaintiff attorneys who previously sued entities that are now bankrupt continue to seek other viable targets. As a result, companies with few or no previous asbestos claims are becoming targets in asbestos litigation and, although they may have little or no liability, nevertheless must be defended. Additionally, plaintiff attorneys and trustees for future claimants are demanding that policy limits be paid lump-sum into the bankruptcy asbestos trusts prior to presentation of valid claims and medical proof of these claims. Various challenges to these practices have succeeded in litigation, and are continuing to be litigated. Plaintiff attorneys and trustees for future claimants are also attempting to devise claims payment procedures for bankruptcy trusts that would allow asbestos claims to be paid under lax standards for injury, exposure and causation. This also presents the potential for exhausting policy limits in an accelerated fashion. Challenges to these practices are being mounted, though the ultimate impact or success of these tactics remains uncertain.

As a result of bankruptcies and insolvencies, we had in the past observed an increase in the total number of policyholders with current asbestos claims as additional defendants are added to existing lawsuits and are named in new asbestos bodily injury lawsuits. During the last few years the rate of new bodily injury claims had moderated and most recently the new claims filing rate has decreased although the number of policyholders claiming coverage for asbestos related claims has remained relatively constant in the past several years.

We have resolved a number of our large asbestos accounts by negotiating settlement agreements. Structured settlement agreements provide for payments over multiple years as set forth in each individual agreement.

In 1985, 47 asbestos producers and their insurers, including The Continental Insurance Company (CIC), executed the Wellington Agreement. The agreement was intended to resolve all issues and litigation related to coverage for asbestos exposures. Under this agreement, signatory insurers committed scheduled policy limits and made the limits available to pay asbestos claims based upon coverage blocks designated by the policyholders in 1985, subject to extension by policyholders. CIC was a signatory insurer to the Wellington Agreement.

We have also used coverage in place agreements to resolve large asbestos exposures. Coverage in place agreements are typically agreements between us and our policyholders identifying the policies and the terms for payment of asbestos related liabilities. Claims payments are contingent on presentation of adequate documentation showing exposure during the policy periods and other documentation supporting the demand for claims payment. Coverage in place agreements may have annual payment caps. Coverage in place agreements are evaluated based on claims filings trends and severities.

Table of Contents

We categorize active asbestos accounts as large or small accounts. We define a large account as an active account with more than \$100 thousand of cumulative paid losses. We have made closing large accounts a significant management priority. Small accounts are defined as active accounts with \$100 thousand or less of cumulative paid losses. Approximately 80% and 81% of our total active asbestos accounts are classified as small accounts at December 31, 2006 and 2005.

We also evaluate our asbestos liabilities arising from our assumed reinsurance business and our participation in various pools, including Excess & Casualty Reinsurance Association (ECRA).

IBNR reserves relate to potential development on accounts that have not settled and potential future claims from unidentified policyholders.

The tables below depict our overall pending asbestos accounts and associated reserves at December 31, 2006 and 2005.

Pending Asbestos Accounts and Associated Reserves

Some asbestos-related defendants have asserted that their insurance policies are not subject to aggregate limits on coverage. We have such claims from a number of insureds. Some of these claims involve insureds facing exhaustion of products liability aggregate limits in their policies, who have asserted that their asbestos-related claims fall within so-called non-products liability coverage contained within their policies rather than products liability coverage, and that the claimed non-products coverage is not subject to any aggregate limit. It is difficult to predict the ultimate size of any of the claims for coverage purportedly not subject to aggregate limits or predict to what extent, if any, the attempts to assert non-products claims outside the products liability aggregate will succeed. Our policies also contain other limits applicable to these claims and we have additional coverage defenses to certain claims. We have attempted to manage our asbestos exposure by aggressively seeking to settle claims on acceptable terms. There can be no assurance that any of these settlement efforts will be successful, or that any such claims can be settled on terms acceptable to us. Where we cannot settle a claim on acceptable terms, we aggressively litigate the claim. However, adverse developments with respect to such matters could have a material adverse effect on our results of operations and/or equity.

As a result of the uncertainties and complexities involved, reserves for asbestos claims cannot be estimated with traditional actuarial techniques that rely on historical accident year loss development factors. In establishing asbestos reserves, we evaluate the exposure presented by each insured. As part of this evaluation, we consider the available insurance coverage; limits and deductibles; the potential role of other insurance, particularly underlying coverage below any of our excess liability policies; and applicable coverage defenses, including asbestos exclusions. Estimation

of asbestos-related claim and claim adjustment expense reserves involves a high degree of judgment on our part and consideration of many complex factors, including: inconsistency of court decisions, jury attitudes and future court decisions; specific policy provisions; allocation of liability among insurers and insureds; missing policies and proof of coverage; the proliferation of bankruptcy proceedings and attendant uncertainties; novel theories asserted by policyholders and their counsel; the targeting of a broader range of businesses and entities as defendants; the uncertainty as to which other insureds may be targeted in the future and the uncertainties inherent in predicting the number of future claims; volatility in claim numbers and settlement demands; increases in the number of non-impaired claimants and the extent to which they can be precluded from making claims; the efforts by insureds to obtain coverage not subject to aggregate limits; long latency period between asbestos exposure and disease manifestation and the resulting potential for involvement of multiple policy periods for individual claims; medical inflation trends; the mix of asbestos-related diseases presented and the ability to recover reinsurance.

Table of Contents

We are involved in significant asbestos-related claim litigation, which is described in Note F of the Consolidated Financial Statements included under Item 8.

Environmental Pollution and Mass Tort

Environmental pollution cleanup is the subject of both federal and state regulation. By some estimates, there are thousands of potential waste sites subject to cleanup. The insurance industry is involved in extensive litigation regarding coverage issues. Judicial interpretations in many cases have expanded the scope of coverage and liability beyond the original intent of the policies. The Comprehensive Environmental Response Compensation and Liability Act of 1980 (Superfund) and comparable state statutes (mini-Superfunds) govern the cleanup and restoration of toxic waste sites and formalize the concept of legal liability for cleanup and restoration by Potentially Responsible Parties (PRPs). Superfund and the mini-Superfunds establish mechanisms to pay for cleanup of waste sites if PRPs fail to do so and assign liability to PRPs. The extent of liability to be allocated to a PRP is dependent upon a variety of factors. Further, the number of waste sites subject to cleanup is unknown. To date, approximately 1,500 cleanup sites have been identified by the Environmental Protection Agency (EPA) and included on its National Priorities List (NPL). State authorities have designated many cleanup sites as well.

Many policyholders have made claims against us for defense costs and indemnification in connection with environmental pollution matters. The vast majority of these claims relate to accident years 1989 and prior, which coincides with our adoption of the Simplified Commercial General Liability coverage form, which includes what is referred to in the industry as absolute pollution exclusion. We and the insurance industry are disputing coverage for many such claims. Key coverage issues include whether cleanup costs are considered damages under the policies, trigger of coverage, allocation of liability among triggered policies, applicability of pollution exclusions and owned property exclusions, the potential for joint and several liability and the definition of an occurrence. To date, courts have been inconsistent in their rulings on these issues.

We have made resolution of large environmental pollution exposures a management priority. We have resolved a number of our large environmental accounts by negotiating settlement agreements. In our settlements, we sought to resolve those exposures and obtain the broadest release language to avoid future claims from the same policyholders seeking coverage for sites or claims that had not emerged at the time we settled with our policyholder. While the terms of each settlement agreement vary, we sought to obtain broad environmental releases that include known and unknown sites, claims and policies. The broad scope of the release provisions contained in those settlement agreements should, in many cases, prevent future exposure from settled policyholders. It remains uncertain, however, whether a court interpreting the language of the settlement agreements will adhere to the intent of the parties and uphold the broad scope of language of the agreements.

We classify our environmental pollution accounts into several categories, which include structured settlements, coverage in place agreements and active accounts. Structured settlement agreements provide for payments over multiple years as set forth in each individual agreement.

We have also used coverage in place agreements to resolve pollution exposures. Coverage in place agreements are typically agreements between us and our policyholders identifying the policies and the terms for payment of pollution related liabilities. Claims payments are contingent on presentation of adequate documentation of damages during the policy periods and other documentation supporting the demand for claims payment. Coverage in place agreements may have annual payment caps.

We categorize active accounts as large or small accounts in the pollution area. We define a large account as an active account with more than \$100 thousand cumulative paid losses. We have made closing large accounts a significant management priority. Small accounts are defined as active accounts with \$100 thousand or less cumulative paid losses.

We also evaluate our environmental pollution exposures arising from our assumed reinsurance and our participation in various pools, including ECRA.

We carry unassigned IBNR reserves for environmental pollution. These reserves relate to potential development on accounts that have not settled and potential future claims from unidentified policyholders.

Table of Contents

Table of Contents**INVESTMENTS*****Net Investment Income***

The significant components of net investment income are presented in the following table.

Net Investment Income

Years ended December 31 (In millions)	2006	2005	2004
Fixed maturity securities	\$ 1,842	\$ 1,608	\$ 1,571
Short term investments	248	147	56
Limited partnerships	288	254	212
Equity securities	23	25	14
Income from trading portfolio (a)	103	47	110
Interest on funds withheld and other deposits	(68)	(166)	(261)
Other	18	20	18
Gross investment income	2,454	1,935	1,720
Investment expense	(42)	(43)	(40)
Net investment income	\$ 2,412	\$ 1,892	\$ 1,680

(a) There was no change in net unrealized gains (losses) on trading securities included in net investment income for the year ended December 31, 2006. The change in net unrealized gains (losses) on trading securities included in net investment income was \$(7) million and \$2 million for the years ended December 31, 2005 and 2004.

Net investment income increased by \$520 million for 2006 compared with 2005. The improvement was primarily driven by interest rate increases across fixed maturity securities and short term investments, an increase in the overall invested asset base resulting from improved cash flow and a reduction of interest expense on funds withheld and other deposits. During 2006 and 2005, we commuted several significant finite reinsurance contracts which contained interest crediting provisions and as a result, interest expense on funds withheld has declined significantly. No further interest expense is due on the funds withheld on the commuted contracts. The pretax interest expense on funds withheld related to these significant commuted contracts was \$14 million, \$84 million and \$146 million for December 31, 2006, 2005 and 2004, and was reflected as a component of Net investment income in our Consolidated Statements of Operations. The 2005 and 2004 amounts include the interest charges associated with the contract commuted in 2006. See Note H of the Consolidated Financial Statements included under Item 8 for additional information for interest costs on funds withheld and other deposits. Also impacting net investment income was increased income from the trading portfolio of approximately \$56 million. The increased income from the trading portfolio was largely offset by a corresponding increase in the policyholders' funds reserves supported by the trading portfolio, which is included in Insurance claims and policyholders' benefits on the Consolidated Statements of Operations.

Net investment income increased by \$212 million for 2005 compared with 2004. This increase was due to the reduced interest expense on funds withheld and other deposits discussed above and improved results across all other available-for-sale asset classes, especially short term investments, due to the improved period over period yields. This improvement was partly offset by decreases in investment income from the trading portfolio.

The bond segment of the investment portfolio yielded 5.6% in 2006, 4.9% in 2005 and 4.6% in 2004.

Table of Contents**Net Realized Investment Gains (Losses)**

The components of net realized investment results for available-for-sale securities are presented in the following table.

Net Realized Investment Gains (Losses)

Years ended December 31 (In millions)	2006	2005	2004
Realized investment gains (losses):			
Fixed maturity securities:			
U.S. Government bonds	\$ 62	\$ (33)	\$ 10
Corporate and other taxable bonds	(98)	(86)	123
Tax-exempt bonds	53	12	42
Asset-backed bonds	(9)	14	53
Redeemable preferred stock	(3)	3	19
Total fixed maturity securities	5	(90)	247
Equity securities	16	38	202
Derivative securities	18	49	(84)
Short term investments	(5)		(3)
Other, including dispositions of businesses net of participating policyholders interest	53	(10)	(601)
Realized investment gains (losses) before allocation to participating policyholders and minority interests	87	(13)	(239)
Allocated to participating policyholders and minority interests	(1)	3	(9)
Income tax (expense) benefit	(19)		95
Net realized investment gains (losses), net of participating policyholders and minority interests	\$ 67	\$ (10)	\$ (153)

Net realized investment results increased by \$77 million for 2006 compared with 2005. The increase in net realized investment results was primarily driven by improved results in fixed maturity securities, partially offset by increases in interest rate related other-than-temporary impairment (OTTI) losses for which we did not assert an intent to hold until an anticipated recovery in value. For 2006, OTTI losses of \$112 million were recorded primarily in the corporate and other taxable bonds sector. Other realized investment gains (losses) for the year ended December 31, 2006, included a \$37 million pretax gain related to a settlement received as a result of bankruptcy litigation of a major telecommunications corporation.

Net realized investment results improved \$143 million in 2005 compared with 2004. This improvement was primarily the result of a 2004 loss of \$389 million on the sale of the individual life insurance business, partly offset by reduced gains for equities securities. Equity results in 2004 included a gain of \$105 million related to our investment in Canary Wharf Group PLC, a London-based real estate company. Also impacting results for 2005 versus 2004 were decreased results in the overall fixed maturity asset class partly offset by improved results for the derivatives asset class. OTTI losses of \$70 million were recorded in 2005 across various sectors, including an OTTI loss of \$22 million related to loans made under a credit facility to a national contractor, that are classified as fixed maturities. OTTI losses of \$60 million were recorded in 2004 across various sectors, including an OTTI loss of \$36 million related to loans to the national contractor. For additional information on loans to the national contractor, see Note S of the Consolidated

Financial Statements included under Item 8. Other realized investment gains (losses) for the year ended December 31, 2005 and 2004 include gains and losses related to the sales of certain operations or affiliates that are described in Note P of the Consolidated Financial Statements included under Item 8.

A primary objective in the management of the fixed maturity and equity portfolios is to optimize return relative to underlying liabilities and respective liquidity needs. Our views on the current interest rate environment, tax regulations, asset class valuations, specific security issuer and broader industry segment conditions, and the domestic and global economic conditions, are some of the factors that enter into an investment decision. We also continually monitor exposure to issuers of securities held and broader industry sector exposures and may from time to time adjust such exposures based on our views of a specific issuer or industry sector.

The investment portfolio is periodically analyzed for changes in duration and related price change risk. Additionally, we periodically review the sensitivity of the portfolio to the level of foreign exchange rates and other

Table of Contents

factors that contribute to market price changes. A summary of these risks and specific analysis on changes is included in Item 7A Quantitative and Qualitative Disclosures about Market Risk included herein.

We invest in certain derivative financial instruments primarily to reduce our exposure to market risk (principally interest rate, equity price and foreign currency risk) and credit risk (risk of nonperformance of underlying obligor). Derivative securities are recorded at fair value at the reporting date. We also use derivatives to mitigate market risk by purchasing S&P 500^â index futures in a notional amount equal to the contract liability relating to Life and Group Non-Core indexed group annuity contracts. We provided collateral to satisfy margin deposits on exchange-traded derivatives totaling \$27 million as of December 31, 2006. For over-the-counter derivative transactions we utilize International Swaps and Derivatives Association (ISDA) Master Agreements that specify certain limits over which collateral is exchanged. As of December 31, 2006, we provided \$31 million of cash as collateral for over-the-counter derivative instruments.

A further consideration in the management of the investment portfolio is the characteristics of the underlying liabilities and the ability to align the duration of the portfolio to those liabilities to meet future liquidity needs, minimize interest rate risk and maintain a level of income sufficient to support the underlying insurance liabilities. For portfolios where future liability cash flows are determinable and long term in nature, we segregate assets for asset liability management purposes.

We classify our fixed maturity securities (bonds and redeemable preferred stocks) and our equity securities as either available-for-sale or trading, and as such, they are carried at fair value. The amortized cost of fixed maturity securities is adjusted for amortization of premiums and accretion of discounts to maturity, which is included in net investment income. Changes in fair value related to available-for-sale securities are reported as a component of other comprehensive income. Changes in fair value of trading securities are reported within net investment income.

The following table provides further detail of gross realized gains and gross realized losses on available-for-sale fixed maturity securities and equity securities, which include OTTI losses.

Realized Gains and Losses

Years ended December 31 (In millions)	2006	2005	2004
Net realized gains (losses) on fixed maturity securities and equity securities:			
Fixed maturity securities:			
Gross realized gains	\$ 382	\$ 361	\$ 704
Gross realized losses	(377)	(451)	(457)
Net realized gains (losses) on fixed maturity securities	5	(90)	247
Equity securities:

Gross realized losses	(8)	(35)	(23)
Net realized gains on equity securities	16	38	202
Net realized gains (losses) on fixed maturity and equity securities	\$ 21	\$ (52)	\$ 449

Table of Contents

The following table provides details of the largest realized losses from sales of securities aggregated by issuer including: the fair value of the securities at date of sale, the amount of the loss recorded and the period of time that the security had been in an unrealized loss position prior to sale. The period of time that the security had been in an unrealized loss position prior to sale can vary due to the timing of individual security purchases. Also included is a narrative providing the industry sector along with the facts and circumstances giving rise to the loss.

Largest Realized Losses from Securities Sold at a Loss
Year ended December 31, 2006

<u>Issuer Description and Discussion</u>	Fair Value at Date of Sale	Loss On Sale	Months in Unrealized Loss Prior To Sale (a)
(In millions) Various notes and bonds issued by the United States Treasury. Securities sold due to outlook on interest rates and inflation.	\$ 4,529	\$ 18	0-6
State issued revenue bonds. Positions were sold as part of a broader initiative to reduce municipal holdings.	289	6	0-12
Financial services group that provides property and casualty, managed care, life, and various other insurance products in the United States. Position was sold to reduce exposure to the issuer and sector.	56	5	0-6
Company is in the advertising industry, utilizing various venues including television, radio, outdoor displays, and live entertainment. The company has entered into an agreement to be acquired. Position was reduced in response to the announced transaction.	66	5	0-12+

Other investments		26		33	
Total general account investments	\$	44,096	100%	\$	39,695 100%

Our general account investments consist primarily of asset-backed securities, corporate securities, short term investments, municipal and U.S. treasury securities.

A significant judgment in the valuation of investments is the determination of when an OTTI has occurred. We analyze securities on at least a quarterly basis. Part of this analysis is to monitor the length of time and severity of the decline below book value for those securities in an unrealized loss position. Information on our OTTI process is set forth in Note B of the Consolidated Financial Statements included under Item 8.

Investments in the general account had a total net unrealized gain of \$966 million at December 31, 2006 compared with \$787 million at December 31, 2005. The unrealized position at December 31, 2006 was comprised of a net unrealized gain of \$716 million for fixed maturities, a net unrealized gain of \$249 million for equity securities, and a net unrealized gain of \$1 million for short term securities. The unrealized position at December 31, 2005 was comprised of a net unrealized gain of \$618 million for fixed maturities, a net unrealized gain of \$170 million for equity securities, and a net unrealized loss of \$1 million for short term securities. See Note B of the Consolidated Financial Statements included under Item 8 for further detail on the unrealized position of our general account investment portfolio.

Table of Contents

Our investment policies for both the general account and separate account emphasize high credit quality and diversification by industry, issuer and issue. Assets supporting interest rate sensitive liabilities are segmented within the general account to facilitate asset/liability duration management.

The following table provides the composition of fixed maturity securities with an unrealized loss at December 31, 2006 in relation to the total of all fixed maturity securities with an unrealized loss by maturity profile. Securities not due at a single date are allocated based on weighted average life.

Maturity Profile

	Percent of Market Value	Percent of Unrealized Loss
Due in one year or less	5%	3%
Due after one year through five years	44	50
Due after five years through ten years	33	24
Due after ten years	18	23
Total	100%	100%

Our non-investment grade fixed maturity securities available-for-sale as of December 31, 2006 that were in a gross unrealized loss position had a fair value of \$622 million. The following tables summarize the fair value and gross unrealized loss of non-investment grade securities categorized by the length of time those securities have been in a continuous unrealized loss position and further categorized by the severity of the unrealized loss position in 10% increments as of December 31, 2006 and 2005.

Unrealized Loss Aging for Non-investment Grade Securities

	Estimated Fair Value	Fair Value as a Percentage of Book Value				Gross Unrealized Loss
		90-99%	80-89%	70-79%	<70%

 Total non-investment grade	 \$ 874	 \$ 27	 \$ 14	 \$ 1	 \$	 \$ 42

As part of the ongoing OTTI monitoring process, we evaluated the facts and circumstances based on available information for each of the non-investment grade securities and determined that the securities presented in the above tables were temporarily impaired when evaluated at December 31, 2006 and 2005. This determination was based on a number of factors that we regularly consider including, but not limited to: the issuers' ability to meet current and

Table of Contents

future interest and principal payments, an evaluation of the issuers' financial condition and near term prospects, our assessment of the sector outlook and estimates of the fair value of any underlying collateral. In all cases where a decline in value is judged to be temporary, we have the intent and ability to hold these securities for a period of time sufficient to recover the book value of our investment through an anticipated recovery in the fair value of such securities or by holding the securities to maturity. In many cases, the securities held are matched to liabilities as part of ongoing asset/liability duration management. As such, we continually assess our ability to hold securities for a time sufficient to recover any temporary loss in value or until maturity. We believe we have sufficient levels of liquidity so as to not impact the asset/liability management process.

Our equity securities classified as available-for-sale as of December 31, 2006 that were in an unrealized loss position had a fair value of \$14 million and unrealized losses of \$1 million. Under the same process as followed for fixed maturity securities, we monitor the equity securities for other-than-temporary declines in value. In all cases where a decline in value is judged to be temporary, we have the intent and ability to hold these securities for a period of time sufficient to recover the book value of our investment through an anticipated recovery in the fair value of such securities.

Invested assets are exposed to various risks, such as interest rate, market and credit risk. Due to the level of risk associated with certain invested assets and the level of uncertainty related to changes in the value of these assets, it is possible that changes in these risks in the near term, including increases in interest rates, could have an adverse material impact on our results of operations or equity.

The general account portfolio consists primarily of high quality bonds, 91% and 92% of which were rated as investment grade (rated BBB or higher) at December 31, 2006 and 2005. The following table summarizes the ratings of our general account bond portfolio at carrying value.

General Account Bond Ratings

December 31 (In millions)	2006	%	2005	%
U.S. Government and affiliated agency securities	\$ 5,285	15%	\$ 1,628	5%
Other AAA rated	16,311	47	18,233	55
AA and A rated	5,222	15	6,046	18
BBB rated	4,933	14	4,499	14
Non investment-grade	3,188	9	2,612	8
Total	\$ 34,939	100%	\$ 33,018	100%

At December 31, 2006 and 2005, approximately 96% and 95% of the general account portfolio was issued by U.S. Government and affiliated agencies or was rated by Standard & Poor's (S&P) or Moody's Investors Service (Moody's). The remaining bonds were rated by other rating agencies or us.

The following table summarizes the bond ratings of the investments supporting separate account products which guarantee principal and a specified rate of interest.

Separate Account Bond Ratings

December 31 (In millions)	2006	%	2005	%
U.S. Government and affiliated agency securities	\$	%	\$	%
Other AAA rated	111	26	120	26
AA and A rated	242	56	193	41
BBB rated	75	17	142	31
Non investment-grade	6	1	11	2

Total	\$ 434	100%	\$ 466	100%
--------------	--------	------	--------	------

At December 31, 2006 and 2005, 100% and 98% of the separate account portfolio was issued by U.S. Government and affiliated agencies or was rated by S&P or Moody's. The remaining bonds were rated by other rating agencies or us.

Table of Contents

Non investment-grade bonds, as presented in the tables above, are high-yield securities rated below BBB by bond rating agencies, as well as other unrated securities that, in our opinion, are below investment-grade. High-yield securities generally involve a greater degree of risk than investment-grade securities. However, expected returns should compensate for the added risk. This risk is also considered in the interest rate assumptions for the underlying insurance products.

The carrying value of securities that are either subject to trading restrictions or trade in illiquid private placement markets at December 31, 2006 was \$191 million, which represents 0.4% of our total investment portfolio. These securities were in a net unrealized gain position of \$143 million at December 31, 2006. Of these securities, 80% are priced by unrelated third party sources.

Included in our general account fixed maturity securities at December 31, 2006 were \$13,732 million of asset-backed securities, at fair value, consisting of approximately 63% in collateralized mortgage obligations (CMOs), 21% in corporate asset-backed obligations, 14% in corporate mortgage-backed pass-through certificates and 2% in U.S. Government agency issued pass-through certificates. The majority of CMOs held are actively traded in liquid markets and are primarily priced by a third party pricing service.

The carrying value of the components of the general account short term investment portfolio is presented in the following table.

Short term Investments

	December 31, 2006	December 31, 2005
(In millions)		
Short term investments available-for-sale:		
Commercial paper	\$ 923	\$ 1,906
U.S. Treasury securities	1,093	251
Money market funds	196	294
Other, including collateral held related to securities lending	3,326	1,419
Total short term investments available-for-sale	5,538	3,870
Short term investments trading:		
Commercial paper	43	94
U.S. Treasury securities	2	64
Money market funds	127	200
Other		10
Total short term investments trading	172	368
Total short term investments	\$ 5,710	\$ 4,238

The fair value of collateral held related to securities lending, included in other short term investments, was \$2,851 million and \$767 million at December 31, 2006 and 2005.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES*****Cash Flows***

Our principal operating cash flow sources are premiums and investment income from our insurance subsidiaries. Our primary operating cash flow uses are payments for claims, policy benefits and operating expenses.

For 2006, net cash provided by operating activities was \$2,250 million as compared to \$2,169 million in 2005. Cash provided by operating activities was favorably impacted by increased net sales of trading securities to fund policyholder withdrawals of investment contract products issued by us and increased investment income receipts. Policyholder fund withdrawals are reflected as financing cash flows. Cash provided by operating activities was unfavorably impacted by decreased premium collections, increased tax payments, and increased loss payments.

For 2005, net cash provided by operating activities was \$2,169 million as compared to \$1,968 million in 2004. The increase in cash provided by operations was primarily driven by a reduction in claims and expense payments, including the impact of \$446 million related to commutations. Also impacting operating cash flows were net tax payments of \$164 million in 2005 as compared with net tax refunds of \$627 million in 2004. In addition, we received cash of \$121 million related to interest on a federal income tax settlement in 2005.

Cash flows from investing activities include the purchase and sale of financial instruments, as well as the purchase and sale of businesses, land, buildings, equipment and other assets not generally held for resale.

Net cash used for investing activities was \$1,646 million, \$1,316 million, and \$2,084 million for 2006, 2005, and 2004. Cash flows used by investing activities related principally to purchases of fixed maturity securities and short term investments.

The cash flow from investing activities is impacted by various factors such as the anticipated payment of claims, financing activity, asset/liability management and individual security buy and sell decisions made in the normal course of portfolio management. A consideration in management of the portfolio is the characteristics of the underlying liabilities and the ability to align the duration of the portfolio to those liabilities to meet future liquidity needs and minimize interest rate risk. For portfolios where future liability cash flows are determinable and are generally long term in nature, management segregates assets and related liabilities for asset/liability management purposes. The asset/liability management strategy is used to mitigate valuation changes due to interest rate risk in those specific portfolios. Another consideration in the asset/liability matched portfolios is to maintain a level of income sufficient to support the underlying insurance liabilities.

For those securities in the portfolio that are not part of a segregated asset/liability management strategy, we typically manage the portfolio to a target duration range dictated by the underlying insurance liabilities. In managing these portfolios, securities are bought and sold based on individual security value assessments made, but with the overall goal of meeting the duration targets.

Cash flows from financing activities include proceeds from the issuance of debt and equity securities, outflows for dividends or repayment of debt, outlays to reacquire equity instruments, and deposits and withdrawals related to investment contract products issued by us.

For 2006 and 2005, net cash used for financing activities was \$605 million and \$837 million as compared with net cash provided from financing activities of \$61 million in 2004. Net cash flows used by financing activities in 2006 were primarily related to the return of investment contract balances. Additionally, we issued long-term debt and common stock, the proceeds of which were used to repurchase the Series H Cumulative Preferred Stock Issue (Series H Issue) and to repay our 6.75% notes. See the Loews section below for further discussion.

We believe that our present cash flows from operations, investing activities and financing activities are sufficient to fund our working capital needs.

We have an effective shelf registration statement under which we may issue debt or equity securities.

Commitments, Contingencies, and Guarantees

We have various commitments, contingencies and guarantees which we become involved with during the ordinary course of business. The impact of these commitments, contingencies and guarantees should be considered when evaluating our liquidity and capital resources.

Table of Contents

A summary of our commitments as of December 31, 2006 is presented in the following table.

Contractual Commitments

December 31, 2006 (In millions)	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Debt (a)	3,364	143	604	636	1,981
Lease obligations	234	49	78	56	51
Claim and claim expense reserves (b)	31,398	7,147	9,341	4,810	10,100
Future policy benefits reserves (c)	10,803	346	348	337	9,772
Policyholder funds reserves (c)	994	382	454	9	149
Guaranteed payment contracts (d)	15	12	3		
Total	\$ 46,808	\$ 8,079	\$ 10,828	\$ 5,848	\$ 22,053

(a) Includes estimated future interest payments, but does not include original issue discount.

(b) Claim and claim adjustment expense reserves are not discounted and represent our estimate of the amount and timing of the ultimate settlement and administration of claims based on our assessment of facts and circumstances known as of December 31, 2006. See the Reserves Estimates and Uncertainties section of this MD&A for further information. Claim and claim adjustment expense reserves of \$12 million related

to business which has been 100% ceded to unaffiliated parties in connection with the individual life sale are not included.

- (c) Future policy benefits and policyholder funds reserves are not discounted and represent our estimate of the ultimate amount and timing of the settlement of benefits based on our assessment of facts and circumstances known as of December 31, 2006. Future policy benefit reserves of \$891 million and policyholder fund reserves of \$47 million related to business which has been 100% ceded to unaffiliated parties in connection with the individual life sale are not included. Additional information on future policy benefits and policyholder funds reserves is included in Note A of the Consolidated Financial Statements included under Item 8.
- (d) Primarily relating to telecommunications and software

services.

Further information on our commitments, contingencies and guarantees is provided in Notes B, F, G, I and K of the Consolidated Financial Statements included under Item 8.

Off-Balance Sheet Arrangements

In the course of selling business entities and assets to third parties, we have agreed to indemnify purchasers for losses arising out of breaches of representation and warranties with respect to the business entities or assets being sold, including, in certain cases, losses arising from undisclosed liabilities or certain named litigation. Such indemnification provisions generally survive for periods ranging from nine months following the applicable closing date to the expiration of the relevant statutes of limitation. As of December 31, 2006, the aggregate amount of quantifiable indemnification agreements in effect for sales of business entities, assets and third party loans was \$933 million.

In addition, we have agreed to provide indemnification to third party purchasers for certain losses associated with sold business entities or assets that are not limited by a contractual monetary amount. As of December 31, 2006, we had outstanding unlimited indemnifications in connection with the sales of certain of our business entities or assets that included tax liabilities arising prior to a purchaser's ownership of an entity or asset, defects in title at the time of sale, employee claims arising prior to closing and in some cases losses arising from certain litigation and undisclosed liabilities. These indemnification agreements survive until the applicable statutes of limitation expire, or until the agreed upon contract terms expire. As of December 31, 2006, we have recorded approximately \$28 million of liabilities related to these indemnification agreements.

Other than the items discussed above, we do not have any other off-balance sheet arrangements.

Regulatory Matters

We previously established a plan to reorganize and streamline our U.S. property and casualty insurance legal entity structure in order to realize capital, operational, and cost efficiencies. Another phase of this multi-year plan has been completed with the mergers of thirteen of our U.S. property and casualty insurance entities into other CNA insurance entities. Effective December 31, 2006, twelve companies merged, either directly or indirectly, with and into CIC, and one company merged directly into CCC. We also reduced the number of states in which these entities

Table of Contents

are domiciled as part of this phase. Previous phases of this plan served to consolidate our U.S. property and casualty insurance risks into CCC, as well as realign the capital supporting these risks. In order to facilitate the execution of this plan, we have agreed to participate in a working group consisting of several states of the National Association of Insurance Commissioners (NAIC). Pursuant to our participation in this working group, we have agreed to certain time frames and informational provisions in relation to the reorganization plan.

Along with other companies in the industry, we have received subpoenas, interrogatories and inquiries from: (i) California, Connecticut, Delaware, Florida, Hawaii, Illinois, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, West Virginia and the Canadian Council of Insurance Regulators concerning investigations into practices including contingent compensation arrangements, fictitious quotes and tying arrangements; (ii) the Securities and Exchange Commission (SEC), the New York State Attorney General, the United States Attorney for the Southern District of New York, the Connecticut Attorney General, the Connecticut Department of Insurance, the Delaware Department of Insurance, the Georgia Office of Insurance and Safety Fire Commissioner and the California Department of Insurance concerning reinsurance products and finite insurance products purchased and sold by us; (iii) the Massachusetts Attorney General and the Connecticut Attorney General concerning investigations into anti-competitive practices; and (iv) the New York State Attorney General concerning declinations of attorney malpractice insurance. We continue to respond to these subpoenas, interrogatories and inquiries to the extent they are still open.

Subsequent to receipt of the SEC subpoena, we produced documents and provided additional information at the SEC's request. In addition, the SEC and representatives of the United States Attorney's Office for the Southern District of New York conducted interviews with several of our current and former executives relating to the restatement of our financial results for 2004, including our relationship with and accounting for transactions with an affiliate that were the basis for the restatement. The SEC also requested information relating to our restatement in 2006 of prior period results. It is possible that our analyses of, or accounting treatment for, finite reinsurance contracts or discontinued operations could be questioned or disputed by regulatory authorities. As a result, further restatements of our financial results are possible.

Dividends from Subsidiaries

Our ability to pay dividends and other credit obligations is significantly dependent on receipt of dividends from our subsidiaries. The payment of dividends to us by our insurance subsidiaries without prior approval of the insurance department of each subsidiary's domiciliary jurisdiction is limited by formula. Dividends in excess of these amounts are subject to prior approval by the respective state insurance departments.

Further information on our dividends from subsidiaries is provided in Note L of the Consolidated Financial Statements included under Item 8.

Loews

In December 2002, we sold \$750 million of a new issue of preferred stock, the Series H Issue, to Loews. The Series H Issue accrued cumulative dividends at an initial rate of 8% per year, compounded annually. In August 2006, we repurchased the Series H Issue from Loews for approximately \$993 million, a price equal to the liquidation preference. The Series H Issue dividend amounts through the repurchase date for the years ended December 31, 2006, 2005 and 2004 have been subtracted from Income from Continuing Operations to determine income from continuing operations available to common stockholders in the calculation of earnings per share.

We financed the repurchase of the Series H Issue with the proceeds from our sales of: (i) 7.0 million shares of our common stock in a public offering for approximately \$235.5 million; (ii) \$400 million of new 6.0% five-year senior notes and \$350 million of new 6.5% ten-year senior notes in a public offering; and (iii) 7.86 million shares of our common stock to Loews in a private placement for approximately \$264.5 million. We used the proceeds in excess of the amount used to repurchase the Series H Issue to fund the repayment of our \$250 million outstanding 6.75% senior notes in November 2006.

Ratings

Ratings are an important factor in establishing the competitive position of insurance companies. Our insurance company subsidiaries are rated by major rating agencies, and these ratings reflect the rating agency's opinion of the insurance company's financial strength, operating performance, strategic position and ability to meet our obligations to

policyholders. Agency ratings are not a recommendation to buy, sell or hold any security, and may be revised or
55

Table of Contents

withdrawn at any time by the issuing organization. Each agency's rating should be evaluated independently of any other agency's rating. One or more of these agencies could take action in the future to change the ratings of our insurance subsidiaries.

The table below reflects the various group ratings issued by A.M. Best, Fitch, Moody's and S&P as of January 24, 2007 for the Property and Casualty and Life companies. The table also includes the ratings for our senior debt and Continental senior debt.

	Insurance Financial Strength Ratings (a)		Debt Ratings (a)	
	Property & Casualty CCC Group	Life CAC	CNAF Senior Debt	Continental Senior Debt
A.M. Best	A	A-	bbb	Not rated

Moody's	A3	Baa1	Baa3	Baa3
S&P	A-	BBB+	BBB-	BBB-

(a) A.M. Best, Fitch, Moody's and Standard & Poor's outlooks are stable for our debt and insurance financial strength ratings.

If our property and casualty insurance financial strength ratings were downgraded below current levels, our business and results of operations could be materially adversely affected. The severity of the impact on our business is dependent on the level of downgrade and, for certain products, which rating agency takes the rating action. Among the adverse effects in the event of such downgrades would be the inability to obtain a material volume of business from certain major insurance brokers, the inability to sell a material volume of our insurance products to certain markets and the required collateralization of certain future payment obligations or reserves.

In addition, we believe that a lowering of the debt ratings of Loews by certain of these agencies could result in an adverse impact on our ratings, independent of any change in our circumstances. None of the major rating agencies which rates Loews currently maintains a negative outlook or has Loews on negative Credit Watch.

We have entered into several settlement agreements and assumed reinsurance contracts that require collateralization of future payment obligations and assumed reserves if our ratings or other specific criteria fall below certain thresholds. The ratings triggers are generally more than one level below our current ratings.

Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurement (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with GAAP and expands disclosures about fair value measurements. SFAS 157 retains the exchange price notion in the definition of fair value and clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact for the asset or liability. SFAS 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement and the fair value measurement should

be determined based on the assumptions that market participants would use in pricing the asset or liability. SFAS 157 expands disclosures surrounding the use of fair value to measure assets and liabilities and specifically focuses on the sources used to measure fair value. In instances of recurring use of fair value measures using unobservable inputs, SFAS 157 requires separate disclosure of the effect on earnings for the period. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within the year of adoption. We are currently evaluating the impact that adopting SFAS 157 will have on our results of operations and financial condition.

In January 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments (SFAS 155). SFAS 155 amends SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133), and SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (SFAS 140). SFAS 155 also resolves issues addressed in SFAS 133 Implementation Issue No. D1,

Table of Contents

Application of Statement 133 to Beneficial Interests in Securitized Financial Assets. SFAS 155 will improve financial reporting by eliminating the exemption from applying SFAS 133 to interests in certain securitized financial assets so that similar instruments are accounted for in the same manner regardless of the form of the instruments. SFAS 155 will also improve financial reporting by allowing a preparer to elect fair value measurement at acquisition, at issuance, or when a previously recognized financial instrument is subject to a remeasurement (new basis) event, on an instrument-by-instrument basis. SFAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The fair value election provided for in paragraph 4(c) of SFAS 155 may also be applied upon adoption of SFAS 155 for hybrid financial instruments that had been bifurcated under paragraph 12 of SFAS 133 prior to the adoption of this Statement. Provisions of SFAS 155 may be applied to instruments that an entity holds at the date of adoption on an instrument-by-instrument basis. Adoption of SFAS 155 is not expected to have a significant impact on the carrying value of securities currently held or acquired subsequent to January 1, 2007.

In January 2007, the FASB released SFAS 133 Implementation Issue No. B40, Embedded Derivatives: Application of Paragraph 13(b) to Securitized Interests in Prepayable Financial Assets (Issue B40). Issue B40 provides a narrow scope exception from paragraph 13(b) of SFAS 133 for securitized interests that meet certain criteria and contain only an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets. Issue B40 shall be applied upon adoption of SFAS 155. Adoption of Issue B40 in conjunction with SFAS 155 is not expected to have a significant impact on the carrying value of securities currently held or acquired subsequent to January 1, 2007.

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants issued Statement of Position (SOP) No. 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts (SOP 05-1). SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in SFAS No. 97, Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments. SOP 05-1 defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. SOP 05-1 is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. Adoption of SOP 05-1 is not expected to have a significant impact on our results of operations or financial condition.

See Note A of the Consolidated Financial Statements included under Item 8 for additional information regarding accounting pronouncements.

FORWARD-LOOKING STATEMENTS

This report contains a number of forward-looking statements which relate to anticipated future events rather than actual present conditions or historical events. You can identify forward-looking statements because generally they include words such as believes, expects, intends, anticipates, estimates, and similar expressions. Forward-looking statements in this report include any and all statements regarding expected developments in our insurance business, including losses and loss reserves for asbestos, environmental pollution and mass tort claims which are more uncertain, and therefore more difficult to estimate than loss reserves respecting traditional property and casualty exposures; the impact of routine ongoing insurance reserve reviews we are conducting; our expectations concerning our revenues, earnings, expenses and investment activities; expected cost savings and other results from our expense reduction and restructuring activities; and our proposed actions in response to trends in our business. Forward-looking statements, by their nature, are subject to a variety of inherent risks and uncertainties that could cause actual results to differ materially from the results projected in the forward-looking statement. We cannot control many of these risks and uncertainties. Some examples of these risks and uncertainties are:

- general economic and business conditions, including inflationary pressures on medical care costs, construction costs and other economic sectors that increase the severity of claims;

- changes in financial markets such as fluctuations in interest rates, long term periods of low interest rates, credit conditions and currency, commodity and stock prices;

the effects of corporate bankruptcies, such as Enron and WorldCom, on capital markets, and on the markets for D&O and errors and omissions coverages;

57

Table of Contents

changes in foreign or domestic political, social and economic conditions;

regulatory initiatives and compliance with governmental regulations, judicial decisions, including interpretation of policy provisions, decisions regarding coverage and theories of liability, trends in litigation and the outcome of any litigation involving us, and rulings and changes in tax laws and regulations;

effects upon insurance markets and upon industry business practices and relationships of current litigation, investigations and regulatory activity by the New York State Attorney General's office and other authorities concerning contingent commission arrangements with brokers and bid solicitation activities;

legal and regulatory activities with respect to certain non-traditional and finite-risk insurance products, and possible resulting changes in accounting and financial reporting in relation to such products, including our restatement of financial results in May of 2005 and our relationship with an affiliate, Accord Re Ltd., as disclosed in connection with that restatement;

regulatory limitations, impositions and restrictions upon us, including the effects of assessments and other surcharges for guaranty funds and second-injury funds and other mandatory pooling arrangements;

the impact of competitive products, policies and pricing and the competitive environment in which we operate, including changes in our book of business;

product and policy availability and demand and market responses, including the level of ability to obtain rate increases and decline or non-renew under priced accounts, to achieve premium targets and profitability and to realize growth and retention estimates;

development of claims and the impact on loss reserves, including changes in claim settlement policies;

the effectiveness of current initiatives by claims management to reduce loss and expense ratios through more efficacious claims handling techniques;

the performance of reinsurance companies under reinsurance contracts with us;

results of financing efforts, including the availability of bank credit facilities;

changes in our composition of operating segments;

weather and other natural physical events, including the severity and frequency of storms, hail, snowfall and other winter conditions, natural disasters such as hurricanes and earthquakes, as well as climate change, including effects on weather patterns, greenhouse gases, sea, land and air temperatures, sea levels, rain and snow;

man-made disasters, including the possible occurrence of terrorist attacks and the effect of the absence or insufficiency of applicable terrorism legislation on coverages;

the unpredictability of the nature, targets, severity or frequency of potential terrorist events, as well as the uncertainty as to our ability to contain our terrorism exposure effectively, notwithstanding the extension through December 31, 2007 of the Terrorism Risk Insurance Act of 2002;

the occurrence of epidemics;

exposure to liabilities due to claims made by insureds and others relating to asbestos remediation and health-based asbestos impairments, as well as exposure to liabilities for environmental pollution, mass tort, construction defect claims and exposure to liabilities due to claims made by insureds and others relating to lead-based paint;

whether a national privately financed trust to replace litigation of asbestos claims with payments to claimants from the trust will be established or approved through federal legislation, or, if established and approved, whether it will contain funding requirements in excess of our established loss reserves or carried loss reserves;

the sufficiency of our loss reserves and the possibility of future increases in reserves;

regulatory limitations and restrictions, including limitations upon our ability to receive dividends from our insurance subsidiaries imposed by state regulatory agencies and minimum risk-based capital standards established by the National Association of Insurance Commissioners;

Table of Contents

the risks and uncertainties associated with our loss reserves as outlined in the Critical Accounting Estimates and the Reserves Estimates and Uncertainties sections of this MD&A;

the level of success in integrating acquired businesses and operations, and in consolidating, or selling existing ones;

the possibility of further changes in our ratings by ratings agencies, including the inability to access certain markets or distribution channels and the required collateralization of future payment obligations as a result of such changes, and changes in rating agency policies and practices; and

the actual closing of contemplated transactions and agreements.

Our forward-looking statements speak only as of the date on which they are made and we do not undertake any obligation to update or revise any forward-looking statement to reflect events or circumstances after the date of the statement, even if our expectations or any related events or circumstances change.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is a broad term related to changes in the fair value of a financial instrument. Discussions herein regarding market risk focus on only one element of market risk, which is price risk. Price risk relates to changes in the level of prices due to changes in interest rates, equity prices, foreign exchange rates or other factors that relate to market volatility of the rate, index or price underlying the financial instrument. Our primary market risk exposures are due to changes in interest rates, although we have certain exposures to changes in equity prices and foreign currency exchange rates. The fair value of the financial instruments is adversely affected when interest rates rise, equity markets decline and the dollar strengthens against foreign currency.

Active management of market risk is integral to our operations. We may use the following tools to manage our exposure to market risk within defined tolerance ranges: (1) change the character of future investments purchased or sold, (2) use derivatives to offset the market behavior of existing assets and liabilities or assets expected to be purchased and liabilities to be incurred, or (3) rebalance our existing asset and liability portfolios.

Sensitivity Analysis

We monitor our sensitivity to interest rate risk by evaluating the change in the value of financial assets and liabilities due to fluctuations in interest rates. The evaluation is performed by applying an instantaneous change in interest rates of varying magnitudes on a static balance sheet to determine the effect such a change in rates would have on our fair value at risk and the resulting effect on stockholders' equity. The analysis presents the sensitivity of the fair value of our financial instruments to selected changes in market rates and prices. The range of change chosen reflects our view of changes that are reasonably possible over a one-year period. The selection of the range of values chosen to represent changes in interest rates should not be construed as our prediction of future market events, but rather an illustration of the impact of such events.

The sensitivity analysis estimates the decline in the fair value of our interest sensitive assets and liabilities that were held on December 31, 2006 and December 31, 2005 due to instantaneous parallel increases in the period end yield curve of 100 and 150 basis points.

The sensitivity analysis also assumes an instantaneous 10% and 20% decline in the foreign currency exchange rates versus the United States dollar from their levels at December 31, 2006 and December 31, 2005, with all other variables held constant.

Equity price risk was measured assuming an instantaneous 10% and 25% decline in the S&P 500 Index (Index) from its level at December 31, 2006 and December 31, 2005, with all other variables held constant. Our equity holdings were assumed to be highly and positively correlated with the Index. At December 31, 2006, a 10% and 25% decrease in the Index would result in a \$265 million and \$662 million decrease compared to a \$227 million and \$567 million decrease at December 31, 2005, in the market value of our equity investments.

Of these amounts, under the 10% and 25% scenarios, \$4 million and \$10 million at December 31, 2006 and \$4 million and \$11 million at December 31, 2005 pertained to decreases in the fair value of the separate account investments. These decreases would substantially be offset by decreases in related separate account liabilities to customers. Similarly, increases in the fair value of the separate account equity investments would also be offset by increases in the same related separate account liabilities by the same approximate amounts.

Table of Contents

The following tables present the estimated effects on the fair value of our financial instruments at December 31, 2006 and December 31, 2005, due to an increase in interest rates of 100 basis points, a 10% decline in foreign currency exchange rates and a 10% decline in the Index.

Table of Contents**Notes to Consolidated Financial Statements****Note A. Summary of Significant Accounting Policies*****Basis of Presentation***

The Consolidated Financial Statements include the accounts of CNA Financial Corporation (CNAF) and its controlled subsidiaries. Collectively, CNAF and its subsidiaries are referred to as CNA or the Company. CNA's property and casualty and the remaining life and group insurance operations are primarily conducted by Continental Casualty Company (CCC), The Continental Insurance Company (CIC) and Continental Assurance Company (CAC). Loews Corporation (Loews) owned approximately 89% of the outstanding common stock of CNAF as of December 31, 2006.

The Company's individual life insurance business, including its previously wholly-owned subsidiary Valley Forge Life Insurance Company (VFL), was sold on April 30, 2004 to Swiss Re Life & Health America Inc. (Swiss Re). The results of the individual life insurance business sold through the date of sale are included in the Consolidated Statement of Operations for the year ended December 31, 2004. See Note P for further information.

The accompanying Consolidated Financial Statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). All significant intercompany amounts have been eliminated. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. The amounts presented on the December 31, 2005 Consolidated Balance Sheet related to Insurance receivables and Other liabilities have been corrected from \$1,866 million and \$2,283 million to \$2,096 million and \$2,513 million, to conform to the 2006 presentation. The correction of \$230 million relates to balances payable to insureds that were previously reflected as a deduction from insurance receivables and are currently reflected as liabilities. The balances are principally related to amounts deposited with the Company by customers, such as amounts related to the funding of deductible obligations.

Business

CNA's core property and casualty insurance operations are reported in two business segments: Standard Lines and Specialty Lines. CNA's non-core operations are managed in two segments: Life and Group Non-Core and Corporate and Other Non-Core.

CNA serves a wide variety of customers, including small, medium and large businesses; insurance companies; associations; professionals; and groups and individuals with a broad range of insurance and risk management products and services.

Core insurance products include property and casualty coverages. Non-core insurance products, which primarily have been sold or placed in run-off, include life and accident and health insurance; retirement products and annuities; and property and casualty reinsurance. CNA services include risk management, information services and claims administration. CNA's products and services are marketed through independent agents, brokers, managing general agents and direct sales.

Insurance Operations

Premiums: Insurance premiums on property and casualty and accident and health insurance contracts are recognized in proportion to the underlying risk insured which principally are earned ratably over the duration of the policies after deductions for ceded insurance premiums. The reserve for unearned premiums on these contracts represents the portion of premiums written relating to the unexpired terms of coverage.

An estimated allowance for doubtful accounts is recorded on the basis of periodic evaluations of balances due currently or in the future from insureds, including amounts due from insureds related to losses under high deductible policies, management's experience and current economic conditions.

Table of Contents

Property and casualty contracts that are retrospectively rated contain provisions that result in an adjustment to the initial policy premium depending on the contract provisions and loss experience of the insured during the experience period. For such contracts, the Company estimates the amount of ultimate premiums that the Company may earn upon completion of the experience period and recognizes either an asset or a liability for the difference between the initial policy premium and the estimated ultimate premium. The Company adjusts such estimated ultimate premium amounts during the course of the experience period based on actual results to date. The resulting adjustment is recorded as either a reduction of or an increase to the earned premiums for the period.

Premiums for life insurance products and annuities are recognized as revenue when due after deductions for ceded insurance premiums.

Claim and claim adjustment expense reserves: Claim and claim adjustment expense reserves, except reserves for structured settlements not associated with asbestos and environmental pollution and mass tort (APMT), workers compensation lifetime claims, accident and health claims and certain claims associated with discontinued operations, are not discounted and are based on 1) case basis estimates for losses reported on direct business, adjusted in the aggregate for ultimate loss expectations; 2) estimates of incurred but not reported losses; 3) estimates of losses on assumed reinsurance; 4) estimates of future expenses to be incurred in the settlement of claims; 5) estimates of salvage and subrogation recoveries and 6) estimates of amounts due from insureds related to losses under high deductible policies. Management considers current conditions and trends as well as past Company and industry experience in establishing these estimates. The effects of inflation, which can be significant, are implicitly considered in the reserving process and are part of the recorded reserve balance. Ceded claim and claim adjustment expense reserves are reported as a component of Reinsurance receivables in the Consolidated Balance Sheets. See Note Q for further information on claim and claim adjustment expense reserves for discontinued operations.

Claim and claim adjustment expense reserves are presented net of anticipated amounts due from insureds related to losses under high deductible policies of \$2.5 billion and \$2.8 billion as of December 31, 2006 and 2005. A portion of these amounts is supported by collateral. The Company also has an allowance for uncollectible deductible amounts, which is presented as a component of the allowance for doubtful accounts included in the Insurance receivables on the Consolidated Balance Sheets.

Structured settlements have been negotiated for certain property and casualty insurance claims. Structured settlements are agreements to provide fixed periodic payments to claimants. Certain structured settlements are funded by annuities purchased from CAC for which the related annuity obligations are reported in future policy benefits reserves. Obligations for structured settlements not funded by annuities are included in claim and claim adjustment expense reserves and carried at present values determined using interest rates ranging from 4.6% to 7.5% at December 31, 2006 and 2005. At December 31, 2006 and 2005, the discounted reserves for unfunded structured settlements were \$814 million and \$843 million, net of discount of \$1,250 million and \$1,309 million.

Workers compensation lifetime claim reserves are calculated using mortality assumptions determined through statutory regulation and economic factors. Accident and health claim reserves are calculated using mortality and morbidity assumptions based on Company and industry experience. Workers compensation lifetime claim reserves and accident and health claim reserves are discounted at interest rates that range from 3.5% to 6.5% at December 31, 2006 and 2005. At December 31, 2006 and 2005, such discounted reserves totaled \$1,284 million and \$1,238 million, net of discount of \$416 million and \$430 million.

Future policy benefits reserves: Reserves for long term care products are computed using the net level premium method, which incorporates actuarial assumptions as to interest rates, mortality, morbidity, persistency, withdrawals and expenses. Actuarial assumptions generally vary by plan, age at issue and policy duration, and include a margin for adverse deviation. Interest rates range from 6.0% to 8.6% at December 31, 2006 and 2005, and mortality, morbidity and withdrawal assumptions are based on Company and industry experience prevailing at the time of issue. Expense assumptions include the estimated effects of inflation and expenses to be incurred beyond the premium paying period. The net reserves for traditional life insurance products (whole and term life products) including interest-sensitive contracts were ceded on a 100% indemnity reinsurance basis to Swiss Re in connection with the sale of the individual life insurance business. See Note P for further information.

Policyholders funds reserves: Policyholders funds reserves primarily include reserves for investment contracts without life contingencies. For these contracts, policyholder liabilities are equal to the accumulated policy account values, which consist of an accumulation of deposit payments plus credited interest, less withdrawals and amounts assessed through the end of the period.

Table of Contents

Guaranty fund and other insurance-related assessments: Liabilities for guaranty fund and other insurance-related assessments are accrued when an assessment is probable, when it can be reasonably estimated, and when the event obligating the entity to pay an imposed or probable assessment has occurred. Liabilities for guaranty funds and other insurance-related assessments are not discounted and are included as part of Other liabilities in the Consolidated Balance Sheets. As of December 31, 2006 and 2005, the liability balances were \$189 million and \$185 million. As of December 31, 2006 and 2005, included in other assets were \$7 million and \$10 million of related assets for premium tax offsets. The related asset is limited to the amount that is able to be assessed on future premium collections from business written or committed to be written.

Reinsurance: Amounts recoverable from reinsurers are estimated in a manner consistent with claim and claim adjustment expense reserves or future policy benefits reserves and are reported as receivables in the Consolidated Balance Sheets. The cost of reinsurance is primarily accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. The ceding of insurance does not discharge the primary liability of the Company. An estimated allowance for doubtful accounts is recorded on the basis of periodic evaluations of balances due from reinsurers, reinsurer solvency, management's experience and current economic conditions. The expenses incurred related to uncollectible reinsurance receivables are presented as a component of Insurance claims and policyholders' benefits in the Consolidated Statements of Operations.

Reinsurance contracts that do not effectively transfer the underlying economic risk of loss on policies written by the Company are recorded using the deposit method of accounting, which requires that premium paid or received by the ceding company or assuming company be accounted for as a deposit asset or liability. At December 31, 2006 and 2005, the Company had approximately \$104 million and \$171 million recorded as deposit assets and \$71 million and \$111 million recorded as deposit liabilities.

Income on reinsurance contracts accounted for under the deposit method is recognized using an effective yield based on the anticipated timing of payments and the remaining life of the contract. When the estimate of timing of payments changes, the effective yield is recalculated to reflect actual payments to date and the estimated timing of future payments. The deposit asset or liability is adjusted to the amount that would have existed had the new effective yield been applied since the inception of the contract. This adjustment is reflected in other revenue or other operating expense as appropriate.

Participating insurance: Policyholder dividends are accrued using an estimate of the amount to be paid based on underlying contractual obligations under policies and applicable state laws. When limitations exist on the amount of net income from participating life insurance contracts that may be distributed to shareholders, the share of net income on those policies that cannot be distributed to shareholders is excluded from stockholders' equity by a charge to operations and the establishment of a corresponding liability.

Deferred acquisition costs: Acquisition costs include commissions, premium taxes and certain underwriting and policy issuance costs which vary with and are related primarily to the acquisition of business. Such costs related to property and casualty business are deferred and amortized ratably over the period the related premiums are earned.

Deferred acquisition costs related to accident and health insurance are amortized over the premium-paying period of the related policies using assumptions consistent with those used for computing future policy benefits reserves for such contracts. Assumptions as to anticipated premiums are made at the date of policy issuance or acquisition and are consistently applied during the lives of the contracts. Deviations from estimated experience are included in results of operations when they occur. For these contracts, the amortization period is typically the estimated life of the policy.

Anticipated investment income is considered in the determination of the recoverability of deferred acquisition costs. Deferred acquisition costs are recorded net of ceding commissions and other ceded acquisition costs. The Company evaluates deferred acquisition costs for recoverability. Adjustments, if necessary, are recorded in current results of operations.

Investments in life settlement contracts and related revenue recognition: The Company has purchased investments in life settlement contracts. Under a life settlement contract, CNA obtains the rights of being the owner and beneficiary to an underlying life insurance policy. The carrying value of each contract at purchase and at the end of each reporting period is equal to the cash surrender value of the policy. Amounts paid to purchase these contracts that are in excess of the cash surrender value, at the date of purchase, were expensed immediately.

Table of Contents

Periodic maintenance costs, such as premiums, necessary to keep the underlying policy in force are expensed as incurred and are included in other operating expenses. Revenue is recognized and included in Other revenue in the Consolidated Statements of Operations when the life insurance policy underlying the life settlement contract matures. See the Accounting Pronouncements section of this note for further discussion of Financial Accounting Standards Board (FASB) Staff Position No. 85-4-1, Accounting for Life Settlement Contracts by Third-Party Investors.

Separate Account Business

Separate account assets and liabilities represent contract holder funds related to investment and annuity products, which are segregated into accounts with specific underlying investment objectives. The assets and liabilities of these contracts are legally segregated and reported as assets and liabilities of the separate account business. Substantially all assets of the separate account business are carried at fair value. Separate account liabilities are carried at contract values. Net income accruing to the Company related to separate accounts is primarily included within Other revenue on the Consolidated Statements of Operations.

Investments

Valuation of investments: CNA classifies its fixed maturity securities (bonds and redeemable preferred stocks) and its equity securities as either available-for-sale or trading, and as such, they are carried at fair value. Changes in fair value of trading securities are reported within net investment income. The amortized cost of fixed maturity securities classified as available-for-sale is adjusted for amortization of premiums and accretion of discounts to maturity, which are included in net investment income. Changes in fair value related to available-for-sale securities are reported as a component of other comprehensive income. Investments are written down to fair value and losses are recognized in Realized investment gains (losses) on the Consolidated Statements of Operations when a decline in value is determined to be other-than-temporary.

For asset-backed securities included in fixed maturity securities, the Company recognizes income using an effective yield based on anticipated prepayments and the estimated economic life of the securities. When estimates of prepayments change, the effective yield is recalculated to reflect actual payments to date and anticipated future payments. The net investment in the securities is adjusted to the amount that would have existed had the new effective yield been applied since the acquisition of the securities. Such adjustments are reflected in net investment income.

The Company's limited partnership investments are recorded at fair value and typically reflect a reporting lag of up to three months. Fair value represents CNA's equity in the partnership's net assets as determined by the General Partner. Changes in fair value, which represents changes in partnership's net assets, are recorded within net investment income. The majority of the limited partnerships invest in a substantial number of securities that are readily marketable. The Company is primarily a passive investor in such partnerships and does not have influence over the partnerships management, who are committed to operate them according to established guidelines and strategies. These strategies may include the use of leverage and hedging techniques that potentially introduce more volatility and risk to the partnerships. In accordance with FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51 (FIN 46R), the Company has consolidated three limited partnerships, which were previously accounted for using the equity method.

Other invested assets include certain derivative securities and real estate investments. Investments in derivative securities are carried at fair value with changes in fair value reported as a component of realized gains or losses or other comprehensive income, depending on their hedge designation. Changes in the fair value of derivative securities which are not designated as hedges, are reported as a component of realized gains or losses. Real estate investments are carried at the lower of cost or market value. Short term investments are generally carried at cost, which approximates fair value.

Realized investment gains and losses: All securities sold resulting in investment gains and losses are recorded on the trade date, except for bank loan participations which are recorded on the date that the legal agreements are finalized. Realized investment gains and losses are determined on the basis of the cost or amortized cost of the specific securities sold.

Equity in unconsolidated affiliates: CNA uses the equity method of accounting for investments in companies in which its ownership interest of the voting shares of an investee company enables CNA to influence the operating or

Table of Contents

financial decisions of the investee company, but CNA's interest in the investee does not require consolidation. CNA's proportionate share of equity in net income of these unconsolidated affiliates is reported in other revenues.

Securities lending activities: CNA lends securities to unrelated parties, primarily major brokerage firms. Borrowers of these securities must deposit collateral with CNA of at least 102% of the fair value of the securities loaned if the collateral is cash or securities. CNA maintains effective control over all loaned securities and, therefore, continues to report such securities as Fixed maturity securities in the Consolidated Balance Sheets.

Cash collateral received on these transactions is invested in short term investments with an offsetting liability recognized for the obligation to return the collateral. Non-cash collateral, such as securities or letters of credit, received by the Company are not reflected as assets of the Company as there exists no right to sell or repledge the collateral. The fair value of collateral held and included in short term investments was \$2,851 million and \$767 million at December 31, 2006 and 2005. The fair value of non-cash collateral was \$385 million and \$138 million at December 31, 2006 and 2005.

Derivative Financial Instruments

All investments in derivatives are recorded at fair value. A derivative is typically defined as an instrument whose value is derived from an underlying instrument, index or rate, has a notional amount, requires little or no initial investment and can be net settled. Derivatives include, but are not limited to, the following types of financial instruments: interest rate swaps, interest rate caps and floors, put and call options, warrants, futures, forwards, commitments to purchase securities, credit default swaps and combinations of the foregoing. Derivatives embedded within non-derivative instruments (such as call options embedded in convertible bonds) must be separated from the host instrument when the embedded derivative is not clearly and closely related to the host instrument.

The Company's derivatives are reported as other invested assets or other liabilities. Embedded derivative instruments subject to bifurcation are reported together with the host contract, at fair value. If certain criteria are met, a derivative may be specifically designated as a hedge of exposures to changes in fair value, cash flows or foreign currency exchange rates. The accounting for changes in the fair value of a derivative depends on the intended use of the derivative, the nature of any hedge designation thereon and whether the derivative was transacted in a designated trading portfolio.

The Company's accounting for changes in the fair value of general account derivatives is as follows:

Nature of Hedge Designation	Derivative's Change in Fair Value Reflected In:
No hedge designation	Realized investment gains or losses
Fair value designation	Realized investment gains or losses, along with the change in fair value of the hedged asset or liability that is attributable to the hedged risk
Cash flow designation	Other comprehensive income, with subsequent reclassification to earnings when the hedged transaction, asset or liability impacts earnings
Foreign currency designation	Consistent with fair value or cash flow above, depending on the nature of the hedging relationship

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedging transactions. The Company also formally assesses (both at the hedge's inception and on an ongoing basis) whether the derivatives that are used in hedging transactions have been highly effective in offsetting changes in fair value or cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. When it is determined that a derivative for which hedge accounting has been designated is not (or ceases to be) highly effective, the Company discontinues hedge accounting prospectively.

Separate account investments held in designated trading portfolios are carried at fair value with changes therein reflected in investment income. Hedge accounting on derivatives in these separate accounts is generally not applicable.

Table of Contents

The Company uses derivatives in the normal course of business, primarily in an attempt to reduce its exposure to market risk (principally interest rate risk, equity stock price risk and foreign currency risk) stemming from various assets and liabilities and credit risk (the ability of an obligor to make timely payment of principal and/or interest). The Company's principal objective under such risk strategies is to achieve the desired reduction in economic risk, even if the position will not receive hedge accounting treatment.

The Company's use of derivatives is limited by statutes and regulations promulgated by the various regulatory bodies to which it is subject, and by its own derivative policy. The derivative policy limits the authorization to initiate derivative transactions to certain personnel. Derivatives entered into for hedging, regardless of the choice to designate hedge accounting, shall have a maturity that effectively correlates to the underlying hedged asset or liability. The policy prohibits the use of derivatives containing greater than one-to-one leverage with respect to changes in the underlying price, rate or index. The policy also prohibits the use of borrowed funds, including funds obtained through securities lending, to engage in derivative transactions.

Credit exposure associated with non-performance by the counterparties to derivative instruments is generally limited to the uncollateralized fair value of the asset related to the instruments recognized in the Consolidated Balance Sheets. The Company attempts to mitigate the risk of non-performance by monitoring the creditworthiness of counterparties and diversifying derivatives to multiple counterparties. The Company generally requires that all over-the-counter derivative contracts be governed by an International Swaps and Derivatives Association (ISDA) Master Agreement, and exchanges collateral under the terms of these agreements with its derivative investment counterparties depending on the amount of the exposure and the credit rating of the counterparty.

The Company has exposure to economic losses due to interest rate risk arising from changes in the level of, or volatility of, interest rates. The Company attempts to mitigate its exposure to interest rate risk through portfolio management, which includes rebalancing its existing portfolios of assets and liabilities, as well as changing the characteristics of investments to be purchased or sold in the future. In addition, various derivative financial instruments are used to modify the interest rate risk exposures of certain assets and liabilities. These strategies include the use of interest rate swaps, interest rate caps and floors, options, futures, forwards and commitments to purchase securities. These instruments are generally used to lock interest rates or market values, to shorten or lengthen durations of fixed maturity securities or investment contracts, or to hedge (on an economic basis) interest rate risks associated with investments and variable rate debt. The Company has used these types of instruments as designated hedges against specific assets or liabilities on an infrequent basis.

The Company is exposed to equity price risk as a result of its investment in equity securities and equity derivatives. Equity price risk results from changes in the level or volatility of equity prices, which affect the value of equity securities, or instruments that derive their value from such securities. CNA attempts to mitigate its exposure to such risks by limiting its investment in any one security or index. The Company may also manage this risk by utilizing instruments such as options, swaps, futures and collars to protect appreciation in securities held. CNA uses derivatives in one of its separate accounts to mitigate equity price risk associated with its indexed group annuity contracts by purchasing Standard & Poor's 500® (S&P 500®) index futures contracts in a notional amount equal to the contract holder liability.

The Company has exposure to credit risk arising from the uncertainty associated with a financial instrument obligor's ability to make timely principal and/or interest payments. The Company attempts to mitigate this risk by limiting credit concentrations, practicing diversification, and frequently monitoring the credit quality of issuers and counterparties. In addition the Company may utilize credit derivatives such as credit default swaps to modify the credit risk inherent in certain investments. Credit default swaps involve a transfer of credit risk from one party to another in exchange for periodic payments. The Company infrequently designates these types of instruments as hedges against specific assets.

Foreign exchange rate risk arises from the possibility that changes in foreign currency exchange rates will impact the fair value of financial instruments denominated in a foreign currency. The Company's foreign transactions are primarily denominated in British pounds, Euros and Canadian dollars. The Company typically manages this risk via asset/liability currency matching and through the use of foreign currency forwards. The Company has infrequently designated these types of instruments as hedges against specific assets or liabilities.

The contractual or notional amounts for derivatives are used to calculate the exchange of contractual payments under the agreements and are not representative of the potential for gain or loss on these instruments. Interest rates, equity prices and foreign currency exchange rates affect the fair value of derivatives. The fair values generally

Table of Contents

represent the estimated amounts that CNA would expect to receive or pay upon termination of the contracts at the reporting date. Dealer quotes are available for substantially all of CNA's derivatives. For derivative instruments not actively traded, fair values are estimated using values obtained from independent pricing services, costs to settle or quoted market prices of comparable instruments.

The Company is required to provide collateral for all exchange-traded futures and options contracts. These margin requirements are determined by the individual exchanges based on the fair value of the open positions and are in the custody of the exchange. Collateral may also be required for over-the-counter contracts such as interest rate swaps, credit default swaps and currency forwards per the ISDA agreements in place. The fair value of collateral provided was \$58 million at December 31, 2006 and consisted primarily of cash. The fair value of the collateral at December 31, 2005 was \$66 million and consisted primarily of U.S. Treasury Bills, which the Company had access to subject to replacement and therefore remained recorded as a component of Short term investments on the Consolidated Balance Sheets.

Income Taxes

The Company and its eligible subsidiaries (CNA Tax Group) are included in the consolidated federal income tax return of Loews and its eligible subsidiaries. The Company accounts for income taxes under the asset and liability method. Under the asset and liability method, deferred income taxes are recognized for temporary differences between the financial statement and tax return bases of assets and liabilities. Future tax benefits are recognized to the extent that realization of such benefits is more likely than not.

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Depreciation is based on the estimated useful lives of the various classes of property and equipment and is determined principally on the straight-line method. Furniture and fixtures are depreciated over seven years. Office equipment is depreciated over five years. The estimated lives for data processing equipment and software range from three to five years. Leasehold improvements are depreciated over the corresponding lease terms.

Goodwill and Other Intangible Assets

Goodwill and other indefinite-lived intangible assets of \$142 million and \$146 million as of December 31, 2006 and 2005 primarily represents the excess of purchase price over the fair value of the net assets of acquired entities and businesses. The balance at December 31, 2006 and 2005 primarily related to Specialty Lines. During 2006, the Company determined that goodwill and other intangible assets of approximately \$4 million was impaired related to the Standard Lines segment. Goodwill and indefinite-lived intangible assets are tested for impairment annually or when certain triggering events require such tests.

Earnings per Share Data

Earnings per share available to common stockholders is based on weighted average outstanding shares. Basic earnings per share excludes dilution and is computed by dividing net income attributable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock.

The Series H Cumulative Preferred Stock Issue (Series H Issue) was held by Loews and accrued cumulative dividends at an initial rate of 8% per year, compounded annually. In August 2006, the Company repurchased the Series H Issue from Loews for approximately \$993 million, a price equal to the liquidation preference. The Series H Issue dividend amounts through the repurchase date for the years ended December 31, 2006, 2005 and 2004 have been subtracted from Income from Continuing Operations to determine income from continuing operations available to common stockholders.

Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. For the years ended December 31, 2006, 2005 and 2004, approximately one million shares attributable to exercises under stock-based employee compensation plans were excluded from the calculation of diluted earnings per share because they were antidilutive.

Table of Contents

The computation of earnings per share is as follows:

Earnings Per Share

Years ended December 31 (In millions, except per share amounts)	2006	2005	2004
Income from continuing operations	\$ 1,137	\$ 243	\$ 446
Less: undeclared preferred stock dividend through repurchase date	(46)	(70)	(65)
Income from continuing operations available to common stockholders	\$ 1,091	\$ 173	\$ 381
Weighted average outstanding common stock and common stock equivalents	262.1	256.0	256.0
Effect of dilutive securities, employee stock options	0.2		
Adjusted weighted average outstanding common stock and common stock equivalents assuming conversions	262.3	256.0	256.0
Basic earnings per share from continuing operations available to common stockholders	\$ 4.17	\$ 0.68	\$ 1.49
Diluted earnings per share from continuing operations available to common stockholders	\$ 4.16	\$ 0.68	\$ 1.49

The following table illustrates the effect on net income and earnings per share data if the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation (SFAS 123) to stock-based employee compensation under the Company's stock-based compensation plans for the years ended 2005 and 2004.

Pro Forma Effect of SFAS 123 on Results

Years ended December 31 (In millions, except per share amounts)	2005	2004
Income from continuing operations	\$ 243	\$ 446
Less: undeclared preferred stock dividend	(70)	(65)
Income from continuing operations available to common stockholders	173	381
Income (loss) from discontinued operations, net of tax	21	(21)
Net income available to common stockholders	194	360
Less: Total stock-based compensation cost determined under the fair value method, net of tax	(2)	(2)

Pro forma net income available to common stockholders	\$ 192	\$ 358
Basic and diluted earnings per share, as reported	\$ 0.76	\$ 1.40
Basic and diluted earnings per share, pro forma	\$ 0.75	\$ 1.39

Supplementary Cash Flow Information

Cash payments made for interest were \$109 million, \$139 million and \$123 million for the years ended December 31, 2006, 2005 and 2004. Cash payments made for federal income taxes were \$173 million and \$164 million for the years ended December 31, 2006 and 2005. Cash refunds received for federal income taxes amounted to \$627 million for the year ended December 31, 2004.

Accounting Pronouncements

In May of 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Correction (SFAS 154). This standard is a replacement of Accounting Policy Board Opinion No. 20, Accounting Changes, and FASB Standard No. 3, Reporting Accounting Changes in Interim Financial Statements. Under the new standard, any voluntary changes in accounting principles should be adopted via a retrospective application of the accounting principle in the financial statements presented in addition to obtaining an opinion from the auditors that the new principle is

Table of Contents

preferred. In addition, adoption of a change in accounting principle required by the issuance of a new accounting standard would also require retroactive restatement, unless the new standard includes explicit transition guidelines. SFAS 154 was effective for fiscal years beginning after December 15, 2005 and was adopted by the Company as of January 1, 2006. Adoption of SFAS 154 did not have an impact on the results of operations or equity of the Company. In November of 2005, the FASB issued FASB Staff Position (FSP) No. 115-1 and FAS 124-1, The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments (FSP 115-1), as applicable to debt and equity securities that are within the scope of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities (SFAS 115) and equity securities that are accounted for using the cost method specified in Accounting Principles Board Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. FSP 115-1 nullified certain requirements of The Emerging Issues Task Force Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments (EITF 03-1), which provided guidance on determining whether an impairment is other-than-temporary. FSP 115-1 replaced guidance set forth in EITF 03-1 with references to existing other-than-temporary impairment guidance and clarified that an investor should recognize an impairment loss no later than when the impairment is deemed other-than-temporary, even if a decision to sell has not been made. FSP 115-1 carried forward the requirements in EITF 03-1 regarding required disclosures in the financial statements and requires additional disclosure related to factors considered in reaching the conclusion that the impairment is not other-than-temporary. In addition, in periods subsequent to the recognition of an other-than-temporary impairment loss for debt securities, the discount or reduced premium would be amortized over the remaining life of the security based on future estimated cash flows. FSP 115-1 was effective for reporting periods beginning after December 15, 2005 and was adopted by the Company as of January 1, 2006. Adoption of this standard increased income by approximately \$3 million for the year ended December 31, 2006 related to the amortization of discount or reduced premium resulting from previously impaired securities. The Company has included the required additional disclosures in Note B.

In December of 2004, the FASB issued SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123R), that amends SFAS 123, as originally issued in May of 1995. SFAS 123R addresses the accounting for share-based payment transactions in which an enterprise receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. SFAS 123R supercedes Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). After the effective date of this standard, entities are not permitted to use the intrinsic value method specified in APB 25 to measure compensation expense and generally are required to measure compensation expense using a fair-value based method. The Company applied the modified prospective transition method. The modified prospective method requires a company to (a) record compensation expense for all awards it grants, modifies, repurchases or cancels after the date it adopts the standard and (b) record compensation expense for the unvested portion of previously granted awards that remain outstanding at the date of adoption. SFAS 123R was effective for the Company as of January 1, 2006. The Company applied the alternative transition method in calculating its pool of excess tax benefits available to absorb future tax deficiencies as provided by FSP FAS 123(R)-3, Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards. Adoption of SFAS 123R decreased net income by \$2 million for the year ended December 31, 2006. Prior to 2006, the Company applied the intrinsic value method under APB 25, and related interpretations, in accounting for its stock-based compensation plan. Under the recognition and measurement principles of APB 25, no stock-based compensation cost was recognized, as the exercise price of the granted options equaled the market price of the underlying stock at the grant date.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (an amendment of FASB Statements No. 87, 88, 106 and 132(R)) (SFAS 158). SFAS 158 requires a company who sponsors one or more single-employer defined benefit plans to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 requires a company to measure benefit plan assets and obligations as of the date of the company's fiscal year-end statement of financial position. SFAS 158 also requires a company to disclose in the notes to financial

statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation. The requirement to recognize the funded status of a benefit plan and the disclosure requirements were adopted by the Company as of December 31, 2006. The requirement to measure plan assets and benefit

Table of Contents

obligations as of the date of the fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. Adoption of SFAS 158 decreased equity by \$46 million at December 31, 2006. The Company has included the required additional disclosures in Note J.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 requires registrants to use a dual approach to include both a balance sheet approach and an income statement approach when quantifying and evaluating the materiality of a misstatement in a company's financial statements and the related financial statement disclosures. If either approach results in quantifying a misstatement that is material, then a registrant shall adjust the financial statements. SAB 108 provides transition guidance for correcting errors existing in prior years. SAB 108 does not change the requirements for the correction of an error discovered in prior year financial statements. Errors discovered in prior year financial statements shall continue to be accounted for in accordance with SFAS No. 154, Accounting Changes and Error Correction. SAB 108 was adopted by the Company as of December 31, 2006. Adoption of SAB 108 did not have an impact on the results of operations or financial condition of the Company.

In March 2006, the FASB issued FSP No. 85-4-1, Accounting for Life Settlement Contracts by Third-Party Investors (FSP 85-4-1). A life settlement contract for purposes of FSP 85-4-1 is a contract between the owner of a life insurance policy (the policy owner) and a third-party investor (investor). The previous accounting guidance, FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance (FTB 85-4), required the purchaser of life insurance contracts to account for the life insurance contract at its cash surrender value. Because life insurance contracts are purchased in the secondary market at amounts in excess of the policies' cash surrender values, the application of guidance in FTB 85-4 created a loss upon acquisition of the policy. FSP 85-4-1 provides initial and subsequent measurement guidance and financial statement presentation and disclosure guidance for investments by third-party investors in life settlement contracts. FSP 85-4-1 allows an investor to elect to account for its investments in life settlement contracts using either the investment method or the fair value method. The election shall be made on an instrument-by-instrument basis and is irrevocable. FSP 85-4-1 is effective for fiscal years beginning after June 15, 2006. The Company has elected to account for its investment in life settlement contracts using the fair value method and the initial expected impact upon adoption under the fair value method will be an increase to retained earnings as of January 1, 2007 of approximately \$38 million.

In July 2006, FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes a comprehensive model for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return. FIN 48 states that a tax benefit from an uncertain position may be recognized only if it is more likely than not that the position is sustainable, based on its technical merits. The tax benefit of a qualifying position is the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority having full knowledge of all relevant information. FIN 48 is effective for fiscal years beginning after December 15, 2006. The impact on retained earnings as of January 1, 2007 from the adoption of FIN 48 is expected to be approximately \$5 million.

Table of Contents**Note B. Investments**

The significant components of net investment income are presented in the following table.

Net Investment Income

Years ended December 31 (In millions)	2006	2005	2004
Fixed maturity securities	\$ 1,842	\$ 1,608	\$ 1,571
Short term investments	248	147	56
Limited partnerships	288	254	212
Equity securities	23	25	14
Income from trading portfolio (a)	103	47	110
Interest on funds withheld and other deposits	(68)	(166)	(261)
Other	18	20	18
Gross investment income	2,454	1,935	1,720
Investment expenses	(42)	(43)	(40)
Net investment income	\$ 2,412	\$ 1,892	\$ 1,680

(a) There was no change in net unrealized gains (losses) on trading securities included in net investment income for the year ended December 31, 2006. The change in net unrealized gains (losses) on trading securities included in net investment income was \$(7) million and \$2 million for the years ended December 31, 2005 and 2004.

Table of Contents

Net realized investment gains (losses) and net change in unrealized appreciation (depreciation) in investments were as follows:

Net Investment Appreciation

Years ended December 31 (In millions)	2006	2005	2004
Net realized investment gains (losses):			
Fixed maturity securities:			
Gross realized gains	\$ 382	\$ 361	\$ 704

Net change in unrealized appreciation (depreciation) in investments	114	(246)	(147)
Net realized gains (losses) and change in unrealized appreciation (depreciation) in investments	\$ 200	\$ (256)	\$ (395)

Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is possible that changes in these risk factors in the near term could have an adverse material impact on the Company's results of operations or equity.

The Company's investment policies emphasize high credit quality and diversification by industry, issuer and issue. Assets supporting interest rate sensitive liabilities are segmented within the general account to facilitate asset/liability duration management.

Realized investment losses included \$173 million, \$107 million and \$93 million of other-than-temporary impairment (OTTI) losses for the years ended December 31, 2006, 2005 and 2004. The 2006, 2005 and 2004 OTTI losses were recorded across various sectors. The increase in OTTI losses for 2006 was primarily driven by an increase in interest rate related OTTI losses on securities for which the Company did not assert an intent to hold until an anticipated recovery in value. The 2005 and 2004 OTTI losses included \$34 million and \$56 million related to loans made under a credit facility to a national contractor, that are classified as fixed maturity securities. See Note S for additional information on loans to the national contractor.

Table of Contents

The following tables provide a summary of fixed maturity and equity securities investments.

Summary of Fixed Maturity and Equity Securities

An investment is impaired if the fair value of the investment is less than its cost adjusted for accretion, amortization, previous OTTI and hedging, otherwise defined as an unrealized loss. When an investment is impaired, the impairment

is evaluated to determine whether it is temporary or other-than-temporary.

A significant judgment in the valuation of investments is the determination of when an OTTI has occurred. The Company follows a consistent and systematic process for determining and recording an OTTI. The Company has established a committee responsible for the OTTI process. This committee, referred to as the Impairment Committee, is made up of three officers appointed by the Company's Chief Financial Officer. The Impairment Committee is responsible for analyzing watch list securities on at least a quarterly basis. The watch list includes individual securities that fall below certain thresholds or that exhibit evidence of OTTI indicators including, but not limited to, a significant adverse change in the financial condition and near term prospects of the issuer or a significant adverse change in legal factors, the business climate or credit ratings.

When a security is placed on the watch list, it is monitored for further market value changes and additional information related to the issuer's financial condition. The focus is on objective evidence that may influence the evaluation of OTTI factors.

The decision to record an OTTI incorporates both quantitative criteria and qualitative information. The Impairment Committee considers a number of factors including, but not limited to: (a) the length of time and the extent to which the fair value has been less than book value, (b) the financial condition and near term prospects of the issuer, (c) the intent and ability of the Company to retain its investment for a period of time sufficient to allow for an anticipated

Table of Contents

recovery in value, (d) whether the debtor is current on interest and principal payments and (e) general market conditions and industry or sector specific factors.

The Impairment Committee's decision to record an OTTI loss is primarily based on whether the security's fair value is likely to recover to its book value in light of all of the factors considered. For securities considered to be OTTI, the security is adjusted to fair value and the resulting losses are recognized in Realized investment gains (losses) on the Consolidated Statements of Operations.

At December 31, 2006, the carrying value of the general account fixed maturities was \$35,851 million, representing 81% of the total investment portfolio. The net unrealized position associated with the fixed maturity portfolio included \$208 million in gross unrealized losses, consisting of asset-backed securities which represented 83%, corporate bonds which represented 8%, municipal securities which represented 3%, and all other fixed maturity securities which represented 6%. The gross unrealized loss for any single issuer was no greater than 0.1% of the carrying value of the total general account fixed maturity portfolio. The total fixed maturity portfolio gross unrealized losses included 1,491 securities which were, in aggregate, approximately 1% below amortized cost.

The gross unrealized losses on equity securities are \$1 million, including 105 securities which, in aggregate, were below cost by approximately 3%.

Given the current facts and circumstances, the Impairment Committee has determined that the securities presented in the above unrealized gain/loss tables were temporarily impaired when evaluated at December 31, 2006 or December 31, 2005, and therefore no related realized losses were recorded. A discussion of some of the factors reviewed in making that determination is presented below by major security type. The unrealized loss related to any single issuer is not considered to be significant.

Asset-Backed Securities

The unrealized losses on the Company's investments in asset-backed securities were caused primarily by a change in interest rates. This category includes mortgage-backed securities guaranteed by an agency of the U.S. government. There were 476 agency mortgage-backed pass-through securities and 3 agency collateralized mortgage obligations (CMOs) in an unrealized loss position as of December 31, 2006. The aggregate severity of the unrealized loss on these securities was approximately 3% of amortized cost. These securities do not tend to be influenced by the credit of the issuer but rather the characteristics and projected principal payments of the underlying collateral.

The remainder of the holdings in this category are corporate mortgage-backed pass-through, CMOs and corporate asset-backed structured securities. The holdings in these sectors include 493 securities in an unrealized loss position with over 92% of these unrealized losses related to securities rated AAA. The aggregate severity of the unrealized loss was approximately 2% of amortized cost. The contractual cash flows on the asset-backed structured securities are pass-through but may be structured into classes of preference. The structured securities held are generally secured by over collateralization or default protection provided by subordinated tranches. Within this category, securities subject to EITF Issue No. 99-20, Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets (EITF 99-20), are monitored for adverse changes in cash flow projections. If there are adverse changes in cash flows the amount of accretable yield is prospectively adjusted and an OTTI loss is recognized. As of December 31, 2006, there was no adverse change in estimated cash flows noted for the EITF 99-20 securities, which have an aggregate unrealized loss of \$9 million and an aggregate severity of the unrealized loss of approximately 1% of amortized cost.

Because the decline in fair value was primarily attributable to changes in interest rates and not credit quality and because the Company has the ability and intent to hold those investments until an anticipated recovery of fair value, which may be maturity, the Company considers these investments to be temporarily impaired at December 31, 2006.

Corporate Securities

The Company's portfolio management objective for corporate bonds focuses on sector and issuer exposures and value analysis within sectors. In order to maximize investment objectives, corporate bonds are analyzed on a risk adjusted basis compared to other opportunities that are available in the market. Trading decisions may be made based on an issuer that may be overvalued in the Company's portfolio compared to a like issuer that may be undervalued in the market. The Company also monitors issuer exposure and broader industry sector exposures and may reduce exposures based on its current view of a specific issuer or sector.

Table of Contents

Of the unrealized losses in this category, approximately 81% relate to securities rated as investment grade (rated BBB or higher). The total holdings in this category are diversified across 10 industry sectors and 220 securities. The aggregate severity of the unrealized loss was approximately 1% of amortized cost. Within corporate bonds, the largest industry sectors were financial and consumer cyclical, which as a percentage of total gross unrealized losses were approximately 64% and 12% at December 31, 2006. The decline in fair value is primarily attributable to changes in interest rates and macro conditions in certain sectors that the market views as temporarily out of favor. Because the decline is not related to specific credit quality issues, and because the Company has the ability and intent to hold those investments until an anticipated recovery of fair value, which may be maturity, the Company considers these investments to be temporarily impaired at December 31, 2006.

The following tables summarize available-for-sale fixed maturity securities by contractual maturity at December 31, 2006 and 2005. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid with or without call or prepayment penalties. Securities not due at a single date are allocated based on weighted average life.

Contractual Maturity

	December 31, 2006		December 31, 2005	
	Cost or Amortized Cost	Estimated Fair Value	Cost or Amortized Cost	Estimated Fair Value
(In millions)				
Due in one year or less	\$ 1,599	\$ 1,602	\$ 953	\$ 955
Due after one year through five years	13,024	13,039	11,375	11,320
Due after five years through ten years	9,555	9,619	6,176	6,280
Due after ten years	10,753	11,387	13,841	14,408
Total	\$ 34,931	\$ 35,647	\$ 32,345	\$ 32,963

The carrying value of fixed maturity investments that did not produce income during 2006 was \$10 million. The carrying value of fixed maturity investments that did not produce income during 2005 was less than \$1 million. At December 31, 2006 and 2005, no investments, other than investments in U.S. government treasury and U.S. government agency securities, respectively, exceeded 10% of stockholders' equity.

Investment Commitments

As of December 31, 2006 and 2005, the Company had committed approximately \$109 million and \$191 million to future capital calls from various third-party limited partnership investments in exchange for an ownership interest in the related partnerships.

The Company invests in multiple bank loan participations as part of its overall investment strategy and has committed to additional future purchases and sales. The purchase and sale of these investments are recorded on the date that the legal agreements are finalized and cash settlement is made. As of December 31, 2006 and December 31, 2005, the Company had commitments to purchase \$60 million and \$82 million and sell \$21 million and \$12 million of various bank loan participations. When loan participation purchases are settled and recorded they may contain both funded and unfunded amounts. An unfunded loan represents an obligation by the Company to provide additional amounts under the terms of the loan participation. The funded portions are reflected on the Consolidated Balance Sheets, while any unfunded amounts are not recorded until a draw is made under the loan facility. As of December 31, 2006 and December 31, 2005, the Company had obligations on unfunded bank loan participations in the amount of \$29 million and \$21 million.

Investments on Deposit

The Company may from time to time invest in securities that may be restricted in whole or in part. As of December 31, 2006 and 2005, the Company did not hold any significant positions in investments whose sale was

restricted.

Cash and securities with carrying values of approximately \$2.5 billion and \$2.4 billion were deposited by the Company's insurance subsidiaries under requirements of regulatory authorities as of December 31, 2006 and 2005.

86

Table of Contents

The Company's investments in limited partnerships contain withdrawal provisions that typically require advanced written notice of up to 90 days for withdrawals. The carrying value of these investments, reported as a separate line item in the Consolidated Balance Sheets, is \$1,852 million and \$1,509 million as of December 31, 2006 and 2005.

Cash and securities with carrying values of approximately \$11 million and \$13 million were deposited with financial institutions as collateral for letters of credit as of December 31, 2006 and 2005. In addition, cash and securities were deposited in trusts with financial institutions to secure reinsurance obligations with various third parties. The carrying values of these deposits were approximately \$327 million and \$356 million as of December 31, 2006 and 2005.

Note C. Derivative Financial Instruments

A summary of the aggregate contractual or notional amounts, estimated fair values and recognized gains (losses) related to derivative financial instruments follows. The contractual or notional amounts for derivatives are used to calculate the exchange of contractual payments under the agreements and are not representative of the potential for gain or loss on these instruments.

Derivative Financial Instruments

Options embedded in convertible debt securities are classified as Fixed maturity securities on the Consolidated Balance Sheets, consistent with the host instruments.

Fair Value Hedges

The Company's hedging activities that are designated as a fair value hedge for accounting purposes primarily involve hedging interest rate and foreign currency risks on various assets and liabilities. The Company periodically enters into interest rate swaps to modify the interest rate exposures of designated invested assets. Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a fair-value hedge, along with the changes in the fair value of the hedged asset that are attributable to the hedged risk, are recorded as Realized gains (losses) in the Consolidated Statements of Operations. For the year ended December 31, 2005, the Company recognized a net gain of \$0.3 million, which represents the ineffective portion of all fair-value hedges. All components of each derivative's gain or loss were included in the assessment of hedge effectiveness. There was no gain or loss on the ineffective portion of fair value hedges for the years ended December 31, 2006 and 2004, because the Company did not designate any derivatives as fair value hedges in those years.

Cash Flow Hedges

The Company entered into one transaction that was designated as a cash flow hedge for accounting purposes, hedging interest rate risk on the forecasted payment of interest resulting from the issuance of fixed rate debt obligations during 2004. Ineffectiveness resulting from this hedge was recorded in realized gains or losses and was insignificant. For cash flow hedges of this type, gains and losses on derivative contracts that are reclassified from Accumulated other comprehensive income to current period earnings are included as part of the interest cost over the forecasted life of the debt. The cash flow hedge resulted in a loss of \$4 million which was recorded in Accumulated other comprehensive income at December 31, 2004. The Company reclassified \$0.3 million and \$0.3 million of the deferred net loss recorded in Accumulated other comprehensive income into earnings during 2006 and 2005. The Company did not enter into any transaction that was designated as a cash flow hedge during 2006 or 2005. The

Table of Contents

Company expects that \$0.3 million of the deferred net loss recorded in Accumulated other comprehensive income will be reclassified into earnings during 2007.

Derivative Activity Without Hedge Designations

The Company's derivative activities that are not designated as a hedge for accounting purposes primarily involve hedging interest rate, foreign currency and credit rate risks on various assets as part of its overall portfolio management strategy. This activity may include entering into interest rate swaps, credit default swaps, currency forwards and commitments to purchase securities. It may also include buying or selling interest rate futures and options and purchasing warrants. These products are entered into as part of a macro hedging strategy and while they may be linked to specific assets or a pool of assets, the Company does not seek hedge accounting treatment on them.

Trading Activities

The Company's derivative trading activities are associated with one of its consolidated separate accounts in which all investments are held for trading purposes. The derivatives segregated in this separate account are carried at fair value with the gains and losses included within net investment income. The Company is exposed to equity price risk in this separate account associated with its indexed group annuity contracts. The Company purchases Standard and Poor's 500® (S&P500®) index futures contracts in a notional amount equal to the contract holders liability. Other derivatives held in the separate account may include currency forwards, interest rate futures, options written and purchased and forward purchase commitments, among others.

Separate Accounts

The results of the Company's Separate Account derivative trading activity is included within Other revenues in the Consolidated Statements of Operations. The Company utilizes written options to enhance income in separate accounts.

Note D. Financial Instruments

In the normal course of business, the Company invests in various financial assets, incurs various financial liabilities and enters into agreements involving derivative securities.

Fair values are disclosed for all financial instruments for which it is practicable to estimate fair value, whether or not such values are recognized in the Consolidated Balance Sheets. Management attempts to obtain quoted market prices for these disclosures. Where quoted market prices are not available, fair values are estimated using present value or other valuation techniques. These techniques are significantly affected by management's assumptions, including discount rates and estimates of future cash flows. Potential taxes and other transaction costs have not been considered in estimating fair values. The estimates presented herein are not necessarily indicative of the amounts that CNA would realize in a current market exchange.

Non-financial instruments such as real estate, deferred acquisition costs, property and equipment, deferred income taxes and intangibles, and certain financial instruments such as insurance reserves and leases are excluded from the fair value disclosures. Therefore, the fair value amounts cannot be aggregated to determine the underlying economic value of the Company.

The carrying amounts reported on the Consolidated Balance Sheets for Cash, Short term investments, Accrued investment income, Receivables for securities sold, Federal income taxes recoverable/payable, Collateral on loaned securities, Payables for securities purchased, and certain other assets and other liabilities approximate fair value because of the short term nature of these items. These assets and liabilities are not listed in the following tables.

The following methods and assumptions were used by CNA in estimating the fair value of financial assets and liabilities.

The fair values of fixed maturity and equity securities were based on quoted market prices, where available. For securities not actively traded, fair values were estimated using values obtained from independent pricing services or quoted market prices of comparable instruments.

The fair value of limited partnership investments represents CNA's equity in the partnership's net assets as determined by the General Partner. Valuation techniques to determine fair value of other invested assets and other

Table of Contents

separate account business assets consisted of discounting cash flows, obtaining quoted market prices of the investments and comparing the investments to similar instruments or to the underlying assets of the investments.

The fair values of notes receivable for the issuance of common stock were estimated using discounted cash flows utilizing interest rates currently offered for obligations securitized with similar collateral.

Premium deposits and annuity contracts were valued based on cash surrender values, estimated fair values or policyholder liabilities, net of amounts ceded related to sold business.

CNAF's senior notes and debentures were valued based on quoted market prices. The fair value for other long term debt was estimated using discounted cash flows based on current incremental borrowing rates for similar borrowing arrangements.

The carrying amount and estimated fair value of the Company's financial instrument assets and liabilities are listed in the table below. Additional detail related to derivative financial instruments is also provided in Note C.

Financial Assets and Liabilities

Note E. Income Taxes

CNA and its eligible subsidiaries (CNA Tax Group) are included in the consolidated federal income tax return of Loews and its eligible subsidiaries. Loews and CNA have agreed that for each taxable year, CNA will 1) be paid by Loews the amount, if any, by which the Loews consolidated federal income tax liability is reduced by virtue of the inclusion of the CNA Tax Group in the Loews consolidated federal income tax return, or 2) pay to Loews an amount, if any, equal to the federal income tax that would have been payable by the CNA Tax Group filing a separate consolidated tax return. In the event that Loews should have a net operating loss in the future computed on the basis of filing a separate consolidated tax return without the CNA Tax Group, CNA may be required to repay tax recoveries previously received from Loews. This agreement may be canceled by either party upon 30 days written notice.

For the years ended December 31, 2006 and 2005, CNA paid Loews \$120 million and \$146 million related to federal income taxes. CNA's consolidated federal income taxes payable at December 31, 2006 reflects a \$38 million payable

to Loews and a \$2 million payable related to affiliates less than 80% owned. At December 31, 2005, CNA's consolidated federal income taxes recoverable included a \$68 million recoverable from Loews and a \$6 million payable related to affiliates less than 80% owned which settle their income taxes directly with the Internal Revenue Service (IRS).

Table of Contents

The Loews consolidated federal income tax returns for 2002 through 2004 have been settled with the IRS, including related carryback claims for refund which were approved by the Joint Committee on Taxation in 2006. As a result, the Company recorded a federal income tax benefit of \$10 million, including a \$7 million tax benefit related to Discontinued Operations, resulting primarily from the release of federal income tax reserves, and net refund interest of \$2 million, net of tax, in 2006.

In 2006, the Company received from Loews \$63 million related to the net tax settlement for the 2002-2004 tax returns and \$4 million related to net refund interest. In 2005, the Company paid Loews \$37 million related to the net tax deficiency for the 1998-2001 tax returns and received from Loews \$121 million related to net refund interest.

In 2005, the Loews consolidated federal income tax returns were settled with the IRS through 2001, as the tax returns for 1998-2001, including related carryback claims and prior claims for refund, were approved by the Joint Committee on Taxation. As a result, the Company recorded a federal income tax benefit of \$36 million and net refund interest of \$79 million, net of tax, in 2005. The tax benefit related primarily to the release of federal income tax reserves. The net refund interest was included in Other revenues on the Consolidated Statements of Operations for the years ended December 31, 2006 and 2005, and was reflected in the Corporate and Other Non-Core segment.

The federal income tax return for 2005 is currently under examination by the IRS. The Company believes the outcome of this examination will not have a material effect on the financial condition or results of operations of the Company.

For 2007, the IRS has invited Loews and the Company to participate in the Compliance Assurance Process (CAP) which is a voluntary program for a limited number of large corporations. Under CAP, the IRS conducts a real-time audit and works contemporaneously with the Company to resolve any issues prior to the filing of the 2007 tax return. Loews and the Company have agreed to participate. The Company believes that this approach should reduce tax-related uncertainties, if any.

A reconciliation between CNA's federal income tax (expense) benefit at statutory rates and the recorded income tax (expense) benefit, after giving effect to minority interest, but before giving effect to discontinued operations, is as follows:

Tax Reconciliation

Years ended December 31 (In millions)	2006	2005	2004
Income tax expense at statutory rates	\$ (577)	\$ (57)	\$ (176)
Tax benefit from tax exempt income	75	116	111
Other tax benefits, including IRS settlements	33	46	34
Effective income tax (expense) benefit	\$ (469)	\$ 105	\$ (31)

Provision has been made for the expected U.S. federal income tax liabilities applicable to undistributed earnings of subsidiaries, except for certain subsidiaries for which the Company intends to invest the undistributed earnings indefinitely, or recover such undistributed earnings tax-free. At December 31, 2006, the Company has not provided deferred taxes of \$104 million, if sold through a taxable sale, on \$297 million of undistributed earnings related to a domestic affiliate. Additionally, at December 31, 2006, the Company has not provided deferred taxes of \$32 million on \$92 million of undistributed earnings related to a foreign subsidiary.

The current and deferred components of CNA's income tax (expense) benefit, excluding taxes on discontinued operations, are as follows:

Current and Deferred Taxes

Years ended December 31 (In millions)	2006	2005	2004
Current tax (expense) benefit	\$ (296)	\$ (115)	\$ 6
Deferred tax (expense) benefit	(173)	220	(37)

Total income tax (expense) benefit	\$ (469)	\$ 105	\$ (31)
---	----------	--------	---------

Table of Contents

The deferred tax effects of the significant components of CNA's deferred tax assets and liabilities are set forth in the table below:

Components of Net Deferred Tax Asset

December 31 (In millions)	2006	2005
Deferred Tax Assets:		
Insurance reserves:		
Property and casualty claim and claim adjustment expense reserves	\$ 775	\$ 807
Unearned premium reserves	245	232
Life reserves	132	187
Other insurance reserves	26	24
Receivables	248	292
Employee benefits	187	214
Life settlement contracts	102	102
Investment valuation differences	93	130
Net operating loss carried forward	23	38
Other assets	171	194
Gross deferred tax assets	2,002	2,220
Valuation allowance		(30)
Deferred tax assets after valuation allowance	2,002	2,190
Deferred Tax Liabilities:		
Deferred acquisition costs	648	651
Net unrealized gains	340	274
Foreign and other affiliate(s)	11	15
Other liabilities	148	145
Gross deferred tax liabilities	1,147	1,085
Net deferred tax asset	\$ 855	\$ 1,105

At December 31, 2005, a valuation allowance of \$30 million related to certain foreign subsidiaries remained outstanding, due to uncertainty in the ability of the foreign subsidiaries to generate sufficient future income. During 2006, the Company reconsidered the need for this allowance in light of recent earnings levels and anticipated future earnings and determined the allowance was no longer required. Therefore, the allowance was released in 2006. Although realization of deferred tax assets is not assured, management believes it is more likely than not that the recognized net deferred tax asset will be realized through future earnings, including but not limited to future income from continuing operations, reversal of existing temporary differences, and available tax planning strategies.

Note F. Claim and Claim Adjustment Expense Reserves

CNA's property and casualty insurance claim and claim adjustment expense reserves represent the estimated amounts necessary to settle all outstanding claims, including claims that are incurred but not reported (IBNR) as of the reporting date. The Company's reserve projections are based primarily on detailed analysis of the facts in each case, CNA's experience with similar cases and various historical development patterns. Consideration is given to such historical patterns as field reserving trends and claims settlement practices, loss payments, pending levels of unpaid

claims and product mix, as well as court decisions, economic conditions and public attitudes. All of these factors can affect the estimation of claim and claim adjustment expense reserves.

Establishing claim and claim adjustment expense reserves, including claim and claim adjustment expense reserves for catastrophic events that have occurred, is an estimation process. Many factors can ultimately affect the final settlement of a claim and, therefore, the necessary reserve. Changes in the law, results of litigation, medical costs, the cost of repair materials and labor rates can all affect ultimate claim costs. In addition, time can be a critical part of reserving determinations since the longer the span between the incidence of a loss and the payment or settlement of the claim, the more variable the ultimate settlement amount can be. Accordingly, short-tail claims, such as property damage claims, tend to be more reasonably estimable than long-tail claims, such as general liability and professional liability claims. Adjustments to prior year reserve estimates, if necessary, are reflected in the results of operations in the period that the need for such adjustments is determined.

Table of Contents

Catastrophes are an inherent risk of the property and casualty insurance business and have contributed to material period-to-period fluctuations in the Company's results of operations and/or equity. Catastrophe losses, net of reinsurance, were \$59 million, \$493 million and \$278 million for the years ended December 31, 2006, 2005 and 2004. The catastrophe losses in 2005 related primarily to Hurricanes Katrina, Wilma, Rita, Dennis and Ophelia. The catastrophe losses in 2004 related primarily to Hurricanes Charley, Frances, Ivan and Jeanne. There can be no assurance that CNA's ultimate cost for these catastrophes will not exceed current estimates.

Commercial catastrophe losses, gross of reinsurance, were \$59 million, \$976 million and \$308 million for the years ended December 31, 2006, 2005 and 2004. See the Reinsurance section of the MD&A included in Item 7 for further discussion of the Company's catastrophe reinsurance program.

The table below provides a reconciliation between beginning and ending claim and claim adjustment expense reserves, including claim and claim adjustment expense reserves of the life company(ies).

Reconciliation of Claim and Claim Adjustment Expense Reserves**As of and for the years ended December 31**

(In millions)	2006	2005	2004
Reserves, beginning of year:			
Gross	\$ 30,938	\$ 31,523	\$ 31,732
Ceded	10,605	13,879	14,066
Net reserves, beginning of year	20,333	17,644	17,666
Reduction of net reserves (a)			(42)
Net incurred claim and claim adjustment expenses:			
Provision for insured events of current year	4,840	5,516	6,062
Increase in provision for insured events of prior years	361	1,100	240
Amortization of discount	121	115	135
Total net incurred (b)	5,322	6,731	6,437
Net payments attributable to:			
Current year events (c)	784	1,341	1,936
Prior year events	3,439	2,711	4,522
Reinsurance recoverable against net reserve transferred under retroactive reinsurance agreements	(13)	(10)	(41)
Total net payments	4,210	4,042	6,417
Net reserves, end of year	21,445	20,333	17,644
Ceded reserves, end of year	8,191	10,605	13,879
Gross reserves, end of year	\$ 29,636	\$ 30,938	\$ 31,523

- (a) In 2004, the net reserves were reduced by \$42 million as a result of the sale of the individual life insurance business. See Note P for further discussion of this sale.

- (b) Total net incurred above does not agree to Insurance claims and policyholders benefit as reflected in the Consolidated Statements of Operations due to expenses incurred related to uncollectible reinsurance receivables and benefit expenses related to future policy benefits and policyholders funds which are not reflected in the table above.

- (c) In 2006, net payments were decreased by \$935 million due to the impact of significant commutations. In 2005, net payments were decreased by

\$1,581 million
due to the
impact of
significant
commutations.
See Note H for
further
discussion
related to
commutations.

Table of Contents

The changes in provision for insured events of prior years (net prior year claim and claim adjustment expense reserve development) were as follows:

Table of Contents

The following provides discussion of the Company's Asbestos, Environmental Pollution and Mass Tort (APMT) and core reserves.

APMT Reserves

CNA's property and casualty insurance subsidiaries have actual and potential exposures related to APMT claims. Establishing reserves for APMT claim and claim adjustment expenses is subject to uncertainties that are greater than those presented by other claims. Traditional actuarial methods and techniques employed to estimate the ultimate cost of claims for more traditional property and casualty exposures are less precise in estimating claim and claim adjustment expense reserves for APMT, particularly in an environment of emerging or potential claims and coverage issues that arise from industry practices and legal, judicial and social conditions. Therefore, these traditional actuarial methods and techniques are necessarily supplemented with additional estimating techniques and methodologies, many of which involve significant judgments that are required of management. Accordingly, a high degree of uncertainty remains for the Company's ultimate liability for APMT claim and claim adjustment expenses.

In addition to the difficulties described above, estimating the ultimate cost of both reported and unreported APMT claims is subject to a higher degree of variability due to a number of additional factors, including among others: the number and outcome of direct actions against the Company; coverage issues, including whether certain costs are covered under the policies and whether policy limits apply; allocation of liability among numerous parties, some of whom may be in bankruptcy proceedings, and in particular the application of joint and several liability to specific insurers on a risk; inconsistent court decisions and developing legal theories; continuing aggressive tactics of plaintiffs lawyers; the risks and lack of predictability inherent in major litigation; enactment of state and federal legislation to address asbestos claims; increases and decreases in asbestos, environmental pollution and mass tort claims which cannot now be anticipated; increases and decreases in costs to defend asbestos, pollution and mass tort claims; changing liability theories against the Company's policyholders in environmental and mass tort matters; possible exhaustion of underlying umbrella and excess coverage; and future developments pertaining to the Company's ability to recover reinsurance for asbestos, pollution and mass tort claims.

CNA has annually performed ground up reviews of all open APMT claims to evaluate the adequacy of the Company's APMT reserves. In performing its comprehensive ground up analysis, the Company considers input from its professionals with direct responsibility for the claims, inside and outside counsel with responsibility for representation of the Company and its actuarial staff. These professionals review, among many factors, the policyholder's present and predicted future exposures, including such factors as claims volume, trial conditions, prior settlement history, settlement demands and defense costs; the impact of asbestos defendant bankruptcies on the policyholder; the policies issued by CNA, including such factors as aggregate or per occurrence limits, whether the policy is primary, umbrella or excess, and the existence of policyholder retentions and/or deductibles; the existence of other insurance; and reinsurance arrangements.

The following table provides data related to CNA's APMT claim and claim adjustment expense reserves.

APMT Reserves

	December 31, 2006		December 31, 2005	
	Asbestos	Environmental Pollution and Mass Tort	Asbestos	Environmental Pollution and Mass Tort
(In millions)				
Gross reserves	\$ 2,635	\$ 647	\$ 2,992	\$ 680
Ceded reserves	(1,183)	(231)	(1,438)	(257)
Net reserves	\$ 1,452	\$ 416	\$ 1,554	\$ 423

Asbestos

CNA's property and casualty insurance subsidiaries have exposure to asbestos-related claims. Estimation of asbestos-related claim and claim adjustment expense reserves involves limitations such as inconsistency of court decisions, specific policy provisions, allocation of liability among insurers and insureds, and additional factors such as missing policies and proof of coverage. Furthermore, estimation of asbestos-related claims is difficult due to, among other reasons, the proliferation of bankruptcy proceedings and attendant uncertainties, the targeting of a

Table of Contents

broader range of businesses and entities as defendants, the uncertainty as to which other insureds may be targeted in the future and the uncertainties inherent in predicting the number of future claims.

As of December 31, 2006 and 2005, CNA carried approximately \$1,452 million and \$1,554 million of claim and claim adjustment expense reserves, net of reinsurance recoverables, for reported and unreported asbestos-related claims. The Company recorded no asbestos-related net claim and claim adjustment expense reserve development for the year ended December 31, 2006. For the years ended December 31, 2005 and 2004, the Company recorded \$10 million and \$54 million of unfavorable asbestos-related net claim and claim adjustment expense reserve development. The 2004 unfavorable net prior year development was primarily related to a loss from the commutation of reinsurance treaties with The Trenwick Group (Trenwick). The Company paid asbestos-related claims, net of reinsurance recoveries, of \$102 million, \$142 million and \$135 million for the years ended December 31, 2006, 2005 and 2004.

Certain asbestos claim litigation in which CNA is currently engaged is described below:

The ultimate cost of reported claims, and in particular APMT claims, is subject to a great many uncertainties, including future developments of various kinds that CNA does not control and that are difficult or impossible to foresee accurately. With respect to the litigation identified below in particular, numerous factual and legal issues remain unresolved. Rulings on those issues by the courts are critical to the evaluation of the ultimate cost to the Company. The outcome of the litigation cannot be predicted with any reliability. Accordingly, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

On February 13, 2003, CNA announced it had resolved asbestos related coverage litigation and claims involving A.P. Green Industries, A.P. Green Services and Bigelow Liptak Corporation. Under the agreement, CNA is required to pay \$74 million, net of reinsurance recoveries, over a ten year period commencing after the final approval of a bankruptcy plan of reorganization. The settlement resolves CNA's liabilities for all pending and future asbestos and silica claims involving A.P. Green Industries, Bigelow Liptak Corporation and related subsidiaries, including alleged non-products exposures. The settlement received initial bankruptcy court approval on August 18, 2003. The court has held a confirmation hearing on the bankruptcy plan containing an injunction to protect CNA from any future claims and the parties are awaiting a ruling on confirmation.

CNA is engaged in insurance coverage litigation in New York State Court, filed in 2003, with a defendant class of underlying plaintiffs who have asbestos bodily injury claims against the former Robert A. Keasbey Company (Keasbey) (Continental Casualty Co. v. Employers Ins. of Wausau et al., No. 601037/03 (N.Y. County)). Keasbey, a currently dissolved corporation, was a seller and installer of asbestos-containing insulation products in New York and New Jersey. Thousands of plaintiffs have filed bodily injury claims against Keasbey; however, Keasbey's involvement at a number of work sites is a highly contested issue. Therefore, the defense disputes the percentage of valid claims against Keasbey. CNA issued Keasbey primary policies for 1970-1987 and excess policies for 1972-1978. CNA has paid an amount substantially equal to the policies' aggregate limits for products and completed operations claims in the confirmed CNA policies. Claimants against Keasbey allege, among other things, that CNA owes coverage under sections of the policies not subject to the aggregate limits, an allegation CNA vigorously contests in the lawsuit. In the litigation, CNA and the claimants seek declaratory relief as to the interpretation of various policy provisions. The court dismissed a claim alleging bad faith and seeking unspecified damages on March 21, 2004; that ruling was affirmed on March 31, 2005 by Appellate Division, First Department. The trial in the Keasbey coverage action commenced on July 13, 2005; closing arguments concluded on October 28, 2005. The Court reopened the record in January 2006 for additional evidentiary submissions and briefing, and additional closing arguments were held March 27, 2006. It is unclear when the Company will have a decision from the trial court. With respect to this litigation in particular, numerous factual and legal issues remain to be resolved that are critical to the final result, the outcome of which cannot be predicted with any reliability. These factors include, among others: (a) whether the Company has any further responsibility to compensate claimants against Keasbey under its policies and, if so, under which policies; (b) whether the Company's responsibilities extend to a particular claimant's entire claim or only to a limited percentage of the claim; (c) whether the Company's responsibilities under its policies are limited by the occurrence limits or other provisions of the policies; (d) whether certain exclusions in some of the policies apply to exclude certain claims; (e) the extent to which claimants can establish exposures to asbestos materials as to which

Keasbey has any responsibility; (f) the legal theories which must be pursued by such claimants to establish the liability of Keasbey and whether such theories can, in fact, be established; (g) the diseases and damages alleged by such claimants; and (h) the extent that such liability would be shared with

Table of Contents

other responsible parties. Accordingly, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

CNA has insurance coverage disputes related to asbestos bodily injury claims against a bankrupt insured, Burns & Roe Enterprises, Inc. (Burns & Roe). These disputes are currently part of coverage litigation (stayed in view of the bankruptcy) and an adversary proceeding in In re: Burns & Roe Enterprises, Inc., pending in the U.S. Bankruptcy Court for the District of New Jersey, No. 00-41610. Burns & Roe provided engineering and related services in connection with construction projects. At the time of its bankruptcy filing, on December 4, 2000, Burns & Roe asserted that it faced approximately 11,000 claims alleging bodily injury resulting from exposure to asbestos as a result of construction projects in which Burns & Roe was involved. CNA allegedly provided primary liability coverage to Burns & Roe from 1956-1969 and 1971-1974, along with certain project-specific policies from 1964-1970. The litigation involves disputes over the confirmation of the Plan of Reorganization in bankruptcy, the scope and extent of coverage, if any, afforded to Burns & Roe for its asbestos liabilities. On December 5, 2005, Burns & Roe filed its Third Amended Plan of Reorganization (Plan). A confirmation hearing relating to that Plan is anticipated in 2007. Coverage issues will be determined in a later proceeding. With respect to both confirmation of the Plan and coverage issues, numerous factual and legal issues remain to be resolved that are critical to the final result, the outcome of which cannot be predicted with any reliability. These factors include, among others: (a) whether the Company has any further responsibility to compensate claimants against Burns & Roe under its policies and, if so, under which; (b) whether the Company's responsibilities under its policies extend to a particular claimant's entire claim or only to a limited percentage of the claim; (c) whether the Company's responsibilities under its policies are limited by the occurrence limits or other provisions of the policies; (d) whether certain exclusions, including professional liability exclusions, in some of the Company's policies apply to exclude certain claims; (e) the extent to which claimants can establish exposure to asbestos materials as to which Burns & Roe has any responsibility; (f) the legal theories which must be pursued by such claimants to establish the liability of Burns & Roe and whether such theories can, in fact, be established; (g) the diseases and damages alleged by such claimants; (h) the extent that any liability of Burns & Roe would be shared with other potentially responsible parties; and (i) the impact of bankruptcy proceedings on claims and coverage issue resolution. Accordingly, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

Suits have also been initiated directly against the CNA companies and numerous other insurers in three jurisdictions: Texas, West Virginia and Montana. Lawsuits were filed in Texas beginning in 2002, against two CNA companies and numerous other insurers and non-insurer corporate defendants asserting liability for failing to warn of the dangers of asbestos (E.g. Boson v. Union Carbide Corp., (Nueces County, Texas)). During 2003, many of the Texas suits were dismissed as time-barred by the applicable Statute of Limitations. In other suits, the carriers argued that they did not owe any duty to the plaintiffs or the general public to advise the world generally or the plaintiffs particularly of the effects of asbestos and that Texas statutes precluded liability for such claims, and two Texas courts dismissed these suits. Certain of the Texas courts' rulings were appealed, but plaintiffs later dismissed their appeals. A different Texas court denied similar motions seeking dismissal at the pleading stage, allowing limited discovery to proceed. After that court denied a related challenge to jurisdiction, the insurers transferred those cases, among others, to a state multi-district litigation court in Harris County charged with handling asbestos cases, and the cases remain in that court. The insurers have petitioned the appellate court in Houston for an order of mandamus, requiring the multi-district litigation court to dismiss the cases on jurisdictional and substantive grounds. With respect to this litigation in particular, numerous factual and legal issues remain to be resolved that are critical to the final result, the outcome of which cannot be predicted with any reliability. These factors include: (a) the speculative nature and unclear scope of any alleged duties owed to individuals exposed to asbestos and the resulting uncertainty as to the potential pool of potential claimants; (b) the fact that imposing such duties on all insurer and non-insurer corporate defendants would be unprecedented and, therefore, the legal boundaries of recovery are difficult to estimate; (c) the fact that many of the claims brought to date are barred by various Statutes of Limitation and it is unclear whether future claims would also be barred; (d) the unclear nature of the required nexus between the acts of the defendants and the right of any particular claimant to recovery; and (e) the existence of hundreds of co-defendants in some of the suits and the applicability of the legal theories pled by the claimants to thousands of potential defendants. Accordingly, the

extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

CCC was named in Adams v. Aetna, Inc., et al. (Circuit Court of Kanawha County, West Virginia, Nos, 0-2C-1708 to -1719, filed June 28, 2002), a purported class action against CCC and other insurers, alleging that the defendants violated West Virginia's Unfair Trade Practices Act (UTPA) in handling and resolving asbestos claims against

Table of Contents

their insureds. In September 2006, CCC entered into a settlement with plaintiffs and on November 15, 2006, the Circuit Court of Kanawha County dismissed plaintiffs' claims against CCC. While no party filed an opposition to the settlement, the time for seeking leave to appeal that dismissal order to the West Virginia Supreme Court of Appeals has not yet expired. In the event the dismissal order is appealed to the West Virginia Supreme Court and the dismissal order is set aside, numerous factual and legal issues would determine the final result in Adams, the outcome of which cannot be predicted with any reliability. These issues include: (a) the legal sufficiency and factual validity of the novel statutory claims pled by the claimants; (b) the applicability of claimants' legal theories to insurers who issued excess policies and/or neither defended nor controlled the defense of certain policyholders; (c) the possibility that certain of the claims are barred by various Statutes of Limitation; (d) the fact that the imposition of duties would interfere with the attorney-client privilege and the contractual rights and responsibilities of the parties to the Company's insurance policies; (e) whether plaintiffs' claims are barred in whole or in part by injunctions that have been issued by bankruptcy courts that are overseeing, or that have overseen, the bankruptcies of various insureds; (f) whether some or all of the named plaintiffs or members of the plaintiff class have released CCC from the claims alleged in the Amended Complaint when they resolved their underlying asbestos claims; (g) the appropriateness of the case for class action treatment; and (h) the potential and relative magnitude of liabilities of co-defendants. Accordingly, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

On March 22, 2002, a direct action was filed in Montana (Pennock, et al. v. Maryland Casualty, et al. First Judicial District Court of Lewis & Clark County, Montana) by eight individual plaintiffs (all employees of W.R. Grace & Co. (W.R. Grace)) and their spouses against CNA, Maryland Casualty and the State of Montana. This action alleges that the carriers failed to warn of or otherwise protect W.R. Grace employees from the dangers of asbestos at a W.R. Grace vermiculite mining facility in Libby, Montana. The Montana direct action is currently stayed because of W.R. Grace's pending bankruptcy. With respect to such claims, numerous factual and legal issues remain to be resolved that are critical to the final result, the outcome of which cannot be predicted with any reliability. These factors include: (a) the unclear nature and scope of any alleged duties owed to people exposed to asbestos and the resulting uncertainty as to the potential pool of potential claimants; (b) the potential application of Statutes of Limitation to many of the claims which may be made depending on the nature and scope of the alleged duties; (c) the unclear nature of the required nexus between the acts of the defendants and the right of any particular claimant to recovery; (d) the diseases and damages claimed by such claimants; (e) the extent that such liability would be shared with other potentially responsible parties; and (f) the impact of bankruptcy proceedings on claims resolution. Accordingly, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time.

CNA is vigorously defending these and other cases and believes that it has meritorious defenses to the claims asserted. However, there are numerous factual and legal issues to be resolved in connection with these claims, and it is extremely difficult to predict the outcome or ultimate financial exposure represented by these matters. Adverse developments with respect to any of these matters could have a material adverse effect on CNA's business, insurer financial strength and debt ratings, results of operations and/or equity.

Environmental Pollution and Mass Tort

As of December 31, 2006 and 2005, CNA carried approximately \$416 million and \$423 million of claim and claim adjustment expense reserves, net of reinsurance recoverables, for reported and unreported environmental pollution and mass tort claims. There was \$63 million, \$53 million and \$1 million of unfavorable environmental pollution and mass tort net claim and claim adjustment expense reserve development recorded for the years ended December 31, 2006, 2005 and 2004. The Company recorded \$40 million, \$20 million and \$15 million of current accident year losses related to mass tort for the years ended December 31, 2006, 2005 and 2004. The Company paid environmental pollution-related claims and mass tort-related claims, net of reinsurance recoveries, of \$110 million, \$147 million and \$96 million for the years ended December 31, 2006, 2005 and 2004.

In addition to mass tort claims arising from exposure to asbestos as discussed above, the Company also has exposure arising from other mass tort claims. Such claims typically involve allegations by multiple plaintiffs alleging injury resulting from exposure to or use of similar substances or products over multiple policy periods. Examples include, but are not limited to, lead paint claims, hardboard siding, polybutylene pipe, mold, silica, latex gloves, benzene products, welding rods, diet drugs, breast implants, medical devices, and various other toxic chemical exposures.

During the Company's 2006 ground up review, the Company noted adverse development in various mass tort accounts. The adverse development results primarily from increases related to defense costs in a small number of

Table of Contents

accounts arising out of various substances and products. As a result, the Company increased mass tort reserves for prior accident years by \$63 million in 2006.

The Company noted adverse development in various pollution accounts in its 2005 ground up review. In the course of its review, the Company did not observe a negative trend or deterioration in the underlying pollution claims environment. Rather, individual account estimates changed due to changes in liability and/or coverage circumstances particular to those accounts. As a result, the Company increased pollution reserves for prior accident years by \$50 million in 2005.

Net Prior Year Development

Unfavorable net prior year development of \$185 million, including \$251 million of unfavorable claim and allocated claim adjustment expense reserve development and \$66 million of favorable premium development, was recorded in 2006. Unfavorable net prior year development of \$807 million, including \$945 million of unfavorable claim and allocated claim adjustment expense reserve development and \$138 million of favorable premium development, was recorded in 2005. Unfavorable net prior year development of \$134 million, including \$250 million of unfavorable claim and allocated claim adjustment expense reserve development and \$116 million of favorable premium development, was recorded in 2004.

The development discussed below includes premium development due to its direct relationship to claim and claim adjustment expense reserve development. The development discussed below excludes the impact of the provision for uncollectible reinsurance, but includes the impact of commutations. See Note H for further discussion of the provision for uncollectible reinsurance.

In 2005 and 2004, the Company recorded favorable or unfavorable premium and claim and claim adjustment expense reserve development related to the corporate aggregate reinsurance treaties as movements in the claim and allocated claim adjustment expense reserves for the accident years covered by the corporate aggregate reinsurance treaties indicated such development was required. While the available limit of these treaties was fully utilized in 2003, the ceded premiums and losses for an individual segment changed in subsequent years because of the re-estimation of the subject losses or commutations of the underlying contracts. In 2005, the Company commuted a significant corporate aggregate reinsurance treaty and in 2006, the Company commuted its remaining corporate aggregate reinsurance treaty. See Note H for further discussion of the corporate aggregate reinsurance treaties.

The following tables and discussion include the net prior year development recorded for Standard Lines, Specialty Lines and Corporate and Other Non-Core for the years ended December 31, 2006, 2005 and 2004. Unfavorable net prior year development of \$13 million was recorded in the Life and Group Non-Core segment for the year ended December 31, 2006. Favorable net prior year development of \$5 million and \$7 million was recorded in the Life and Group Non-Core segment for the years ended December 31, 2005 and 2004.

Table of Contents***2006 Net Prior Year Development*****Standard Lines**

Approximately \$119 million of unfavorable claim and allocated claim adjustment expense reserve development was due to reinsurance commutation activity that took place in the fourth quarter of 2006. Approximately \$82 million of unfavorable claim and allocated claim adjustment expense reserve development was related to casualty lines of business, primarily workers' compensation, due to continued claim cost inflation in older accident years, primarily 2002 and prior. The primary drivers of the continuing claim cost inflation are medical inflation and advances in medical care.

Favorable claim and allocated claim adjustment expense reserve development of approximately \$88 million was recorded in relation to the short-tail coverages such as property and marine, primarily in accident years 2004 and 2005. The favorable results are primarily due to the underwriting actions taken by the Company that have significantly improved the results on this business and favorable outcomes on individual claims.

The majority of the favorable premium development was due to additional premium primarily resulting from audits and changes to premium on several ceded reinsurance agreements. Business impacted included various middle market liability coverages, workers' compensation, property, and large accounts. This favorable premium development was partially offset by approximately \$44 million of unfavorable claim and allocated claim adjustment expense reserve development recorded as a result of this favorable premium development.

Specialty Lines

Approximately \$55 million of unfavorable claim and allocated claim adjustment expense reserve development was recorded due to increased claim adjustment expenses and increased severities in the architects and engineers book of business in accident years 2003 and prior. Previous reviews assumed that incurred severities had increased, at least in part, due to increases in the adequacy of case reserve estimates with relatively minor changes in underlying severity. Subsequent changes in paid and case incurred losses have shown that more of the change was due to underlying increases in verdict and settlement size for these accident years rather than increases in case reserve adequacy, resulting in higher ultimate losses. One of the primary drivers of these larger verdicts and settlements is the continuing general increase in commercial and private real estate values.

Approximately \$60 million of favorable claim and allocated claim adjustment expense reserve development was due to improved claim severity and claim frequency in the healthcare professional liability business, primarily in dental, nursing home liability, physicians and other healthcare facilities. The improved severity and frequency are due to underwriting changes. The Company no longer writes large national nursing home chains and focuses on smaller insureds in selected areas of the country. These changes have resulted in business that experiences fewer large claims.

Approximately \$15 million of unfavorable claim and allocated claim adjustment expense reserve development was primarily related to increased severity on individual large claims from large law firm errors and omissions (E&O), and directors and officers (D&O) coverages. These increases result in higher ultimate loss projections from the average loss methods used by the Company's actuaries.

Approximately \$17 million of favorable claim and allocated claim adjustment expense reserve development was recorded in the warranty line of business for accident years 2004 and 2005. The reserves for this business are initially estimated based on the loss ratio expected for the business. Subsequent estimates rely more heavily on the actual case incurred losses due to the short-tail nature of this business. The short-tail nature of the business is due to the short period of time that passes between the time the business is written and the time when all claims are known and settled. Case incurred loss for the most recent accident year has been lower than indicated by the initial loss ratio.

The majority of the unfavorable premium development was related to ceded reinsurance activity.

Corporate and Other Non-Core

The majority of the unfavorable claim and allocated claim adjustment expense reserve development was related to the Company's exposure arising from other mass tort claims. Such claims typically involve allegations by multiple plaintiffs alleging injury resulting from exposure to or use of similar substances or products over multiple policy periods. Examples include, but are not limited to, lead paint claims, hardboard siding, polybutylene pipe, mold,

Table of Contents

silica, latex gloves, benzene products, welding rods, diet drugs, breast implants, medical devices, and various other toxic chemical exposures. During the Company's 2006 ground up review, the Company noted adverse development in various mass tort accounts. The adverse development results primarily from increases related to defense costs in a small number of accounts arising out of various substances and products.

2005 Net Prior Year Development**Standard Lines**

During the fourth quarter of 2005, the Company executed commutation agreements with certain reinsurers, including the commutation of a corporate aggregate reinsurance agreement. These agreements resulted in approximately \$285 million of unfavorable claim and allocated claim adjustment expense reserve development. This unfavorable claim and allocated claim adjustment expense reserve development was partially offset by a release of a previously established allowance for uncollectible reinsurance.

Also, in the fourth quarter of 2005, reserve reviews of certain products were conducted and changes in reserve estimates were recorded. Approximately \$102 million of unfavorable claim and allocated claim adjustment expense reserve development was due to higher frequency and severity on claims related to excess workers' compensation, particularly in accident years 2003 and prior. The primary drivers of the higher frequency and severity were increasing medical inflation and advances in medical care. Medical inflation increases the cost of claims resulting in more claims reaching the excess layers covered by the Company. Medical inflation also increases the size of claims in the Company's layers. Similarly, advances in medical care extend the life expectancies of claimants again resulting in additional costs to be covered by the Company as well as more claims reaching the excess layers covered by the Company.

In addition, approximately \$4 million of unfavorable claim and allocated claim adjustment expense reserve development was recorded due to increased severity on known claims on package policies provided to small businesses in accident years 2002 and 2003. Approximately \$10 million of favorable claim and allocated claim adjustment expense reserve development was due to lower severities in the excess and surplus lines runoff business in accident years 2001 and prior. These severity changes were driven primarily by judicial decisions and settlement activities on individual cases.

Approximately \$23 million of favorable claim and allocated claim adjustment expense reserve development was related to favorable loss trends on accident years 2002 and subsequent in the Company's international business, specifically Europe and Canada, primarily in property, cargo and marine coverages. Approximately \$4 million of favorable net prior year claim and allocated claim adjustment expense reserve development was due to less than expected losses in involuntary business.

Approximately \$140 million of favorable net prior year claim and allocated claim adjustment expense reserve development was recorded due to improvement in the severity and number of claims for property coverages and marine business, primarily in accident year 2004. The improvements in severity and frequency are substantially due to underwriting actions taken by the Company that have significantly improved the results on this business.

Approximately \$126 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development resulted from increased severity trends for workers' compensation, primarily in accident year 2002 and prior. The primary drivers of the higher severity trends were increasing medical inflation and advances in medical care. Medical inflation increases the cost of medical services, and advances in medical care extend the life expectancies of claimants resulting in additional costs to be covered by the Company.

Approximately \$15 million of unfavorable premium development was recorded in relation to this unfavorable net prior year claim and allocated claim adjustment expense reserve development which resulted from additional ceded reinsurance premium on agreements where the ceded premium is impacted by the level of ceded losses.

Approximately \$90 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development and \$83 million of favorable net prior year premium development resulted from an unfavorable arbitration ruling on two reinsurance treaties.

Table of Contents

Approximately \$76 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development was attributed to increased severity in liability coverages for large account policies. These increases are driven by increasing medical inflation and larger verdicts than anticipated, both of which increase the severity of these claims.

Approximately \$53 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development was related to reviews of liquor liability, trucking and habitational business that indicated that the number of large claims was higher than previously expected in recent accident years. The remainder of the favorable net prior year claim and allocated claim adjustment expense reserve development was primarily a result of improved experience on several coverages on middle market business, mainly in accident year 2004.

Favorable net prior year premium development was recorded primarily as a result of additional premium resulting from audits on recent policies, primarily workers compensation.

Additionally, there was \$19 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development and \$6 million of favorable premium development related to the corporate aggregate reinsurance treaties, excluding the impact of a corporate aggregate reinsurance commutation as discussed above.

Specialty Lines

Approximately \$60 million of unfavorable claim and allocated claim adjustment expense reserve development was recorded due to increased claim adjustment expenses and increased severities in the architects and engineers book of business, in accident years 2000 through 2003. Previous reviews assumed that severities had increased, at least in part, due to increases in the adequacy of case reserve estimates. Subsequent changes in paid and incurred loss have shown that more of the change was due to larger verdicts and settlements during these accident years. One of the primary drivers of these larger verdicts and settlements is the continuing general increase in real estate values. Favorable net prior year premium development of approximately \$10 million was recorded in relation to this unfavorable claim and allocated claim adjustment expense reserve development.

Approximately \$45 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development was related to large D&O claims assumed from a London syndicate, primarily in accident years 2001 and prior. Approximately \$43 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development was recorded due to large claims under excess coverages provided to health care facilities.

Approximately \$32 million of favorable claim and allocated claim adjustment expense reserve development related to surety business was due to a favorable outcome on several specific large claims and lower than expected emergence of additional large claims related to accident years 1999 through 2003.

Approximately \$30 million of unfavorable claim and allocated claim adjustment expense reserve development was related to a commutation agreement executed in the fourth quarter of 2005 of a corporate aggregate reinsurance agreement. This unfavorable claim and allocated claim adjustment expense reserve development was partially offset by a release of a previously established allowance for uncollectible reinsurance.

Approximately \$24 million of favorable net prior year claim and allocated claim adjustment expense reserve development was recorded as a result of improvements in the claim severity and claim frequency, mainly in recent accident years, from nursing home businesses. The improved severity and frequency are due to underwriting changes in this business. The Company no longer writes large national chains and focuses on smaller insureds in selected areas of the country. These changes have resulted in business that experiences fewer large claims.

Approximately \$14 million of favorable net prior year claim and allocated claim adjustment expense reserve development was recorded due to lower severity in the dental program. The lower severity is driven by efforts to resolve a higher percentage of claims without a resulting indemnity payment.

The remainder of the favorable net prior year claim and allocated claim adjustment expense reserve development was primarily attributed to favorable experience in the warranty line of business, partially offset by unfavorable net prior year claim and allocated claim adjustment expense reserve development attributed to other large D&O claims.

Additionally, there was approximately \$25 million of favorable net prior year claim and allocated claim adjustment expense reserve development and \$19 million of unfavorable premium development related to the corporate aggregate reinsurance treaties in 2005, excluding the impact of a corporate aggregate reinsurance commutation as discussed above.

Table of Contents**Corporate and Other Non-Core**

Approximately \$157 million of unfavorable claim and allocated claim adjustment expense reserve development was attributable to the Company's assumed reinsurance operations, driven by a significant increase in large claim activity during 2005 across multiple accident years. This development was concentrated in the proportional liability, excess of loss liability, and professional liability businesses, which impact underlying coverages that include general liability, umbrella, E&O and D&O. The Company's assumed reinsurance operations were put in run-off in 2003.

During the fourth quarter of 2005, the Company executed significant commutation agreements with certain reinsurers, including the commutation of a corporate aggregate reinsurance agreement. These agreements resulted in approximately \$62 million of unfavorable claim and allocated claim adjustment expense reserve development.

Approximately \$56 million of unfavorable claim and allocated claim adjustment expense reserve development recorded in 2005 was a result of a second quarter commutation of a finite reinsurance contract put in place in 1992. CNA recaptured \$400 million of losses and received \$344 million of cash. The commutation was economically attractive because of the reinsurance agreement's contractual interest rate and maintenance charges.

Approximately \$6 million of unfavorable claim and allocated claim adjustment expense reserve development was related to the corporate aggregate reinsurance treaties, excluding the impact of a corporate aggregate reinsurance commutation as discussed above. The unfavorable premium development was driven by \$10 million of additional ceded reinsurance premium on agreements where the ceded premium depends on the ceded loss and \$4 million of additional premium ceded to the corporate aggregate reinsurance treaties.

The Company noted adverse development in various pollution accounts in its most recent ground up review. In the course of its review, the Company did not observe a negative trend or deterioration in the underlying pollution claims environment. Rather, individual account estimates changed due to changes in liability and/or coverage circumstances particular to those accounts. As a result, the Company increased pollution reserves by \$50 million in 2005.

The overall unfavorable claim and allocated claim adjustment expense reserve development was partially decreased by favorable claim and allocated claim adjustment expense reserve development in various other programs in runoff, including Financial Guarantee, Guarantee and Credit, and Mortgage Guarantee. These programs have recently exhibited favorable trends due to offsetting recoveries and commutations, leading to reductions in the estimated liabilities.

2004 Net Prior Year Development**Standard Lines**

Approximately \$190 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development recorded during 2004 resulted from increased severity trends for workers' compensation on large account policies primarily in accident years 2002 and prior. The primary drivers of the higher severity trends were increasing medical inflation and advances in medical care. Medical inflation increases the cost of medical services, and advances in medical care extend the life expectancies of claimants resulting in additional costs to be covered by the Company. Favorable premium development on retrospectively rated large account policies of \$50 million was recorded in relation to this unfavorable net prior year claim and allocated claims adjustment expense reserve development.

Approximately \$60 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development was recorded in involuntary pools in which the Company's participation is mandatory and primarily based on premium writings. Approximately \$15 million of this unfavorable net prior year claim and allocated claim adjustment expense reserve development was related to the Company's share of the National Workers' Compensation Reinsurance Pool (NWCPR). During 2004, the NWCPR reached an agreement with a former pool member to settle their pool liabilities at an amount less than their established share. The result of this settlement is a higher allocation to the remaining pool members, including the Company. The remainder of this unfavorable net prior year claim and allocated claim adjustment expense reserve development was primarily due to increased severity trends for workers' compensation exposures in older years.

Approximately \$60 million of unfavorable net prior year claim and allocated claim adjustment expense reserve development resulted from the change in estimates due to increased severity trends for excess and surplus business

Table of Contents

driven by excess liability, liquor liability and coverages provided to apartment and condominium complexes. These severity changes were driven primarily by judicial decisions and settlement activities on individual cases. Approximately \$105 million of favorable net prior year claim and allocated claim adjustment expense reserve development resulted from reserve studies of commercial auto liability policies and the liability portion of package policies. The change was due to improvement in the severity and number of claims for this business. This is primarily due to a lower than expected number of large claims. Approximately \$85 million of favorable net prior year claim and allocated claim adjustment expense reserve development was due to improvement in the severity and number of claims for property coverages primarily in accident year 2003. The improvements in severity and frequency are substantially due to underwriting actions taken by the Company that have significantly improved the results on this business. Other favorable net prior year premium development of approximately \$50 million resulted primarily from higher audit and endorsement premiums on workers' compensation policies. During 2004, the Company executed commutation agreements with several members of Trenwick. These commutations resulted in unfavorable claim and claim adjustment expense reserve development which was more than offset by a release of a previously established allowance for uncollectible reinsurance.

Specialty Lines

The Company executed commutation agreements with several members of Trenwick during 2004. These commutations resulted in unfavorable claim and claim adjustment expense reserve development which was more than offset by a release of a previously established allowance for uncollectible reinsurance. Additionally, unfavorable net prior year claim and allocated claim adjustment expense reserve development resulted from the increased emergence of several large D&O claims, primarily in recent accident years.

Corporate and Other Non-Core

In 2004, the Company executed commutation agreements with several members of Trenwick. These commutations resulted in unfavorable net prior claim and allocated claim adjustment expense reserve development partially offset by a release of a previously established allowance for uncollectible reinsurance. The remainder of the unfavorable net prior year claim and allocated claim adjustment expense reserve development resulted from several other small commutations and increases to net reserves due to reducing ceded losses, partially offset by a release of a previously established allowance for uncollectible reinsurance.

Note G. Legal Proceedings and Contingent Liabilities***Insurance Brokerage Antitrust Litigation***

On August 1, 2005, CNAF and several of its insurance subsidiaries were joined as defendants, along with other insurers and brokers, in multidistrict litigation pending in the United States District Court for the District of New Jersey, In re Insurance Brokerage Antitrust Litigation, Civil No. 04-5184 (FSH). The plaintiffs in this litigation allege improprieties in the payment of contingent commissions to brokers and bid rigging in connection with the sale of various lines of insurance. The plaintiffs further allege the existence of a conspiracy and assert claims for federal and state antitrust law violations, for violations of the federal Racketeer Influenced and Corrupt Organizations Act and for recovery under various state common law theories. By an order entered on October 3, 2006, the Court required the plaintiffs to supplement their pleadings with a statement setting forth the details of their claims. The Company believes it has meritorious defenses to this action and intends to defend the case vigorously.

The extent of losses beyond any amounts that may be accrued are not readily determinable at this time. However, based on facts and circumstances presently known, in the opinion of management, an unfavorable outcome will not materially affect the equity of the Company, although results of operations may be adversely affected.

Global Crossing Limited Litigation

CCC has been named as a defendant in an action brought by the bankruptcy estate of Global Crossing Limited (Global Crossing) in the United States Bankruptcy Court for the Southern District of New York. In the Complaint, served on CCC on May 24, 2005, plaintiff seeks unspecified monetary damages from CCC and the other defendants for alleged fraudulent transfers and alleged breaches of fiduciary duties arising from actions taken by Global Crossing while CCC was a shareholder of Global Crossing. On August 3, 2006, the Court granted in part and

Table of Contents

denied in part CCC's motion to dismiss the Estate Representative's Amended Complaint. CCC believes it has meritorious defenses to the remaining claims in this action and intends to defend the case vigorously. The extent of losses beyond any amounts that may be accrued are not readily determinable at this time. However, based on facts and circumstances presently known, in the opinion of management, an unfavorable outcome will not materially affect the equity of the Company, although results of operations may be adversely affected.

IGI Contingency

In 1997, CNA Reinsurance Company Limited (CNA Re Ltd.) entered into an arrangement with IOA Global, Ltd. (IOA), an independent managing general agent based in Philadelphia, Pennsylvania, to develop and manage a book of accident and health coverages. Pursuant to this arrangement, IGI Underwriting Agencies, Ltd. (IGI), a personal accident reinsurance managing general underwriter, was appointed to underwrite and market the book under the supervision of IOA. Between April 1, 1997 and December 1, 1999, IGI underwrote a number of reinsurance arrangements with respect to personal accident insurance worldwide (the IGI Program). Under various arrangements, CNA Re Ltd. both assumed risks as a reinsurer and also ceded a substantial portion of those risks to other companies, including other CNA insurance subsidiaries and ultimately to a group of reinsurers participating in a reinsurance pool known as the Associated Accident and Health Reinsurance Underwriters (AAHRU) Facility. CNA's group operations business unit participated as a pool member in the AAHRU Facility in varying percentages between 1997 and 1999. A portion of the premiums assumed under the IGI Program related to United States workers' compensation carve-out business. Some of these premiums were received from John Hancock Mutual Life Insurance Company (John Hancock) under four excess of loss reinsurance treaties (the Treaties) issued by CNA Re Ltd. While John Hancock has indicated that it is not able to accurately quantify its potential exposure to its cedents on business which is retroceded to CNA, John Hancock has reported \$280 million of paid and unpaid losses under these Treaties. John Hancock is disputing portions of its assumed obligations resulting in these reported losses, and has advised CNA that it is, or has been, involved in multiple arbitrations with its own cedents, in which proceedings John Hancock is seeking to avoid and/or reduce risks that would otherwise arguably be ceded to CNA through the Treaties. John Hancock has further informed CNA that it has settled several of these disputes, but has not provided CNA with details of the settlements. To the extent that John Hancock is successful in reducing its liabilities in these disputes, that development may have an impact on the recoveries it is seeking under the Treaties from CNA.

As indicated, CNA arranged substantial reinsurance protection to manage its exposures under the IGI Program, including the United States workers' compensation carve-out business ceded from John Hancock and other reinsurers. While certain reinsurers of CNA, including participants in the AAHRU Facility, disputed their liabilities under the reinsurance contracts with respect to the IGI Program, those disputes have been resolved and substantial reinsurance coverage exists for those exposures.

CNA has instituted arbitration proceedings against John Hancock in which CNA is seeking rescission of the Treaties as well as access to and the right to inspect the books and records relating to the Treaties. Discovery is ongoing in that arbitration proceeding and a hearing is currently scheduled for April 2007. Based on information known at this time, CNA believes it has strong grounds to successfully challenge its alleged exposure derived from John Hancock through the ongoing arbitration proceedings. CNA has also undertaken legal action seeking to avoid portions of the remaining exposure arising out of the IGI Program.

CNA has established reserves for its estimated exposure under the IGI Program, other than that derived from John Hancock, and an estimate for recoverables from retrocessionaires. CNA has not established any reserve for any exposure derived from John Hancock because, as indicated, CNA believes the contract will be rescinded. Although the results of the Company's various loss mitigation strategies with respect to the entire IGI Program to date support the recorded reserves, the estimate of ultimate losses is subject to considerable uncertainty due to the complexities described above, and the Company's inability to guarantee any outcome in the arbitration proceedings. As a result of these uncertainties, the results of operations in future periods may be adversely affected by potentially significant reserve additions. However, the extent of losses beyond any amounts that may be accrued are not readily determinable at this time. Management does not believe that any such reserve additions would be material to the equity of the Company. The Company's position in relation to the IGI Program was unaffected by the sale of CNA Re Ltd. in 2002.

Table of Contents***New Jersey Wage and Hour Litigation***

W. Curtis Himmelman, individually and on behalf of all others similarly situated v. Continental Casualty Company, Civil Action: 06-166, District Court of New Jersey (Trenton Division) is a purported class action and representative action brought on behalf of present and former CNA environmental claims analysts and workers' compensation claims analysts asserting they worked hours for which they should have been compensated at a rate of one and one-half times their base hourly wage. The Complaint was filed on January 12, 2006. The claims were originally brought under both federal and New Jersey state wage and hour laws on the basis that the relevant jobs are not exempt from overtime pay because the duties performed are not exempt duties. On August 11, 2006, the Court dismissed plaintiff's New Jersey state law claims. Under federal law, plaintiff seeks to represent others similarly situated who opt in to the action and who also allege they are owed overtime pay for hours worked over eight hours per day and/or forty hours per workweek for the period January 5, 2003 to the entry of judgment. Plaintiff seeks overtime compensation, compensatory, punitive and statutory damages, interest, costs and disbursements and attorneys' fees without specifying any particular amounts (as well as an injunction). The Company denies the material allegations of the Complaint and intends to vigorously contest the claims on numerous substantive and procedural grounds.

The extent of losses beyond any amounts that may be accrued are not readily determinable at this time. However, based on facts and circumstances presently known, in the opinion of management, an unfavorable outcome will not materially affect the equity of the Company, although results of operations may be adversely affected.

California Long Term Care Litigation

Shaffer v. Continental Casualty Company, et al., U.S. District Court, Central District of California, CV06-2235 RGK, is a class action on behalf of certain California long term health care policyholders, alleging that CCC knowingly used unrealistic actuarial assumptions in pricing these policies, which according to plaintiff, would inevitably necessitate premium increases. The plaintiff asserts claims for intentional fraud, negligent misrepresentation, and violations of various California statutes. On January 26, 2007, the court certified the case to proceed as a class action, although CCC is currently seeking review of that decision in the Ninth Circuit Court of Appeals. CCC has denied the material allegations of the amended complaint and intends to vigorously contest the claims.

Numerous unresolved factual and legal issues remain that are critical to the final result, the outcome of which cannot be predicted with any reliability. Accordingly, the extent of losses are not readily determinable at this time. However, based on facts and circumstances presently known in the opinion of management, an unfavorable outcome would not materially adversely affect the equity of the Company, although results of operations may be adversely affected.

Asbestos, Environmental Pollution and Mass Tort (APMT) Reserves

CNA is also a party to litigation and claims related to APMT cases arising in the ordinary course of business. See Note F for further discussion.

Other Litigation

CNA is also a party to other litigation arising in the ordinary course of business. Based on the facts and circumstances currently known, such other litigation will not, in the opinion of management, materially affect the results of operations or equity of CNA.

Note H. Reinsurance

CNA cedes insurance to reinsurers to limit its maximum loss, provide greater diversification of risk, minimize exposures on larger risks and to exit certain lines of business. The ceding of insurance does not discharge the primary liability of the Company. Therefore, a credit exposure exists with respect to property and casualty and life reinsurance ceded to the extent that any reinsurer is unable to meet its obligations or to the extent that the reinsurer disputes the liabilities assumed under reinsurance agreements. Property and casualty reinsurance coverages are tailored to the specific risk characteristics of each product line and CNA's retained amount varies by type of coverage. Reinsurance contracts are purchased to protect specific lines of business such as property, workers' compensation and professional liability. Corporate catastrophe reinsurance is also purchased for property and

Table of Contents

workers' compensation exposure. Most reinsurance contracts are purchased on an excess of loss basis. CNA also utilizes facultative reinsurance in certain lines. In addition, CNA assumes reinsurance as a member of various reinsurance pools and associations.

The following table summarizes the amounts receivable from reinsurers at December 31, 2006 and 2005.

Components of reinsurance receivables

(In millions)	December 31, 2006	December 31, 2005
Reinsurance receivables related to insurance reserves:		
Ceded claim and claim adjustment expense	\$ 8,191	\$ 10,605
Ceded future policy benefits	1,050	1,193
Ceded policyholders' funds	48	56
Reinsurance receivables related to paid losses	658	582
Reinsurance receivables	9,947	12,436
Allowance for uncollectible reinsurance	(469)	(519)
Reinsurance receivables, net of allowance for uncollectible reinsurance	\$ 9,478	\$ 11,917

Ceded claim and claim adjustment expense related reinsurance receivables were reduced by \$1,162 million and \$2,007 million in 2006 and 2005 due to the impact of commutations. The funds withheld liability, which is included in Reinsurance balances payable on the Consolidated Balance Sheets, had a corresponding reduction of \$942 million and \$1,126 million in 2006 and 2005. See further discussion related to commutations below.

The Company has established an allowance for uncollectible reinsurance receivables. The net decrease in the allowance was primarily due to a release of a previously established allowance due to the execution of a significant commutation agreement, as discussed further below. The provision for uncollectible reinsurance was \$23 million, \$35 million and \$95 million in 2006, 2005 and 2004.

The Company attempts to mitigate its credit risk related to reinsurance by entering into reinsurance arrangements with reinsurers that have credit ratings above certain levels and by obtaining collateral. The primary methods of obtaining collateral are through reinsurance trusts, letters of credit and funds withheld balances. Such collateral was approximately \$2.6 billion and \$4.3 billion at December 31, 2006 and 2005. On a more limited basis, CNA may enter into reinsurance agreements with reinsurers that are not rated.

In 2001, the Company entered into a one-year corporate aggregate reinsurance treaty related to the 2001 accident year covering substantially all property and casualty lines of business in the Continental Casualty Company pool (the CCC Cover). The CCC Cover was fully utilized in 2003 and interest charges accrued on the related funds held balance at 8% per annum. In 2006, the Company commuted the CCC Cover. This commutation had no impact on the Consolidated Statements of Operations for the year ended December 31, 2006.

Also, in 2006, the Company commuted several reinsurance treaties, including several finite treaties, with a European reinsurance group. This commutation resulted in a pretax loss, net of allowance for uncollectible reinsurance, of \$48 million. The Company received \$35 million of cash in connection with this significant commutation.

In 2005, CNA entered into several significant commutation agreements, including the commutation of the Aggregate Cover, which was a corporate aggregate reinsurance treaty related to the 1999 through 2001 accident years and covered substantially all of the Company's property and casualty lines of business. These commutations resulted in an unfavorable pretax impact of \$399 million and CNA received \$446 million of cash in connection with these significant commutations.

In 2004, the Company executed commutation agreements with several members of The Trenwick Group. These commutations resulted in unfavorable claim and claim adjustment expense reserve development which was more than

offset by a release of previously established allowance of uncollectible reinsurance. These commutations resulted in a pretax favorable impact of \$28 million and CNA received \$69 million of cash.

CNA's largest recoverables from a single reinsurer at December 31, 2006, including prepaid reinsurance premiums, were approximately \$1,574 million from subsidiaries of Swiss Reinsurance Group, \$1,013 million from subsidiaries of The Hartford Life Group Insurance Company, \$911 million from subsidiaries of Muenchener

Table of Contents

Rueckversicherungs, \$574 million from The Allstate Corporation (Allstate), and \$535 million from syndicates of Equitas.

Prior to the April 2004 sale of its individual life and annuity business to Swiss Re, CNA had reinsured a portion of this business through coinsurance, yearly renewable term and facultative programs to various reinsurers. As a result of the sale of the individual life and annuity business, 100% of the net reserves were reinsured to Swiss Re. As of December 31, 2006 and 2005, CNA ceded \$891 million and \$968 million of future policy benefits to Swiss Re. Subject to certain exceptions, Swiss Re assumed the credit risk of the business that was previously reinsured to other carriers. As of December 31, 2006 and 2005, the assumed credit risk was \$28 million.

On December 31, 2003, the Company completed the sale of the majority of its Group Benefits business to The Hartford Financial Services Group, Inc. (The Hartford). In connection with the sale, CNA ceded insurance reserves to The Hartford. As of December 31, 2006 and 2005, ceded claim and claim adjustment expense reserves, ceded policyholder benefits and ceded policyholder funds were \$1,029 million and \$1,347 million. Subject to certain exceptions, The Hartford assumed 50% of the credit risk of the business that was previously reinsured to other carriers. As of December 31, 2006 and 2005, the assumed credit risk was \$21 million and \$26 million.

Insurance claims and policyholders' benefits reported in the Consolidated Statements of Operations are net of reinsurance recoveries of \$1,314 million, \$1,459 million and \$4,626 million for 2006, 2005 and 2004.

The effects of reinsurance on earned premiums and written premiums for the years ended December 31, 2006, 2005 and 2004 are shown in the following tables.

Components of Earned Premiums

(In millions)	Direct	Assumed	Ceded	Net	Assumed/ Net %
2006 Earned Premiums					
Property and casualty	\$ 9,125	\$ 120	\$ 2,283	\$ 6,962	1.7%
Accident and health	718	59	138	639	9.2
Life	100		98	2	
Total earned premiums	\$ 9,943	\$ 179	\$ 2,519	\$ 7,603	2.4%
2005 Earned Premiums					
Property and casualty	\$ 10,354	\$ 186	\$ 3,675	\$ 6,865	2.7%
Accident and health	1,040	60	400	700	8.6
Life	140		136	4	
Total earned premiums	\$ 11,534	\$ 246	\$ 4,211	\$ 7,569	3.3%
2004 Earned Premiums					
Property and casualty	\$ 10,739	\$ 199	\$ 3,634	\$ 7,304	2.7%
Accident and health	1,228	63	507	784	8.0
Life	419		298	121	
Total earned premiums	\$ 12,386	\$ 262	\$ 4,439	\$ 8,209	3.2%

Included in the direct and ceded earned premiums for the years ended December 31, 2006, 2005 and 2004 are \$1,489 million, \$3,306 million and \$3,293 million related to business that is 100% reinsured as a result of business dispositions and a significant captive program.

Table of Contents**Components of Written Premiums**

Accident and health	1,241	62	508	795	7.8
Life	427		305	122	
Total written premiums	\$ 11,957	\$ 110	\$ 4,188	\$ 7,879	1.4%

The impact of reinsurance on life insurance inforce at December 31, 2006, 2005 and 2004 is shown in the following table.

Components of Life Insurance Inforce

(In millions)	Direct	Assumed	Ceded	Net
2006	\$ 15,652	\$ 1	\$ 15,633	\$ 20
2005	20,548	1	20,528	21
2004	56,610	35	54,486	2,159

Life and accident and health premiums are primarily from long duration contracts; property and casualty premiums are primarily from short duration contracts.

Reinsurance accounting allows for contractual cash flows to be reflected as premiums and losses, as compared to deposit accounting, which requires cash flows to be reflected as assets and liabilities. To qualify for reinsurance accounting, reinsurance agreements must include risk transfer. To meet risk transfer requirements, a reinsurance contract must include both insurance risk, consisting of underwriting and timing risk, and a reasonable possibility of a significant loss for the assuming entity. Reinsurance contracts that include both significant risk sharing provisions, such as adjustments to premiums or loss coverage based on loss experience, and relatively low policy limits as evidenced by a high proportion of maximum premium assessments to loss limits, may require considerable judgment to determine whether or not risk transfer requirements are met. For such contracts, often referred to as finite products, the Company assesses risk transfer for each contract generally by developing quantitative analyses at contract

inception which measure the present value of reinsurer losses as compared to the present value of the related premium. In 2003, the Company discontinued purchases of finite contracts.

Funds Withheld Reinsurance Arrangements

The Company's overall reinsurance program has included certain property and casualty contracts, such as the commuted CCC and Aggregate Covers, that were entered into and accounted for on a funds withheld basis and which are deemed to be finite reinsurance. Under the funds withheld basis, the Company recorded the cash remitted to the reinsurer for the reinsurer's margin, or cost of the reinsurance contract, as ceded premiums. The remainder of

Table of Contents

the premiums ceded under the reinsurance contract not remitted in cash was recorded as funds withheld liabilities. The Company was required to increase the funds withheld balance at stated interest crediting rates applied to the funds withheld balance or as otherwise specified under the terms of the contract. The funds withheld liability was reduced by any cumulative claim payments made by the Company in excess of the Company's retention under the reinsurance contract. If the funds withheld liability was exhausted, interest crediting would cease and additional claim payments would be recoverable from the reinsurer. The funds withheld liability is recorded in Reinsurance balances payable on the Consolidated Balance Sheets.

Interest cost on reinsurance contracts accounted for on a funds withheld basis is incurred during all periods in which a funds withheld liability exists and is included in net investment income. There were no amounts subject to such interest crediting at December 31, 2006. The amount subject to interest crediting rates was \$1,050 million at December 31, 2005.

As of December 31, 2006 and 2005, there were one and thirteen ceded reinsurance treaties in force, respectively, that the Company considers to be finite reinsurance. The remaining treaty at December 31, 2006 provides reinsurance protection for the 1999 accident year on specified portions of the Company's domestic property and casualty business. The remaining treaty is fully utilized and had no related funds withheld liability at December 31, 2006. In 2003, the Company discontinued purchases of such contracts.

Table of Contents

The following table summarizes the pretax impact of contracts accounted for on a funds withheld basis, including the commuted Aggregate and CCC Covers discussed above.

Years ended December 31

(In millions)	Aggregate Cover	CCC Cover	All Other	Total
2006				
Ceded earned premium	\$	\$	\$ (11)	\$ (11)
Ceded claim and claim adjustment expense			(113)	(113)
Ceding commissions				
Interest charges		(40)	(19)	(59)
Pretax expense	\$	\$ (40)	\$ (143)	\$ (183)
2005				
Ceded earned premium	\$ (17)	\$	\$ 48	\$ 31
Ceded claim and claim adjustment expense	(244)		(154)	(398)
Ceding commissions			(27)	(27)
Interest charges	(57)	(66)	(34)	(157)
Pretax expense	\$ (318)	\$ (66)	\$ (167)	\$ (551)
2004				
Ceded earned premium	\$ (1)	\$	\$ (19)	\$ (20)
Ceded claim and claim adjustment expense			15	15
Ceding commissions			2	2
Interest charges	(82)	(91)	(72)	(245)
Pretax expense	\$ (83)	\$ (91)	\$ (74)	\$ (248)

Included in All Other above for the year ended December 31, 2006 is \$110 million of unfavorable development resulting from a commutation, which is included in the ceded claim and claim adjustment expenses above. This unfavorable development was partially offset by the release of previously established allowance for uncollectible reinsurance, resulting in an unfavorable impact of \$48 million.

Included in All Other above for the year ended December 31, 2005 is approximately \$24 million of pretax expense related to Standard Lines which resulted from an unfavorable arbitration ruling on two reinsurance treaties impacting ceded earned premiums, ceded claim and claim adjustment expenses, ceding commissions and interest charges. This unfavorable outcome was partially offset by a release of previously established reinsurance bad debt reserves resulting in a net impact from the arbitration ruling of \$10 million pretax expense for the year ended December 31, 2005.

The pretax impact by operating segment of the Company's funds withheld reinsurance arrangements was as follows:

Years ended December 31

(In millions)	2006	2005	2004
Standard Lines	\$ (155)	\$ (399)	\$ (185)

Specialty Lines	(4)	(41)	(1)

In July of 2005, CNA Surety, a 63% owned and consolidated subsidiary of CNA, refinanced \$30 million of outstanding borrowings under its \$50 million credit agreement with a new credit facility (the 2005 Credit Facility). The 2005 Credit Facility provides a \$50 million revolving credit facility that matures on June 30, 2008. In November of 2005, CNA Surety repaid \$10 million of outstanding borrowings. During 2006, the outstanding 2005 Credit Facility balance of \$20 million was repaid. Subsequently, CNA Surety reduced the available aggregate revolving credit facility to \$25 million in borrowings.

In November of 2006, CNAF retired its \$250 million 6.75% senior notes. A portion of the proceeds from the public offering discussed below were used to repay these notes.

In August of 2006, CNAF sold \$400 million of 6.0% five-year senior notes and \$350 million of 6.5% ten-year senior notes in a public offering.

The combined aggregate maturities for debt at December 31, 2006 are presented in the following table.

Note J. Benefit Plans

Pension and Postretirement Healthcare and Life Insurance Benefit Plans

CNAF and certain subsidiaries sponsor noncontributory pension plans typically covering full-time employees age 21 or over who have completed at least one year of service. In 2000, the CNA Retirement Plan was closed to new participants; instead, retirement benefits are provided to these employees under the Company's savings plans. While the terms of the pension plans vary, benefits are generally based on years of credited service and the employee's highest 60 consecutive months of compensation. CNA uses December 31 as the measurement date for the majority of its plans.

In 2000, approximately 60% of CCC's eligible employees elected to forego earning additional benefits in the CNA Retirement Plan, a defined benefit pension plan. These employees maintain an accrued pension account within the defined benefit pension plan that is credited with interest annually at the 30-year treasury rate. Instead, employees who elected to discontinue accruing benefits in the defined benefit pension plan receive certain enhanced employer contributions in the CNA Savings and Capital Accumulation Plan discussed below. Employees hired on or after January 1, 2000 are not eligible to participate in the CNA Retirement Plan.

CNA's funding policy for defined benefit pension plans is to make contributions in accordance with applicable governmental regulatory requirements with consideration of the funded status of the plans. The assets of the plans are invested primarily in mortgage-backed securities, short term investments, equity securities and limited partnerships.

CNA provides certain healthcare and life insurance benefits to eligible retired employees, their covered dependents and their beneficiaries. The funding for these plans is generally to pay covered expenses as they are incurred.

In September of 2004, the Company announced significant changes to the CNA Retiree Health and Group Benefits plan affecting current and future retirees. Benefit changes were effective January 1, 2005 and included elimination of dental plan subsidy and elimination of various medical plan options. These changes resulted in a substantial unrecognized prior service cost benefit.

Table of Contents

The following table provides a reconciliation of benefit obligations.

Benefit Obligations and Accrued Benefit Costs

Table of Contents

The accumulated benefit obligation for all defined benefit pension plans was \$2,453 million and \$2,468 million at December 31, 2006 and 2005. Included in these amounts were benefit obligations related to an overfunded plan that was less than \$1 million at December 31, 2005. The fair value of plan assets related to the overfunded plan was \$10 million at December 31, 2005.

The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets as of December 31, 2006 and 2005 are presented in the following table.

**Pension Plans with Accumulated Benefit Obligation
in Excess of Plan Assets**

(In millions)	2006	2005
Projected benefit obligation	\$2,485	\$2,567
Accumulated benefit obligation	2,351	2,408
Fair value of plan assets	2,148	2,036

The components of net periodic benefit costs are presented in the following table.

Postretirement benefits			
Discount rate	5.500%	5.875%	6.190%

The table below presents the estimated amounts to be recognized from accumulated other comprehensive income into net periodic benefit cost during 2007.

(In millions)	Pension Benefits	Postretirement Benefits
Amortization of net actuarial loss	\$ 13	\$ 2
Amortization of prior service cost (benefit)	1	(18)

Total estimated amounts to be recognized	\$	14	\$	(16)
---	----	----	----	------

Table of Contents

The long term rate of return for plan assets is determined using a building block approach based on widely-accepted capital market principles, long term return analysis for global fixed income and equity markets as well as the active total return oriented portfolio management style. Long term trends are evaluated relative to current market factors such as inflation, interest rates and fiscal and monetary policies, in order to assess the capital market assumptions as applied to the plan. Consideration of diversification needs and rebalancing is maintained.

The Company has limited its share of the health care trend rate to a cost-of-living adjustment estimated to be 4% per year. The assumed healthcare cost trend rate used in measuring the accumulated postretirement benefit obligation was 4% per year in 2006, 2005 and 2004. The healthcare cost trend rate assumption has a significant effect on the amount of the benefit obligation and periodic cost reported. An increase in the assumed healthcare cost trend rate of 1% in each year would have no impact on the accumulated postretirement benefit obligation or the aggregate net periodic postretirement benefit cost for 2006 as the cost-of-living adjustment is estimated to be 4% which is the maximum contractual benefit. A decrease in the assumed healthcare cost trend rate of 1% in each year would decrease the accumulated postretirement benefit obligation as of December 31, 2006 by \$10 million and impact aggregate net periodic postretirement benefits for 2006 by \$1 million.

The Company's pension plans weighted average asset allocation at December 31, 2006 and 2005, by asset category, is as follows:

Pension Plan Assets

Asset Category	Percentage of Plan Assets	
	December 31,	
	2006	2005
Fixed maturity securities	48%	24%
Equity securities	26	25
Limited partnerships	22	15
Short term investments	2	33
Other	2	3
Total	100%	100%

CNA employs a total return approach whereby a mix of equity and fixed maturity securities are used to maximize the long term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by outperforming plan liabilities over the long run. Risk tolerance is established through careful consideration of the plan liabilities, plan funded status and corporate financial conditions. The investment portfolio contains a diversified blend of fixed maturity, equity and short term securities. Alternative investments, including hedge funds, are used judiciously to enhance risk adjusted long term returns while improving portfolio diversification. Derivatives may be used to gain market exposure in an efficient and timely manner. Investment risk is measured and monitored on an ongoing basis through annual liability measurements, periodic asset/liability studies and quarterly investment portfolio reviews.

Table of Contents

The table below presents the estimated future minimum benefit payments to participants at December 31, 2006.

Estimated Future Minimum Benefit Payments to Participants

(In millions)	Pension Benefits	Postretirement Benefits
2007	150	12
2008	148	12
2009	149	13
2010	150	13
2011	153	14
2012-2016	826	71

In 2007, CNA expects to contribute \$58 million to its pension plans and \$12 million to its postretirement healthcare and life insurance benefit plans.

Savings Plans

CNA sponsors savings plans, which are generally contributory plans that allow most employees to contribute a maximum of 20% of their eligible compensation, subject to certain limitations prescribed by the Internal Revenue Service. The Company contributes matching amounts to participants, amounting to 70% of the first 6% (35% of the first 6% in the first year of employment) of eligible compensation contributed by the employee. Employees vest in these contributions ratably over five years.

As noted above, during 2000, CCC employees were required to make a choice regarding their continued participation in CNA's defined benefit pension plan. Employees who elected to forego earning additional benefits in the defined benefit pension plan and all employees hired by CCC on or after January 1, 2000 receive a Company contribution of 3% or 5% of their eligible compensation, depending on their age. In addition, these employees are eligible to receive additional discretionary contributions of up to 2% of eligible compensation and an additional Company match of up to 80% of the first 6% of eligible compensation contributed by the employee. These contributions are made at the discretion of management and are contributed to participant accounts in the first quarter of the year following management's determination of the discretionary amounts. As of December 31, 2006, employees do not vest in these contributions until reaching five years of service. Effective January 1, 2007, employees vest in these contributions ratably over five years, retroactively applied.

Benefit expense for the Company's savings plans was \$55 million, \$24 million and \$49 million in 2006, 2005 and 2004.

Stock-Based Compensation

The CNA Long Term Incentive Plan (the LTI Plan) authorizes the grant of options and stock appreciation rights (SARs) to certain management personnel for up to 4 million shares of the Company's common stock. All options and SARs granted have ten-year terms and vest ratably over the four-year period following the date of grant. The number of shares available for the granting of options and SARs under the LTI Plan as of December 31, 2006 was approximately 2 million.

Table of Contents

The following table presents activity under the LTI Plan during 2006, 2005 and 2004.

Options and SARs Plan Activity

	2006		2005		2004	
	Number	Weighted-Average Option Price	Number	Weighted-Average Option Price	Number	Weighted-Average Option Price
	of Awards	per Award	of Awards	per Award	of Awards	per Award
Balance at January 1	1,628,600	\$ 28.71	1,474,000	\$ 29.17	1,434,800	\$ 29.97
Awards granted	327,000	30.98	328,800	27.27	350,400	26.30
Awards exercised	(236,500)	30.71	(42,050)	28.60	(2,900)	26.28
Awards forfeited	(24,200)	29.05	(132,150)	30.38	(308,300)	29.63
Balance at December 31	1,694,900	\$ 28.86	1,628,600	\$ 28.71	1,474,000	\$ 29.17
Awards exercisable at December 31	965,400	\$ 29.13	963,650	\$ 30.17	827,450	\$ 31.16
Weighted average fair value per share of awards granted		\$ 10.73		\$ 7.48		\$ 7.74

During 2006, the Company awarded SARs totaling 327,000 shares. The SARs balance at December 31, 2006 was 319,000 shares with 8,000 shares forfeited.

The weighted average grant-date fair value of awards granted during the year ended December 31, 2006 was \$10.73 per award. The weighted average remaining contractual term of awards outstanding and exercisable as of December 31, 2006, were 6.65 years and 5.42 years. The aggregate intrinsic values of awards outstanding and exercisable at December 31, 2006 were \$19 million and \$11 million. The total intrinsic value of awards exercised for the year ended December 31, 2006 was \$2 million.

The fair value of granted options and SARs was estimated at the grant date using the Black-Scholes option-pricing model. The Black-Scholes model incorporates a risk free rate of return and various assumptions regarding the underlying common stock and the expected life of the securities granted. Different interest rates and assumptions were used for each grant, as appropriate at that date. The risk free interest rates used ranged from 2.7% to 4.6%. The estimates of the underlying common stock's volatility ranged from 22.3% to 25.2%, and the expected dividend yield was 0% for all valuations. The expected life of the securities granted ranged from 5.0 to 6.3 years.

CNA Surety has reserved shares of its common stock for issuance to directors, officers and employees of CNA Surety through incentive stock options, non-qualified stock options and SARs under separate plans (CNA Surety Plans). The CNA Surety Plans have in the aggregate 3 million shares available for which options may be granted. At December 31, 2006, approximately 1 million options were outstanding under these plans. The data provided in the preceding paragraphs and table does not include CNA Surety's stock-based compensation plans.

The Company recorded stock-based compensation expense of \$3.2 million and \$336 thousand for the years ended December 31, 2006 and 2005. The related income tax benefit recognized was \$1.1 million and \$118 thousand. These amounts also include compensation in the form of restricted stock grants awarded by the Company and expense recorded by CNA Surety for these periods. At December 31, 2006, the compensation cost related to nonvested awards not yet recognized was \$4.2 million and the weighted average period over which it is expected to be recognized is 1.27 years.

At December 31, 2006, the Company's non-vested portion of a restricted stock grant totaled 28,329 shares with a grant-date fair value of \$842 thousand.

Equity based compensation that is not fully vested prior to termination is generally forfeited upon termination, except as otherwise provided by contractual obligations. In addition, any such compensation that vested prior to termination is generally cancelled immediately, except in cases of retirement, death or disability, and as otherwise provided by contractual obligations.

Table of Contents**Note K. Operating Leases, Other Commitments and Contingencies, and Guarantees*****Operating Leases***

CNA occupies office facilities under lease agreements that expire at various dates. In addition, data processing, office and transportation equipment is leased under agreements that expire at various dates. Most leases contain renewal options that provide for rent increases based on prevailing market conditions. Lease expense for the years ended December 31, 2006, 2005 and 2004 was \$53 million, \$71 million and \$70 million. Lease and sublease revenues for the years ended December 31, 2006, 2005 and 2004 were \$7 million, \$5 million and \$7 million. CCC and CAC remain contingently liable under two ground leases covering a portion of an office building property sold in 2003. Although the two leases expire in 2058, CCC and CAC have certain collateral, as well as certain contractual rights and remedies, in place to minimize any exposure that may arise from the new owner's failure to comply with its obligations under the ground leases.

The table below presents the future minimum lease payments to be made under non-cancelable operating leases along with future minimum sublease receipts to be received on owned and leased properties at December 31, 2006.

Future Minimum Lease Payments and Sublease Receipts

(In millions)	Future Minimum Lease Payments	Future Minimum Sublease Receipts
2007	\$ 49	\$ 7
2008	43	6
2009	35	5
2010	31	5
2011	25	4
Thereafter	51	5
Total	\$ 234	\$ 32

The Company holds an investment in a real estate joint venture. In the normal course of business, CNA, on a joint and several basis with other unrelated insurance company shareholders, has committed to continue funding the operating deficits of this joint venture. Additionally, CNA and the other unrelated shareholders, on a joint and several basis, have guaranteed an operating lease for an office building, which expires in 2016.

The guarantee of the operating lease is a parallel guarantee to the commitment to fund operating deficits; consequently, the separate guarantee to the lessor is not expected to be triggered as long as the joint venture continues to be funded by its shareholders and continues to make its annual lease payments.

In the event that the other parties to the joint venture are unable to meet their commitments in funding the operations of this joint venture, the Company would be required to assume the obligation for the entire office building operating lease. The maximum potential future lease payments at December 31, 2006 that the Company could be required to pay under this guarantee are approximately \$239 million. If CNA were required to assume the entire lease obligation, the Company would have the right to pursue reimbursement from the other shareholders and would have the right to all sublease revenues.

Other Commitments and Contingencies

In the normal course of business, CNA has provided letters of credit in favor of various unaffiliated insurance companies, regulatory authorities and other entities. At December 31, 2006 and 2005, there were approximately \$27 million and \$30 million of outstanding letters of credit.

The Company has entered into a limited number of guaranteed payment contracts, primarily relating to telecommunication and software services, amounting to approximately \$15 million at December 31, 2006. Estimated

future minimum payments under these contracts are as follows: \$12 million in 2007 and \$3 million in 2008. The Company currently has an agreement in place for services to be rendered in relation to employee benefits, administration and consulting. If the Company terminates this agreement without cause, or the agreement is

Table of Contents

terminated due to the Company's default, prior to the end of any renewal term, the Company shall pay the greater of fifteen percent of the average monthly fees related to such services for the remainder of the term, or the specified minimum termination fee for the year. The minimum termination fee for the year ended December 31, 2007 is \$7 million.

Guarantees

CNA has provided guarantees of the indebtedness of certain of its independent insurance producers. These guarantees expire in 2008. The Company would be required to remit prompt and complete payment when due, should the primary obligor default. In the event of default on the part of the primary obligor, the Company has a right to any and all shares of common stock of the primary obligor. The maximum potential amount of future payments that CNA could be required to pay under these guarantees was approximately \$6 million at December 31, 2006.

In the course of selling business entities and assets to third parties, the Company has agreed to indemnify purchasers for losses arising out of breaches of representation and warranties with respect to the business entities or assets being sold, including, in certain cases, losses arising from undisclosed liabilities or certain named litigation. Such indemnification provisions generally survive for periods ranging from nine months following the applicable closing date to the expiration of the relevant statutes of limitation. As of December 31, 2006, the aggregate amount of quantifiable indemnification agreements in effect for sales of business entities, assets and third party loans was \$933 million.

In addition, the Company has agreed to provide indemnification to third party purchasers for certain losses associated with sold business entities or assets that are not limited by a contractual monetary amount. As of December 31, 2006, the Company had outstanding unlimited indemnifications in connection with the sales of certain of its business entities or assets that included tax liabilities arising prior to a purchaser's ownership of an entity or asset, defects in title at the time of sale, employee claims arising prior to closing and in some cases losses arising from certain litigation and undisclosed liabilities. These indemnification agreements survive until the applicable statutes of limitation expire, or until the agreed upon contract terms expire. As of December 31, 2006, the Company has recorded approximately \$28 million of liabilities related to these indemnification agreements.

In connection with the issuance of preferred securities by CNA Surety Capital Trust I, CNA Surety issued a guarantee of \$75 million to guarantee the payment by CNA Surety Capital Trust I of annual dividends of \$1.5 million over 30 years and redemption of \$30 million of preferred securities.

Note L. Stockholders' Equity and Statutory Financial Information***Stockholders' Equity***

The Series H Issue was held by Loews and accrued cumulative dividends at an initial rate of 8% per year, compounded annually. In August 2006, the Company repurchased the Series H Issue for approximately \$993 million, a price equal to the liquidation preference.

The Company financed the repurchase of the Series H Issue with the proceeds from the sales of: (i) 7.0 million shares of its common stock in a public offering for approximately \$235.5 million; (ii) \$400 million of new 6.0% five-year senior notes and \$350 million of new 6.5% ten-year senior notes in a public offering; and (iii) 7.86 million shares of its common stock to Loews in a private placement for approximately \$264.5 million.

CNA's Board of Directors has approved a Share Repurchase Program to purchase, in the open market or through privately negotiated transactions, its outstanding common stock, as Company management deems appropriate. No shares of common stock were purchased during 2006 or 2005.

Statutory Accounting Practices (Unaudited)

CNA's domestic insurance subsidiaries maintain their accounts in conformity with accounting practices prescribed or permitted by insurance regulatory authorities, which vary in certain respects from GAAP. In converting from statutory accounting principles to GAAP, typical adjustments include deferral of policy acquisition costs and the inclusion of net unrealized holding gains or losses in shareholders' equity relating to certain fixed maturity securities. The National Association of Insurance Commissioners (NAIC) has codified statutory accounting principles to foster more consistency among the states for accounting guidelines and reporting.

Table of Contents

CNA's insurance subsidiaries are domiciled in various jurisdictions. These subsidiaries prepare statutory financial statements in accordance with accounting practices prescribed or permitted by the respective jurisdictions' insurance regulators. Prescribed statutory accounting practices are set forth in a variety of publications of the NAIC as well as state laws, regulations and general administrative rules.

CCC follows a permitted practice related to the statutory provision for reinsurance, or the uncollectible reinsurance reserve. This permitted practice allows CCC to record an additional uncollectible reinsurance reserve amount through a different financial statement line item than the prescribed statutory convention. This permitted practice had no effect on CCC's statutory surplus in 2006 or 2005.

CNAF's ability to pay dividends and other credit obligations is significantly dependent on receipt of dividends from its subsidiaries. The payment of dividends to CNAF by its insurance subsidiaries without prior approval of the insurance department of each subsidiary's domiciliary jurisdiction is limited by formula. Dividends in excess of these amounts are subject to prior approval by the respective state insurance departments.

Dividends from CCC are subject to the insurance holding company laws of the State of Illinois, the domiciliary state of CCC. Under these laws, ordinary dividends, or dividends that do not require prior approval of the Illinois Department of Financial and Professional Regulation - Division of Insurance (the Department), may be paid only from earned surplus, which is calculated by removing unrealized gains from unassigned surplus. As of December 31, 2006, CCC is in a positive earned surplus position, enabling CCC to pay approximately \$556 million of dividend payments during 2007 that would not be subject to the Department's prior approval. The actual level of dividends paid in any year is determined after an assessment of available dividend capacity, holding company liquidity and cash needs as well as the impact the dividends will have on the statutory surplus of the applicable insurance company.

CNAF's domestic insurance subsidiaries are subject to risk-based capital requirements. Risk-based capital is a method developed by the NAIC to determine the minimum amount of statutory capital appropriate for an insurance company to support its overall business operations in consideration of its size and risk profile. The formula for determining the amount of risk-based capital specifies various factors, weighted based on the perceived degree of risk, which are applied to certain financial balances and financial activity. The adequacy of a company's actual capital is evaluated by a comparison to the risk-based capital results, as determined by the formula. Companies below minimum risk-based capital requirements are classified within certain levels, each of which requires specified corrective action. As of December 31, 2006 and 2005, all of CNAF's domestic insurance subsidiaries exceeded the minimum risk-based capital requirements.

Combined statutory capital and surplus and net income, determined in accordance with accounting practices prescribed or permitted by insurance regulatory authorities for the property and casualty and the life and group insurance subsidiaries, were as follows.

Accumulated other comprehensive income \$ 549 \$ 359

Note N. Business Segments

CNA's core property and casualty insurance operations are reported in two business segments: Standard Lines and Specialty Lines. CNA's non-core operations are managed in two segments: Life and Group Non-Core and Corporate and Other Non-Core. Standard Lines includes standard property and casualty coverages sold to small and middle market commercial businesses primarily through an independent agency distribution system, and excess and surplus lines, as well as insurance and risk management products sold to large corporations in the U.S. as well as globally. Specialty Lines provides a broad array of professional, financial and specialty property and casualty products and services. Life and Group Non-Core primarily includes the results of the life and group lines of business that have either been sold or placed in run-off. Corporate and Other Non-Core primarily includes the results of certain property and casualty lines of business placed in run-off, including CNA Re. This segment also includes the results related to the centralized adjusting and settlement of APMT claims as well as the results of

Table of Contents

CNA's participation in voluntary insurance pools, which are primarily in run-off, and various non-insurance operations.

The accounting policies of the segments are the same as those described in Note A. The Company manages most of its assets on a legal entity basis, while segment operations are conducted across legal entities. As such, only insurance and reinsurance receivables, insurance reserves and deferred acquisition costs are readily identifiable by individual segment. Distinct investment portfolios are not maintained for each segment; accordingly, allocation of assets to each segment is not performed. Therefore, net investment income and realized investment gains or losses are allocated primarily based on each segment's net carried insurance reserves, as adjusted.

All significant intrasegment income and expense has been eliminated. Standard Lines' other revenues and expenses include revenues for services provided by CNA ClaimsPlus to other units within the Standard Lines segment that are eliminated at the consolidated level. Intrasegment other revenues and expenses eliminated at the consolidated level were approximately \$50 million, \$65 million and \$93 million for the years ended December 31, 2006, 2005 and 2004. Income taxes have been allocated on the basis of the taxable income of the segments.

Approximately 7.1%, 6.1% and 5.0% of CNA's gross written premiums were derived from outside the United States, primarily the United Kingdom, for the years ended December 31, 2006, 2005 and 2004. Gross written premiums from the United Kingdom were approximately 3.2%, 2.8% and 2.3% of CNA's premiums for the years ended December 31, 2006, 2005 and 2004. Gross written premiums from any individual foreign country, other than the United Kingdom, were not significant.

In the following tables, certain financial measures are presented to provide information used by management to monitor the Company's operating performance. Management utilizes these financial measures to monitor the Company's insurance operations and investment portfolio. Net operating income, which is derived from certain income statement amounts, is used by management to monitor performance of the Company's insurance operations. The Company's investment portfolio is monitored through analysis of various quantitative and qualitative factors and certain decisions related to the sale or impairment of investments that produce realized gains and losses. Net realized investment gains and losses are comprised of after-tax realized investment gains and losses net of participating policyholders' and minority interests.

Net operating income is calculated by excluding from net income the after-tax effects of 1) net realized investment gains or losses, 2) income or loss from discontinued operations and 3) cumulative effects of changes in accounting principles. In the calculation of net operating income, management excludes after-tax net realized investment gains or losses because net realized investment gains or losses related to the Company's investment portfolio are largely discretionary, except for losses related to other-than-temporary impairments, are generally driven by economic factors that are not necessarily consistent with key drivers of underwriting performance, and are therefore not an indication of trends in insurance operations.

The Company's investment portfolio is monitored by management through analyses of various factors including unrealized gains and losses on securities, portfolio duration and exposure to interest rate, market and credit risk. Based on such analyses, the Company may impair an investment security in accordance with its policy, or sell a security. Such activities will produce realized gains and losses.

The significant components of the Company's continuing operations and selected balance sheet items are presented in the following tables.

Table of Contents

Eliminations	(55)	(77)	(120)
Total revenue	\$ 10,376	\$ 9,862	\$ 9,924

Note O. Restructuring and Other Related Charges

In 2001, the Company finalized and approved two separate restructuring plans. The first plan related to the Company's Information Technology operations. The initial restructuring and other related charges amounted to \$62 million in 2001. The remaining accrual related to this restructuring charge of \$3 million was released in 2004.

The second plan related to restructuring the property and casualty segments and Life and Group Non-Core segment, discontinuation of the variable life and annuity business and consolidation of real estate locations. During the second quarter of 2006, management reevaluated the sufficiency of the remaining accrual, which related to lease termination costs, and determined that the liability is no longer required as the Company has completed its lease obligations. As a result, the excess remaining accrual was released in 2006, resulting in pretax income of \$13 million for the year ended December 31, 2006. During 2005 and 2004, approximately \$1 million and \$5 million of costs were paid. The initial restructuring and other related charges amounted to \$189 million in 2001.

Note P. Significant Transactions

Specialty Medical Business

On January 6, 2005, the Company completed the sale of its specialty medical business to Aetna Inc. As a result of the sale, CNA recorded a realized gain of approximately \$9 million in 2005. The revenues of the business sold were \$17 million and \$166 million for the years ended December 31, 2005 and 2004. Net income related to this business was \$18 million and \$16 million for the years ended December 31, 2005 and 2004.

Table of Contents**Individual Life Sale**

On April 30, 2004, the Company completed the sale of its individual life insurance business to Swiss Re. The business sold included term, universal and permanent life insurance policies and individual annuity products. CNA's individual long term care and structured settlement businesses were excluded from the sale. Swiss Re acquired VFL and CNA's Nashville, Tennessee insurance servicing and administration building as part of the sale. In connection with the sale, CNA entered into a reinsurance agreement in which CAC ceded its individual life insurance business to Swiss Re on a 100% indemnity reinsurance basis. Subject to certain exceptions, Swiss Re assumed the credit risk of the business that was previously reinsured to other carriers. As a result of this reinsurance agreement with Swiss Re, approximately \$1 billion of future policy benefit reserves were ceded to Swiss Re. CNA received consideration of approximately \$700 million and recorded a realized investment loss of \$622 million pretax (\$389 million after-tax).

The revenues of the individual life business through the sale date were \$151 million for the year ended December 31, 2004. The net results for this business through the sale date were a net loss of \$6 million for the year ended December 31, 2004.

Note Q. Discontinued Operations

CNA has discontinued operations which consist of run-off insurance operations acquired in its merger with The Continental Corporation in 1995. The business consists of facultative property and casualty, treaty excess casualty and treaty pro-rata reinsurance with underlying exposure to a diverse, multi-line domestic and international book of business encompassing property, casualty, the London Market and marine liabilities. The run-off operations are concentrated in United Kingdom and Bermuda subsidiaries also acquired in the merger.

The Company has initiated and is actively pursuing a plan to sell a portion of the discontinued operations. The Company expects a sale to be completed in 2007.

Results of the discontinued operations were as follows:

Discontinued Operations

Years ended December 31	2006	2005	2004
(In millions)			
Revenues:			
Net investment income	\$ 17	\$ 15	\$ 17
Realized investment gains (losses) and other	(2)	7	(7)
Total revenues	15	22	10
Insurance related (expenses) benefits	(51)	1	(30)
Income (loss) before income taxes	(36)	23	(20)
Income tax (expense) benefit	7	(2)	(1)
Income (loss) from discontinued operations, net of tax	\$ (29)	\$ 21	\$ (21)

The results for 2006 reflect an impairment loss of approximately \$29 million related to the anticipated sale of a portion of the discontinued operations. The assets and liabilities that would be subject to a sale were \$239 million and \$157 million at December 31, 2006. Excluding the impairment loss on the anticipated sale, net loss for this business was \$1 million and \$3 million for the years ended December 31, 2006 and 2004, and net income was \$13 million for the year ended December 31, 2005. The Company's subsidiary, The Continental Corporation, provides a guarantee for a portion of the subject liabilities related to certain marine products. Any sale is expected to include provisions that would significantly limit the Company's exposure related to this guarantee.

Table of Contents

Net assets of discontinued operations, including the assets and liabilities subject to the sale discussed above, are included in Other assets in the Consolidated Balance Sheets and were as follows:

Discontinued Operations

December 31 (In millions)	2006	2005
Assets:		
Investments	\$ 317	\$ 358
Reinsurance receivables	33	78
Cash	40	29
Other assets	3	5
 Total assets	 393	 470
Liabilities:		
Insurance reserves	308	338
Other liabilities	17	19
 Total liabilities	 325	 357
 Net assets of discontinued operations	 \$ 68	 \$ 113

The Accumulated other comprehensive income, net of tax, reported on the Consolidated Balance Sheets includes \$1 million and \$11 million related to unrealized gains and \$15 million and \$6 million related to the cumulative foreign currency translation adjustment for discontinued operations as of December 31, 2006 and 2005.

CNA's accounting and reporting for discontinued operations is in accordance with APB Opinion No. 30, Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions (APB 30). At December 31, 2006 and 2005, the insurance reserves are net of discount of \$94 million and \$105 million. Excluding the impairment loss recorded in 2006 discussed above, the income (loss) from discontinued operations reported above primarily represents the net investment income, realized investment gains and losses, foreign currency gains and losses, effects of the accretion of the loss reserve discount and re-estimation of the ultimate claim and claim adjustment expense of the discontinued operations.

Table of Contents**Note R. Quarterly Financial Data (Unaudited)**

The following tables set forth unaudited quarterly financial data for the years ended December 31, 2006 and 2005.

Table of Contents

During the fourth quarter of 2006, the Company commuted a significant reinsurance contract that resulted in unfavorable development of \$110 million, which was partially offset by the release of previously established allowance for uncollectible reinsurance. This commutation resulted in an unfavorable impact of \$48 million. Additionally, the Company recorded \$74 million of non-commutation related unfavorable net prior year development. During the fourth quarter of 2005, the Company recorded unfavorable net prior year development of \$591 million, which included \$377 million from significant commutations and established surety losses related to a national contractor of \$70 million.

Note S. Related Party Transactions

CNA reimburses Loews, or pays directly, for management fees, travel and related expenses and expenses of investment facilities and services provided to CNA. The amounts reimbursed or paid by CNA were approximately \$27 million, \$23 million and \$21 million for the years ended December 31, 2006, 2005 and 2004. The CNA Tax Group is included in the consolidated federal income tax return of Loews and its eligible subsidiaries. See Note E for a detailed description of the income tax agreement with Loews. In addition, CNA writes, at standard rates, a limited amount of insurance for Loews and its subsidiaries. The total related premiums for the year ended December 31, 2006 were \$1 million. The total related premiums for the years ended December 31, 2005 and 2004 were less than \$1 million.

In August 2006, the Company repurchased the Series H Issue from Loews. In addition, the Company sold 7.86 million shares of its common stock to Loews. See Note L for further discussion. In conjunction with the sale, the Company and Loews also entered into a Registration Rights Agreement pursuant to which Loews has the right to demand that the Company register up to an aggregate of 7.86 million shares for resale in a public offering and may request that the Company include those shares in certain registration statements that it may file in the future.

CNA previously sponsored a stock ownership plan whereby the Company financed the purchase of Company common stock by certain officers, including executive officers. Interest charged on the principal amount of these outstanding stock purchase loans is generally equivalent to the long term applicable federal rate, compounded semi-annually, in effect on the disbursement date of the loan. Loans made pursuant to the plan are generally full recourse with a ten-year term maturing between October of 2008 and May of 2010, and are secured by the stock purchased. The carrying value of the loans as of December 31, 2006 exceeds the fair value of the related common stock collateral by \$7 million.

CNA Surety Corporation - Loans to National Contractor

CNA Surety has provided significant surety bond protection for a large national contractor that undertakes projects for the construction of government and private facilities, a substantial portion of which have been reinsured by CCC. In order to help this contractor meet its liquidity needs and complete projects which had been bonded by CNA Surety, commencing in 2003 CNAF provided loans to the contractor through a credit facility. Due to reduced operating cash flow at the contractor these loans were fully impaired through realized investment losses in 2004 and 2005. For the years ended December 31, 2005 and 2004, the Company recorded a pretax impairment charge of \$34 million and \$56 million. The Company no longer provides additional liquidity to the contractor and has not recognized interest income related to the loans since June 30, 2005.

In addition to the impairment of loans outstanding under the credit facility, the Company determined that the contractor would likely be unable to meet its obligations under the surety bonds. Accordingly, during 2005, CNA Surety established \$110 million of surety loss reserves in anticipation of future loss payments, \$50 million of which was ceded to CCC under the reinsurance agreements discussed below. Further deterioration of the contractor's operating cash flow could result in higher loss estimates and trigger additional reserve actions. If any such reserve additions were required, CCC would have all further surety bond exposure through the reinsurance arrangements. During the years ended December 31, 2006 and 2005, CNA Surety paid \$34 million and \$26 million related to surety losses of the contractor.

Table of Contents

CNA Surety may provide surety bonds on a limited basis on behalf of the contractor to support its revised restructuring plan, subject to the contractor's compliance with CNA Surety's underwriting standards and ongoing management of CNA Surety's exposure in relation to the contractor. All surety bonds written for the contractor are issued by CCC and its affiliates, other than CNA Surety, and are subject to underlying reinsurance treaties pursuant to which all bonds written on behalf of CNA Surety are 100% reinsured to one of CNA Surety's insurance subsidiaries. CCC provides reinsurance protection to CNA Surety for losses in excess of an aggregate of \$60 million associated with the contractor. This treaty provides coverage for the life of bonds either in force or written from January 1, 2005 to December 31, 2005. CCC and CNA Surety agreed by addendum to extend this contract for twenty four months, expiring on December 31, 2007.

CCC and CNA Surety continue to engage in periodic discussions with insurance regulatory authorities regarding the level of surety bonds provided for this contractor and will continue to apprise those authorities of the status of their ongoing exposure to this account.

Indemnification and subrogation rights, including rights to contract proceeds on construction projects in the event of default, reduce CNA Surety's and ultimately the Company's exposure to loss. While the Company believes that the contractor's continuing restructuring efforts may be successful, the contractor's failure to ultimately achieve its extended restructuring plan or perform its contractual obligations under the Company's surety bonds could have a material adverse effect on the Company's results of operations. If such failures occur, the Company estimates the additional surety loss, net of indemnification and subrogation recoveries, but before the effects of minority interest, could be up to \$90 million pretax.

CNAF has also guaranteed or provided collateral for the contractor's letters of credit. As of December 31, 2006 and December 31, 2005, these guarantees and collateral obligations aggregated \$9 million and \$13 million.

Reinsurance

CCC provided an excess of loss reinsurance contract to the insurance subsidiaries of CNA Surety over a period that expired on December 31, 2000 (the stop loss contract). The stop loss contract limits the net loss ratios for CNA Surety with respect to certain accounts and lines of insurance business. In the event that CNA Surety's accident year net loss ratio exceeds 24% for 1997 through 2000 (the contractual loss ratio), the stop loss contract requires CCC to pay amounts equal to the amount, if any, by which CNA Surety's actual accident year net loss ratio exceeds the contractual loss ratio multiplied by the applicable net earned premiums. The minority shareholders of CNA Surety do not share in any losses that apply to this contract.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
CNA Financial Corporation
Chicago, Illinois

We have audited the accompanying consolidated balance sheets of CNA Financial Corporation (an affiliate of Loews Corporation) and subsidiaries (the Company), as of December 31, 2006 and 2005, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. Our audits also included the financial statement schedules listed in the Index at Item 15. These financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Note A to the consolidated financial statements, the Company changed its method of accounting for defined benefit pension and other postretirement plans in 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2007 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of CNA Financial Corporation (CNAF or the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. CNAF's internal control system was designed to provide reasonable assurance to the Company's management, its Audit Committee and Board of Directors regarding the preparation and fair presentation of published financial statements.

There are inherent limitations to the effectiveness of any internal control or system of control, however well designed, including the possibility of human error and the possible circumvention or overriding of such controls or systems. Moreover, because of changing conditions the reliability of internal controls may vary over time. As a result even effective internal controls can provide no more than reasonable assurance with respect to the accuracy and completeness of financial statements and their process of preparation.

CNAF management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006. In making this assessment, it has used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. Based on those criteria and our assessment we believe that, as of December 31, 2006, the Company's internal control over financial reporting was effective.

CNAF's independent public accountant, Deloitte & Touche LLP, has issued an audit report covering our assessment of the Company's internal control over financial reporting. This report appears on page 137.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
CNA Financial Corporation
Chicago, Illinois

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that CNA Financial Corporation (an affiliate of Loews Corporation) and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Table of Contents

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedules as of and for the year ended December 31, 2006 of the Company and our report dated February 22, 2007 expresses an unqualified opinion on those financial statements and financial statement schedules and includes an explanatory paragraph concerning a change in method of accounting for defined benefit pension and other postretirement plans in 2006.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

As of December 31, 2006, the Company's management, including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on this evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures are effective.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, and the implementing rules of the Securities and Exchange Commission, the Company included a report of management's assessment of the design and effectiveness of its internal controls as part of this Annual Report on Form 10-K for the fiscal year ended December 31, 2006. The independent registered public accounting firm of the Company also attested to, and reported on, management's assessment of the effectiveness of internal control over financial reporting. Management's report and the independent registered public accounting firm's attestation report are included in Item 8 under the captions entitled Management's Report on Internal Control Over Financial Reporting and Report of Independent Registered Public Accounting Firm and are incorporated herein by reference.

There has been no change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

In November of 2006, CNAF retired its \$250 million 6.75% senior notes. A portion of the proceeds from the public offering discussed below were used to repay these notes.

In August of 2006, CNAF sold \$400 million of 6.0% five-year senior notes and \$350 million of 6.5% ten-year senior notes in a public offering.

C. Commitments and Contingencies

In the normal course of business, CNAF guarantees the indebtedness of certain of its subsidiaries to the debt maturity or payoff, whichever comes first. These guarantees arise in the normal course of business and are given to induce a lender to enter into an agreement with CNAF's subsidiaries. CNAF would be required to remit prompt and complete payment when due, should the primary obligor default. The maximum potential amount of future payments that CNAF could be required to pay under these guarantees are approximately \$22 million at December 31, 2006.

In the course of selling business entities and assets to third parties, CNAF has agreed to indemnify purchasers for losses arising out of breaches of representation and warranties with respect to the business entities or assets being sold, including, in certain cases, losses arising from undisclosed liabilities or certain named litigation. Such indemnification provisions generally survive for periods ranging from nine months following the applicable closing date to the expiration of the relevant statutes of limitation. As of December 31, 2006, the aggregate amount of quantifiable

indemnification agreements in effect for sales of business entities and assets was \$259 million.

In addition, CNAF has agreed to provide indemnification to third party purchasers for certain losses associated with sold business entities or assets that are not limited by a contractual monetary amount. As of December 31, 2006,

Table of Contents

CNAF had outstanding unlimited indemnifications in connection with the sales of certain of its business entities or assets for tax liabilities arising prior to a purchaser's ownership of an entity or asset, defects in title at the time of sale, employee claims arising prior to closing and in some cases losses arising from certain litigation and undisclosed liabilities. These indemnification agreements survive until the applicable statutes of limitation expire, or until the agreed upon contract terms expire. As of December 31, 2006, CNAF has recorded approximately \$10 million of liabilities related to these indemnification agreements.

CNAF has provided guarantees of the indebtedness of certain of its subsidiaries' independent insurance producers. These guarantees expire in 2008. CNAF would be required to remit prompt and complete payment when due, should the primary obligor default. In the event of default on the part of the primary obligor, CNAF has a right to any and all shares of common stock of the primary obligor. The maximum potential amount of future payments that CNAF could be required to pay under these guarantees was approximately \$6 million at December 31, 2006.

In the normal course of business, CNAF has provided guarantees to holders of structured settlement annuities (SSA) provided by certain of its subsidiaries, which expire through 2120. CNAF would be required to remit SSA payments due to claimants if the primary obligor failed to perform on these contracts. The maximum potential amount of future payments that CNAF could be required to pay under these guarantees are approximately \$1.8 billion at December 31, 2006.

CNA Surety Corporation - Loans to National Contractor

CNA Surety, a 63% owned and consolidated subsidiary of Continental Casualty Company (CCC), a wholly-owned subsidiary of CNAF, has provided significant surety bond protection for a large national contractor that undertakes projects for the construction of government and private facilities, a substantial portion of which have been reinsured by CCC. In order to help this contractor meet its liquidity needs and complete projects which had been bonded by CNA Surety, commencing in 2003 CNAF provided loans to the contractor through a credit facility. Due to reduced operating cash flow at the contractor these loans were fully impaired through realized investment losses in 2004 and 2005. For the years ended December 31, 2005 and 2004, CNAF recorded a pretax impairment charge of \$34 million and \$56 million. CNAF no longer provides additional liquidity to the contractor and has not recognized interest income related to the loans since June 30, 2005.

CNAF has also guaranteed or provided collateral for the contractor's letters of credit. As of December 31, 2006 and December 31, 2005, these guarantees and collateral obligations aggregated \$9 million and \$13 million.
