Chairman's
LETTER TO SHAREHOLDERS

i Robert P. Bremner ii Chairman of the Board

Dear Fellow Shareholders:

I'd like to use my initial letter to you to accomplish several things. First, I want to report that after fourteen years of service on your Fund's Board, including the last twelve as chairman, Tim Schwertfeger retired from the Board in June. The Board has elected me to replace him as the chairman, the first time this role has been filled by someone who is not an employee of Nuveen Investments. Electing an independent chairman marks a significant milestone in the management of your Fund, and it aligns us with what is now considered a best practice in the fund industry. Further, it demonstrates the independence with which your Board has always acted on your behalf.

Following Tim will not be easy. During my eleven previous years on the Nuveen Fund Board, I found that Tim always set a very high standard by combining insightful industry and market knowledge and sound, clear judgment. While the Board will miss his wise counsel, I am certain we will retain the primary commitment Tim shared with all of us—an unceasing dedication to creating and retaining value for Nuveen Fund shareholders. This focus on value over time is a touchstone that I and all the other Board members will continue to use when making decisions on your behalf.

Second, I also want to report that we are very fortunate to be welcoming two new Board members to our team. John Amboian, the current chairman and CEO of Nuveen Investments, has agreed to replace Tim as Nuveen's representative on the Board. John's presence will allow the independent Board members to benefit not only from his leadership role at Nuveen but also his broad understanding of the fund industry and Nuveen's role within it. We also are adding Terry Toth as an independent director. A former CEO of the Northern Trust Company's asset management group, Terry will bring extensive experience in the fund industry to our deliberations.

Third, on behalf of the entire Board, I would like to acknowledge the effort the whole Nuveen organization is making to resolve the auction rate preferred share situation in a satisfactory manner. As you know, we are actively pursuing a number of possible solutions, all with the goal of providing liquidity for preferred shareholders while preserving the potential benefits of leverage for common shareholders. We appreciate the patience you have shown as we've worked through the many details involved.

Finally, I urge you to take the time to review the Portfolio Managers' Comments, the Common Share Distribution and Share Price Information, and the Performance Overview sections of this report. All of us are grateful that you have chosen Nuveen Investments as a partner as you pursue your financial goals, and, on behalf of myself and the other members of your Fund's Board, let me say we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner
Chairman of the Board
August 22, 2008

Portfolio Managers COMMENTS

Nuveen Investments Closed-End Funds

JDD

JDD features portfolio management by teams at four separate sub-advisers.

NWQ Investment Management Company, LLC, (NWQ), an affiliate of Nuveen Investments, invests its portion of the Fund's assets in dividend-paying common stocks. Jon Bosse, Chief Investment Officer of NWQ, leads the Fund's management team at that firm. He has more than 22 years of corporate finance and investment management experience.

The real estate portion of the Fund investment portfolio is managed by a team at Security Capital Research & Management Incorporated, (Security Capital), a wholly-owned subsidiary of JPMorgan Chase & Co. Anthony R. Manno Jr. and Kenneth D. Statz, who each have more than 27 years experience in managing real estate investments, lead the team.

Symphony Asset Management, LLC, (Symphony), an affiliate of Nuveen Investments, invests its portion of the Fund's assets primarily in senior loans. The Symphony team is led by Gunther Stein and Lenny Mason, who have more than 25 years of combined investment management experience.

Wellington Management Company, LLP (Wellington), invests its portion of the Fund's assets in emerging markets sovereign debt. James W. Valone, who has more than 18 years of investment management experience, heads the team.

Here representatives from NWQ, Symphony, Security Capital, and Wellington talk about the markets, their management strategies and the performance of the Fund for the six-month period ending June 30, 2008.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE THE FUND?

For the equity portion of the Fund's portfolio, we continued to employ an opportunistic, bottom-up strategy that focused on identifying undervalued companies possessing favorable risk/reward characteristics as well as emerging catalysts that can unlock value or improve profitability. These catalysts included management changes, restructuring efforts, recognition of hidden assets, or a positive change in the underlying fundamentals. We also focused on downside protection, and paid a great deal of attention to a company's balance sheet and cash flow statement, not just the income statement. We believed that cash flow analysis offered a more objective and truer picture of a company's financial position than an evaluation based on earnings alone.

Discussions of specific investments are for illustrative purposes only and are not intended as recommendations of individual investments. The views expressed in this commentary represent those of the portfolio managers as of the date of this report and are subject to change at any time, based on market conditions and other factors. The Fund disclaims any obligation to advise shareholders of such changes.

During this extremely challenging period, our bias has been to tread lightly in the financial sector with an underweight position relative to the index. While we have made adjustments to our financial holdings, we have not drastically altered our positions. The Fund's investments within the sector continued to be diversified with the bulk of the holdings seemingly well-capitalized. In March, we trimmed our stakes in Bank of America Corporation and JPMorgan Chase & Co., and eliminated IndyMac Bancorp in early May. We had hoped that IndyMac would be able to raise capital, either through equity issuance or by selling certain assets such as its reverse mortgage business. However, as it became more evident that the company's options for raising capital were greatly diminished, we eliminated the position. (On July 11, 2008, after the close of this reporting period, IndyMac Bancorp filed for bankruptcy protection.) Beyond the financial sector, we established a new position in POSCO, a Korean steelmaker, and added to our stake in Motorola, Inc. Conversely, we eliminated Clear Channel Communications, Inc. and trimmed several other positions.

For the portion of the Fund's portfolio invested primarily in REIT securities, we sought to maintain significant property type and geographic diversification while taking into account company credit quality, sector, and security-type allocations. Investment decisions were based on a multi-layered analysis of the company, the real estate it owns, its management, and the relative price of the security, with a focus on securities that we believed would be best positioned to generate sustainable income and potential price appreciation over the long-run.

Across all real estate sectors, we favored companies with properties located in the strongest markets. Generally, these markets were defined by high barrier to entry which constrained new construction a condition that in the past has indicated long-term potential to provide significant value enhancement and a real inflation hedge.

For the senior loan portion of the Fund, we continued to use fundamental analysis to select loans that we believed offered strong asset coverage and attractive risk-adjusted returns. During this period, we avoided many loans issued by autos and homebuilders, companies that generally require a confident U.S. consumer and healthy U.S. economy to perform well. We also avoided many smaller loans that were done to finance leveraged buyouts. We didn't believe there was sufficient value in these loans to compensate for the potential illiquidity and volatility if the earnings of the companies issuing loans remained challenged.

Although the loan portfolios suffered as a result of a broad-based sell-off, the market dislocation also provided an opportunity to buy loans in good companies with strong covenants at attractive prices. We focused on adding quality senior loans to the portfolio, which often were priced at a discount to par and were structured with strong covenant protection. We also continued to avoid the vast majority of second lien loans. Similar to smaller loans, we didn't believe that second lien loans offered sufficient additional yield to compensate investors for potentially increased volatility and lower recovery rates.

In the emerging markets sovereign debt portion of the Fund, we were neutral to somewhat cautious during the period as the global backdrop for the market remained challenging. Inflation continued to be a significant concern for most developing countries, and the response

of policy makers to rising prices was mixed. Country selection continued to be extremely important, and our holdings remained concentrated in countries with solid credit quality.

Past performance does not guarantee future results. Current performance may be higher or lower than the data shown.

Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. For additional information, see the individual Performance Overview for the Fund in this report.

1 Comparative benchmark performance is a blended return consisting of: 1) 18.75% of the return of the Russell 3000 Value Index, which measures the performance of those Russell 3000 Index companies with lower price-to-book ratios and lower forecasted growth values, 2) 6.25% of the return of the MSCI EAFE ex-Japan Value Index, a capitalization weighted index that selects the lower 50% of the price-to-book ranked value stocks traded in the developed markets of Europe, Asia and the Far East, excluding Japan, 3) 25% of the return of the Dow Jones Wilshire Real Estate Securities Index, an unmanaged, market capitalization-weighted index comprised of publicly traded REITs and real estate companies, 4) 25% of the return of the JP Morgan EMBI Global Diversified Index, which tracks total returns for U.S.-dollar-denominated debt instruments issued by emerging markets sovereign and quasi sovereign entities, and 5) 25% of the return of the CSFB Leveraged Loan Index, which consists of approximately \$150 billion of tradable term loans with at least one year to maturity and rated BBB or lower. Index returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in an index.

6

There also continued to be large differences between countries within emerging markets, with the market distinguishing between countries based on their policy framework, balance-of-payments and economic vulnerabilities, and political risks. Consequently, our risk positions were concentrated in countries with sound credit underpinnings, such as Brazil and Russia.

By the end of the period, we were relatively underweighted countries heavily dependent on the U.S. for exports or remittances capital flows. Countries with weak banking sectors and poor balance-of-payment positions, located primarily in Eastern Europe, were another area we looked to avoid.

HOW DID THE FUND PERFORM OVER THE SIX-MONTH PERIOD?

The performance of JDD, as well as a comparative benchmark, is presented in the accompanying table.

Cumulative Total Returns on Common Share Net Asset Value
For the six months ended 6/30/08

JDD	9.64%
Comparative Benchmark ¹	5.69%

For the six months ended June 30, 2008 the total return on common share net asset value for the Fund underperformed their unleveraged, unmanaged comparative benchmark.

One of the key factors in the performance of the Fund, relative to that of the benchmark, was the Fund's use of financial leverage. Although leveraging provides opportunities for additional income and total returns for common shareholders, it can also expose shareholders to additional risk especially when market conditions are unfavorable. With the steep decrease in prices in many domestic and international markets during this period, the impact of these valuation changes on the Fund's return was magnified by the use of leverage. However, we firmly believe that the use

of this strategy should work to the benefit of the Fund's common shareholders over the long term.

Looking specifically at the equity portion of the portfolio, ongoing disruptions in the capital markets contributed to declines in our financial sector holdings. These stocks were battered by concerns of increased credit losses and write-downs, struggles in accessing the capital markets, and rumors regarding the continued viability of some companies. There also were concerns that existing shareholders would be diluted as these companies raised additional capital. While finding downside protection in the financial sector was extremely difficult, this environment also meant that many well-capitalized firms with the staying power to survive and prosper sometimes were trading at extremely compelling valuations.

The markets' concerns and fears were not solely concentrated on the financial sector. We also witnessed steep declines in consumer cyclical stocks such as traditional retailers and autos

areas where we did not have significant exposure. We did have some consumer discretionary exposure with our investments in CBS Corp., Gannett Co. Inc., and Newell Rubbermaid Inc. Shares of Motorola Inc. also performed poorly during the period, in part because of problems within the company's handset division. Following the tremendous success of their innovative RAZR cell phones, delays in new product introductions have contributed to lackluster sales and lost market share. We believe that new management is addressing the company's challenges and we remain positive on the holding.

Conversely, record crude prices and strong operating fundamentals contributed to gains for our energy holdings, which included Chevron Corp., Conoco Phillips, ENI S.p.A., and Total S.A.. Our investments in Caterpillar Inc. and POSCO also posted modest gains during a very weak environment for stocks. We should also mention that we held several companies that were operationally doing very well, yet their stock price did not reflect these positive attributes. These included Lockheed Martin Corp., Pitney Bowes Inc., and Raytheon Co, where we believe the market did not acknowledge their relatively strong balance sheets and other fundamentals.

Looking at the Fund's preferred stock holdings, risk premiums increased as the extent of the sub-prime market problems became clearer and several financial firms, including Lehman Brothers and Bear Stearns, became distressed. In addition, many firms issued new preferred securities, which in turn forced a general re-pricing of existing issues. The Fund's finance and investment, brokerage and banking sectors holdings generally hurt overall performance during this period. The best performing sectors were basic industries, energy and insurance. The portfolio was positioned conservatively during the period with an underweight in financials and an overweight in industrials and utilities.

In a very volatile and generally negative period for real estate securities, many of the Fund's REIT investments lost ground. However, the Fund's allocation to securities perceived to be especially defensive benefited relative performance. The market also rewarded the Fund's strong allocation to multi-family companies as the fundamental outlook for apartments remained solid despite the pressures in the single family housing markets.

Another factor weighing on overall Fund performance was its portfolio of senior loans, which generally performed poorly over the period. One larger individual position which constrained performance over the period was Michael Foods, Inc. However, we did see relatively strong results from our Tribune Company and Alltel positions.

The Fund's emerging markets sovereign debt holdings benefited from small overweightings to Brazil and Peru. Specific security selection in Venezuela and overall yield curve positioning in Argentina also benefited the portfolio. However, an underweight to Africa, specifically Egypt and Gabon detracted from relative performance as the region outperformed emerging markets as a whole over the period.

RECENT DEVELOPMENTS IN THE AUCTION RATE PREFERRED SECURITIES (ARPS) MARKETS

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the preferred shares issued by the Fund than there were offers to buy. This meant

that these auctions failed to clear and that many or all auction preferred shareholders who wanted to sell their shares in these auctions were unable to do so. This decline in liquidity in auction preferred shares did not lower the credit quality of these shares, and auction preferred shareholders unable to sell their shares received distributions at the maximum rate applicable to failed auctions as calculated in accordance with the pre-established terms of the auction preferred shares. At the time this report was prepared, the Fund's managers could not predict when future auctions might succeed in attracting sufficient buyers for the shares offered, if ever. The Fund's managers are working diligently to refund the auction preferred shares, and have made progress in these efforts, but at present there is no assurance that these efforts will succeed. These developments generally do not affect the management or investment policies of the Fund. However, one implication of these auction failures for common shareholders is that the Fund's cost of leverage will likely be higher, at least temporarily, than it otherwise would have been had the auctions continued to be successful. As a result, the Fund's future common share earnings may be lower than they otherwise would have been.

For current, up-to-date information, please visit the Nuveen CEF Auction Rate Preferred Resource Center at: <http://www.nuveen.com/ResourceCenter/AuctionRatePreferred.aspx>.

Common Share
Distribution and Share Price

INFORMATION

We are providing you with information regarding your Fund's distributions. This information is as of June 30, 2008, and likely will vary over time based on the Fund's investment activities and portfolio investment value changes.

The Fund employs financial leverage through the issuance of Fund Preferred shares, as well as through bank borrowings. Financial leverage provides the potential for higher earnings (net investment income), total returns and distributions over time, but as noted earlier also increases the variability of common shareholders' net asset value per share in response to changing market conditions. Over the reporting period, the impact of financial leverage on the Fund's net asset value per share contributed positively to the income return and detracted from the price return. The overall impact of financial leverage detracted from the Fund's total return.

The Fund has a managed distribution program. The goal of a managed distribution program is to provide common shareholders with relatively consistent and predictable cash flow by systematically converting its expected long-term return potential into regular distributions. As a result, regular common share distributions throughout the year are likely to include a portion of expected long-term gains (both realized and unrealized), along with net investment income.

Important points to understand about the managed distribution program are:

The Fund seeks to establish a relatively stable common share distribution rate that roughly corresponds to the projected total return from its investment strategy over an extended period of time. However, you should not draw any conclusions about the Fund's past or future investment performance from its current distribution rate.

Actual common share returns will differ from projected long-term returns (and therefore the Fund's distribution rate), at least over shorter time periods. Over a specific timeframe, the difference between actual returns and total distributions will be reflected in an increasing (returns exceed distributions) or a decreasing (distributions exceed returns) Fund net asset value.

Each distribution is expected to be paid from some or all of the following sources:

- net investment income (regular interest and dividends),
- realized capital gains, and
- unrealized gains, or, in certain cases, a return of principal (non-taxable distributions).

A non-taxable distribution is a payment of a portion of the Fund's capital. When the Fund's returns exceed distributions, it may represent portfolio gains generated, but not realized as a taxable capital gain. In periods when the Fund's returns fall short of distributions, it will

represent a portion of your original principal unless the shortfall is offset during other time periods over the life of your investment (previous or subsequent) when the Fund's total return exceeds distributions.

Because distribution source estimates are updated during the year based on the Fund's performance and forecast for its current fiscal year (which is the calendar year for the Fund), estimates on the nature of your distributions provided at the time the distributions are paid may differ from both the tax information reported to you in your Fund's IRS Form 1099 statement provided at year end, as well as the ultimate economic sources of distributions over the life of your investment.

The following table provides estimated information regarding the Fund's common share distributions and total return performance for the six months ended June 30, 2008. The distribution information is presented on a tax basis rather than on a generally accepted accounting principles (GAAP) basis. This information is intended to help you better understand whether the Fund's returns for the specified time period was sufficient to meet the Fund's distributions.

³ The Fund elected to retain a portion of its realized long-term capital gains for the tax years ended December 31, 2007 and December 31, 2006, and pay required federal corporate income taxes on these amounts. As reported on Form 2439, Common shareholders on record date must include their pro-rata share of these gains on their applicable federal tax returns, and are entitled to take offsetting tax credits, for their pro-rata share of the taxes paid by the Fund. The total returns including retained gain tax credit/refund include the economic benefit to Common shareholders on record date of these tax credits/refunds.

Common Share Price Performance Weekly Closing Price

- 1 Current Distribution Rate is based on the Fund's current annualized quarterly distribution divided by the Fund's current market price. The Fund's quarterly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the calendar year the Fund's cumulative net ordinary income and net realized gains are less than the amount of the Fund's distributions, a return of capital for tax purposes.
- 2 Excluding derivative transactions.
- 3 As previously explained in the Common Share Distribution and Share Price Information Section of this report, the Fund elected to retain a portion of its realized long-term capital gains for the tax years ended December 31, 2007 and December 31, 2006, and pay required federal corporate income taxes on these amounts. These standardized total returns include the economic benefit to Common shareholders of record of this tax credit/refund.

					\$ (95,185)

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Ratings: Using the higher of Standard & Poor's Group (Standard & Poor's) or Moody's Investor Service, Inc. (Moody's) rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
- (3) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.
- (4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks.

Edgar Filing: NUVEEN DIVERSIFIED DIVIDEND & INCOME FUND - Form N-CSRS

Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

- (5) Position or portion of position represents an unfunded Senior Loan commitment outstanding at June 30, 2008.
- (6) Negative value represents unrealized depreciation on unfunded Senior Loan commitment outstanding at June 30, 2008.
- (7) Principal Amount denominated in U.S. Dollars, unless otherwise noted.
- (8) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Trustees.
- (9) Borrowings and Fund Preferred Shares, at Liquidation Value as a percentage of total investments are (10.1)% and (26.9)%, respectively.
- N/A Not available.
- N/R Not rated.
- 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration which are normally those transactions with qualified institutional buyers.
- ADR American Depositary Receipt.
- Reg S Regulation S allows U.S. companies to sell securities to persons or entities located outside of the United States without registering those securities with the Securities and Exchange Commission. Specifically, Regulation S provides a safe harbor from the registration requirements of the Securities Act for the offers and sales of securities by both foreign and domestic issuers that are made outside the United States.

Notes to
FINANCIAL STATEMENTS (Unaudited)

1. General Information and Significant Accounting Policies

Nuveen Diversified Dividend and Income Fund (the Fund) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended. The Fund's Common shares are listed on the New York Stock Exchange and trade under the ticker symbol JDD. The Fund was organized as a Massachusetts business trust on July 18, 2003.

The Fund seeks to provide high current income and total return by investing primarily in a portfolio of dividend-paying common stocks, securities issued by Real Estate Investment Trusts (REITs), debt securities and other non-equity instruments that are issued by, or that are related to, government, government-related and supranational issuers located, or conducting their business, in emerging market countries (emerging markets debt and foreign corporate bonds) and senior loans.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements in accordance with U.S. generally accepted accounting principles.

Investment Valuation

Exchange-listed securities are generally valued at the last sales price on the securities exchange on which such securities are primarily traded. Securities traded on a securities exchange for which there are no transactions on a given day or securities not listed on a securities exchange are valued at the mean of the closing bid and asked prices. Securities traded on Nasdaq are valued at the Nasdaq Official Closing Price. The prices of fixed-income securities, senior loans and derivative instruments are generally provided by an independent pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available, the pricing service or, in the absence of a pricing service for a particular investment, the Board of Trustees of the Fund, or its designee, may establish fair value using a wide variety of market data including yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant by the pricing service or the Board of Trustees' designee. If the pricing service is unable to supply a price for an investment or derivative instrument the Fund may use market quotes provided by major broker/dealers in such investments. If it is determined that the market price for an investment or derivative instrument is unavailable or inappropriate, the Board of Trustees of the Fund, or its designee, may establish fair value in accordance with procedures established in good faith by the Board of Trustees. Short-term investments are valued at amortized cost, which approximates market value.

The senior loans in which the Fund invests are not listed on an organized exchange and the secondary market for such investments may be less liquid relative to markets for other fixed-income securities. Consequently, the value of senior loans, determined as described above, may differ significantly from the value that would have been determined had there been an active market for that senior loan.

Investment Transactions

Investment transactions are recorded on a trade date basis. Trade date for senior loans purchased in the primary market is considered the date on which the loan allocations are determined. Trade date for senior loans purchased in the secondary market is the date on which the transaction is entered into. Realized gains and losses from investment transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed

delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Fund has instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At June 30, 2008, the Fund had outstanding when issued/delayed delivery purchase commitments of \$2,966,017.

Investment Income

Dividend income is recorded on the ex-dividend date or, for foreign securities, when information is available. Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also includes paydown gains and losses, fee income and amendment fees, if any. Fee income consists primarily of amendment fees. Amendment fees are earned as compensation for evaluating and accepting changes to an original senior loan agreement and are recognized when received.

Income Taxes

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. The Fund intends to distribute substantially all of its investment company taxable income to shareholders.

Notes to

FINANCIAL STATEMENTS (continued) (Unaudited)

In any year when the Fund realizes net capital gains, the Fund may choose to distribute all or a portion of its net capital gains to shareholders, or alternatively, to retain all or a portion of its net capital gains and pay federal corporate income taxes on such retained gains. During the tax year ended December 31, 2007, the Fund retained \$14,571,429 of realized long-term capital gains and accrued a provision for federal corporate income taxes of \$5,100,000, the net of which has been reclassified to Paid-in surplus.

Effective June 29, 2007, the Fund adopted Financial Accounting Standards Board (FASB) Interpretation No. 48

Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the affirmative evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether it is more-likely-than-not, (i.e., a greater than 50-percent likelihood) of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold may result in a tax expense in the current year.

Implementation of FIN 48 required management of the Fund to analyze all open tax years, as defined by the statute of limitations, for all major jurisdictions, which includes federal and certain states. Open tax years are those that are open for examination by taxing authorities (i.e., generally, the last four tax year ends and the interim tax period since then). The Fund has no examinations in progress.

For all open tax years and all major taxing jurisdictions through the end of the reporting period, management of the Fund has reviewed all tax positions taken or expected to be taken in the preparation of the Fund's tax returns and concluded the adoption of FIN 48 resulted in no impact to the Fund's net assets or results of operations as of and during the six months ended June 30, 2008.

The Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Distributions to Common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal corporate income tax regulations, which may differ from U.S. generally accepted accounting principles.

The Fund makes quarterly cash distributions to Common shareholders of a stated dollar amount per share. Subject to approval and oversight by the Fund's Board of Trustees, the Fund seeks to maintain a stable distribution level designed to deliver the long-term return potential of the Fund's investment strategy through regular quarterly distributions (a Managed Distribution Program). Total distributions during a calendar year generally will be made from the Fund's net investment income, net realized capital gains and net unrealized capital gains in the Fund's portfolio, if any. The portion of distributions paid from net unrealized gains, if any, would be distributed from the Fund's assets and would be treated by shareholders as a non-taxable distribution for tax purposes. In the event that total distributions during a calendar year exceed the Fund's total return on net asset value, the difference will be treated as a return of capital for tax purposes and will reduce net asset value per share. If the Fund's total return on net asset value exceeds total distributions during a calendar year, the excess will be reflected as an increase in net asset value per share. The final determination of the source and character of all distributions for the fiscal year are made after the end of the fiscal year

and are reflected in the financial statements contained in the annual report as of December 31 each year.

REIT distributions received by the Fund are generally comprised of ordinary income, long-term and short-term capital gains, and a return of REIT capital. The actual character of amounts received during the period are not known until after the fiscal year-end. For the fiscal year ended December 31, 2007, the character of distributions to the Fund from the REITs was 52.86% ordinary income, 27.53% long-term and short-term capital gains, and 19.61% return of REIT capital.

For the fiscal year ended December 31, 2007, the Fund applied the actual character of distributions reported by the REITs in which the Fund invests to its receipts from the REITs. If a REIT held in the portfolio of investments did not report the actual character of its distributions during the period, the Fund treated the distributions as ordinary income.

The actual character of distributions made by the Fund during the fiscal year ended December 31, 2007 are reflected in the accompanying financial statements.

The distributions made by the Fund to its shareholders during the six months ended June 30, 2008, are provisionally classified as being From and in excess of net investment income , and those distributions will be classified as being from net investment income, net realized capital gains and/or a return of capital for tax purposes after the fiscal year end, based upon the income type breakdown information conveyed at the time by the REITs whose securities are held in the Fund s portfolio. For purposes of

calculating Undistributed (Over-distribution of) net investment income as of June 30, 2008, the distribution amounts provisionally classified as From and in excess of net investment income were treated as being entirely from net investment income. Consequently, the financial statements at June 30, 2008, reflect an over-distribution of net investment income.

Fund Preferred Shares

The Fund has issued and outstanding 2,400 Series T and 2,400 Series W Fund Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. The dividend rate paid by the Fund on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period.

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the Fund Preferred shares issued by the Fund than there were offers to buy. This meant that these auctions failed to clear, and that many Fund Preferred shareholders who wanted to sell their shares in these auctions were unable to do so. Fund Preferred shareholders unable to sell their shares received distributions at the maximum rate applicable to failed auctions as calculated in accordance with the pre-established terms of the Fund Preferred shares.

These developments generally do not affect the management or investment policies of the Fund. However, one implication of these auction failures for Common shareholders is that the Fund's cost of leverage will likely be higher, at least temporarily, than it otherwise would have been had the auctions continued to be successful. As a result, the Fund's future Common share earnings may be lower than they otherwise would have been.

Foreign Currency Transactions

The Fund is authorized to engage in foreign currency exchange transactions, including foreign currency forward, futures, options and swap contracts. To the extent that the Fund invests in securities and/or contracts that are denominated in a currency other than U.S. dollars, the Fund will be subject to currency risk, which is the risk that an increase in the U.S. dollar relative to the foreign currency will reduce returns or portfolio value. Generally, when the U.S. dollar rises in value against a foreign currency, the Fund's investments denominated in that currency will lose value because its currency is worth fewer U.S. dollars; the opposite effect occurs if the U.S. dollar falls in relative value. Investments and other assets and liabilities denominated in foreign currencies are converted into U.S. dollars on a spot (i.e. cash) basis at the spot rate prevailing in the foreign currency exchange market at the time of valuation. Purchases and sales of investments and income denominated in foreign currencies are translated into U.S. dollars on the respective dates of such transactions. The gains or losses resulting from changes in foreign exchange rates are included in Realized gain (loss) from foreign currencies and Change in net unrealized appreciation (depreciation) of foreign currencies on the Statement of Operations.

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at 4:00 p.m. Eastern time. Investments and income and expenses are translated on the respective dates of such transactions. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date of the transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received.

Forward Foreign Currency Exchange Contracts

The Fund is authorized to enter into forward foreign currency exchange contracts. Generally, the Fund may enter into forward foreign currency exchange contracts only under two circumstances: (i) when a Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency to lock in the U.S. exchange rate of the transaction, with such period being a short-dated contract covering the period between transaction date and settlement date; or (ii) when Nuveen Asset Management (the Adviser), a wholly owned subsidiary of Nuveen Investments, Inc.

(Nuveen), believes that the currency of a particular foreign country may experience a substantial movement against the U.S. dollar or against another foreign currency. Forward foreign currency contracts are valued daily at the forward rate. The change in market value is recorded as an unrealized gain or loss by the Fund. When the contract is closed or offset with the same counterparty, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed or offset.

Forward foreign currency contracts will generally not be entered into for terms greater than three months. The use of forward foreign currency contracts does not eliminate fluctuations in the underlying prices of the Fund's investment securities; however, it does establish a rate of exchange that can be achieved in the future. The use of forward foreign currency contracts involves the risk that anticipated currency movements will not be accurately predicted. A forward foreign currency contract would limit the risk of loss due to a decline in the value of a particular currency; however, it also would limit any potential gain that might result

Notes to

FINANCIAL STATEMENTS (continued) (Unaudited)

should the value of the currency increase instead of decrease. These contracts may involve market risk in excess of the unrealized gain or loss reflected on the Statement of Assets and Liabilities. In addition, the Fund could be exposed to risks if counterparties to the contracts are unable to meet the terms of their contracts. The counterparty risk exposure is, therefore, closely monitored and contracts are only executed with high credit quality financial institutions.

Repurchase Agreements

In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

Custodian Fee Credit

The Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on the Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which the Fund overdraws its account at the custodian bank.

Indemnifications

Under the Fund's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Fund enters into contracts that provide general indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Fair Value Measurements

During the current fiscal period, the Fund adopted the provisions of Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosure about fair value measurements. In determining the value of the Fund's investments various inputs are used. These inputs are summarized in the three broad levels listed below:

Level 1 Quoted prices in active markets for identical securities.

Level 2

Edgar Filing: NUVEEN DIVERSIFIED DIVIDEND & INCOME FUND - Form N-CSRS

Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the Fund's fair value measurements as of June 30, 2008:

	Level 1	Level 2	Level 3	Total
Investments	\$ 210,499,955	\$ 231,640,453	\$ 3,524,054	\$ 445,664,462
Derivatives*		(95,185)		(95,185)
Total	\$ 210,499,955	\$ 231,545,268	\$ 3,524,054	\$ 445,569,277

* Represents net unrealized appreciation (depreciation).

30

The following is a reconciliation of the Fund's Level 3 investments held at the beginning and end of the measurement period:

	Level 3 Investments
Balance as of December 31, 2007	\$ 931,395
Gains (losses):	
Net realized gains (losses)	117,849
Net change in unrealized appreciation (depreciation)	(67,319)
Net purchases at cost (sales at proceeds)	1,542,111
Net discounts (premiums)	7,798
Net transfers in to (out of) at end of period fair value	992,220
Balance as of June 30, 2008	\$ 3,524,054

3. Fund Shares

Transactions in Common shares were as follows:

	Six Months Ended 6/30/08	Year Ended 12/31/07
Common shares issued to shareholders due to reinvestment of distributions		42,661

4. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments and derivative transactions) during the six months ended June 30, 2008, aggregated \$120,689,526 and \$131,090,486, respectively.

5. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, recognition of premium amortization, recognition of income on REIT investments and timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset value of the Fund.

At June 30, 2008, the cost of investments was \$456,431,172.

Gross unrealized appreciation and gross unrealized depreciation of investments at June 30, 2008, were as follows:

Gross unrealized:	
Appreciation	\$ 32,725,105

Edgar Filing: NUVEEN DIVERSIFIED DIVIDEND & INCOME FUND - Form N-CSRS

Depreciation	(43,491,815)
Net unrealized appreciation (depreciation) of investments	\$ (10,766,710)

The tax components of undistributed net ordinary income and net long-term capital gains at December 31, 2007, the Fund's last tax year end, were as follows:

Undistributed net ordinary income *	\$
Undistributed net long-term capital gains	1,243,596

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

The tax character of distributions paid during the Fund's last tax year ended December 31, 2007, was designated for purposes of the dividends paid deduction as follows:

Distributions from net ordinary income *	\$ 20,515,163
Distributions from net long-term capital gains	16,685,616

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

Notes to
FINANCIAL STATEMENTS (continued) (Unaudited)

The Fund elected to defer net realized losses from investments incurred from November 1, 2007 through December 31, 2007, the Fund's last tax year and, (post-October losses) in accordance with federal income tax regulations. Post-October currency losses of \$167,929 were treated as having arisen on the first day of the current fiscal year.

6. Management Fees and Other Transactions with Affiliates

The Fund's management fee is separated into two components—a complex-level component, based on the aggregate amount of all fund assets managed by the Adviser, and a specific fund-level component, based only on the amount of assets within the Fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee, payable monthly, is based upon the average daily Managed Assets of the Fund as follows:

Average Daily Managed Assets	Fund-Level Fee Rate
For the first \$500 million	.7000%
For the next \$500 million	.6750
For the next \$500 million	.6500
For the next \$500 million	.6250
For Managed Assets over \$2 billion	.6000

The annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as stated in the table below. As of June 30, 2008, the complex-level fee rate was .1868%.

The complex-level fee schedule is as follows:

Complex-Level Asset Breakpoint Level ⁽¹⁾	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691

\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

- (1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets (Managed Assets means the average daily net assets of each fund including assets attributable to preferred stock issued by or borrowings by the Nuveen funds) of Nuveen-sponsored funds in the U.S.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Adviser has entered into Sub-Advisory Agreements with NWQ Investment Management Company, LLC (NWQ), Security Capital Research & Management Incorporated (Security Capital), Symphony Asset Management, LLC (Symphony) and Wellington Management Company, LLP (Wellington). Nuveen owns a controlling interest in NWQ while key management of NWQ owns a non-controlling minority interest. Symphony is an indirect wholly owned subsidiary of Nuveen. NWQ manages the portion of the Fund s investment portfolio allocated to dividend-paying common stocks including American Depositary Receipts (ADRs). Security Capital manages the portion of the Fund s investment portfolio allocated to securities issued by real estate companies including REITs. Symphony manages the portion of the Fund s investment portfolio allocated to senior loans. Wellington manages the portion of the Fund s investment portfolio allocated to emerging markets debt and foreign corporate bonds. NWQ, Security Capital, Symphony and Wellington are compensated for their services to the Fund from the management fee paid to the Adviser.

The Fund pays no compensation directly to those of its Trustees who are affiliated with the Adviser or to its Officers, all of whom receive remuneration for their services to the Fund from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual

compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first eight years of the Fund's operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily Managed Assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending September 30,		Year Ending September 30,	
2003 *	.32%	2008	.32%
2004	.32	2009	.24
2005	.32	2010	.16
2006	.32	2011	.08
2007	.32		

* From the commencement of operations.

The Adviser has not agreed to reimburse the Fund for any portion of its fees and expenses beyond September 30, 2011.

7. Senior Loan Commitments

Unfunded Commitments

Pursuant to the terms of certain of the variable rate senior loan agreements, the Fund may have unfunded senior loan commitments. The Fund will maintain with its custodian, cash, liquid securities and/or liquid senior loans having an aggregate value at least equal to the amount of unfunded senior loan commitments. At June 30, 2008, the Fund had unfunded senior loan commitments of \$255,770.

Participation Commitments

With respect to the senior loans held in the Fund's portfolio, the Fund may: 1) invest in assignments; 2) act as a participant in primary lending syndicates; or 3) invest in participations. If the Fund purchases a participation of a senior loan interest, the Fund would typically enter into a contractual agreement with the lender or other third party selling the participation, rather than directly with the Borrower. As such, the Fund not only assumes the credit risk of the Borrower, but also that of the Selling Participant or other persons interpositioned between the Fund and the Borrower. At June 30, 2008, there were no such outstanding participation commitments.

8. Borrowing Arrangements

On August 15, 2006, the Fund entered into a commercial paper program (\$45 million maximum) with CITIBANK N.A.'s conduit financing agency, CHARTA, LLC (CHARTA). CHARTA issues high grade commercial paper and uses the proceeds to make advances to the Fund. For the six months ended June 30, 2008, the average daily balance of borrowings under the commercial paper program agreement was the full \$45 million maximum allowed. The interest expense incurred on borrowings is recognized as Interest expense on borrowings on the Statement of Operations. The average annualized interest rate on such borrowings for the six months ended June 30, 2008, was 3.60%. In addition to the interest expense, the Fund also pays a .21% per annum program fee, a .10% per annum liquidity fee and a .05% per annum dealer commission fee all of which are recognized as Fees on borrowings on the Statement of Operations.

9. New Accounting Pronouncement

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. This standard is intended to enhance financial statement disclosures for derivative instruments and hedging activities

and enable investors to understand: a) how and why a fund uses derivative instruments, b) how derivative instruments and related hedge items are accounted for, and c) how derivative instruments and related hedge items affect a fund's financial position, results of operations and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. As of June 30, 2008, management does not believe the adoption of SFAS No. 161 will impact the financial statement amounts; however, additional footnote disclosures may be required about the use of derivative instruments and hedging items.

10. Subsequent Events

Common Share Repurchases

The Board of Directors/Trustees for each of Nuveen's 120 closed-end funds approved a program, effective August 7, 2008, under which each fund may repurchase up to 10% of its common shares.

Financial
HIGHLIGHTS (Unaudited)

Selected data for a Common share outstanding throughout each period:

Beginning Common Share Net Asset Value	Investment Income (a)	Investment Operations Distributions from Net Distributions from			Total	Net Investment Income to Common Share- holders	Less Distributions			Fund Preferred Share Underwriting Discounts	Ending Common Share Net Asset Value

* Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period takes place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common Share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

The Fund elected to retain a portion of its realized long-term capital gains for the tax years ended December 31, and pay required federal corporate income taxes on these amounts. As reported on Form 2439, Common shareholders on record date must include their pro-rata share of these gains on their applicable federal tax returns, and are entitled to take offsetting tax credits, for their pro-rata share of the taxes paid by the Fund. The standardized total returns shown above do not include the economic benefit to Common shareholders on record date of these tax credits/refunds. The Fund's corresponding Total Return Based on Market Value and Common Share Net Asset Value when these benefits are included are as follows:

Annual Investment
Management Agreement
APPROVAL PROCESS

The Investment Company Act of 1940, as amended (the *1940 Act*), provides, in substance, that each investment advisory agreement between a fund and its investment adviser (including sub-advisers) will continue in effect from year to year only if its continuance is approved at least annually by the fund's board members, including by a vote of a majority of the board members who are not parties to the advisory agreement or interested persons of any parties (the *Independent Board Members*), cast in person at a meeting called for the purpose of considering such approval. In connection with such approvals, the fund's board members must request and evaluate, and the investment adviser is required to furnish, such information as may be reasonably necessary to evaluate the terms of the advisory agreement. Accordingly, at a meeting held on May 28-29, 2008 (the *May Meeting*), the Board of Trustees (the *Board* and each Trustee, a *Board Member*) of the Fund, including a majority of the Independent Board Members, considered and approved the continuation of the advisory and sub-advisory agreements for the Fund for an additional one-year period. These agreements include the investment advisory agreement between Nuveen Asset Management (*NAM*) and the Fund and the sub-advisory agreements between NAM and NWQ Investment Management Company, LLC (*NWQ*), NAM and Symphony Asset Management LLC (*Symphony*), NAM and Wellington Management Company, LLP (*Wellington*), and NAM and Security Capital Research & Management Incorporated (*Security Capital* and, together with NWQ, Symphony and Wellington, the *Sub-Advisers*), respectively. In preparation for their considerations at the May Meeting, the Board also held a separate meeting on April 23, 2008 (the *April Meeting*). Accordingly, the factors considered and determinations made regarding the renewals by the Independent Board Members include those made at the April Meeting.

In addition, in evaluating the advisory agreement (the *Investment Management Agreement*) and sub-advisory agreements (the *Sub-Advisory Agreements*, and the Investment Management Agreement and the Sub-Advisory Agreements are each an *Advisory Agreement*), as described in further detail below, the Independent Board Members reviewed a broad range of information relating to the Fund, NAM and the Sub-Advisers (NAM and the Sub-Advisers are each a *Fund Adviser*), including absolute performance, fee and expense information for the Fund as well as comparative performance, fee and expense information for a comparable peer group of funds, the performance information of recognized and/or customized benchmarks (as applicable), the profitability of Nuveen for its advisory activities (which includes its wholly owned subsidiaries), and other information regarding the organization, personnel, and services provided by the respective Fund Adviser. The Independent Board Members also met quarterly as well as at other times as the need arose during the year and took into account the information provided at such meetings and the knowledge gained therefrom. Prior to approving the renewal of the Advisory Agreements, the Independent Board Members reviewed the foregoing information with their independent legal counsel and with management, reviewed materials from independent legal counsel describing applicable law and their duties in reviewing advisory contracts, and met with independent legal counsel in private sessions without management present. The Independent Board Members considered the legal advice provided by independent legal counsel and relied upon their knowledge of the Fund Adviser, its services and the Fund resulting from their meetings and other interactions throughout the year and their own business judgment in determining the factors to be considered in evaluating the Advisory Agreements. Each Board Member may have accorded different weight to the various factors in reaching his or her conclusions with respect to the Fund's Advisory Agreements. The Independent Board Members did not identify any single factor as all-important or controlling. The Independent Board Members' considerations were instead based on a comprehensive consideration of all the information presented. The principal factors considered by the Board and its conclusions are described below.

A. Nature, Extent and Quality of Services

In considering renewal of the Investment Management Agreement, the Independent Board Members considered the nature, extent and quality of the Fund Adviser's services, including advisory services and administrative services. The Independent Board Members reviewed materials outlining, among other things, NAM's organization and business; the types of services that NAM or its affiliates provide and are expected to provide to the Fund; the performance record of the Fund (as described in further detail below); and any initiatives Nuveen had taken for the applicable fund product line.

36

With respect to personnel, the Independent Board Members evaluated the background, experience and track record of the Fund Adviser's investment personnel. In this regard, the Independent Board Members considered the additional investment in personnel to support Nuveen fund advisory activities, including in operations, product management and marketing as well as related fund support functions, including sales, executive, finance, human resources and information technology. The Independent Board Members also reviewed information regarding portfolio manager compensation arrangements to evaluate NAM's ability to attract and retain high quality investment personnel.

In evaluating the services of NAM, the Independent Board Members also considered NAM's oversight of the performance, business activities and compliance of the Sub-Advisers, the ability to supervise the Fund's other service providers and given the importance of compliance, NAM's compliance program. Among other things, the Independent Board Members considered the report of the chief compliance officer regarding the Fund's compliance policies and procedures.

In addition to advisory services, the Independent Board Members considered the quality of administrative services provided by NAM and its affiliates including product management, fund administration, oversight of service providers, shareholder services, administration of Board relations, regulatory and portfolio compliance and legal support.

The Independent Board Members reviewed an evaluation of each Sub-Adviser from NAM, including information as to the process followed by NAM in evaluating sub-advisers. The evaluation also included information relating to each Sub-Adviser's organization, operations, personnel, assets under management, investment philosophy, strategies and techniques in managing the Fund, developments affecting each Sub-Adviser, and an analysis of each Sub-Adviser. The Board considered the performance of the portion of the investment portfolio of the Fund for which the respective Sub-Adviser is responsible. The Board also recognized that the Sub-Advisory Agreements were essentially agreements for portfolio management services only and the Sub-Advisers were not expected to supply other significant administrative services to the Fund. During the last year, the Independent Board Members noted that they visited several sub-advisers to the Nuveen funds, meeting their key investment and business personnel. In this regard, the Independent Board Members visited NWQ, Symphony and Security Capital during 2007. The Independent Board Members also noted that they anticipate visiting each sub-adviser to the Nuveen funds at least once over the course of a multiple-year rotation. The Independent Board Members further noted that NAM recommended the renewal of the Sub-Advisory Agreements and considered the basis for such recommendations and any qualifications in connection therewith.

In addition to the foregoing services, the Independent Board Members also noted the additional services that NAM or its affiliates provide to closed-end funds, including, in particular, its secondary market support activities and the costs of such activities. The Independent Board Members recognized Nuveen's continued commitment to supporting the secondary market for the common shares of its closed-end funds through a variety of programs designed to raise investor and analyst awareness and understanding of closed-end funds. These efforts include maintaining an investor relations program to timely provide information and education to financial advisers and investors; providing advertising and marketing for the closed-end funds; maintaining its closed-end fund website; and providing educational seminars. With respect to closed-end funds that utilize leverage through the issuance of auction rate preferred securities (ARPS), the Board has recognized the unprecedented market conditions in the auction rate market industry with the failure of the auction process. The Independent Board Members noted Nuveen's efforts and the resources and personnel employed to analyze the situation, explore potential alternatives and develop and implement solutions that serve the interests of the affected funds and all of their respective shareholders. The Independent Board Members further noted Nuveen's commitment and efforts to keep investors and financial advisers informed as to its progress in addressing the ARPS situation through, among other things, conference calls, press

releases, and information posted on its website as well as its refinancing activities. The Independent Board Members also noted Nuveen's continued support for holders of preferred shares of its closed-end funds by, among other things, seeking distribution for preferred shares with new market participants, managing relations with remarketing agents and the broker community, maintaining the leverage and risk management of leverage and maintaining systems necessary to test compliance with rating agency criteria.

Annual Investment
Management Agreement
APPROVAL PROCESS (continued)

Based on their review, the Independent Board Members found that, overall, the nature, extent and quality of services provided (and expected to be provided) to the Fund under the Investment Management Agreement or respective Sub-Advisory Agreement, as applicable, were satisfactory.

B. The Investment Performance of the Fund and Fund Advisers

The Board considered the investment performance of the Fund, including the Fund's historic performance as well as its performance compared to funds with similar investment objectives (the *Performance Peer Group*) based on data provided by an independent third party (as described below). In addition, the Independent Board Members reviewed the Fund's historic performance compared to recognized and/or customized benchmarks (as applicable).

In evaluating the performance information, the Board considered whether the Fund has operated within its investment objectives and parameters and the impact that the investment mandates may have had on performance. In addition, in comparing the Fund's performance with that of its Performance Peer Group, the Independent Board Members took into account that the closest Performance Peer Group in certain instances may not adequately reflect the respective fund's investment objectives and strategies thereby hindering a meaningful comparison of the fund's performance with that of the Performance Peer Group. These Performance Peer Groups include that of the Fund.

The Independent Board Members reviewed performance information including, among other things, total return information compared with the Fund's Performance Peer Group as well as recognized and/or customized benchmarks (as appropriate) for the one-, three- and five-year periods (as applicable) ending December 31, 2007 and with the Fund's Performance Peer Group for the quarter, one-, three-, and five- year periods ending March 31, 2008 (as applicable). This information supplemented the Fund performance information provided to the Board at each of its quarterly meetings. Based on their review, the Independent Board Members determined that the Fund's investment performance over time had been satisfactory.

C. Fees, Expenses and Profitability

1. Fees and Expenses

The Board evaluated the management fees and expenses of the Fund reviewing, among other things, such Fund's gross management fees (which take into account breakpoints), net management fees (which take into account fee waivers or reimbursements) and total expense ratios (before and after expense reimbursements and/or waivers) in absolute terms as well as compared to the gross management fees, net management fees (after waivers and/or reimbursements) and total expense ratios (before and after waivers) of a comparable universe of unaffiliated funds based on data provided by an independent data provider (the *Peer Universe*) and/or a more focused subset of funds therein (the *Peer Group*). The Independent Board Members further reviewed data regarding the construction of Peer Groups as well as the methods of measurement for the fee and expense analysis and the performance analysis. In reviewing the comparisons of fee and expense information, the Independent Board Members took into account that in certain instances various factors such as the size of the Fund relative to peers, the size and particular composition of the Peer Group, the investment objectives of the peers, expense anomalies, and the timing of information used may impact the comparative data, thereby limiting the ability to make a meaningful comparison. The Independent Board Members also considered, among other things, the differences in the use of leverage. In addition, the Independent Board Members noted the limited Peer Groups available for the Nuveen funds with multi-sleeves of investments. In reviewing the fee schedule for the Fund, the Independent Board Members also considered the fund-level and

complex-wide breakpoint schedules (described in further detail below) and any fee waivers and reimbursements provided by Nuveen (applicable, in particular, for certain closed-end funds launched since 1999). Based on their review of the fee and expense information provided, the Independent Board Members determined that the Fund's management fees and net total expense ratio were reasonable in light of the nature, extent and quality of services provided to the Fund.

38

2. Comparisons with the Fees of Other Clients

The Independent Board Members further reviewed information regarding the nature of services and fee rates offered by NAM to other clients. Such clients include separately managed accounts (both retail and institutional accounts) and funds that are not offered by Nuveen but are sub-advised by one of Nuveen's investment management teams. In evaluating the comparisons of fees, the Independent Board Members noted that the fee rates charged to the Fund and other clients vary, among other things, because of the different services involved and the additional regulatory and compliance requirements associated with registered investment companies, such as the Fund. Accordingly, the Independent Board Members considered the differences in the product types, including, but not limited to, the services provided, the structure and operations, product distribution and costs thereof, portfolio investment policies, investor profiles, account sizes and regulatory requirements. The Independent Board Members noted, in particular, that the range of services provided to the Fund (as discussed above) is much more extensive than that provided to separately managed accounts. Given the inherent differences in the products, particularly the extensive services provided to the Fund, the Independent Board Members believe such facts justify the different levels of fees.

In considering the fees of the Sub-Advisers, the Independent Board Members also considered the pricing schedule or fees that each Sub-Adviser charges for similar investment management services for other fund sponsors or clients (such as retail and/or institutional managed accounts) as applicable. With respect to Symphony, the Independent Board Members also reviewed the fees it assesses for equity and taxable fixed-income hedge funds and hedge accounts it manages, which include a performance fee. In addition, the Independent Board Members noted that with respect to Wellington and Security Capital, the Sub-Advisers that are unaffiliated with Nuveen, such fees were the result of arm's-length negotiations.

3. Profitability of Fund Advisers

In conjunction with its review of fees, the Independent Board Members also considered the profitability of Nuveen for its advisory activities (which incorporated Nuveen's wholly-owned affiliated sub-advisers) and its financial condition. The Independent Board Members reviewed the revenues and expenses of Nuveen's advisory activities for the last two years and the allocation methodology used in preparing the profitability data. The Independent Board Members noted this information supplemented the profitability information requested and received during the year to help keep them apprised of developments affecting profitability (such as changes in fee waivers and expense reimbursement commitments). In this regard, the Independent Board Members noted that they had also appointed an Independent Board Member as a point person to review and keep them apprised of changes to the profitability analysis and/or methodologies during the year. The Independent Board Members considered Nuveen's profitability compared with other fund sponsors prepared by two independent third party service providers as well as comparisons of the revenues, expenses and profit margins of various unaffiliated management firms with similar amounts of assets under management prepared by Nuveen.

In reviewing profitability, the Independent Board Members recognized the subjective nature of determining profitability which may be affected by numerous factors including the allocation of expenses. Further, the Independent Board Members recognized the difficulties in making comparisons as the profitability of other advisers generally is not publicly available and the profitability information that is available for certain advisers or management firms may not be representative of the industry and may be affected by, among other things, the adviser's particular business mix, capital costs, types of funds managed and expense allocations.

Notwithstanding the foregoing, the Independent Board Members reviewed Nuveen's methodology and assumptions for allocating expenses across product lines to determine profitability. In reviewing profitability, the Independent Board Members recognized Nuveen's investment in its fund business.

Based on its review, the Independent Board Members concluded that Nuveen's level of profitability for its advisory activities was reasonable in light of the services provided. With respect to Wellington and Security Capital, given that these Sub-Advisers are unaffiliated with Nuveen, the Independent Board Members also considered such Sub-Advisers' revenues, expenses (including the basis for allocating expenses) and profitability margins (pre- and post-tax). Based on their review, the Independent Board Members were satisfied that the respective Sub-Adviser's level of profitability was reasonable in light of the services provided.

Annual Investment
Management Agreement
APPROVAL PROCESS (continued)

In evaluating the reasonableness of the compensation, the Independent Board Members also considered other amounts paid to a Fund Adviser by the Fund as well as any indirect benefits (such as soft dollar arrangements, if any) the Fund Adviser and its affiliates receive, or are expected to receive, that are directly attributable to the management of the Fund, if any. See Section E below for additional information on indirect benefits the Fund Adviser may receive as a result of its relationship with the Fund. Based on their review of the overall fee arrangements of the Fund, the Independent Board Members determined that the advisory fees and expenses of the Fund were reasonable.

D. Economies of Scale and Whether Fee Levels Reflect These Economies of Scale

With respect to economies of scale, the Independent Board Members recognized the potential benefits resulting from the costs of a fund being spread over a larger asset base. The Independent Board Members therefore considered whether the Fund has appropriately benefited from any economies of scale and whether there is potential realization of any further economies of scale. In considering economies of scale, the Independent Board Members have recognized that economies of scale are difficult to measure and predict with precision, particularly on a fund-by-fund basis. Notwithstanding the foregoing, one method to help ensure the shareholders share in these benefits is to include breakpoints in the advisory fee schedule. Accordingly, the Independent Board Members reviewed and considered the fund-level breakpoints in the advisory fee schedules that reduce advisory fees. In this regard, given that the Fund is a closed-end fund, the Independent Board Members recognized that although the Fund may from time to time make additional share offerings, the growth in its assets will occur primarily through appreciation of the Fund's investment portfolio.

In addition to fund-level advisory fee breakpoints, the Board also considered the Fund's complex-wide fee arrangement. Pursuant to the complex-wide fee arrangement, the fees of the funds in the Nuveen complex, including the Fund, are reduced as the assets in the fund complex reach certain levels. In evaluating the complex-wide fee arrangement, the Independent Board Members recognized that the complex-wide fee schedule was recently revised in 2007 to provide for additional fee savings to shareholders and considered the amended schedule. The Independent Board Members further considered that the complex-wide fee arrangement seeks to provide the benefits of economies of scale to fund shareholders when total fund complex assets increase, even if assets of a particular fund are unchanged or have decreased. The approach reflects the notion that some of Nuveen's costs are attributable to services provided to all its funds in the complex and therefore all funds benefit if these costs are spread over a larger asset base. Based on their review, the Independent Board Members concluded that the breakpoint schedule and complex-wide fee arrangement were acceptable and desirable in providing benefits from economies of scale to shareholders.

E. Indirect Benefits

In evaluating fees, the Independent Board Members received and considered information regarding potential fall out or ancillary benefits the respective Fund Adviser or its affiliates may receive as a result of its relationship with the Fund. In this regard, the Independent Board Members considered revenues received by affiliates of NAM for serving as agent at Nuveen's preferred trading desk and for serving as a co-manager in the initial public offering of new closed-end exchange traded funds.

In addition to the above, the Independent Board Members considered whether the Fund Adviser received any benefits from soft dollar arrangements whereby a portion of the commissions paid by the Fund for brokerage may be used to acquire research that may be useful to the Fund Adviser in managing the assets of the Fund and other clients. With

respect to NAM, the Independent Board Members noted that NAM does not currently have any soft dollar arrangements; however, to the extent certain bona fide agency transactions that occur on markets that traditionally trade on a principal basis and riskless principal transactions are considered as generating commissions, NAM intends to comply with the applicable safe harbor provisions.

The Independent Board Members also considered that NWQ and Security Capital may benefit from their soft dollar arrangements pursuant to which they receive research from brokers that execute the Fund's portfolio transactions. In addition, the Independent Board Members noted that while Wellington does have some soft dollar arrangements with

40

respect to some of its agency trades, the trades in fixed-income securities held by the Fund are done on a principal basis and do not generate soft dollar credits. The Independent Board Members noted that the profitability of the foregoing Sub-Advisers may be lower if they were required to pay for this research with hard dollars. The Board also considered that Symphony currently does not enter into soft dollar arrangements; however, it has adopted a soft dollar policy in the event it does so in the future.

Based on their review, the Independent Board Members concluded that any indirect benefits received by a Fund Adviser as a result of its relationship with the Fund were reasonable and within acceptable parameters.

F. Other Considerations

The Independent Board Members did not identify any single factor discussed previously as all-important or controlling. The Board Members, including the Independent Board Members, unanimously concluded that the terms of the Investment Management Agreement and Sub-Advisory Agreements are fair and reasonable, that the respective Fund Adviser's fees are reasonable in light of the services provided to the Fund and that the Investment Management Agreement and the Sub-Advisory Agreements be renewed.

Reinvest Automatically
EASILY and CONVENIENTLY

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

Nuveen Closed-End Funds Dividend Reinvestment Plan

Your Nuveen Closed-End Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional Fund shares.

By choosing to reinvest, you will be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

Easy and convenient

To make recordkeeping easy and convenient, each month you will receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

Call today to start reinvesting dividends and/or distributions

Glossary of
TERMS USED in this REPORT

- n **Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- n **Collateralized Debt Obligations (CDOs):** Collateralized debt obligations are a type of asset-backed security constructed from a portfolio of fixed-income assets. CDOs usually are divided into different tranches having different ratings and paying different interest rates. Losses, if any, are applied in reverse order of seniority and so junior tranches generally offer higher coupons to compensate for added default risk.
- n **Market Yield (also known as Dividend Yield or Current Yield):** Market yield is based on the Fund's current annualized quarterly distribution divided by the Fund's current market price. The Fund's quarterly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the calendar year the Fund's cumulative net ordinary income and net realized gains are less than the amount of the Fund's distributions, a tax return of capital.
- n **Net Asset Value (NAV):** A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any Preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

ITEM 2. CODE OF ETHICS.

Not applicable to this filing.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

Not applicable to this filing.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable to this filing.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable to this filing.

ITEM 6. SCHEDULE OF INVESTMENTS.

See Portfolio of Investments in Item 1.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable to this filing.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable to this filing.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Registrant's Board implemented after the registrant last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

- (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act") (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

File the exhibits listed below as part of this Form.

(a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable to this filing.

(a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT attached hereto.

(a)(3) Any written solicitation to purchase securities under Rule 23c-1 under the 1940 Act (17 CFR 270.23c-1) sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons: Not applicable.

(b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certifications required by Rule 30a-2(b) under the 1940 Act (17 CFR 270.30a-2(b)); Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b)), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed filed for purposes of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the

Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.
