Total Emerson	+10 to +15	+10	+5 to +10

August 2008 Order Comments:

Order growth trends remained solid in the 5 to 10 percent range for the three months ended in August with currency exchange rates contributing approximately 2 percentage points to the growth. The currency contribution was lower this three month period than in recent periods due to the stronger U.S. dollar.

Process Management orders remained at high levels with strong global project activity. Although fluctuations in the timing of project bookings can impact the order growth trends, project databases and quote logs showed continued strength. The currency contribution was lower this month than in previous months due to the impact of the strengthening U.S. dollar.

Industrial Automation order growth was led by strength from the power generating alternator and materials joining businesses. Currency translation favorably impacted the order growth.

Broad geographic and end market diversity continued to drive positive order growth trends in Network Power. Fluctuations in the timing of project bookings can impact the order trends for this business segment. Strength in the power systems business was offset by softness in the telecommunication end markets of the embedded computing and power business. Comparisons were also tougher across this segment given the strong order growth over the same period in 2007.

Climate Technologies orders continued to benefit from modest heat pump market recovery in Europe and warm weather in North America in July. This was partially offset by cooler weather in August in North America.

Appliance and Tools order trends were consistent with the prior month, with strength from the professional tools and non-residential storage businesses offset by weakness in the motors, residential storage and appliance businesses.
