WESCO FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Dollar amounts in thousands except for amounts per share)
(Unaudited)

Note 1

The condensed consolidated financial statements include the accounts of Wesco Financial Corporation (Wesco) and its subsidiaries, including CORT Business Services, Inc. (CORT), acquired in the first quarter of 2000 (see Note 3). In the opinion of management, all adjustments necessary to a fair statement of the consolidated results of operations (consisting only of normal recurring accruals) are reflected in such statements.

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, which changes the current accounting model that requires amortization of intangible assets, supplemented by impairment tests to determine whether such assets have become permanently impaired, to an accounting model that continues to require impairment tests to determine whether permanent impairment exists but no longer calls for amortization except for intangible assets with finite lives. The provisions of SFAS No. 142 will generally be effective for Wesco at the beginning of 2002. Although Wesco has not completed its assessment of this new accounting standard, its management believes that its implementation may have a material effect on Wesco's consolidated earnings beginning in 2002 and on the comparability of such earnings with those of prior periods.

Note 2

Reference is made to the following financial information deemed generally applicable to the condensed consolidated financial statements: (1) the notes to Wesco's consolidated financial statements appearing on pages 34 through 41 of its 2000 Form 10-K Annual Report, and (2) the audited consolidated financial statements of CORT, attached as Exhibit 99 to Wesco's Form 8-K/A filed April 28, 2000.

Note 3

In late February 2000, a wholly owned subsidiary of Wesco acquired all of the outstanding common stock of CORT pursuant to a tender offer and merger. The acquisition has been accounted for as a purchase, with CORT's accounts included in the condensed consolidated financial

Edgar Filing: WESCO FINANCIAL CORP - Form 10-Q

statements as of the date of acquisition.

The following unaudited table presents pro forma consolidated operating data for Wesco and its subsidiaries for the six months ended June 30, 2000 as if CORT had been acquired on January 1, 2000. It reflects (1) elimination of estimated income that would have been earned during the period if investments liquidated in 2000 to fund most of the purchase had been liquidated on January 1, 2000, (2) inclusion of interest expense throughout the period as if line-of-credit borrowings to fund a portion of the purchase had been made

on January 1, 2000, and (3) amortization of the excess of purchase price over fair value of identified net assets acquired (goodwill) over 40 years beginning January 1, 2000.

WESCO FINANCIAL CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Reference is made to management's discussion and analysis of Wesco's consolidated financial condition and results of operations appearing on pages 18 through 26 of its 2000 Form 10-K Annual Report and to Exhibit 99 to Wesco's Form 8-K/A filed April 28, 2000 for information deemed generally appropriate to an understanding of the accompanying condensed consolidated financial statements. The information set forth in the following paragraphs updates such information.

FINANCIAL CONDITION

Wesco's shareholders' equity at June 30, 2001 was approximately \$1.9 billion (\$264 per share). Of this amount, 19% represented unrealized appreciation of securities, which could differ substantially from gains ultimately realized. Wesco's management continues to believe that the Wesco group has adequate liquidity and financial strength to minimize any downturn in its fortunes.

Edgar Filing: WESCO FINANCIAL CORP - Form 10-Q

RESULTS OF OPERATIONS

The following summary sets forth the contribution to Wesco's consolidated net income of each business segment—insurance, furniture rental and industrial—as well as activities not considered related to such segments. Realized net securities gains and goodwill amortization are excluded from segment activities, consistent with the way Wesco's management views the business operations. Insurance Segment

The insurance segment comprises Wesco-Financial Insurance Company (Wes-FIC) and The Kansas Bankers Surety Company (KBS). Following is a summary of the results of segment operations, which represent essentially the combination of underwriting results with dividend and interest income (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2001	June 30, 2000	June 30, 2001	June 30, 2000

Segment net income	\$13,270	\$10,325	\$27,549	\$19,732

Premiums written for the first six months of 2001 included \$10.6 million attributable to Wes-FIC and \$9.3 million attributable to KBS. Of those amounts, \$4.9 million and \$4.4 million were written in the second quarter, respectively. Premiums written for the first six months of 2000 included \$6.8 million attributable to Wes-FIC and \$8.7 million attributable to KBS. Of those amounts, \$4.0 million and \$4.4 million were written in the second quarter, respectively. The increase in Wes-FIC's premiums written in 2001 was attributable principally to its ongoing participation in a three-year arrangement for the reinsurance of certain property and casualty exposure ceded by a large, unaffiliated insurer.

Earned premiums for the second quarter and first six months of 2001 included \$4.5 million and \$9.0 million attributable to Wes-FIC, versus \$1.3 million and \$1.8 million attributable to Wes-FIC for the comparable periods of 2000. The remainder in each period was attributable to KBS. The increase in Wes-FIC's earned premiums in 2001 related mainly to the reinsurance participation described in the preceding paragraph.

The underwriting gains reported for the 2001 and 2000 periods were attributable to the profitable underwriting results of KBS. The improvement in underwriting results in 2001 was due mainly to a decrease in losses incurred by KBS. KBS's reinsurance program was restructured effective January 1, 1998 in an effort to improve operating results over the long term in return for greater short-term volatility.

The income tax provision of the insurance segment generally fluctuates somewhat as a percentage of its pre-tax income mainly due to fluctuations in the relationship of substantially tax-exempt components of income to total pre-tax income.

Furniture Rental Segment

The furniture rental segment consists of CORT Business Services Corporation (CORT), which was acquired in late February 2000 (see Note 3 to the accompanying condensed consolidated financial statements). Following is a summary of CORT's operating results for the second quarters of 2001 and 2000, and first six months of 2001. For comparison, we also present (1) unaudited data for the entire six-month period ended June 30, 2000, excluding items not classified as segment-related by Wesco goodwill amortization, securities gains or losses, and income tax provisions or benefits related thereto, and (2) data included in Wesco's consolidated results from late February to June 30, 2000. Edgar Filing: WESCO FINANCIAL CORP - Form 10-Q

CORT's furniture rental revenues for the first six months of 2001 increased 3.8% over those reported for the entire first half of 2000, but declined 1.5% for the second quarter. Excluding rental revenues from recently acquired locations, trade show operations and a significant, short-term contract in 2000 with the U. S. Bureau of the Census, core rental revenues were up 5.5% for the same first half comparison, but up only 0.4% for the second quarter. CORT's management notes that both the number of leases outstanding and the average revenue per lease were declining by the end of 2001's second quarter due to the continued weakness of the economy. Furniture sales revenues increased approximately 12.6% for the first six months and 13.1% for the second quarter of 2001, reflecting CORT's ongoing efforts to control rental furniture levels while maintaining showroom quality.

Income before income taxes decreased to 5.3% of total revenues for the second quarter of 2001 from 14.3% for the second quarter of 2000. Income before income taxes decreased to 7.8% of total revenues for the first six months of 2001 from 14.4% for the first half of 2000. These decreases were due not only to reductions in gross profit resulting from the decline in rental revenues but also to unfavorable operating expense comparisons, particularly in the employee compensation category. CORT's management has indicated that it is taking aggressive measures to reduce expenses in an effort to maintain CORT's profitability.

Industrial Segment

Following is a summary of the results of operations of the industrial segment, consisting of the businesses of Precision Steel Warehouse, Inc. and its subsidiaries (in thousands):

Revenues of Precision Steel's businesses for the second quarter and first six months of 2001 decreased \$5.0 million and \$8.5 million, or approximately 29% and 24%, from the corresponding 2000 figures. Pounds of steel products sold decreased by approximately 33% and 29%, respectively. Precision Steel's management attributes the decline in sales volume principally to deteriorating activity in the manufacturing sector of the economy coupled with increasing competitive pressures.

Income before income taxes and net income of the industrial segment are dependent not only on revenues, but also on operating expenses and the cost of products sold. The latter, as a percentage of revenues, amounted to 81.6% and 80.9% for the second quarters of 2001 and 2000, and 81.3% and 80.5% for the corresponding six-month periods. The cost percentage typically fluctuates slightly from period to period as a result of changes in product mix and price competition at all levels.

Unrelated to Business Segment Operations

Set forth below is a summary of items increasing (decreasing) Wesco's consolidated net income that are viewed by management as unrelated to the operations of the insurance, furniture rental and industrial segments (in thousands):

Goodwill relates to the acquisitions of CORT and KBS, as well as smaller entities acquired by CORT following its purchase by Wesco in February 2000. The increase in amortization of goodwill for the six months ended June 30, 2001 was due principally to the inclusion of a full six months' amortization of CORT goodwill

in 2001, versus less than five months in 2000.

Realized gains and losses on the Wesco group's investments have fluctuated in amount from period to period, sometimes impacting net income significantly. However, the amounts and timing of these realizations have no predictive or practical analytical value.

Although there were no realized securities gains or losses in the first six months of 2001, Wesco's consolidated earnings for the first six months of 2000 included realized net gains of \$398.9 million, after income taxes, including \$279.7 million realized in the second quarter. The gains realized in 2000, although material in relation to Wesco's earnings, had only a minor impact on its shareholders' equity: Wesco's investments are carried at market value, and most of the gains had already been reflected in the unrealized appreciation component of shareholders' equity in prior accounting periods.

Other non-segment items comprise mainly rental income from owned commercial real estate and dividend and interest income from investments owned outside the insurance segment, reduced by interest and other expenses.

Wesco's effective consolidated income tax rate typically fluctuates from period to period for various reasons, such as the inclusion in consolidated revenues of significant, varying amounts of dividend income, which is substantially exempt from income taxes. The respective income tax provisions, expressed as percentages of income before income taxes, amounted to 34.9% and 35.0% for the quarters ended June 30, 2001 and June 30, 2000, and 35.5% and 34.8% for the six-month periods then ended.

Consolidated revenues, expenses and net income reported for any period are not necessarily indicative of future revenues, expenses and net income in that they are subject to significant variations in amount and timing of securities gains and losses and the possible occurrence of other unusual nonoperating items such as the acquisition of CORT in February 2000 (see Note 3 to the accompanying condensed consolidated financial statements). In addition, consolidated revenues, expenses and net income from operations are expected to be much more volatile than they were prior to Wes-FIC's entry into the super-catastrophe reinsurance business several years ago and, to a lesser degree, the restructuring of KBS's reinsurance program in 1998.

Shareholders' equity is impacted not only to the extent that unusual items affect earnings, but also to reflect changes in unrealized appreciation of investments, which are not reflected in net income.
