OF 1934

For the quarterly period ended: March 31, 2014

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission File Number 0-28082

KVH Industries, Inc.
(Exact Name of Registrant as Specified in its Charter)

Delaware	05-0420589
(State or Other Jurisdiction of Incorporation or Organization)	(I.R.S. Employer Identification Number)
50 Enterprise Center, Middletown, RI 02842	
(Address of Principal Executive Offices) (Zip Code)	
(401) 847-3327	
(Registrant's Telephone Number, Including Area Code)	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="radio"/>	Accelerated filer <input checked="" type="radio"/>
Non-accelerated filer <input type="radio"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="radio"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

KVH INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited, all amounts in thousands except per share amounts)

(1) Description of Business

KVH Industries, Inc. (together with its subsidiaries, the Company or KVH) designs, develops, manufactures and markets mobile communications products for the marine, land mobile and aeronautical markets, and navigation, guidance and stabilization products for both the defense and commercial markets.

KVH's mobile communications products enable customers to receive voice and Internet services, and live digital television via satellite services in marine vessels, recreational vehicles, buses and automobiles as well as live digital television on commercial airplanes while in motion. KVH's CommBox offers a range of tools designed to increase communication efficiency, reduce costs, and manage network operations. KVH sells its mobile communications products through an extensive international network of retailers, distributors and dealers. KVH also leases products directly to end users.

KVH offers precision fiber optic gyro (FOG)-based systems that enable platform and optical stabilization, navigation, pointing and guidance. KVH's guidance and stabilization products also include tactical navigation systems that provide uninterrupted access to navigation and pointing information in a variety of military vehicles, including tactical trucks and light armored vehicles. KVH's guidance and stabilization products are sold directly to U.S. and foreign governments and government contractors, as well as through an international network of authorized independent sales representatives. In addition, KVH's guidance and stabilization products are used in numerous commercial products, such as navigation and positioning systems for various applications including precision mapping, dynamic surveying, autonomous vehicles, train location control and track geometry measurement systems, industrial robotics and optical stabilization.

KVH's mobile communications service sales include sales earned from satellite voice and Internet airtime services, engineering services provided under development contracts, sales from product repairs, and extended warranty sales. Mobile communications services sales also include our distribution of commercially licensed news, sports, movies, music, and training video content to commercial and leisure customers in the maritime, hotel, and retail markets through the KVH Media Group (acquired as Headland Media Limited), the media and entertainment service company that KVH acquired on May 11, 2013. KVH provides, for monthly fixed and usage fees, satellite connectivity sales from broadband Internet, data and Voice over Internet Protocol (VoIP) service to its TracPhone V-series customers. KVH also earns monthly usage fees for third-party satellite connectivity for voice, data and Internet services to its Inmarsat and Iridium TracPhone customers who choose to activate their subscriptions with KVH.

KVH's guidance and stabilization service sales include product repairs, engineering services provided under development contracts and extended warranty sales.

(2) Basis of Presentation

The accompanying consolidated financial statements of KVH Industries, Inc. and its wholly owned subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America. The Company has evaluated all subsequent events through the date of this filing. All significant intercompany accounts and transactions have been eliminated in consolidation.

The consolidated financial statements have not been audited by our independent registered public accounting firm and include all adjustments (consisting of only normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial condition, results of operations, and cash flows for the periods presented. These consolidated financial statements do not include all disclosures associated with annual financial statements and accordingly should be read in conjunction with the Company's consolidated financial statements and related notes included in the Company's annual report on Form 10-K for the year ended December 31, 2013 filed on March 17, 2014 with the Securities and Exchange Commission. The results for the three months ended March 31, 2014 are not necessarily indicative of operating results for the remainder of the year.

Table of Contents

(3) Significant Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of sales and expenses during the reporting periods. As described in the Company's annual report on Form 10-K, the most significant estimates and assumptions by management affect the Company's revenue recognition, valuation of accounts receivable, valuation of inventory, assumptions used to determine fair value of goodwill and intangible assets, deferred tax assets and related valuation allowance, stock-based compensation, warranty and accounting for contingencies. The Company has reviewed these estimates and determined that these, as well as the additional revenue recognition discussion below, remain the most significant estimates for the quarter ended March 31, 2014.

Although the Company regularly assesses these estimates, actual results could differ materially from these estimates. Changes in estimates are recorded in the period in which they become known. The Company bases its estimates on historical experience and various other assumptions that it believes to be reasonable under the circumstances. The Company has accounted for its \$35,600 contract received in June 2012 from the Saudi Arabian National Guard, or SANG, to purchase TACNAV products and services under Accounting Standards Codification (ASC) 605-25, Multiple-Element Arrangements. The total contract value associated with TACNAV products is \$21,200 for which the final shipments were completed in the second quarter of 2013. Revenue is recognized for these product sales after transfer of title and risk of loss after inspection occurs. The total contract value associated with all services is \$14,400 which are estimated to continue into the third quarter of 2014. The contract value for the services portion of the SANG TACNAV order remaining to be performed as of March 31, 2014 is approximately \$300. The revenue for these services is recognized using the percentage of completion accounting method. The Company limits the amount of revenue recognized for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations, or subject to customer-specific return or refund privileges.

(4) Stock-Based Compensation

The Company recognizes stock-based compensation in accordance with the provisions of ASC Topic 718, Compensation-Stock Based Compensation. Stock-based compensation expense was \$1,003 and \$1,082 for the three months ended March 31, 2014 and March 31, 2013, respectively. As of March 31, 2014, there was \$2,237 of total unrecognized compensation expense related to stock options, which is expected to be recognized over a weighted-average period of 2.13 years. As of March 31, 2014, there was \$5,414 of total unrecognized compensation expense related to restricted stock awards, which is expected to be recognized over a weighted-average period of 3.19 years.

The Company granted 225 and 226 restricted stock awards to employees under the terms of the Amended and Restated 2006 Stock Incentive Plan during the three months ended March 31, 2014 and 2013, respectively. The restricted stock awards vest ratably over four years from the date of grant subject to the recipient remaining employed through the applicable vesting dates. Compensation expense for restricted stock awards is measured at fair value on the date of grant based on the number of shares granted and the quoted market closing price of the Company's common stock. Such value is recognized as expense over the vesting period of the award, net of estimated forfeitures. There were no stock options granted to employees under the terms of the Amended and Restated 2006 Stock Incentive Plan during the three months ended March 31, 2014 and 2013.

(5) Net (Loss) Income per Common Share

Basic net (loss) income per share is calculated based on the weighted average number of common shares outstanding during the period. Diluted net income per share incorporates the dilutive effect of common stock equivalent options, warrants and other convertible securities, if any, as determined with the treasury stock accounting method. For the three months ended March 31, 2014, since there was a net loss, the Company excluded all outstanding stock options and non-vested restricted shares from its diluted loss per share calculation, as inclusion of these securities would have

reduced the net loss per share. Common stock equivalents related to options and restricted stock awards for 440 shares of common stock for the three months ended March 31, 2013 have been excluded from the fully diluted calculation of net income per share, as inclusion would be anti-dilutive.

Table of Contents

A reconciliation of the basic and diluted weighted average common shares outstanding is as follows:

	Three Months Ended March 31,	
	2014	2013
Weighted average common shares outstanding—basic	15,313	14,989
Dilutive common shares issuable in connection with stock plans	—	230
Weighted average common shares outstanding—diluted	15,313	15,219

(6) Inventories

Inventories are stated at the lower of cost or market using the first-in first-out costing method. Inventories as of March 31, 2014 and December 31, 2013 include the costs of material, labor, and factory overhead. Components of inventories consist of the following:

	March 31, 2014	December 31, 2013
Raw materials	\$10,158	\$9,783
Work in process	3,347	3,087
Finished goods	5,199	5,385
	\$18,704	\$18,255

(7) Product Warranty

The Company's products carry limited warranties that typically range from one to two years and vary by product. The warranty period begins on the date of retail purchase or lease by the original purchaser. The Company accrues estimated product warranty costs at the time of sale and any additional amounts are recorded when such costs are probable and can be reasonably estimated. Factors that affect the Company's warranty liability include the number of units sold or leased, historical and anticipated rates of warranty repairs and the cost per repair. Warranty and related costs are reflected within sales, marketing and support in the accompanying statements of operations. As of March 31, 2014 and December 31, 2013, the Company had accrued product warranty costs of \$1,367 and \$1,269, respectively. The following table summarizes product warranty activity during 2014 and 2013:

	Three Months Ended March 31,	
	2014	2013
Beginning balance	\$1,269	\$814
Charges to expense	434	315
Costs incurred	(336)	(326)
Ending balance	\$1,367	\$803

(8) Segment Reporting

Under common operational management, the Company designs, develops, manufactures and markets its navigation, guidance and stabilization and mobile communications products for use in a wide variety of applications. Products are generally sold directly to third-party consumer electronic dealers and retailers, original equipment manufacturers, government contractors or to U.S. and other foreign government agencies. Primarily, sales originating in the Americas consist of sales within the United States and Canada and, to a lesser extent, Mexico and some Latin and South American countries. The Americas' sales also include all guidance and stabilization product sales throughout the world. Sales originating from the Company's European and Asian subsidiaries principally consist of sales into all European countries, both inside and outside the European Union, as well as Africa, Asia/Pacific, the Middle East and India.

Table of Contents

The Company operates in two geographic segments, exclusively in the mobile communications, navigation and guidance and stabilization equipment industry, which it considers to be a single business activity. The Company has two primary product categories: mobile communications and guidance and stabilization. Mobile communication sales and services include marine, land mobile, automotive, and aeronautical communication equipment and satellite-based voice, television and Broadband Internet connectivity services, as well as distribution of commercially licensed premium licensed news, sports, movies, music and training video content for commercial and leisure customers in the maritime, hotel, and retail markets. Guidance and stabilization sales and services include sales of defense-related navigation and guidance and stabilization equipment based upon digital compass and FOG sensor technology. Mobile communication and guidance and stabilization sales also include development contract revenue, product repairs and extended warranty sales.

The following table summarizes information regarding the Company's operations by geographic segment:

	Sales Originating From		
	Americas	Europe and Asia	Total
Three months ended March 31, 2014

Depreciation and amortization	\$1,150	\$74	\$1,224
Total assets	\$125,565	\$19,738	\$145,303

(9) Legal Matters

From time to time, the Company is involved in litigation incidental to the conduct of its business. In the ordinary course of business, the Company is a party to inquiries, legal proceedings and claims including, from time to time, disagreements with vendors and customers. The Company is not a party to any lawsuit or proceeding that, in management's opinion, is likely to materially harm the Company's business, results of operations, financial condition or cash flows.

(10) Share Buyback Program

On November 26, 2008, the Company's Board of Directors authorized a program to repurchase up to one million shares of the Company's common stock. As of March 31, 2014, 341,009 shares of the Company's common stock remain available for repurchase under the authorized program. The repurchase program is funded using the Company's existing cash, cash equivalents, marketable securities and future cash flows. Under the repurchase program, the Company, at management's discretion, may repurchase shares on the open market from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases depends on availability of shares, price, market conditions, alternative uses of capital, and applicable regulatory requirements. The program may be modified, suspended or terminated at any time without prior notice. The repurchase program has no expiration date. There were no other repurchase programs outstanding during the three months ended March 31, 2014 and no repurchase programs expired during the period.

The Company did not repurchase any shares of its common stock in the three months ended March 31, 2014.

(11) Fair Value Measurements

ASC Topic 820, Fair Value Measurements and Disclosures (ASC 820), provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that may be used to measure fair value:

Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, Level unrestricted assets or liabilities. The Company's Level 1 assets are investments in money market mutual funds, 1: government agency bonds, United States treasuries, municipal bonds, corporate notes, and certificates of deposit.

Quoted prices for similar assets or liabilities in active markets; or observable prices that are based on Level observable market data, based on directly or indirectly market-corroborated inputs. The Company's Level 2 2: assets and liabilities are interest rate swaps and foreign currency forward contracts.

Unobservable inputs that are supported by little or no market activity, and are developed based on the Level 3: best information available given the circumstances. The Company has no Level 3 assets.

Assets and liabilities measured at fair value are based on the valuation techniques identified in the table below. The valuation techniques are:

(a) Market approach—prices and other relevant information generated by market transactions involving identical or comparable assets.

The valuations of the interest rate swaps intended to mitigate the Company's interest rate risk are determined with the assistance of a third-party financial institution using widely accepted valuation techniques, including

(b) discounted cash flow analysis on the expected cash flows of each instrument. This analysis utilizes observable market-based inputs, including interest rate curves and interest rate volatility, and reflects the contractual terms of these instruments, including the period to maturity.

(c) The valuations of foreign currency forward contracts are determined using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each instrument. This analysis utilizes observable market-based inputs, including commodity forward curves, and reflects the contractual terms of these

instruments, including the period to maturity.

Table of Contents

The following tables present financial assets and liabilities at March 31, 2014 and December 31, 2013 for which the Company measures fair value on a recurring basis, by level, within the fair value hierarchy:

March 31, 2014	Total	Level 1	Level 2	Level 3	Valuation Technique
Assets					
Money market mutual funds	\$16,821	\$16,821	\$—	\$—	(a)
Government agency bonds	7,501	7,501	—	—	(a)
United States treasuries	4,008	4,008	—	—	(a)
Municipal bonds	4,186	4,186	—	—	(a)
Corporate notes	6,386	6,386	—	—	(a)
Certificates of deposit	2,523	2,523	—	—	(a)
Foreign currency forward contracts	94	—	94	—	(c)
Liabilities					
Interest rate swaps	\$322	\$—	\$322	\$—	(b)
December 31, 2013	Total	Level 1	Level 2	Level 3	Valuation Technique
Assets					
Money market mutual funds	\$19,957	\$19,957	\$—	\$—	(a)
Government agency bonds	7,509	7,509	—	—	(a)
United States treasuries	8,041	8,041	—	—	(a)
Corporate notes	8,453	8,453	—	—	(a)
Certificates of deposit	2,426	2,426	—	—	(a)
Foreign currency forward contracts	114	—	114	—	—
Liabilities					
Interest rate swaps	\$332	\$—	\$332	\$—	(b)

Certain financial instruments are carried at cost on the consolidated balance sheets, which approximates fair value due to their short-term, highly liquid nature. These instruments include cash and cash equivalents, accounts receivable, accounts payable and accrued expenses.

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company's non-financial assets and liabilities, such as goodwill, intangible assets, and other long-lived assets resulting from business combinations are measured at fair value using income approach valuation methodologies at the date of acquisition and subsequently re-measured if there are indicators of impairment. There were no indicators of impairment identified during the three months ended March 31, 2014. As of March 31, 2014, we did not have any other non-financial assets and liabilities that were carried at fair value on a recurring basis in the consolidated financial statements or for which a fair value measurement was required.

(12) Acquisition

On May 11, 2013, KVH Industries U.K. Limited, a newly formed, wholly owned subsidiary of KVH, entered into a Share Purchase Agreement with Oakley Capital Private Equity L.P., Mark Woodhead, Andrew Michael Galvin and the Trustees of the Headland Media Limited Employee Benefit Trust to acquire all of the issued share capital of Headland Media Limited (now known as the KVH Media Group), a media and entertainment service company based in the United Kingdom that distributes premium commercially licensed news, sports, movies, music and training video content for commercial and leisure customers in the maritime, hotel, and retail markets, for an aggregate purchase price of £15,576 (\$24,169 at the exchange rate of £1.00: \$1.5517 on May 11, 2013). The aggregate purchase price includes \$169 in payments made in July 2013 related to a post-closing adjustment. The acquisition of Headland Media Limited (now known as the KVH Media Group) was accounted for under the acquisition method of accounting

for the business combination. The purchase price was determined as a result of arms-length negotiation and was subject to a potential post-closing adjustment based on the value of the net assets delivered at the closing.

Table of Contents

The Share Purchase Agreement contains certain representations, warranties, covenants and indemnification provisions. The Share Purchase Agreement provides that 10% of the purchase price shall be held in escrow for a period of at least eighteen months after the closing in order to satisfy valid indemnification claims that KVH may assert for specified breaches of representations, warranties and covenants.

Since the date of the acquisition, May 11, 2013, the Company has recorded approximately \$12,100 of service revenue attributable to KVH Media Group within its consolidated financial statements, of which \$3,300 was recorded during the three months ended March 31, 2014.

Pro Forma Financial Information

The following table provides certain supplemental statements of operations information on an unaudited pro forma basis as if the KVH Media Group acquisition had occurred on January 1, 2013:

	Three Months Ended March 31, 2013
Pro forma net revenues	\$42,987
Pro forma net income	\$2,090
Basic pro forma net income per share	\$0.14
Diluted pro forma net income per share	\$0.14

The pro forma results presented above are for illustrative purposes only for the periods presented and do not purport to be indicative of the actual results which would have occurred had the transaction been completed as of the beginning of the period, nor are they indicative of results of operations which may occur in the future.

(13) Goodwill and Intangible Assets

The following table sets forth the changes in the carrying amount of goodwill for the three months ended March 31, 2014:

	Amounts
Balance at December 31, 2013	\$18,281
Foreign currency translation adjustment	126
Balance at March 31, 2014	\$18,407

The Company performed its annual goodwill impairment test as of August 31, 2013, as defined by ASC Topic 350, Intangibles—Goodwill and Other (ASC 350). ASC 350 requires that the impairment test be performed through the application of a two-step process. The first step compares the carrying value of the Company's reporting units to their estimated fair values as of the test date. If fair value is less than carrying value, a second step is performed to quantify the amount of the impairment, if any. As of August 31, 2013, the Company performed its annual impairment test for goodwill at the reporting unit level and, after conducting the first step, determined that it was not necessary to conduct the second step as it concluded that the fair value of its reporting units substantially exceeded their carrying value.

Accordingly, the Company determined no adjustment to goodwill was necessary.

For intangible assets, the Company assesses the carrying value of these assets whenever events or circumstances indicate that the carrying value may not be recoverable. Recoverability of assets to be held and used is measured by comparing the carrying amount of an asset, or asset group, to the future undiscounted cash flows expected to be generated by the asset, or asset group. There were no events or changes in circumstances during the first quarter of 2014 which indicated that an assessment of the impairment of goodwill and intangible assets was required.

Table of Contents

Acquired intangible assets are subject to amortization. The following table summarizes acquired intangible assets at March 31, 2014 and December 31, 2013, respectively:

	Useful Life	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
March 31, 2014				
Subscriber relationships	10	\$8,837	\$757	\$8,080
Distribution rights	15	5,226	297	4,929
Internally developed software	3	575	166	409
Proprietary content	2	196	86	110
Intellectual property	7	2,285	1,159	1,126
		\$17,119	\$2,465	\$14,654
December 31, 2013				
Subscriber relationships	10	\$8,763	\$540	\$8,223
Distribution rights	15	5,183	212	4,971
Internally developed software	3	571	118	453
Proprietary content	2	195	61	134
Intellectual property	7	2,280	1,074	1,206
		\$16,992	\$2,005	\$14,987

Estimated future amortization expense remaining at March 31, 2014 for intangible assets acquired is as follows:

	Year Ending December 31,
2014	\$1,394
2015	1,792
2016	1,631
2017	1,464
2018	1,236
Thereafter	7,137
Total future amortization expense	\$14,654

(14) Business and Credit Concentrations

Significant portions of the Company's net sales are as follows:

	Three Months Ended March 31,		
	2014	2013	
Net sales to foreign customers outside the U.S. and Canada	29	% 45	%
Net sales to Customer A	*	23	%

*Represents less than 10% of net sales in the period.

Table of Contents

(15) Derivative Instruments and Hedging Activities

Effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, the Company entered into two interest rate swap agreements. These interest rate swap agreements are intended to hedge the Company's mortgage loan related to its headquarters facility in Middletown, Rhode Island by fixing the interest rates specified in the mortgage loan to 5.91% for half of the principal amount outstanding and 6.07% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

As required by ASC Topic 815, Derivatives and Hedging, the Company records all derivatives on the balance sheet at fair value. As of March 31, 2014, the fair value of the derivatives is included in other accrued liabilities and the unrealized gain is included in accumulated other comprehensive income.

As of March 31, 2014, the Company had the following outstanding interest rate derivatives that were designated as cash flow hedges of interest rate risk:

Interest Rate Derivatives	Notional (in thousands)	Asset (Liability)	Effective Date	Maturity Date	Index	Strike Rate
Interest rate swap	\$1,690	(155)	April 1, 2010	April 1, 2019	1-month LIBOR	5.91 %
Interest rate swap	\$1,690	(167)	April 1, 2010	April 1, 2019	1-month LIBOR	6.07 %

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The statements included in this quarterly report on Form 10-Q, other than statements of historical fact, are forward-looking statements. Examples of forward-looking statements include statements regarding our future financial results, operating results, business strategies, projected costs, products, competitive positions and plans, customer preferences, consumer trends, anticipated product development, and objectives of management for future operations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "would," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential," "continue," or the negative of these other comparable terminology. Any expectations based on these forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed in the section entitled "Risk Factors" in Item 1A of Part I of our annual report on Form 10-K for the year ended December 31, 2013. These and many other factors could affect our future financial and operating results, and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by us or on our behalf. For example, our expectations regarding certain items as a percentage of sales assume that we will achieve our anticipated sales goals. The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this report.

Overview

We design, develop, manufacture and market mobile communications products for the marine, land mobile and aeronautical markets, and navigation, guidance and stabilization products for both the defense and commercial markets.

Our mobile communications products enable customers to receive voice and Internet services and live digital television via satellite services in marine vessels, recreational vehicles, buses and automobiles as well as live digital television on commercial airplanes while in motion. Our CommBox offers a range of tools designed to increase communication efficiency, reduce costs, and manage network operations. We sell our mobile communications products through an extensive international network of retailers, distributors and dealers. We also lease products directly to end users.

We offer precision fiber optic gyro (FOG)-based systems that enable platform and optical stabilization, navigation, pointing and guidance. Our guidance and stabilization products also include tactical navigation systems that provide uninterrupted access to navigation and pointing information in a variety of military vehicles, including tactical trucks and light armored vehicles. Our guidance and stabilization products are sold directly to U.S. and foreign governments and government contractors, as well as through an international network of authorized independent sales representatives. In addition, our guidance and stabilization products are used in numerous commercial products, such as navigation and positioning systems for various applications including precision mapping, dynamic surveying, autonomous vehicles, train location control and track geometry measurement systems, industrial robotics and optical stabilization.

Our mobile communications service sales include sales earned from satellite voice and Internet airtime services, engineering services provided under development contracts, sales from product repairs, and extended warranty sales. Our mobile communications services sales also include our distribution of commercially licensed news, sports, music, movies and training video content to commercial and leisure customers in the maritime, hotel, and retail markets. We typically recognize revenue from media content sales ratably over the period of the service contract. We provide, for monthly fixed and usage fees, satellite connectivity services for broadband Internet, data and Voice over Internet Protocol (VoIP) service to our TracPhone V-series customers. We also earn monthly usage fees for third-party satellite connectivity for voice, data and Internet services to our Inmarsat and Iridium TracPhone customers who choose to activate their subscriptions with us. Our service sales have grown as a percentage of total revenue from 24% of our net sales in 2011 to 34% in 2012 to 44% in 2013 to 51% in the three months ended March 31, 2014, a portion of which is attributable to our acquisition of the KVH Media Group business in May 2013.

Our guidance and stabilization service sales include engineering services provided under development contracts, product repairs and extended warranty sales. Our guidance and stabilization sales in the three months ended March 31, 2014 and 2013 included \$1.0 million and \$9.2 million, respectively, attributable to our \$35.6 million contract with the Saudi Arabian National Guard, the largest contract in the history of our company. We completed the delivery of TACNAV product shipments under the SANG contract in the second quarter of 2013 and expect to complete the services portion of the SANG contract in the third quarter of 2014. At March 31, 2014, the contract value of the services remaining to be performed under the SANG contract was \$0.3 million.

Table of Contents

We generate sales primarily from the sale of our mobile satellite systems and services and our guidance and stabilization products and services. The following table provides, for the periods indicated, our sales by industry category:

	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Mobile communications	\$28,975	\$22,907
Guidance and stabilization	8,010	17,020
Net sales	\$36,985	\$39,927

We have historically derived a substantial portion of our sales from sales to customers located outside the United States. Notes 8 and 14 of the notes to the consolidated financial statements provide information regarding our sales to specific geographic regions.

Critical Accounting Policies and Significant Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, sales and expenses, and related disclosure at the date of our financial statements. Our significant accounting policies are summarized in note 1 of the notes to the consolidated financial statements in our annual report on Form 10-K for the year ended December 31, 2013.

As described in our annual report on Form 10-K for the year ended December 31, 2013, our most critical accounting policies and estimates upon which our consolidated financial statements were prepared were those relating to revenue recognition, allowances for accounts receivable, inventories, income taxes and deferred income tax assets and liabilities, warranty, stock-based compensation, goodwill and intangible assets and contingencies. We have reviewed our policies and estimates and determined that these remain our most critical accounting policies and estimates for the quarter ended March 31, 2014.

Readers should refer to our annual report on Form 10-K for the year ended December 31, 2013 under “Management’s Discussion and Analysis of Financial Condition and Results of Operation—Critical Accounting Policies and Significant Estimates” for descriptions of these policies and estimates.

Table of Contents

Results of Operations

The following table provides, for the periods indicated, certain financial data expressed as a percentage of net sales:

	Three Months Ended March 31,		
	2014	2013	
Sales:			
Product	48.7	% 63.2	%
Service	51.3	36.8	
Net sales	100.0	100.0	
Cost and expenses:			
Costs of product sales	30.7	34.8	
Costs of service sales	29.9	25.7	
Research and development	9.9	7.4	
Sales, marketing and support	20.2	17.4	
General and administrative	13.9	8.5	
Total costs and expenses	104.6	93.8	
(Loss) income from operations	(4.6) 6.2	
Interest income	0.6	0.4	
Interest expense	0.5	0.2	
Other income, net	0.3	0.1	
(Loss) income before income tax (benefit) expense	(4.2) 6.5	
Income tax (benefit) expense	(1.2) 1.6	
Net (loss) income	(3.0)% 4.9	%

Three Months Ended March 31, 2014 and 2013

Net Sales

Product sales decreased \$7.2 million, or 29%, to \$18.0 million for the three months ended March 31, 2014 from \$25.2 million for the three months ended March 31, 2013. The decrease was primarily due to a decrease in sales of our guidance and stabilization products of approximately \$7.1 million, or 51%. Specifically, sales of our TACNAV defense products decreased \$6.2 million, or 80%, primarily as a result of decreased product sales related to our Saudi Arabian National Guard (SANG) contract. Product shipments under the contract were completed in the second quarter of 2013. Also contributing to the decrease in sales of our guidance and stabilization products during the three months ended March 31, 2014 was a decrease in sales of our FOG products of \$0.9 million, or 16%, as compared to the three months ended March 31, 2013, primarily as a result of decreased sales under the U.S. Army's Common Remotely Operated Weapon Stations (CROWS) III program. The decrease in FOG sales related the U.S. Army's CROWS III program was partially offset by increased demand for FOGs for commercial applications.

We expect that our TACNAV product sales will decrease year-over-year, primarily due to the completion of the SANG product order discussed above. Although we expect that TACNAV sales will continue to grow over the long term, sales on a quarter-to-quarter or year-to-year basis could continue to be very uneven. We also expect that our FOG sales will modestly decrease year-over-year, primarily due to reduced FOG demand for the U.S. Army's CROWS III program.

Mobile communications product sales decreased \$0.1 million, or 1%, to \$11.3 million for the three months ended March 31, 2014 from \$11.4 million for the three months ended March 31, 2013. Sales of marine satellite communications and satellite television products for the three months ended March 31, 2014 were consistent with the three months ended March 31, 2013. Marine satellite communications sales of our TracPhone V11 increased as did our TracPhone V7 sales. Sales of our marine satellite television products decreased 9%, primarily as a result of the unseasonably cold spring that impacted the North American leisure market and a temporary component shortage for one of our TracVision products. We remain cautious about the prospects for our overall marine product sales, specifically in Europe and Asia, as a result of ongoing challenges in the global economy. However, we expect our

mini-VSAT product sales will continue to grow year-over-year.

Table of Contents

Mobile communications product sales originating from our European and Asian subsidiaries for the three months ended March 31, 2014 decreased \$0.4 million, or 9%, as compared to the three months ended March 31, 2013. Mobile communications product sales originating from the Americas for the three months ended March 31, 2014 increased \$0.3 million, or 4%, as compared to the three months ended March 31, 2013.

Service sales for the three months ended March 31, 2014 increased \$4.3 million, or 29%, to \$19.0 million from \$14.7 million for the three months ended March 31, 2013. The primary reason for the increase was a \$3.6 million increase in airtime sales for our mini-VSAT Broadband service. Also contributing to the increase in service sales was a \$3.3 million increase in new media sales arising from our acquisition of Headland Media Limited (now known as the KVH Media Group) in May 2013. Partially offsetting the increases in service sales was a \$1.9 million decrease in contracted engineering services primarily from decreased construction and program management services provided in connection with the SANG contract, a \$0.4 million decrease in Inmarsat service sales, and a \$0.3 million decrease in service repair and installation sales.

We expect that our mini-VSAT services sales will continue to grow year-over-year primarily from increased TracPhone V11 and V7 activations, an overall increase in our mini-VSAT Broadband customer base, and from the introduction of new value-added services to our mini-VSAT Broadband customers such as IP-MobileCast, which we expect to begin generating service revenue in the second quarter of 2014. We also expect that our contracted engineering services will significantly decrease year-over-year driven by the anticipated completion of the SANG project management services in the third quarter of 2014.

Costs of Sales

For the three months ended March 31, 2014, costs of product sales decreased by \$2.6 million, or 19%, to \$11.3 million from \$13.9 million for the three months ended March 31, 2013. The primary reason for the decrease was the decrease in sales of our TACNAV and FOG products discussed above.

Costs of service sales increased by \$0.9 million, or 8%, to \$11.1 million for the three months ended March 31, 2014 from \$10.2 million for the three months ended March 31, 2013. The primary reason for the increase was a \$1.8 million increase in airtime costs of sales for our mini-VSAT Broadband service. Also contributing to the increase was a \$1.0 million increase in costs of service sales from the KVH Media Group. Partially offsetting these increases was a \$1.8 million decrease in engineering services costs of sales due primarily to a decrease in the services provided in connection with the SANG contract as discussed above.

Gross margin from product sales for the three months ended March 31, 2014 decreased to 37% as compared to 45% for the three months ended March 31, 2013. The decrease in our gross margin from product sales was primarily due to a decrease in sales of our TACNAV products discussed above, which generally have higher margins than our mobile communications products.

Gross margin from service sales for the three months ended March 31, 2014 increased to 42% as compared to 30% for the three months ended March 31, 2013. The increase in our gross margin from service sales was primarily attributable to the service gross margin contributed from our new KVH Media Group business. Also contributing to the gross margin increase was an increase in gross margin for mini-VSAT Broadband service sales to 37% from 33% in the year-ago period. Partially offsetting the increase in service gross margin was a decrease in gross margin for installation services.

We expect that although mini-VSAT Broadband service revenue will continue to increase year-over-year, we do not anticipate the same year-over-year increase in gross margin percentage achieved in 2013. We anticipate that the favorable impact to our mini-VSAT Broadband service margin that we expect to achieve from increased TracPhone V11 and V7 activations, as well as an overall increase in our mini-VSAT Broadband customer base will be partially offset by the additional service costs of introducing new value-added services to our mini-VSAT Broadband customers such as IP-MobileCast in 2014.

Operating Expenses

Research and development expense for the three months ended March 31, 2014 increased by \$0.7 million, or 24%, to \$3.7 million from \$3.0 million for the three months ended March 31, 2013. The primary reason for the increase in 2014 expense was a \$0.5 million increase in consulting expense driven by the development of our new satellite television products and IP-MobileCast content delivery service. As a percentage of net sales, research and

development expense for the quarter ended March 31, 2014 was 10% as compared to 7% for the quarter ended March 31, 2013.

We expect research and development expense will continue to increase year-over-year due to the continued development efforts associated with the introductions of new value-added services to our mini-VSAT Broadband customers such as IP-MobileCast, as well as new FOG and TACNAV products.

Table of Contents

Sales, marketing and support expense for the three months ended March 31, 2014 increased by \$0.6 million, or 8%, to \$7.5 million from \$6.9 million for the three months ended March 31, 2013. The primary reasons for the increase in 2014 were a \$0.6 million increase in sales, marketing and support expense related our new KVH Media Group business, a \$0.4 million increase in U.S-based employee compensation, and a \$0.1 million increase in warranty expense. Partially offsetting these increases was a \$0.9 million decrease in variable sales expense primarily as a result of the completion of product shipments relating to the SANG contract in the second quarter of 2013. As a percentage of net sales, sales, marketing and support expense for the quarter ended March 31, 2014 was 20% as compared to 17% for the quarter ended March 31, 2013.

We expect that our sales, marketing and support expenses will continue to increase year-over-year, driven by the additional expenses for our new KVH Media Group business and the introduction of new value-added services to our mini-VSAT Broadband customers such as IP-MobileCast.

General and administrative expense for the three months ended March 31, 2014 increased by \$1.8 million, or 53%, to \$5.2 million from \$3.4 million for the three months ended March 31, 2013. The primary reason for the increase in 2014 expense was a \$1.6 million increase in general and administrative expense, relating to our new KVH Media Group business. As a percentage of net sales, general and administrative expense for the quarter ended March 31, 2014 was 14% as compared to 9% for the quarter ended March 31, 2013.

We expect general and administrative expenses to increase year-over-year, driven primarily by additional expenses for our new KVH Media Group business.

Income Tax Expense

Income tax benefit for the three months ended March 31, 2014 was \$0.4 million as compared to \$0.7 million income tax expense for the three months ended March 31, 2013. The decrease in income tax expense is primarily due to a \$4.2 million decrease in pre-tax income.

Backlog

Backlog is not a meaningful indicator for predicting revenue in future periods. Commercial resellers for our mobile satellite communications products and FOG products do not carry extensive inventories and rely on us to ship products quickly. Generally due to the rapid delivery of our commercial products, our backlog for those products is not significant.

Our backlog for all products and services was approximately \$18.6 million and \$20.5 million on March 31, 2014 and December 31, 2013, respectively. As of March 31, 2014, all of our backlog was scheduled for fulfillment in 2014, except for \$5.3 million scheduled for fulfillment in 2015. The decrease in backlog of \$1.9 million from December 31, 2013 was primarily the result of the fulfillment of the order for TACNAV services received in June 2012 from SANG and the fulfillment of other TACNAV product orders.

Backlog consists of orders evidenced by written agreements and specified delivery dates for customers who are acceptable credit risks. We do not include satellite connectivity service sales in our backlog even though many of our satellite connectivity customers have signed annual or multi-year service contracts providing for a fixed monthly fee. Military orders included in backlog are generally subject to cancellation for the convenience of the customer. When orders are cancelled, we generally recover actual costs incurred through the date of cancellation and the costs resulting from termination. As of March 31, 2014, our backlog included approximately \$11.9 million in orders that are subject to cancellation for convenience by the customer. Individual orders for guidance and stabilization products are often large and may require procurement of specialized long-lead components and allocation of manufacturing resources. The complexity of planning and executing larger orders generally requires customers to order well in advance of the required delivery date, resulting in backlog.

Liquidity and Capital Resources

We have historically funded our operations primarily from operating cash flows, net proceeds from public and private equity offerings, bank financings and proceeds received from exercises of stock options. As of March 31, 2014, we had \$53.7 million in cash, cash equivalents, and marketable securities, of which \$8.5 million in cash equivalents were held in a local currency by our foreign subsidiaries. There were no marketable securities held by our foreign subsidiaries as of March 31, 2014. As of March 31, 2014, we had \$79.0 million in working capital.

Net cash used in operations was \$0.6 million for the three months ended March 31, 2014 as compared to net cash provided by operations of \$2.4 million for the three months ended March 31, 2013. The \$3.0 million increase in cash used in operations is primarily due to a \$3.1 million decrease in net income, a \$1.2 million increase in cash outflows related to other long-term liabilities and a \$0.2 million increase in cash outflows related to prepaid expenses and other assets. Partially offsetting the increase in cash outflows is an increase in cash inflows attributable to accounts receivable of \$1.1 million, a \$0.7 million increase in cash inflows related to deferred revenue and a \$0.3 million decrease in cash outflows related to inventory.

Table of Contents

Net cash provided by investing activities was \$4.2 million for the three months ended March 31, 2014 as compared to net cash used in investing activities of \$9.8 million for the three months ended March 31, 2013. The increase is primarily the result of a decrease in net investments in marketable securities.

Net cash used in financing activities was \$0.7 million for the three months ended March 31, 2014 compared to cash provided by financing activities of \$4.9 million for the three months ended March 31, 2013. The \$5.6 million increase in cash used in financing activities is primarily due to a \$4.7 million reduction in borrowings under our long-term debt, a \$1.1 million decrease in proceeds from stock options exercised and purchases under our employee stock purchase plan and a \$0.2 million increase in repayments on our long-term debt, partially offset by a \$0.3 million decrease in payments related to employee restricted stock withholdings.

Borrowing Arrangements

On April 6, 2009, we entered into a mortgage loan in the amount of \$4.0 million related to our headquarters facility in Middletown, Rhode Island. The loan term is 10 years, with a principal amortization of 20 years, and the interest rate will be a rate per year adjusted periodically based on a defined interest period equal to the BBA LIBOR Rate plus 2.25 percentage points. On June 9, 2011, we entered into an amendment to the mortgage loan, providing for an adjustment of the interest rate from the BBA LIBOR Rate plus 2.25 percentage points to the BBA LIBOR Rate plus 2.00 points. Land, building and improvements with an approximate carrying value of \$5.0 million as of March 31, 2014 secure the mortgage loan. The monthly mortgage payment is approximately \$11,000 plus interest and increases in increments of approximately \$1,000 each year throughout the life of the mortgage. Due to the difference in the term of the loan and amortization of the principal, a balloon payment of \$2.6 million is due on April 1, 2019. The loan contains one financial covenant, a Fixed Charge Coverage Ratio, which applies in the event that our consolidated cash, cash equivalents and marketable securities balance falls below \$25.0 million at any time. As our consolidated cash, cash equivalents, and marketable securities balance was above \$25.0 million throughout the three months ended March 31, 2014, the Fixed Charge Coverage Ratio did not apply. Under the mortgage loan we may prepay our outstanding loan balance subject to certain early termination charges as defined in the mortgage loan agreement. If we were to default on our mortgage loan, the land, building and improvements would be used as collateral. As discussed in note 15 to the consolidated financial statements, effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, we entered into two interest rate swap agreements that are intended to hedge our mortgage interest obligations by fixing the interest rates specified in the mortgage loan to 5.91% for half of the principal amount outstanding and 6.07% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

Our \$30.0 million revolving loan agreement with a bank, as amended, matures on December 31, 2015. The entire \$30.0 million principal amount was outstanding on March 31, 2014. We pay interest on any outstanding amounts at a rate equal to the BBA LIBOR Daily Floating Rate plus 1.25%. The monthly interest payments are presently approximately \$36,000, subject to adjustment in accordance with the terms of the loan agreement. The line of credit contains two financial covenants, a Liquidity Covenant, which requires us to maintain at least \$20.0 million in unencumbered liquid assets, as defined in the loan agreement, and a Fixed Charge Coverage Ratio. As of March 31, 2014, we were not in default of either covenant. We may terminate the loan agreement prior to its full term without penalty; provided we give 30 days' advance written notice to the bank. Our obligation to repay the loan could be accelerated upon a default or event of default under the terms of the revolving loan agreement, including certain failures to pay principal or interest when due, certain breaches of representations and warranties, the failure to comply with our affirmative and negative covenants under the loan agreement, a change of control, certain defaults in payment relating to other indebtedness, the acceleration of payment of certain other indebtedness, certain events relating to our liquidation, dissolution, bankruptcy, insolvency or receivership, the entry of certain judgments against us, certain events relating to the impairment of collateral or the bank's security interest therein, and any other material adverse change.

Other Matters

It is our intent to continue to invest in the mini-VSAT Broadband network on a global basis in cooperation with ViaSat under the terms of a 10-year agreement announced in July 2008. As part of the future potential capacity expansion, we would plan to seek to acquire additional satellite capacity from satellite operators, expend funds to seek

regulatory approvals and permits, develop product enhancements in anticipation of the expansion, and hire additional personnel. In addition, in December 2011, we entered into a five-year agreement to lease C-band satellite capacity from a satellite operator, effective February 1, 2012, and in 2012 we also purchased three satellite hubs to support this C-band service. The total cost of the five-year satellite capacity agreement, the satellite hubs, and teleport services is approximately \$12.2 million, of which approximately \$2.7 million related to the total cost of the three hubs. On January 30, 2013, we borrowed \$4.7 million from a bank and pledged as collateral six satellite hubs and related equipment, including the three hubs purchased in 2012. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 2.76% per annum. The monthly payment is approximately \$83,000, including interest expense. On December 30, 2013, we borrowed \$1.2 million from a bank and pledged

Table of Contents

as collateral one satellite hub and related equipment. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 3.08% per annum. The monthly payment is approximately \$21,000, including interest expense.

On November 26, 2008, our Board of Directors authorized a program to repurchase up to one million shares of our common stock. The share repurchase program is funded using our existing cash, cash equivalents, marketable securities and future cash flows. As of March 31, 2014, 341,009 shares of our common stock remain available for repurchase under the program. We did not purchase any shares of our common stock in the three months ended March 31, 2014.

We believe that the \$53.7 million we hold in cash, cash equivalents and marketable securities, together with our other existing working capital and cash flows from operations, will be adequate to meet planned operating and capital requirements through at least the next twelve months. However, as the need or opportunity arises, we may seek to raise additional capital through public or private sales of securities or through additional debt financing. There are no assurances that we will be able to obtain any additional funding or that such funding will be available on terms acceptable to us.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risk exposures are interest rate risk and foreign currency exchange rate risk.

We are exposed to changes in interest rates because we finance certain operations through fixed and variable rate debt instruments.

We have \$30.0 million in borrowings outstanding under our variable-rate credit facility at March 31, 2014, at an interest rate equal to the BBA LIBOR Daily Floating Rate plus 1.25%.

As discussed in note 15 to the consolidated financial statements, effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, we entered into two interest rate swap agreements. These interest rate swap agreements are intended to hedge our mortgage loan related to our headquarters facility in Middletown, Rhode Island by fixing the interest rates specified in the mortgage loan to 5.9% for half of the principal amount outstanding and 6.1% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

We are exposed to currency exchange rate fluctuations related to our subsidiary operations in the United Kingdom, Denmark, Norway, Brazil, Singapore, Cyprus, Japan, Belgium, and the Netherlands. Certain transactions in these locations are made in the local currency, yet are reported in the U.S. dollar, the functional currency. For foreign currency exposures existing at March 31, 2014, a 10% unfavorable movement in the foreign exchange rates for our subsidiary locations would not expose us to material losses in earnings or cash flows.

From time to time, we have purchased foreign currency forward contracts. These forward contracts are intended to offset the impact of exchange rate fluctuations on cash flows of our foreign subsidiaries. Foreign exchange contracts are accounted for as cash flow hedges and are recorded on the balance sheet at fair value until executed. Changes in the fair value are recognized in earnings. We did not enter into any such contracts during the three months ended March 31, 2014. However, we did inherit cash flow hedges from our acquisition of Headland Media Limited (now known as the KVH Media Group) in May 2013. We do not currently anticipate that we will enter into similar agreements once the existing agreements expire by the end of 2014.

The primary objective of our investment activities is to preserve principal and maintain liquidity, while at the same time maximizing income. We have not entered into any instruments for trading purposes. Some of the securities that we invest in may have market risk. To minimize this risk, we maintain our portfolio of cash equivalents and short-term investments in a variety of securities that can include United States treasuries, certificates of deposit, investment grade asset-backed corporate securities, money market mutual funds, municipal bonds, and government agency and non-government debt securities. As of March 31, 2014, a hypothetical 100 basis-point increase in interest rates would have resulted in an immaterial decrease in the fair value of our investments that had maturities of greater than one year. Due to the conservative nature of our investments and the relatively short duration of their maturities, we believe interest rate risk is substantially mitigated. As of March 31, 2014, 62% of the \$41.4 million classified as available-for-sale marketable securities will mature or reset within one year. Accordingly, long-term interest rate risk is not considered material. We did not invest in any financial instruments denominated in foreign currencies as of March 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, which are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this interim report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2014.

Changes in Internal Controls Over Financial Reporting

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management has evaluated our internal control over financial reporting during the first quarter of 2014. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer did not identify any change in our internal control over financial reporting during the first quarter of 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are involved in litigation incidental to the conduct of our business. In the ordinary course of business, we are a party to inquiries, legal proceedings and claims including, from time to time, disagreements with vendors and customers. We are not a party to any lawsuit or proceeding that, in our opinion, is likely to materially harm our business, results of operations, financial condition or cash flows.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On November 26, 2008, our Board of Directors authorized a program to repurchase up to one million shares of our common stock. The repurchase program is funded using our existing cash, cash equivalents, marketable securities, and future cash flows. Under the repurchase program, at management's discretion, we may repurchase shares on the open market from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases depends on availability of shares, price, market conditions, alternative uses of capital, and applicable regulatory requirements. The program may be modified, suspended or terminated at any time without prior notice. The repurchase program has no expiration date. There were no other repurchase programs outstanding during the three months ended March 31, 2014, and no repurchase programs expired during the period.

We did not repurchase any shares of our common stock in the three months ended March 31, 2014.
