eMAGIN CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1: Summary of Significant Accounting Policies

The Business

eMagin Corporation (the “Company”) designs, develops, manufactures, and markets OLED (organic light emitting diode) on silicon microdisplays and virtual imaging products which utilize OLED microdisplays. The Company’s products are sold mainly in North America, Asia, and Europe.

Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements of eMagin Corporation and its subsidiary reflect all adjustments, including normal recurring accruals, necessary for a fair presentation. All significant intercompany balances and transactions have been eliminated in consolidation. Certain information and footnote disclosure normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the Securities and Exchange Commission. The Company believes that the disclosures provided herein are adequate to make the information presented not misleading when these unaudited condensed consolidated financial statements are read in conjunction with the audited consolidated financial statements contained in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014. The results of operations for the period ended March 31, 2015 are not necessarily indicative of the results to be expected for the full year. The consolidated condensed financial statements of December 31, 2014 are derived from audited financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014.

In accordance with accounting principles generally accepted in the United States of America, management utilizes certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments related to, among others, allowance for doubtful accounts, warranty reserves, inventory reserves, stock-based compensation expense, deferred tax asset valuation allowances,

litigation and other loss contingencies. Management bases its estimates and judgments on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Revenue and Cost Recognition

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, such as when a purchase order or contract is received from the customer, the price is fixed, title and risk of loss to the goods has changed and there is a reasonable assurance of collection of the sales proceeds. We obtain written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment.

Revenues from research and development activities relating to firm fixed-price contracts and cost-type contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Progress is generally based on a cost-to-cost approach however an alternative method may be used such as physical progress, labor hours or others depending on the type of contract. Physical progress is determined as a combination of input and output measures as deemed appropriate by the circumstances. Contract costs include all direct material, labor and subcontractor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

New Accounting Pronouncement

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”), which amends the existing accounting standards for revenue recognition. ASU 2014-09 is based on principles that govern the recognition of revenue at an amount an entity expects to be entitled when products are transferred to customers. ASU 2014-09 will be effective for the Company beginning January 1, 2017. Early adoption is not permitted. The new revenue standard may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of adoption. The Company is currently evaluating the impact of adopting the new revenue standard on its consolidated financial statements.

Investments

Investments consist of FDIC-insured certificates of deposit (“CDs”) which are classified as held-to-maturity since the Company has the positive intent and ability to hold them until maturity. The CDs are carried at cost which approximates fair value. As of March 31, 2015, the investments mature within three months.

Intangible Assets – Patents

Acquired patents are recorded at purchase price as of the date acquired and amortized over the expected useful life which is generally the remaining life of the patent. In 2014, the Company purchased several patents for \$290 thousand which are being amortized over their remaining useful lives. As of March 31, 2015 and December 31, 2014, intangible assets were \$355 thousand less accumulated amortization of \$68 thousand and \$54 thousand, respectively. As of March 31, 2015, the weighted average remaining useful life of these patents was approximately 6.2 years.

The total intangible amortization expense was approximately \$14 thousand and \$1 thousand for the three months ended March 31, 2015 and 2014, respectively. Estimated future amortization expense as of March 31, 2015 is as follows (in thousands):

Fiscal Years ending December 31,	Total Amortization
2015 (nine months remaining)	\$ 44
2016	54
2017	54
2018	54
2019	32
Later years	49
	\$ 287

Product warranty

The Company offers a one-year product replacement warranty. In general, the standard policy is to repair or replace the defective products. The Company accrues for estimated returns of defective products at the time revenue is recognized based on historical activity as well as for specific known product issues. The determination of these

accruals requires the Company to make estimates of the frequency and extent of warranty activity and estimate future costs to replace the products under warranty. If the actual warranty activity and/or repair and replacement costs differ significantly from these estimates, adjustments to cost of revenue may be required in future periods.

The following table provides a summary of the activity related to the Company's warranty liability included in other current liabilities, (in thousands):

	Three Months Ended March 31, (unaudited)	
	2015	2014
Beginning balance	\$663	\$394
Warranty accruals	13	80
Warranty usage	(273)	(94)
Ending balance	\$403	\$380

Net Income (Loss) per Common Share

Basic income (loss) per share is computed using the weighted average number of common shares outstanding during the period, and excludes any dilutive effects of common stock equivalent shares, such as stock options, warrants, and convertible preferred stock. Diluted income (loss) per share is computed using the weighted average number of common shares outstanding and potentially dilutive common stock equivalent shares outstanding during the period. Common stock equivalent shares are excluded from the computation if their effect is anti-dilutive.

The Company's Series B Convertible Preferred stock ("Preferred Stock – Series B") is considered a participating security as the preferred stock participates in dividends with the common stock, which requires the use of the two-class method when computing basic and diluted earnings per share. The Preferred Stock – Series B is not required to absorb any net loss. Though the Company paid a one-time special dividend in 2012, the Company does not expect to continue to pay dividends on its common or preferred stock in the near future.

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share and per share data) for the three months ended March 31, 2015:

	Three Months Ended March 31, 2015 (unaudited)		
	Income	Shares	Per Share Amount
Basic EPS			
Net Income	\$320		
Income allocated to participating securities	74		
Income allocated to common shares	\$246	25,041,380	\$ 0.01
Diluted EPS			
Dilutive effect of outstanding common stock options		706,251	
Income allocated to common shares	\$246	25,747,631	\$ 0.01

For the three months ended March 31, 2014, the Company reported a net loss and as a result, basic and diluted net loss per common share are the same. Therefore, in calculating net loss per share amounts, shares underlying the potentially dilutive common stock equivalents were excluded from the calculation of diluted net income per common share because their effect was anti-dilutive.

The following is a table of the potentially dilutive common stock equivalents for the three month periods ended March 31, 2015 and 2014 that were not included in diluted EPS as their effect would be anti-dilutive:

	Three Months Ended	
	March 31,	
	2015	2014
Options	3,192,629	4,672,198
Warrants	—	1,000,000
Convertible preferred stock	—	7,545,333
Total potentially dilutive common stock equivalents not included in weighted average share calculation due to anti-dilutive effect	3,192,629	13,217,531

Note 2: Accounts Receivable, net

The majority of the Company's commercial accounts receivable are due from Original Equipment Manufacturers ("OEM's"). Credit is extended based on an evaluation of a customer's financial condition and, generally, collateral is not required.

Accounts receivable consisted of the following (in thousands):

	March 31, 2015 (unaudited)	December 31, 2014
Accounts receivable	\$ 4,250	\$ 4,717
Less allowance for doubtful accounts	(296)	(673)
Accounts receivable, net	\$ 3,954	\$ 4,044

Note 3: Inventories, net

The components of inventories are as follows (in thousands):

	March 31, 2015 (unaudited)	December 31, 2014
Raw materials	\$ 2,290	\$ 2,506
Work in process	1,365	1,086
Finished goods	1,431	1,291
Total inventories	5,086	4,883
Less inventory reserve	(291)	(297)
Total inventories, net	\$ 4,795	\$ 4,586

Note 4: Line of Credit

At March 31, 2015, the Company had a credit facility with Access Business Finance, LLC (“Access”) under which the Company may borrow up to a maximum of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The terms are: interest rate is Prime plus 4% but not less than 7.25%, the minimum monthly interest payment is \$1,000 and the early termination fee is \$6,000. The renewal date of the line of credit is September 1, 2015. The Company’s obligations under the credit facility are secured by its assets. For the three months ended March 31, 2015 and 2014, the Company had not borrowed on its line of credit.

Note 5: Stock-based Compensation

The Company uses the fair value method of accounting for share-based compensation arrangements. The fair value of stock options is estimated at the date of grant using the Black-Scholes option valuation model. Stock-based compensation expense is reduced for estimated forfeitures and is amortized over the vesting period using the straight-line method.

The following table summarizes the allocation of non-cash stock-based compensation to our expense categories for the three month periods ended March 31, 2015 and 2014 (in thousands):

	For the Three Months Ended March 31, 2015 2014 (unaudited)	
Cost of revenue	\$23	\$70
Research and development	36	143
Selling, general and administrative	158	277
Total stock compensation expense	\$217	\$490

At March 31, 2015, total unrecognized compensation costs related to stock options was approximately \$0.4 million, net of estimated forfeitures. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures and is expected to be recognized over a weighted average period of approximately 1.6 years.

The following key assumptions were used in the Black-Scholes option pricing model to determine the fair value of stock options granted:

	For the Three Months			
	Ended			
	March 31,			
	2015		2014	
Dividend yield	0	%	0	%
Risk free interest rates	0.84 – 1.56	%	0.78 – 1.61	%
Expected volatility	57.8 to 63.9	%	62.9 to 67.8	%
Expected term (in years)	3.5 to 5.0		3.5 to 5.0	

The Company does not expect to pay dividends in the near future. Therefore the Company used an expected dividend yield of 0%. The risk-free interest rate used in the Black-Scholes option pricing model is based on the implied yield at the time of grant available on U.S. Treasury securities with an equivalent term. Expected volatility is based on the weighted average historical volatility of the Company's common stock for the equivalent term. The expected term of options represents the period that the Company's stock-based awards are expected to be outstanding and was determined based on historical experience and vesting schedules of similar awards.

A summary of the Company's stock option activity for the three months ended March 31, 2015 is presented in the following table (unaudited):

	Number of	Weighted	Weighted	Aggregate
	Shares	Average	Average	Intrinsic
		Exercise	Remaining	Value
		Price	Contractual	
			Life (In	
			Years)	
Outstanding at December 31, 2014	4,510,107	\$ 3.83		
Options granted	147,441	2.92		
Options exercised	(21,700)	0.98		
Options forfeited	(49,715)	2.84		
Options cancelled or expired	(84,192)	7.16		
Outstanding at March 31, 2015	4,501,941	\$ 3.76	3.84	\$1,422,793
Vested or expected to vest at March 31, 2015 (1)	4,490,224	\$ 3.76	3.84	\$1,422,716
Exercisable at March 31, 2015	4,209,073	\$ 3.77	3.78	\$1,420,865

(1) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumptions to total unvested options.

The aggregate intrinsic value in the table above represents the difference between the exercise price of the underlying options and the quoted price of the Company's common stock. For the three months ended March 31, 2015, the aggregate intrinsic value of options exercised was approximately \$44 thousand. The Company issues new shares of common stock upon exercise of stock options.

Note 6: Shareholders' Equity

Preferred Stock - Series B Convertible Preferred Stock ("the Preferred Stock – Series B")

As of March 31, 2015 and December 31, 2014, there were 5,659 shares of Preferred Stock – Series B issued and outstanding.

Common Stock

The Company received approximately \$21 thousand for the exercise of 21,700 stock options in the three months ended March 31, 2015 and received approximately \$65 thousand for the exercise of 61,283 stock options in the three months ended March 31, 2014.

Note 7: Income Taxes

The Company's effective tax rate is calculated quarterly based upon current assumptions relating to the full year's estimated operating results and various tax-related items. The Company's effective tax rate for the three month periods ended March 31, 2015 and 2014 was 0%. The difference between the effective tax rate of 0% and the U.S. federal statutory rate of 34% for the three months ended March 31, 2015 was primarily due to recognizing a full valuation allowance on deferred tax assets. The difference between the effective tax rate of 0% and the U.S. federal statutory rate of 34% for the three months ended March 31, 2014 was primarily due to the change in the valuation allowance on deferred tax assets.

At December 31, 2014, the Company determined that based on all available evidence, both positive and negative, and based on the weight of the available evidence, including the Company's 2014 operating loss and projected cumulative loss through 2015, it was more likely than not that none of its deferred tax assets would be realized and therefore, continued to record a full valuation allowance. Though the Company had operating income for the three month period ended March 31, 2015, it is projecting a cumulative loss through 2015 and it is still more likely than not that none of its deferred tax assets would be realized therefore, the Company continued to record a full valuation allowance. The Company's net operating loss carry forward amounts substantially expire by 2028.

Due to the Company's operating loss carryforwards, all tax years remain open to examination by the major taxing jurisdictions to which the Company is subject. In the event that the Company is assessed interest or penalties at some point in the future, it will be classified in the financial statements as tax expense.

Note 8: Commitments and Contingencies

Operating Leases

The Company leases office facilities and office, lab and factory equipment under operating leases. Certain leases provide for payments of monthly operating expenses. The Company currently has lease commitments for space in Hopewell Junction, New York and Santa Clara, California.

The Company's corporate and manufacturing facilities are leased from IBM in Hopewell Junction, New York. The Company leases approximately 37,000 square feet to house its equipment for OLED microdisplay fabrication and for research and development, an assembly area and administrative offices. The lease expires May 31, 2019. The Company leases approximately 1,800 square feet of office space for design and product development in Santa Clara, California with the lease expiring October 31, 2015. The Company leases approximately 1,500 square feet on a month-to-month basis in Bellevue, Washington.

Rent expense was approximately \$233 thousand and \$302 thousand for the three months ended March 31, 2015 and 2014, respectively.

Equipment Purchase Commitments

The Company has committed to equipment purchases of approximately \$0.7 million at March 31, 2015.

Future sales concessions

In the first quarter of 2014, the Company received a notification to stop shipments to three of its customers regarding a possible wire bonding problem in some of the microdisplays shipped to these customers. Shipments to two of the three customers resumed in 2014. As the third customer (“this Customer”) was not interested in continuing to use eMagin’s standard commercial microdisplay which was originally shipped, eMagin has been working, at this Customer’s request, on a more mechanically robust display configuration. This Customer provided a proposal to eMagin which the Company countered with a proposal that provided concessions to this Customer predicated on future business. To date, there is no executed agreement. However, it is more likely than not that ultimately there will be a final proposal with acceptance of some concessions. It is reasonably possible that eMagin will incur a future loss once the terms of the proposal are finalized.

Note 9: Concentrations

The following is a schedule of revenue by geographic location (in thousands):

	Three Months Ended March 31, (unaudited)	
	2015	2014
North and South America	\$3,724	\$3,006
Europe, Middle East, and Africa	2,161	2,395
Asia Pacific	104	877
Total	\$5,989	\$6,278

The following table represents the domestic and international revenues as a percentage of total net revenues:

	Three Months Ended March 31, (unaudited)	
	2015	2014
Domestic	62 %	47 %
International	38 %	53 %

The Company purchases principally all of its silicon wafers from a single supplier located in Taiwan.

For the three months ended March 31, 2015, there was one customer that accounted for 18% of its net revenue and for the three months ended March 31, 2014, there was no customer that accounted for more than 10% of its net revenue. As of March 31, 2015, one customer accounted for 26% of its accounts receivable.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Statement of Forward-Looking Information

In this quarterly report, references to "eMagin Corporation," "eMagin," "Virtual Vision," "the Company," "we," "us," and "our" refer to eMagin Corporation and its wholly owned subsidiary, Virtual Vision, Inc.

Except for the historical information contained herein, some of the statements in this Report contain forward-looking statements that involve risks and uncertainties. These statements are found in the sections entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors." They include statements concerning: our business strategy; expectations of market and customer response; liquidity and capital expenditures; future sources of revenues; expansion of our proposed product line; and trends in industry activity generally. In some cases, you can identify forward-looking statements by words such as "may," "will," "should," "expect," "plan," "could," "anticipate," "intend," "believe," "estimate," "predict," "potential," "goal," or "continue" or similar terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including, but not limited to, the risks outlined under "Risk Factors," that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. For example, assumptions that could cause actual results to vary materially from future results include, but are not limited to: our ability to successfully develop and market our products to customers; our ability to successfully implement resolutions related to customer stop orders; our ability to generate customer demand for our products in our target markets; the development of our target markets and market opportunities; our ability to manufacture suitable products at competitive cost; our ability to successfully launch new equipment on our manufacturing line; market pricing for our products and for competing products; the extent of increasing competition; technological developments in our target markets and the development of alternate, competing technologies in them; and sales of shares by existing shareholders. Although we believe that the expectations reflected in the forward looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Unless we are required to do so under federal securities laws or other applicable laws, we do not intend to update or revise any forward-looking statements.

Overview

In the first quarter, eMagin continued deliveries of our display products to over 65 different customers worldwide and performed R&D contract services for 8 customers. We continued work on several R&D contract awards from the second half of 2014 totaling about \$6.8 million. Investments continued in developing new processes that provide ultra-high brightness displays, an important attribute for applications that are used in direct sunlight or daylight such as wearable personal headsets and avionic head mounted displays ("HMDs"). Our technical team successfully produced

and delivered ultra-high brightness and resolution prototype displays that are now being tested by and demonstrated to additional potential customers. Our team also developed an HMD for virtual reality that we believe provides significant advantages over other HMDs currently on the market or known to us to exist.

As a result of the status of the business, our R&D contract outlook and expected demand for our state-of-the-art microdisplays, we reaffirm our previous guidance that we anticipate 2015 revenues will total between \$26 million and \$29 million.

Financial Results

In the first quarter, revenues totaled \$6.0 million compared to \$6.3 million in first quarter last year. R&D contract revenues rose from approximately \$19,000 to \$885,000 as we continued to make progress on our 2014 R&D contract awards. Product revenues (mostly display sales) decreased to \$5.1 million from a strong \$6.3 million in first quarter last year. Gross margin improved to 39% in first quarter from 31% in first quarter last year and 23% last quarter. The increase in gross margin from first quarter last year was the result of lower manufacturing costs and significantly higher yield. Operating expenses also decreased to \$2.0 million in first quarter from \$3.5 million in first quarter last year. The decrease in operating expenses was due to a cost reduction program implemented in mid-2014, lower costs for non-funded R&D and a decrease in the allowance for doubtful accounts. This resulted in an operating profit of \$329,000 and net income of 1 cent per share in the first quarter, an improvement over an operating loss of \$1.6 million or 7 cents per share in first quarter last year.

New Business

In addition to the major government R&D awards (\$6.8M) announced in Q3 2014, we have delivered or taken orders for prototypes of our new Digital SVGA and SXGA096 displays from major global customers who have selected or are considering these displays for upcoming new products. We have also started to ship VGA displays globally as we have been granted EAR99 classification by the US Department of Commerce for these displays. The VGA display is our lowest price display, and we expect significant global demand now that the display is designated ITAR-free. We have also seen increasing interest in all of our high brightness displays, and have delivered or booked orders for prototype high and ultrahigh brightness color and monochrome (XLS, ULT, and XLT) displays, confirming that these displays offer advantages for applications that use low efficiency optical systems or must provide augmented reality in the daytime such as avionics and commercial data glasses applications.

New Technology Development

During the first quarter significant progress was made towards demonstrating a full color ultra-high brightness OLED microdisplay. An upgrade to the existing direct patterning tool was designed fabricated and installed. The purpose of this upgrade is to improve the yield and performance of the high brightness direct patterned displays. The ramp-up of the upgraded tool is underway and is expected to be completed and operational by the end of Q2. There are four Government funded contracts that are ongoing. These include backplane improvement, Mantech, enhanced ultra-high brightness and reconfigurable displays. All these projects are aimed at not only improving the performance of the displays but also providing new capabilities.

New Product Development

The internal evaluation of our new SXGA096 Color XL display was completed in the first quarter leading to the availability of engineering samples and paving the way for product qualification, which is expected to be complete by the end of the second quarter. A new version of the SXGA120, initially released in 2009, was completed that incorporates features added since to other displays (rolling shutter capability, power supply soft-start, and others) as well as a higher current capability to support very high brightness levels without compromising uniformity. Initial samples have already been received and evaluated by a lead customer who expressed satisfaction with the performance. Product qualification is scheduled for the end of the second quarter.

In first quarter our new HMD “head-mounted display” prototype development encountered a delay but is now completed. The headset features 2,000 by 2,000 pixel resolution, a superior form factor, a wide 100+degree field of view, and has all the outstanding advantages of eMagin’s OLED microdisplays. The prototype is now being demonstrated to interested parties.

At April 30, 2015, we had a total of 85 employees, of which 80 were full-time employees as compared to a total of 84 employees, of which 76 were full-time employees at December 31, 2014.

A detailed discussion of our business may be found in Part I, “Business,” of our 2014 Annual Report on Form 10-K for the year ended December 31, 2014 as filed with the Securities and Exchange Commission on March 13, 2015.

CRITICAL ACCOUNTING POLICIES

Revenue and Cost Recognition

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, such as when a purchase order or contract is received from the customer, the price is fixed, title and risk of loss to the goods has changed and there is a reasonable assurance of collection of the sales proceeds. We obtain written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment.

Revenues from research and development activities relating to firm fixed-price contracts and cost-type contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Progress is generally based on a cost-to-cost approach however an alternative method may be used such as physical progress, labor hours or others depending on the type of contract. Physical progress is determined as a combination of input and output measures as deemed appropriate by the circumstances. Contract costs include all direct material, labor and subcontractor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

Intangible Assets – Patents

Intangible assets are comprised of patents, net of amortization. Acquired patents are recorded at purchase price as of the date acquired and amortized over the expected useful life which is generally the remaining life of the patent.

Income Taxes

Our deferred tax assets and their potential realizability are evaluated each quarter to determine if any changes should be made to the valuation allowance. At December 31, 2014, we had determined that based on all available evidence, both positive and negative, and based on the weight of the available evidence, including our 2014 operating loss and projected cumulative loss through 2015, it was more likely than not that none of our deferred tax assets would be realized and therefore, recorded a full valuation allowance. Though we had operating income for the three month period ended March 31, 2015, we are still projecting a cumulative loss through 2015, and it is still more likely than not that none of our deferred tax assets would be realized therefore, we continued to record a full valuation allowance.

Other critical accounting policies, as described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, relate to product warranty, use of estimates, fair value of financial instruments and stock-based compensation, and additional information on accounting for income taxes.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2015 COMPARED TO THREE MONTHS ENDED MARCH 31, 2014

Revenues

	Three Months Ended March 31,		
	2015	2014	Change
	(in thousands)		
Product	\$5,104	\$6,259	\$(1,155)
Contract	\$885	\$19	\$866
Total revenue, net	\$5,989	\$6,278	\$(289)

Revenues for the three months ended March 31, 2015 were approximately \$6.0 million as compared to approximately \$6.3 million for the three months ended March 31, 2014, a decrease of \$0.3 million.

Product revenue is comprised primarily of sales of displays, as well as sales of other hardware. For the three months ended March 31, 2015, product revenue decreased approximately \$1.2 million, or 18%, as compared to the three months ended March 31, 2014. The revenue decrease was primarily due to fewer units shipped, partially offset by an increase in the average selling price per unit.

Contract revenue is comprised of revenue from research and development (“R&D”) or non-recurring engineering (“NRE”) contracts. For the three months ended March 31, 2015, contract revenue increased approximately \$0.9 million as compared to the three months ended March 31, 2014. The increase in the R&D contract revenue for the three months

was primarily due to more active R&D contracts and more contract work completed.

Cost of Goods Sold

	Three Months Ended		
	March 31,		
	2015	2014	Change
	(in thousands)		
Product	\$3,052	\$4,332	\$(1,280)
Contract	\$577	\$15	\$562
Total cost of goods sold	\$3,629	\$4,347	\$(718)

Cost of goods sold is comprised of costs of product and contract revenues. Cost of product revenue includes materials, labor and manufacturing overhead, warranty costs and depreciation related to our products. Cost of contract revenue includes direct and allocated indirect costs associated with performance of contracts. Cost of goods sold for the three month period ended March 31, 2015 as compared to the three month period ended March 31, 2014 decreased \$0.7 million. Cost of goods sold as a percentage of revenues was 61% for the three month period ended March 31, 2015 as compared to 69% for the three month period ended March 31, 2014. The decrease in cost of goods sold was due to lower manufacturing costs and higher yield.

The following table outlines product, contract and total gross profit and related gross margins for the three months ended March 31, 2015 and 2014 (dollars in thousands):

	Three Months Ended March 31,			
	2015		2014	
Product revenue gross profit	\$2,052		\$1,927	
Product revenue gross margin	40	%	31	%
Contract revenue gross profit	\$308		\$4	
Contract revenue gross margin	35	%	21	%
Total gross profit	\$2,360		\$1,931	
Total gross margin	39	%	31	%

The gross profit for the three months ended March 31, 2015 as compared to the three months ended March 31, 2014 increased approximately \$0.4 million. Gross profit is a function of revenues less cost of goods sold. For the three months ended March 31, 2015, the gross margin was 39% as compared to 31% for the three months ended March 31, 2014. The increase in gross profit in the first quarter was due primarily to lower manufacturing costs and higher yields.

The product gross profit for the three months ended March 31, 2015 as compared to the three months ended March 31, 2014 increased approximately \$0.1 million. Product gross margin was 40% for the three months ended March 31, 2015 up from 31% for the three month periods ended March 31, 2014. The increase in gross margin was due to lower manufacturing costs, higher yields and higher average selling price.

The contract gross profit for the three months ended March 31, 2015 as compared to the three months ended March 31, 2014 increased approximately \$0.3 million. Contract gross margin for the three months ended March 31, 2015 increased to 35% from 21% for the same three month period in 2014. The increase in gross margin was due to the nature and the requirements of the respective active R&D contracts.

Operating Expenses

Three Months Ended March
31,

Edgar Filing: EMAGIN CORP - Form 10-Q

	2015	2014	Change
	(\$ in thousands)		
Research and development expense	\$903	\$1,426	\$(523)
Percentage of net revenue	15 %	23 %	
Selling, general and administrative expense	\$1,128	\$2,119	\$(991)
Percentage of net revenue	19 %	34 %	
Total operating expenses	\$2,031	\$3,545	\$(1,514)
Percentage of net revenue	34 %	56 %	

Research and Development. Research and development expenses are company-funded and include salaries and related benefits, development materials and other costs specifically allocated to the development of new technologies and microdisplay products, OLED materials and subsystems. R&D related costs associated with fulfilling contracts are categorized as contract cost of goods sold. R&D expenses for the three months ended March 31, 2015 decreased approximately \$0.5 million, or 37%, as compared to the three months ended March 31, 2014. As a percentage of revenue, Q1 2015 decreased to 15% of revenue as compared to 23% for Q1 2014. The decrease in company-funded R&D expenses was primarily due to expense being allocated to outside funded contracts.

Selling, General and Administrative. Selling, general and administrative (“SG&A”) expenses consist principally of salaries and related benefits, professional services fees and marketing, general corporate, and administrative expenses. Selling, general and administrative expenses for the three months ended March 31, 2015 decreased approximately \$1.0 million, or 47%, as compared to the three months ended March 31, 2014. As a percentage of revenue, Q1 2015 decreased to 19% of revenue as compared to 34% for Q1 2014. The decrease in SG&A was due primarily to lower personnel and stock-based compensation expenses, cost efficiencies implemented during 2014 and a reduction in the allowance for doubtful accounts.

Other Income (Expense), net. Other income (expense), net consists primarily of interest income earned on investments, interest expense and gain/loss on sale of assets. For the three month periods ended March 31, 2015 and 2014, interest expense was approximately \$10 thousand and \$11 thousand, respectively. We have no debt upon which we are incurring interest expense however we pay fees to keep our line of credit available. Other income for the three months ended March 31, 2015 was approximately \$1 thousand of interest income as compared to the three months ended March 31, 2014 where other income was approximately \$6 thousand of interest income and \$8 thousand from other income offset by a loss on sale of assets of \$7 thousand.

Liquidity and Capital Resources

We had approximately \$6.7 million of cash, cash equivalents, and investments at March 31, 2015 as compared to approximately \$6.0 million at December 31, 2014. Of the \$6.7 million in cash, approximately \$0.5 million was invested in certificates of deposit (“CDs”).

Cash flow provided by operating activities during the three months ended March 31, 2015 was approximately \$1.0 million, attributable to our net income of approximately \$0.3 million, net non-cash expenses of \$0.2 million and change in operating assets and liabilities of \$0.5 million. Cash flow used by operating activities during the three months ended March 31, 2014 was approximately \$2.4 million, attributable to our net loss of approximately \$1.6 million and change in operating assets and liabilities of \$1.8 million offset by our net non-cash expenses of \$1.0 million.

Cash used in investing activities during the three months ended March 31, 2015 was approximately \$70 thousand of which net short-term investments proceeds were approximately \$250 thousand offset primarily by equipment purchases of approximately \$320 thousand. Presently, we have committed approximately \$0.7 million for capital expenditures for the balance of 2015. Cash provided by investing activities during the three months ended March 31, 2014 was approximately \$0.4 million of which net short-term investments proceeds were approximately \$0.8 million offset by primarily equipment purchases of approximately \$0.3 million.

Cash provided by financing activities during the three months ended March 31, 2015 and 2014 was approximately \$21 thousand and \$65 thousand, respectively, representing proceeds from the exercise of stock options.

Credit Facility

At March 31, 2015, we had a credit facility with Access Business Finance, LLC (“Access”) that provides for up to a maximum amount of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The interest on the credit facility is equal to the Prime Rate plus 4% but may not be less than 7.25% with a minimum monthly interest payment of \$1 thousand. The credit facility will automatically renew on September 1, 2015 for a one year term unless written notice is provided. We did not draw on our credit facility during the three months ended March 31, 2015 or at any time since its inception in September 2010 and there is no outstanding balance.

The credit facility contains the customary representations and warranties as well as affirmative and negative covenants. We were in compliance with all debt covenants as of March 31, 2015.

Our cash needs to fund our operations and investment requirements over the next twelve months may be more than our current cash on hand, investments and the cash we anticipate generating from operations. We may not require additional funds over the next twelve months. If we do require additional funds, we believe we can raise sufficient funds. However, if we are unable to obtain sufficient funds, we may have to reduce the size of our organization and/or be forced to reduce and/or curtail our production and operations, all of which could have a material adverse impact on our business prospects.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Market rate risk

We are exposed to market risk related to changes in interest rates.

Interest rate risk

We hold our cash in cash and cash equivalents and certificates of deposits. We do not hold derivative financial instruments or equity securities. At March 31, 2015, we have not drawn on our revolving line of credit and therefore do not have any related interest rate risk. A change in interest rates would not have had a material effect on our consolidated financial position, results of operations, or cash flows in the three months ended March 31, 2015.

Foreign currency exchange rate risk

We do not have any material foreign currency exchange rate risk.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report on Form 10-Q.

Our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the objectives of our disclosure control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Based on our evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

There were no changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. Legal Proceedings

None.

ITEM 1A. Risk Factors

In addition to other information set forth in this Report, you should carefully consider the risk factors previously disclosed in “Item 1A to Part 1” of our Annual Report on Form 10-K for the year ended December 31, 2014. There were no material changes from the risk factors during the three months ended March 31, 2015.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

None.

Issuer Repurchases of Equity Securities
