## Notes to Consolidated Financial Statements

### 1. Accounting Policies

The accompanying unaudited consolidated financial statements should be read in conjunction with the financial statement disclosures contained in the 2010 Form 10-K for Target Corporation (Target or the Corporation). The same accounting policies are followed in preparing quarterly financial data as are followed in preparing annual data. See the notes in our Form 10-K for the fiscal year ended January 29, 2011, for those policies. In the opinion of management, all adjustments necessary for a fair presentation of quarterly operating results are reflected herein and are of a normal, recurring nature.

Assets and liabilities of operations with functional currencies other than the U.S. dollar are translated at period-end exchange rates. Income statement accounts are translated using exchange rates prevailing during the period. Translation adjustments are reflected within accumulated other comprehensive income in shareholders' equity. Gains and losses from foreign currency transactions are included in net earnings. During the nine months ended October 29, 2011 the value of \$1.00 ranged from C\$0.94 (Canadian dollars) to C\$1.05 and averaged C\$0.98. On October 29, 2011, \$1.00 was equivalent to C\$0.99.

Due to the seasonal nature of our business, quarterly revenues, expenses, earnings and cash flows are not necessarily indicative of the results that may be expected for the full year. All amounts are in U.S. dollars unless otherwise stated.

### 2. Earnings Per Share

Basic earnings per share (EPS) is calculated as net earnings divided by the weighted average number of common shares outstanding during the period. Diluted EPS includes the potentially dilutive impact of share-based awards outstanding at period end, consisting of the incremental shares assumed to be issued upon the exercise of stock options and the incremental shares assumed to be issued under performance share and restricted stock unit arrangements.

Diluted earnings per share	\$ 0.82	\$ 0.74	\$ 2.84	\$ 2.57

*(a) Excludes 13.9 million and 15.6 million share-based awards for the three and nine months ended October 29, 2011, respectively, and 10.7 million and 11.3 million share-based awards for the three and nine months ended October 30, 2010 because their effects were antidilutive.*

### 3. Canadian Leasehold Acquisition

## Edgar Filing: TARGET CORP - Form 10-Q

In January 2011, we entered into an agreement to purchase the leasehold interests in up to 220 sites in Canada currently operated by Zellers Inc. (Zellers), in exchange for C\$1,825 million. We have completed this real estate acquisition with the selection of 84 additional Zellers sites, bringing the total number of sites selected to 189, which includes the initial group of 105 sites selected in the second quarter of 2011. We believe this transaction will allow us to open 125 to 135 Target stores in Canada, primarily during 2013. We sold our right to acquire the leasehold interests in 54 sites to third party retailers and landlords, for a total of \$225 million. These transactions resulted in a final net purchase price of \$1,636 million, which is included in expenditures for property and equipment in the Consolidated Statement of Cash Flows.

We recorded the acquired assets in our Canadian Segment at their estimated fair values.

Edgar Filing: TARGET CORP - Form 10-Q

<b>Leasehold Acquisition Summary</b>		Third Quarter	Total

<b>Liabilities</b>			
Capital lease obligations	Unsecured debt and other borrowings	\$ 255	\$ 1,274

*(a) Amortization period of acquired intangible assets range from 3 to 13 years.*

The acquired sites are being subleased back to Zellers for terms through March 2013, or earlier, at our option.

#### 4. Fair Value Measurements

Fair value is the price at which an asset could be exchanged in a current transaction between knowledgeable, willing parties. A liability's fair value is defined as the amount that would be paid to transfer the liability to a new obligor, not the amount that would be paid to settle the liability with the creditor. Fair value measurements are categorized into one of three levels based on the lowest level of significant input used: Level 1 (unadjusted quoted prices in active markets); Level 2 (observable market inputs available at the measurement date, other than quoted prices included in Level 1); and Level 3 (unobservable inputs that cannot be corroborated by observable market data).

The following table presents financial assets and liabilities measured at fair value on a recurring basis:

<b>Fair Value Measurements - Recurring Basis</b>	<b>Fair Value at October 29, 2011</b>			<b>Fair Value at January 29, 2011</b>			<b>Fair Value at October 30, 2010</b>

*(b)*

Edgar Filing: TARGET CORP - Form 10-Q

*Company-owned life insurance investments consist of equity index funds and fixed income assets. Amounts are presented net of loans that are secured by some of these policies of \$665 million at October 29, 2011, \$645 million at January 29, 2011 and \$636 million at October 30, 2010.*

Edgar Filing: TARGET CORP - Form 10-Q

<i>Position</i>	<i>Valuation Technique</i>
Marketable securities	Initially valued at transaction price. Subsequently valued at carrying value, as cash equivalents (including money market funds) approximate fair value because maturities are less than three months.
Prepaid forward contracts	Initially valued at transaction price. Subsequently valued by reference to the market price of Target common stock.
Interest rate swaps	Valuation models are calibrated to initial trade price. Subsequent valuations are based on observable inputs to the valuation model ( <i>e.g.</i> , interest rates and credit spreads). Model inputs are changed only when corroborated by market data. A credit risk adjustment is made on each swap using observable market credit spreads.
Company-owned life insurance investments	Includes investments in separate accounts that are valued based on market rates credited by the insurer.

Certain assets are measured at fair value on a nonrecurring basis; that is, the assets are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment). The fair value measurements related to long-lived assets in the following table were determined using available market prices at the measurement date based on recent investments or pending transactions of similar assets, third-party independent appraisals, valuation multiples or public comparables, less cost to sell where appropriate. We classify these measurements as Level 2.

The following table presents the carrying amounts and estimated fair values of financial instruments not measured at fair value in the Consolidated Statements of Financial Position. The fair value of marketable securities is determined using available market prices at the reporting date. The fair value of debt is generally measured using a discounted cash flow analysis based on our current market interest rates for similar types of financial instruments.

(b) Represents the sum of nonrecourse debt collateralized by credit card receivables and unsecured debt and other borrowings excluding unamortized swap valuation adjustments and capital lease obligations.

Based on various inputs and assumptions, including discussions with third parties, we believe the gross balance of our credit card receivables approximates fair value at October 29, 2011. The carrying amounts of accounts payable and certain accrued and other current liabilities also approximate fair value at October 29, 2011.

## 5. Credit Card Receivables

Credit card receivables are recorded net of an allowance for doubtful accounts and are our only significant class of receivables. Substantially all accounts continue to accrue finance charges until they are written off. All past due accounts were incurring finance charges at October 29, 2011, January 29, 2011, and October 30, 2010. Accounts are written off when they become 180 days past due.

Age of Credit Card Receivables (dollars in millions)	October 29, 2011		January 29, 2011		October 30, 2010	
	Amount	Percent of Receivables	Amount	Percent of Receivables	Amount	Percent of Receivables

Period-end gross credit card receivables	\$ 6,144	100 %	\$ 6,843	100 %	\$ 6,730	100 %

## Allowance for Doubtful Accounts

The allowance for doubtful accounts is recognized in an amount equal to the anticipated future write-offs of existing receivables and includes provisions for uncollectible finance charges and other credit-related fees. We estimate future write-offs on the entire credit card portfolio collectively based on historical experience of delinquencies, risk scores, aging trends and industry risk trends.

Edgar Filing: TARGET CORP - Form 10-Q

Deterioration of the macroeconomic conditions in the United States would adversely affect the risk profile of our credit

Edgar Filing: TARGET CORP - Form 10-Q

card receivables portfolio based on credit card holders' ability to pay their balances. If such deterioration were to occur, it would lead to an increase in bad debt expense. The Corporation monitors both the credit quality and the delinquency status of the credit card receivables portfolio. We consider accounts 30 or more days past due as delinquent, and we update delinquency status daily. We also monitor risk in the portfolio by assigning internally-generated scores to each account and by periodically obtaining a statistically representative sample of current FICO scores, a nationally recognized credit scoring model. We update these FICO scores monthly. The credit-quality segmentation presented below is consistent with the approach used in determining our allowance for doubtful accounts.

Under certain circumstances, we offer cardholder payment plans that meet the accounting definition of a troubled debt restructuring (TDR). These plans modify finance charges, minimum payments and/or extend payment terms. Modified terms do not change the balance of the loan. These concessions are made on an individual cardholder basis for economic or legal reasons specific to each individual cardholder's circumstances. Cardholders are not allowed additional charges while participating in a payment plan. As of October 29, 2011 and October 30, 2010 there were 125,875 and 155,836 modified contracts with outstanding receivables of \$304 million and \$421 million, respectively.

<sup>(a)</sup> Includes loans modified within the twelve months prior to each respective period end.

<sup>(b)</sup> Represents account balance at the time of default. We define default as not paying the full fixed payment amount for two consecutive billing cycles.

Receivables in cardholder payment plans that meet the definition of a TDR are treated consistently with other receivables in determining our allowance for doubtful accounts. Accounts that complete their assigned payment plan are removed from the TDR population. Payments received on troubled debt restructurings are first applied to finance charges and fees, then to the unpaid principal balance.

#### Funding for Credit Card Receivables

## Edgar Filing: TARGET CORP - Form 10-Q

As a method of providing funding for our credit card receivables, we sell, on an ongoing basis, all of our consumer credit card receivables to Target Receivables LLC (TR LLC), formerly known as Target Receivables Corporation (TRC), a wholly owned, bankruptcy remote subsidiary. TR LLC then transfers the receivables to the Target Credit Card Master Trust (the Trust), which from time to time will sell debt securities to third parties, either directly or through a related trust. These debt securities represent undivided interests in the Trust assets. TR LLC uses the proceeds from the sale of debt securities and its share of collections on the receivables to pay the purchase price of the receivables to the Corporation.

## Edgar Filing: TARGET CORP - Form 10-Q

We consolidate the receivables within the Trust and any debt securities issued by the Trust, or a related trust, in our Consolidated Statements of Financial Position based upon the applicable accounting guidance. The receivables transferred to the Trust are not available to general creditors of the Corporation.

During 2006 and 2007, we sold an interest in our credit card receivables by issuing a Variable Funding Certificate. Parties who hold the Variable Funding Certificate receive interest at a variable short-term market rate. The Variable Funding Certificate matures in 2012 and 2013.

In the second quarter of 2008, we sold an interest in our credit card receivables to JPMorgan Chase (JPMC). The interest sold represented 47 percent of the receivables portfolio at the time of the transaction. In the event of a decrease in the receivables principal amount such that JPMC's interest in the entire portfolio would exceed 47 percent for three consecutive months, TR LLC (using the cash flows from the assets in the Trust) would be required to pay JPMC a pro rata amount of principal collections such that the portion owned by JPMC would not exceed 47 percent, unless JPMC provides a waiver. Conversely, at the option of the Corporation, JPMC may be required to fund an increase in the portfolio to maintain their 47 percent interest up to a maximum principal balance of \$4.2 billion. Due to declines in gross credit card receivables, TR LLC repaid JPMC \$226 million and \$530 million during the first nine months of 2011 and 2010, respectively.

If a three-month average of monthly finance charge excess (JPMC's pro rata share of finance charge collections less write-offs and specified expenses) is less than 2 percent of the outstanding principal balance of JPMC's interest, the Corporation must implement mutually agreed-upon underwriting strategies. If the three-month average finance charge excess falls below 1 percent of the outstanding principal balance of JPMC's interest, JPMC may compel the Corporation to implement underwriting and collections activities, provided those activities are compatible with the Corporation's systems, as well as consistent with similar credit card receivable portfolios managed by JPMC. If the Corporation fails to implement the activities, JPMC has the right to cause the accelerated repayment of the note payable issued in the transaction. As noted in the preceding paragraph, payments would be made solely from the Trust assets. We have the right to prepay the principal balance on the note payable to JPMC through January 31, 2012. If we elect to prepay the outstanding balance, we will be required to pay a make-whole premium ranging from \$85 million to \$95 million, dependent upon the prepayment date.

All interests in our Credit Card Receivables issued by the Trust are accounted for as secured borrowings. Interest and principal payments are satisfied provided the cash flows from the Trust assets are sufficient and are nonrecourse to the general assets of the Corporation. If the cash flows are less than the periodic interest, the available amount, if any, is paid with respect to interest. Interest shortfalls will be paid to the extent subsequent cash flows from the assets in the Trust are sufficient. Future principal payments will be made from the third party's pro rata share of cash flows from the Trust assets.

(a) The debt balance for the 2008 Series is net of a 7% discount from JPMC. The unamortized portion of this discount was \$69 million, \$107 million and \$119 million as of October 29, 2011, January 29, 2011, and October 30, 2010, respectively.

### 6. Commitments and Contingencies

## Edgar Filing: TARGET CORP - Form 10-Q

As a result of our second and third quarter 2011 acquisition of leases from Zellers, we have assumed additional future minimum lease payments of \$3.5 billion, with a net present value of \$1.3 billion, at October 29, 2011.

We are exposed to claims and litigation arising in the ordinary course of business and use various methods to resolve these matters in a manner that we believe serves the best interest of our shareholders and other constituents. We believe the recorded reserves in our consolidated financial statements are adequate in light of the probable and estimable liabilities. We do not believe that any of the currently identified claims or litigation will be material to our results of operations, cash flows or financial condition.

### **7. Notes Payable and Long-Term Debt**

We obtain short-term financing from time to time under our commercial paper program, a form of notes payable. As of October 29, 2011, \$1,211 million was outstanding under this program. There were no amounts outstanding under our

## Edgar Filing: TARGET CORP - Form 10-Q

commercial paper program at January 29, 2011 or October 30, 2010. During the three and nine months ended October 29, 2011 the maximum amount outstanding was \$1,211 million and the average amount outstanding was \$351 million and \$227 million, respectively. There were no amounts outstanding under our commercial paper program at any time during the three or nine months ended October 30, 2010.

In July 2011, we issued \$350 million of unsecured fixed rate debt at 1.125% and \$650 million of unsecured floating rate debt at three-month LIBOR plus 17 basis points that matures in July 2014. Proceeds from this issuance were used for general corporate purposes.

In October 2011, we entered into a five-year \$2.25 billion unsecured revolving credit facility with a group of banks. The new facility replaced our existing credit agreement and will expire in October 2016. No balances were outstanding at any time during the first three quarters of 2011 or 2010 under this or previously existing revolving credit facilities.

In addition, TR LLC has made payments to JPMC to reduce its interest in our credit card receivables as described in Note 5, Credit Card Receivables.

### 8. Derivative Financial Instruments

Derivative financial instruments are reported at fair value on the Consolidated Statements of Financial Position. Historically our derivative instruments have primarily consisted of interest rate swaps. We use these derivatives to mitigate our interest rate risk. We have counterparty credit risk resulting from our derivative instruments. This risk lies primarily with large global financial institutions. We monitor this concentration of counterparty credit risk on an ongoing basis.

During 2008, we terminated or de-designated certain interest rate swaps that were accounted for as hedges. Total net gains amortized into net interest expense for terminated or de-designated swaps were \$10 million and \$11 million during the three months ended October 29, 2011 and October 30, 2010, respectively. Total net gains amortized into net interest expense for terminated or de-designated swaps were \$31 million and \$34 million during the nine months ended October 29, 2011 and October 30, 2010, respectively. The amount remaining on unamortized hedged debt valuation gains from terminated or de-designated interest rate swaps that will be amortized into earnings over the remaining lives of the underlying debt totaled \$122 million, \$152 million and \$164 million, at October 29, 2011, January 29, 2011 and October 30, 2010, respectively.

Periodic payments, valuation adjustments and amortization of gains or losses from the termination or de-designation of derivative contracts are summarized below:

Derivative Contracts - Effect on Results of Operations (millions)	Classification of Income/(Expenses) Other interest expense	Three Months Ended		Nine Months Ended	
		October 29, 2011	October 30, 2010	October 29, 2011	October 30, 2010

In July 2011, in conjunction with the \$350 million fixed rate debt issuance, we entered into an interest rate swap with a notional amount of \$350 million, under which we pay a variable rate and receive a fixed rate. This swap has been designated as a fair value hedge, and there was no

## Edgar Filing: TARGET CORP - Form 10-Q

ineffectiveness recognized related to this hedge during the three or nine months ended October 29, 2011. There were no derivative instruments designated as hedges as of October 30, 2010. See Note 4, Fair Value Measurements, for a description of the fair value measurement of derivative contracts and their classification on the Consolidated Statements of Financial Position.

### **9. Income Taxes**

We file a U.S. federal income tax return and income tax returns in various states and foreign jurisdictions. We are no longer subject to U.S. federal income tax examinations for years before 2010 and, with few exceptions, are no longer subject to state and local or non-U.S. income tax examinations by tax authorities for years before 2003.

We accrue for the effects of uncertain tax positions and the related potential penalties and interest.

During the third quarter of 2010, we recorded a reduction to income tax expense of \$45 million due to the favorable resolution of various state income tax matters.

Subsequent to the end of the third quarter of 2011, we favorably resolved various state income tax matters, which will be recorded as a reduction to income tax expense of approximately \$50 million in our fourth quarter 2011 Statement of Operations.

## 10. Share Repurchase

We repurchase shares primarily through open market transactions under a \$10 billion share repurchase plan authorized by our Board of Directors in November 2007.

## 11. Pension, Postretirement Health Care and Other Benefits

We have qualified defined benefit pension plans covering team members who meet age and service requirements, including in certain circumstances, date of hire. We also have unfunded, nonqualified pension plans for team members with qualified plan compensation restrictions. Eligibility for, and the level of, these benefits varies depending on team members' date of hire, length of service and/or team member compensation. Upon early retirement and prior to Medicare eligibility, team members also become eligible for certain health care benefits if they meet minimum age and service requirements and agree to contribute a portion of the cost. Effective January 1, 2009, our qualified defined benefit pension plan was closed to new participants, with limited exceptions.

Even though we are not required by law to make any contributions, we may elect to make contributions depending on investment performance and the pension plan funded status in 2011.

Our unfunded, nonqualified deferred compensation plan is offered to approximately 3,500 current and retired team members whose participation in our 401(k) plan is limited by statute or regulation. These team members choose from a

menu of crediting rate alternatives that are the same as the investment choices in our 401(k) plan, including Target common stock. We credit an additional 2 percent per year to the accounts of all active participants, excluding members of our management executive committee, in part to recognize the risks inherent to their participation in a plan of this nature. We also maintain a nonqualified, unfunded deferred compensation plan that was frozen during 1996, covering substantially fewer than 100 participants, most of whom are retired. In this plan, deferred compensation earns returns tied to market levels of interest rates plus an additional 6 percent return, with a minimum of 12 percent and a maximum of 20 percent, as determined by the plan's terms.

We mitigate some of our risk of offering the nonqualified plans through investing in vehicles, including company-owned life insurance and prepaid forward contracts in our own common stock, that offset a substantial portion of our economic exposure to the returns of these plans. These investment vehicles are general corporate assets and are marked to market with the related gains and losses recognized in the Consolidated Statements of Operations in the period they occur.

The total change in fair value for contracts indexed to our own common stock recognized in earnings was a pretax gain of \$6 million and \$1 million during the three months ended October 29, 2011 and October 30, 2010, respectively, and a pretax gain of \$3 million and \$1 million for the nine months ended October 29, 2011 and October 30, 2010, respectively. For the nine months ended October 29, 2011 and October 30, 2010, we invested approximately \$44 million and \$26 million, respectively, in such investment instruments. This activity is included in the Consolidated Statements of Cash Flows within other investing activities. Adjusting our position in these investment vehicles may involve repurchasing shares of Target common stock when settling the forward contracts, as described in Note 10.

At October 29, 2011, January 29, 2011 and October 30, 2010, our outstanding interest in contracts indexed to our common stock was as follows:

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****Executive Summary**

Consolidated revenues were \$16,402 million for the three months ended October 29, 2011, an increase of \$797 million or 5.1 percent from the same period in the prior year. Consolidated earnings before interest expense and income taxes for third quarter 2011 increased by \$90 million or 9.4 percent over third quarter 2010 to \$1,057 million. Cash flow provided by operations was \$2,975 million and \$2,852 million for the nine months ended October 29, 2011 and October 30, 2010, respectively. Diluted earnings per share in the third quarter increased 10.2 percent to \$0.82 from \$0.74 in the same period a year ago. Adjusted earnings per share, which we believe is useful in providing period-to-period comparisons of the results of our U.S. operations, increased 28 percent to \$0.87 in third quarter 2011 from \$0.68 in the same period a year ago.

*Note: A reconciliation of non-GAAP financial measures to GAAP measures is provided on page 23.*

Our financial results for the third quarter of 2011 in our U.S. Retail Segment reflect increased sales of 5.4 percent over the same period last year due to a 4.3 percent comparable-store increase combined with the contribution from new stores. In third quarter 2011 we experienced U.S. Retail Segment EBITDA and EBIT margin rate improvements compared to third quarter 2010, due primarily to a favorable selling, general and administrative (SG&A) expense rate. We opened 6 new stores in the third quarter of 2011 (5 net of one relocation). During the three months ended October 30, 2010, we opened 10 new stores (9 net of one relocation).

In the U.S. Credit Card Segment, we achieved an increase in segment profit primarily due to declining bad debt expense driven by improved trends in key measures of risk in our accounts receivable portfolio.

Our Canadian Segment was initially reported in our first quarter 2011 financial results, as a result of entering into an agreement to purchase the leasehold interests in up to 220 sites in Canada currently operated by Zellers Inc. (Zellers), in exchange for C\$1,825 million (Canadian dollars). We completed this real estate acquisition with the selection of 84 additional Zellers sites, bringing the total number of sites selected to 189, which includes the initial group of 105 sites selected in the second quarter of 2011. We sold our right to acquire the leasehold interests in 54 sites to third party retailers and landlords, for a total of \$225 million. These transactions resulted in a final net purchase price of \$1,636 million. We believe this transaction will allow us to open 125 to 135 Target stores in Canada, primarily during 2013. During the three and nine months ended October 29, 2011, start-up costs totaled \$18 million and \$53 million, respectively, and primarily consisted of compensation, benefits and consulting expenses. These expenses are reported in selling, general, and administrative expense within the consolidated statement of operations.

(a) Loyalty Program discounts are recorded as reductions to sales in our U.S. Retail Segment. Effective with the October 2010 nationwide launch of our new 5% REDcard Rewards loyalty program, we changed the formula under which our U.S. Credit Card Segment reimburses our U.S. Retail Segment to better align with the attributes of the new program. In the three and nine months ended October 29, 2011, these reimbursed amounts were \$74 million and \$189 million compared with \$26 million and \$60 million in the corresponding periods in 2010. In all periods these amounts were recorded as reductions to SG&A expenses within the U.S. Retail Segment and increases to operations and marketing expenses within the U.S. Credit Card Segment.

See Note 12 to our consolidated financial statements for a reconciliation of our segment results to earnings before income taxes.

### Sales

Sales include merchandise sales, net of expected returns, from our stores and our online business, as well as gift card breakage. See Item 1 in our Form 10-K for the fiscal year ended January 29, 2011 for a description of our product categories.

Comparable-store sales is a measure that highlights the performance of our existing stores by measuring the growth in sales for such stores for a period over the comparable, prior-year period of equivalent length. The method of calculating comparable-store sales varies across the retail industry. As a result, our comparable-store sales calculation is not necessarily comparable to similarly titled measures reported by other companies.

## Edgar Filing: TARGET CORP - Form 10-Q

Comparable-store sales are sales from stores open longer than one year and our online business, including:

- sales from stores that have been remodeled or expanded while remaining open (including our current store remodel program), and
- sales from stores that have been relocated to new buildings of the same format within the same trade area, in which the new store opens at about the same time as the old store closes.

Comparable-store sales do not include:

- sales from general merchandise stores that have been converted, or relocated within the same trade area, to a SuperTarget store format, or
- sales from stores that were intentionally closed to be remodeled, expanded or reconstructed.

<i>The comparable-store sales increases or decreases above are calculated by comparing sales in fiscal year periods with comparable prior fiscal year periods of equivalent length.</i>				

The collective interaction of a broad array of macroeconomic, competitive and consumer behavioral factors, as well as sales mix, and transfer of sales to new stores makes further analysis of sales metrics infeasible.

Our U.S. Credit Card Segment offers credit to qualified guests through our branded proprietary credit cards; the Target Visa Credit Card and the Target Credit Card (Target Credit Cards). Additionally, we offer a branded proprietary Target Debit Card. Collectively, we refer to these products as REDcards®. In October 2010, guests began to receive a 5 percent discount on virtually all purchases at checkout, every day, when they use a REDcard at any Target store or on Target.com.

We monitor the percentage of store sales that are paid for using REDcards (REDcard Penetration), because our internal analysis has indicated that a meaningful portion of the incremental purchases on our REDcards are also incremental sales for Target, with the remainder of the incremental purchases on the REDcards representing a shift in tender type.

### Gross Margin Rate

Gross margin rate represents gross margin (sales less cost of sales) as a percentage of sales. See Note 3 in our Form 10-K for the fiscal year ended January 29, 2011 for a description of costs included in cost of sales. Markup is the difference between an item's cost and its retail price (expressed as a percentage of its retail price). Factors that affect markup include vendor offerings and negotiations, vendor income, sourcing strategies, market forces like raw material and freight costs, and competitive influences. Markdowns are the reduction in the original or previous price of retail merchandise. Factors that affect markdowns include inventory management, competitive influences and economic conditions.

For the three months ended October 29, 2011, our gross margin rate was 30.5 percent, decreasing from 30.6 percent in the comparable period last year, reflecting an adverse sales mix impact of 0.3 percentage points, partially offset by rate improvements within merchandise categories. These changes are largely the result of our integrated growth strategies of 5% REDcard Rewards and expanded food assortment, combined with unrelated rate improvements within merchandise categories.

## Edgar Filing: TARGET CORP - Form 10-Q

For the nine months ended October 29, 2011, our gross margin rate was 30.8 percent, decreasing from 31.3 percent in the comparable period last year, reflecting an adverse sales mix impact of 0.4 percentage points and lower margin rates within merchandise categories. These changes are largely the result of the strategies and unrelated rate changes cited above.

### Selling, General and Administrative Expense Rate

Our selling, general and administrative expense rate represents SG&A expenses as a percentage of sales. See Note 3 in our Form 10-K for the fiscal year ended January 29, 2011 for a description of costs included in SG&A expenses. SG&A expenses exclude depreciation and amortization, as well as expenses associated with our credit card operations, which are reflected separately in our Consolidated Statements of Operations.

For the three and nine months ended October 29, 2011, the SG&A expense rate was 21.4 percent and 21.0 percent, respectively, a decrease from 21.8 percent and 21.3 percent in the same periods last year. For the quarter and year-to-date periods, these improvements were primarily due to increased U.S. Credit Segment profit sharing (0.3 percentage points) and favorable leverage on store hourly payroll expense. No other areas were individually significant.

### Depreciation and Amortization Expense Rate

Our depreciation and amortization expense rate represents depreciation and amortization expense as a percentage of sales. For the three and nine months ended October 29, 2011, our depreciation and amortization expense rate was 3.3 percent and 3.2 percent, respectively, compared with 3.5 percent and 3.4 percent last year. This decrease is due to sales growth outpacing increases in depreciation and amortization expense.

### Store Data

During the three months ended October 29, 2011, we opened 6 new stores (5 net of one relocation). During the nine months ended October 29, 2011, we opened 21 new stores (17 net of 4 relocations). During the three months ended October 30, 2010, we opened 10 new stores (9 net of one relocation). During the nine months ended October 30, 2010, we opened 13 new stores (12 net of one relocation). During the first three quarters of 2011, we remodeled 394 stores under our current store remodel program, compared with 341 in the comparable prior year period.

**U.S. Credit Card Segment**

We offer credit to qualified guests through the Target Credit Cards. Our credit card program supports our core retail operations and remains an important contributor to our overall profitability and engagement with our guests. Beginning in October 2010, guests receive a 5 percent discount on virtually all purchases at checkout, every day, when they use a REDcard at any Target store or on Target.com.

Credit card revenues are comprised of finance charges, late fees and other revenue, and third party merchant fees, or the amounts received from merchants who accept the Target Visa Credit Card.

In January 2011, we announced our plan to actively pursue the sale of our credit card receivables portfolio. We intend to execute a transaction only if appropriate strategic and financial conditions are met. We are currently negotiating a potential transaction. We will classify the credit card receivables portfolio as held for sale when a transaction that allows us to meet our strategic and economic objectives has been agreed upon with a potential buyer. It is possible that a sale agreement could be executed as early as the fourth quarter of 2011.

- (a) Loyalty Program discounts are recorded as reductions to sales in our U.S. Retail Segment. Effective with the October 2010 nationwide launch of our new 5% REDcard Rewards loyalty program, we changed the formula under which our U.S. Credit Card Segment reimburses our U.S. Retail Segment to better align with the attributes of the new program. In the three and nine months ended October 29, 2011, these reimbursed amounts were \$74 million and \$189 million compared with \$26 million and \$60 million in the corresponding periods in 2010. In all periods these amounts were recorded as reductions to SG&A expenses within the U.S. Retail Segment and increases to operations and marketing expenses within the U.S. Credit Card Segment.
- (b) Amounts represent the portion of average gross credit card receivables funded by Target. These amounts exclude \$3,754 million and \$3,843 million for the three and nine months ended October 29, 2011, respectively, and \$4,048 million and \$4,461 million for the three and nine months ended October 30, 2010, respectively, of average receivables funded by nonrecourse debt collateralized by credit card receivables.
- (c) ROIC is return on invested capital, and this rate equals our segment profit divided by average gross credit card receivables funded by Target, expressed as an annualized rate.
- (d) As an annualized percentage of average gross credit card receivables.

LIBOR(a)		0.2%		0.3%
Spread to LIBOR(b)	\$ 552	11.7% (c)	\$ 439	8.1% (c)

(a) Balance-weighted one-month LIBOR.

(b) Spread to LIBOR is a metric used to analyze the performance of our total credit card portfolio because the vast majority of our portfolio earned finance charge revenue at rates tied to the Prime Rate, and the interest rate on all nonrecourse debt securitized by credit card receivables is tied to LIBOR.

(c) As a percentage of average gross credit card receivables.

Our primary measure of segment profit in our U.S. Credit Card Segment is the EBIT generated by our total credit card receivables portfolio less the interest expense on nonrecourse debt collateralized by credit card receivables. We analyze this measure of profit in light of the amount of capital we have invested in our credit card receivables. In addition, we measure the performance of our overall credit card receivables portfolio by calculating the dollar Spread to LIBOR at the portfolio level. This metric approximates overall financial performance of the entire credit card portfolio we manage by measuring the difference between EBIT earned on the portfolio and a hypothetical benchmark rate financing cost applied to the entire portfolio. The interest rate on all nonrecourse debt securitized by credit card receivables is tied to LIBOR.

U.S. Credit Card Segment profit for the three and nine months ended October 29, 2011 increased to \$143 million and \$508 million, respectively, from \$130 million and \$390 million for the three and nine months ended October 30, 2010, driven by a decline in bad debt expense, partially offset by lower total revenues. Segment revenues for the three months ended October 29, 2011 were \$348 million, a decrease of \$31 million, or 8.2 percent, from the same period in the prior year. For the nine months ended October 29, 2011, segment revenues were \$1,048 million, a decrease of \$172 million, or 14.1 percent, from the same period in the prior year. The decreases were primarily driven by lower average receivables resulting in reduced finance charge revenue. Segment expenses were \$187 million and \$485 million for the three and nine months ended October 29, 2011, a decrease of \$42 million and \$281 million, or 18.2 percent and 36.6 percent, respectively, from the comparable prior year periods driven by lower bad debt expense due to improved trends in key measures of risk. Interest expense on nonrecourse debt for the three and nine months ended October 29, 2011 declined by \$2 million and \$9 million, respectively, from last year, due to a decrease in nonrecourse debt securitized by credit card receivables.

(a) Write-offs include the principal amount of losses (excluding accrued and unpaid finance charges), and recoveries include current period principal collections on previously written-off balances. These amounts combined represent net write-offs.

Our period-end gross credit card receivables at October 29, 2011 were \$6,144 million compared with \$6,730 million at October 30, 2010, a decrease of 8.7 percent. Average gross credit card receivables for the three and nine months ended October 29, 2011 decreased 9.9 percent and 12.3 percent, respectively, compared with the same period last year. In response to regulatory changes and credit card industry trends, we have undertaken risk management and underwriting initiatives that have reduced available credit lines for higher-risk cardholders. Additionally, we have experienced an increase in payment rates and a decrease in Target Visa Credit Card charge activity at third parties, partially offset by an increase in charges at Target.

**Canadian Segment**

## Edgar Filing: TARGET CORP - Form 10-Q

During the three and nine months ended October 29, 2011, start-up costs totaled \$18 million and \$53 million, respectively, and primarily consisted of compensation, benefits and consulting expenses. These expenses are reported in SG&A expense within the consolidated statement of operations. Additionally, we recorded \$17 million and \$28 million in depreciation for the three and nine months ended October 29, 2011, respectively, related to capital lease assets and leasehold interests acquired in our Zellers asset purchase.

We have begun to invest capital to establish a Canadian headquarters, prepare for site renovation, establish supply chain capabilities and build supporting infrastructure. During the nine months ended October 29, 2011, we have recorded

approximately \$140 million of property and equipment, primarily in construction-in-progress and land, related to these activities.

**Other Performance Factors**

**Net Interest Expense**

Net interest expense for the three and nine months ended October 29, 2011 was \$200 million and \$574 million, respectively, including \$15 million and \$25 million of interest on capitalized leases related to our Canadian market entry. For the three and nine months ended October 30, 2010, net interest expense was \$194 million and \$567 million.

**Provision for Income Taxes**

Our effective income tax rate for the three and nine months ended October 29, 2011 was 35.3 percent and 36.1 percent, respectively, up from 30.8 percent and 35.2 percent for the three and nine months ended October 30, 2010. These increases are primarily due to the favorable resolution of various state income tax matters in the comparable 2010 period.

**Reconciliation of Non-GAAP Financial Measures to GAAP Measures**

Our segment measure of profit is used by management to evaluate the return we are achieving on our investment and to make operating decisions. To provide additional transparency we have disclosed non-GAAP adjusted diluted earnings per share, which incorporates the diluted EPS impact of our 2013 Canadian market entry and favorable resolution of various state income tax matters. We believe this information is useful in providing period-to-period comparisons of the results of our U.S. operations.

## Analysis of Financial Condition

### Liquidity and Capital Resources

Our period-end cash and cash equivalents balance was \$821 million compared with \$936 million for the same period in 2010. Marketable securities of \$66 million and \$349 million were included in cash and cash equivalents at the end of third quarter 2011 and 2010, respectively. Our investment policy is designed to preserve principal and liquidity of our marketable securities. This policy allows investments in large money market funds or in highly rated direct short-term instruments that mature in 60 days or less. We also place certain limitations on the aggregate dollars invested and percentage of total fund value held when making short-term investment decisions.

Operations during the first nine months of 2011 were funded by both internally and externally generated funds. Cash flow provided by operations was \$2,975 million for the nine months ended October 29, 2011 compared with \$2,852 million for the same period in 2010. During 2011, Target issued \$1 billion of unsecured debt that matures in July 2014 and issued commercial paper, of which, \$1,211 million was outstanding as of October 29, 2011. This cash flow, combined with our prior year-end cash position, allowed us to fund seasonal increases in inventory and capital expenditures, pay dividends and continue purchases under our share repurchase program.

Our period-end gross credit card receivables were \$6,144 million at October 29, 2011 compared with \$6,730 million at October 30, 2010, a decrease of 8.7 percent. Average gross credit card receivables during the nine months ended October 29, 2011 decreased 12.3 percent compared with the nine months ended October 30, 2010. This change was driven by the factors indicated in the U.S. Credit Card Segment above. Due to declines in gross credit card receivables, TR LLC repaid JPMC \$226 million and \$530 million during the first nine months of 2011 and 2010, respectively. To the extent the receivables balance continues to decline, TR LLC expects to continue to pay JPMC a pro rata portion of principal collections such that the portion owned by JPMC would not exceed 47 percent.

Third quarter period-end inventory levels increased \$340 million, or 3.6 percent from the same period in 2010. Inventory levels were higher to support traffic-driving strategic initiatives, such as our expanded food assortment and pharmacy offerings, in addition to comparatively higher retail square footage. Accounts payable increased by \$292 million, or 3.8 percent over the same period.

During the three and nine months ended October 29, 2011, we repurchased 4.5 million shares and 34.1 million shares, respectively, of our common stock for \$226 million (\$50.45 per share) and \$1,733 million (\$50.76 per share), respectively, under a \$10 billion share repurchase plan authorized by our Board of Directors in November 2007. During the three and nine months ended October 30, 2010, we repurchased 15.2 million and 40.2 million shares, respectively, of our common stock for \$793 million (\$52.29 per share) and \$2,093 million (\$52.04 per share), respectively.

We paid dividends totaling \$203 million and \$549 million for the three and nine months ended October 29, 2011, and \$181 million and \$432 million during the three and nine months ended October 30, 2010, an increase of 12.2 percent and 27.1 percent, respectively. We declared dividends totaling \$201 million (\$0.30 per share) in third quarter 2011, an increase of 13.6 percent over the \$177 million (\$0.25 per share) of declared dividends during the third quarter of 2010. We have paid dividends every quarter since our first dividend was declared following our 1967 initial public offering, and it is our intent to continue to do so in the future.

## Edgar Filing: TARGET CORP - Form 10-Q

Our financing strategy is to ensure liquidity and access to capital markets, to manage our net exposure to floating interest rate volatility, and to maintain a balanced spectrum of debt maturities. Within these parameters, we seek to minimize our borrowing costs.

Our ability to access the long-term debt, commercial paper and securitized debt markets has provided ample sources of liquidity to Target. Our continued access to these markets depends on multiple factors including the condition of debt capital markets, our operating performance and maintaining strong debt ratings. The ratings assigned to our debt by the credit rating agencies affect both the pricing and terms of any new financing. As of October 29, 2011 our credit ratings were as follows:

<b>Credit Ratings</b>	Moody's	Standard and Poor's	Fitch
Long-term debt	A2	A+	A-
Commercial paper	P-1	A-1	F2
Securitized receivables <sup>(a)</sup>	Aa2	n/a	n/a

<sup>(a)</sup> *These rated securitized receivables exclude the interest in our credit card receivables sold to JPMC.*

## Edgar Filing: TARGET CORP - Form 10-Q

If our credit ratings were lowered, our ability to access the debt markets and our cost of funds for new debt issuances could be adversely impacted. Each of the credit rating agencies reviews its rating periodically and there is no guarantee our current credit rating will remain the same as described above.

As a measure of our financial condition we monitor our interest coverage ratio, representing the ratio of pretax earnings before fixed charges to fixed charges. Fixed charges include interest expense and the interest portion of rent expense. Our interest coverage ratio was 5.5x for the first nine months of 2011, and 5.4x for the first nine months of 2010.

We have liquidity available to us through a committed \$2.25 billion unsecured revolving credit facility obtained through a group of banks in October 2011, which will expire in October 2016. This new unsecured revolving credit facility replaced a previously held \$2 billion unsecured revolving credit facility that was scheduled to expire in April 2012. No balances were outstanding at any time during the first three quarters of 2011 or 2010 under either facility.

Most of our long-term debt obligations contain covenants related to secured debt levels. In addition to a secured debt level covenant, our credit facility also contains a debt leverage covenant. We are, and expect to remain, in compliance with these covenants. Additionally, at October 29, 2011, no notes or debentures contained provisions requiring acceleration of payment upon a debt rating downgrade, except that certain outstanding notes allow the note holders to put the notes to us if within a matter of months of each other we experience both (i) a change in control; and (ii) our long-term debt ratings are either reduced and the resulting rating is non-investment grade, or our long-term debt ratings are placed on watch for possible reduction and those ratings are subsequently reduced and the resulting rating is non-investment grade.

We believe our sources of liquidity will continue to be adequate to maintain operations and to finance anticipated expansion and strategic initiatives throughout 2011. We also continue to anticipate ample access to long-term financing. Further, in January 2011, we announced our plan to actively pursue the sale of our credit card receivables portfolio, which may provide additional funding. As of October 29, 2011 the gross balance of our credit card receivables portfolio was \$6,144 million, of which \$3,759 million was funded by third parties and \$2,385 million was funded by Target.

We completed our real estate transaction with Zellers and became the lessee for 135 sites, of which we expect to open 125 to 135 Target locations. In turn, Zellers has agreed to leaseback selected sites where the monthly lease payments on these leases and Zellers' subleases are equal. At our option, Zellers is required to vacate the properties between January 31, 2012 and March 31, 2013, generally following a 9-month notice period. This transaction resulted in a final net purchase price of \$1,636 million. We plan to invest between \$2 billion to \$3 billion in Canada over the next three years to renovate acquired sites that we intend to convert into Target stores, establish supply chain capabilities, build information-technology infrastructure, and acquire and develop other sites unrelated to the Zellers transaction. The amount we ultimately invest will be largely dependent on the number of Target stores we elect to operate in Canada.

During the nine months ended October 29, 2011 the value of \$1.00 ranged from C\$0.94 to C\$1.05 and averaged C\$0.98. On October 29, 2011, \$1.00 was equivalent to C\$0.99.

### **Contractual Obligations and Commitments**

## Edgar Filing: TARGET CORP - Form 10-Q

A summary of future obligations under our various contractual obligations and commitments as of January 29, 2011 was disclosed in our 2010 10-K. As a result of our acquisition of leasehold interests in 135 sites from Zellers, we have additional future minimum capital lease payments of \$1.3 billion. During the three months ended October 29, 2011, there were no other material changes outside the ordinary course of business. However, we continually evaluate opportunities to expand our operations, including internal development of new products, programs and technology applications and acquisitions.

### **New Accounting Pronouncements**

In May 2011, the FASB issued Accounting Standards Update 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS, which amends the current fair value measurement and disclosure guidance to include increased transparency around valuation inputs and investment categorization. This guidance will be effective beginning in fiscal 2012. We do not expect the adoption to have a material impact on our consolidated net earnings, cash flows or financial position.

In June 2011, the FASB issued Accounting Standards Update 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income, which revises the current practice of including other comprehensive income within the equity

section of the statement of financial position and requires disclosure of other comprehensive income either in a single continuous statement of comprehensive income or in a separate statement. This guidance will be effective beginning in fiscal 2012. We do not expect the adoption to have an impact on our consolidated net earnings, cash flows or financial position, but the adoption will change the current presentation of other comprehensive income in our financial statements.

## Outlook

We expect to achieve consolidated diluted earnings per share (EPS) of \$1.43 to \$1.53 in the fourth quarter 2011. This earnings outlook does not include any reduction in tax expense from the favorable resolution of various state income tax matters, currently estimated at approximately \$50 million, or any impact of a potential credit card asset sale and potential early extinguishment of non-recourse debt collateralized by credit card receivables.

In the U.S. Retail Segment we generally expect recent trends and performance drivers to continue in the fourth quarter. We expect a fourth quarter comparable-store sales increase of 4 percent or slightly less. We expect the fourth quarter retail EBIT margin rate to be similar to last year's fourth quarter, reflecting continued gross margin rate pressure offset by rate favorability on the SG&A and depreciation and amortization expense lines. In our U.S. Credit Card Segment, we expect continued strong performance in the fourth quarter. However, as we begin to compare against prior year periods in which our results benefited from credit card receivable allowance reductions, we are unlikely to continue to report increases in segment profit. We expect our direct costs (segment EBIT, interest expense on capital leases and related tax effects) associated with entry into Canada will result in a \$0.07 to \$0.09 unfavorable impact on fourth quarter 2011 EPS.

We expect 2011 capital expenditures related to our U.S. retail operations to be in the range of \$2.6 billion to \$2.7 billion, driven primarily by our store remodel program.

We expect to continue to execute against our share repurchase plan, and may repurchase up to \$300 million during the fourth quarter of 2011. The timing and amount of share repurchase activity, if any, will be dependent on market conditions, the amount of future net earnings and cash flows.

## Forward-Looking Statements

This report contains forward-looking statements, which are based on our current assumptions and expectations. These statements are typically accompanied by the words expect, may, could, believe, would, might, anticipates, or words of similar import. The principal forward-looking statements in this report include: For our U.S. Retail Segment, our outlook for sales, comparable-store sales trends, including the impact of our store remodel and 5% REDcard Rewards programs, gross margin rates, and selling, general and administrative expense rates; for our U.S. Credit Card Segment, aggregate portfolio risks and the level of, the allowance for doubtful accounts, and the pursuit and timing of a portfolio sale; for our Canadian Segment, our performance, timing and amount of future capital investments in Canada, and expected future earnings per share impact of our direct costs associated with entry into Canada; on a consolidated basis, statements regarding anticipated earnings per share, the adequacy of and costs associated with our sources of liquidity, the continued execution of our share repurchase program, our expected capital expenditures, the expected compliance with debt covenants, the expected impact of new accounting pronouncements, our intentions regarding future dividends, contributions related to our pension and postretirement health care plans, the impact of future changes in foreign currency, the effects of macroeconomic conditions, the adequacy of our reserves for general liability, workers' compensation, property loss, the expected outcome of claims and litigation, and the resolution of tax matters.

All such forward-looking statements are intended to enjoy the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, as amended. Although we believe there is a reasonable basis for the forward-looking statements, our actual results could be materially different. The most important factors which could cause our actual results to differ from our forward-looking statements are set forth on our description of risk factors in Item 1A our Form 10-K for the fiscal year ended January 29, 2011, which should be read in conjunction with the forward-looking statements in this report. Forward-looking statements speak only as of the date they are made, and we do not undertake any obligation to update any forward-looking statement.

In addition to the GAAP results provided in this release, the company provides non-GAAP adjusted diluted earnings per share (non-GAAP adjusted EPS) for the three and nine months ended October 29, 2011 and October 30, 2010. This measure is not in accordance with, or an alternative for, generally accepted accounting principles in the United States. The most comparable GAAP measure is diluted earnings per share. Management believes non-GAAP adjusted EPS is useful in providing period-to-period comparisons of the results of our U.S. operations. Non-GAAP adjusted EPS should not be considered in isolation or as a substitution for analysis of the company's results as reported under GAAP. Other companies may calculate non-GAAP adjusted EPS differently than the company does, limiting the usefulness of the measure for comparative purposes.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

There have been no material changes in our primary risk exposures or management of market risks from those disclosed in our Form 10-K for the fiscal year ended January 29, 2011.

### **Item 4. Controls and Procedures**

#### **Evaluation of Disclosure Controls and Procedures**

As of the end of the period covered by this quarterly report, we conducted an evaluation, under supervision and with the participation of management, including the chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended (Exchange Act). Based upon that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective. Disclosure controls and procedures are defined by Rules 13a-15(e) and 15d-15(e) of the Exchange Act as controls and other procedures that are designed to ensure that information required to be disclosed by us in reports filed with the Securities and Exchange Commission (SEC) under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports filed under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

#### **Changes in Control Over Financial Reporting**

We have expanded our implementation of enterprise resource planning (ERP) software from SAP AG. This expansion included introducing accounts payable, accounts receivable and treasury modules as well as enhancing financial reporting functionality to the system that was initially implemented during first quarter 2010. We evaluated the design of the internal control over financial reporting and will test these controls during the fourth quarter of 2011. There were no other changes in our internal control over financial reporting during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

For a description of legal proceedings, see Note 6 of the Notes to Consolidated Financial Statements included in Item 1, Financial Statements.

**Item 1A. Risk Factors**

There have been no material changes to the risk factors described in our annual report on Form 10-K for the fiscal year ended January 29, 2011.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table presents information with respect to purchases of Target common stock made during the three months ended October 29, 2011, by the Corporation or any affiliated purchaser of the Corporation, as defined in Rule 10b-18(a)(3) under the Exchange Act.

Since the inception of our share repurchase program, which began in the fourth quarter of 2007, we have repurchased 185.5 million common shares of our common stock, for a total cash investment of \$9,560 million (\$51.53 average price per share).

Period	Total Number of Shares Purchased <sup>(a)</sup>	Average Price Paid per Share <sup>(a)</sup>	Total Number of Shares Purchased as Part of Publicly Announced Program <sup>(a)</sup>	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
July 31, 2011 through August 27, 2011		\$	181,056,712	\$ 665,342,246
August 28, 2011 through October 1, 2011	4,077,147	50.34	185,133,859	460,087,985
October 2, 2011 through October 29, 2011	396,884	51.51	185,530,743	439,644,565
	4,474,031	\$ 50.45	185,530,743	\$ 439,644,565

*(a) The table above includes shares reacquired upon settlement of prepaid forward contracts. For the three months ended October 29, 2011, 0.5 million shares were reacquired through these contracts. At October 29, 2011, we held asset positions in prepaid forward contracts for 1.3 million shares of our common stock, for a total cash investment of \$55 million, or \$43.78 per share.*
