Standard Chartered Bank will not effect any offers or sales of any notes in the United States unless it is through one or more U.S. registered broker-dealers as permitted by the regulations of FINRA.

United States Tax Considerations:

The text under "United States Tax Considerations" in the Prospectus Supplement, dated September 28, 2009, summarizes certain U.S. federal income tax considerations that may be relevant to a holder of a note that is a U.S. holder. The eighth paragraph of that text is amended to read in its entirety as follows:

Except as discussed below with respect to market discount and foreign currency gain or loss, gain or loss recognized by a U.S. holder on the sale, exchange or retirement of a note generally will be long-term capital gain or loss if the U.S. holder has held the note for more than one year at the time of disposition, and otherwise will be short-term capital gain or loss. The Internal Revenue Code of 1986 provides preferential treatment under certain circumstances for net long-term capital gains recognized by individual investors. Net long-term capital gains recognized by an individual U.S. holder generally will be subject to a maximum tax rate of 15% (20% for tax years beginning after December 31, 2012) for notes held more than one year. The ability of U.S. holders to offset capital losses against ordinary income is limited.
