Footnotes:

⁽a) Investment holdings in foreign currencies are converted to U.S. Dollars using period end spot rates. All investments are in United States enterprises unless otherwise noted.

⁽b) Interest rates on floating rate term loans adjust periodically based upon a predetermined schedule. Stated interest rates in this schedule represent the all-in rate as of July 31, 2018.

⁽c) Investments categorized as a significant unobservable input (Level 3) (See Note 3 of the Notes to Schedule of Investments).

- (d) This position or a portion of this position represents an unsettled loan purchase. The interest rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate (LIBOR or L) or the applicable LIBOR floor plus a spread which was determined at the time of purchase.
- (e) Security valued at fair value using methods determined in good faith by or under the direction of the board of directors.

(f) As of July 31, 2018, Ares Dynamic Credit Allocation Fund, Inc. (the Fund) had entered into the following commitments to fund various revolving and delayed draw senior secured and subordinated loans. Such commitments are subject to the satisfaction of certain conditions set forth in the documents governing these loans and there can be no assurance that such conditions will be satisfied. See Note 2 of the Notes to Schedule of Investments for further information on revolving and delayed draw loan commitments.

Notes to Schedule of Investments

July 31, 2018 (Unaudited)

(1) Organization

Ares Dynamic Credit Allocation Fund, Inc. (NYSE: ARDC) (ARDC or Fund) is a corporation incorporated under the laws of the State of Maryland and registered with the U.S. Securities and Exchange Commission (the SEC) under the Investment Company Act of 1940, as amended (the Investment Company Act), as a closed-end, management investment company, and intends to qualify each year to be treated as a Regulated Investment Company (RIC), under Subchapter M of the Internal Revenue Code of 1986, as amended. The Fund operates as a diversified investment company under the Investment Company Act. The Fund commenced operations on November 27, 2012. Ares Capital Management II LLC (the Adviser) was registered as a Registered Investment Adviser with the SEC on June 9, 2011 and serves as the investment adviser to the Fund.

Investment Objective and Policies

The Fund s investment objective is to seek an attractive risk adjusted level of total return, primarily through current income and, secondarily, through capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in a broad, dynamically managed portfolio of (i) senior secured loans (Senior Loans) made primarily to companies whose debt is rated below investment grade, (ii) corporate bonds (Corporate Bonds) that are primarily high yield issues rated below investment grade, (iii) other fixed-income instruments of a similar nature that may be represented by derivatives, and (iv) securities issued by entities commonly referred to as collateralized loan obligations (CLOs) and other asset-backed securities. The Fund s investments in CLOs may include investments in subordinated tranches of CLO securities. The Adviser will dynamically allocate the Fund s portfolio among investments in the various targeted credit markets, to seek to manage interest rate and credit risk and the duration of the Fund s portfolio. Under normal market conditions, the Fund will not invest more than (i) 40% of its Managed Assets in CLOs and other asset-backed securities, or (ii) 10% of its Managed Assets in subordinated (or residual) tranches of CLO securities. Managed Assets means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to indebtedness) minus the Fund s liabilities other than liabilities relating to indebtedness.

(2) Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared on an accrual basis of accounting in conformity with U.S. generally accepted accounting principles (GAAP), and includes the accounts of the Fund. The Fund is an investment company following accounting and reporting guidance in Financial Accounting Standards (FASB) Accounting Standards Codification (ASC) Topic 946, *Financial Services Investment Companies*. The Adviser makes estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates and such differences may be material.

Investments Valuation

All investments in securities are recorded at their fair value, as described in Note 3.

Commitments and Contingencies

In the normal course of business, the Fund s investment activities involve executions, settlement and financing of various transactions resulting in receivables from, and payables to, brokers, dealers and the Fund s custodian. These activities may expose the Fund to risk in the event that such parties are unable to fulfill contractual obligations. Management does not anticipate any material losses from counterparties with whom it conducts business. Consistent with standard business practice, the Fund enters into contracts that contain a variety of indemnifications, and is engaged from time to time in various legal actions. The maximum exposure of the Fund under these arrangements and activities is unknown. However, the Fund expects the risk of material loss to be remote.

1

Ares Dynamic Credit Allocation Fund, Inc.
Notes to Schedule of Investments (Continued)
July 31, 2018 (Unaudited)
Commitments to extend credit include loan proceeds the Fund is obligated to advance, such as delayed draws or revolving credit arrangements. Commitments generally have fixed expiration dates or other termination clauses. Unrealized gains or losses associated with unfunded commitments are recorded in the financial statements and reflected as an adjustment to the fair value of the related security in the Schedule of Investments. The par amount of the unfunded commitments is not recognized by the Fund until it becomes funded. As of July 31, 2018, the value of loans disclosed in the Schedule of Investments does not include unfunded commitments, which total \$1,634,762.
Discounts and Premiums
Discounts and premiums on securities purchased are accreted/amortized over the life of the respective security using the effective interest method. The adjusted cost of investments represents the original cost adjusted for payment-in-kind (PIK) interest and the accretion of discounts and amortization of premiums.
Investment Transactions
Investment transactions are accounted for on the trade date.
Foreign Currency Transactions
Amounts denominated in foreign currencies are translated into U.S. dollars on the following basis: (i) investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based upon currency exchange rates effective on the date of valuation; and (ii) purchases and sales of investments and income and expense items denominated in foreign currencies are translated into U.S. dollars based upon currency exchange rates prevailing on transaction dates.
The Fund does not isolate that portion of the results of operations resulting from the changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of securities held. Such fluctuations are included within the net realized and unrealized gain (loss) on investments in the Statements of Operations.
Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates of securities transactions, and the difference between the amounts of income and expense items recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign currency gains and losses arise from the

changes in fair values of assets and liabilities, other than investments in securities at period end, resulting from changes in exchange rates.

Investments in foreign companies and securities of foreign governments may involve special risks and considerations not typically associated with investing in U.S. companies and securities of the U.S. government. These risks include, among other things, revaluation of currencies, less reliable information about issuers, different transaction clearance and settlement practices, and potential future adverse political and economic developments. Moreover, investments in foreign companies and securities of foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

The Fund may enter into forward foreign currency exchange contracts for operational purposes and to protect against adverse exchange rate fluctuations. A forward foreign currency contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency at a specific exchange rate on a future date. The Fund may also enter into these contracts for purposes of increasing exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. The net U.S. dollar value of foreign currency underlying all contractual commitments held by the Fund and the resulting unrealized appreciation or depreciation are determined using foreign currency exchange rates from an independent pricing service. The Fund is subject to the credit risk that the other party will not complete the obligations of the contract. The fair values of the forward foreign currency exchange contracts are obtained from an independent pricing source.

Ares Dynamic Credit Allocation Fund, Inc.
Notes to Schedule of Investments (Continued)
July 31, 2018 (Unaudited)
(3) Investments
Fair Value Measurements
The Fund follows the provisions of ASC 820, <i>Fair Value Measurements and Disclosures</i> under U.S. GAAP, which among other matters, requires enhanced disclosures about investments that are measured and reported at fair value. This standard defines fair value and establishes a hierarchal disclosure framework, which prioritizes and ranks the level of market price observability used in measuring investments at fair value and expands disclosures about assets and liabilities measured at fair value. ASC 820 defines—fair value—as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchal disclosure framework establishes a three-tier hierarchy to maximize the use of observable data and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique.
Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.
• Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access
• Level 2 Valuations based on quoted prices in markets that are not active or which all significant inputs are observable either directly or indirectly
• Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement
In addition to using the above inputs in investment valuations, the Fund continues to employ a valuation policy that is consistent with the

provisions of ASC 820. Consistent with its valuation policy, the Fund evaluates the source of inputs, including any markets in which the Fund s investments are trading (or any markets in which securities with similar attributes are trading), in determining fair value. The Fund s valuation policy considers the fact that because there may not be a readily available market value for the investments in the Fund s portfolio, therefore, the

fair value of the investments may be determined using unobservable inputs.

The investments classified as Level 1 or Level 2 are typically valued based on quoted market prices, forward foreign exchange rates, dealer quotations or alternative pricing sources supported by observable inputs. The Adviser obtains prices from independent pricing services which generally utilize broker quotes and may use various other pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data. The Adviser is responsible for all inputs and assumptions related to the pricing of securities. The Adviser has internal controls in place that support its reliance on information received from third-party pricing sources. As part of its internal controls, the Adviser obtains, reviews, and tests

3

Ares Dynamic Credit Allocation Fund, Inc.

Notes to Schedule of Investments (Continued)

July 31, 2018 (Unaudited)

information to corroborate prices received from third-party pricing sources. For any security, if market or dealer quotations are not readily available, or if the Adviser determines that a quotation of a security does not represent a fair value, then the security is valued at a fair value as determined in good faith by the Adviser and will be classified as Level 3. In such instances, the Adviser will use valuation techniques consistent with the market or income approach to measure fair value and will give consideration to all factors which might reasonably affect the fair value.

Bank loans and corporate debts: The fair value of bank loans and corporate debt is estimated based on quoted market prices, forward foreign exchange rates, dealer quotations or alternative pricing sources supported by observable inputs and are generally classified within Level 2 or 3. The Adviser obtains prices from independent pricing services which generally utilize broker quotes and may use various other pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data. If the pricing services are only able to obtain a single broker quote or utilize a pricing model the securities will be classified as Level 3. If the pricing services are unable to provide prices, the Adviser will attempt to obtain one or more broker quotes directly from a dealer and price such securities at the last bid price obtained; such securities are classified as Level 3.

Collateralized loan obligations: The fair value of CLOs is estimated based on various valuation models from third-party pricing services as well as internal models. The valuation models generally utilize discounted cash flows and take into consideration prepayment and loss assumptions, based on historical experience and projected performance, economic factors, the characteristics and condition of the underlying collateral, comparable yields for similar securities and recent trading activity. These securities are classified as Level 3.

The following is a summary of the inputs used as of July 31, 2018, in valuing the Fund s investments carried at fair value:

				Level 2 - Other		
	Leve	l 1 - Quoted		Significant	Level 3 - Significant	
		Prices	O	bservable Inputs	Unobservable Inputs	Total
Senior Loans	\$		\$	102,868,889	\$ 35,883,314	\$ 138,752,203

Transfers in to Level 3		8,136,093						8,136,093
Transfers out of Level 3		(2,762,245)						(2,762,245)
Balance as of July 31, 2018	\$	35,883,314	\$	154,395,685	\$ 2,276,611	\$	\$	192,555,610
Net change in unrealized appreciation/(depreciation) from	Φ.	100 221	Φ.	(017.010)	(200,020)	Φ.	Φ.	(1.050.020)
Investments held as of July 31, 2018	\$	109,231	\$	(817,012)	\$ (289,029)	\$	\$	(1,050,820)

⁽a) Purchases include PIK interest and securities received from restructure.

(b) Sales include principal redemptions.

Investments were transferred into and out of Level 3 and into and out of Level 2 during the period ended July 31, 2018 due to changes in the quantity and quality of information obtained to support the fair value of each investment as assessed by the Adviser.

There were no transfers between Level 1 and 2 during the period. It is the Fund s policy to recognize transfers into and out of all levels at the end of the reporting period.

The valuation techniques used by the Adviser to measure fair value as of July 31, 2018 maximized the use of observable inputs and minimized the use of unobservable inputs. The valuation techniques and significant amounts of unobservable inputs used in the valuation of the Fund s Level 3 securities are outlined in the table below.

Edgar Filing: Ares Dynamic Credit Allocation Fund, Inc. - Form N-Q
