Eltek Receives Sizeable Follow On Order from a Major Fortune 100 U.S. Manufacturer

**Eltek Receives Largest Single Order from the U.S.
Eltek Expects Delivery of the \$770,000 Order during Q2 and Q3 2007**

PETACH-TIKVA, Israel, April 25, 2007 Eltek Ltd. (NasdaqCM: ELTK), the leading Israeli manufacturer of advanced circuitry solutions, today announced that a major U.S. industrial manufacturer has placed a follow-on order for flex-rigid PCBs that will be used in the production of advanced industrial equipment. This order valued at \$770,000 is anticipated to be supplied during the second and third quarters of 2007.

This order was received under a supplier managed inventory program agreement. This framework agreement provides for our shipment of the PCBs to a hub close to the customer in the U.S. under frequent scheduling agreements. Sales are recognized when the PCBs are shipped to the customer, which are expected to be completed in the third quarter. We are very pleased to receive this sizeable follow-on order from this prestigious U.S. customer, the largest order that we have received since we entered into a framework agreement with the customer towards the end of 2006, said Arieh Reichart, President and Chief Executive Officer of Eltek.

This new order signifies an important quantitative achievement in our penetration into the U.S. flex-rigid PCB market and we expect to report record sales in the U.S. in 2007, continued Reichart. As we are optimistic that we will receive follow-on orders from this customer, we believe that this engagement will become an important incremental growth and margin expansion driver for Eltek.

About the Company

Eltek is Israel's leading manufacturers of printed circuit boards, the core circuitry of most electronic devices. It specializes in the complex high-end of PCB manufacturing, i.e., HDI, multi-layered and flex-rigid boards. Eltek's technologically advanced circuitry solutions are used in today's increasingly sophisticated and compact electronic products. The Company has invested heavily in upgrading its production facilities over the past five years.
