FORM 10-K/A

(Amendment No.1)

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2003

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 0-20292

Ampex Corporation

(Exact name of Registrant as specified in its charter)

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Delaware
(State of incorporation)

13-3667696
(I.R.S. employer identification number)

1228 Douglas Avenue

Redwood City, California 94063-3199

(Address of principal executive offices, including zip code)

(650) 367-2011

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Securities registered pursuant to Section 12(g) of the Act:

Class A Common Stock, par value \$.01 per share

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements, for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. Yes No

Indicate by check mark whether the Registrant is an accelerated filer (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the Registrant as of February 27, 2004 was approximately \$5,532,245 based on a price of \$1.75 per share, which was the closing price of the Registrant's Class A Common Stock on the OTC Bulletin Board on that date. The Class A Common Stock is the only class of common stock outstanding.

As of February 27, 2004 there were 3,728,017 outstanding shares of Class A Common Stock and no outstanding shares of Class C Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

The Registrant's Proxy Statement for its 2004 Annual Meeting of Stockholders is incorporated by reference into Part III (Items 10, 11, 12 and 13) of this Form 10-K.

Explanatory Note

Restatement of Financial Statements for Correction of Error in Accounting for the Media Pension Plan

On February 18, 2005, the Audit Committee of the Board of Directors of Ampex Corporation concluded that the previously issued financial statements contained in the Company's Annual Report on Form 10-K as of December 31, 2003 and December 31, 2002, including the corresponding 2003 and 2002 unaudited interim periods and for each of the years in the three year period ended December 31, 2003, as well as its unaudited interim financial statements contained on Form 10-Q as of and for the periods ending March 31, 2004, June 30, 2004 and September 30, 2004, should no longer be relied upon because of errors in those financial statements. These errors relate to how Ampex accounted for its obligations with respect to a pension plan of its former magnetic tape manufacturing subsidiary (Media), which Ampex sold in 1995. These errors are the subject of recent communications with the Office of the Chief Accountant of the Securities and Exchange Commission (the SEC), after which the Company revised its views with respect to the appropriate accounting for Media pension plan.

The agreement for the sale of Media required the buyer, Quantegy Corporation, to pay directly or to reimburse Ampex for required contributions to the Media pension plan. However, Ampex remained the Plan Sponsor of the Media pension plan and remained obligated to make pension contributions to that Plan.

We had accounted for our obligations under the Media pension plan under SFAS No. 5, Accounting for Contingencies since the sale of Media in 1995. However, as a result of communications with the Office of the Chief Accountant of the Securities and Exchange Commission (the SEC), we now believe that we should have accounted for these obligations under the provisions of SFAS No. 87, Employers Accounting for Pensions.

In connection with the restatement of the Company's consolidated financial statements for the year ended December 31, 2003, the Company and the Audit Committee determined that its pension accounting constitutes a material weakness.

As a result of the foregoing, the Company has restated its consolidated balance sheets at December 31, 2003 and 2002, and consolidated statements of operations and comprehensive income (loss), cash flows, and stockholders' deficit for the three years within the period ending December 31, 2003, including the corresponding 2003 and 2002 unaudited interim periods, and the unaudited quarterly periods ended March 31, 2004, June 30, 2004 and September 30, 2004. The restatement affects periods prior to 2001. The impact of the restatement on such prior periods is reflected as an adjustment to accumulated deficit, other accrued liabilities, other liabilities and minimum pension liability adjustment within Accumulated Other Comprehensive Income as of January 1, 2001. The effect of the restatement on net income (loss) and diluted earnings (loss) per share is set forth in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II of this Form 10-K/A.

Note 1, *Restatement of Previously Issued Financial Statements* to the restated consolidated financial statements discloses the nature of the restatement adjustments and shows the impact of each category on net loss from continuing operations, net loss and net income (loss) applicable to common stockholders and related diluted income (loss) per amounts for each of the three years ended December 31, 2003, and the cumulative impact of the adjustments on the balance sheet as of December 31, 2003 and 2002. In addition, Note 1 to the restated consolidated financial statements shows the effects of the adjustment on total liabilities, the accumulated deficit and stockholders' deficit as of December 31, 2003 and 2002. The impact of the restatement adjustments affecting periods prior to 2001 has been reflected in adjusted stockholders' deficit as of January, 2001. For information on the impact of the restatement on the years 1999 and 2000, reference is made to Item 6, Selected Financial Data, in Part II of this Form 10-K/A.

For a discussion of the Company's accounting for its obligations with respect to a pension plan of its former magnetic tape manufacturing subsidiary reference is made to Note 1 and 16, to the restated consolidated financial statements. The Company revised Note 1 to the restated consolidated financial statements to present the revised accounting policies for certain matters included in the restatement. Other notes to the consolidated financial statements affected by the restatement have also been revised.

Table of Contents

This Form 10-K/A amends and restates Items 1 and 3 of Part I, Items 6, 7, 8 and 9A of Part II, and Item 15 of Part IV of the original Form 10-K, and no other information included in the original Form 10-K is amended hereby. The explanatory caption at the beginning of each of these revised items of this Form 10-K/A sets forth the nature of the revisions to that item.

The Company did not amend its Annual Reports on Form 10-K or Quarterly Reports on Form 10-Q for periods affected by the restatement that ended prior to December 31, 2002, and the financial statements and related financial information contained in such reports should no longer be relied upon and are superseded by the information in this Form 10-K/A. The Company did not amend its Quarterly Reports on Form 10-Q for periods affected by the restatement for the year ended December 31, 2003, and the financial statements and related financial information contained in such reports should no longer be relied upon and are superseded by the information in this Form 10-K/A.

The restatement of previously issued financial statements decreased the Company's net loss and basic and diluted net loss per share in the fiscal year ended December 31, 2003 by approximately \$4.0 million or \$1.21 per share, increased the Company's net loss and basic and diluted net loss per share in the fiscal year ended December 31, 2002 by approximately \$0.07 million or \$0.02 per share and decreased the Company's net loss and basic and diluted net loss per share in the fiscal year ended December 31, 2001 by approximately \$1.3 million or \$0.43 per share. On an aggregate basis for the period ended December 31, 2003, the restatement resulted in a cumulative reduction in previously reported net losses of approximately \$8.5 million.

This Amendment does not reflect events that have occurred after the April 9, 2004 filing date of the Annual Report on Form 10-K that was originally filed, or modify or update the disclosures presented in the original Form 10-K, except to reflect the corrections described above. Information with respect to those events has been or will be set forth, as appropriate, in the Company's subsequent periodic filings, including its Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Any reference to facts and circumstances at a current date refer to such facts and circumstances as of such original filing date.

PART I

ITEM 1. BUSINESS

This item 1 has been revised to reflect the restatement, and certain developments occurring subsequent to the filing of the original Form 10-K with respect to the Company's business. Additional details regarding the restatement are included in Note 1 Restatement of Previously Issued Financial Statements to the consolidated financial statements.

Introduction

Ampex Corporation (Ampex) is a leading innovator and licensor of visual information technology. During our 59-year history, we have developed substantial proprietary technology relating to the electronic storage, processing and retrieval of data, particularly images. We currently hold approximately 600 patents and patent applications covering digital image processing, data compression and recording technologies. Through our wholly-owned subsidiary, Ampex Data Systems Corporation (Data Systems), we incorporate this technology in the design and manufacture of very high performance tape-based storage products, principally for digital recording, archiving and rapid restore/backup applications. We also leverage our investment in technology through our corporate licensing division that licenses our patents to manufacturers of consumer electronics products.

We have two operating segments: high-performance mass data storage systems, instrumentation recorders and professional video products; and licensing of intellectual property. For information about each segment's revenues, profit and/or loss, and assets for each of our last three fiscal years, see Note 20 to Consolidated Financial Statements and Licensing Revenue and Product Groups under Item 7 below. For financial information relating to our operations in various geographic areas, see Note 21 to Consolidated Financial Statements.

We incorporated in Delaware in January 1992 as the successor to a business originally organized in 1944. References to Ampex include subsidiaries and predecessors of Ampex Corporation, unless the context indicates otherwise. Our principal executive offices are located at 1228 Douglas Avenue, Redwood City, California 94063, and our telephone number is (650) 367-2011. Our Class A Common Stock is quoted on the OTC Bulletin Board under the symbol AEXCA.OB . We also maintain a website on the Internet at www.ampex.com.

Common and Preferred Shares

On June 12, 2003, we effected a one-for-twenty reverse stock split of our Class A Common Stock. The number of outstanding shares was reduced from approximately 63.4 million to 3.2 million shares. Common share data and per share calculations for all prior periods included in Management's Discussion and Analysis of Financial Condition and Results of Operations of Ampex Corporation and in the audited Consolidated Financial Statements and the Notes thereto, have been restated to reflect the impact of the one-for-twenty reverse stock split.

As of October 30, 2003, we redeemed all of our outstanding shares of 8% Noncumulative Redeemable Preferred Stock by issuing shares of our Class A Common Stock. Accordingly, we issued 450,600 shares of Class A Common Stock, representing approximately 12% of our common

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

stock outstanding after such issuance, in exchange for \$22,530,000 face amount of Preferred Stock, which was cancelled. Our 2003 financial statements include a non-taxable benefit applicable to common stockholders, which is included in the computation of diluted earnings per share, of approximately \$24.0 million from extinguishment of the Preferred Stock, of which \$20.9 million was recognized in the fourth quarter.

Table of Contents

Where You Can Find More Information

You are advised to read this Form 10-K/A in conjunction with other reports and documents that we file from time to time with the SEC. In particular, please read our Quarterly Reports on Form 10-Q, any Current Reports on Form 8-K that we may file from time to time and our proxy statements. You may obtain copies of these reports directly from us or from the SEC at the SEC's Public Reference Room at 450 Fifth Street, N.W. Washington, D.C. 20549, and you may obtain information about obtaining access to the Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site that contains reports, proxy and information statements, our Code of Ethics, and other information for electronic filers (including us) at its website www.sec.gov. We make available free of charge on or through our Internet website located at www.ampex.com our SEC filings on Forms 10-K/A, 10-Q and 8-K and any amendments to those filings as soon as reasonably practicable after electronic filing with the SEC.

Forward-Looking Statements

This Form 10-K/A contains predictions, projections and other statements about the future that are intended to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements, or industry results, to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks, uncertainties and other important factors include, among others, those described under Risk Factors, below. These forward-looking statements speak only as of the date of this Report. We disclaim any obligation or undertaking to disseminate updates or revisions of any expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. IN ASSESSING FORWARD-LOOKING STATEMENTS CONTAINED IN THIS FORM 10-K/A, READERS ARE URGED TO READ CAREFULLY ALL SUCH CAUTIONARY STATEMENTS.

Risk Factors

We Have Experienced Significant Losses and Our Losses May Continue

We have incurred significant net losses in prior periods. These losses were primarily attributable to our former Internet video programming business, which we discontinued in 2001, and to our former disk storage business, which we discontinued in 2000. We no longer operate either of these businesses and we have provided reserves for all known costs of closure.

Our continuing operations include the results of our manufacturing subsidiary, Data Systems, and the results of our corporate patent licensing division. In 2003 we generated operating income but due to Restructuring Charges and Interest Expense recognized in 2003 we reported a net loss. In 2002 and 2001, we reported an operating loss and net loss. Although we have restructured much of our senior debt whereby the amount of interest that we need to pay in cash through 2006 is limited to Available Cash Flow, as defined, we continue to incur substantial interest expense on our indebtedness and this interest, if not paid in cash, is added to the outstanding debt balance which will increase our interest expense in future periods.

Although Data Systems reported operating income and net income in 2002 and 2003, its business is dependent on the funding of government defense programs, which we believe will come under increased pressure in the future. Revenues from our licensing operations in 2003 improved

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

over the prior year and we continue to attempt to negotiate new license agreements for use of our patents in digital camcorders as well as in digital cameras, DVDs and other consumer products not previously licensed by us. Licensing negotiations can take up to several years to conclude and may require us to litigate our position. We cannot predict when, if ever, we will be successful in negotiating further new licensing agreements. Even if we are successful, there can be no assurance that licensing revenues will attain levels comparable to prior years or levels sufficient to repay our debt.

Table of Contents

Accordingly, there is a material risk that we may not continue to be profitable in future periods. See Management's Discussion and Analysis of Financial Condition and Results of Operations, below and the other Risk Factors included in this section.

Risks of Limited Liquidity

We have limited liquidity with which to conduct our operations. Our cash and marketable securities totaled \$14.0 million at December 31, 2003, substantially all of which was generated by Data Systems and is available to be reinvested in that business. Substantially all cash generated by our licensing activities in excess of operating expenses and certain other expenses is to be applied to reduce debt.

While we have recently restructured our senior debt to extend maturities and modify certain covenants that have improved our liquidity, we may be required to use our funds in litigation to enforce our patents. Our Management believes that our liquidity, coupled with our ability to borrow pension contributions from Hillside Capital Incorporated, (Hillside), a member of a group under common control for purposes of the Employee Retirement Income Security Act (ERISA), should be sufficient to satisfy our projected cash obligations through 2004, but there can be no assurance in this regard. If Hillside is unable to fund future pension contributions our financial position could be materially and adversely affected.

We Have Significant Indebtedness, Which May Affect Our Financial Condition

As of December 31, 2003 we had outstanding approximately \$74.0 million of total borrowings, which includes approximately \$61.0 million under our 12% Senior Notes due 2008, \$9.7 million under our 20% Senior Discount Notes due 2006 and \$3.3 million of Hillside Notes. Such indebtedness is secured by liens on a substantial portion of our assets. We may incur additional indebtedness from time to time in the future, subject to certain restrictions imposed by our debt agreements. In March 2004, we received consent from the holders of our senior debt securities (i) to extend the maturity date of our Senior Discount Notes from January 5, 2005 to January 5, 2006, (ii) to extend the measurement date from December 31, 2004 to December 31, 2006, by which we are required to generate at least \$30 million of Available Cash Flow, as defined in the Senior Note indenture, and (iii) to defer scheduled principal repayments on our pension notes through December 31, 2006. Substantial pension contributions are projected to be required beginning in 2004 and thereafter. Pension contributions totaling \$7.9 million for the Ampex plan and \$2.8 million for the Media plan are projected to be paid in 2004 and significant contributions are projected to be required over the next seven years which may total as high as \$81 million. The determination of our obligation is dependent on our selection of certain assumptions used by actuaries in calculating such amounts as described in Note 16 of the Notes to Consolidated Financial Statements. It is anticipated that such contributions will be funded by Hillside, at least until our Senior Discount Notes and Senior Notes have been repaid. In that event, we would issue additional notes to Hillside in an equivalent amount, which will correspondingly increase the amount of our outstanding debt.

As recently amended, the Senior Notes require that we generate a minimum of \$30 million of Available Cash Flow (as defined) during the five-year period ending December 31, 2006. Through December 31, 2003, we have generated \$4 million of Available Cash Flow. To satisfy this covenant, we will be required to increase our revenues from licensing operations substantially above current levels. If we fail to generate the required revenues or if we default in our other obligations under the relevant loan agreements, the Noteholders would have the right to accelerate the indebtedness and foreclose on their liens, which would materially and adversely affect our financial condition.

Table of Contents

The degree to which we are leveraged could have other important consequences to investors, including the following:

a substantial portion of our cash flow from licensing operations must be dedicated to the payment of principal of and interest on our outstanding indebtedness, and therefore will not be available for other purposes;

recent restructurings of our senior debt and borrowings to fund our pension plan contributions have increased our interest expense and, although we have endeavored to refinance a portion of this debt by entering into a mortgage or sale and leaseback of our Colorado facility in order to lower these costs, to date we have not been successful in these efforts;

our ability to obtain additional financing in the future for working capital needs, capital expenditures, acquisitions and general corporate purposes may be materially limited or impaired by the terms of our existing debt agreements, and even if existing lenders consent to the issuance of new debt, such financing may not be available on terms favorable to us;

we may be more highly leveraged than our competitors, which may place us at a competitive disadvantage;

our leverage may make us more vulnerable to a downturn in our business or the economy in general; and

the financial covenants and other restrictions contained in our indentures and other agreements relating to our indebtedness also restrict our ability to make new investments, dispose of assets or to pay dividends on or repurchase common stock.

We expect that our cash balances and cash flow from operations as well as our ability to borrow pension contributions from Hillside, a former affiliate, will be sufficient to fund anticipated operating expenses, capital expenditures and our debt service requirements as they become due, at least through the end of fiscal 2004. However, we cannot assure you that the amounts available from these sources will be sufficient for such purposes in future periods. Also, we cannot assure you that additional sources of funding will be available if we need them or, if available, will be on satisfactory terms. If we cannot service our indebtedness, we will be forced to adopt alternative strategies. These strategies may include reducing or delaying capital expenditures, selling assets, restructuring or refinancing our indebtedness, or seeking additional equity capital. We cannot give any assurance that any of these strategies will be successful or that they will be permitted under our debt indentures.

Risks Associated With a Decline in U.S. Government Spending

Data Systems' business depends materially on continued U.S. government expenditures on intelligence and defense programs. The loss or significant decline in spending on various imaging and intelligence gathering programs where we are subcontractors to prime government contractors could materially adversely affect our business. U.S. intelligence and defense budgets have experienced declines from time to time in recent years, resulting in program delays, program cancellations and deferral of funding for approved programs. Although several intelligence programs have received government funding which has led to increased sales by Data Systems, we cannot be assured that sales of new systems will continue at these levels. If sales of new systems decline in the future, we may be increasingly dependent upon revenues from the sale of spare parts, service and tape.

Our Royalty Income is Subject to Material Fluctuations

Royalty income has historically fluctuated widely due to a number of factors that we cannot predict, such as the extent to which third parties use our patented technology, the extent to which we must pursue litigation in order to enforce our patents, and the ultimate success of our licensing and litigation activities.

Table of Contents

The cost of patent litigation can be material. Also, a court may rule that our patents are invalid, causing existing licensees to discontinue payments to us. Our royalty income fluctuates significantly from quarter to quarter and from year to year, and we cannot give any assurance as to the level of royalty income that will be realized in future periods.

We cannot assure you that we will be able to develop patentable technology that will generate significant patent royalties in future years to replace patents as they expire. Our expenditures for research and development are less than what we spent in prior years, which are likely to have a long-term adverse effect on our ability to maintain a significant portfolio of patented technologies.

Our Stock Price May be Subject to Continued Volatility and Our Stock Has Been Delisted From the American Stock Exchange

The trading price of our Common Stock has been and can be expected to be subject to significant volatility, reflecting a variety of factors, including:

fluctuations in patent royalty revenues and developments in our patent licensing program;

quarterly fluctuations in operating results;

modifications to our senior debt agreements and other events that affect our liquidity;

announcements of the introduction of new products, technologies or services by us or our competitors;

announcements by us of acquisitions of, or investments in, new businesses or other events;

reports and predictions concerning us by analysts and other members of the media;

the effect of the recent delisting of our shares from the American Stock Exchange;

the effect of the recent issuances of substantial amounts of Common Stock in order to redeem our outstanding shares of Preferred Stock or for other purposes;

the effect of our recent one-for-twenty reverse stock split; and

general economic or market conditions.

The stock market in general, and technology companies in particular, have experienced a high degree of price volatility, which has had a substantial effect on the market prices of many such companies for reasons that often are unrelated or disproportionate to operating performance.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

These broad market and industry fluctuations may adversely affect the price of the Class A Common Stock, regardless of our operating performance.

As described below under Management's Discussion and Analysis of Financial Condition and Results of Operations Common and Preferred Shares, our common stock was removed from listing and registration on the American Stock Exchange in the fourth quarter of 2003. Subsequently, our shares have been quoted on the OTC Bulletin Board, where they were traded prior to listing on the Exchange. The market for our common stock may be adversely affected by this change.

Risks Associated With Acquisition Strategy

We are not currently seeking to make any acquisitions of a controlling interest in new businesses. At present, the terms of our principal debt instruments substantially restrict our ability to make acquisitions or

Table of Contents

investments in new businesses. However, we have made, and may under certain circumstances in the future make, acquisitions of, and/or investments in, other businesses. These entities may be involved in new businesses in which we have not historically been involved. Our unrestricted subsidiary recently invested \$1 million to acquire a minority interest in a private investment limited partnership that has purchased common shares of a British promotional products company. Our CEO, Edward Bramson, acquired shares in this company in concert with the limited partnership and he controls the corporate general partner of the limited partnership. Mr. Bramson has recently been appointed the temporary, non-executive Chairman of the Board of the British company. See Note 14 of Notes to Consolidated Financial Statements elsewhere herein. We may not be able to identify or acquire additional acquisition candidates in the future, or complete any further acquisitions or investments on satisfactory terms.

Acquisitions and investments involve numerous additional risks, including difficulties in the management of operations, services and personnel of the acquired companies, and of integrating acquired companies with us and/or each other's operations. We may also encounter problems in entering markets and businesses in which we have limited or no experience. Acquisitions can also divert Management's attention from other business concerns. We have made and may make additional investments in companies in which we own less than a 100% interest. Such investments involve additional risks, including the risk that we may not be in a position to control the management or policies of such entities, and the risk of potential conflicts with other investors.

Accordingly, there can be no assurance that any acquisitions or investments that we have made, or may make in the future, will result in any return, or as to the timing of any return. All of our acquisitions of Internet companies have been written off during 2000 and 2001. In addition, we elected to discontinue the operations of MicroNet, which we acquired in 1998. It is possible that we could lose all or a substantial portion of any future investments.

Our Operating Results Are Subject to Quarterly Fluctuations

Our sales and results of operations are generally subject to quarterly and annual fluctuations. Various factors affect our operating results, some of which are not within our control, including:

customer ordering patterns;

availability and market acceptance of new products and services;

timing of significant orders and new product announcements;

order cancellations;

receipt of royalty income;

the amount and timing of capital expenditures and other costs relating to our operations;

the availability of critical raw materials and inventory subassembly components from our suppliers; and

general economic and industry conditions.

Results of a given quarter or year may not necessarily be indicative of results to be expected for future periods. In addition, fluctuations in operating results may negatively affect our debt service coverage, or our ability to issue debt or equity securities should we wish to do so, in any given fiscal period. Material fluctuations in our operating results in future periods could have a material adverse effect on the price of the Class A Common Stock.

Table of Contents

Seasonal Customer Ordering Patterns May Affect Our Business

A substantial portion of our backlog at a given time is normally shipped within one or two quarters thereafter. Therefore, sales in any quarter are heavily dependent on orders received in that quarter and the immediately preceding quarter.

We May be Unable to Respond to Rapid Technological Change and the Need to Develop New Products

All the industries and markets, from which we derive or expect to derive revenues, directly or through our licensing program, are characterized by continual technological change and the need to introduce new products, product upgrades and patentable technology. This has required, and will continue to require, that we spend substantial amounts for the research, development and engineering of new products and advances to existing products. We cannot assure you that our existing products, technologies and services will not become obsolete or that any new products, technologies or services will win commercial acceptance. Obsolescence of existing product lines, or inability to develop and introduce new products and services, could have a material adverse effect on our sales and results of operations in the future. The development and introduction of new technologies, products and services are subject to inherent technical and market risks, and there can be no assurance that we will be successful in this regard. Our expenditures for research and development have been declining in recent years, which is likely to have a long-term adverse effect on our ability to maintain a significant portfolio of patented technologies. In addition, further reductions in our research and development programs could adversely affect our ability to remain competitive.

We Encounter Significant Competition in All of Our Businesses

Data Systems encounters significant competition in all the markets for its products and services. Many of its competitors have greater resources and access to capital than us. In the mass data storage market, Data Systems competes with a number of well-established competitors such as IBM Corporation, Storage Technology Corporation, Sony Corporation and ADIC, as well as smaller companies. In addition, other manufacturers of scanning video recorders may seek to enter the mass data storage market in competition with us. In addition, price declines in competitive storage systems, such as magnetic or optical disk drives, can negatively impact sales of Data Systems' tape-based DST products.

In the instrumentation market, Data Systems competes primarily with companies that depend on government contracts for a major portion of their sales in this market, including Calculex, L-3 Communications Corporation and Sypris Solutions, Inc. The number of competitors in this market has decreased in recent years as the level of government spending in many areas has declined.

We Are Dependent on Certain Suppliers

Data Systems purchases certain components from a single domestic or foreign manufacturer. Significant delays in deliveries or defects in such components could adversely affect our manufacturing operations, pending qualification of an alternative supplier. In addition, we produce highly engineered products in relatively small quantities. As a result, our ability to cause suppliers to continue production of certain products on which we depend may be limited. We do not generally enter into long-term raw materials or components supply contracts.

Table of Contents

We Are Subject to Certain Risks Related to Our International Operations

Although we significantly curtailed Data Systems' international operations in prior years, sales to foreign customers (including U.S. export sales) continue to be significant to our results of operations. International operations are subject to a number of special risks, including limitations on repatriation of earnings, restrictive actions by local governments, and nationalization. Additionally, export sales are subject to export regulation and restrictions imposed by U.S. government agencies. Fluctuations in the value of foreign currencies can affect our results of operations. We do not normally seek to mitigate our exposure to exchange rate fluctuations by hedging our foreign currency positions.

We Are Dependent on Certain Key Personnel

We are highly dependent on our Management. Our success depends upon the availability and performance of our executive officers and directors. We have not entered into employment agreements with any of our key employees, and the loss of their services could have a material adverse effect on us. We do not maintain key man life insurance on any of these individuals.

Our Charter Documents and Certain of Our Governing Instruments May Prevent a Takeover

Our Certificate of Incorporation provides for a classified Board of Directors, with members of each class elected for a three-year term. It also provides for nullification of voting rights of certain foreign stockholders in certain circumstances involving possible violations of security regulations of the United States Department of Defense.

The indenture governing our outstanding Senior Notes requires us to offer to repurchase the Senior Notes at a purchase price equal to 101% of the outstanding principal amount thereof together with accrued and unpaid interest in the event of a change of control. Under the indenture, a change of control includes the following events: a person or group of people acting together acquires 50% or more of our outstanding voting stock; or the transfer of substantially all of our assets to any such person or group, other than to certain of our subsidiaries and affiliates.

The Note Purchase Agreement governing our outstanding Senior Discount Notes requires us to repay such notes in full upon the occurrence of a change of control. Under the agreement, a change of control includes, among other things: any person or group becomes the beneficial owner of more than 50% of our outstanding voting stock, or any merger or consolidation of Ampex with or into any other entity. The agreement also requires us to repay the notes if we sell Data Systems or sell its Colorado Springs, CO manufacturing facility.

These provisions could have anti-takeover effects by making an acquisition of us by a third party more difficult or expensive in certain circumstances.

We do not Expect to Pay Dividends on Our Common Stock

We have not declared dividends on our Common Stock since our incorporation in 1992 and we have no present intention of paying dividends on our Common Stock. We are also restricted by the terms of certain debt and other agreements as to the declaration of dividends.

We Are Dependent on Licensed Patents and Proprietary Technology

Our success depends, in part, upon our ability to establish and maintain the proprietary nature of our technology through the patent process. There can be no assurance that one or more of our patents will not be successfully challenged, invalidated or circumvented or that we will otherwise be able to rely on such patents for any reason. In addition, our competitors, many of whom have substantial resources and have made substantial investments in competing technologies, may seek to apply for and obtain patents that restrict our

Table of Contents

ability to make, use and sell our products either in the United States or in foreign markets. If any of our patents are successfully challenged, invalidated or circumvented or our right or ability to manufacture our products becomes restricted, our ability to continue to manufacture and market our products could be adversely affected, which would likely have a material adverse effect upon our business, financial condition and results of operations.

Litigation may be necessary to enforce our patents, to protect trade secrets or know-how owned by us or to determine the enforceability, scope and validity of the proprietary rights of others. Any litigation or interference proceedings brought against, initiated by, or otherwise involving us, may require us to incur substantial legal and other fees and expenses and may require some of our employees to devote all or a substantial portion of their time to the prosecution or defense of such litigation or proceedings.

We Are Subject to Environmental Regulation and Our Business Could be Negatively Affected by the Costs of Compliance

Our facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. We have been named from time to time as a potentially responsible party by the United States Environmental Protection Agency with respect to contaminated sites that have been designated as Superfund sites, and are currently engaged in various environmental investigation, remediation and/or monitoring activities at several sites located off our facilities. There can be no assurance we will not ultimately incur a liability in excess of amounts currently reserved for pending environmental matters, or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on us in the future.

Products

All of our products are manufactured by Data Systems and are comprised of very high performance mass data storage and instrumentation products. Our mass data storage products consist of DST and DIS series 19-millimeter scanning recorders and robotic library systems, and related tape and after-market parts. Our data acquisition and instrumentation products consist of DCRsi digital instrumentation recorders, related tape and after-market parts and the recently introduced disk and solid-state memory based airborne instrumentation recorders. Data Systems also continues to offer spare parts to repair professional video recorders and other products that it previously manufactured and marketed to the television production and post-production industries. However, sales of spare parts of legacy television products accounted for less than 10% of net sales in all periods reported herein. For information concerning net sales for each product group comprising in excess of 10% of net sales and other information relating to our operating segments, see Management's Discussion and Analysis of Financial Condition and Results of Operations.

19-millimeter Products. We entered the high-performance mass data storage market with our DST series of 19-millimeter data storage products, including tape drives and robotic library systems. With the introduction of our Quad Density product line, the DST series is in its third generation. Based on our own evaluation and that of outside sources, we believe that our DST and DIS mass data storage products offer a price/performance advantage over alternative magnetic, optical, solid-state or disk-based storage systems now available, providing fast data access times, rapid data transfer rates and low cost per megabyte of storage.

Access time is one of the most important sustainable advantages of DST products compared to alternative tape-based storage systems. Other tape-based storage products achieve low-cost storage but trade off accessibility; since the data stored is not available for most online or near-online applications,

Table of Contents

such systems are generally limited to backup and archival storage applications. DST products, in contrast, combine low storage cost per megabyte with fast access to rapidly transferable information. DST products use software logic that enables a library or even a single tape drive to organize information using partitions, much as disk drives do. Individual segments can then be accessed quickly and updated independently. This proprietary technology gives DST products the performance of a digital tape drive and the efficiency and access speed of partitioned memory. DST systems also provide rapid data transfer rates that exceed the speed of other mass storage products such as optical disks, allowing a user to download stored information to a computer at a sustained rate of 15 megabytes per second (MB/sec), with an option available to increase to a rate of 20MB/sec without utilizing compression.

DST and DIS tape drives use core technology developed by us for our digital video recorders. The drives use high-density metal particle tape cartridges, which are available in a range of sizes providing storage capacities from 100 to 660GB per cartridge in quad-density format. DST automated library systems incorporate multiple tape cartridges and tape drives and provide from 1.2 to 12.8 terabytes (TB) of storage capacity while occupying only a fraction of the floor space required by competing storage systems. As each of the three generations of the product line was introduced, we provided for the ability to upgrade to the new format. Expansion modules can expand the DST library storage capacities up to approximately 100 terabytes.

Our quad-density DST product line currently includes the DST 314 tape drive, the DST 414 automated cartridge library, the DST 714, DST 814 and DST 914 automated library system. The DST 314 is a single cartridge tape drive that provides rapid backup/restore applications for large databases or disk arrays. The DST 314 is capable of accepting 100GB, 300GB and 660GB cartridges. The DST 414 automated cartridge library is an entry-level library with a storage capacity of up to 4.8TB in less than eight square feet of floor space. The DST 714 automated library is designed to combine one or two tape drives, and features a storage capacity of 12.8TB. This automated tape library product was designed to fill the gap between our DST 414 and DST 814 products. The DST 814 library system is designed to combine from one to four tape drives and is optimized for large file size applications and, accordingly, is suited for image-based document storage, medical records, news archives, oil and gas seismic data and CAD/CAM image data, as well as potential video-on-demand applications. Our DST 914 medium cartridge library has a higher storage capacity per square ft. of floor space than our other models. These products can deliver a sustained rate of 15MB/sec across a SCSI-2 interface, search speeds of up to 1600MB/sec, average access time of less than 16 seconds and capacity of up to 660GB on a single cartridge. We also offer expansion modules for the DST 714 and DST 814 products, which permit additional storage capacity for those products.

Although we believe that our DST drives and library systems offer significant advantages over competitive systems, these products incorporate a proprietary magnetic tape format that is not compatible with current industry standard formats. We have not licensed our tape format to other manufacturers and, as such, we are the sole source of these products. In addition, other factors relating to the markets for these products and to competition in these markets may affect future sales of DST products. See *Markets*, *Distribution and Customers*, *Competition*, and *New Product Development and Industry Conditions*.

Our 19-millimeter tape-based instrumentation products currently are the DIS 124i and DIS 164i instrumentation/data recorders and the DIS 224i automated instrumentation/data library. Our DIS products are designed for mass storage of instrumentation data. These recorders use the same 19-mm helical scan recording technology used in our DST products. Data from DIS recorders can also be stored on DST cartridges, placed in DST libraries and accessed using DST tape drives, so that all the benefits of DST mass storage products are available, including rapid, random access to the data for subsequent processing. The DIS 124i and 164i drives have capacities of 100, 300 or 660GB (depending on the DST cartridge used) and record/reproduce rates of 120 megabits (Mb) and 160Mb per second, respectively.

Data Acquisition/Instrumentation Products. We have been well established for a number of years as a supplier of instrumentation recorders. We have supplied these recorders primarily to government agencies for use in data collection, satellite surveillance and defense-related applications, as well as to defense contractors and aerospace and other industrial users primarily for test and measurement purposes.

Table of Contents

Our instrumentation recorders have been used on almost every advanced commercial and U.S. military aircraft, as well as on many foreign aircraft. We believe they are well suited to these demanding aeronautical application and other applications involving comparable data-gathering challenges in extreme environments, because of their performance and reliability.

Our principal data acquisition/instrumentation products currently are the DCRsi 240, DCRsi 120 and DCRsi 75 digital instrumentation recorders. The DCRsi recorders are rugged, highly-reliable and compact recorders that permit uninterrupted data capture over very long periods of time, such as during test flights of new aircraft. The DCRsi 240 instrumentation recorder has the capability of storing 48GB of data at a record/reproduce rate of up to 240 megabits (Mb) per second. The DCRsi 120 instrumentation recorder has a similar storage capacity and a record/reproduce rate of 120Mb per second. The DCRsi 75 recorder is our lowest cost DCRsi model with a record-reproduce rate of 75Mb per second.

We recently started selling the DDRs 400, a new generation of airborne instrumentation recorders utilizing hard disks rather than tape. The data and control interface is fully compatible with the DCRsi product line. The recorder is smaller, lighter, consumes less power, and has a higher data rate and larger storage capacity than the previous generation of tape-based recorders. We initially shipped units to customers for evaluation and testing in 2001 and subsequently began shipping production units in 2002. In development is a solid-state version of the DDRs 400, which will operate in harsh environment conditions.

Significant portions of data acquisition and instrumentation recorder sales reflect purchases by prime contractors to the federal government, which can be subject to significant fluctuations. See **Markets**. In addition, other factors relating to the markets for our instrumentation products and to competition in these markets may affect future sales of these products. See **Distribution and Customers**, **Competition**, and **New Product Development and Industry Conditions**.

Data Systems other products are primarily television after-market products (including spare parts) relating to television products that we manufactured in prior periods and continue to support.

Markets

Digital Archives and Mass Storage Libraries. Our 19-millimeter mass storage tape drives and library systems are optimized for applications that must handle large amounts of data, such as those that process and store images, digital video and streaming data. Our markets are presently:

1. Government intelligence gathering and archiving. In recent years, our products were selected for use in certain large government programs that required delivery of new systems over several years. We have significant market share in government directed streaming data applications, such as satellite telemetry and airborne intelligence gathering. Sales of service, spare parts and tape have been an important component of our total revenues, and we project that they will represent an increasing percentage of future total revenues as new system sales decline.
2. Broadcast digital video and cable companies for long-term archival requirements. Our digital video archive systems have become the industry standard due to their high performance and reliability, with installations at Viacom/CBS, Fox Broadcasting, USA Networks and Public Broadcasting Stations. The decline in advertising spending has caused this market to defer capital spending, including plans to purchase digital archives from us and our competitors.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

3. Oil and gas seismic archives with a customer base that includes Exxon/Mobil, Shell and Chevron/Texaco.

We believe that the emergence of applications that transmit video, graphics and other images over the Internet or private networks may create new markets for our data storage products. Our Management

Table of Contents

realizes that these applications will require bandwidth improvements to current information delivery systems before the information storage systems offered by us and others will be required. As these technical obstacles are overcome and commercial markets ultimately develop, we believe that we will experience aggressive competition from other companies, and there can be no assurance that we will be able to remain competitive against products ultimately offered by such companies.

Data Acquisition/Instrumentation Recorders. Data Systems DCRsi recording drives and magnetic media are designed to acquire large volumes of data in stressful physical environments, and are used extensively in airborne and naval intelligence acquisition and for the collection of test data during the design and qualification of aircraft. DCRsi products are used by U.S. and foreign military and intelligence agencies (including those of Germany, Japan and the United Kingdom), as well as by manufacturers of commercial airplanes, such as Boeing Corporation, and by Airbus, the consortium of European airframe manufacturers. A significant portion of DCRsi products are also sold in versions that are intended for use in ground facilities for the long-term storage or analysis of data previously collected in mobile environments.

The storage capacity and data transfer rates of our DCRsi products can be varied continuously from fractions of a megabit per second up to 240 megabits per second on its highest performance versions. These products perform in conditions of extreme shock and vibration, variations in gravitational force and temperature, humidity and electronic interference, such as those found in aircraft, helicopters and space vehicles. These products are designed for data interchange between locations and agencies. In ground-based applications, which generally are less harsh environments that do not require the ruggedness of a DCRsi recorder, our 19-millimeter DST and DIS mass data storage products can also perform the storage and analysis functions of DCRsi products.

The U.S and foreign government agencies continue to be the primary market for our DCRsi products. Sales to government agencies are subject to fluctuation as a result of changes in government spending programs (including defense programs) and could be adversely affected by pressure on government agencies to reduce spending. Any material decline in the current level of government purchases of our products could have a material adverse effect on us.

Distribution and Customers

We currently distribute our 19-millimeter products (including DST and DIS recorders) directly through our internal sales force, as well as through independent value-added resellers. Our DST products are sold to customers such as oil and gas companies, imaging companies, information and entertainment delivery companies, broadband telecommunications companies and government entities.

Our instrumentation recorders (including our DIS recorders) are sold primarily to prime contractors who in turn sell to government agencies involved in data collection, satellite surveillance and defense-related activities, as well as to defense contractors and other industrial users for testing and measurement purposes. Sales of instrumentation recorders are made through our internal domestic and international sales forces, as well as through independent sales organizations in foreign markets.

We currently operate a total of six sales offices, including four in the U.S., one in Japan and one in the United Kingdom.

Our sales to U.S. government agencies (either directly or indirectly through government contractors) represented approximately 72% of U.S. sales in fiscal 2003 compared to 63% in fiscal 2002 and 52% in fiscal 2001. Products sold for U.S. government use include primarily instrumentation recording systems. Sales to government customers are subject to customary contractual provisions permitting termination at the

government's election. See Markets.

Table of Contents

In 2003, one customer, BAE, accounted for 14.4% of total revenue. In 2002, two customers, Lockheed Martin and ADIC, each individually accounted for more than 10% of total revenue and collectively accounted for 28.0% of total revenue. In 2001, one customer accounted for 14.1% of total revenue.

Research, Development and Engineering

Scanning recording systems such as those developed by us involve extremely complex technology. As a result, we have developed extensive expertise in a wide area of technical disciplines and have developed fundamental innovations in digital image processing, magnetic recording technology and channel electronics. In 2003, we spent approximately 7.3% of total revenue for research and development programs and engineering costs, compared to 7.1% in 2002 and 11.9% in 2001. The percentage of research, development and engineering expense to total revenues has declined from the 2001 level in response to declining product sales during the period. Future research, development and engineering spending may need to be reduced if Data Systems were to experience further declines in product sales. See Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 2 of Notes to Consolidated Financial Statements. In prior years, we designed and manufactured a wide range of professional television products, and we patented many of our innovations. While we exited those markets several years ago, many patents covering innovations in the field remain in force. These technologies form the foundation of our digital patent portfolio that we are seeking to exploit with new licensing agreements covering digital cameras, DVD players and recorders, and hard disk recorders. In recent years, with respect to current products, we have allocated a major portion of our research and development budget to the 19-millimeter digital recording technology including the introduction of double and then quad-density recorders and expansion modules for our DST and DIS products and to sustaining engineering on all of our product lines. We will continue our sustaining engineering processes and, with available funds, develop lower cost versions of our data acquisition and instrumentation products, such as the recently developed DDRs disk-based recorder, and to improve the ability of these products to interface with other companies' products. See Products, Mass Data Storage and Instrumentation above. We will also continue researching other new product opportunities that capitalize on our expertise and patented technology in digital image processing, magnetic recording and channel electronics. All of our research, development and engineering efforts are subject to certain risks and uncertainties described below under New Product Development and Industry Conditions, and there can be no assurance that any of these efforts will be technologically or commercially successful.

Patents, Licenses and Trademarks

As a result of our ongoing research and development expenditures, we have developed substantial proprietary technology, certain of which we have elected to patent or to seek to patent. As of December 31, 2003, we held over 600 patents and patent applications, including approximately 230 patents in the U.S., approximately 400 corresponding patents in other countries, and approximately 60 U.S. and foreign patent applications pending. The majority of these patents and pending patents relate to our recording technology. We continually review our patent portfolio and allow non-strategic patents to lapse, thereby minimizing substantial renewal fees.

We have granted numerous royalty-bearing patent licenses to, and hold patent licenses from, third parties. Certain of our patented innovations have been adopted for use in mass-market consumer products, and as a result, we receive the majority of our licensing royalties from foreign manufacturers of analog and digital video tape recorders. Several of our patents covering analog VCRs expired in 2003. Late in 2001, we entered into an agreement with a major Japanese manufacturer of digital camcorders to license our intellectual property, which resulted in payments on prior period shipments of products amounting to \$3 million. In June 2003, we entered into agreements with two major Japanese companies authorizing their use of our patents in the manufacture of video tape recorders, including digital camcorders, which resulted in payments on prior period shipments of products amounting to \$5.4 million. Ongoing royalty income and payments are calculated as a percentage of the sales price on product sales on all agreements. We have

Table of Contents

contacted other unlicensed manufacturers of digital camcorders and have initiated licensing discussions with them. There can be no assurance that such licensing efforts (including any necessary litigation) will be successful.

We also believe that we have patents that are used in the manufacture of digital still cameras, DVD players and recorders, hard disk recorders and other consumer electronic products. We have begun to offer licenses to major manufacturers of these products and have begun discussions with some of these manufacturers regarding the possible licensing of our patents for these products. We will continue to evaluate additional products as potential licensing opportunities to the extent that our technical and financial resources permit. We have not granted any licenses under our scanning recorder patents specifically for data storage applications, but we may do so in the future if we determine that this would support our marketing strategy.

It is not possible to predict the amount of royalty income that will be received in the future. Royalty income has historically fluctuated widely due to a number of factors that we cannot predict, such as the extent of use of our patented technology by third parties, the extent to which we must pursue litigation in order to enforce our patents, and the ultimate success of our licensing and litigation activities. Moreover, there can be no assurance that we will continue to develop patentable technology that will generate significant patent royalties in future years.

U.S. patents are, at present, in force for a period of 20 years from the date of application and patents granted by foreign jurisdictions are generally in force for between 14 years to 20 years from the date of application. We have obtained our present patents over the course of the past 20 years and, accordingly, have patents in force that will expire from time to time over the next 20 years. Patents are important to our current overall business, both as a source of protection of the proprietary technology used in our current products, and as a source of royalty income. While results of operations would be adversely affected by the loss of patents that generate significant royalty income, Management believes that none of our current product lines is materially dependent upon a single patent or license or group of related patents or licenses, and that timely introduction of products incorporating new technologies or particularly suited to meet the needs of a specific market or customer group is a more important determinant of the success of our current business. Nevertheless, there can be no assurance that we will continue to develop patentable technology that will be able to generate significant patent royalties in future years to replace patents as they expire. See Research, Development and Engineering.

In 2003, three licensees each individually accounted for more than 10% of total revenue and collectively accounted for 99% of total revenue. In 2001, one licensee accounted for 10.7% of total revenue. There were no licensees who accounted for more than 10% of the total revenue in 2002.

We regard our trademark Ampex and our logo as valuable to our businesses. We have registered our trademark and logo in the U.S. and a number of foreign countries. U.S. trademark registrations are generally valid for an initial term of 10 years and renewable for subsequent 10-year periods. We have not granted any material rights to use our name or logo to any other third party.

Our trademarks used in this report include Ampex, DST, DCRsi and DIS, all of which are trademarks of Ampex Corporation. All other trademarks and service marks used in this report are the property of Ampex or their respective owners.

Manufacturing

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Our products are manufactured at our facilities in Redwood City, California and Colorado Springs, Colorado. Products are designed and engineered primarily in Redwood City. Because our mass data storage products incorporate many of the technologies and components of our 19-mm-based videotape recorders, the manufacturing process of the mass data storage products has benefited from the existing video recorder production facilities and techniques.

Table of Contents

We believe that our Colorado Springs, CO manufacturing facility is larger than required or projected to be required to accommodate business growth in the foreseeable future. Accordingly, we are seeking a tenant to lease up to 150,000 square feet of presently underutilized space.

We maintain insurance, including business interruption insurance that Management considers adequate and customary under the circumstances. However, there is no assurance that we will not incur losses beyond the limits of, or outside the coverage of, our current insurance.

Sources of Supply

We use a broad variety of raw materials and components in our manufacturing operations. While most materials are readily available from numerous sources, we purchase certain components, such as customized integrated circuits and flexible magnetic media, from a single domestic or foreign manufacturer. Significant delays in deliveries of, or defects in the supply of, such components could adversely affect our manufacturing operations pending qualification of an alternative supplier. In addition, we produce highly engineered products in relatively small quantities. As a result, our ability to cause suppliers to continue production of certain products on which we may depend may be limited. We do not generally enter into long-term raw material supply contracts. In addition, many of the components of our products are designed, developed and manufactured by us, and thus are not readily available from alternative sources.

Fluctuations in Operating Results; Seasonality and Backlog

Our sales and results of operations are generally subject to quarterly and annual fluctuations. Factors affecting operating results include: customer ordering patterns; availability and market acceptance of new products; timing of significant orders and new product announcements; order cancellations; receipt of royalty income; and numerous other factors. Our revenues are typically dependent upon receipt of a limited number of customer orders involving relatively large dollar volumes in any given fiscal period, increasing the potential volatility of our sales revenues from quarter to quarter. In addition, sales to government customers (primarily sales of DCRsi instrumentation products) are subject to fluctuations as a result of changes in government spending programs, which can materially affect our gross margin as well as our sales.

A substantial portion of our backlog at a given time is normally shipped within one or two quarters thereafter. Therefore, sales in any quarter are heavily dependent on orders received in that quarter and the immediately preceding quarter. Our backlog of firm orders at December 31, 2003 was \$10.7 million, compared to \$4.7 million at December 31, 2002 and \$4.6 million at December 31, 2001. We do not generally include foreign orders in backlog until we have obtained requisite export licenses and other documentation. Orders may be subject to cancellation in the event shipments are delayed. For all of the foregoing reasons, results of a given quarter are not necessarily indicative of results to be expected for a fiscal year.

Competition

We encounter significant competition in all our product markets. Although our competitors vary from product to product, many are significantly larger companies with greater financial resources, broader product lines and other competitive advantages.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

We compete in the mass data storage market with a number of well-established competitors, such as IBM Corporation, Storage Technology Corporation, Sony Corporation and ADIC as well as smaller companies. In addition, other manufacturers of scanning video recorders may seek to enter the mass data storage market in competition with us. In the mass data storage market, we believe that the principal competitive factors are product performance, cost of equipment and media, product reliability and availability of service and support. We believe our strongest competitive advantage is in the area of

Table of Contents

product performance. However, DST products are relatively expensive in comparison to other competitive products, and are generally cost effective only if the customer requires the high level of performance and storage capacity of DST products. While we are working to reduce the cost of our DST products, the prices of other storage systems, such as disk drives, are also declining. In addition, although DST products offer faster data access times than competing tape-based library systems, magnetic disks deliver faster data access than DST products. There can be no assurance that we can compete successfully on a long-term basis in the mass data storage market.

In the instrumentation market, we compete primarily with companies that depend on government contracts for a major portion of their sales in this market, including Sony Corporation, L-3 Communications Corporation, Calculex and Sypris Solutions, Inc. The number of competitors in this market has decreased in recent years as the level of government spending in many areas has declined. The principal competitive factors in this market are cost, product reliability, product performance and the ability to satisfy applicable government procurement requirements.

New Product Development and Industry Conditions

The data storage and instrumentation industries are characterized by continual technological change and the need to introduce new products and product upgrades. This requires a high level of expenditure for research and development. Obsolescence of existing product lines, or the inability to develop and introduce new products, could have a material adverse effect on sales and results of operations. Although we have completed development of our third-generation mass data storage drives and robotic library systems, we must continue to invest in research and development programs to improve these products and develop new products. We have reduced amounts invested in research, development and engineering in recent years. If this trend continues, our ability to remain competitive will be affected. No assurance can be given that existing products will not become obsolete, that any new products will win commercial acceptance or that our new products or technology will be competitive. See Competition. Furthermore, the introduction of new products or technologies can be hampered by technical problems in design, manufacturing and test procedures or the occurrence of other unforeseen events.

Sales of our instrumentation products can be significantly affected by changes in government spending levels. See Markets and Management's Discussion and Analysis of Financial Condition and Results of Operations.

International Operations

Substantially all of our licensing income is derived from foreign customers. Sales of products to foreign customers accounted for approximately 13.5% of product and service revenue in fiscal 2003, compared to 15.6% in fiscal 2002 and 19.6% in 2001. Foreign marketing operations are conducted primarily through local distributors and agents, with support from our internal marketing and sales organization. See Distribution and Customers.

Foreign operations are subject to the usual risk attendant upon investments in foreign countries, including limitations on repatriation of earnings, restrictive actions by local governments, fluctuation in foreign currency exchange rates and nationalization. Additionally, export sales are subject to export regulations and restrictions imposed by the U.S. Department of State and the U.S. Department of Commerce.

In certain prior periods, declines in the value of the U.S. dollar in relation to certain foreign currencies have favorably affected our international operations, and in other periods the strength of the dollar relative to such currencies has adversely affected our operations. Fluctuations in the value of international currencies can be expected to continue to affect our operations in the future, although the impact will be less significant

than it was in periods with a higher proportion of sales in foreign currencies. We currently do not hedge our assets that are denominated in foreign currencies. U.S. export sales are denominated in U.S. dollars.

Table of Contents

See Note 21 of Notes to Consolidated Financial Statements for additional information concerning our foreign operations.

Environmental Regulation and Proceedings

Our facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. We are also subject to the federal Occupational Safety and Health Act and other laws and regulations affecting the safety and health of employees in its facilities. Management believes that we are generally in compliance in all material respects with all applicable environmental and occupational safety laws and regulations or have plans to bring operations into compliance. Management does not anticipate that capital expenditures for pollution control equipment for fiscal 2004 or 2005 will be material.

Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. We are engaged in a total of seven environmental investigations, remediation and/or monitoring activities at sites located off our facilities, including the removal of solvent contamination from subsurface aquifers at a site in Sunnyvale, California. Some of these activities involve the participation of state and local government agencies. We have been named as a potentially responsible party by the United States Environmental Protection Agency with respect to five contaminated sites that have been designated as Superfund sites on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 1980. Five sites (including four Superfund sites) are associated with the operations of subsidiaries (Media) formerly owned by us. Although we sold Media in November 1995, we may have continuing liability with respect to environmental contamination at these sites if Media fails to discharge its responsibilities with respect to such sites. In October 2003, the California Regional Water Quality Control Board issued us a letter, which rescinds continued cleanup requirements for the Sunnyvale, California site, allowing us to shut down and remove all remediation equipment and substantially reduce any further obligation. During 2003, we spent a total of approximately \$0.1 million in connection with environmental investigation, remediation and monitoring activities and we expect to spend a similar amount in fiscal 2004 for such activities.

Because of the inherent uncertainty as to various aspects of environmental matters, including the extent of environmental damage, the most desirable remediation techniques and the time period during which cleanup costs may be incurred, it is not possible for us to estimate with any degree of certainty the ultimate costs that we may incur with respect to the currently pending environmental matters referred to above. Nevertheless, at December 31, 2003, we had an accrued liability of \$0.4 million for pending environmental liabilities associated with certain sites currently owned or leased by us. We have not accrued any liability for contingent liabilities we may incur with respect to the former Media sites discussed above. Based on facts currently known to Management, they believe it is only remotely likely that our liability in connection with such pending matters, either individually or in the aggregate, will be material to our financial condition or results of operations or material to investors.

While we believe that we are generally in compliance with all applicable environmental laws and regulations or have plans to bring operations into compliance, it is possible that we will be named as a potentially responsible party in the future with respect to additional Superfund or other sites. Furthermore, because we conduct our business in foreign countries as well as in the U.S., it is not possible to predict the effect that future domestic or foreign regulation could have on our business, operating results or cash flow. There can be no assurance that we will not ultimately incur liability in excess of amounts currently reserved for pending environmental matters, or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on us in the future.

Table of Contents

Employees

As of December 31, 2003, in our continuing operations we employed 145 people worldwide, compared to 145 at December 31, 2002 and 156 at December 31, 2001. Approximately 9% of our current worldwide workforce is employed in our international operations, compared to 10% at December 31, 2002 and 12% at December 31, 2001. No employees are covered by any collective bargaining agreement. We are dependent on the performance of certain key members of Management and key technical personnel. We have not entered into employment agreements with any such individuals. Edward J. Bramson, who has served as our Chief Executive Officer since 1991, is also engaged in the management of certain companies affiliated with Sherborne Holdings Incorporated, a privately-owned Delaware holding company and a Company stockholder. Mr. Bramson has recently been appointed the temporary, non-executive Chairman of the Board of a British promotional product company. See Note 14 of Notes to Consolidated Financial Statements elsewhere herein. Mr. Bramson currently devotes most of his time to the management of Ampex. The loss of the services of Mr. Bramson or other key individuals could have a material adverse effect on us.

Pension Plan Matters, restated

In 1994, Ampex, the Pension Benefit Guaranty Corporation (the "PBGC"), certain affiliates, including Hillside Capital Incorporated ("Hillside"), who were members of a group under common control for purposes of the Employee Retirement Income Security Act ("ERISA"), entered into certain agreements in connection with the liquidation of our former parent, NH Holding Incorporated ("NHI"), relating to our pension plans and those of our former Media subsidiaries, which are substantially underfunded. See Note 16 of Notes to Consolidated Financial Statements. Pursuant to these agreements, Hillside is obligated to fund pension contributions in the event we or Media are unable to do so.

The 1995 sale agreement for Media required the buyer, Quantegy Corporation, to pay directly or to reimburse Ampex for required contributions to the Media pension plan. However, we remained the Plan Sponsor of the Media pension plan and obligated to make pension contributions to that plan. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to us in settlement of future pension contributions that may be required under the former Media subsidiaries pension plan ("Media Plan") that would be funded by us. During 2003, 2002 and 2001 Media paid directly or reimbursed Ampex for pension contributions made on Media's behalf of \$0.8 million, \$1.0 million and \$1.3 million, respectively. Payments made by Media either as direct contributions or as reimbursement of amounts paid by Ampex on behalf of Media are recognized as an offset to actuarially computed pension costs. At December 31, 2003, both the Ampex pension plan and the Media pension plan remain underfunded. Unfunded accumulated plan benefits in excess of plan assets totaled \$58.5 million under the Ampex Plan and \$19.1 million under the Media plan. Plan contributions are scheduled to be paid over the next seven years.

At our request, Hillside has made pension contributions totaling \$4.0 million through December 31, 2003. We have issued Notes to Hillside in the amount of the pension contributions. We anticipate that due to our senior debt agreements, Hillside will be required to fund future contributions and such amounts are projected to be significant. In this event, we will issue additional Notes to Hillside. Under the terms of the Notes, \$150,000 is due on the first anniversary of the Notes with the remainder due on the fourth anniversary of the Notes. Pursuant to amendments to our senior debt agreements, all principal payments on the Hillside Notes will be deferred until after December 31, 2006 with earlier repayment in the event that the Senior Discount Notes and Senior Notes have been repaid in full. The Hillside Notes provides for interest paid quarterly at 1 percent plus 175% of the applicable mid-term Federal rate (effective rate of 7.11% at December 31, 2003). We have granted to Hillside a security interest in Data Systems' inventory and other assets as collateral for advances, which it is required to make pursuant to the agreement. The agreement contains certain restrictive covenants which, among other things, restrict our ability to declare dividends, sell all or substantially all our assets or commence liquidation, or engage in specified

Table of Contents

transactions with certain related parties, breach of which could result in acceleration of our potential termination liabilities. In 1994, we discontinued accrual of benefits under the pension plans, but have continued to fund our plan in accordance with ERISA.

ITEM 2. PROPERTIES

As of December 31, 2003, our principal properties were as follows:

<u>Location</u>	<u>Activities Conducted</u>	<u>Approximate Square Footage of Facility</u>
Redwood City, California	RD&E, manufacturing, sales and licensing (1)	91,760
New York City, NY	Executive offices (2)	19,000
Colorado Springs, Colorado	Manufacturing (3)	229,961
Chineham, Basingstoke, England	Sales and service (4)	3,283
Tokyo, Japan	Sales and service (5)	3,886

- (1) We are attempting to sublet 60,000 square feet representing a two-story building that we no longer occupy. The lease term extends to September 2008.
- (2) This facility lease terminates in April 2008.
- (3) This property is subject to a deed of trust securing Senior Discount Notes issued by Data Systems in November 2000. The facility is underutilized by Data Systems and we are seeking a tenant to lease up to 150,000 square feet of the facility.
- (4) These facilities are leased under a five-year lease. The lease term extends to December 2007.
- (5) These facilities are leased under leases that expire during July 2004. The current plan is to renew the leases on a year-to-year basis.

In addition to the properties and leased facilities listed above, we lease office space and warehouse facilities from time to time at various domestic and foreign locations.

We believe that our current facilities, including machinery and equipment, are generally in good condition, well-maintained and suitable for their intended uses, and that our facilities have, and will continue to have, adequate capacity to accommodate our present needs and business growth for our present products in the foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

We are a party to routine litigation incidental to our business. In the opinion of Management, no such current or pending lawsuits, either individually or in the aggregate, is likely to have a material adverse effect on our financial condition, results of operations or cash flows.

We reached a proposed settlement with the California Franchise Tax Board to settle income tax and interest assessed for the period 1983 to 1985 while we were a subsidiary of The Signal Companies (currently Honeywell International Inc.). In 2003, we adjusted accruals recorded in prior years in the Consolidated Balance Sheets to reflect this proposed settlement as well as other events. The reversal is included in the caption

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Provision for (benefit of) income taxes on the Consolidated Statements of Operations and Comprehensive Income (Loss).

Our facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. We are also subject to the federal Occupational Safety and Health Act and other laws and regulations affecting the safety and health of

Table of Contents

employees in its facilities. Management believes that we are generally in compliance in all material respects with all applicable environmental and occupational safety laws and regulations or have plans to bring operations into compliance. Management does not anticipate that capital expenditures for pollution control equipment for fiscal 2004 or 2005 will be material.

Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. We are engaged in a total of seven environmental investigations, remediation and/or monitoring activities at sites located off our facilities, including the removal of solvent contamination from subsurface aquifers at a site in Sunnyvale, California. Some of these activities involve the participation of state and local government agencies. We have been named as a potentially responsible party by the United States Environmental Protection Agency with respect to five contaminated sites that have been designated as Superfund sites on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 1980. Five sites (including four Superfund sites) are associated with the operations of the Media subsidiaries formerly owned by us. Although we sold Media in November 1995, we may have continuing liability with respect to environmental contamination at these sites if Media fails to discharge its responsibilities with respect to such sites. In October 2003, the California Regional Water Quality Control Board issued us a letter, which rescinds continued cleanup requirements for the Sunnyvale, California site, allowing us to shut down and remove all remediation equipment and substantially reduce any further obligation. During 2003, we spent a total of approximately \$0.1 million in connection with environmental investigation, remediation and monitoring activities and we expect to spend a similar amount in fiscal 2004 for such activities.

Because of the inherent uncertainty as to various aspects of environmental matters, including the extent of environmental damage, the most desirable remediation techniques and the time period during which cleanup costs may be incurred, it is not possible for us to estimate with any degree of certainty the ultimate costs that we may incur with respect to the currently pending environmental matters referred to above. Nevertheless, at December 31, 2003, we had an accrued liability of \$0.4 million for pending environmental liabilities associated with the Sunnyvale site and certain other sites currently owned or leased by us. We have not accrued any liability for contingent liabilities we may incur with respect to former Media sites discussed above. Based on facts currently known to Management, they believe we have no contingent liability in connection with such pending matters, either individually, or in the aggregate, that are material to our financial condition or cash flow or results of operations or material to investors.

While we believe that we are generally in compliance with all applicable environmental laws and regulations or have plans to bring operations into compliance, it is possible that we will be named as a potentially responsible party in the future with respect to additional Superfund or other sites. Furthermore, because we conduct our business in foreign countries as well as in the U.S., it is not possible to predict the effect that future domestic or foreign regulation could have on our business, operating results or cash flow. There can be no assurance that we will not ultimately incur liability in excess of amounts currently reserved for pending environmental matters, or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on us in the future.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

Table of Contents**ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT**

Our executive officers and their ages as of February 1, 2004 are as follows:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Edward J. Bramson	52	Chairman and Chief Executive Officer
Craig L. McKibben	53	Vice President, Chief Financial Officer and Treasurer
Robert L. Atchison	66	Vice President
Joel D. Talcott	62	Vice President and Secretary
Sharon M. Genberg	61	Vice President
Ramon C. Venema	50	Vice President

Each of our executive officers serves in such capacity at the discretion of the Board.

Edward J. Bramson is Chairman of the Board, Chief Executive Officer and a director of the Company. He has been an officer and director of the Company since 1987, and since January 1991 has been our Chief Executive Officer. Mr. Bramson also is President and a Director of AFC Holdings Corporation, a wholly-owned subsidiary of the Company. Mr. Bramson also serves as Chairman and Chief Executive Officer of Sherborne Holdings Incorporated, Sherborne & Company Incorporated, First Jeffson Corporation and Second Jeffson Corporation, and is a limited partner of Newhill Partners, L.P. These entities, which are private investment holding companies, may be deemed to be our affiliates. Mr. Bramson is also a director of Hillside Capital Incorporated, a private industrial holding company with which he has been associated since 1976. Mr. Bramson has recently been appointed the temporary, non-executive Chairman of the Board of a British promotional product company. See Note 14 of Notes to Consolidated Financial Statements elsewhere herein.

Craig L. McKibben is Vice President, Chief Financial Officer, Treasurer and a director of the Company. Mr. McKibben has been an officer and a director of the Company since 1989. Mr. McKibben also serves as Vice President and Treasurer and a director of Ampex Holdings Corporation, as Vice President and Treasurer of AFC Holdings Corporation, as Vice President and Treasurer of Ampex Data Systems Corporation, and as President, Chief Financial Officer and a director of Ampex Finance Corporation, wholly-owned subsidiaries of the Company. He is also Vice President and a director of Sherborne Holdings Incorporated and of Sherborne & Company Incorporated and is a Vice President of First Jeffson Corporation and Second Jeffson Corporation. From 1983 to 1989, he was a partner at the firm of Coopers & Lybrand L.L.P., a predecessor of PricewaterhouseCoopers LLP, independent public accountants.

Robert L. Atchison is Vice President of the Company. Since January 1994 he has been responsible for all our operating activities, and in 1996 assumed responsibility for certain of our sales and marketing activities. From April 1991 to January 1994, he was responsible for our engineering and operations. Mr. Atchison also serves as President and a director of Ampex Data Systems Corporation, Ampex Data International Corporation and Ampex International Sales Corporation, wholly-owned subsidiaries of the Company. He has served as an executive officer of the Company and various subsidiaries since 1987.

Joel D. Talcott is Vice President and Secretary of the Company, positions he has held since 1987. He has served as General Counsel since January 1996, a position he also held from 1987 to January 1994. He is also responsible for our patent licensing activities (having served as Patent Counsel from 1991 to 1987), and has supervisory responsibility for investor relations and corporate communications functions. Mr. Talcott also serves as Chairman of Ampex Data Systems Corporation, as Vice President and Secretary

Table of Contents

and a director of Ampex Data Systems Corporation, Ampex Finance Corporation and Ampex International Sales Corporation, as Vice President and Secretary of Ampex Holdings Corporation, and as Secretary of AFC Holdings Corporation, wholly-owned subsidiaries of the Company.

Sharon M. Genberg is Vice President of the Company, a position she was appointed to in June 2002. She held the position of Director, Human Resources for 10 years prior to her appointment. She is responsible for all employment activity, employee benefit programs, compensation, training and development, facilities, maintenance, telecommunications, safety and security.

Ramon C. Venema is Vice President, Assistant Treasurer and Assistant Secretary of the Company, a position he was appointed to in July 2003. He previously served as Assistant Treasurer of the Company from 1995 to 2001, also serving as a Vice President of the Company during 2001. Mr. Venema also serves as Vice President, Assistant Treasurer and Assistant Secretary of Ampex Data International Corporation, Vice President and Treasurer of Ampex Finance Corporation, Assistant Treasurer and Assistant Secretary of Ampex Holdings Corporation, and Vice President, Treasurer and Chief Financial Officer of Ampex International Sales Corporation, wholly-owned subsidiaries of the Company.

PART II**ITEM 5. MARKET FOR COMPANY'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

From January 16, 1996 to November 21, 2003, our Class A Common Stock was listed on the American Stock Exchange under the symbol AXC. On November 21, 2003, the Class A Common Stock was delisted from AMEX because it did not meet the minimum stockholders' equity requirement. The Class A Common Stock was subsequently listed for quotation on the OTC Bulletin Board under the symbol AEXCA. The OTC Bulletin Board is an interdealer, over-the-counter market, which provides significantly less liquidity than AMEX.

The following table sets forth the high and low prices for the Class A Common Stock for each quarter during fiscal 2003 and 2002. All prices through the third quarter of 2003 and the high price for the fourth quarter of 2003 represent sales prices reported on the AMEX. The low price for the fourth quarter of 2003 represents the low bid as quoted on the OTC Bulletin Board. The OTC Bulletin Board prices reflect interdealer prices, without retail mark-up, mark-down or commissions, and may not necessarily represent actual transactions.

Fiscal Year	High	Low
2003		
First Quarter	\$ 3.40	\$ 1.40
Second Quarter	5.60	1.40
Third Quarter	5.14	2.90
Fourth Quarter	3.05	0.55
2002		
First Quarter	\$ 5.80	\$ 2.40
Second Quarter	3.40	2.00
Third Quarter	2.40	1.20
Fourth Quarter	3.00	1.40

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

As of February 27, 2004, there were 314 holders of record of our Class A Common Stock.

We have not declared any dividends on our Common Stock since our incorporation in 1992 and have no present intention of paying dividends on our Common Stock. We are also restricted by the terms

Table of Contents

of the indentures for the Senior Notes, Senior Discount Notes and certain other agreements as to the declaration of dividends. Under current circumstances, we may not pay any cash dividends on our Common Stock. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources and Notes 10 and 13 of Notes to Consolidated Financial Statements.

The table below provides information relating to our equity compensation plans as of December 31, 2003.

	<u>Number of Shares Issuable Upon Exercise of Outstanding Options</u>	<u>Weighted Average Exercise Price of Outstanding Options</u>	<u>Number of Shares Remaining Available for Future Issuance</u>
Approved by Shareholders	41,921	\$ 24.71	395,693 (1)

(1) This number includes 125,000 shares issuable as stock bonuses or direct stock purchase rights under our 2000 Stock Bonus Plan.

We have two equity compensation plans - our 1992 Stock Incentive Plan and our 2000 Stock Bonus Plan. Both of these plans were approved by our common stockholders, and provide for the issuance of shares of our Class A Common Stock. These plans do not provide for the issuance of any other class of our equity securities. We have no other equity compensation plans or individual compensation arrangements under which additional equity securities may be issued.

During fiscal 2003, we redeemed 12,877 shares of Redeemable Preferred Stock by issuing to the holders 515,040 shares of our Class A Common Stock. No cash or other consideration was paid or received by us, directly or indirectly, in connection with the redemption. The shares of Class A Common Stock were issued in reliance upon the exemption from registration contained in Section 3(a)(9) of the Securities Act of 1933, as amended, for the issuance of securities exchanged by the issuer with its existing security holders exclusively where no commission or other remuneration is paid or given directly or indirectly for soliciting such exchange.

During the fourth quarter of our 2003 fiscal year, there were no purchases of our common stock made by or on behalf of Ampex or any of our affiliated purchasers (as defined in Rule 10b-18(a) of the Exchange Act).

ITEM 6. SELECTED FINANCIAL DATA

This item 6 has been restated to correct the accounting for our obligations under the Media pension plan in accordance with SFAS No. 87, Employers' Accounting for Pensions.

The financial data required by Item 6 is included immediately following Item 15 hereof.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Management's Discussion and Analysis of Financial Condition and Results of Operations set forth in this item 7 has been revised to reflect the restatement of the Company's accounting for the Media pension plan. In addition, the Company updated its disclosure with respect to recently issued accounting standards, critical accounting policies, contractual obligations and retirement benefits.

Restatement of Financial Statements for Correction of Error in Accounting for the Media Pension Plan

We have restated our financial statements in this Form 10-K/A as of December 31, 2003 and 2002 and for each of the three years ended December 31, 2003 to correct the accounting for our obligations under a pension plan of our former magnetic tape manufacturing subsidiary (Media) which we disposed of in 1995.

Table of Contents

The agreement for the sale of Media required the buyer, Quantegy Corporation, to pay directly or to reimburse Ampex for required contributions to the Media pension plan. However, we remained the Plan Sponsor of the Media pension plan and remained obligated to make pension contributions to that Plan.

We had accounted for our obligations under the Media pension plan under SFAS No. 5, *Accounting for Contingencies* since the sale of Media in 1995. However, as a result of communications with the Office of the Chief Accountant of the Securities and Exchange Commission (the SEC), we now believe that we should have accounted for these obligations under the provisions of SFAS No. 87, *Employers' Accounting for Pensions*. In connection with the restatement of the Company's consolidated financial statements for the year ended December 31, 2003, the Company and the Audit Committee have determined that its pension accounting constitutes a material weakness.

Note 1, *Restatement of Previously Issued Financial Statements* to the restated consolidated financial statements discloses the nature of the restatement adjustments and shows the impact of each category of restatement adjustments on net loss from continuing operations, net loss and net income (loss) applicable to common stockholders and related diluted income (loss) per share amounts for each of the three years ended December 31, 2003, and the cumulative impact of the adjustment on the balance sheet at December 31, 2003 and 2002. In addition, Note 1 to the restated consolidated financial statements shows the effects of the adjustment to stockholders' deficit as of January 1, 2001, which adjustment reflects the impact of the restatement on periods prior to 2001. For information on the impact of the restatement on the years 1999 and 2000, reference is made to Item 6, Selected Financial Data, in Part II of this Form 10-K/A.

For a discussion of the Company's accounting for its obligations with respect to a pension plan of its former magnetic tape manufacturing subsidiary reference is made to Note 1 and 16, to the restated consolidated financial statements. The Company revised Note 1 to the restated consolidated financial statements to present the revised accounting policies for certain matters included in the restatement. Other notes to the consolidated financial statements affected by the restatement have also been revised.

The Company did not amend its Annual Reports on Form 10-K or Quarterly Reports on Form 10-Q for periods affected by the restatement that ended prior to December 31, 2002, and the financial statements and related financial information contained in such reports should no longer be relied upon and are superceded by the information in this Form 10-K/A. The Company did not amend its Quarterly Reports on Form 10-Q for periods affected by the restatement for the year ended December 31, 2003, and the financial statements and related financial information contained in such reports should no longer be relied upon and are superceded by the information in this Form 10-K/A.

Critical Accounting Policies and Estimates

Financial Reporting Release No. 60, released by the Securities and Exchange Commission, requires all companies to include a discussion of critical accounting policies or methods used in the preparation of financial statements. Note 2 of the Notes to Consolidated Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements. The following is a brief discussion of the more significant accounting policies and methods used by us. In addition, Financial Reporting Release No. 61 was recently released by the SEC to require all companies to include a discussion to address, among other things, liquidity, off-balance sheet arrangements, contractual obligations and commercial commitments.

General

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The most significant estimates and assumptions relate to the recoverability of receivables and inventories and the adequacy of allowances for returns and doubtful accounts and accruals for contingencies. Actual amounts could differ significantly from these estimates.

Table of Contents

Revenue Recognition

We recognize revenue in accordance with SEC Staff Accounting Bulletin No. 104, *Revenue Recognition* and EITF 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*. Royalty income is recorded when earned and receipt is assured. Revenue on product sales and services are generally recorded when all of the following have occurred (1) an agreement of sale exists; (2) product delivery and acceptance has occurred or services have been rendered; (3) pricing is fixed or determinable; and (4) collection is reasonably assured. Determination of criteria (3) and (4) are based on Management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. Should changes in conditions cause Management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely affected.

Accounts Receivable

We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history and the customer's current credit worthiness, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers and maintain a provision for estimated credit losses based upon our historical experience and any specific customer collection issues that we have identified. While such credit losses have historically been within our expectations and the provisions established, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. Since our accounts receivable are concentrated in a relatively few number of customers, a significant change in the liquidity or financial position of any one of these customers could have a material adverse impact on the collectibility of our accounts receivables and our future operating results.

Inventories

We value our inventory at the lower of the actual cost to purchase and/or manufacture the inventory or the current estimated market value of the inventory. We regularly review inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast of product demand and production requirements for the next twelve months. A significant increase in the demand for our products could result in a short-term increase in the cost of inventory purchases while a significant decrease in demand could result in an increase in the amount of excess inventory quantities on hand. If actual market conditions are less favorable than those projected by Management, additional inventory write-downs may be required. Additionally, our estimates of future product demand may prove to be inaccurate, in which case we may have understated or overstated the provision required for excess and obsolete inventory. If our inventory were determined to be overvalued, we would be required to recognize such costs in our cost of goods sold at the time of such determination. We make every effort to ensure the accuracy of our forecasts of future product demand, any significant unanticipated changes in demand or technological developments could have a significant impact on the value of our inventory and our reported operating results.

Deferred Taxes

We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes.

We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. Since we have reported losses in recent years, we can not determine that it is probable that we will recover our deferred tax assets and accordingly have established a valuation allowance equal to such deferred tax assets.

Table of Contents

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be. For a discussion of current tax matters, see Note 19 of the Notes to Consolidated Financial Statements.

Warranty

Products sold are generally covered by a warranty for periods ranging from 90 days to one year. We accrue a warranty reserve for estimated costs to provide warranty services. Our estimate of costs to service our warranty obligations is based on historical experience and expectation of future conditions. To the extent we experience increased warranty claim activity or increased costs associated with servicing those claims, our warranty accrual will increase resulting in decreased gross profit.

Pension and Other Postretirement Benefits

The determination of our obligation and expense for pension and other postretirement benefits is dependent on our selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in Note 16 to the consolidated financial statements and include, among others, the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants. Certain of these assumptions are dependent on proposed legislation. In accordance with generally accepted accounting principles, actual results that differ from our assumptions are accumulated and amortized over future periods and therefore, generally affect our recognized expense and recorded obligation in such future periods. While we believe that our assumptions are appropriate, significant differences in our actual experience or significant changes in our assumptions may materially affect our pension and other postretirement obligations and our future expense. Our domestic employees participate in a qualified noncontributory defined benefit pension plan. In early 1994, we amended the plan to terminate benefit service and compensation credit accruals as of February 1, 1994.

In 1995, we sold our magnetic tape manufacturing subsidiary, Media. The sale agreement required the buyer, Quantegy Corporation, to pay directly or to reimburse Ampex for required contributions to the Media pension plan. However, we remained the Plan Sponsor of the Media pension plan and obligated to make pension contributions to that plan. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to us in settlement of future pension contributions that may be required under the Media Plan that would be funded by us. Payments made by Media either as direct pension contributions or as reimbursement of amounts paid by Ampex on behalf of Media are recognized as an offset to actuarially computed pension costs. The actuarial determined unfunded plan liability for the Ampex Plan and for the Media Plan totaled \$58.5 million and \$19.1 million, respectively at December 31, 2003. Certain of our former employees of a closed foreign subsidiary were covered by a pension plan. We included a liability of \$2.5 million in our total liabilities for the plan's unfunded status at December 31, 2003 based on an actuarial valuation.

Valuation of Long-Lived Assets and Investments

We periodically review the carrying value of our long-lived assets and investments for continued appropriateness. This review is based upon our projections of anticipated future cash flows. While we believe that our estimates of future cash flows are reasonable, different assumptions regarding such cash flows could materially affect our evaluations. We have provided a valuation reserve against amounts contractually due from Media based on the uncertainty of future pension plan reimbursements.

Table of Contents

Contingencies

We account for contingencies in accordance with SFAS No. 5, Accounting for Contingencies. SFAS No. 5 requires that we record an estimated loss from a loss contingency when information available prior to issuance of our financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Accounting for contingencies such as environmental, legal and income tax matters requires us to use our judgment. While we believe that our accruals for these matters are adequate, if the actual loss from a loss contingency is significantly different than the estimated loss, our results of operations may be over or understated.

Overview

In 2003, we generated cash from continuing operations of \$10.1 million, which was an improvement over 2002 when we generated \$3.1 million and 2001 when we generated cash of \$0.7 million. In 2003, Data Systems revenues increased by approximately 1.0% from 2002 levels and decreased by approximately 1.9% from 2001 levels, but the favorable product and service revenue mix of government contracts and the continued beneficial effects of our cost reduction activities resulted in operating income of \$6.5 million compared to \$4.3 million in 2002 and an operating loss of \$5.4 million in 2001. Our royalty income increased to \$10.1 million in 2003 compared to \$4 million in 2002 as a result of the completion of two license agreements authorizing the use of our patents in the manufacture of video tape recorders including digital camcorders. Our corporate licensing division was adversely affected in 2002 by the expiration of certain analog video tape recorder patents and the expiration of a licensing agreement covering other patents when compared to 2001. As a result, our royalty income declined from \$12 million in 2001 to \$4 million in 2002. We are attempting to negotiate additional licenses of our digital camcorder patents and to enter into new licensing agreements covering our patents which we believe are being used in a variety of other digital consumer products such as digital still cameras and DVDs. We will need to successfully conclude new licensing agreements covering those new products if we are going to be able to generate sufficient Available Cash Flow to repay our debt. Patent negotiations are time consuming and complex, and there can be no assurance that we will be able to successfully negotiate new licensing agreements.

In prior years we exited the Internet business and discontinued certain other operations, which were losing money. At the time of their closure we provided reserves for expected shut down costs and future commitments for which we remained obligated to make payment. In 2003, we made payments of \$1.0 million against such commitments, whereas in 2002 and 2001 our discontinued operations used cash of \$1.1 million and \$8.6 million, respectively. We have been required to borrow funds from a former affiliated company to fund \$4.0 million of our pension contributions due in 2002 and 2001. No pension contributions were payable in 2003. We anticipate this affiliate will make pension contributions of approximately \$10.7 million on our behalf during 2004, which will increase our indebtedness by an equivalent amount. Significant pension contributions are projected to be required over the next seven years that we expect the affiliate will be required to advance on our behalf at least until our other senior debt has been fully repaid. In accordance with our senior debt agreements, cash payments of interest and principal on our Senior Discount Notes and Senior Notes are repayable solely to the extent of Available Cash Flow which is based largely on royalty income less operating expenses and certain other permitted expenditures. In 2003, we incurred total interest expense of \$9.0 million, paid \$3.2 million in cash and capitalized the balance as additional debt. In 2002, we incurred total interest expense of \$8.5 million, paid \$1.2 million in cash and capitalized the balance as additional debt.

In March 2004, we received consent from the holders of our debt securities: (i) to extend the maturity date of our Senior Discount Notes from January 5, 2005 to January 5, 2006, (ii) to extend the measurement date from December 31, 2004 to December 31, 2006, by which we are required to generate at least \$30 million of Available Cash Flow, as defined in the Senior Note indenture, and (iii) to defer scheduled principal repayments on our pension notes through December 31, 2006.

Table of Contents

Our 2003 and 2002 financial results were affected by a number of transactions, including a decrease of \$4.2 million and \$6.7 million, respectively, in reserves provided on prior years' foreign, Federal, state and deferred income taxes for years that have been closed to audit or are otherwise determined not to be required and a non-cash pension costs of \$2.0 million in 2003. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to us in settlement of future pension contributions that may be required under the Media Plan that would be funded by us. We increased the restructuring reserve in 2003 and 2002 by \$3.1 million and \$2.2 million, respectively, to reflect the depressed Bay Area commercial real estate market where we remain obligated to pay rent on a facility that we abandoned in 2001. Also, while not a component of Net Income (Loss), included in the determination of Comprehensive Income (Loss) is a charge of \$8.9 million, \$33.0 million and \$33.4 million in 2003, 2002 and 2001, respectively, to minimum pension adjustment to reflect an actuarially computed increase in accumulated pension obligations over pension plan assets. Our reported earnings per share includes the effect of the benefit attributed to common shareholders from extinguishment of preferred stock from the issuance of Common Shares of \$24.0 million in 2003, \$4.2 million in 2002 and \$5.7 million in 2001.

We ended 2003 with \$14.0 million in cash and short-term investments representing an increase of \$5.0 million from year-end 2002. We believe that our cash balances which are held primarily in Data Systems, together with the projected results of Data Systems, royalties from agreements presently in effect and the ability to borrow pension contributions from Hillside should be sufficient to satisfy all projected cash obligations for 2004. The results of our operations and the liquidity of our business are more fully discussed below.

The following discussion and analysis of the financial condition and results of operations of the Company and its subsidiaries should be read in conjunction with the Consolidated Financial Statements and the Notes thereto, included elsewhere in this Report.

Licensing Revenue and Product Groups

We have two operating segments: (1) high-performance mass data storage systems, instrumentation recorders and professional video products made by Data Systems; and (2) licensing of intellectual property by Ampex. For information regarding revenues, income or loss, assets and other financial data for each business segment, see Note 20 to Consolidated Financial Statements.

The first operating segment includes Data Systems' three principal product groups:

Mass data storage systems, including Data Systems' 19-millimeter scanning recorders and library systems (DST and DIS products) and related tape and aftermarket parts;

Instrumentation recorders, including Data Systems' data acquisition and instrumentation products (primarily DCRsi instrumentation recorders) and related tape and aftermarket parts; and

Professional video products, consisting principally of television aftermarket products that Data Systems continues to support but no longer manufactures.

Our intellectual property-licensing segment generates royalty income from licenses granted to companies that manufacture consumer video products (such as VCRs and camcorders) and, in certain cases, professional video tape recorders.

No other class of similar products accounted for more than 15% of consolidated revenue during the comparison periods discussed below.

Table of Contents

The following table shows licensing revenue and sales of Data Systems products by product group for the past three years.

	2003	2002	2001
	(in millions)		
Ampex Corporation			
Licensing revenue	\$ 10.1	\$ 4.0	\$ 12.1
Ampex Data Systems Corporation			
Mass data storage tape drives and Library systems	\$ 10.4	\$ 13.4	\$ 15.3
Data acquisition and Instrumentation recorders	10.6	8.6	7.8
Service revenue	9.3	8.5	6.3
Other	3.0	2.5	4.6
Total net product sales	\$ 33.3	\$ 33.0	\$ 34.0

Results of Operations for the Three Years Ended December 31, 2003

Product and Service Revenue. Product and service revenue increased by 1.0% to \$33.3 million in 2003 from \$33.0 million in 2002, compared to \$34.0 million in 2001. In 2003, the revenue increase compared to 2002 was primarily due to the increase in data acquisition and instrumentation recorder systems sales and service contract revenue on all products, which exceeded lower mass data storage system sales to our commercial markets. Data Systems continues to emphasize its service business, which we believe is less vulnerable to fluctuations in funding of government capital equipment programs. Government agencies and defense contractors are currently the largest market for Data Systems mass data storage and instrumentation recorders. This market has experienced an increase in activity in recent years as additional funding has been granted for intelligence gathering programs. There can be no assurance that this increased spending will continue beyond 2003. Government agencies and defense contractors have historically experienced significant pressure to reduce spending and we expect them to experience such pressure in the future.

Our backlog of firm orders was \$10.7 million at December 31, 2003 compared to \$4.7 million at December 31, 2002. We typically operate with low levels of backlog, requiring us to obtain the vast majority of each period's orders in the same period that they must be shipped to the customer. Historically, a small number of large orders have significantly impacted sales levels and often orders are received late in the quarter making it difficult to predict sales levels in future periods. See Business - Fluctuations in Operating Results; Seasonality and Backlog.

Royalty Income. Royalty income was \$10.1 million in 2003, \$4.0 million in 2002 and \$12.1 million in 2001. Our royalty income is derived from licenses of our patents. We receive most of our royalty income from licenses granted to companies that manufacture consumer video products (such as VCRs and camcorders) and, in certain cases, professional video tape recorders. In June 2003, we entered into license agreements with two companies authorizing their use of our patents in the manufacture of video tape recorders, including digital camcorders. The agreements collectively provided for a one-time royalty payment of \$5.4 million as settlement for royalties due on products sold in prior periods, which was recognized as royalty income in the second quarter of 2003. Ongoing royalty income and payments starting in the third quarter of 2003 are calculated as a percentage of the sales price on product sales.

Table of Contents

Certain license agreements have recently expired and our patents covering analog VCRs have expired which has caused the decline in royalty income from levels realized in prior years. We are negotiating with former licensees terms by which we may extend the license of our intellectual property. In order for us to attain levels of royalty income realized in prior years, it will be necessary for us to successfully conclude additional licensing negotiations with manufacturers of digital camcorders, digital still cameras, DVDs and/or other consumer products. Our digital patents have historically not been licensed for use in many of these products and there can be no assurance that negotiations will be successful. In addition, we may be required to pursue litigation if negotiations are not successful. If successful, these discussions could result in incremental royalty income in 2004. However, it is not possible to predict whether additional new license agreements will in fact be concluded.

Gross Profit. Gross profit as a percentage of net product and service revenue was 48.1% in 2003, 38.8% in 2002 and 28.0% in 2001. Our gross profit percentages fluctuate based on a number of factors including the volume of systems revenue, product mix and growth in service revenues. The increase in the gross profit percentage in 2003 when compared to 2002 was due in large part to the growth in service contract revenue attributable to Data Systems operations as a percentage of total revenue, which generates higher margins than margins earned on equipment revenue. In 2002, Data Systems received a substantial government order that provided for future tape and service revenue in exchange for a reduced equipment purchase price. Revenue resulting from this order depressed gross margins in 2002. In 2001, we provided a \$2.1 million reserve to write down the carrying value of inventory that our sales forecast indicated might not be utilized during the next 24 months.

Intellectual Property Costs. Intellectual property costs relate to those expenditures incurred by our in-house patent department in procuring royalty income. During the three years ended December 31, 2003, we did not incur any significant expenditure associated with patent enforcement litigation. The costs of patent litigation can be material. If we pursue litigation as a strategy to enforce our patents, we would deplete a substantial portion of our cash and securities. The institution of patent enforcement litigation may also increase the risk of counterclaims alleging infringement by us of patents held by third parties or seeking to invalidate patents held by us.

Selling and Administrative Expenses. Selling and administrative expenses increased to \$12.2 million (28.2% of total revenue) in 2003 from \$11.2 million (30.3% of total revenue) in 2002 and were \$14.2 million (30.9% of total revenue) in 2001. Selling and administrative costs increased in 2003 compared to 2002 due in part to \$0.6 million of incremental pension costs charged to operations in 2003 relating to our defined benefit plan and costs incurred in new business development efforts. While no cash contributions to our pension plan were payable in 2003, future required pension contributions payable in 2004 for the Ampex pension plan and the Media Plan are estimated at \$13.9 million. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources. Selling and administrative costs declined in 2002 compared to 2001 as a result of savings realized due to a reduction in headcount and relocation of certain administrative functions from Redwood City, CA to Colorado Springs, CO.

Research, Development and Engineering Expenses. Research, development and engineering expenses represented 7.3%, 7.1% and 11.9% of total revenue in 2003, 2002 and 2001, respectively. We do not capitalize any RD&E expenditures. The increase in RD&E expenditures during 2003 primarily is due to costs incurred to produce engineering prototypes of the new ruggedized disk and solid-state memory-based data acquisition recorders. Such costs are expected to decline once these products have been commercialized. In recent years, we have decreased the amount spent in research, development and engineering programs due to declining product revenue levels. We may be required to make additional cuts in RD&E spending if Data Systems sales decline significantly from current levels.

Restructuring Charges. In 2003 and 2002, we recorded a net restructuring charge of \$3.1 million and \$2.2 million, respectively, which included future rental payments, net of estimated sublet income, with respect to a vacated administrative building in Redwood City, CA reflecting the depressed Bay Area real estate market. In 2001, when we initiated the action to consolidate our activities in Redwood City, we

Table of Contents

vacated one administrative building and wrote-off associated leasehold improvements for a restructuring charge of \$3.5 million. In addition, the restructuring charge in 2001 included \$1.0 million in connection with the elimination of 86 positions in engineering, manufacturing and administration in Redwood City, CA and Colorado Springs, CO. During 2003, 2002 and 2001, we paid \$1.3 million, \$1.3 million and \$1.5 million, respectively, related to employee termination benefits and lease costs of abandoned facilities. The remaining balance of accrued restructuring costs at December 31, 2003 will substantially be paid in 2004 and 2005. We evaluate the amount of accrued restructuring costs, including projected sublet income, on a quarterly basis, and we may make additional adjustments in future periods if we determine that our actual obligations will differ significantly from remaining amounts accrued.

Operating Income (Loss). We reported operating income of \$5.9 million in 2003 compared to an operating loss of \$0.2 million in 2002 and an operating loss of \$2.3 million in 2001. The increase in operating income in 2003 was primarily as a result of the factors discussed above under *Royalty Income* and *Gross Profit*.

Media Pension Expense. We remain the plan sponsor of the pension plan of Media, a former subsidiary that was sold in 1995, and obligated to make pension contributions to that Plan. Pension costs (credits) are recognized under SFAS No. 87, *Employers' Accounting for Pensions*. Payments made by Quantegy either as direct pension contributions or as reimbursement of amounts paid by Ampex on behalf of Media are recognized as an offset to actuarially computed pension costs. Contributions and reimbursements paid by Quantegy totaled \$0.8 million, \$1.0 million and \$1.3 million in 2003, 2002 and 2001, respectively.

Equity in Net Loss of Limited Partnership. In 2003, we purchased a limited partnership interest in an investment limited partnership for \$1 million which is accounted for under the equity method. Substantially all assets of the Partnership consist of listed shares of 4imprint Group plc, a U.K. based, promotional products company. The Partnership is presumed to exercise significant influence over the affairs of 4imprint Group. Accordingly, the Partnership has recorded its equity interest in the reported net loss of 4imprint Group from the date of its investment through December 31, 2003, amounting to \$1,991,000. Our proportionate interest in the net loss of the Partnership during this period amounted to \$459,000.

Interest Expense. Interest expense increased in fiscal 2003 to \$9.0 million, of which \$3.2 million was paid in cash, compared to \$8.5 million in fiscal 2002, of which \$1.2 million was paid in cash, and \$7.2 million in fiscal 2001, of which \$2.7 million was paid in cash. The balance of interest expense not paid in cash was capitalized and added to the principal balance of the Senior Discount Notes or the Senior Notes. Interest expense in future years may increase due to the capitalization of interest on our indebtedness not paid in cash from Available Cash Flow as well as from additional notes issued to Hillside in the event they make future years' pension contributions.

Amortization of Debt Financing Costs. Financing costs associated with the February 2002 refinancing of the 12% Senior Notes totaled \$0.4 million and were expensed in the first quarter of 2002. The remaining unamortized amount of financing costs associated with the original issuance of the January 1998 12% Senior Notes are being charged to expense through the new maturity date in 2008.

Interest Income. Interest income is earned on cash balances and short and long-term investments.

Other (Income) Expense, Net. Other (income) expense, net consists primarily of foreign currency transaction gains and losses resulting from our foreign operations.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Provision for (Benefit of) Income Taxes. During the year ended December 31, 2003 and 2002, we decreased reserves provided on prior years foreign, Federal, state and deferred income taxes for years where we reached a proposed settlement or where years have been closed to audit or otherwise determined not to be required, which resulted in a non-cash benefit of income taxes of \$4.2 million and \$6.7 million, respectively. A provision for income taxes in the years ended December 31, 2003, 2002 and 2001

Table of Contents

consisted primarily of foreign income taxes and withholding taxes on royalty income. We were not required to include any material provision for U.S. Federal income tax due to the utilization of net operating loss carry forwards and timing differences. At December 31, 2003, we had net operating loss carry forwards for income tax purposes of \$197 million, expiring in the years 2005 through 2023. As a result of financing transactions that were completed in 1994 and 1995, we are limited in the amount of net operating loss carry forwards that can offset consolidated Federal taxable income in a given year. We derive pretax foreign income from our international operations, which are conducted principally by our foreign subsidiaries. In addition, our royalty income is subject, in certain cases, to foreign tax withholding. Such income is taxed by foreign taxing authorities, and our domestic interest and amortization expenses and operating loss carry forwards are not deductible in computing such foreign taxes. Proposed amendments to the US/Japanese tax treaty will eliminate withholding taxes on royalty payments if ratified by both countries.

Loss from Discontinued Operations and Loss on Disposal of Discontinued Operations. In February 2001, we closed MicroNet, a wholly-owned subsidiary that made high performance disk arrays and storage area networks, established a reserve of \$2.1 million for the costs of closure and wrote off our investment of \$4.2 million as of December 31, 2000. We transferred MicroNet's assets to an entity that distributed the asset sale proceeds to MicroNet's creditors.

During 2001, 2002 and 2003, we paid and recorded charges of \$1.2 million, \$0.1 million and \$0.2 million, respectively, against the net liabilities of discontinued operations. During 2001, we entered into sublease agreements that reduced our estimated future lease costs by \$0.4 million, which was recognized as income from discontinued operations. The remaining balance of the MicroNet reserve totals \$0.2 million and is included in our net liabilities of discontinued operations. This obligation has not been discounted to present value. We expect to complete making payments as it relates to this discontinued operation in 2004.

In July 2001, we closed iNEXTV's Internet video operations in New York City and ceased future funding of its other affiliates. We established a reserve of \$10.3 million at June 30, 2001 to write down our investment to net realizable value and to provide for the costs of closure. In addition, the net liabilities of iNEXTV reflected on the balance sheet after the impairment charge, together with the provision for closure costs, are included in the net liabilities of discontinued operations. During 2001, 2002 and 2003, we paid and recorded charges of \$2.0 million, \$1.1 million and \$0.8 million, respectively, against the net liabilities of discontinued operations. The unamortized balance in the net liabilities of discontinued operations totaled \$2.9 million at December 31, 2003. We expect to make payments as it relates to this discontinued operation through 2008. This obligation has not been discounted to present value.

A summary of the loss on disposal of iNEXTV is as follows:

	Years Ended December 31,		
	2003	2002	2001
	(in thousands)		
Impairment charge	\$	\$	\$ (4,602)
Provision for closure			(5,736)
Loss on disposal of discontinued operations			(10,338)

Table of Contents

A summary of the operating results of iNEXTV is as follows:

	Years Ended December 31,		
	2003	2002	2001
	(in thousands)		
Revenues	\$	\$	\$ 188
Costs and operating expenses excluding amortization			(6,277)
Goodwill amortization and writedown of assets			(211)
Operating loss			(6,300)
Equity in loss of unconsolidated subsidiary			(999)
Loss from discontinued operations			(7,294)

Net Income (Loss). We reported a net loss of \$1.8 million in 2003 compared to a \$2.9 million net loss in 2002, primarily as a result of the factors discussed above under Operating Income (Loss), and Provision for (Benefit of) Income Taxes. In 2001, we reported a net loss of \$26.9 million, primarily due to the factors discussed above under Gross Profit and Loss from Discontinued Operations and Loss on Disposal of Discontinued Operations.

Benefit from Extinguishment of Mandatorily Redeemable Preferred Stock. We issued shares of Common Stock to satisfy our redemption obligation on our Redeemable and Convertible Preferred Stock. By agreement, such shares were valued at \$50.00 (\$2.50 per share pre-reverse stock split), which was higher than the market value per share at the time of redemption. As a result, we recorded a benefit available to common stockholders in the year ended December 31, 2003, 2002 and 2001 of \$24.0 million, \$4.2 million and \$5.7 million, respectively. In October 2003, we redeemed all of our outstanding Redeemable Preferred Stock and paid the redemption price by issuing 450,600 shares of Class A Common Stock in exchange for \$22,530,000 face amount of Preferred Stock, which was cancelled. We recognized a benefit available to common stockholders of approximately \$20.9 million in the fourth quarter of 2003 from the extinguishment of the Preferred Stock.

Other Comprehensive Income. In accordance with Statement of Financial Accounting Standards No. 87, Employers Accounting for Pensions, we have recorded in Accumulated Other Comprehensive Income a non-cash charge of \$8.9 million in 2003, \$33.0 million in 2002 and \$33.4 million to increase the additional minimum pension liability to \$92.9 million at December 31, 2003, representing the excess of accumulated benefit obligations over the fair value of plan assets that is yet to be recorded in our Income Statement as unfunded accrued pension cost. We terminated benefit service and compensation credit accruals under the pension plan in 1994. Since that date pension expense recorded in Net Income (Loss) has not been material. In future years, as a result of plan assumptions, the underfunded status of the plan may result in the recognition of non-cash pension losses, which would be charged to operations.

Inflation and Changing Prices. Our Management does not believe that inflation or changing prices have had any material impact on our product and service revenue, licensing income or income from continuing operations for the fiscal years 2003, 2002 or 2001.

Liquidity and Capital Resources

General. We have incurred significant losses in recent years, primarily with respect to discontinued operations, and our liquidity has been affected accordingly. We have limited liquidity with which to conduct our operations. Cash and marketable securities totaled \$14.0 million at

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

December 31, 2003, substantially all of which was generated by Data Systems and is available to be reinvested in that business. Substantially all cash generated by our licensing activities in excess of operating expenses and certain other expenses is to be applied to reduce debt. This forced us to restructure and extend the maturity date of our long-term senior debt, to discontinue unprofitable Internet video operations and to borrow funds from a former affiliate in order to make required contributions to our employee retirement pension plan. We have also significantly restructured and down-sized the operations of Data Systems in order for that

Table of Contents

business to be profitable at current sales levels. Management currently believes that our cash balances, coupled with anticipated royalty collections under licensing agreements presently in effect, as well as our ability to borrow pension contributions from a former affiliate, Hillside, should be sufficient to satisfy all projected cash obligations for 2004.

Our expectations as to our cash flows and future cash balances are based on a number of assumptions, including assumptions regarding anticipated revenues, customer purchasing and payment patterns, and improvements in general economic conditions, and our ability to borrow significant pension contributions due in future years from Hillside many of which are beyond our control. If we experience a decrease in demand for our products or anticipated royalty income or if Hillside is unable to fund pension contributions on our behalf we may be required to further reduce expenditures, borrow additional funds, or seek to raise additional equity. There can be no assurance that we will be successful in these efforts, the failure of which may have a material adverse effect on our ability to achieve our intended business objectives. The risk factors discussed below describe uncertainties that could have an adverse effect on our liquidity and capital resources.

Senior Debt. As of December 31, 2003 we had outstanding approximately \$74.0 million of total borrowings, which includes approximately \$61.0 million under our 12% Senior Notes due 2008, \$9.7 million under our 20% Senior Discount Notes due 2006 and \$3.3 million of Hillside Notes. Such indebtedness is secured by liens on a substantial portion of our assets. We may incur additional indebtedness from time to time in the future, subject to certain restrictions imposed by our debt agreements. In March 2004, we received consent from the holders of our senior debt securities (i) to extend the maturity date of our Senior Discount Notes from January 5, 2005 to January 5, 2006, (ii) to extend the measurement date from December 31, 2004 to December 31, 2006, by which we are required to generate at least \$30 million of Available Cash Flow, as defined in the Senior Note indenture, and (iii) to defer scheduled principal repayments on our pension notes through December 31, 2006. Substantial pension contributions are projected to be required beginning in 2004 and thereafter. Pension contributions totaling \$7.9 million for the Ampex plan and \$2.8 million for the Media plan are projected to be paid in 2004. It is anticipated that such contributions will be funded by Hillside. In that event we would issue additional notes to Hillside in an equivalent amount, which will correspondingly increase the amounts of our outstanding debt.

As recently amended, the Senior Notes require that we generate a minimum of \$30 million of Available Cash Flow (as defined) during the five-year period ending December 31, 2006. Through December 31, 2003, we have generated \$4 million of Available Cash Flow. To satisfy this covenant, we will be required to increase our revenues from licensing operations substantially above current levels. If we fail to generate the required revenues or if we default in our other obligations under the relevant loan agreements, the Note holders would have the right to accelerate the indebtedness and foreclose on their liens, which would materially and adversely affect our financial condition.

The indentures under which the Senior Notes and the Senior Discount Notes were issued contain customary affirmative and negative restrictive covenants that limit the payment of dividends, the incurrence of additional indebtedness or liens, certain sales of assets and other actions by us and our restricted subsidiaries. In the event of default, the holders of the Notes would be entitled to enforce the liens granted by us on our future patent royalty stream and the Colorado Springs facility and to apply amounts collected to repayment of the Notes.

Cash Flow. We generated cash from continuing operating activities totaling \$10.1 million in 2003, in part due to the collection of a one-time royalty payment of \$4.9 million (after withholding taxes) for royalties due on products sold in prior periods. We generated cash from continuing operating activities totaling \$3.1 million in 2002 and generated cash of \$0.7 million in 2001. Cash used by discontinued operations totaled \$1.0 million in the year ended December 31, 2003, \$1.1 million in the year ended December 31, 2002 and \$8.7 million in the year ended December 31, 2001.

Pursuant to an agreement between us, Hillside and certain other parties, dated November 22, 1994, Hillside is obligated to fund pension contributions in the event we are unable to do so. At our request,

Table of Contents

Hillside has made five pension contributions totaling \$4.0 million through December 31, 2003, evidenced by Notes issued by us in the amount of the pension contributions. The Notes are secured by a lien on Data Systems inventories. Pension contributions totaling \$10.7 million due in 2004 have been computed using actuarial assumptions presently in effect and it is anticipated that such future contributions will be funded by Hillside. In that event, we would issue additional notes to Hillside in an equivalent amount. Under the terms of the notes, accrued interest is payable quarterly and a principal payment of \$150,000 is due on the first anniversary of each note, with the remainder due on the fourth anniversary of the notes. In 2003, principal repayments of \$300,000 were made on the Hillside Notes. In 2002, principal repayments of \$300,000 were made on the Hillside Notes. Pursuant to amendments to our senior debt agreements in 2004, all principal payments on the Hillside Notes will be deferred until after December 31, 2006 with earlier repayment in the event that the Senior Discount Notes and Senior Notes have been repaid in full. In September 2002, Ampex and Hillside entered into an agreement whereby an affiliate of Hillside assumed fiduciary responsibility for the management of substantially all of the pension plan's assets.

Off-Balance Sheet Arrangements. During fiscal 2003 and 2002, we did not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that our Management believes is material to investors.

Contractual Obligations. An aggregate listing of our contractual obligations and commercial commitments is as follows:

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
	Restated				Restated
	(in thousands)				
Senior debt (a)	\$ 70,763	\$	\$ 9,757	\$ 61,006	\$
Other debt (b)	3,259		3,259		
Capital lease obligations	10	10			
Operating leases (c)	13,803	3,257	5,979	4,567	
Other long-term obligations (d)	87,186	14,681	23,344	16,155	33,006

- (a) The maturity date of the Senior Discount Notes is January 2006 and the maturity date of the Senior Notes is August 2008. Pursuant to these agreements, substantially all Available Cash Flow is to be applied first to the Senior Discount Notes in full repayment of principal and accrued interest and second to the Senior Notes in full repayment of principal and accrued interest. Accordingly, payments due on these obligations could vary from the amounts shown in the table. See Note 10 to Consolidated Financial Statements.
- (b) Other debt includes Hillside notes payable. See Note 10 to Consolidated Financial Statements.
- (c) Operating leases include facility rentals of discontinued operations or abandoned leaseholds, which we are attempting to sublease. Amounts shown above exclude projected sublease rental income, which we have included in establishing reserves for the closure of discontinued operations or reserve for restructuring.
- (d) Other long-term obligations include estimated pension contributions for the Ampex Corporation Employees Retirement Plan and the Media Plan based on actuarial assumptions presently in effect and an assumed rate of return on pension assets of 8% per annum. If interest rates decline, if the return on assets is less than projected or the actuarial assumptions change, future pension contributions could increase over amounts

Table of Contents

shown above. Hillside is contractually obligated to advance us or Media funds sufficient to make pension contributions if we or Media do not have the ability to do so. See Note 16 to Consolidated Financial Statements. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to us in settlement of future pension contributions that may be required under the Media Plan that would be funded by us. Other long-term obligations also include a foreign defined benefit plan, a foreign retirement allowance and domestic supplementary retirement plans, which are included in our liabilities at \$9.5 million.

	Amount of Commitment Expiration Per Period				
	Total	Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
	(in thousands)				
Standby Letters of Credit (a)	\$ 1,390	\$	\$	\$ 1,390	\$

- (a) We have obtained standby letters of credit from a bank to support our obligations under various building leases, which are required to be renewed through the lease term. We have collateralized these standby letters of credit with cash.

Recent Accounting Pronouncements

In November 2002, the Emerging Issues Task Force reached a consensus on Issue No. 00-21 (EITF 00-21), Revenue Arrangements with Multiple Deliverables. EITF 00-21 provides guidance on how to account for arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets. The provisions of EITF 00-21 will apply to revenue arrangements entered into in fiscal periods beginning after June 15, 2003. We have adopted EITF 00-21 effective June 15, 2003. The adoption of EITF 00-21 had no impact on our financial position or results of operations.

In January 2003, the FASB issued Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. Until this interpretation, a company generally included another entity in its consolidated financial statements only if it controlled the entity through voting interests. FIN 46 requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns. FIN 46 is effective for interests held by public entities in variable interest entities or potential variable interest entities created before February 1, 2003, for financial statement periods after December 15, 2003, and otherwise is effective after June 15, 2003. The adoption of FIN 46 had no impact on our financial position, cash flows or results of operations.

In May 2003, the FASB issued Statement of Financial Accounting Standards No. 150 (SFAS 150), Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. SFAS 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). SFAS 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. We have adopted SFAS 150 effective June 15, 2003. The adoption of SFAS 150 had no impact on our financial position, cash flows or results of operations.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We do not use derivative financial instruments in our investment portfolio. The investment portfolio generally has been comprised of US Treasury Bills and Euro government bonds. These securities mature within one year and are classified as available for sale in accordance with FAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. Investments in both fixed-rate and floating-rate interest-earning instruments carry a degree of interest-rate risk. Fixed-rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating-rate securities may produce less income than expected if interest rates fall.

We did have a number of cash and cash equivalent accounts whose returns varied directly proportionally to US interest rates. A decrease in interest rates would not have a material effect on the current-year financial condition or results of operations.

Our finance subsidiary had a revolving credit line with a domestic financial institution to finance working capital and letter of credit requirements that expired in May 2002. Average borrowings under these agreements during both 2002 and 2001 were less than \$0.2 million at an average interest rate of 5.4% and 7.7%, respectively. Maximum borrowings outstanding at any time during 2002 and 2001 were \$1.0 million and \$2.4 million, respectively. We may seek a new line of credit in the future but have not received any binding commitments. At December 31, 2003, we had letters of credit through a domestic financial institution in the amount of \$1.4 million against which we provided cash as collateral. Cash collateral balances are included in the caption Other current assets on the Consolidated Balance Sheets. If a new facility was obtained to replace the expired working capital line of credit and if a 10% increase in interest rates were to occur at January 1, 2004 and remain in effect throughout 2004, and the balance remained the same, interest expense and cash outflow would increase by less than \$20,000.

Table of Contents

Foreign Currency Exchange Rate Risk

Certain of our licensing agreements are denominated in foreign currencies. We also hold a limited partnership interest that owns publicly held shares in a British promotional products company. The foreign currencies fluctuate against the US dollar impacting the amount of cash collected and revenue recognized. International revenues from our foreign subsidiaries were less than 25% of total revenues. International product sales are made mostly from our foreign sales subsidiaries and are typically denominated in the local currency of each country. The foreign subsidiaries incur most of their expenses in the local foreign currency. Accordingly, all foreign subsidiaries use the local currency as their functional currency.

Our international business is subject to risks typical of an international business including, but not limited to, differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Accordingly, our future results could be materially adversely impacted by changes in these or other factors.

Our exposure to foreign exchange rate fluctuations arises in part from intercompany accounts in which costs incurred in the United States are charged to our foreign sales subsidiaries. These intercompany accounts are typically denominated in the US dollar. We are also exposed to foreign exchange rate fluctuations as the financial results of foreign subsidiaries are translated into US dollars in consolidation. As exchange rates vary, these results, when translated, may vary from expectations and adversely impact overall expected profitability. The effect of foreign exchange rate fluctuations on us in 2003, 2002 and 2001 was not material.

Investment Risk

We have in the past invested in equity instruments of technology companies for business and strategic purposes. These investments are included in other long-term assets and are accounted for under the cost method when ownership is less than 20% and we do not have significant influence over the business operations. We have also made investments for capital appreciation and current income, which we account for under the equity method since we hold more than a 20% limited partnership interest. Our policy is to regularly review the assumptions underlying the operating performance and cash flow forecasts in assessing the carrying values. We identify and record impairment losses on long-lived assets when events and circumstances indicate that such assets might be impaired. All of our investments in the Internet video industry have been written off as they have no estimated net realizable value.

ITEM 8. RESTATED FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

This item 8 has been restated to correct the accounting for our obligations under the Media pension plan in accordance with SFAS No. 87, Employers Accounting for Pensions.

The financial statements required by Item 8 and the financial statement schedules required by Item 15(d) are included following Item 15 hereof. The supplementary financial information called for by Item 8 is reflected in Note 24 of the Notes to Consolidated Financial Statements following Item 15 hereof.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

This item 9A has been restated to correct the accounting for our obligations under the Media pension plan in accordance with SFAS No. 87, Employers Accounting for Pensions.

Management's Report on Assessment of Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company, as such term is defined under Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency (within the meaning of PCAOB Auditing Standard No. 2), or combination of control deficiencies, that results in there being more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis by employees in the normal course of their assigned functions. As of December 31, 2003 we did not maintain effective controls over the application of generally accepted accounting principles related to the complex, non-routine pension obligations of a disposed subsidiary sold in 1995.

This control deficiency resulted in the following adjustments of our financial statements.

On February 18, 2005, the Audit Committee of the Board of Directors of Ampex Corporation concluded that the previously issued financial statements contained in our Annual Report on Form 10-K as of December 31, 2003 and December 31, 2002, including the corresponding 2003 and 2002 unaudited interim periods, and for each of the years in the three year period ended December 31, 2003, as well as our unaudited interim financial statements contained on Form 10-Q as of and for the periods ending March 31, 2004, June 30, 2004 and September 30, 2004, should no longer be relied upon because of errors in those financial statements. These errors relate to how we accounted for our obligations with respect to a pension plan of our former magnetic tape manufacturing subsidiary (Media), which we sold in 1995. These errors are the subject of recent communications with the Office of the Chief Accountant of the Securities and Exchange Commission (the SEC), after which we revised our views with respect to the appropriate accounting for the Media pension plan.

We have restated our financial statements in this Form 10-K/A as of December 31, 2003 and 2002 and for each of the three years ended December 31, 2003 to correct the accounting for our obligations under a pension plan of Media which we disposed of in 1995.

The agreement for the sale of Media required the buyer, Quantegy Corporation, to pay directly or to reimburse us for required contributions to the Media pension plan. However, we remained the Plan Sponsor of the Media pension plan and we remained obligated to make pension contributions to that Plan.

The ineffective control over the application of generally accepted accounting principles in relation to complex, non-routine transactions in the financial reporting process could result in a material misstatement to the annual or interim financial statements that would not be prevented or detected. As a result, management has determined that this control deficiency constituted a material weakness, as defined by the PCAOB as of December 31, 2003. Management communicated its conclusions to the Audit Committee of the Company's Board of Directors.

Changes in Internal Control Over Financial Reporting

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Our management has identified the steps necessary to address the material weakness described above, as follows:

Engaging outside contractors with technical accounting expertise, as needed, and reorganizing the accounting and finance department to ensure that accounting personnel with adequate experience, skills and knowledge relating to complex, non-routine transactions are directly involved in the review and accounting evaluation of our complex, non-routine transactions;

Involving both internal accounting personnel and outside contractors with technical accounting expertise, as needed, early in the evaluation of a complex, non-routine transaction to obtain additional guidance as to the application of generally accepted accounting principles to a transactions;

Table of Contents

Documenting to standards established by senior accounting personnel and the principal accounting officer the review, analysis and related conclusions with respect to complex, non-routine transactions; and

Requiring senior accounting personnel and the principal accounting officer to review complex, non-routine transactions to evaluate and approve the accounting treatment for such transactions.

We began to execute the remediation plans identified above in the first quarter of 2005.

We have also implemented policies and procedures to assure adequate and timely involvement of outside accounting contractors, as needed; to obtain guidance as to the application of generally accepted accounting principles to complex, non-routine transactions. We believe that these corrective actions, taken as a whole, have mitigated the control deficiencies with respect to our preparation of our 2004 Annual Report on Form 10-K and that these measures have been effective to ensure that information required to be disclosed in the 2004 Form 10-K has been recorded, processed, summarized and reported correctly. We are in the process of developing procedures for the testing of these controls to determine if the material weakness has been remediated and expect that testing of these controls will be substantially completed by the end of our fiscal second quarter of 2005. We will continue the implementation of policies, processes and procedures regarding the review of complex, non-routine transactions. Management believes that our controls and procedures will continue to improve as a result of the further implementation of these measures.

There was no change in our internal control over financial reporting during the year ended December 31, 2003 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Evaluation of Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chairman and Chief Executive Officer and our Chief Financial Officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on that evaluation, our Chairman and Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were ineffective as of December 31, 2003 because of the material weakness identified above.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE COMPANY

The information required by this item regarding directors, compliance with Section 16(a) of the Exchange Act of 1934 and the Company's code of ethics and Audit Committee is incorporated herein by reference to our Proxy Statement for our 2004 Annual Meeting of Stockholders (the Proxy Statement). Information regarding executive officers is included in Part I hereof as Item 4A and is incorporated by reference into this Item 10.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated herein by reference to our Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information required by this item is incorporated herein by reference to our Proxy Statement and to Item 5 of Part II of this report with respect to our equity compensation plans.

Table of Contents

32.1* Chief Executive Officer and Chief Financial Officer certification pursuant to 18 U.S.C Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) During the fiscal quarter ended December 31, 2003, we filed the following reports on Form 8-K:

- (i) Current Report on Form 8-K dated October 7, 2003 under Items 5 and 7, attaching our press release announcing that we had notified holders of our outstanding 8% Noncumulative Redeemable Preferred Stock that we intend to redeem all such outstanding shares by issuing shares of our Class A Common Stock in payment of the redemption price and such redemption was expected to close on October 30, 2003.
- (ii) Current Report on Form 8-K dated October 21, 2003 under Items 5 and 7, attaching our press release announcing that we had received notice from the American Stock Exchange that the Exchange intended to proceed with the removal of our Common Stock from listing and registration on the Exchange and that we would appeal the decision.
- (iii) Current Report on Form 8-K dated November 14, 2003 under Items 7 and 12; attaching our earnings release for the quarter ended September 30, 2003, including related financial statements.
- (iv) Current Report on Form 8-K dated November 21, 2003 under Items 5 and 7, attaching our press release announcing that the Exchange would not grant a waiver of its continued listing standards to us and would suspend trading in our Common Stock as soon as practicable.

(c) Exhibits. See Item 15(a)(3) above.

(d) Financial Statement Schedules. See Items 8 and 15(a)(2) above

* Filed herewith.

Table of Contents**SELECTED FINANCIAL DATA**

This item 6 has been restated to correct the accounting for our obligations under the Media pension plan in accordance with SFAS No. 87, Employers Accounting for Pensions. Additional details regarding the restatement are included in Note 1 Restatement of Previously Issued Financial Statements to the consolidated financial statements.

Subsequent to year-end 2000, we announced that we were closing MicroNet, a business that manufactured disk-based storage products that we acquired in 1998. The operating results of MicroNet have been classified as Discontinued Operations in the Consolidated Statement of Operations for each of the two years ended December 31, 2000. We have excluded the assets and liabilities of MicroNet in the Consolidated Balance Sheets at December 31, 2000. The Consolidated Balance Sheets of prior periods have not been restated to exclude the assets and liabilities of MicroNet.

In the second quarter of 2001, we announced that we were closing iNEXTV, a business involved in Internet video operations started in 1999. The operating results of iNEXTV have been classified as Discontinued Operations in the Consolidated Statement of Operations for each of the three years ended December 31, 2001. We have excluded the assets and liabilities of iNEXTV in the Consolidated Balance Sheets at June 30, 2001. The Consolidated Balance Sheets of prior periods have not been restated to exclude the assets and liabilities of iNEXTV.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders

of Ampex Corporation:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) on page 42 presents fairly, in all material respects, the financial position of Ampex Corporation and its subsidiaries at December 31, 2003 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2003 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) on page 42 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1, Restatement of Previously Issued Financial Statements, the Company has restated previously issued financial statements.

As further discussed in Note 2, the Company relies on a related party for pension funding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Restatement of Previously Issued Financial Statements

On February 18, 2005, the Audit Committee of the Board of Directors of Ampex Corporation concluded that the financial statements contained in the Company's Annual Report on Form 10-K as of December 31, 2003 and December 31, 2002 and for each of the years in the three year period ended December 31, 2003, as well as its interim financial statements contained on Form 10-Q as of and for the periods ending March 31, 2004, June 30, 2004 and September 30, 2004, should no longer be relied upon because of errors in those financial statements. These errors relate to how Ampex accounted for its obligations with respect to a pension plan of its former magnetic tape manufacturing subsidiary (Media), which Ampex sold in 1995. These errors are the subject of recent communications with the Office of the Chief Accountant of the Securities and Exchange Commission (the SEC), after which the Company revised its views with respect to the appropriate accounting for the Media pension plan. The Company had accounted for its obligations under the Media pension plan under SFAS No. 5, Accounting for Contingencies since the sale of Media in 1995. However, as a result of above mentioned communications with the SEC, the Company now believes that it should have accounted for these obligations under the provisions of SFAS No. 87, Employers Accounting for Pensions.

The Company has restated its financial statements in this Form 10-K/A as of December 31, 2003 and 2002 and for each of the three years in the period ended December 31, 2003 to correct the accounting for its obligations under the Media pension plan in accordance with SFAS No. 87.

The agreement for the sale of Media required the buyer, Quantegy Corporation, to pay directly or to reimburse Ampex for required contributions to the Media pension plan. However, Ampex remained the Plan Sponsor of the Media pension plan and obligated to make pension contributions to that Plan.

The determination of our obligation and expense for pension and other postretirement benefits is dependent on our selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in Note 16 to the consolidated financial statements and include, among others, the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants. Certain of these assumptions are dependent on proposed legislation. In accordance with generally accepted accounting principles, actual results that differ from our assumptions are accumulated and amortized over future periods and therefore, generally affect our recognized expense and recorded obligation in such future periods. While we believe that our assumptions are appropriate, significant differences in our actual experience or significant changes in our assumptions may materially affect our pension and other postretirement obligations and our future expense.

During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to us in settlement of future pension contributions that may be required under the Media Plan that would be funded by us. The actuarial determined unfunded plan liability for the Media Plan totaled \$19.1 million at December 31, 2003.

Note 2 - Ampex Corporation and Summary of Significant Accounting Policies

Ampex Corporation (Ampex or the Company) is a leading innovator and licensor of visual information technology. During its 59-year history, the Company has developed substantial proprietary technology relating to the electronic storage, processing and retrieval of data, particularly images. The Company currently holds approximately 600 patents and patent applications covering digital image-processing, data compression and recording technologies. The Company, through its wholly-owned subsidiary, Ampex Data Systems Corporation (Data Systems), incorporates this technology in the design and manufacture of very high performance tape-based storage products, principally for digital recording, archiving and rapid restore/backup applications. The Company also leverages its investment in technology through its corporate licensing division that licenses Ampex patents to manufacturers of consumer electronics products.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

In the second quarter of 2001, the Company closed the Internet video operations of its wholly-owned subsidiary iNEXTV and affiliates. The Company's Internet operations have been classified as discontinued operations for all periods presented.

On June 12, 2003, the Company effected a one-for-twenty reverse stock split of its Class A Common Stock. The number of outstanding shares was reduced from approximately 63.4 million to 3.2 million shares. Common share data and per share calculations for all prior periods included in the Consolidated Financial Statements and the Notes thereto, have been restated to reflect the impact of the one-for-twenty reverse stock split.

As of October 30, 2003, the Company redeemed all of its outstanding shares of 8% Noncumulative Redeemable Preferred Stock by issuing shares of its Class A Common Stock. Accordingly, the Company issued 450,600 shares of Class A Common Stock, representing approximately 12% of its common stock outstanding after such issuance, in exchange for \$22,530,000 face amount of Preferred Stock, which was cancelled. The Company's 2003 financial statements include non-taxable benefits applicable to common stockholders of approximately \$24.0 million from extinguishment of the Preferred Stock throughout the year, of which \$20.9 million pertained to the October 2003 redemption.

Table of Contents

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Liquidity

The Company has incurred significant losses in recent years, primarily with respect to discontinued operations, and its liquidity has been affected accordingly. The Company has limited liquidity with which to conduct its operations. Cash and marketable securities totaled \$14.0 million at December 31, 2003, substantially all of which was generated by Data Systems and is available to be reinvested in that business. Substantially all cash generated by the Company's licensing activities in excess of operating expenses and certain other expenses is to be applied to reduce debt.

While the Company has recently restructured its senior debt to extend maturities and modify certain covenants that have improved the Company's liquidity, it may be required to use substantial funds in litigation to enforce its patents. In addition, as discussed in Note 16, the Company has substantial pension contributions and pension related funding due in future periods that will require the Company to borrow additional funds from a related party, Hillside Capital Incorporated (Hillside), to meet these obligations. Our Management believes that the Company's liquidity, coupled with its ability to borrow pension contributions from Hillside, should be sufficient to satisfy the projected cash obligations through 2004, but there can be no assurance in this regard.

In March 2004, the Company received consent from the holders of its senior debt securities (i) to extend the maturity date of its Senior Discount Notes from January 5, 2005 to January 5, 2006, (ii) to extend the measurement date from December 31, 2004 to December 31, 2006, by which the Company is required to generate at least \$30 million of Available Cash Flow, as defined in the Senior Note indenture, and (iii) to defer scheduled principal repayments on its pension notes through December 31, 2006.

The Company's expectations as to its cash flows and future cash balances are based on a number of assumptions, including assumptions regarding anticipated revenues, customer purchasing and payment patterns, and improvements in general economic conditions and the ability to borrow significant pension contributions due in future years from Hillside, many of which are beyond the Company's control. If the Company experiences a decrease in demand for its products or anticipated royalty income, the Company may be required to further reduce expenditures, borrow additional funds, or seek to raise additional equity. There can be no assurance that the Company will be successful in these efforts, the failure of which may have a material adverse effect on the Company's ability to achieve its intended business objectives.

Basis of Presentation

The accompanying consolidated financial statements are presented in accordance with generally accepted accounting principles in the United States. All intercompany accounts and transactions have been eliminated. Certain reclassifications have been made to the prior years' financial statements to conform to the current year's presentation. These reclassifications had no effect on the total prior years' stockholders' deficit or net income. The components of prior years' stockholders' deficit were reclassified due to the one-for twenty reverse stock split. All share and per share amounts have been retroactively restated for the one-for twenty reverse split.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of net revenue and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of 90 days or less.

F-9

Table of Contents

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Short-term and Long-term Investments

The Company's investments consisted primarily of debt securities and consist of highly liquid U.S. Treasury instruments, U.S. corporate securities and Euro government bonds. Unrealized gains and losses, if material, are reported net of tax as a separate component of stockholders deficit under accumulated other comprehensive income until realized. Realized gains and losses, if any, are determined using the specific identification method. The Company's investment in a limited partnership is accounted for under the equity method.

Long-Term Contracts

Revenues and estimated profits on long-term contracts performed over extended periods of time are recognized on the percentage-of-completion method based on the total direct costs expected to be incurred on the contract. Revenues and profits on long-term contracts are based on the Company's estimates to complete and are reviewed periodically, with adjustments recorded in the period in which revisions are made. Any anticipated losses on contracts are charged to operations as soon as they are determinable. Estimated costs associated with progress billings on long-term contracts are netted against inventory. There were no progress billings outstanding at December 31, 2003 and December 31, 2002.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined on a standard cost basis, which approximates the first in, first out (FIFO) method. Appropriate consideration is given to obsolescence, excessive levels, deterioration and other factors in evaluating net realizable value.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost and stated net of accumulated depreciation. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets ranging from three to nine years for furniture, fixtures and equipment, two to ten years for leasehold improvements and 50 years for buildings. When assets are disposed of, the cost and related accumulated depreciation are removed from the accounts and the resulting gains or losses are included in the results of operations.

Foreign Currency Translation

Assets and liabilities of subsidiaries located outside the United States have been translated at rates in effect at year-end. Revenues and expenses are translated at average rates during the year. Local currencies are considered to be the functional currencies for all of the Company's foreign

subsidiaries. Accordingly, the effects of translating the financial statements of foreign subsidiaries into U.S. dollars are reported in the cumulative translation adjustment, a separate component of stockholders' deficit. Foreign currency transaction gains and losses, which are included in other expense, were not material in the periods reported.

Revenue Recognition

Royalty income is recorded when earned and receipt is assured. Revenue on product sales and services are recorded when all of the following have occurred: an agreement of sale exists, product delivery and acceptance has occurred or services have been rendered, pricing is fixed or determinable, and collection is reasonably assured. Service revenue is recognized ratably over the life of the service contract.

Research, Development and Engineering

Research and development costs are expensed as incurred and amounted to \$2.6 million, \$2.3 million and \$5.0 million in 2003, 2002 and 2001, respectively. Other engineering costs, principally incurred in connection with product introductions and process enhancements, amounted to \$0.6 million, \$0.3 million and \$0.5 million in 2003, 2002 and 2001, respectively.

Income Taxes

The Company follows Statement of Financial Accounting Standards No. 109 (SFAS 109), Accounting for Income Taxes. Under this method, deferred income taxes are recognized for temporary differences by applying enacted statutory rates

Table of Contents

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. See Note 19.

Foreign withholding taxes have been provided on the undistributed earnings of foreign subsidiaries, giving recognition to applicable tax rates.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of risk consist principally of short-term and long-term investments and trade receivables. The Company invests its temporary cash balances in U.S. treasury obligations, U.S. corporate securities and Euro government bonds and, by policy, limits the investment maturity and the amount of credit exposure to any one financial institution or type of investment. The Company performs ongoing credit evaluations on its customers, and collateral is generally not required for trade receivables.

Fiscal Year

The Company's fiscal year is the 52 or 53-week period ending on the Saturday nearest December 31. Fiscal 2003, 2002 and 2001 were 52-week years.

Comprehensive Income (Loss)

Comprehensive income (loss) as defined includes all changes in equity (net assets) during a period from non-owner sources. Accumulated other comprehensive income (loss), as presented on the accompanying Consolidated Balance Sheets, consists of the net unrealized gains (losses) on available-for-sale securities, net of tax, cumulative translation adjustments, net of tax, and the minimum pension adjustment.

Income (Loss) Per Common Share

Basic income (loss) per common share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted income (loss) per common share is computed giving effect to all potentially dilutive common shares that were outstanding during the period.

Stock-Based Compensation

The Company accounts for stock-based awards to employees in accordance with APB No. 25 (APB 25), Accounting for Stock Issued to Employees, and has adopted the disclosure-only alternative of Statement of Financial Accounting Standards No. 123 (SFAS 123), Accounting for Stock Based Compensation. See Note 15.

The Company has elected to account for employee stock options using the intrinsic value method prescribed by APB 25, and therefore compensation cost for stock options is measured as the excess, if any, of the quoted market price of the Company's stock at the date of the grant over the amount an employee must pay to acquire the stock. Had compensation cost for the Company's stock-based compensation plan been determined based on the fair value on the grant dates for awards under those plans consistent with the method of SFAS 123, the Company's net income (loss) applicable to common stockholders and basic and diluted income (loss) per share would have been reduced to the pro forma amounts indicated below:

	Year Ended December 31,		
	2003	2002	2001
	(in thousands, except per share amounts)		
Net loss:			
As restated	\$ (1,764)	\$ (2,872)	\$ (26,873)
Compensation expense, net of tax	(13)	(140)	(197)
Pro forma	\$ (1,777)	\$ (3,012)	\$ (27,070)
Net income (loss) applicable to common stockholders:			
As restated	\$ 22,187	\$ 1,320	\$ (21,153)
Compensation, net of tax	(13)	(140)	(197)
Pro forma	\$ 22,174	\$ 1,180	\$ (21,350)
Basic and diluted income (loss) per share:			
Loss per share, as restated	\$ (0.53)	\$ (0.92)	\$ (9.09)
Loss per share, pro forma as restated	\$ (0.54)	\$ (0.97)	\$ (9.16)
Income (loss) per share applicable to common stockholders, as restated	\$ 6.73	\$ 0.42	\$ (7.16)
Income (loss) per share applicable to common stockholders, pro forma restated	\$ 6.72	\$ 0.38	\$ (7.22)

Table of Contents

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

These pro forma disclosures are not necessarily representative of the effects on reported net income (loss) and net income (loss) applicable to common stockholders for future years.

Fair Value of Financial Instruments

For certain instruments that are short-term in nature, such as cash and cash equivalents, short-term investments and working capital facilities, carrying value approximates fair value. The Company's Senior Notes and Senior Discount Notes have been valued at approximately par value at December 31, 2003 and December 31, 2002 by the Company; however no securities have traded recently in the secondary market. Management has determined that it is not practical to estimate fair value for note payable-other, as no market for such instruments currently exists. See Note 10.

Recent Pronouncements

In November 2002, the Emerging Issues Task Force reached a consensus on Issue No. 00-21 (EITF 00-21), Revenue Arrangements with Multiple Deliverables. EITF 00-21 provides guidance on how to account for arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets. The provisions of EITF 00-21 will apply to revenue arrangements entered into in fiscal periods beginning after June 15, 2003. The Company has adopted EITF 00-21 effective June 15, 2003. The adoption of EITF 00-21 had no impact on the Company's financial position or results of operations.

In January 2003, the FASB issued Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. Until this interpretation, a company generally included another entity in its consolidated financial statements only if it controlled the entity through voting interests. FIN 46 requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns. FIN 46 is effective for interests held by public entities in variable interest entities or potential variable interest entities created before February 1, 2003, for financial statement periods after December 15, 2003, and otherwise is effective after June 15, 2004. The Company has adopted FIN 46 effective December 31, 2003. The adoption of FIN 46 had no impact on the Company's financial position, cash flows or results of operations.

In May 2003, the FASB issued Statement of Financial Accounting Standards No. 150 (SFAS 150), Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. SFAS 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). SFAS 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The Company has adopted SFAS 150 effective June 15, 2003. The adoption of SFAS 150 had no impact on the Company's financial position, cash flows or results of operations.

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 3 Discontinued Operations**

In February 2001, the Board of Directors of the Company authorized Management to close MicroNet, its wholly-owned subsidiary that made high performance disk arrays and Storage Area Networks, and to establish a reserve of \$2.1 million for the costs of closure and to write off its investment of \$4.2 million as of December 31, 2000. Ampex transferred MicroNet assets to an entity that distributed the asset sale proceeds to MicroNet creditors. During 2001, 2002 and 2003, the Company paid liabilities of such discontinued operations of \$1.2 million, \$0.1 million and \$0.2 million, respectively. During 2001, the Company entered into sublease agreements that reduced its estimated future lease costs by \$0.4 million, which was recognized as income from discontinued operations. The remaining balance of the MicroNet reserve totals \$0.2 million and is included in its net liabilities of discontinued operations. The Company expects to complete making payments as it relates to this discontinued operation in 2004. This obligation has not been discounted to present value.

In July 2001, the Board of Directors of the Company authorized Management to close iNEXTV's Internet video operations in New York City and to cease funding its other affiliates. The Company established a reserve of \$10.3 million at June 30, 2001 to write down its investment to net realizable value and to provide for the costs of closure. The net liabilities of iNEXTV of \$1.1 million reflected on its balance sheet after the impairment charge, together with the provision for closure costs of \$5.7 million, were included in the net liabilities of discontinued operations. During 2001, 2002 and 2003, the Company paid liabilities of such discontinued operations of \$2.0 million, \$1.1 million and \$0.8 million, respectively. The remaining balance in the net liabilities of iNEXTV's discontinued operations totaled \$2.9 million at December 31, 2003. The Company expects to make payments as it relates to this discontinued operation through 2008. This obligation has not been discounted to present value.

A summary of the operating results of iNEXTV is as follows:

	<u>Year Ended December 31,</u>		
	<u>2003</u>	<u>2002</u>	<u>2001</u>
	(in thousands)		
Revenues	\$	\$	\$ 188

Diluted income (loss) per share applicable to common stockholders, as restated	\$ 6.73	\$ 0.42	\$ (7.16)

In the year ended December 31, 2003, the Company issued 515,040 shares of Common Stock to redeem 12,877 shares of Redeemable Preferred Stock. In the year ended December 31, 2002, the Company issued 2,040 shares of Common Stock to redeem 51 shares of Convertible Preferred Stock and 85,920 shares of Common Stock to redeem 2,148 shares of Redeemable Preferred Stock. In the year ended December 31, 2001, the Company issued 42,960 shares of Common Stock to redeem 1,074 shares of Convertible Preferred Stock and 85,920 shares of Common Stock to redeem 2,148 shares of Redeemable Preferred Stock. Such shares of common stock are included in the weighted average common stock outstanding from the dates of exchange.

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Stock options to purchase 41,921 shares of Common Stock at prices ranging from \$2.40 to \$72.50 per share were outstanding at December 31, 2003, but 41,871 shares were not included in the computation of diluted weighted average common stock outstanding as the exercise price was lower than the average market value of the common shares.

Stock options to purchase 129,197 shares of Common Stock at prices ranging from \$2.40 to \$97.50 per share were outstanding at December 31, 2002, but were not included in the computation of diluted loss per share because they are anti-dilutive.

Stock options to purchase 183,085 shares of Common Stock at prices ranging from \$3.40 to \$120.00 per share were outstanding at December 31, 2001, but were not included in the computation of diluted loss per share because they are anti-dilutive.

In January 1998, Warrants to purchase 51,000 shares of Common Stock at \$45.00 per share were issued in connection with the issuance of the Senior Notes. See Note 10. Unexercised warrants of 40,800 of Common Stock expired on March 15, 2003.

	<u>\$ 24,844</u>	<u>\$ 10,471</u>
Total	\$ 24,844	\$ 10,471

The increase in accrued pension liabilities from December 31, 2002 to December 31, 2003 is primarily attributed to the change in interest rate assumptions, portfolio performance and other actuarial assumptions. It is anticipated that pension contributions due under the Company's defined benefit plan and the Media defined plan totaling \$10.7 million will be funded in 2004 by Hillside in which case the Company would issue notes to Hillside in an equivalent amount. See Note 10 and Note 16.

The note is a non-interest-bearing demand promissory note held by NH Holding Incorporated. The outstanding balance at December 31, 2003 of \$0.1 million is expected to be paid or converted into shares of Common Stock.

Hillside Notes

In 1994, the Company, the Pension Benefit Guaranty Corporation (the PBGC) and certain affiliates, including Hillside, who were members of a group under common control for purposes of the Employee Retirement Income Security Act (ERISA) entered into certain agreements in connection with the reorganization of the Company's former parent, NH Holding Incorporated (NHI), relating to the pension plans of the Company and of its former Media subsidiaries, which are substantially underfunded. See Note 16 of the Notes to Consolidated Financial Statements. Pursuant to these agreements, Hillside is obligated to fund pension contributions in the event the Company and/or Media are unable to do so. At the Company's request, Hillside has made pension contributions totaling \$4.0 million through December 31, 2003. The Company has issued notes to Hillside in the amount of the pension contributions. The Company anticipates that due to our senior debt agreements, Hillside will be required to fund future contributions and such amounts are projected to be significant. In this event, the Company will issue additional

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

Notes to Hillside. Under the terms of the Notes, \$150,000 is due on the first anniversary of the Notes with the remainder due on the fourth anniversary of the Notes. Pursuant to amendments to the senior debt agreements, all principal payments on the Hillside Notes will be deferred until after December 31, 2006 with earlier repayment in the event that the Senior Discount Notes and Senior Notes have been repaid in full. The Hillside Notes provide for interest paid quarterly at 1 percent plus 175% of the applicable mid-term Federal rate, (effective rate of 7.11% at December 31, 2003). The Company granted to Hillside a security interest in Data Systems' inventory and other assets as collateral for advances, which it is required to make pursuant to the agreement. The agreement contains certain restrictive covenants which, among other things, restrict the Company's ability to declare dividends, sell all or substantially all of its assets or commence liquidation, or engage in specified transactions with certain related parties, breach of which could result in acceleration of the Company's potential termination liabilities.

F-17

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Senior Notes and Senior Discount Notes***

In the first quarter of 2002 and 2004, the Company restructured its outstanding 12% Senior Notes due 2003 and Data Systems 20% Senior Discount Notes due March 31, 2002. The Senior Notes were exchanged for new Notes due 2008 and the due date of the Senior Discount Notes was extended to 2006. The restructured Notes are secured by liens on the Company's royalty stream that may be generated from existing and future patent licenses and, in addition, the Senior Discount Notes are secured by a deed of trust on Data Systems' manufacturing facility in Colorado Springs, CO and are guaranteed by the Company. The new securities provide for the payment of accrued interest and principal out of Available Cash Flow of the Company, which includes all future royalty proceeds received by the Company, net of withholding taxes, and proceeds of certain potential asset sales less certain debt and specified operating expenses and a working capital reserve of up to \$2.5 million. The Company is required to generate a minimum of \$30 million of Available Cash Flow during the three years ending December 31, 2006 or an event of default will occur under the Senior Note Indenture. Prior to maturity, the new Notes are payable as to accrued interest and principal solely to the extent of Available Cash Flow received by the Company, and unpaid accrued interest is payable through the issuance of additional Notes or capitalized. Through the year ended December 31, 2003, Available Cash Flow totaled \$4.0 million. For the year ended December 31, 2003, interest incurred on the Senior Discount Notes and Senior Notes totaled \$8.8 million. A cash payment in July 2003 of \$3.0 million was applied to reduce accrued interest on the Senior Discount Notes. For the year ended December 31, 2002, interest incurred on the Senior Discount Notes and Senior Notes totaled \$8.1 million. A cash payment of \$1.0 million was applied to reduce accrued interest on the Senior Discount Notes. There have been no cash payments made on the Senior Notes. Additional Senior Notes in the amount of \$3.3 million, representing accrued interest for the period February 16, 2003 to August 15, 2003, were issued in August 2003. Additional Senior Notes in the amount of \$3.1 million, representing accrued interest for the period August 16, 2002 to February 15, 2003, were issued in February 2003. Additional Senior Notes in the amount of \$2.7 million, representing accrued interest for the period February 28, 2002 to August 15, 2002, were issued in August 2002. In addition, additional Senior Notes in the amount of \$3.5 million, representing accrued interest for the period August 15, 2003 to February 15, 2004, were issued in February 2004. The security interest in royalty payments granted to the new 12% Senior Noteholders is subordinated to the security for the Senior Discount Notes and no cash payments on the Senior Notes may be made until all payments of interest and principal have been made on the Senior Discount Notes. All payments due at maturity on the Notes must be made in cash.

The Indentures under which the new securities were issued contain customary affirmative and negative restrictive covenants that limit the payment of dividends, the incurrence of additional indebtedness or liens, certain sales of assets and other actions by the Company and its restricted subsidiaries. In the event of default, the holders of the Notes would be entitled to enforce the liens granted by the Company on its future patent royalty stream and the Colorado Springs facility and to apply amounts collected to repayment of the Notes.

Noncurrent Maturities of Long-term Debt

The following table summarizes the scheduled noncurrent maturities of the Company's long-term debt as of December 31, 2003, for years subsequent to 2004:

<u>Year</u>	<u>(in thousands)</u>
2006	\$ 13,016
2008	61,006

Note 11 - Other Liabilities, restated

	December 31,	
	2003	2002
	Restated	Restated
	(in thousands)	
Pension	\$ 57,281	\$ 58,423
Accrued pension costs for Media Plan	15,302	16,359
Reserve for tax liabilities	1,150	3,324
Other postemployment benefits	226	246
Environmental	295	800
Other	307	307
Total	\$ 74,561	\$ 79,459

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The change in reserve for current and long-term tax liabilities reflects the decrease in reserves provided on prior years' foreign, Federal and state income taxes for years where the Company reached a proposed settlement with tax authorities or where years have been closed to audit. Accordingly, in 2003, the Company recognized a non-cash benefit of income taxes of \$4.2 million.

Note 12 - Commitments and Contingencies, restated***Leases***

The Company leases certain manufacturing and office facilities and equipment under operating lease agreements. At December 31, 2003 future annual lease obligations under leases with noncancellable lease terms in excess of one year were as follows:

<u>Year</u>	<u>(in thousands)</u>
2004	\$ 3,257
2005	3,014
2006	2,965
2007	2,913
2008	1,654
Thereafter	
Total	\$ 13,803

Total rent expense for all operating leases for continuing operations was \$1.7 million, \$1.5 million and \$3.0 million for the years ended December 31, 2003, 2002 and 2001, respectively.

The following is a schedule by years of future minimum lease payments under a capital lease together with the present value of the net minimum lease payments as of December 31, 2003:

<u>Year</u>	<u>(in thousands)</u>
2004	\$ 10
Net minimum lease payments	10
Less amount representing interest	(2)

Present value of net minimum lease payments	\$ 8
---	------

Legal Proceedings

The Company is currently a defendant in lawsuits that have arisen in the ordinary course of its business. Certain subsidiaries have been assessed income and value-added taxes together with penalties and interest. Management does not believe that any such lawsuits or unasserted claims will have a material adverse effect on the Company's financial position, results of operations or cash flows.

The Company reached a proposed settlement with the California Franchise Tax Board to settle income tax and interest assessed for the period 1983 to 1985 while the Company was a subsidiary of The Signal Companies (currently Honeywell International Inc.). The Company has adjusted accruals recorded in prior years in the Consolidated Balance Sheets to reflect this proposed settlement as well as other events. The reversal is included in the caption Provision for (benefit of) income taxes on the Consolidated Statements of Operations and Comprehensive Income (Loss).

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Environmental Matters

Ampex's facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. Ampex has been named from time to time as a potentially responsible party by the United States Environmental Protection Agency with respect to contaminated sites that have been designated as "Superfund" sites, and are currently engaged in various environmental investigation, remediation and/or monitoring activities at several sites located off Company facilities. Management has provided reserves, which have not been discounted, related to investigation and cleanup costs and believes that the final disposition of these matters will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

In October 2003, the California Regional Water Quality Control Board issued the Company a letter, which rescinds continued cleanup requirements for the Sunnyvale, California, site allowing the Company to shut down and remove all remediation equipment and substantially reduce any further obligation. The Company has adjusted the environmental accrual in the Consolidated Balance Sheets to reflect the rescission.

The Company has not accrued any liability for costs that might be assessed against it by federal or state environmental agencies involving sites owned by the Company's former subsidiary Media. Media is primarily responsible for the cleanup at its facilities and at off site locations. The Company believes that it has no material contingent liability in connection with the Media properties.

Guarantees

The Company, as permitted under Delaware law and in accordance with its Bylaws, indemnifies its officers and directors for certain events or occurrences, subject to certain limits, while they were serving at its request in such capacity. The maximum amount of potential future indemnification is unlimited; however, the Company has a Director and Officer Insurance Policy that enables the Company to recover a portion of any future amounts paid. As a result of the insurance policy coverage, the Company believes the fair value of these indemnification agreements is minimal.

The Company's sales agreements indemnify its customers for any expenses or liability resulting from claimed infringements of patents, trademarks or copyrights of third parties. The terms of these indemnification agreements are generally perpetual any time after execution of the agreement. The maximum amount of potential future indemnification is unlimited. However, to date, the Company has not paid any claims or been required to defend any lawsuits with respect to any claim.

The Company has guaranteed certain lease payments with respect to equipment and real estate of subsidiaries. The Company has recorded a liability for substantially the full amount of its guarantee, net of the anticipated sublease income expected to be realized.

The Company is the plan sponsor and is liable to provide funding for plan benefits under a pension plan of a former affiliate, Media, which was sold in 1995. The unfunded accumulated benefit liability is \$19.1 million at December 31, 2003 and such amount has been reflected in total liabilities. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to Ampex in settlement of future pension contributions that may be required under the Media Plan that would be funded by Ampex. Direct pension contributions or reimbursements to Ampex by Media are recognized as an offset to pension cost in the period received.

F-20

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 13 - Preferred Stock**

Each share of Convertible Preferred Stock and Redeemable Preferred Stock entitled the holder thereof to receive noncumulative dividends at the rate of 8% per annum, if declared by the Company's Board of Directors. The Company did not declare dividends on either series of preferred stock. Beginning in June 2001, the Company became obligated to redeem any remaining Convertible Preferred Stock in quarterly installments. For the year ended December 31, 2002, the Company issued 2,040 shares of Common Stock to satisfy the quarterly redemption requirements, leaving no shares of Convertible Preferred Stock outstanding. Beginning in June 1999, the Company became obligated to redeem the Redeemable Preferred Stock in quarterly installments. On October 2, 2003, the Company gave notice of redemption of all of its outstanding 8% Noncumulative Redeemable Preferred Stock. The Company issued 64,440 shares of its Common Stock to satisfy the quarterly redemption requirements through September 30, 2003 and 450,600 shares of its common stock to satisfy the notice of redemption in the fourth quarter, leaving no shares of Redeemable Preferred Stock outstanding. For the year ended December 31, 2002, the Company issued 85,920 shares of its Common Stock to satisfy the quarterly redemption requirements. The Company recognized a benefit from extinguishment of preferred stock to the extent that the face amount of the preferred stock redeemed exceeded the market price of the common stock issued.

Note 14 - Related Party Transactions**Equity Investment:**

In the third quarter of 2003, the Company's unrestricted investment subsidiary invested \$1 million to acquire a 21.6% interest in a limited partnership that was formed by the Company and certain other institutional and individual investors, including the general partner which is controlled by Ampex's CEO, to purchase shares of 4imprint Group plc, a publicly-held British promotional products company. We have used the equity method of accounting for our interest in the limited partnership. The limited partnership accounts for its interest in the products company using the equity method of accounting. The limited partnership holds approximately 17.8% of the outstanding shares of the products company. The Board of Directors of the Company determined that the terms of the Company's investment were at least as favorable as the terms afforded to unrelated investors. Ampex's CEO, Edward Bramson, acquired shares in the company in concert with the limited partnership. Mr. Bramson has recently been appointed the temporary, non-executive Chairman of the Board of the British company. Mr. Bramson has assigned to Ampex all compensation he may receive as a non-executive board member. The investment is included in the caption "Other assets" on the Consolidated Balance Sheets. The equity investment transactions are as follows (in thousands):

Investment in limited partnership	\$ 1,000
Equity in loss of limited partnership	(459)
Receipt of partnership distributions	(55)
	<hr/>
Balance at December 31, 2003	\$ 486
	<hr/>

At December 31, 2003, the Company's proportionate interest in the shares of 4imprint Group plc held by the limited partnership had a fair market value of \$1,993,345.

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

The following table provides summarized financial information on a 100% basis for the limited partnership accounted for under the equity method (in thousands):

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Credit Agreement:

In October 2001, Data Systems entered into a revolving credit agreement with Sherborne & Company Incorporated and borrowed \$1.0 million under the facility, secured principally by Data Systems' inventory. The Company guaranteed all borrowings. The loan was repaid on March 31, 2002 and the Company did not seek to renew the facility. Borrowings bore interest at 8% per annum on the outstanding balance. As a commitment fee, Ampex issued to the lender 50,000 shares of its Common Stock having a market value of approximately \$160,000, which was taken as a charge to amortization of debt financing costs in 2001. The lender, Sherborne & Company Incorporated, is a related party of the Company and is wholly-owned by Edward Bramson, the Chairman and Chief Executive Officer of Ampex Corporation.

Capital Transaction:

In 1995, 1996 and 1997, the Company sold shares of its Class A Common Stock to First Jeffson Corporation (FJC) and to Second Jeffson Corporation (SJC), affiliated corporations controlled by Edward Bramson, the Chairman and Chief Executive Officer of Ampex Corporation. The purchase price was paid part in cash and part with promissory notes. The notes were collateralized by a pledge of shares of Class A Common Stock that were purchased. For several years, the market value of the pledged shares has been substantially less than the principal amount of the notes. In 2002, FJC advised the Company that there could be no assurance that it would be able to obtain additional funds from Mr. Bramson or others to make future payments of interest or principal on the notes. During 2003, FJC failed to make scheduled interest payments amounting to \$205,953 on outstanding notes aggregating \$2,794,050 that were to mature in January 2005 and October 2007. Accordingly, in March 2004, Ampex foreclosed on these notes and caused the pledged shares, which had a fair market value of \$153,000, to be registered in the Company's name. In connection with the foreclosure transaction, FJC also transferred to the Company 500 additional shares of Class A Common Stock and \$12,600 in cash, which represented substantially all of FJC's other assets. The foreclosure action will not affect the Company's net assets or results of operations, exclusive of tax benefits that may be realized in future years. Interest and principal paid by FJC on the notes in prior years totaling \$2.4 million will be retained by Ampex.

Note 15 - Common Stock, Stock Options and Warrants

The Company's authorized capital stock consists of Class A Common Stock (Class A Stock), Class C Common Stock (Class C Stock), and collectively with Class A Stock, the Common Stock) and Preferred Stock. Shares of Class C Stock and Preferred Stock are generally nonvoting except in circumstances specified in the Company's charter documents or as otherwise required by applicable corporate law. Accordingly, holders of Class A Stock are generally the only stockholders with voting rights. Each share of Class C Stock converts into one share of Class A Stock automatically following transfer unless otherwise elected by the transferee.

The Company's 1992 Stock Incentive Plan (the Stock Incentive Plan) for directors, executive officers and other key employees provides for the granting of nonqualified stock options and incentive stock options to acquire Common Stock and/or the granting of stock appreciation rights to obtain, in cash or shares of Common Stock, the benefit of the appreciation of the value of shares of Common Stock after the grant date.

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

At December 31, 2003, there were 41,921 options outstanding under the Stock Incentive Plan, including 40,467 vested options. The exercise prices range from \$2.40 to \$72.50 per share and vesting schedules vary from immediate vesting to vesting over a three-year period.

	Shares Available for Grant	Number of Options	Price per Share	Aggregate Exercise Price	Weighted Average Exercise Price

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 16 - Pension Plans, restated

The Company's domestic employees participate in a qualified noncontributory defined benefit pension plan. Benefits are based on years of service and salary levels during the highest 60 consecutive months of the last 120 consecutive months of service. In early 1994, the Company amended the plan to terminate benefit service and compensation credit accruals as of February 1, 1994. The impact of this curtailment was not material to the Company's liability accounts relating to its pension plan.

Actuarially determined pension expense for the Ampex and Media pension plan in 2003, 2002 and 2001 consisted of the following:

	Year Ended December 31,		
	2003	2002	2001
	Restated	Restated (in thousands)	Restated
<u>Ampex Defined Benefit Pension Plan</u>			
Interest on projected benefit obligation	\$ 11,789	\$ 12,121	\$ 12,340

Actuarial assumptions used to determine the year end benefit obligations for the Ampex and Media pension plan follows:

	<u>December 31,</u>	
	<u>2003</u>	<u>2002</u>
Assumed discount rate	6.25%	6.75%
Rate of compensation increase	N/A	N/A

F-25

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Actuarial assumptions used to determine the net periodic pension costs for the Ampex and Media pension plan follows:

	December 31,	
	2003	2002
Assumed discount rate	6.75%	7.25%
Rate of compensation increase	N/A	N/A
Expected long-term rate of return	8.0%	8.0%

It is anticipated that pension contributions due under the Company's defined benefit plan and the Media defined plan totaling \$10.7 million will be funded in 2004 by Hillside in which case the Company would issue notes to Hillside in an equivalent amount. There were no ERISA required pension contributions in 2003 due for either the Ampex Retirement Plan or for the Media Retirement Plan. ERISA required pension contributions to the Ampex Retirement Plan in 2002 totaling \$2.7 million were funded through the issuance of Notes to Hillside. See Note 10.

The Company is the plan sponsor of the Media Plan although it disposed of Media in November 1995. During 2003, the Company and Media entered into the Retirement Plan Funding and Settlement Agreement, which provides for monthly payments of \$74,000 by Media to Ampex in settlement of future pension contributions that may be required under the Media Plan that would be funded by Ampex. Media made direct pension contributions or reimbursement payments to Ampex totaling \$0.8 million, \$1.0 million and \$1.3 million in 2003, 2002 and 2001, respectively. Payments made by Media either as direct contributions or as reimbursement of amounts paid by Ampex on behalf of Media are recognized as an offset to actuarially computed pension costs. The determination of the obligation and expense for the Ampex and Media pension are dependent on our selection of certain assumptions used by actuaries in calculating such amounts. The assumptions include the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants. Certain of these assumptions are dependent on proposed legislation.

The Ampex and Media defined benefit plans participate in a Master Trust Agreement. Each plan has an undivided interest in the assets of the Master Trust, and ownership is represented by the proportionate dollar interest. In September 2002, the Company and Hillside entered into an agreement whereby an affiliate of Hillside assumed fiduciary responsibility for the management of substantially all of the Master Trust's assets. As a result of this transition, changes were made to certain of the Trust's investment managers to place a greater percentage of assets with managers having an active investment strategy as opposed to investment in broad index funds. Such changes were initiated to seek to limit volatility that had been experienced in recent years.

The Master Trust is invested in a diversified portfolio of cash and short-term securities, equity securities and debt securities, with the vast majority of investments under professional management. Company directed investments consist of cash, investments in limited partnerships that invest in distressed debt securities, equity securities of non-public companies and equity securities of the Company. The Trust does not invest in real estate or derivative securities. The Company and Hillside have established an asset allocation range where equity securities (including non-investment grade debt securities) comprise between 40% to 60% of invested plan assets, with investment grade debt securities comprising the balance of invested assets. Asset allocation percentages are designed to achieve the Trust's long-term expected rate of return and to cushion the portfolio against adverse market swings that may be experienced in debt or equity markets. The amount of cash and short-term investments held by the Master Trust is based on the investment manager's assessment of market conditions, amounts required to fund monthly benefit

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

payments and plan expenses and capital commitments to investment partnerships. In addition, the Company and Hillside have established parameters in the selection of investment managers including historical track record, investment style and minimum dollar value of assets under management. Investment performance is evaluated over an investment cycle, measured against broad market indices that best reflect the particular managers' investment strategy.

The weighted average percentage of fair value for each major category of total plan assets at fair value as of the measurement dates at December 31, 2003 and December 31, 2002 is as follows:

	December 31,	
	2003	2002
	—	—
Equity securities	37%	15%
Debt securities	47%	61%
Cash and short-term investments	16%	24%

F-26

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The market value of the Company's equity securities held by the trust was \$0.1 million and \$0.3 million at December 31, 2003 and December 31, 2002, respectively.

The Company has assumed a long-term rate of return on the Trust's assets of 8% per annum for 2003 and 2002 which is slightly less than the historical average rate of return realized over the past 12 years. While realized returns in 2003 exceeded the target rate, in recent years the fund has sustained negative returns or realized returns that have been below the target rate. However, the Company believes that a target rate of return of 8% is achievable when forecasting performance of a diversified portfolio of equity and debt securities over a long-term investment horizon. Future results may differ from this assumption and if significant differences affect historical returns over several years, the Company would adjust the rate of return assumption to reflect such changes.

The following table reflects the total expected future benefit payments by the Company and Media to plan participants and have been estimated based on the same assumptions used to measure the benefit obligation at the end of the year:

<u>Year</u>	<u>(in thousands)</u>
2004	\$ 17,058
2005	17,082
2006	17,236
2007	17,414
2008	17,751
2009 - 2013	91,743

Certain of the Company's employees employed by a foreign subsidiary are covered by an unfunded pension plan maintained in accordance with local laws. The components of the foreign pension expense were as follows:

	<u>Year Ended December 31,</u>		
	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<u>(in thousands)</u>		
Interest cost	\$ 130	\$ 111	\$ 117
Net periodic pension cost	\$ 130	\$ 111	\$ 117

The amounts included in the Consolidated Balance Sheets for the foreign plan are as follows:

	December 31,	
	2003	2002
	(in thousands)	
Actuarial present value of benefits:		
Vested and total accumulated benefits	\$ 2,454	\$ 2,068
Projected benefit obligation	\$ (2,454)	\$ (2,068)
Remaining unrecognized net obligation (asset)	(17)	17
Accrued pension cost	\$ (2,471)	\$ (2,051)
Accrued benefit liability	\$ (2,471)	\$ (2,051)
Accumulated other comprehensive income	166	180
Net amount recognized	\$ (2,305)	\$ (1,871)

F-27

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following provides a reconciliation of benefit obligations of the foreign plan:

	December 31,	
	2003	2002
	(in thousands)	
Change in benefit obligation:		
Benefit obligation at the beginning of the year	\$ 2,068	\$ 1,630
Interest cost	131	111
Actuarial gain/(loss)	(34)	93
Currency gain	407	304
Benefits paid	(118)	(70)
	<u> </u>	<u> </u>
Benefit obligation at the end of the year	<u>\$ 2,454</u>	<u>\$ 2,068</u>

Actuarial assumptions used to determine the year end benefit obligation and the net periodic cost for the foreign plan follows:

	December 31,	
	2003	2002
Assumed discount rate	5.50%	6.00%
Rate of compensation increase	N/A	N/A
Expected long-term rate of return	N/A	N/A

The expected future benefit payments of the foreign plan are as follows:

Year	(in thousands)
2004	\$ 156
2005	163
2006	170
2007	176
2008	181
2009 - 2013	930

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

In accordance with Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions, the Company has recorded a cumulative minimum pension liability for the underfunded plans of \$92.9 million representing the excess of unfunded accumulated benefit obligations over previously recorded pension cost liabilities at December 31, 2003. To the extent that these additional liabilities exceed related unrecognized prior service cost and net transition obligations, the increase or decrease in liabilities was charged directly to stockholders' deficit. For 2003, 2002 and 2001, stockholders' deficit was charged \$8.9, \$33.0 million and \$33.4 million, respectively.

The Company also maintains a 401(k) savings plan available to domestic employees. The Company matches certain portions of employee contributions after one year of service. Contributions and expenses in connection with this plan amounted to \$0.2 million, \$0.2 million and \$0.4 million for the year ended December 31, 2003, 2002 and 2001, respectively.

Note 17 - Royalty Income

In 2003 and 2001, the Company received and recognized payments in the amount of \$5.4 and \$3.5 million, respectively, attributable to negotiated settlements related to prior years' sales of products by licensees. The royalties for 2002 and the balance of royalties recognized in 2003 and 2001 represent royalties for product shipments in the current period.

AMPEX CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 18 - Restructuring Charges

Restructuring charges for the years ended December 31, 2003, 2002 and 2001 consist of the following:

	Year Ended December 31,		
	2003	2002	2001
	(in thousands)		
Provisions for vacated lease obligations	\$ 3,098	\$ 2,245	\$ 2,000
Write-down of property, plant and equipment			451
Provisions for employee separation costs			1,014
Provisions for relocation			53
	<u>\$ 3,098</u>	<u>\$ 2,245</u>	<u>\$ 3,518</u>

A reconciliation of the changes in the restructuring accounts is as follows:

	2003	2002
	(in thousands)	
Balance at January 1	\$ 3,000	2,038
Accruals during the period	3,098	2,245
Payments made during the period	(1,348)	(1,283)
Balance at December 31	<u>\$ 4,750</u>	<u>\$ 3,000</u>

The Company recorded a net restructuring charge in 2003 and 2002 of \$3.1 million and \$2.2 million, respectively, as a result of a provision for future lease obligations, net of estimated sublease rental income on facilities in Redwood City, California. The Company recorded a net restructuring charge in 2001 of \$3.5 million. The Company's consolidation of facilities in Redwood City, California resulted in a total charge of \$2.5 million including a \$2.0 million provision for future lease obligations, net of estimated sublease rental income, \$0.5 million for the write-off of leasehold improvements and \$53 thousand in connection with relocation charges. The remaining \$1.0 million restructuring charge represented costs associated with the elimination of approximately 86 U.S. positions in engineering, manufacturing and administration which were completed by year-end. At December 31, 2003, the Company had a \$4.8 million remaining liability entirely related to the future lease obligations, net of estimated sublease rental income, on facilities in Redwood City. The lease obligations associated with the Company's restructuring have not been discounted to present value.

Note 19 - Income Taxes, restated

Income (loss) from continuing operations before income taxes for domestic and foreign operations consisted of the following:

	Year Ended December 31,		
	2003	2002	2001
	Restated	Restated	Restated
	(in thousands)		
Domestic	\$ (4,898)	\$ (9,050)	\$ (8,016)
Foreign	(38)	(64)	(428)
	\$ (4,936)	\$ (9,114)	\$ (8,444)

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The provision for (benefit of) income taxes consisted of the following:

	Year Ended December 31,		
	2003	2002	2001
	(in thousands)		
Current:			
Federal	\$ (1,930)	\$ (1,000)	\$ -
State	(2,000)	(4,500)	(24)
Foreign	(238)	(1,154)	(31)
Foreign withholding taxes on royalty income	996	412	1,230
	<u>(3,172)</u>	<u>(6,242)</u>	<u>1,175</u>
Long-term:			
State			
Foreign			
	<u>\$ (3,172)</u>	<u>\$ (6,242)</u>	<u>\$ 1,175</u>

The difference between taxes computed by applying the statutory federal corporate income tax rate (effective for 2003, 2002, and 2001) to income (loss) from continuing operations before income taxes and the actual provision for income taxes was as follows:

	Year Ended December 31,		
	2003	2002	2001
	(in thousands)		
Federal income tax provision at statutory rate	\$ (1,728)	\$ (3,190)	\$ (2,955)
Domestic losses not benefited	1,715	3,168	2,805
Foreign losses not benefited	13	22	150
Rates in excess of U.S.	996	412	1,230
Reversal of prior years foreign, Federal, state and deferred income taxes	(4,164)	(6,713)	
Other, net	(4)	59	(55)
	<u>\$ (3,172)</u>	<u>\$ (6,242)</u>	<u>\$ 1,175</u>

Edgar Filing: AMPEX CORP /DE/ - Form 10-K/A

During the year ended December 31, 2003 and 2002, the Company benefited from a non-cash reversal of reserves of \$4.2 million and \$6.7 million, respectively, provided on prior years' foreign, Federal, state and deferred income taxes for years where the Company reached a proposed settlement with tax authorities or where years have been closed to audit or otherwise determined not to be required.

F-30

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table shows the major components of the deferred income tax assets and liabilities as of December 31, 2003 and 2002:

	December 31,	
	2003	2002
	(in thousands)	
Inventory basis differences	\$ 1,758	\$ 2,276
Restructuring reserves and other liabilities not yet deductible for tax purposes	27,477	21,599
Loss carryforwards	77,770	75,847
Property, plant and equipment Basis differences	931	858
Credit from prior year's minimum tax	1,191	1,191
Other	1,853	1,861
Less valuation allowance	(110,980)	(103,632)
Deferred tax liability	\$	\$

The Company must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes.

The Company must assess the likelihood that it will be able to recover the deferred tax assets. If recovery is not likely, the Company must increase its provision for taxes by recording a valuation allowance against the deferred tax assets that it estimates will not ultimately be recoverable. Since the Company has reported losses in recent years, it can not determine that it is probable that it will recover the deferred tax assets and accordingly has established a valuation allowance equal to such deferred tax assets.

In addition, the calculation of the Company tax liabilities involves dealing with uncertainties in the application of complex tax regulations. The Company recognizes liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. If the Company ultimately determine that payment of these amounts is unnecessary, it reverses the liability and recognizes a tax benefit during the period in which it determines that the liability is no longer necessary. The Company records an additional charge in its provision for taxes in the period in which it determines that the recorded tax liability is less than it expects the ultimate assessment to be.

As at December 31, 2003, the Company had net operating loss carryforwards for income tax purposes of \$197 million expiring in the years 2005 through 2023. As a result of the financing transactions that were completed in April 1994 and February 1995, the Company's ability to utilize its net operating losses and credit carryforwards as an offset against future consolidated federal income tax liabilities will be restricted in its application, which will result in a material amount of the net operating loss never being utilized by the Company.

Note 20 - Segment Reporting, restated

The Company has two operating segments: high-performance mass data storage systems, instrumentation recorders and professional video recorders (Recorders) and licensing of intellectual property. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

The Company evaluates segment performance based on return on operating assets employed. Profitability is measured as income or loss from continuing operations before income taxes excluding goodwill amortization and restructuring charges.

	<hr/>	<hr/>
Total	\$ 35,197	\$ 29,339
	<hr/>	<hr/>

Transfers between geographic areas are at cost plus a reasonable profit. Identifiable assets are classified by the location of the Company's facilities and includes accounts receivable, inventories, other assets and property, plant and equipment. Corporate assets consisted principally of cash, investments, interest receivable and deferred financing fees at December 31, 2003 and 2002.

Note 22 - Major Customers

The Company recorded revenue from one licensee and one customer, BAE, in 2003, which each individually accounted for more than 10% of the total revenue and collectively accounted for 29.3%. The Company recorded revenue from two customers in 2002, Lockheed Martin and ADIC, which each individually accounted for more than 10% of the total revenue and collectively accounted for 28.0%. The Company recorded revenue from one licensee and one customer in 2001, which each individually accounted for more than 10% of the total revenue and collectively accounted for 24.8%.

Table of Contents**AMPEX CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 23 Subsequent Events**

In March 2004, the Company received consent from the holders of its senior debt securities (i) to extend the maturity date of its Senior Discount Notes from January 5, 2005 to January 5, 2006, (ii) to extend the measurement date from December 31, 2004 to December 31, 2006, by which the Company is required to generate at least \$30 million of Available Cash Flow, as defined in the Senior Note indenture, and (iii) to defer scheduled principal repayments on its pension notes through December 31, 2006.

Additional Senior Notes in the amount of \$3.5 million, representing accrued interest for the period August 15, 2003 to February 15, 2004, were issued in February 2004.

Note 24 Unaudited Quarterly Financial Information, restated

The following is a summary of the unaudited quarterly financial information for the years ended December 31, 2003 and 2002.

Fiscal 2003 Quarters ended	(in thousands, except share and per share data)			
	March 31	June 30	Sept. 30	Dec. 31
