AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements - Unaudited

January 31, 2008

A. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-1 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of our management, these condensed consolidated financial statements contain all normal recurring adjustments considered necessary for a fair presentation of the financial position at January 31, 2008, the results of operations for the three and nine months ended January 31, 2008 and 2007 and cash flows for the nine months ended January 31, 2008 and 2007. The results for the three and nine months ended January 31, 2008 are not necessarily indicative of the results expected for the full year. You should read these statements in conjunction with our audited consolidated financial statements and management's discussion and analysis and results of operations included in our annual report on Form 10-K for the year ended April 30, 2007.

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Note 1 in the Notes to the Consolidated Financial Statements for the fiscal year ended April 30, 2007, describes the significant accounting policies that we used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to those related to revenue/vendor specific object evidence (VSOE), bad debts, capitalized software costs, goodwill, intangible asset impairment, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

B. Principles of Consolidation

The consolidated financial statements include the accounts of American Software, Inc., and its wholly and majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

C. Revenue Recognition

We recognize revenue in accordance with Statement of Position No. 97-2: Software Revenue Recognition, (SOP 97-2) and Statement of Position No. 98-9: Modification of SOP 97-2, Software Revenue Recognition With Respect to Certain Transactions (SOP 98-9).

License. We recognize license revenue in connection with license agreements for standard proprietary software upon delivery of the software, provided we consider collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and VSOE exists with respect to any undelivered elements of the arrangement. For multiple-element arrangements, we recognize revenue under the residual method as permitted by SOP 98-9, whereby (1) the total fair value of the undelivered elements, as indicated by VSOE, is deferred and subsequently recognized in accordance with SOP 97-2 and (2) the difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements. We record revenues from sales of third-party products in accordance with Emerging Issues Task Force Issue 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent (EITF 99-19). Furthermore, in accordance with EITF 99-19, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not we: 1) act as principal in the transaction, 2) take title to the products, 3) have risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and 4) act as an agent or broker with compensation on a commission or fee basis. Accordingly, in most cases we record our revenues through the DMI channel on a gross basis.

Maintenance. Revenue derived from maintenance contracts primarily includes telephone consulting, product updates, and releases of new versions of products previously purchased by the customer, as well as error reporting and correction services. Typically, we sell maintenance contracts for a separate fee with initial contractual periods ranging from one to three years with renewal for additional periods thereafter. We generally bill maintenance fees annually in advance. We recognize maintenance revenue ratably over the term of the maintenance agreement. In situations where we bundle all or a portion of the maintenance fee with the license fee, VSOE for maintenance is determined based on prices when sold separately.

Table of Contents

AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements - Unaudited

January 31, 2008

Services. Revenue derived from services primarily includes consulting, implementation, and training. We primarily bill fees under time and materials arrangements and recognize them as services are performed. In accordance with the FASB's Emerging Issues Task Force Issue No. 01-14: Income Statement Characterization of Reimbursements Received for Out-of-Pocket Expenses Incurred (EITF No. 01-14), we recognize amounts received for reimbursement of travel and other out-of-pocket expenses incurred as revenue in the consolidated statements of operations under Services and Other. Reimbursements received from customers for out-of-pocket expenses totaled approximately \$383,000 and \$1.5 million for the three and nine months ended January 31, 2008, respectively, and \$336,000 and \$925,000 for the three and nine months ended January 31, 2007, respectively.

Indirect Channel Revenue. We recognized revenues for sales made through indirect channels principally when the distributor makes the sale to an end-user, when the license fee is fixed or determinable, the license fee is nonrefundable, and the sale meets all other conditions of SOP 97-2 and SOP 98-9.

Deferred Revenue. Deferred revenue represents advance payments or billings for software licenses, services, and maintenance billed in advance of the time revenue is recognized.

D. Major Customer

One customer accounted for approximately 14% and 13% of our total revenues for the three and nine months ended January 31, 2008, respectively. No single customer accounted for more than 10% of our total revenues during the three and nine months ended January 31, 2007. The related accounts receivable balance for this customer as of January 31, 2008 was approximately \$1.4 million.

E. Declaration of Dividend Payable

On November 20, 2007, our Board of Directors declared a quarterly cash dividend of \$0.09 per share of American Software Class A and Class B common stock. The cash dividend is payable on March 10, 2008 to Class A and Class B shareholders of record at the close of business on February 22, 2008.

F. Earnings Per Common Share

The Company has two classes of common stock of which Class B common shares are convertible into Class A common shares at any time, on a one-for-one basis. Under the Company's Articles of Incorporation, if dividends are declared, holders of Class A common shares shall receive a \$0.05 dividend per share prior to the Class B common stock receiving any dividend and holders of Class A common stock shall receive a dividend at least equal to Class B common stock dividends on a per share basis. As a result, the Company has computed the earnings per share in compliance with Statement of Financial Accounting Standards (SFAS) No. 128, Earnings per Share, which requires companies that have multiple classes of equity securities to use the two-class method in computing earnings per share.

For the Company's basic earnings per share calculation, the Company uses the two-class method. Basic earnings per share are calculated by dividing net earnings attributable to each class of common stock by the weighted average number of shares outstanding. All undistributed earnings are allocated evenly between Class A and B common stock in the earnings per share calculation to the extent that earnings equal or exceed \$0.05 per share. This allocation is based on management's judgment after considering the dividend rights of the two classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares to Class A shares. Due to Class B shares converting to Class A shares during the period, the distributed net earnings for Class B shares is calculated using the weighted average common shares outstanding during the period.

Diluted earnings per share is calculated similar to basic earnings per share, except that the calculation includes the dilutive effect of the assumed exercise of options issuable under the Company's stock incentive plans. For the Company's diluted earnings per share calculation for Class A shares, the Company uses the if-converted method. This calculation assumes that all Class B common shares are converted into Class A

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

common shares and, as a result, assumes there are no holders of Class B common shares to participate in undistributed earnings.

Table of Contents**AMERICAN SOFTWARE, INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements - Unaudited****January 31, 2008**

For the Company's diluted earnings per share calculation for Class B shares, the Company uses the two-class method. This calculation does not assume that all Class B common shares are converted into Class A common shares. In addition, this method assumes the dilutive effect of Class A stock options converted to Class A shares and the undistributed earnings are allocated evenly to both Class A and B shares including Class A shares issued pursuant to those converted stock options. This allocation is based on management's judgment after considering the dividend rights of the two classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares into Class A shares.

The following tables set forth the computation of basic earnings per common share and diluted earnings per common share (in thousands except for per share amounts):

Basic earnings per common share:

	Three Months Ended January 31, 2008		Nine Months Ended January 31, 2008

* Adjusted for rounding

For the three and nine months ended January 31, 2008, we excluded options to purchase 665,360 and 72,647 Class A Common Shares, respectively, and for the three and nine months ended January 31, 2007, we excluded options to purchase 154,050 and 252,050 Class A Common Shares, respectively, from the computation of diluted earnings per Class A common stock. We excluded these option share amounts because the exercise prices of those options were greater than the average market price of the Class A common stock during the applicable period. As of January 31, 2008, we had a total of 2,913,360 options outstanding and as of January 31, 2007 we had a total of 3,145,510 options outstanding.

Notes to Condensed Consolidated Financial Statements - Unaudited

January 31, 2008

G. Acquisitions

Logility Share Repurchase

On June 28, 2007, Logility, Inc., our approximately 87% owned subsidiary, purchased 30,000 shares of its common stock for \$337,800. In accordance with SFAS No. 141, Business Combinations, we have accounted for this transaction under the purchase method of accounting. The total amount allocated from this transaction was \$365,289, which includes approximately \$27,000 related to the non-cash tax effects of this treasury stock purchase. We have allocated the \$365,289 to capitalized software development costs, totaling approximately \$27,000, intangible assets, totaling approximately \$45,000, and goodwill, totaling approximately \$293,000, based on management's estimates of fair value at the date of the transaction. The costs allocated to capitalized software development costs and intangible assets are being amortized ratably based on the projected revenues associated with the related assets of Logility, Inc. or on a straight-line basis over three to six years, whichever method results in a higher level of amortization. Amortization of these capitalized costs is included in the cost of license revenues and general and administrative costs in the accompanying consolidated statements of operations for capitalized software development costs and intangible assets, respectively.

H. Stock-Based Compensation

Effective May 1, 2006, we adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123(R) (SFAS 123(R)). Share-Based Payment using the modified prospective transition method. Under this transition method, compensation cost recognized on or after May 1, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of May 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted on or after May 1, 2006, based on the grant date fair value estimated in accordance with SFAS 123(R).

During the nine months ended January 31, 2008 and 2007, we granted options for 605,197 and 385,000 shares of common stock, respectively. During the nine months ended January 31, 2008 and 2007, our subsidiary granted options for 20,000 and 114,000 shares of common stock, respectively.

We recorded stock option compensation cost of approximately \$218,000 and \$194,000 and related income tax benefits of approximately \$5,000 and income tax expense of \$15,000 during the three months ended January 31, 2008 and 2007, respectively. The additional expense of \$15,000 recorded during the three months ended January 31, 2007 resulted from a correction of previously recorded amounts. For the nine months ended January 31, 2008 and 2007, we recorded stock option compensation cost of approximately \$581,000 and \$636,000 and related income tax benefits of approximately \$66,000 and \$139,000, respectively. We record stock-based compensation expense on a straight-line basis over the vesting period directly to additional paid-in capital.

SFAS 123(R) requires that cash flows resulting from the tax benefits generated by tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. During the nine months ended January 31, 2008 and 2007, we realized excess tax benefits of approximately \$1,374,000 and \$812,000, respectively.

During the nine months ended January 31, 2008 and 2007, we issued 759,299 and 249,446 shares of common stock, respectively, resulting from the exercise of stock options. During the nine months ended January 31, 2008 and 2007, our subsidiary issued 83,276 and 34,961 shares of common stock, respectively, resulting from the exercise of stock options. The total intrinsic value of options exercised during the nine months ended January 31, 2008 and 2007 based on market value at the exercise dates was \$5,017,378 and \$1,125,318, respectively. The total intrinsic value of options exercised at our subsidiary during the nine months ended January 31, 2008 and 2007 based on market value at the exercise dates was \$685,946 and \$201,609, respectively. As of January 31, 2008, unrecognized compensation cost related to unvested stock option awards approximated \$2.3 million and is expected to be recognized over a weighted average period of 2.1 years. As of January 31, 2008, unrecognized compensation cost related to unvested stock option awards at our subsidiary approximated \$1.2 million and is expected to be recognized over a weighted average period of 2.1 years.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

On May 15, 2007, the Logility Board of Directors adopted the Logility, Inc. 2007 Stock Plan. The 2007 Stock Plan was approved by Logility's Shareholders on August 21, 2007, at the Logility annual meeting of Shareholders. The 2007 Stock

Table of Contents

AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements - Unaudited

January 31, 2008

Plan replaced Logility's 1997 Stock Plan, which expired on August 7, 2007 and provides for the granting of options to purchase up to 500,000 shares of common stock and up to 300,000 stock appreciation rights units, on terms similar to those in the 1997 Stock Plan. Options previously granted under the 1997 Stock Plan will continue to be exercisable in accordance with their terms.

On June 21, 2007, our Board of Directors approved an increase in authorized shares under the 2001 Stock Plan for the granting of options to purchase an additional 800,000 shares of common stock. This motion was approved by Shareholders on August 20, 2007 at the annual meeting of Shareholders.

On July 17, 2007, we exercised our right to extend the term of the Stock Option Agreement between the Company and Logility, Inc. for an additional ten years, expiring August 7, 2017.

I. Comprehensive Income

We have adopted Statement of Financial Accounting Standards (SFAS) No. 130, Reporting Comprehensive Income. SFAS No. 130 establishes standards for reporting and presentation of comprehensive income and its components in a full set of financial statements. We have not included condensed consolidated statements of comprehensive income in the accompanying unaudited condensed consolidated financial statements since comprehensive income and net earnings presented in the accompanying condensed consolidated statements of operations would be substantially the same.

J. Industry Segments

We have adopted SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information*. We operate and manage our business in three segments based on software and services provided in three key product markets: (i) Enterprise Resource Planning (ERP), which automates customers' internal financing, human resources, and manufacturing functions; (ii) Collaborative Supply Chain Management, which provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners; and (iii) IT Consulting, which consists of IT staffing and consulting services. The Collaborative Supply Chain Management segment represents the business of our 88%-owned subsidiary Logility, Inc., including its subsidiary, DMI. In the following table, we have broken down the intersegment transactions applicable to the three and nine months ended January 31, 2008 and 2007 (in thousands):

K. Contingencies

The Company more often than not indemnifies its customers against damages and costs resulting from claims of patent, copyright, or trademark infringement associated with use of the Company's products. The Company has historically not been required to make any payments under such indemnifications. However, the Company continues to monitor the conditions that are subject to the indemnifications to identify whether it is probable that a loss has occurred, and would recognize any such losses under the indemnifications when those losses are estimable. In addition, the Company warrants to customers that the Company's products operate substantially in accordance with the software product's specifications. Historically, no costs have been incurred related to software product warranties and none are expected in the future, and as such no accruals for software product warranty costs have been made. Additionally, the Company is involved in various claims arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on the financial position or results of operations of the Company.

L. Recent Accounting Pronouncements

In July 2006, the FASB issued SFAS Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of SFAS Statement No. 109. FIN 48 applies to all tax positions accounted for under SFAS 109. FIN 48 refers to tax positions as positions taken in a previously filed tax return or positions expected to be taken in a future tax return that are reflected in measuring current or deferred income tax assets and liabilities reported in the financial statements. FIN 48 further clarifies a tax position to include the following:

A decision not to file a tax return in a particular jurisdiction for which a return might be required,

An allocation or a shift of income between taxing jurisdictions,

The characterization of income or a decision to exclude reporting taxable income in a tax return, or

A decision to classify a transaction, entity, or other position in a tax return as tax exempt.

FIN 48 clarifies that a tax benefit may be reflected in the financial statements only if it is more likely than not that a company will be able to sustain the tax return position, based on its technical merits. If a tax benefit meets this criterion, it should be measured and recognized based on the largest amount of benefit that is cumulatively greater than 50% likely to be realized. This is a change from prior practice, whereby companies were able to recognize a tax benefit only if it is probable a tax position will be sustained.

On May 1, 2007, we adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). As a result of the implementation of FIN 48, we recognized a decrease of approximately \$1.4 million to current income taxes payable and recorded a corresponding increase to the May 1, 2007 balance of retained earnings. As of the date of adoption, our unrecognized tax benefits totaled \$120,000, inclusive of interest and penalties of approximately \$52,000, mainly related to state income taxes, all of which, if recognized, would affect the effective tax rate. An additional accrual of \$34,000, inclusive of interest and penalties of approximately \$1,000, was made for the nine months ended January 31, 2008.

We recognize potential accrued interest and penalties related to unrecognized tax benefits within its operations in income taxes. To the extent interest and penalties are not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

We conduct business globally and, as a result, file income tax returns in the United States Federal jurisdiction and in many state and foreign jurisdictions. We are no longer subject to U.S. Federal, state and local, or non-U.S. income tax examinations for years prior to 2000.

We do not anticipate that total unrecognized tax benefits will significantly change in the next twelve months due to the expiration of statute of limitations prior to March 31, 2008.

In June 2006, the FASB ratified Emerging Issues Task Force (EITF) Issue 06-03: *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That is, Gross Versus Net*

Table of Contents

AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements - Unaudited

January 31, 2008

Presentation). EITF 06-03 provides that any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer may include, but is not limited to, sales, use, value added, and some excise taxes. EITF 06-03 also provides that the presentation of taxes on either a gross (included in revenues and costs) or a net (excluded from revenues) basis is an accounting policy decision that a company should make and disclose in its financial statements. Any such taxes that are reported on a gross basis, if material, should be disclosed in interim and annual financial statements for each period for which an income statement is presented. The disclosure of those taxes can be done on an aggregate basis. EITF 06-03 is effective for financial statements for interim and annual reporting periods beginning after December 15, 2006. We recognize taxes collected from customers and remitted to governmental authorities on a net basis, therefore, no additional disclosures are deemed necessary.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which becomes effective for fiscal periods beginning after November 15, 2007. SFAS No. 157 addresses the definition of fair value, the methods used to measure fair value and the expanded disclosures about fair value measurement of a company's assets and liabilities. SFAS No. 157 requires that the fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. We do not expect this Issue to have a material impact on our 2009 consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115*, which becomes effective for fiscal periods beginning after November 15, 2007. Under SFAS No. 159 companies may elect to measure specified financial instruments and warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. The election called the fair value option will enable some companies to reduce volatility in reported earnings caused by measuring related assets and liabilities differently. We do not expect this issue to have a material impact on our 2009 consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, which becomes effective for fiscal periods beginning after December 15, 2008. SFAS No. 141(R) requires all business combinations completed after the effective date to be accounted for by applying the acquisition method (previously referred to as the purchase method). Companies applying this method will have to identify the acquirer, determine the acquisition date and purchase price and recognize at their acquisition-date fair values of the identifiable assets acquired, liabilities assumed, and any non-controlling interests in the acquiree. In the case of a bargain purchase the acquirer is required to re-evaluate the measurements of the recognized assets and liabilities at the acquisition date and recognize a gain on that date if an excess remains. We do not expect this issue to have a material impact on our 2010 consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements, an Amendment of ARB 51*, which becomes effective for fiscal periods beginning after December 15, 2008. This statement amends ARB 51 to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. The statement requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the non-controlling interest. It also requires disclosure on the face of the consolidated statement of income, the amounts of consolidated net income attributable to the parent and to the non-controlling interest. In addition, this statement establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that does not result in deconsolidation and requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. We do not expect this issue to have a material impact on our 2010 consolidated financial statements.

L. Subsequent Event

On February 19, 2008, our Board of Directors declared a quarterly cash dividend of \$0.09 per share of American Software Class A and Class B common stock. The cash dividend is payable on May 30, 2008 to Class A and Class B shareholders of record at the close of business on May 16, 2008.

On March 7, 2008 we purchased 30,000 shares of common stock for approximately \$170,000 under the current authorized share buy-back program.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

On March 7, 2008 our subsidiary purchased 25,000 shares of its common stock for approximately \$143,000 under the current authorized share buy-back program.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations **FORWARD-LOOKING STATEMENTS**

This report on Form 10-Q contains forward-looking statements relating to our future financial performance, business strategy, financing plans and other future events that involve uncertainties and risks. You can identify these statements by forward-looking words such as anticipate, intend, plan, continue, could, grow, may, potential, predict, strive, will, seek, estimate, believe, expect, and similar words. Forward-looking statements are subject to uncertainty of future events or outcomes. Any forward-looking statements we make herein are pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning future:

results of operations

liquidity, cash flow and capital expenditures

demand for and pricing of our products and services

acquisition activities and the effect of completed acquisitions

industry conditions and market conditions

general economic conditions

Although we believe that the goals, plans, expectations, and prospects that our forward-looking statements reflect are reasonable in view of the information currently available to us, those statements are not guarantees of performance. There are many factors that could cause our actual results to differ materially from those anticipated by forward-looking statements made herein. These factors include, but are not limited to, continuing economic uncertainty, the timing and degree of business recovery, unpredictability and the irregular pattern of future revenues, competitive pressures, delays and other risks associated with new product development, the difficulty of predicting the effectiveness and duration of third-party marketing agreements, undetected software errors, and risks associated with market acceptance of our products and services. We discuss certain factors in greater detail in "Business Overview", below. The terms "fiscal 2008" and "fiscal 2007" refer to our fiscal years ending April 30, 2008 and 2007, respectively.

ECONOMIC OVERVIEW

Corporate capital spending trends and commitments are the primary determinants of the size of the market for business software. Corporate capital spending is, in turn, a function of general economic conditions in the U.S. and abroad, and in particular may be affected by conditions in U.S. and global credit markets. In the recent period, the weakness in the overall world economy and the U.S. economy in particular, has resulted in reduced expenditures in the business software market. Overall information technology spending continues to be relatively weak when compared to the period prior to the last economic downturn.

However, we believe over the long-term information technology spending should incrementally improve as increased global competition forces companies to improve productivity by upgrading their technology environment systems. Although this improvement could slow or regress at any time due in part to the recent concerns in the global capital markets, we believe that our organizational and financial structure will enable us to take advantage of any sustained economic rebound. While our sales pipelines have been improving, customers continue to take long periods to evaluate discretionary software purchases.

BUSINESS OVERVIEW

American Software, Inc. ("American Software" or the "Company") was incorporated as a Georgia corporation in 1970. We develop, market and support a portfolio of software and services that deliver enterprise management and collaborative supply chain solutions to the global

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

marketplace. We have designed our software and services to bring business value to enterprises by supporting their operations over intranets, extranets, client/servers or the Internet. References to the Company, our products, our software, our services and similar references include the appropriate business unit actually providing the product or service.

We provide our software solutions through three major business segments, which are further broken down into a total of four major product and service groups. The three business segments are (1) Enterprise Resource Planning (ERP), (2) Collaborative Supply Chain Management (SCM), and (3) Information Technology (IT) Consulting. The Collaborative Supply Chain Management segment consists of Logility, Inc., an 87% owned subsidiary that provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners. The ERP segment consists of (i) American Software ERP, which provides purchasing and materials

Table of Contents

management, customer order processing, financial, e-commerce, Flow Manufacturing and traditional manufacturing solutions, and (ii) New Generation Computing (NGC), which provides industry specific business software to both retailers and manufacturers in the Apparel, Sewn Products and Furniture industries. The IT Consulting segment consists of The Proven Method, an IT staffing and consulting services firm.

On September 30, 2004, Logility acquired certain assets and the distribution channel of privately-held Demand Management, Inc. (DMI), a St. Louis-based provider of supply chain planning systems marketed under the Demand Solutions® brand. The acquisition provided more than 800 active customers, which brought the Logility customer base to approximately 1,100 companies, located in 70 countries, and gives Logility what we believe to be the largest installed base of supply chain planning customers among application software vendors. Since the acquisition, Logility has continued to market and sell the Demand Solutions product line through Demand Management's existing value-added reseller (VAR) distribution network. Logility also continues to offer the Logility Voyager Solutions suite to its traditional target market of upper-midsize to Fortune 1000 companies with distribution-intensive supply chains.

We derive revenue primarily from three sources: software licenses, services and other, and maintenance. We generally determine software license fees based on the number of modules, servers, users and/or sites licensed. Services and other revenues consist primarily of fees from software implementation, training, consulting and customization services. We primarily bill under time and materials arrangements and recognize revenue as we perform services. We typically enter into maintenance agreements for a one- to three-year term at the time of the initial product license. We generally bill maintenance fees annually in advance and then recognize the resulting revenue ratably over the term of the maintenance agreement. Deferred revenue represents advance payments or billings for software licenses, services and maintenance billed in advance of the time we recognize the related revenues.

Our cost of revenue for licenses includes amortization of capitalized computer software development costs, salaries and benefits, and royalties paid to third-party software vendors as well as agent commission expenses related to license revenues generated by the indirect channel primarily from DMI. Costs for maintenance and services include the cost of personnel to conduct implementations and customer support, consulting, and other personnel-related expenses as well as agent commission expenses related to maintenance revenues generated by the indirect channel primarily from DMI. We account for the development costs of software intended for sale in accordance with SFAS No. 86,

Accounting for Costs of Computer Software to be Sold, Leased, or Otherwise Marketed. We monitor the net realizable value of our capitalized software on a quarterly basis based on an estimate of future product revenues. We currently expect to fully recover the value of the capitalized software asset recorded on our consolidated balance sheet; however, if future product revenues are less than management's current expectations, we may incur a write-down of capitalized software costs.

Our selling expenses generally include the salary and commissions paid to our sales professionals, along with marketing, promotional, travel and associated costs. Our general and administrative expenses generally include the salary and benefits paid to executive, corporate and support personnel, as well as facilities related costs, utilities, communications expenses, and various professional fees. DMI sells its products primarily through indirect channels.

We currently view the following factors as the primary opportunities and risks associated with our business:

Strategic Relationships. We intend to expand the depth and number of strategic relationships with leading enterprise software, systems integrators and service providers to integrate our solutions into their services and products and to create joint marketing opportunities. We have a number of marketing alliances, including those with SAP and IBM. In addition, we have developed a network of international agents who assist in the sale and support of our products. We intend to utilize these and future relationships with software and service organizations to enhance our sales and marketing position.

Dependence on Capital Spending Patterns. There is risk associated with our dependence on, and the risks associated with, the capital spending patterns of U.S. and international businesses, which in turn are functions of economic trends and conditions over which we have no control.

Acquisition Opportunities. There are opportunities for select acquisitions or investments to provide opportunities to expand our sales distribution channels and/or broaden our product offering by providing additional solutions for our target markets.

Acquisition Risks. There are risks associated with acquisitions of complementary companies, products and technologies, including the risks that we will not achieve the financial and strategic goals that we contemplate at the time of the transaction. More specifically, in any acquisition we will face risks and challenges associated with the uncertain value of the acquired business or assets, the difficulty of assimilating operations and personnel, integrating acquired technologies and products and maintaining the loyalty of the customers of the acquired business.

Table of Contents

Competitive Technologies. There is a risk that our competitors may develop technologies that are substantially equivalent or superior to our technology.

Competition in General. There are risks inherent in the market for business application software and related services, which has been and continues to be intensely competitive; for example, some of our competitors may become more aggressive with their prices and/or payment terms, which may adversely affect our profit margins.

Sarbanes-Oxley Section 404. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we are required to include our assessment of the effectiveness of our internal control over financial reporting in our annual reports. Our independent registered public accounting firm is also required to audit our internal control over financial reporting and to separately report on whether or not they believe that we have an effective internal control over financial reporting, in all material respects. If for any fiscal year we fail to timely complete this assessment, or if our independent registered public accounting firm cannot timely audit our internal control over financial reporting, we could be subject to regulatory sanctions and a possible loss of public confidence in the reliability of our financial reporting. Such a failure, as well as difficulties in implementing required new or improved controls, could result in our inability to provide timely and reliable financial information and could adversely affect our business.

A discussion of a number of additional risk factors associated with our business is included in our Annual Report on Form 10-K for the fiscal year ended April 30, 2007.

Subtotals may not total due to rounding.

Table of Contents**COMPARISON OF RESULTS OF OPERATIONS FOR THE THREE AND NINE MONTHS ENDED****JANUARY 31, 2008 AND 2007:****REVENUES:**

For the three months ended January 31, 2008, the increase in revenues from the three months ended January 31, 2007 was attributable to an increase in services revenues. This was partially offset by a decrease in license fees revenue and maintenance. For the nine months ended January 31, 2008, the increase in revenues from the nine months ended January 31, 2007 was attributable to an increase in services and maintenance revenue streams. This was partially offset by a slight decrease in license fees revenue. International revenues represented approximately 9% of total revenue in both the three and nine months ended January 31, 2008. International revenues represented approximately 13% and 10% of total revenues in the three and nine months ended January 31, 2007, respectively. Our revenues, in particular our international revenues, may fluctuate substantially from period to period primarily because we derive most of our license fee revenue from a relatively small number of customers in a given period.

LICENSES. For the three months ended January 31, 2008, license fee revenues decreased 24% when compared to the same period in the prior year, due to a decrease in license fee sales from our Logility subsidiary. This decrease was partially offset by an increase from our ERP subsidiary. For the nine months ended January 31, 2008, license fee revenues decreased 1% when compared to the same period in the prior year, due primarily to decreased license fees from our Logility and ERP subsidiaries. We believe the decreases for the three and nine months ended January 31, 2008 were possibly due to the recent economic uncertainty in the U.S. markets. In the three and nine months ended January 31, 2008, license fee revenues from Logility decreased 40% and 1% to \$2.3 million and \$10.4 million, respectively. Logility constituted 54% and 73% of total license fee revenues for the three and nine months ended January 31, 2008, compared to 68% and 73% for the three and nine months ended January 31, 2007, respectively.

The direct sales channel provided approximately 70% and 66% of license fee revenues for the three and nine months ended January 31, 2008, compared to approximately 74% and 73%, respectively, in the three and nine months ended January 31, 2007. This decrease was due to lower license fee sales through our direct channel and to a lesser extent improved sales execution from our indirect channel, increasing the ratio of sales from our indirect channel when compared to the same periods last year. For the three months ended January 31, 2008, our margins after commissions on direct sales were approximately 77%, and our margins after commissions on indirect sales were approximately 46%. For the three months ended January 31, 2007, our margins after commissions on direct sales were approximately 82%, and our margins after commissions on indirect sales were approximately 52%. For both the nine months ended January 31, 2008 and 2007, our margins after commissions on direct sales were approximately 82%. For the nine months ended January 31, 2008 and 2007, our margins after commissions on indirect sales were approximately 49% and 46%, respectively. These margin calculations include only commission expense for comparative purposes and do not include other costs of license fees such as amortization of capitalized software.

SERVICES AND OTHER. For the three months ended January 31, 2008, the increase in services and other revenues were due largely to increased service revenue from our IT Consulting subsidiary as a result of the timing of project work and an increase in the number of customers when compared to the same period last year. For the three and nine months ended January 31, 2008, services and other revenues from our IT Consulting subsidiary increased 33% and 26%, respectively, when compared to the three and nine months ended January 31, 2007. For the three and nine months ended January 31, 2008, services and other revenues from Logility increased 9% and 25%, respectively, when compared to the three and nine months ended January 31, 2007. These increases were due primarily to timing of implementation projects resulting from the increase in license fee sales in recent prior quarters. For the three and nine months ended January 31, 2008, our ERP segment's services and other revenues increased 18% and decreased 1%, respectively, when compared to the prior year periods, with the increase in the three-month period being due to increased implementation services. We have observed that there is a tendency for services and other revenues, other than IT Consulting, to lag changes in license revenues by one to three quarters, as new licenses in one quarter often involve implementation and consulting services in subsequent quarters, for which we recognize revenues only as we perform those services.

MAINTENANCE. For the three and nine months ended January 31, 2008, maintenance revenues decreased 1% and increased 4%, respectively, when compared to the same periods in the prior year. The increase was primarily from Logility, whose maintenance revenues increased 1% and 7%, respectively, for the three and nine months ended January 31, 2008 when compared to the same periods in the prior year. Logility constituted 79% of total maintenance revenues for both the three and nine month periods ended January 31, 2008, compared to 78% and 77%, respectively, of total maintenance for the corresponding prior year periods. The increase in maintenance revenues for Logility for the nine months ended January 31, 2008 was due primarily to increased license fees in prior periods resulting in new maintenance revenue in the current period. Typically, our maintenance revenues have had a direct relationship to current and historic license fee revenues, since new licenses are the potential source of new maintenance customers.

Table of Contents

GROSS MARGIN:

The following table provides both dollar amounts and percentage measures of gross margin:

(\$000 s omitted)	Three months ended January 31,				Nine months ended January 31,			
	2008		2007		2008		2007	
Gross margin on license fees:	\$ 2,950	68%	\$ 4,311	75%	\$ 9,641	68%	\$ 9,958	69%
Gross margin on services and other:	3,365	32%	2,555	30%	9,512	30%	8,155	30%
Gross margin on maintenance:	5,186	73%	5,352	75%	15,539	74%	14,941	73%
Write-down of capitalized computer software development costs	(1,196)			nm	(1,196)			nm
Total gross margin:	\$ 10,305	47%	\$ 12,218	57%	\$ 33,496	50%	\$ 33,054	53%
Total gross margin excluding write-down of capitalized computer software development costs	\$ 11,501	52%	\$ 12,218	57%	\$ 34,692	51%	\$ 33,054	53%

nm - not meaningful

For the three and nine months ended January 31, 2008, total gross margin percentage decreased primarily due to decreases in the license fee gross margin partially offset by an increase in the services fee gross margin when compared to the same period in the prior year.

LICENSES. The decrease in gross margin percentage on license fees for the three and nine months ended January 31, 2008 were primarily due to lower license fee software sales and to a lesser extent increased indirect sales, which resulted in an increase in indirect commission expense. License fee gross margin percentage tends to be directly related to the level of license fee revenues due to the relatively fixed cost of computer software amortization expense and amortization of acquired software, which are the primary components of cost of license fees. To a lesser degree, our license fee gross margin percentage in a given period is related to the variable expense of DMI's agent commissions, and the proportion of license fees represented by DMI in that period.

SERVICES AND OTHER. For the three months ended January 31, 2008, the gross margin percentage for services and other increased when compared to the same periods in the prior fiscal year due to increased software implementation work from license fee sales in recent prior quarters. Services and other gross margin normally is directly related to the level of services and other revenues. The primary component of cost of services and other revenues is services staffing, which is relatively fixed in the short term.

MAINTENANCE. Maintenance gross margin percentage decreased for the three months ended January 31, 2008 when compared to the same period last year due to the decrease in overall maintenance revenue and timing of increased expenses. Maintenance gross margin percentage increased slightly for the nine months ended January 31, 2008 when compared to the same period last year due to the increase in overall maintenance revenue.

WRITE-DOWN OF CAPITALIZED COMPUTER SOFTWARE DEVELOPMENT COSTS. We make ongoing evaluations of the recoverability of our capitalized software projects by comparing the unamortized amount for each product to the estimated net realizable value of the product. If such evaluations indicate that the unamortized software development costs exceed the net realizable value, we write off the amount by which the unamortized software development costs exceed net realizable value. For the quarter ended January 31, 2008, we incurred a charge of \$1,196,000 related to the write-off of certain capitalized software development costs in our Logility subsidiary.

EXPENSES

Research and Development

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Gross product research and development costs include all non-capitalized and capitalized software development costs. A breakdown of the research and development costs is as follows:

Table of Contents

	Three months ended (in thousands)		
	January 31, 2008	Percent Change	January 31, 2007
Total capitalized computer software development costs	\$ 480	(3)%	\$ 495
Percentage of gross product research and development costs	21%		21%
Total research and development expense	1,757	(8)%	1,913
Percentage of total revenues	8%		9%
Total research and development expense and capitalized computer software development costs	\$ 2,237	(7)%	\$ 2,408
Percentage of total revenues	10%		11%
Total amortization of capitalized computer software development costs *	\$ 610	3%	\$ 591

nm: not meaningful

	Nine months ended (in thousands)		
	January 31, 2008	Percent Change	January 31, 2007
Total capitalized computer software development costs	\$ 1,661	(3)%	\$ 1,678
Percentage of gross product research and development costs	23%		24%
Total research and development expense	5,496	3%	5,358
Percentage of total revenues	8%		9%
Total research and development expense and capitalized computer software development costs	\$ 7,131	1%	\$ 7,036
Percentage of total revenues	11%		11%
Total amortization of capitalized computer software development costs *	\$ 1,886	(6)%	\$ 1,998

nm: not meaningful

* Included in cost of license fees

For the three and nine months ended January 31, 2008, gross product research and development costs slightly increased when compared to the same periods last year. Capitalized software development costs decreased when compared to the same periods last year. These changes were primarily due to increased research and development costs in our Logility and ERP segments. We expect capitalized product development costs to be lower in coming quarters as a result of fewer capitalizable R&D projects. We also expect capitalized software amortization expense to decrease when compared to the three and nine months ended January 31, 2007 as a result of the current quarter write-down of capitalized software assets. Capitalized computer software development costs include the effects of applying purchase accounting as a result of Logility, Inc.'s share repurchases.

Sales and Marketing

For the three and nine months ended January 31, 2008, sales and marketing expenses increased when compared to the same period a year ago due to increased headcount and marketing related expenses that we partially offset with a decrease in commission expense as a result of lower license fee sales through our direct channel. We generally include commissions on indirect sales in cost of sales.

Table of Contents

General and Administrative

For the three and nine months ended January 31, 2008, general and administrative expenses when compared to the same period a year ago decreased primarily due to lower management bonus compensation expense in the Company's current year financial results.

At January 31, 2008, the total number of employees was 331 compared to 300 at January 31, 2007.

Other Income

Other income is comprised of interest and dividend income, rental income and realized and unrealized gains and losses from investments. For the three and nine months ended January 31, 2008, the decrease in other income was due primarily to realized/unrealized loss on investments compared to a gain in the same period of the prior year. This was partially offset by an increase in interest income as a result of an increase in the average cash balance and improved yields on interest rates, particularly on money market accounts when compared to the prior year periods.

Income Taxes

In the three and nine months ended January 31, 2008, we recorded income tax expense of approximately \$461,000 and \$3.4 million, respectively, compared to \$1.6 million and \$3.8 million recorded in the three and nine months ended January 31, 2007. We recognize deferred tax assets and liabilities based on the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases. We measure deferred tax assets and liabilities using statutory tax rates in effect in the year in which we expect the differences to reverse. We establish a deferred tax asset for the expected future benefit of net operating loss and credit carry-forwards. Under Statement of Financial Accounting Standards No. 109 (SFAS No. 109), *Accounting for Income Taxes*, we cannot recognize a deferred tax asset for the future benefit of our net operating losses, tax credits and temporary differences unless we can establish that it is more likely than not that the deferred tax asset would be realized.

Minority Interest

Minority interest is a function of our majority-owned subsidiaries' earnings or losses, with minority interest losses recorded when these subsidiaries have earnings, and minority interest earnings recorded when they have losses. Due to Logility's net earnings, we recorded minority interest expenses of approximately \$107,000 and \$557,000, respectively, for the three and nine months ended January 31, 2008 and \$248,000 and \$513,000, respectively, for the three and nine months ended January 31, 2007.

LIQUIDITY, CAPITAL RESOURCES AND FINANCIAL CONDITION

Sources and Uses of Cash

We have historically funded, and continue to fund, our operations and capital expenditures primarily with cash generated from operating activities. The changes in net cash that our operating activities provide generally reflect the changes in net earnings and non-cash operating items plus the effect of changes in operating assets and liabilities, such as investment trading securities, trade accounts receivable, trade accounts payable, accrued expenses and deferred revenue. We have no debt obligations or off-balance sheet financing arrangements, and therefore we used no cash for debt service purposes.

The following tables show information about our cash flows and liquidity positions during the nine months ended January 31, 2008 and 2007. You should read this table and the discussion that follows in conjunction with our condensed consolidated statements of cash flows contained in Item 1. Financial Statements in Part I of this report and in our Annual Report on Form 10-K for the fiscal year ended April 30, 2007.

	Nine Months Ended January 31, (in thousands)	
	2008	2007
Net cash provided by operating activities	\$ 9,908	\$ 13,386
Net cash provided by (used in) investing activities	13,732	(161)
Net cash used in financing activities	(2,161)	(3,936)

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Net change in cash and cash equivalents	\$ 21,479	\$ 9,289
---	-----------	----------

For the nine months ended January 31, 2008, the net decrease in cash provided by operating activities when compared to the same period last year was due primarily to an increase in customer accounts receivable, prepaid expenses and excess tax

Table of Contents

benefit from stock-based compensation and the decreases in our accrued compensation and other liabilities, deferred income tax, deferred revenue and depreciation and amortization. This was partially offset by an increase in tax benefit of stock options exercised and a charge for asset impairment. The increase in cash provided by investing activities when compared to the same period in the prior year was due primarily to a reduction in purchases of investments, which was partially offset by an increase in purchases of property and equipment. Cash used in financing activities decreased when compared to the same period in the prior year, due primarily to excess tax benefits from stock-based compensation and higher proceeds from exercise of stock options in the nine months ended January 31, 2008 when compared to the same period in the prior year. This was partially offset by higher dividend payments in the nine months ended January 31, 2008.

The following table shows net changes in total cash, cash equivalents, and investments, which is one measure management uses to view net total cash generated by our activities:

	As of January 31, (in thousands)	
	2008	2007
Cash and cash equivalents	\$ 67,106	\$ 38,714
Short and Long-Term Investments	7,790	31,204
Total cash and short and long-term investments	\$ 74,896	\$ 69,918

Net increase in total cash and investments (nine months ended January 31) \$ 2,127 \$ 7,270
Our total activities generated cash and investments during the nine months ended January 31, 2008, due primarily to the changes in operating assets and liabilities noted above.

Days Sales Outstanding (DSO) in accounts receivable were 72 days as of January 31, 2008, compared to 68 days as of January 31, 2007. This increase was due primarily to timing of closing license fees sales toward the end of the current quarter, which resulted in an increase in the accounts receivable balance. Our current ratio was 3.8 to 1 and 3.2 to 1 on January 31, 2008 and 2007, respectively.

As a result of the positive cash flow from operations our business has generated in recent periods, and because we have \$74.9 million in cash and investments with no debt, we believe that our sources of liquidity and capital resources will be sufficient to satisfy our presently anticipated requirements during at least the next twelve months for working capital, capital expenditures and other corporate needs. However, at some future date we may need to seek additional sources of capital to meet our requirements. If such need arises, we may be required to raise additional funds through equity or debt financing. Neither we nor Logility currently have a bank line of credit. We can provide no assurance that bank lines of credit or other financing will be available on terms acceptable to us. If available, such financing may result in dilution to our shareholders or higher interest expense.

The sources of free cash flow that we have used for dividend payments include cash we generate through our operations (exclusive of cash that Logility generates), supplemented by our cash and investments (exclusive of Logility's cash and investments).

On August 22, 2002, our Board of Directors approved a resolution authorizing the repurchase of up to 2.0 million shares of our Class A common stock. These repurchases have been and will be made through open market purchases at prevailing market prices. The timing of any repurchases will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. For this repurchase plan, through March 10, 2008, we have repurchased 247,232 shares of common stock at a cost of approximately \$1.1 million. We did not make any repurchases of our common stock in the quarter ended January 31, 2008.

On December 15, 1997, the Logility Board of Directors approved a resolution authorizing Logility to repurchase up to 350,000 shares of its common stock through open market purchases at prevailing market prices. Logility completed this repurchase plan in November 1998, at which time Logility adopted an additional repurchase plan for up to 800,000 shares. In February 2003, Logility's Board of Directors approved a resolution authorizing it to repurchase an additional 400,000 shares for a total authorized repurchase amount of 1,550,000 shares. The timing of any repurchases depends on market conditions, the market price of Logility's common stock and Logility's assessment of its liquidity and cash flow needs. For all repurchase plans, through March 10, 2008, Logility had purchased a cumulative total of 1,326,104 shares at a total cost of \$8.1 million. In the first quarter of fiscal 2008, Logility purchased 30,000 shares of its common stock at an average price of \$11.26 per share for a total price of \$338,000. Logility did not make any repurchases of its common stock in the quarter ended January 31, 2008.

Table of Contents

See Part II, Item 2 for a table summarizing stock repurchases in the last quarter and the number of remaining shares available for purchase under the Company's and Logility's existing repurchase program.

RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which becomes effective for fiscal periods beginning after November 15, 2007. SFAS No. 157 addresses the definition of fair value, the methods used to measure fair value and the expanded disclosures about fair value measurement of a company's assets and liabilities. SFAS No. 157 requires that the fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. We do not expect this issue to have a material impact on our 2009 consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115*, which becomes effective for fiscal periods beginning after November 15, 2007. Under SFAS No. 159 companies may elect to measure specified financial instruments and warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. The election called the fair value option will enable some companies to reduce volatility in reported earnings caused by measuring related assets and liabilities differently. We do not expect this issue to have a material impact on our 2009 consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, which becomes effective for fiscal periods beginning after December 15, 2008. SFAS No. 141(R) requires all business combinations completed after the effective date to be accounted for by applying the acquisition method (previously referred to as the purchase method). Companies applying this method will have to identify the acquirer, determine the acquisition date and purchase price and recognize at their acquisition date fair values the identifiable assets acquired, liabilities assumed and any non-controlling interests in the acquiree. In the case of a bargain purchase, the acquirer is required to re-evaluate the measurements of the recognized assets and liabilities at the acquisition date and recognize a gain on that date if an excess remains. We do not expect this issue to have a material impact on our 2010 consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements, an Amendment of ARB 51*, which becomes effective for fiscal periods beginning after December 15, 2008. This statement amends ARB 51 to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. The statement requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the non-controlling interest. It also requires disclosure on the face of the consolidated statement of income, the amounts of consolidated net income attributable to the parent and to the non-controlling interest. In addition, this statement establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that does not result in deconsolidation and requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. We do not expect this issue to have a material impact on our 2010 consolidated financial statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We have based the following discussion and analysis of financial condition and results of operations on our financial statements, which we have prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements for the year ended April 30, 2007, describes the significant accounting policies that we have used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to those related to VSOE, bad debts, capitalized software costs, goodwill, intangible asset impairment, stock-based compensation, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

We believe the critical accounting policies listed below affect significant judgments and estimates used in the preparation of the financial statements.

Revenue Recognition. We recognize revenue in accordance with Statement of Position (SOP) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Software Revenue Recognition with Respect to Certain Transactions*. We recognize license

Table of Contents

revenues in connection with license agreements for standard proprietary software upon delivery of the software, provided we deem collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and vendor specific objective evidence exists with respect to any undelivered elements of the arrangement. We generally bill maintenance fees annually in advance and recognize the resulting revenues ratably over the term of the maintenance agreement. We derive revenue from services which primarily include consulting, implementation, and training. We bill for these services primarily under time and materials arrangements and recognize fees as we perform the services. Deferred revenues represent advance payments or billings for software licenses, services, and maintenance billed in advance of the time we recognize revenues. We record revenues from sales of third-party products in accordance with Emerging Issues Task Force Issue 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent* (EITF 99-19). Furthermore, in accordance with EITF 99-19, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not the Company 1) acts as principal in the transaction, 2) takes title to the products, 3) has risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and 4) acts as an agent or broker with compensation on a commission or fee basis. Accordingly, our sales through the DMI channel are typically recorded gross.

Generally, our software products do not require significant modification or customization. Installation of the products is routine and is not essential to the functionality of the product. Our sales frequently include maintenance contracts and professional services with the sale of our software licenses. We have established vendor-specific objective evidence of fair value (VSOE) for our maintenance contracts and professional services. We determine fair value based upon the prices we charge to customers when we sell these elements separately. We defer maintenance revenues, including those sold with the initial license fee, based on VSOE, and recognize the revenue ratably over the maintenance contract period. We recognize consulting and training service revenues, including those sold with license fees, as we perform the services based on their established VSOE. We determine the amount of revenue we allocate to the licenses sold with services or maintenance using the residual method of accounting. Under the residual method, we allocate the total value of the arrangement first to the undelivered elements based on their VSOE and allocate the remainder to license fees.

Allowance for Doubtful Accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of customers to make required payments. If the financial condition of these customers were to deteriorate, resulting in an impairment of their ability to make payments, we may require additional allowances or we may defer revenue until we determine that collectibility is probable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment terms when we evaluate the adequacy of the allowance for doubtful accounts.

Valuation of Long-Lived and Intangible Assets. In accordance with Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets (SFAS No. 142), we do not amortize goodwill and other intangible assets with indefinite lives. Our goodwill is subject to annual impairment tests, which require us to estimate the fair value of our business compared to the carrying value. The impairment reviews require an analysis of future projections and assumptions about our operating performance. Should such review indicate the assets are impaired, we would record an expense for the impaired assets.

In accordance with Financial Accounting Standards Board Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, (SFAS No. 144), long-lived assets, such as property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability would be measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. The determination of estimated future cash flows, however, requires management to make estimates. Future events and changes in circumstances may require us to record a significant impairment charge in the period in which such events or changes occur. Impairment testing requires considerable analysis and judgment in determining results. If other assumptions and estimates were used in our evaluations, the results could differ significantly.

Annual tests or other future events could cause us to conclude that impairment indicators exist and that our goodwill is impaired. For example, if we had reason to believe that our recorded goodwill and intangible assets had become impaired due to decreases in the fair market value of the underlying business, we would have to take a charge to income for that portion of goodwill or intangible assets that we believed were impaired. Any resulting impairment loss could have a material adverse impact on our financial position and results of operations. At January 31, 2008, our goodwill balance was \$11.5 million and our intangible assets with definite lives balance was \$1.2 million, net of accumulated amortization.

Valuation of Capitalized Software Assets. We capitalize certain computer software development costs in accordance with SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*. Costs

Table of Contents

incurred internally to create a computer software product or to develop an enhancement to an existing product are charged to expense when incurred as research and development expense until technological feasibility for the respective product is established. Thereafter, all software development costs are capitalized and reported at the lower of unamortized cost or net realizable value. Capitalization ceases when the product or enhancement is available for general release to customers. We make ongoing evaluations of the recoverability of our capitalized software projects by comparing the amount capitalized for each product to the estimated net realizable value of the product. If such evaluations indicate that the unamortized software development costs exceed the net realizable value, we write off the amount by which the unamortized software development costs exceed net realizable value. We amortize capitalized computer software development costs ratably based on the projected revenues associated with the related software or on a straight-line basis over three years, whichever method results in a higher level of amortization. Amortization of capitalized computer software development costs is included in the cost of license revenues in the consolidated statements of operations.

Stock-Based Compensation. Effective May 1, 2006, we adopted the fair value recognition provisions of SFAS 123(R) using the modified prospective transition method. Under that transition method, compensation cost recognized on or after May 1, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of May 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted on or after May 1, 2006, based on the grant date fair value estimated in accordance with SFAS 123(R). Results for prior periods have not been restated. SFAS 123(R) requires that cash flows resulting from the tax benefits generated by tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows.

Management makes judgments and assumptions related to volatility, the expected term and the forfeiture rate in connection with the calculation of stock compensation expense. We periodically review all assumptions used in our stock option pricing model. Changes in these assumptions could have a significant impact on the amount of stock compensation expense.

Income Taxes. We provide for the effect of income taxes on our financial position and results of operations in accordance with SFAS No. 109, *Accounting for Income Taxes*, including the recently adopted SFAS Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of SFAS Statement No. 109*. Under this accounting pronouncement, income tax expense is recognized for the amount of income taxes payable or refundable for the current year and for the change in net deferred tax assets or liabilities resulting from events that are recorded for financial reporting purposes in a different reporting period than recorded in the tax return. Management must make significant assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against our net deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws, allowable deductions and projected tax credits. Changes in tax law or our interpretation of tax laws could significantly impact the amounts provided for income taxes in our financial position and results of operations. Our assumptions, judgments and estimates relative to the value of our net deferred tax asset take into account our expectations of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years, which could significantly increase tax expense, could render inaccurate our current assumptions, judgments and estimates of recoverable net deferred taxes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency. In both the three and nine months ended January 31, 2008, we generated approximately 9% of our revenues outside the United States. We typically make international sales through our foreign subsidiaries or our Logility subsidiary and denominate those sales in U.S. Dollars, British Pounds Sterling or Euros. However, expenses incurred in connection with these sales are typically denominated in the local currencies. For the three and nine months ended January 31, 2008, we recorded exchange rate gains of approximately \$87,000 and \$85,000, respectively, compared to exchange rate gains of approximately \$28,000 and \$55,000, respectively, for the three and nine months ended January 31, 2007, respectively. We estimate that a 10% movement in foreign currency rates would result in up to a \$706,000 exchange rate gain or loss affecting our financial condition or results of operations for the nine months ended January 31, 2008. We have not engaged in any hedging activities.

Interest rates and other market risks. We have no debt and therefore limit our discussion of interest rate risk to risk associated with our investment profile. We manage our interest rate risk by maintaining an investment portfolio of trading and held-to-maturity investments with high credit quality and relatively short average maturities. These instruments include, but are not limited to, money-market instruments, bank time deposits, and taxable and tax-advantaged variable rate and fixed rate obligations of corporations, municipalities, and national, state, and local government agencies, in accordance with an investment policy approved by our Board of Directors. These instruments are denominated in U.S. dollars. The fair market value of securities as of January 31, 2008 was approximately \$73.9 million.

Table of Contents

We also hold cash balances in accounts with commercial banks in the United States and foreign countries. These cash balances represent operating balances only and are invested in short-term time deposits of the local bank. Such operating cash balances held at banks outside the United States are denominated in the local currency and are minor.

Many of our investments carry a degree of interest rate risk. When interest rates fall, our income from investments in variable-rate securities declines. When interest rates rise, the fair market value of our investments in fixed-rate securities declines. In addition, our investments in equity securities are subject to stock market volatility. Due in part to these factors, our future investment income may fall short of expectations or we may suffer losses in principal if forced to sell securities, which have seen a decline in market value due to changes in interest rates. We attempt to mitigate risk by holding fixed-rate securities to maturity, but, if our liquidity needs force us to sell fixed-rate securities prior to maturity, we may experience a loss of principal.

Inflation. Although we cannot accurately determine the amounts attributable thereto, we have been affected by inflation through increased costs of employee compensation and other operational expenses. To the extent permitted by the marketplace for our products and services, we attempt to recover increases in costs by periodically increasing prices.

Item 4. Controls and Procedures Management's Report on Internal Control Over Financial Reporting

As of the end of the period covered by this report, our management evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) under the supervision and with the participation of our chief executive officer and chief financial officer. Based on and as of the date of such evaluation, the aforementioned officers have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Our chief executive officer and chief financial officer, with the assistance of our Disclosure Committee, have conducted an evaluation of the effectiveness of our disclosure controls and procedures as of January 31, 2008. We perform this evaluation on a quarterly basis so that the conclusions concerning the effectiveness of our disclosure controls and procedures can be reported in our annual report on Form 10-K and quarterly reports on Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of January 31, 2008.

We believe our financial statements fairly present in all material respects our financial position, results of operations and cash in our quarterly report on Form 10-Q.

Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are not currently involved in legal proceedings requiring disclosure under this item.

Item 1A. Risk Factors

There have been no material changes to the risk factors as described in our Annual Report on Form 10-K for our fiscal year ended April 30, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes repurchases of our stock in the three months ended January 31, 2008:

Table of Contents

Fiscal Period	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Average Price Paid Per Share	Total Number of Shares Purchased	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs*
November 1, 2007 through November 30, 2007	0	\$ 0.00	0	1,752,768
December 1, 2007 through December 31, 2007	0	\$ 0.00	0	1,752,768
January 1, 2008 through January 31, 2008	0	\$ 0.00	0	1,752,768
Total Fiscal 2008 Third Quarter	0	\$ 0.00	0	1,752,768

* Our Board of Directors approved the above share purchase authority on August 19, 2002, when the Board approved a resolution authorizing the Company to repurchase up to 2.0 million shares of Class A common stock. This action was announced on August 22, 2002. The authorization has no expiration date.

The following table summarizes repurchases of stock made by our Logility subsidiary in the three months ended January 31, 2008:

Fiscal Period	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Average Price Paid Per Share	Total Number of Shares Purchased	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs*
November 1, 2007 through November 30, 2007	0	\$ 0.00	0	223,896
December 1, 2007 through December 31, 2007	0	\$ 0.00	0	223,896
January 1, 2008 through January 31, 2008	0	\$ 0.00	0	223,896
Total Fiscal 2008 Third Quarter	0	\$ 0.00	0	223,896

* The Logility Board of Directors approved the above share purchase authority in December 1997, November 1998 and February 2003, when the Logility Board approved resolutions authorizing Logility to repurchase an aggregate of up to 1.6 million shares of common stock. The authorizations have no expiration dates.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.
