### Net Financial Income

Net income for financial intermediation with the private sector grew 34.2% compared to the third quarter of 2012 and 4.4% compared to the previous quarter in 2013. The higher volume of activity, efficient price management and a good mix of liabilities explain the stable increase in the private net interest margin.

Income from securities and short term investments includes non-recurring income originated by variations in the valuation of public securities. Both, the quarter under analysis and the same quarter of 2012 registered gains of AR\$ 73.9 million and AR\$ 55.1 million, respectively, whereas the previous quarter recorded a loss of AR\$ 139.8 million.

In addition, the foreign exchange difference line item registered a significant gain during the period.

## Income from Public and Private Securities

The Bank has the discretion to mark-to-market its total public bonds portfolio; because of that, such income includes the

unrealized losses/gains from variations in the valuations of the portfolio.

The increase compared to the same quarter of the previous year is mainly due to higher consumption with credit cards plus higher fees originated by PSA Finance, fee charges on deposits accounts and those from insurance, which was, partially offset by the higher fees paid for promotions, especially those related to the LANpass program.

The performance compared to the previous quarter of 2013 was similar.

Administrative Expenses

Administrative expenses reflected increases of 34.6% and 10.6% compared to both, the third quarter of 2012 and the previous quarter, respectively.

Compared to the same quarter of 2012 personnel expenses grew 31.4%, mainly reflecting salary increases due to the labor agreement and a higher number of employees.

General expenses grew 38.7% in the same period, mainly due to higher taxes as a consequence of the impact of the purchase of the new building, an increase in the activity volume and a change in proportional tax rates, in addition to the effects of price increases.

In the last three months, personnel expenses grew 2.9%, and general expenses 21.3%; such increase is mainly explained by the impact of the purchase of the new building, as was mentioned previously and higher advertisement expenses due to the launch of the new *Estás dulce*, simple loans campaign, the opening of new VIP spaces and the re-localization of the Puerto Madero Este branch.

As of September 30, 2013, the Bank and its subsidiaries had 5,200 employees. The branch office network totaled 273 offices, including 244 consumer branch offices and 29 branch offices specializing in the middle-market segment.

Corporate banking included 7 business units grouped by industry. Complementing its distribution network, the Bank has 12 in-company branches and 2 point of sale outlets, 654 ATM's and 726 quick deposit boxes ( QDBs ).

#### Other Income / Expenses

Other income/expenses totaled a loss of AR\$ 23.9 million during the third quarter of 2013; an increase compared to the same quarter of 2012 due to higher charges for other contingencies and for labor and commercial trials, which was partially offset by higher recovered loans.

Compared to the previous quarter, the variation is explained by higher provisions accounted for by joint venture companies, and the AR\$ 9.4 million dividend from Interbanking received and accounted by the Bank in the previous quarter.

Income from Equity Investments

Income from equity investments sets forth net income from related companies that are not consolidated. During the third quarter of 2013, a gain of AR\$ 38.9 million was recorded, mainly due to the sale of Consolidar ART and BBVA Francés stake in Rombo Compañía Financiera, and the annual valuation for the stake in Visa.

Balance and activity

Total Public Sector Exposure

Exposure to the public sector's National treasury net of holdings linked to reverse repo transactions decreased by 23.8% compared to the same quarter of 2012, mainly due to the sale of Bonar XIV portfolio, partially offset by purchases of foreign currency denominated bonds.

The Bank's portfolio of BCRA bills and notes also registered variations during the period under analysis, mainly due to the liquidity management implemented.

As of September 30, 2013, public sector National treasure assets represented 2.9% of the Bank's total assets. Total exposure to BCRA's bills and notes net of holdings linked to reverse repo transactions, represented 3.7% of the Bank's total assets.

## Asset Quality

BBVA Francés maintains a leader position in terms of risk taken, as consequence of the effective risk policy implemented by the Bank.

As of September 30, 2013, the asset quality ratio (non-performing loans/total loans) was 0.74%, while the coverage ratio (provisions/non-performing loans) reached 258.08%.

Compared to the same quarter of 2012 the higher ratio is due to a rise of non-performing loans as well as an increase in the performing portfolio.

In contrast, compared to the previous quarter of 2013, the ratio improved, mainly due to lower charges on specific provisions and higher collects of the non-performing portfolio.
