Operating leases revenues decreased due to an impact from gains on sales of large-scale rental property in Japan during the same period of the previous fiscal year. On the other hand, life insurance premiums and related investment income in ORIX Life Insurance Corporation (hereinafter, ORIX Life Insurance) increased due to an increase in new insurance contracts and an improvement in investment income from assets under variable annuity and variable life insurance contracts compared to the same period of the previous fiscal year during which investment income decreased due to deterioration of the market environment. In addition, sales of goods and real estate increased due primarily to revenues generated by subsidiaries in the principal investment business, and services income increased due primarily to an expansion in the environment and energy business.

Total expenses increased 40% to ¥700,317 million compared to ¥500,522 million during the same period of the previous fiscal year. Costs of goods and real estate sold and services expense increased in line with the aforementioned increased revenues. In addition, life insurance costs increased due to the aforementioned increase in new contracts and the improvement in investment income from assets under variable annuity and variable life insurance contracts.

Equity in net income of affiliates increased mainly due to the recognition of significant gains on sales of investments in real estate joint ventures. Gains on sales of subsidiaries and affiliates and liquidation losses, net decreased compared to the same period of the previous fiscal year during which gains on sales of shares of affiliates were recorded in the Investment and Operation segment.

As a result of the foregoing, income before income taxes for the first consolidated period increased 15% to ¥135,611 million compared to ¥118,434 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation shareholders increased 17% to ¥89,712 million compared to ¥76,769 million during the same period of the previous fiscal year.

The economy of the United States has been on a continuing trend of recovery with improvements in employment and income environments, and other areas have also been on a moderate recovery. Although interest rates remain low worldwide, the prospect of rising interest rates has been strong in the United States. The asset management industry is expected to increase AuM due to the increase in pension assets and the high-income class population over the mid- and long-term. Also, the aviation industry is expected to continue to expand its market size against the backdrop of increasing passenger demand mainly in emerging countries. In addition, there are political and geopolitical tensions in certain regions that need to be monitored carefully.

**Note 1:** The Company evaluates the performance of segments based on income before income taxes, adjusted for net income attributable to the noncontrolling interests and net income attributable to the redeemable noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

**Note 2:** For those VIEs that are used for securitization and are consolidated, for which the VIE's assets can be used only to settle related obligations of those VIEs and the creditors (or beneficial interest holders) do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on the amount of the Company and its subsidiaries' net investments in the VIEs, which is different from the amount of total assets of the VIEs, and accordingly, segment revenues are also measured at a net amount representing the revenues earned on the net investments in the VIEs. Certain gains or losses related to assets and liabilities of consolidated VIEs, which are not ultimately attributable to the Company and its subsidiaries, are excluded from segment profits.

**Note 3:** Inter-segment transactions are included in segment revenues, and eliminations of inter-segment transactions are included in difference between segment total and consolidated amounts.
