First Quarter 2003 Results  
-----

Unocal Corporation's net earnings were \$134 million, or 52 cents per share (diluted), in the first quarter of 2003 compared with \$22 million, or 9 cents per share (diluted), in the first quarter of 2002. In the first quarter of 2003, net earnings included an after-tax charge of \$83 million, or 30 cents per share (diluted), from the cumulative effects of accounting changes.

Continuing Operations

First Quarter Results: Earnings from continuing operations increased by \$195 million in the first quarter of 2003 compared to the same quarter a year ago, primarily reflecting improved results from the Company's exploration and production operations, due to higher worldwide natural gas and liquids prices. Higher worldwide commodity prices increased net earnings by approximately \$230 million. The Company's worldwide average realized natural gas price, including a loss of 27 cents per thousand cubic feet ("Mcf") from hedging activities, was \$3.90 per Mcf for the first quarter of 2003. This was an increase of \$1.44 per Mcf, or 59 percent, from the \$2.46 per Mcf, including a benefit of 9 cents per Mcf from hedging activities, realized during the first quarter of 2002. In the first quarter of 2003, the Company's worldwide average liquids price was \$29.99 per barrel, which was an increase of \$11.13 per barrel, or 59 percent, from the same period a year ago. The Company's hedging program lowered the average realized liquids price by 50 cents in the first quarter of 2003 while the first quarter of 2002 included a gain of 6 cents per barrel from hedging activities. The first quarter of 2003 included an after-tax gain of \$2 million in mark-to-market accruals and realized gains/losses for non-hedge commodity derivatives recorded by the Company's Northrock Resources Ltd. subsidiary, compared to an after-tax loss of \$4 million in the same period a year ago. After-tax environmental and litigation expenses were \$17 million in the first quarter of 2003, compared with \$26 million in the same period a year ago.

These positive variance factors were partially offset by higher dry hole costs, higher depreciation and depletion rates (including asset retirement obligation accretion) and lower North America liquids production, which reduced net earnings by approximately \$25 million, \$20 million and \$10 million, respectively, in the first quarter of 2003 compared with the same period a year ago. North America liquids production averaged 88,000 barrels per day in the first quarter of 2003, down from 99,000 barrels per day a year ago. Most of the production decline was due to natural declines in existing fields in the Gulf of Mexico and the divestiture of various properties in Canada, onshore U.S. and the Gulf of Mexico.

Cumulative Effects of Accounting Changes

In the first quarter of 2003, the Company recorded a non-cash \$83 million after-tax charge consisting of the cumulative effect of a change in accounting principle related to the initial adoption of Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations." The Company also increased its accrued abandonment and restoration liabilities by \$268 million and increased its net properties by \$138 million on the consolidated balance sheet as a result of the adoption of SFAS No.143.

## Edgar Filing: UNOCAL CORP - Form 8-K

-----  
Revenues from continuing operations for the first quarter of 2003 were \$1.83 billion compared with \$1.05 billion for the same period a year ago. The increase primarily reflected higher natural gas and liquids prices.

### Financial Condition

-----

Cash flows from operating activities, including working capital and other changes, was \$685 million in the first quarter of 2003 compared with \$271 million in the same period a year ago. The increase principally reflected the effects of higher worldwide commodity prices.

Capital expenditures were \$429 million for the first quarter of 2003 compared with \$390 million in the same period a year ago.

The Company's total consolidated debt, including current maturities, at March 31, 2003, was \$2.92 billion, compared with \$3.0 billion at the end of 2002. Cash and cash equivalents on hand totaled \$356 million at March 31, 2003, up from \$168 million at the end of 2002.

### Second Quarter 2003 and Full-Year 2003 Outlook

-----

The Company's current net worldwide daily production estimate for the second quarter of 2003 is between 460,000 and 470,000 barrels-of-oil equivalent ("BOE"). Based on current market prices, the Company's net earnings for the second quarter are expected to change 4 cents per share for every \$1 change in the Company's average worldwide realized price for crude oil and 2 cents per share for every 10-cent change in its average realized North America natural gas price, excluding the effect of hedging activities. For the second quarter of 2003, the Company has hedged 19.7 billion Btu of Lower 48 natural gas production with pricing collars between \$4.21 and \$5.06 per MMBtu, and 1.5 million barrels of Lower 48 crude oil with collars between \$28.94 and \$32.71 per barrel. Second quarter hedged volumes represent approximately 32 percent and 35 percent of expected Lower 48 natural gas and crude oil production volumes, respectively. The Company also forecasts second quarter pre-tax dry hole costs of \$40 million to \$50 million.

The Company currently estimates its full-year 2003 production to average between 475,000 to 490,000 BOE per day. This production forecast includes the associated production loss of approximately 5,000 BOE per day from divestitures that the Company has completed so far this year. These divestitures included various properties in Canada, onshore U.S. and the Gulf of Mexico and netted the Company \$64 million in proceeds. The Company has additional property divestitures pending or planned and additional adjustments to the production forecast range will be made as further divestitures are completed. The production forecast reflects the start of new oil production from the West Seno field in Indonesia, currently scheduled to begin late in the second quarter of 2003. The Company's total actual production for the year could also be impacted by cost recovery volume fluctuations under the Company's various foreign Production Sharing Contracts ("PSCs") due to changes in commodity prices, demand for natural gas in Thailand, and production and exploration performance in the Gulf of Mexico.

Based on current market prices, the Company's net earnings for the full-year are expected to change 14 cents per share for each \$1 change in the Company's average worldwide realized price for crude oil and 7 cents per share for every 10-cent change in its average realized North America natural gas price, excluding the effect of hedging activities. For the remaining three quarters of 2003, the Company has hedged 43.4 billion Btus of Lower 48 natural gas production with collars of \$3.98 to \$4.84 per MMBtu. This volume represents approximately 25 percent of expected Lower 48 natural gas production. Hedged crude oil production volumes beyond the second quarter levels, discussed in the previous paragraph, are immaterial. The Company forecasts pre-tax dry

Edgar Filing: UNOCAL CORP - Form 8-K

hole costs of \$155 million to \$185 million and that pre-tax pension-related expenses will increase over 2002 by approximately \$55 million to \$60 million.

Cautionary Statement  
-----

This filing contains certain forward-looking statements about Unocal's future production rates, commodity prices, dry hole costs, divestitures, pension costs, future operations, drilling plans, business transactions and other matters. These statements are not guarantees of future performance. The statements are based upon Unocal's current expectations and beliefs and are subject to a number of known and unknown risks and uncertainties that could cause actual results to differ materially from those described in the forward looking statements. Actual results could differ materially as a result of changes in commodity prices, the levels of the Company's oil and gas production, development and exploratory drilling results, the amounts of the Company's operating cash flow and other capital resources available to fund its capital expenditures, government approvals, regulatory, geological, operating and economic considerations, and other factors disclosed on pages 56 to 64 of Unocal's 2002 Annual Report on Form 10-K.

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
